Now that the Model Cities Program is emerging from its embryonic stage and beginning to take shape, it is emerging as a possibly feasible operation which may, as it grows into maturity, develop into a full-fledged project of its own.

The staff has been working hard to conceive and deliver a program that will be both purposeful and far-reaching.

The purpose, of course, is to gainｃoncern and action at the job opportunities and in-service training for staff and volunteers and to present to all who would be inviting, a curved, precise and ample supply of materials and information pertaining to the Model Cities area and its residents.

Some of the problems are numerous complaints of residents that they know nothing about the Model Cities area, and there are not enough residents involved in the program.

The present Model City Information Center is a center for agency services and does not specifically provide information pertaining to the Model Cities City and its residents.

The next step is for you folks to give release to this feal. So, the only conclusion we can come to is that the black man is getting too many handouts.

In appraising the matter, the average black man is puzzled with his race proud, and beginning to man to be a big and thinking kind of man.

She might at first glance be any busy housewife with nothing more on her mind than, "What's for dinner?" A second look would reveal her pleasant smile and her quick energetic step. There is nothing ordinary about Mrs. Ella Mae Gay. She is a woman with a purpose.

Dear QOMP— that's for quiet old mugwump and everyone knows what a mugwump is— just about the hardest to convince there is. You've been trying to involve yourself in too many things. You're so old you've equalled all the world's objections against them—and never getting around to seeing what their worst enemy really is.

It's different, you say. You're so good. That's the problem— you do so many things right. You hold down a steady job, keep a neat house, a shipshape garage, A clean desk at the office— you make such great people— you probably belong to a nice club, even attend church fairly regularly. Why is it that you're so old? Guess it's the man calling asking if you'll serve on the committee on youth problems, you just remember the back porch. You're looking at the outside of you. You haven't been paying attention to the inside. You haven't been noticing the way you look to other people— the way they feel about you. You haven't been noticing the way you look to other people— the way they feel about you. You've been so busy trying to prove to yourself that you're a good old mugwump that you haven't even thought of yourself. And you don't think of yourself, do you?

Of course, you have lots of friends. Old ones of any kind usually upsetting some mugwump. If so, we'll probably never know what a mugwump is— just about the hardest to convince there is. You've been trying to involve yourself in too many things. You're so old you've equalled all the world's objections against them—and never getting around to seeing what their worst enemy really is.

The Oregon Advance/TIMES Contest committee has voted to extend the writing contest until the end of September.

The reason for the extension is the slow response by the community. The contest is presented to stimulate writing on the part of many young people, especially black youth.

The committee feels that with letters coming in, interest will build and more of the hidden talent in this community will be discovered.

Send your letter in at once; you may be the lucky person.

Three-hundred words or more will be appropriate for entry. There are two divisions in this contest - under two age groups.

The prizes consist of:
1st prize . . . . $10.00

**Tips on Fall Painting**

There’s still time to freshen up interiors with new paint before fall weather arrives, observes Mrs. Dorothy Brown, Oregon State University Extension home furnishings specialist. She offers these guidelines in selecting the color.

Wall colors should enhance the other furnishings in the room, since walls are the background against which everything else is seen. Usually colors that are less intense than the furniture pieces should be chosen. The less bright colors are also easier to live with, since the excess of wall space makes bright colors tiring to the eye.

Flat wall paint will seem less bright than enamel when the same color is used. The color of a paint chip can be deceptive, because the chip is so small. A good investment is a quart of paint spread over as much wall as possible. Artificial light can change the hue of a color from that seen in daylight. Colors even change during the day as the sun moves across. Looking at the wet wall in all lights is good insurance. If the color seems suitable, then the gallon cans can be ordered.

Remember that pale colors make a room look larger and also reflect more light, says Mrs. Brown expeditiously. Dark colors make a room appear smaller and more intimate. Dark colors also soak up the available light, requiring more windows for good visibility in the daytime, and more electricity at night.

Some say that the idea of a wedding ring for the bride goes back to the ancients, when the man used it to signify his possession and authority. Holding it to be of pagan origin, the early Christian rejected heretofore rings until A.D. 800, when church authorities accepted them in response to popular demand.

Among her current activities are such things as being a supporter of the Newbry Orchards. He makes his home in Ashland, Oregon, where he operates the Newbry Orchards. Vice Chairman of the Ways and Means Committee in 1965 and 1967, Newbry was elected to the State Senate in 1961.
