2021-2022 Bulletin

Information in this Bulletin is accurate as of June, 2021. It has been compiled with care but may contain errors. Any errors discovered should be reported to the Office of Academic Affairs.

The Portland State University Bulletin is not a contract but rather a guide for the convenience of students. The University reserves the right to change or withdraw courses; to change the fees, rules, and calendar for admission, registration, instruction, and graduation; and to change other regulations affecting the student body, at any time.

Portland State University supports equal opportunity in admissions, education, employment, housing, and use of facilities by prohibiting discrimination in those areas based on age, color, disability, marital status, national origin, race, religion or creed, sex or gender, gender identity or gender expression, sexual orientation, veteran status, or any other basis in law. This policy implements state and federal laws. Inquiries about it should be directed to the Office of Equity and Compliance, 1600 SW 4th Avenue, Suite 830, Portland, OR 97201, 503-725-5919, or via email to equityandcompliance@pdx.edu; TTY: 503-725-6504.

Vision, Mission and Values

Welcome to Portland State University

Our vision: Portland State University leads the way to an equitable and sustainable future through expanding opportunity, serving our city, and promoting academic and research excellence.

Our mission:
- We serve and sustain a vibrant urban region through our creativity, collective knowledge and expertise.
- We are dedicated to collaborative learning, innovative research, community engagement, and career preparation.
- We educate a diverse community of lifelong learners.
- Our research and teaching make a global impact.

Our values:
- We promote access, inclusion, and equity as pillars of excellence.
- We commit to curiosity, collaboration, stewardship, and discovery.
- We strive for problem-solving innovation.
- We believe everyone should be treated with integrity and respect.

Engaged with the Community

With 27,000 students, Portland State University is a nationally recognized leader in community engagement, combining academic rigor in the classroom with community-based learning.

Students from within Oregon, throughout the United States, and across the world choose Portland State because its urban setting and ties to businesses and service organizations make it a living laboratory that prepares tomorrow’s leaders with the experience they need to succeed.

Portland State’s growing reputation for excellence prompted U.S. News & World Report to rank PSU among the “most innovative” universities in the nation for the last several years.

Distinguished programs and faculty.

Many of Portland State’s disciplinary programs are nationally ranked in the top 20 in the United States, and the Princeton Review lists PSU among its Best Colleges.

The innovative University Studies program, a four-year general education program which promotes community-based, interdisciplinary learning, and engagement in real-world problems, has established Portland State as a national model for other colleges and universities.

The University Honors College is the only urban-focused honors college in the country. Here, a small, dedicated community of highly motivated students and engaged professors explore an academically intense curriculum through the lens of the culturally rich, ever-evolving city of Portland.

Portland State professors are prized for their knowledge, research and service. Faculty come to Portland State from colleges and universities around the world. Though diverse in culture, background, language, and ethnicity, they come to Portland unified in their commitment to the University’s exceptional approach to learning and engagement.

PSU’s motto, “Let knowledge serve the city,” inspires faculty research. Many professors research some of society’s greatest challenges—providing students with firsthand knowledge and opportunities for involvement and collaboration in their communities. Faculty use their expertise to serve the region through their work with businesses, not-for-profits, and governmental agencies and by holding key posts in professional, cultural, and civic groups.

Portland: The community is our campus.

Portland State University’s prized location in the middle of a major city guarantees students are always steps from excitement and action. Parks, museums, cafes, theaters, shopping, acclaimed restaurants, and professional sports are all close.

Established in 1946 to meet the educational needs of GIs home from World War II battlefields, Portland State found its first home in Vanport, a former federal housing project along the Columbia River. The campus moved to Lincoln Hall in Portland’s South Park Blocks in 1952 and now encompasses 50 city blocks, retaining a park-like beauty within its urban setting.
Students and faculty often gather in the Park Blocks to talk or study. PSU’s Urban Center stands at the busiest public transportation hub in the city. It’s the only location in the city where TriMet’s bus system, Portland Streetcar, and MAX light rail line come together. Thousands of students get to campus under their own power, commuting by foot or bicycle along Portland’s pedestrian and bike-friendly streets.

With urban sophistication, small-town accessibility, and many outdoor activities, Portland and Portland State offer a great living and learning experience.

Sustainability: It’s what we do.

In 2016 Sierra magazine ranked PSU 14th in the nation, and first in Oregon, for its commitment to sustainability. Sierra commended PSU for its innovative strategies for reducing waste, conserving resources, and advancing environmental research.

The Portland State campus itself is a model for sustainability; each new building or major renovation on campus since 2004 has received a Leadership in Energy and Environmental Design (LEED) certification.

Portland State students can take sustainability lessons beyond the classroom, engaging directly with the community and businesses to solve real-world problems and achieve further sustainability at the local and regional levels. Portland State strives to harness the strengths of the university to move closer to solving the environmental, social, and economic problems of our time.

Faculty and students are performing valuable research and developing solutions to address issues related to homelessness, climate change, public health, and urbanization. Students in departments across campus consider issues that integrate economic, social, and environmental viewpoints. Armed with this knowledge and experience, they will join a generation of leaders building a more equitable, livable, resilient world.

Research & Graduate Studies

PSU is the region’s leading urban research university and offers wide-ranging research opportunities for undergraduate and graduate students who aspire to be explorers, innovators, problem-solvers, and change-makers.

Our faculty includes internationally recognized researchers in engineering and physical, natural and social sciences, making vital contributions in research areas ranging from the development of new treatments for diseases to blockchain technology to discovering life beyond Earth. Our research strengths in specialized fields such as early childhood learning and biochemistry attract world-class partners like the Howard Hughes Medical Institute. And programs like the PSU Co-Op and Build EXITO provide students access to cutting-edge research as well as training and professional development opportunities.

Researchers at PSU work across disciplines and partner with industry, government agencies, nonprofit organizations, and other universities to address the critical challenges of the 21st century and improve life in Oregon, the nation, and the world. We collaborate with Oregon Health and Science University through the OHSU-PSU School of Public Health and interdisciplinary research where our expertise in data analysis, social science, biology, and chemistry add value to OHSU’s clinical studies. Our University Research Centers work to improve urban life by using "smart city" technologies, exploring solutions to complex issues such as homelessness, and improving transportation. At PSU, we bring the future into focus.

