Oregon Population Forecast Program
Regional Forecast Meeting – October 2, 2015

Presentation by

Population Forecast Program Team

Sherman County
Oregon Population Forecast Program
Project Team

Xiaomin Ruan,
Population Forecast Program Coordinator

Risa S. Proehl,
Population Estimates Program Manager

Jason R. Jurjevich,
Assistant Director Population Research Center

Kevin Rancik,
GIS and Research Analyst

Janai Kessi,
Research Analyst

Carson Gorecki,
Graduate Research Assistant

David Tetrick,
Graduate Research Assistant
Agenda

• Population Research Center (PRC)
• Forecast Program overview
  – Forecast regions
  – Schedule
  – Deliverables
  – Forecasting methods and data sources
  – Process for local input
• Demographic and economic trends
• Discussion
PRC Research areas:

– Oregon Census State Data Center (SDC)
– Demographic Research and Advisory Services
– Demography Instruction
– Oregon Population Estimates Program
– Oregon Population Forecast Program (OPFP)
Forecaster Program Overview

PRC Website: http://www.pdx.edu/prc

Click here for more information on OPFP.
Forecast Program Overview

Forecast Program: 4-Year Schedule

Year 1: Program Development

Year 2: Prepare County-Level Forecasts

Year 3 (highlighted): Prepare County-Level Forecasts

Year 4: Prepare County-Level Forecasts

1st Set of Coordinated City-County Forecasts

2nd Set of Coordinated City-County Forecasts

3rd Set of Coordinated City-County Forecasts
Coordinated Forecast: Annual Schedule

- **July - August**
  - Gather and update input data

- **September - October**
  - Build models
  - Hold 1st public meeting
  - Distribute data collection surveys
  - Prepare county-level forecasts

- **November - February**
  - Compile local information
  - Develop Preliminary Forecasts

- **March - May**
  - Issue Preliminary Population Forecasts
  - Hold 2nd public meeting
  - Issue Proposed Population Forecasts
  - 45-day official review period

- **June**
  - Issue Final Population Forecasts
  - Issue Final Reports

- **June**
  - Issue Final Population Forecasts
  - Issue Final Reports
Deliverables

• Forecasts (50 year horizon, 5-year time intervals)
  • County-level forecasts (5-year age groups)
  • Coordinated UGB-level forecasts (Total population)
• Report containing:
  – Summaries of historic and future demographic trends, assumptions about future growth, and a compilation of information collected from city and county officials and the public
  – Short technical description of methods employed to produce the forecast
Process for Population Forecasts

- Develop demographic models using historic and recent data
- Analyze past and current population trends
  - Reasons for change, continuous or short-term?
- Gather information about existing and planned future housing, and about population change
  - Housing developments
  - Construction of new group quarters facilities
  - New employers
- Make assumptions about future housing and population change
- Revise forecasts on a regular basis
Population Forecast Methods
Primary Models for this Forecast

- Cohort-Component Method
  - Based on age-sex structure
  - Survival rates – Fairly constant over time
  - Fertility – Slightly more variable than survival rates
  - Migration Rates – Subject to greater fluctuation than mortality and fertility and more unpredictable
  - Generally works better for areas with larger populations
Population Forecast Methods
Primary Models for this Forecast

• Housing Unit Method
  — Generally works better for areas with smaller populations
  — Housing unit growth
  — Housing unit type
  — Persons per household (PPH)
  — Occupancy rates
  — Add group quarters population
Population Forecast Methods
Other Models/Methods to Consider

- For comparison and to serve as a check
- Ratio Methods
- Trend Extrapolation
- Employment Conversion Model
Population Forecast Data Sources

Primary Sources:

• U.S. Census Bureau, Decennial Censuses
• Population Research Center (PRC), Oregon Population Estimates Program
• Oregon Health Authority, Center for Health Statistics
• Counties, Assessors Office
• Incorporated cities, Community Development/Planning Department
• Oregon Geospatial Enterprise Office (GEO), Spatial Data Library

Secondary Sources:

• State of Oregon, Office of Economic Analysis
• U.S. Census Bureau, American Community Survey (ACS)
• U.S., Internal Revenue Service
• State of Oregon, Department of Revenue
• Oregon Department of Education
• U.S., Centers for Medicare and Medicaid Services
• State of Oregon, Employment Department
Process for Local Input

• Hold regional meetings
  – Receive input on:
    • Historical and current demographic and economic trends
    • Plans for future growth
  – Receive feedback on Preliminary Forecasts
• Local survey
  – Collect local observations
    • Population composition; recent change
    • Planned housing development plus group quarters facilities
    • Future employers
    • Infrastructure
    • Anything that might promote or hinder population growth
  – Survey will be posted on website and emailed to each jurisdiction
  – Issued in October, 2015
• Official review period for Proposed Forecasts
Sherman County
Demographic and Economic Trends

Sherman County—Total Population by Ten-year Intervals (1930-2010)

Sources: U.S. Census Bureau, 1930 to 2010 Censuses. Calculated by Population Research Center (PRC).

Note 1: Average annual growth rate is used for simplicity. In actuality the rate is an annualized rate calculated with this formula: [LN(Year1/Year2)/10]

Note 2: The 2000 total population does not reflect County Question Resolution (CQR) revisions made by the U.S. Census Bureau. Revised total population numbers are used for the “County and Incorporated City Population” table.
Demographic and Economic Trends

Sherman County—Annual Total Population Trend (2000-2014)
