Abstract

This poster depicts the development of an OER for interpreter educators at Western Oregon University by the Interpreting Studies faculty, as well as the collaboration with the University Library to publish the final product. Our goal is to create a space where emerging scholars will make contributions with the ability to revise the OER as the interpreting studies discipline and the scholars develop and change.

Vision

- To offer faculty and students readings and practical application experiences that connect program-specific coursework and concepts across the interpreter education curriculum emphasizing the holistic nature of the field of interpreting.

- To create a space where emerging scholars in the field of signed language interpreting will make contributions with the ability to revise as the interpreting studies discipline and the scholars develop and change.