The Founding of Portland State University

Portland State University’s roots trace back to the summer of 1946 when the Oregon State Board of Higher Education approved the opening of a temporary school in North Portland to offer lower-division coursework. Vanport Extension Center (VEC), named for its location between Portland and Vancouver, was situated in Vanport City, a wartime housing project that promised resident and classroom space for the students attending VEC. Spearheaded by founder and director, Stephen Epler, VEC soon became known as “Vanport College” and was immediately successful in meeting local demands for higher education by returning World War II servicemen and women. When fall term registration closed at VEC, more than 1,400 students enrolled, eclipsing the projection of 500 and signaling future success for the center.

Seemingly ending VEC’s future, the 1948 Memorial Day flood of the Columbia River destroyed Vanport City, including the center. Epler and his colleagues kept the school alive, using federal funds to reinstate the campus at “Oregon Ship,” a former Oregon Shipbuilding Corporation site. The school’s commitment and fighting spirit earned it the national reputation as “the college that would not die.” Students, faculty, community groups, and legislators were strong advocates for the school, spurring its permanence and move in 1952 to its present location in Portland’s South Park Blocks, where it became the Portland State Extension Center in the former Lincoln High School (now Lincoln Hall).

In 1955, the legislature created Portland State College as a four-year degree-granting institution. Graduate work was added in 1961; doctoral programs began in 1968, and the institution became Portland State University in 1969. The
Accreditation

University has grown from an initial enrollment of 1,410 students in 1946 to become one of Oregon’s largest universities.

“Portland State formed a legacy of courage, leadership, dedication, and collaboration during its founding years, 1946-1955. These qualities enabled a small extension center to become a four-year, degree-granting college. Today this legacy inspires Portland State University to enhance the intellectual, social, cultural, and economic vitality of Portland, the Pacific Northwest, and beyond.”

The Founder and presidents who have served the University are:
- Stephen E. Epler (Vanport Extension Center), 1946 to 1952;
- John F. Cramer, 1955 to 1958;
- Branford P. Millar, 1959 to 1968;
- Gregory B. Wolfe, 1968 to 1974;
- Joseph C. Blumel, 1974 to 1986;
- Natale A. Sicuro, 1986 to 1988;
- Roger N. Edgington (interim president), 1988 to 1990;
- Judith A. Ramaley, 1990 to 1997;
- Daniel O. Bernstine, 1997 to 2007;
- Michael F. Reardon (interim president), 2007 to 2008;
- Wim Wiewel, 2008 to 2017;
- Rahmat Shoureshi, 2017 to 2019; and
- Stephen Percy, (interim president 2019 to 2020) appointed president 2020-present.

Portland State University is accredited by the Northwest Commission on Colleges and Universities.

Accreditation of an institution of higher education by the Northwest Commission on Colleges and Universities indicates that it meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Northwest Commission on Colleges and Universities is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding an institution’s accredited status by the Northwest Commission on Colleges and Universities should be directed to the administrative staff of the institution. Individuals may also contact:

Northwest Commission on College and Universities
8060 165th Avenue N.E., Suite 100
Redmond, WA 98052
(425) 558-4224
www.nwccu.org

In the College of Liberal Arts & Sciences; the Department of Speech and Hearing Sciences is accredited by the Council on Academic Accreditation (CAA) of the American Speech-Language Hearing Association (ASHA). The Department of Chemistry is accredited by the American Chemical Society (ACS).

In the College of the Arts; the School of Music & Theater’s bachelor’s and master’s programs are accredited by the National Association of Schools of Music (NASM). Theater programs are accredited by the National Association of Schools of Theater (NAST). The Master of Architecture degree in the School of Architecture is accredited by the National Architectural Accrediting Board (NAAB).

In the College of Urban and Public Affairs; the Master of Urban and Regional Planning degree is accredited by the Planning Accreditation Board (PAB). The Master of Public Administration degree is accredited by the Network of Schools of Public Policy, Affairs and Administration (NASPAA). The Master of Public Administration – Health Administration is accredited by the Network of Schools of Public Policy, Affairs and Administration (NASPAA).

In the College of Education; teacher education programs are accredited by the Council for the Accreditation of Educator Preparation (CAEP) and by the Oregon Teacher Standards and Practices Commission (TSPC). The counseling programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The Helen Gordon Child Development Center is accredited by the National Association for Education of Young Children (NAEYC).

In the Maseeh College of Engineering and Computer Science; undergraduate programs in civil, computer, electrical, environmental, and mechanical engineering are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). The computer science program is
accredited by the Computing Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET). ABET can be contacted at 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone: (410) 347-7700.

In the School of Business; the undergraduate and graduate business programs as well as the accounting program are accredited by The Association to Advance Collegiate Schools of Business International (AACSB).

In the School of Public Health; the undergraduate programs in Applied Health and Fitness, and Public Health Studies, the Master of Public Health degrees, the Master of Science in Biostatistics, and the Ph.D. programs in Community Health, Epidemiology, Health Systems and Policy are all accredited by the Council on Education for Public Health (CEPH). The Health Management & Policy MPH is also accredited by the Commission on Accreditation of Healthcare Management Education (CAHME).

In the School of Social Work; both the bachelor’s and the master’s programs are accredited by the Council on Social Work Education (CSWE). The Child, Youth, & Family Studies certificate program is accredited by the National Council on Family Relations (NCRF).
Admissions Requirements

U.S. Citizens and Immigrants (Domestic Undergraduate Applicants)

Application

Domestic students must submit the following information to the Office of Admissions.

1. Application submission and nonrefundable fee.

Students should apply at www.pdx.edu/admissions. To ensure consideration for admission, students should submit their application by the established deadline for their intended start term and submit the nonrefundable $52 application fee (fees subject to change without notice) when applicable. The application and nonrefundable $52 fee are valid for three terms from the first admission term.

2. Admission validation.

To validate admission, the student must register for classes and enroll during their intended term of admission as selected on their application. If the student does not register and enroll for their first term, the application may be updated to one of the next three consecutive terms without repaying the application fee; applicants will not be updated automatically. After this update period, applicants must submit a new application along with another $52 application fee.

Transcripts must be submitted directly by each high school or college attended. Transfer students who have earned fewer than 30 quarter credits of transferable college coursework are also required to submit official high school transcripts. In addition, all applicants who graduated from an Oregon high school in 1997 or after will be required to submit a high school transcript to validate their Second Language graduation requirement if it was met in high school.

To be considered “official,” transcripts must be received by PSU in the sealed (unopened) original envelope or through approved electronic means from the issuing school. Since all official transcripts submitted become the property of PSU and cannot be copied, returned to the student, or shared with other institutions, students are encouraged to obtain unofficial copies of their transcripts from prior institutions for advising or personal purposes.

