Using Citation Collection to Encourage IR Deposits: The Celebration Point Method

Leila Sterman, Montana State University
@calamityleila

The problem

At the University level

Metric D.1.2: By 2019, national and international recognition of MSU faculty will improve as measured through accomplishments such as national awards, peer-reviewed publications, invited presentations, journal citations, fellowships, editorial positions, technology transfer activities, visiting appointments, scholars visiting MSU, occurrence of scholarly conferences on the MSU campus, membership on governmental policy committees, review panels, museum-level exhibitions, creative work that engages audiences at leading venues and placement of doctoral students.

Technical note: These data will need to be collected annually either by a departmental survey or in a faculty activity reporting system.

Goal

To capture and celebrate the research output of Montana State University for multiple uses.

Celebration Point

Pain Point: A business term that refers to the points in service where customers feel “pain” due to problems or inefficiencies.

“How is this information collected?”

This collection of Montana State authored publications is collected by the Library. They use a number of resources to pull together as complete a list as possible and understand that there may be publications that are missed. If you note the omission of a current publication or want to know more about the collection and display of this information email Leila Sterman (leila.sterman@montana.edu).

Dear [Author's name here]:

Congratulations, from Montana State University Library, on your publication of "Article Title" in *Journal Title*. We value the work that you are doing!

We would like to make a copy of your paper openly available in ScholarWorks, our institutional repository (scholarworks.montana.edu). More information can be found at lib.montana.edu/services/publication.

We have assessed your paper and found that the **publisher-generated PDF/published journal article** is allowed for submission to ScholarWorks. Do we have permission to archive that copy of your article in ScholarWorks? Definitions of versions can be found [here](#).

Thank you for working with us on this important project.

Best,

Leila Sterman - Scholarly Communication Librarian
leila.sterman@montana.edu
994-4519

Sara Mannheimer - Data Management Librarian
sara.mannheimer@montana.edu
994-3361

Heather Martelle - Repository Manager
heather.martelle@montana.edu

The project is well received and IR
deposit has increased.

This is a sheer work of art — it says so much more than just the list of publications. It relays information on individual faculty, the university and the innovation.
