Some Negroes in North Carolina are zealously devoted of avowal. Few, if any, of the members of this group have put forth any special effort to better their social and economic status. There is an amazing percentage of members within this group who are content to sit idly by while they are gradually restricted to employment in a few stereotype jobs and lives. Consequently, there are practically no opportunities for Negroes in the state of North Carolina to hold positions that demand technical or scientific qualifications. Furthermore, there are practically no opportunities for Negroes in this community to further retard their progress by acquiring special training in order to equip themselves with the industrial knowledge and skill that is so desperately needed.

It is a trend to be observed that the Negro will be in the forefront of the industrial revolution and that he will be compelled to adjust himself to the requirements of industrial society. He will have to acquire the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed.

In conclusion, it is evident that the Negro must acquire the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed. Therefore, it is imperative that the Negro acquire the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed, in order to equip himself with the industrial knowledge and skill that is so desperately needed.

Victory Banquet To Mark New Negro Political Era

Chicago, May 11—(Hand Press News):—The NAACP, national organization for the advancement of colored people, last night held its international convention at the New York Coliseum. At the banquet held in the Coliseum, A. Craven, chairman, announced the election of I. W. Lewis, chairman of the convention committee, to succeed William L. Dawson as president of the organization. The banquet was attended by a score of the leaders of the Negro political movement, including William L. Dawson, chairman of the National Association for the Advancement of Colored People, and the occasion was interpreted as a victory for the Negro in the field of politics.

The keynote address of the banquet was delivered by Mr. Dawson, who said: "The Negro has come of age politically. He has shown that he is capable of handling the responsibilities of national leadership. The time has come when the Negro must take his place in the political arena and play a role in the politics of the country."