4. SAT or ACT scores (Optional).

Applicants who satisfy Portland State’s minimum curriculum and GPA requirements are not required to submit test scores. ACT and SAT scores submitted by students who are admissible based on GPA and high school curriculum will only be considered as “value added” in the admission process.

NOTE: Applicants who attended homeschool, or a non-accredited, non-standard high school, are required to submit test scores. In order for scores to be considered “official,” reports must be sent directly from the respective testing agencies to Portland State University.

SAT School Code is 4610
ACT School Code is 3492

Important: Altered transcripts and falsified applications.

Students who knowingly submit altered transcripts or falsified applications jeopardize their admission status and may have their admission rescinded and/or their registration canceled; in some cases, future application opportunities may also be denied. These penalties may also apply in cases in which transcripts are knowingly unreported to or withheld from Portland State University.

All records submitted, filed, and accumulated in the Office of Admissions become the property of the University. The number of students admitted for any term is subject to the availability of space. When space is limited, selection may be based on grade point average, date of application, intended major, test scores, etc.

Admission Requirements—Entering Freshmen

To be admitted as freshmen, applicants need to fulfill each of the requirements (or alternatives) as specified in all of items 1-4 below.

1. High school graduation requirement.

Applicants must have graduated from a standard or regionally accredited high school. Students who have not from a standard or regionally accredited high school may meet entry requirements through alternative testing.

Alternative testing includes successful completion of one of the following:

- Test of General Education Development (GED):
  - If you took the GED after January 1, 2014: earn an overall average score of 170 and a minimum score of 150 on each subject test
  - If you took the GED between January 1, 2002 and December 31, 2013: earn a minimum overall average score of 580 and a minimum score of 410 on each subject test
  - If you took the GED prior to January 1, 2002: earn an overall average score of 46 and a minimum score of 40 on each subject test
• HiSET®
  • Minimum score of 15 on each subject test area and a 4/6 on the essay component of the Language Arts-Writing subject test
• TASC®
  • Minimum score of 580 on Language Arts-Reading, 560 on Mathematics, 560 on Language Arts-Writing, and at least 6/8 on the Language Arts-Writing essay.

Non-accredited or non-standard high school graduates: Students from non-accredited or non-standard high schools, or home-school students, may meet the high school graduation requirement with a minimum score of 1120 or higher on the combined Writing & Language and math portions of the SAT, or with a composite score of 22 on the ACT®. In addition to successfully meeting the criteria outlined for the SAT or the ACT®, students must also earn a minimum score of 470 or above (940 total) on two College Board SAT Subject Tests (Math Level I or IIc, and one additional subject test of the student’s choice). An examination in a second language is strongly recommended as the second exam to qualify the applicant for admission by meeting the second language proficiency requirement. Students who do not take an SAT Subject test in a second language must prove language proficiency through another approved process or fulfill the requirement after enrollment.

2. High School Subject requirements.

Resident applicants must satisfactorily (grade of C- or above) complete at least 15 units (one year equal to one unit) of college preparatory work in the following areas, while non-resident applicants must satisfactorily (grade of C- or above) complete at least 13 units (one year equal to one unit):

• a. English (4 units). Must include the study of the English language, literature, speaking and listening, and writing, with emphasis on and frequent practice in writing expository prose during all four years.

• b. Mathematics (3 units). Must include first-year algebra and should include two additional years of college preparatory mathematics (with the final year equivalent to or greater than the level of Algebra II) selected from geometry (deductive or descriptive); advanced topics in algebra (through Algebra II), trigonometry, analytical geometry, finite mathematics, advanced applications, calculus, and probability and statistics, or courses that integrate topics from two or more of these areas. One unit of math is strongly recommended in the senior year. (Algebra and geometry taken prior to ninth grade will be accepted if posted on HS transcript.)

• c. Science (3 units). Must include at least a year in fields of inquiry based college preparatory science such as biology, chemistry, physics, or earth and physical science. Science courses that are “inquiry based” provide students the opportunity to apply scientific reasoning and critical thinking to support conclusions or explanations with evidence from their investigations. It is strongly recommended that one year be taken as a laboratory science and that a total of three years of science be taken.

• d. Social Studies (3 units). Must include analysis of societal issues and events. It is strongly recommended that study includes knowledge and use of geographic information, patterns of United States history, patterns of human history, structures and systems of the US Government, and analysis of economic systems.

• e. Second Language (2 units). Must include demonstrated proficiency equivalent to two years of the same high school-level second language. This requirement applies to anyone who graduated from an Oregon high school in 1997 or any year after. Students may demonstrate proficiency by meeting one of the following options:

  Second Language Proficiency-based Assessment Options

  • Score of 2 or higher on an Advanced Placement Foreign Language Test
  • Score of 4 or higher on an International Baccalaureate Standard Level Foreign Language Exam
  • Score of 40 or higher on a CLEP Foreign Language Exam
  • Score of 500 or higher on an SAT Foreign Language Subject Test
  • Education satisfactorily completed through 7th grade in a school or country where English was not the language of instruction
  • Satisfactory performance (P) on a Brigham Young Foreign Language Assessment ( BYU FLATS)
  • Score of novice-high or higher on the Standards-based Measurement of Proficiency (STAMP)
  • Score of 226 or higher on a Proctored WebCAPE (only offered in Spanish for the Second Language Admission requirement)
• Score of novice-high or higher on the ACTFL scale in American Sign Language (ASL)
• Score of novice-high or higher on a ACTFL Oral Proficiency Interview
• Credit for Prior Learning

**American Sign Language qualifies as a second language.

Students failing to meet the Second Language Proficiency requirement at the time of admission may be admitted, but will not be able to earn an undergraduate degree at Portland State University until the second language requirement has been completed. Students must provide official high school or college transcripts to demonstrate the Second Language Proficiency Requirement has been met.

Alternatives to the subject requirements. (Any one of the following.)

Score an average of 470 or above (1410 total) on the SAT II subject exams (English Composition, Math Level I or IIc, and a third test of the student’s choice).

Take make-up coursework for specific subject requirements missed in high school and achieve a passing grade. Note: Satisfactory completion of Math 95 or its equivalent (Intermediate Algebra) fulfills in total the subject requirement in mathematics. Take make-up coursework for specific subject requirements missed in high school and achieve a passing grade. Note: Satisfactory completion of Math 95 or its equivalent (Intermediate Algebra) fulfills in total the subject requirement in mathematics.

