PSU Provost Challenge

The Provost's Challenge allocated \$3 million in 2013 to fund and support twenty-four innovative faculty-staff activities to accelerate online learning and the use of innovative technology in educational delivery and to improve student success and graduation. The Provost's Challenge was fully implemented in June 2015

 PROVOST'S
CHALLENGE

The Provost's Challenge is accelerating PSU's transformation by **funding twenty-four faculty and staff-initiated projects** that enhance online learning and the use of innovative technology in educational delivery to improve student success and graduation.

PDX Open: Reducing Student Textbook Costs

Campus-wide call for proposals

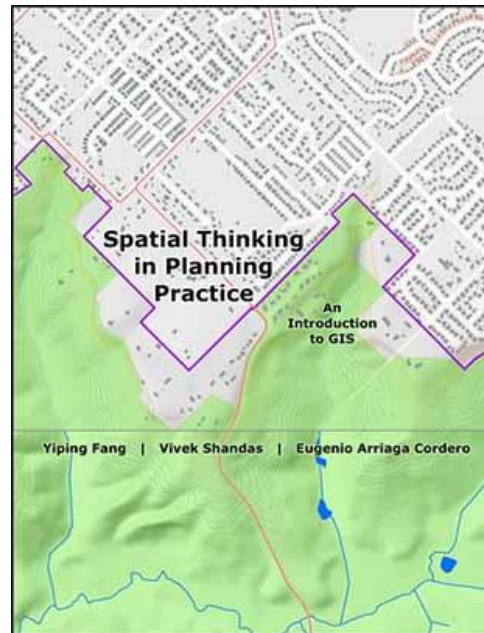

- Geared towards a specific field of study
- Preferred proposals that applied to multiple, high-enrollment undergraduate courses

Project offered

- Stipend of \$2,500
- Assistance with copyright clearance
- Cover design templates
- ISBN registration
- Creative Commons licensing support
- Print on demand services
- Project Manager

Project started in March 2014 and all five textbooks were completed by December 2014 / January 2015

Outcome

Impact

- Heightened the visibility of PSU's unique strengths by providing access to high quality open educational content created by PSU faculty
- Provided the library an opportunity to build a scholarly publishing infrastructure
- Gained a fuller understanding of faculty author needs related to open access textbook publishing
- Strengthened the Library's impact on teaching and learning at PSU
- Saved Students money

Money Saved - One Term

	Cost of Required Textbook	Number of Students	Total Savings
Preadvanced Japanese (Fall 2014)	\$100.00	17	\$1,700.00
Spatial Thinking in Planning Practice: An Introduction to GIS (Winter 2015)	\$141.14	22	\$3,105.08
Comprehensive Individualized Curriculum and Instructional Design (Winter 2015)	\$135.00	60	\$8,100.00
Introduction to Mathematical Analysis (Winter 2015)	\$100.00	34	\$3,400.00
Gender and Sexualities: An Inquiry (Winter 2015)	\$100.00	75	\$7,500.00
Total			\$23,805.08

Lessons Learned

Idea of
 creating a video
 lecture as part of a
 text

Positives

- Support from the LIB
 - reachable
 - accessible
 - Support w/ completing work (pm)
 - liked that they could easily fix typos (through additional editions)
- Being able to engage graduate students in creating the text
- anyone in the world can now access the texts
- Time deadlines helpful, but unclear about how estimating to complete
- Students like that the text is free
- idea of whether others in MTH dept. would also use this text

Lessons (reflections)

- weren't clear about book chapter authorship / copyright permissions pursued for a while, but ran into significant challenges
- warn authors in beginning about this - ? that they could do open source, too
- idea of having someone to edit (Library should provide or secure this service)
- idea of PSU creating a textbook template
- Copyright issues (PSU ownership) need to be worked out
- Suggestion to have sharing experiences between authors during the project, too
- Place for people who use text to provide feedback through PDX Scholar (Karen will)
- Workshop at beginning (can open access), too, would be helpful
- offering peer reviewers prior to submissions. ? finding the reviewers (accuracy checker in Math) check: let authors know - but not public
- MIT would not benefit from a template
- MIT issues were all technical
- Departmental decisions about how texts are used in the future
- Lack of clarity when they asked financial questions about the budget for MIT text was not helpful (lots of back & forth to illicit responses from Sally B.)
- If open to the world, quality is very important for Junior faculty, open source books aren't valued as highly as journal articles

Strong for students in 2020

Lessons Learned

- Students were excited to use the books
- Opportunity for Graduate Students
- Authors wished for greater level of support
- Workflow management and timing
- Offered workshops on publishing and copyright
- Difficulty balancing this project with other publishing responsibilities

Round Two

- Received financial support from a Library donor, the Library and the Intensive English Language Program.
- Sought proposals for texts that are comprehensive works geared towards a specific field of study.
- Proposals had to be original content or a compilation of openly licensed materials.

Each applicant was required to include the following:

- Open textbook details - provide manuscript specifics such as a table of contents, chapter by chapter description, and estimated length
- Brief description on how the project meets the proposal criteria
- Statement of support from department chair, associate dean, or dean

Round Two – Library is offering

- \$2,500 stipend
- Project Management
 - monthly check-ins; budget assistance
- Publishing guidelines
 - Formatting, media, style & file Requirements
- Two Workshops
 - Copyright, Fair Use and Creative Commons
 - Self-publishing
- ISBN Registration
- Print on Demand Services

Round Two – Partnership Outside the Library

- Partnered with Ooligan Press, a general trade publisher affiliated with PSU and is staffed by students pursuing master's degrees in the Publishing Program
 - Offered workshop to authors on self-publishing academic work
 - Guidance on hiring copyeditors, designers and proofreaders

Round Two – Open Textbooks

Publishing 5 new open access textbooks – January 2016

- ESL academic preparation - designed for level 2 (low intermediate) reading course
- Beginning Japanese - designed for Masters of International Management Program
- Learning Korean through folktales – designed for 1st, 2nd, and 3rd-year Korean
- Learning Arabic – designed to assist students transition from Modern Standard Arabic to Colloquial Arabic
- Spanish literature and culture; an anthology - designed for Junior-level Spanish

Sustainability and Future

Challenges

- Open textbooks creation is not rewarded in the current tenure system
- Financial support

What can be done?

- Collaborate and partner with Administration, Faculty and Departments to create incentives
- Collaborate across institutions

Thank you!

Karen Bjork