3. Grade point average requirement. High school students with a cumulative unweighted grade point average of at least 3.00 in all graded subjects taken toward high school graduation. Students who do not meet the 3.00 GPA requirement may be admitted based on holistic review.

NOTE: For the Academic Year 2020-2021 Portland State University changed its minimum admission high school GPA requirement for first-year applicants to a 2.5 or higher GPA for regular admission, with applicants who did not meet a 2.5 GPA eligible for holistic review. This requirement adjustment may be extended or may end at the discretion of the University Faculty Senate. The current status of this temporary adjustment will be found at www.pdx.edu/admissions.

Admission Requirements—Transfer Students

To be admitted as a transfer student, applicants must have a minimum GPA of 2.25 in 30 transferable quarter credit hours of college work. Applicants who present a transferable associate’s degree or an Oregon Transfer Module (OTM) will be admitted with a minimum cumulative transferable GPA of 2.00. Students who have accumulated fewer than 30 transferable credits of college work must also meet the freshman admission requirements.

International Students

1. Writing proficiency requirement.
To be admitted as a transfer student, applicants must satisfactorily complete a writing course satisfying one of the University’s writing requirements (e.g. WR 121) or its approved equivalent with a C- or better.

2. Second language proficiency requirement.
All resident applicants must meet the second language proficiency requirement described in 2e of the Freshman Admission Requirements section (p. 4).

3. Academic probation/disqualification from other institutions.
Academic probation/disqualification will not affect the admissibility of a student whose complete academic record meets the minimum admission requirements in effect at the time of application.

4. Disciplinary disqualification.
A student who has been disqualified from another institution for disciplinary reasons must be eligible to re-enroll at that institution to be considered for admission to Portland State University. Students with extenuating circumstances may petition for a waiver of this policy. Other offices on campus may be consulted in evaluating requests for waivers.

After review of circumstances, Portland State University may, for example, ask that you attend a different institution and reapply; decline to accept your application now or in the future; apply other possible conditions or restrictions to your application review.

More information on transferring to PSU is available at www.pdx.edu/admissions/transfer.

Application

Undergraduate International Students Application

Applicants who are not U.S. citizens who are currently overseas or reside in the U.S. on non-immigrant visas are considered for admission as international students. Candidates for admission may complete applications for the following terms if submitted by the following deadlines:

International Freshmen
Applications will be considered for all terms subject to department and/or University restrictions and/or course availability.

International Undergraduate applicants should submit the following information to the Office of International Undergraduate Admissions. All documents submitted become the property of PSU and cannot be photocopied, returned, or forwarded to third parties.

1. Application form and $50 nonrefundable application fee.
   The application and nonrefundable application fee are valid for one academic year only. The $50 fee cannot be waived.

2. Official transcripts.
   To be considered official, transcripts must arrive in the Office of International Admissions in a sealed envelope from the issuing school. Applicants whose admission will be based on high school/secondary school graduation should submit official transcripts of their final four years of high school/secondary school study or documentation as requested by the Office of Undergraduate Admissions. Transfer students must submit official transcripts from each college or university attended, regardless of whether or not they feel their prior academic study may be relevant to their PSU study. Transfer students with fewer than 30 quarter credits of college/university coursework are also required to submit transcripts from their final four years of high school/secondary school. Credits from accredited schools outside the U.S. will be transferred to PSU according to established international transfer credit guidelines and policies. See Academic Credit section of this Bulletin for more information. Students who knowingly submit altered or falsified academic records or other application documents jeopardize their admission status and may have their admission rescinded and/or registration canceled.

3. Proof of English language proficiency if seeking direct admission to academic coursework.

4. Evidence of adequate financial resources for educational and living expenses. (International applicants residing in the United States on visas other than F-1 or J-1 student visas may not be required to submit proof of financial resources.)

5. Proof of current immigration status (if already residing in the United States).

6. Admission validation. To validate admission, the student must register for classes during the initial term of admission. If the student does not register for this term, the application start term can be changed to one of the next three consecutive terms without repaying the application fee. After this time period, the student must submit a new application along with another $50 fee.

Admission Requirements for International Students

Applicants must demonstrate an appropriate level of academic preparation.

Freshman: Completion of U.S. academic (university preparatory) high school or secondary school equivalent as determined by the Office of Undergraduate International Admissions with a minimum equivalent 2.50 GPA.

Transfer: Completion of 30 transferable college quarter credits, excluding ESL courses, with a 2.25 GPA or higher at a U.S. regionally accredited college/university or foreign equivalent as determined by the Office of International Admissions. Transfer students who present a transferable associate’s degree (AS or AA or an Oregon Transfer Module (OTM) will be admitted with a minimum cumulative 2.00 GPA.

English language proficiency requirement. Admitted students who meet the English language proficiency requirement may enroll directly into academic classes. Those who do not meet this requirement will be placed in ESL classes until the requirement has been met. Applicants may demonstrate English language proficiency by submitting qualifying TOEFL, IELTS, or PTE scores. See minimum qualifying scores below.

English language proficiency requirements may be found at: https://www.pdx.edu/admissions/international/english-language-proficiency.

Information on the international TOEFL is available at www.ets.org/toefl.
Intensive English Language Program

Persons seeking English language training only, who do not wish to continue toward university-level academic study, may apply for admission to the Intensive English Language Program (IELP). However, persons who want to study English before beginning academic study are eligible for conditional undergraduate or postbaccalaureate admission without minimum English language proficiency test scores.

The IELP provides both credit and non-credit classes. Students must have earned the equivalent to a U.S. high school diploma for admission consideration. Prospective students must be in legal U.S. immigration status at the time of application.

Contact the Intensive English Language Program, 503-725-4088 or www.pdx.edu/english-language-programs, for additional IELP requirements.

The Office of Admissions coordinates orientation programs for all undergraduate students new to PSU. All newly admitted undergraduate students are required to attend a new student orientation session before registering for courses.

After admission to PSU, each undergraduate student must complete orientation programming before their start term. In-person and online programming is available. To sign up for New Student Orientation, the student must have already submitted their enrollment confirmation deposit of $200.

Orientation provides students with the opportunity to meet with current PSU faculty, professional staff, and students in order to:
- Understand academic requirements of a baccalaureate degree
- Successfully develop an academic plan and register for courses
- Access programs and services available to PSU students
- Facilitate the academic and social transition to the University community

Viking Days takes place the week prior to the start of fall term during the month of September. This is a week of activities, information sessions, open houses, and social events in which new students are invited to attend and encouraged to participate. For further information, visit https://www.pdx.edu/admissions/viking-days.

Admission to Professional Programs and Schools

Admission to Portland State University does not automatically admit students to its professional programs and schools. Standards for admission and evaluation of transfer credits often exceed general University requirements. Students should check this catalog under the appropriate academic unit to determine if a unit has special admission requirements.

Student Orientation Programs

503-725-5511
www.pdx.edu/admissions/orientation
Academic Records, Credit, and Appeals

Student Records

The University Student Records Policy, in accordance with the federal Family Educational Rights and Privacy Act of 1974 as Amended, governs the collection, use, and disclosure of student records with the goal of ensuring their privacy. Generally it provides the right to non-release of confidential information except as directed by the student, or as provided by law; the right to inspect educational records maintained by the University; the right to correction of errors, a hearing if necessary, and the right to file a complaint with the U.S. Department of Education. Learn more about student records privacy online at www.pdx.edu/registration/student-records-privacy-policy.

Documents Submitted to the University

All documents, including transcripts, submitted to PSU become the property of the University and are not intended for duplication or return to the student.

Academic Record Sealed After Degree Earned

Portland State University academic records are sealed thirty days after the conferral of a degree. After this date, changes to majors and minors, addition of departmental honors, removal of incomplete grades, grade changes, changes to degree posting, or other changes to an academic record cannot be made except by decision of the Scholastic Standards Committee or the Graduate Council.

Academic Credit

A credit is the basic unit of measurement of educational accomplishment. One credit normally connotes 10 hours of lecture-recitation or 20 or more hours of laboratory, studio, or activity work. The majority of courses at Portland State University involve three or four hours per week of lecture-recitation. PSU is on the quarter-system calendar. Semester credits transferred from other accredited United States schools may be converted to PSU’s credits by multiplying by 1.5.

The 1.5 multiplication rules apply only to semester credits transferred from U.S. schools. Semester credits transferred from accredited schools outside the United States will be converted according to established international transfer credit guidelines and policies.

Academic Credit Overload

Undergraduate Academic Credit Overload

Undergraduate students who enroll in more than 21 credits per term are considered to be in academic overload. PSU audit credits and transfer credit taken at other institutions while concurrently enrolled at PSU are counted in determining overload status. Transfer credits that result in an overload for a given term will not be accepted in transfer unless prior approval has been granted.

Academic overload must be approved on a term-by-term basis as follows:

- 22-25 credits: Students must obtain prior approval from their academic program adviser using the Overload Approval Form, to be submitted to the Office of the Registrar in advance of the overload term.
- 26 or more credits: Students must obtain prior permission from the Academic Requirements Committee (ARC) by submitting an ARC petition in advance of the overload term. Students must provide justification for the overload and obtain written support from their academic program adviser. Petitions must be submitted using the Academic Requirements Committee petition prior to the first day of the overload term.

Graduate Academic Credit Overload

Graduate students must obtain approval for registration in excess of 16 credits (graduate and undergraduate credits combined) via the Overload Approval form. A student registering for 17 to 19 credits must obtain the approval from their department chair or faculty adviser. A student registering for 20 credits or more must obtain the approval of their department chair and the Graduate School. A graduate assistant registering for more than 16 credits must obtain approval from their department chair and the Graduate School.

Computer Science and Electrical & Computer Engineering graduate students have a lower maximum registration limit of 10 credits. These students must obtain approval to register for 11 or more credits via the Overload Approval form.

Class standing

Class standing is based on the number of credits a student has completed, according to the following schedule:

<table>
<thead>
<tr>
<th>Class Standing</th>
<th>Credits Completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>1-44</td>
</tr>
<tr>
<td>Sophomore</td>
<td>45-89</td>
</tr>
</tbody>
</table>
Upper-division standing

Junior \hspace{1cm} 90-134

Senior \hspace{1cm} 135 or more

Postbaccalaureate

Hold an undergraduate degree from an accredited college or university

Appeals and Grievances

Grievances and requests for exceptions to University policies and requirements may be filed with specific committees authorized to deal with specific student concerns.

Academic Appeals Board

This board hears appeals from students who claim to have received prejudiced or capricious academic evaluation and makes recommendations on cases to the Provost. In such cases the student should first consult with the instructor. If the grievance is not resolved, the student should then contact the department chair, then the dean of the college or school. If the grievance is still not resolved, the student may then appeal by writing a letter to the Academic Appeals Board. Appeals may be filed in the Office of Dean of Student Life, 433 Smith Memorial Student Union.

Academic Requirements Committee (ARC)

The ARC is a subcommittee of the PSU Faculty Senate and is responsible for developing policies and adjudicating petitions regarding academic regulations related to credit loads, transfer credit, degree and certificate requirements for all undergraduate programs. It also develops and recommends policies and adjudicates student petitions regarding initial undergraduate admissions, including entering freshmen. The ARC Petition process is managed by an online process accessed at the Academic Requirements Committee Petitions website.

Deadline Appeals Committee (DAC)

A student may petition this committee to be exempted from published registration deadlines for the current term when mitigating circumstances prevent deadline compliance. Petitions must include documentation of the reason for missing the deadline.

The petition may be accessed at www.pdx.edu/registration/deadline-appeals-petition

For further information students may call 503-725-3220.

Scholastic Standards Committee (SSC)

The SSC is a Faculty Senate committee charged with developing and recommending academic standards to maintain the integrity of the undergraduate program and academic transcripts of the University; developing, maintaining and implementing protocols regarding academic changes to the undergraduate transcript; reviewing and ruling on petitions for any retroactive change to the academic record such as a grade option change, drop, add, and extension of an incomplete beyond the one year deadline; and adjudicating student petitions for academic reinstatement to the University. Conferral of an accredited transferable Associate’s or Bachelor’s degree constitutes automatic reinstatement to the University once an official copy of a transcript with degree posted is presented to the Office of the Registrar. Petition forms to make retroactive changes to undergraduate academic record, or to seek reinstatement to the University may be obtained at www.pdx.edu/registration/petitions. Forms may also be obtained at the Registrar’s Office, FMH Lobby. For further information call 503-725-3220.
Enrollment

Enrollment Process

Undergraduate Students Returning to PSU After an Absence

Registration

Students who have been formally admitted or who have filed a Non-Degree Entry form may register for classes online at www.banweb.pdx.edu during the preregistration period for a given term. Registration dates are determined by student class level and admissions status and are listed in the academic calendar under priority registration at www.pdx.edu/registration/academic-calendar. A current, detailed listing of term course offerings can be found in the online Class Schedule at www.sa.pdx.edu/soc. Detailed instructions for registration, priority registration dates, drop and add deadlines and academic calendar can be found online at www.pdx.edu/registration. The class schedule is available approximately eight weeks before the beginning of classes for winter and spring, and available in May for the following fall term.

The academic calendar contains deadlines related to adding and dropping classes, making grade changes, withdrawing from classes, and refund percentages. These deadline dates are important as they determine the extent of financial obligation incurred by registration activity and they determine if and how a course registration will be recorded on a student’s transcript. Students who withdraw or drop may be entitled to certain refunds of fees paid. See the Academic Calendar at www.pdx.edu/registration/academic-calendar.

Non-attendance

Students are responsible for dropping courses they do not wish to attend. Non-attendance does not cancel tuition charges, nor does it prevent the course and grade from appearing on the student’s academic record. The University reserves the right to drop students who do not attend classes or do not have the proper prerequisites. Some academic departments administratively drop student who not attend class on the first class meeting. If this happens, the student 1) remains responsible for any tuition charges associated with the registration, and 2) the course may be recorded permanently on the academic record, depending on when the department processes the drop. Students with mitigating circumstances who cannot attend class on the first day should notify the instructor or academic department as soon as possible to avoid being administratively dropped. Note: Students receiving state or federal aid who receive all X, M, NP, W, or F grades for a term whose attendance during that term cannot be verified, are subject to having all their funds returned.

Academic Advising Requirements

Advising at Orientation

All new undergraduates, both freshmen and transfer students, are required to participate in New Student Orientation where they will learn about Portland State University’s academic curriculum and resources, connect with an academic advisor and be given permission to register for their first term at Portland State.

Orientation http://www.pdx.edu/admissions/orientation

First-year Advising Requirement

All newly admitted undergraduates are required to connect with their assigned advisor within the first two terms of enrollment in order to register for their third term. For example, students admitted in fall term must receive advising during fall or winter terms in order to enroll for spring term or a hold will prevent them from being able to register.

First-Year Advising Requirement: www.pdx.edu/advising/first-year-mandatory-advising

Find Your Advisor: http://www.pdx.edu/advising/advising-locations

Residency Classification

At PSU tuition for Oregon residents is different from that of non-residents. The rules used in determining residency seek to ensure that only bona fide Oregon residents are assessed the resident fee. The Residency Standards used to assess residence classification may be found at www.pdx.edu/registration/residency-requirements.

Only the Office of Admissions and the Residency Officer have authority to apply and interpret these rules and procedures. No other indication or determination of residency by any other institutional office, department, program, or staff represents the official institutional determination of residency.

Residency Classification Appeals

A student may appeal their residency determination by submitting a Residence Information Affidavit with the Residency Officer in the Office of the Registrar. Information about the appeal process may be found at www.pdx.edu/registration/residency-review.

Undergraduate Students Returning to PSU After an Absence

Former Portland State University students who have been absent for two or more terms, and/or attended another
college or university since leaving PSU should complete the online Re-enrollment Request Form at www.pdx.edu/registration/re-enrollment. Official transcripts must be submitted from each institution attended since leaving PSU.

Part-Time Students/Non-Degree Students

Part-time and non-degree students are subject to the same rules as full-time and admitted students with regard to Academic Standards (academic warning, probation, dismissal) and registration deadlines (drop, add, tuition refunds, grade option changes etc.). Tuition payment is required by published deadlines.

Part-time students

Part-time status is defined as enrollment in fewer than 12 credit hours for undergraduates, and fewer than 9 credits for graduate students. Credit work taken as a part-time student is acceptable for undergraduate degrees and credentials. A fully admitted student may earn most University degrees as a part-time student. Part-time students should meet regularly with an adviser for academic planning and information on up-to-date requirements and University policies.

Non-degree/non-admit students

A student may take a maximum of 8 credits in fall, winter and spring terms, and 21 in summer without applying for formal admission. A Non-Degree Entry form is used to create a student record and provide access to the registration system. There is a one time, nonrefundable fee. Non-degree students do not qualify for financial aid nor do they receive transfer credit evaluations. Non-degree students are allowed to preregister after admitted students. Students may apply online, or obtain a Non-Degree Entry form at www.pdx.edu/admissions/apply.

Students who wish to take 9 or more credits in fall, winter, or spring terms must be formally admitted to the University. Students who plan to earn a degree at PSU should be admitted as soon as possible. Regardless of how many credits are earned while in non-degree status, there is no guarantee of admission. Formal admission is required to earn a degree.

Postbaccalaureate Status

Students seeking admission who have earned an accredited baccalaureate degree, who have not been admitted to a graduate degree program may be admitted and enroll at the postbaccalaureate level. These students are admitted to Portland State to earn a second bachelor’s degree, certificate, complete pre-requisites for admission to graduate school, or take other academic credit. PSU students who have completed an undergraduate degree who wish to complete a second undergraduate degree or take 9 or more credits during fall, winter or spring terms or more than 21 in the summer, must be admitted to postbaccalaureate status. Postbaccalaureate students are subject to the same academic policies as undergraduates.

Senior Citizen Enrollment

PSU waives tuition for courses audited by an Oregon resident 65 years of age or older if:

1. space is available after degree-seeking seeking students have registered
2. the instructor or department approve, and
3. the auditing student is a non-degree-seeking student registered for 8 or fewer credits.

One time administrative fees (e.g., $25 for enrollment) and other course fees for materials and online access may apply. Registration, advising and enrollment support is through the Senior Adult Learning Center (SALC).

The tuition waiver does not apply to courses with Restricted Differential Tuition. Seniors taking classes for credit pay tuition according to the established tuition schedule.

SALC receives no direct financial support from the State of Oregon or PSU. The program relies on charitable contributions from Senior Auditors and other friends of SALC. Please visit SALC in person at 470H Urban Center, online at go.pdx.edu/salc, or by phone at 503.725.4739.

Veteran Educational Benefits Certification

503-725-8380

Most programs at Portland State University are approved for the training of veterans. The Veterans Administration requires that any veteran receiving GI Bill® benefits while attending PSU is required to obtain transcripts from all previously attended schools and submit them to the VA School Official for review for prior credit. Transcripts submitted from all previously attended schools to the Admissions Office will be accessible to the VA School Official. It is not necessary to submit two copies. Each term, after registration, veteran students intending to use their education benefits must submit the Online Veterans Certification form. Course adds, drops, withdrawals, class cancellations and changes of program made after submitting the veterans certification form must be reported as soon as possible to the Veterans Certification Office, FMH Lobby.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at https://www.benefits.va.gov/gibill.
**Academic Credit for Military Training**

After admission, credit may be granted for some types of military service courses on the college level where equivalency to Portland State courses can be shown, as informed by the ACE recommendations. Veterans should provide transcripts from appropriate military schools and a copy of VA form DD214 to the Veterans Certification unit of the Office of the Registrar upon application to PSU.

**Veteran Priority Registration**

Portland State University offers early, priority registration to students using veterans' educational benefits and to veterans and military members who submit appropriate documentation. Priority registration supports timely program completion in compliance with Oregon House Bill 2565. Students being certified by the Registrar's Office for federal VA educational benefits will automatically be given veteran priority registration. Other veterans and military members can submit a copy of the DD-214 issued under honorable or general conditions to show proof of service in order to be enrolled in veteran priority registration. Submit DD214 to the Veterans Certification Office in the FMH Lobby or to vetcert@pdx.edu.

**Satisfactory Progress Standards**

In order to maintain satisfactory progress, the student veteran must complete the following credits:

<table>
<thead>
<tr>
<th>Certified for:</th>
<th>Undergraduate:</th>
<th>Graduate:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full time</td>
<td>12+ credits</td>
<td>9+ credits</td>
</tr>
<tr>
<td>Three-quarter time</td>
<td>9 - 11 credits</td>
<td>7 - 8 credits</td>
</tr>
<tr>
<td>One-half time</td>
<td>6 - 8 credits</td>
<td>5 - 6 credits</td>
</tr>
</tbody>
</table>

The cumulative GPA at Portland State University required to maintain satisfactory progress is 2.00. VA benefits cannot be certified unless satisfactory progress standards are maintained.

One hundred and eighty (180) credits are required to graduate with a baccalaureate degree (the total is greater in some programs). Grades of No Pass, withdrawals, Incomplete, X and audits do not count toward credits completed and may result in a VA overpayment.

**Last Date of Attendance Reporting**

For reporting purposes, the last date of attendance is established using either 1) the actual date recorded in the registration system when a course is dropped or withdrawn from, or 2) by the 'last date attended' provided by instructors when X and NP grades are submitted.

**Reporting Changes in Your Enrollment**

Any changes to a student's schedule, including both adding and dropping courses, must be reported to the Veterans Certification Office immediately as these changes may have a direct effect on benefits paid by the VA. Immediate notification of these changes can prevent overpayments and thus prevent future problems with the VA.

**Deployment Policy**

Any student with orders to report for active military duty may drop courses at any time during the term and receive a full refund. If sufficient course work has been accomplished and the instructor feels justified in granting credit for the course work completed, credit may be granted and no refund will be given.

The Office of the Registrar will work with students on a case-by-case basis to determine the best course of action. Students called to active military duty generally have the following options:

- Full drop from all courses at any point during the term without academic or financial penalty, with full tuition and fee refund.
- Drop from some (but not all) courses at any point during the term without academic or financial penalty. Students who have completed a significant portion of their course work may be eligible to receive the grades earned in courses up to that point in time and/or request incomplete grades according to existing guidelines. Tuition would be refunded for withdrawn courses.
- Maintain registration in all courses. Students who have completed a significant portion of their course work may be eligible to receive the grades earned in courses up to that point in time and/or request incomplete grades according to existing guidelines. No tuition would be refunded.

A determination on which option is best for the student will depend on the student’s personal details, the time remaining in the term, the portion of coursework completed at the time of military activation, and the judgment of the instructors. Students called to active duty who want to drop courses or discuss other options, should bring a copy of their orders to the Veterans Certification Office, FMH Lobby and speak with a Veterans Certification Officer.

**Veterans Access Choice and Accountability Act of 2014 (38 U.S.C. 3679(c))**

In compliance with the Veterans Access, Choice & Accountability Act of 2014, the following individuals shall be charged the in-state rate for tuition and fees purposes:

- A Veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill® – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill®), of title 38, United States Code, who lives in the State of Oregon while attending a school located in the State of Oregon (regardless of his/her formal State of residence) and enrolls in the school within three years of discharge.
or release from a period of active duty service of 90 days or more.

- Anyone using transferred Post-9/11 GI Bill® benefits (38 U.S.C. § 3319) who lives in the State of Oregon while attending a school located in the State of Oregon (regardless of his/her formal State of residence) and enrolls in the school within three years of the transferor’s discharge or release from a period of active duty service of 90 days or more.

- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in the State of Oregon while attending a school located in the State of Oregon (regardless of his/her formal State of residence) and enrolls in the school within three years of the Service member’s death in the line of duty following a period of active duty service of 90 days or more.

- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge, release, or death described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at https://www.benefits.va.gov/gibill.

Missed Class Policy

Purpose:
This policy is to provide students who miss class or examinations a process to make up examinations or other graded in-class work, unless it can be shown that such an accommodation would compromise essential learning outcomes or constitute an unreasonable burden on the instructor.

Rationale:
Portland State University recognizes that students carry many responsibilities with them into the classroom, which may both enrich their educational experience and make it more challenging. These include university-sanctioned activities in which the student serves as a representative to the university such as student congress, athletics, drama, and academic meetings.

Applicability:

- Students involved in university sanctioned or other legitimate activities, such as illness and family emergency.
- Activity program directors.
- Instructors of students who participate in university-sanctioned activities, including faculty, academic professionals, administrative staff, and teaching assistants.

Policy:

It is the responsibility of each instructor to determine and publish the class attendance policy in the course syllabus and distribute to the enrolled students at the beginning of the quarter. The instructor may approve absences at their discretion, in accordance with this policy. It is the responsibility of the student to inform the instructor of absences due to university-sanctioned events or personal responsibilities in writing at the earliest possible opportunity. If a student must miss class due to an unforeseen event, the student must inform the instructor of the reason for the absence. Absences not cleared with an instructor before the specific class event (exam, presentation, assignment due) may require documentation/substantiation at the instructor's discretion. If the instructor decides that the absence is justifiable, then they should attempt to provide opportunities for equivalent work. When absences are approved beforehand by the student and instructor, the instructor will allow students to make up missed work and/or give an option to attain attendance points. When there is a dispute between students and instructors over the opportunity to make up work or attendances, the issue will be adjudicated by the chair of the department and then (only if needed) the dean of that school or their designee. The student may not place any undue burden on the instructor to provide opportunities to make up course work due to excused absences.
Tuition and fees

Student status

New and continuing students at Portland State University should plan their study programs and workloads with a knowledge of the fee and tuition schedules of the institution. The Portland State Board of Trustees reserves the right to change the schedule of tuition and fees without notice. Additionally, certain charges set by the University are also subject to change.

Most laboratory and class materials are included in the tuition and fees payment, but certain classes do require special deposit charges, surcharges, or costs to cover materials. These charges are listed in the class descriptions under the PSU Class Schedule registration page located at sa.pdx.edu/soc/.

An admitted student is defined as a resident or nonresident undergraduate, post baccalaureate, or graduate student enrolled for 1 or more credit and currently admitted to the University. Admitted students will be assessed tuition and fees based on enrollment status. Admitted students are entitled to PSU home athletic events (with the exception of playoff games and social events), and use of University resources, including the Library, Center for Student Health and Counseling (SHAC), and Student Recreation Center. Students taking 5 or more credits will be billed a health service fee as part of their tuition and fees. No reduction in the total charge is made to those students who do not intend to use specific resources or services. Students taking 5 or more credits are also entitled to Student Health Insurance at an additional cost. More information can be found at pdx.edu/health-counseling/insurance.

All non-admitted part-time students, taking 1 to 8 credits, pay tuition and fees according to the level of the course(s) in which they enroll. Courses numbered 499 or below are assessed at the undergraduate rate; courses numbered 500 and above are assessed at the graduate rate. Part-time students enrolled in 4 or less hours are not entitled to health services or insurance. Residency and admission requirements are waived for students in this category. Visit pdx.edu/registration/enrollment-status for more information.

Tuition and fee calculation (Admitted) – One credit or more

Admitted students taking one credit or more are assessed tuition and fees according to their undergraduate/graduate and residency status. The level of courses in which students enroll is immaterial.

Restricted Differential Tuition and noncredit

Enrollment in these courses may not be combined with regular PSU credit courses for fee calculations. Restricted Differential Tuition courses have fees that are assessed in addition to any other tuition paid to the University.

Senior citizen fee schedule

Senior citizens are defined as persons age 65 or older who do not wish to earn course credit. Senior citizens who are Oregon residents are authorized to attend classes on a space-available basis without payment of tuition. Charges for special materials, if any, must be paid.

Incidental and Health Service fee privileges are not provided and the University does not maintain any records of enrollment. The registration receipt may be used to obtain a PSU ID Card.

Late fees

Late payment fees will be charged on all missed payments.

Students should consult the tuition and fee listing at pdx.edu/student-financial/tuition-and-fees for up-to-date information and applicable tuition and fees. Students who enroll are financially responsible for all classes and credits in which they are registered on or after the first day of the term. All classes dropped are subject to the refund schedule as outlined at pdx.edu/student-financial/refunds.

Account statements are available monthly in electronic format to currently enrolled student with a balance due. Notices are emailed to pdx.edu email addresses on the 16th of every month. All tuition and fees may be paid online, by mail, or at Cashier’s Office located in Student Financial Services. Specific deadlines are available at pdx.edu/student-financial/the-psu-payment-plan.

Tuition and fees must be paid in full each term. At the start of each term, students must pay the balance in full or opt-in to the PSU Payment Plan by the first payment due date. Afer the due date, students with a balance will be enrolled in the Payment Plan and incur a late fee. Additional information is available at pdx.edu/student-financial/the-psu-payment-plan. Students may access their individual financial account balances by logging onto banweb.pdx.edu.

Tuition and fee schedules/Regular tuition schedule

All students registered for coursework on or after the first day of the term have a financial obligation to the University. For more, information please see the Terms & Conditions of Payment at pdx.edu/student-financial/sites/www.pdx.edu.student-financial/files/Terms%26ConditionsofPayment.pdf.
Other special fees
Special fees and fines are subject to change. Up-to-date information on special fees and clarification of charges can be obtained from the Student Financial Services office, 503-725-3440 or by visiting pdx.edu/student-financial.

Terms and Conditions
Terms and Conditions can be viewed at pdx.edu/student-financial/sites/www.pdx.edu.student-financial/files/Terms%26ConditionsOfPayment.pdf

Health Insurance
The health insurance fee is non-refundable. For specific deadlines and questions, see www.pdx.edu/health-counseling/insurance.

Graduate Assistants
Graduate assistants (GAs) are fully admitted graduate students appointed to assistantships while working toward an advanced degree. Appointments must be for at least .15 FTE per quarter. GAs are exempt from the payment of the instruction fee on the first 9 credit hours per quarter. (Employing department will provide a tuition credit.) All GAs must register for a minimum of 9 graduate credits. Hours in excess of 9 per quarter are assessed at the normal rate and may be paid at the discretion of the department. GAs are responsible for paying the Building, Health, Incidental, Rec Center and any course specific fees.

Withdrawals and fee refunds
Complete withdrawal or dropping of courses can be done through banweb.pdx.edu or in person with the Office of the Registrar. For tuition and fee impact, see refund schedule at www.pdx.edu/student-finance/refunds. Refund consideration is automatic; no special request is necessary.

Refunds of special course fees must be approved by departments. Complete withdrawal or dropping coursework does not cancel a student’s obligation to pay a student loan, balance of account, or any other financial obligation owed the University. Students with such outstanding obligations will have any refund due them applied against the obligation.

1. Official withdrawals
Students receiving financial aid who need to completely withdraw from classes during a term should officially withdraw (see the instructions in the Schedule of Classes).

By using the official withdrawal procedures, students will have tuition refunds calculated by the Student Accounts Department. Regardless of “official withdraw” or Financial Aid, Student Financial Services will still calculate any possible refunds.

Students receiving financial aid who completely withdraw up to the 60 percent point of a term, will be identified. Financial aid staff will use the federal Return of Title IV Funds formula to calculate the percentage of financial aid earned versus the percentage of aid that must be returned to federal aid program accounts. In some cases, the Return of Title IV Funds calculation may take all of a student’s tuition refund to repay federal aid accounts. In addition, students may be responsible for repayment of federal financial aid program funds. Funds are returned to the financial aid programs from which they were awarded, starting with the loan programs.

Students who are considering withdrawing from a term should contact staff in the Office of the Registrar.

2. Unofficial withdrawals
Students who stop attending without officially withdrawing from Portland State University are considered to have unofficially withdrawn. Students who unofficially withdraw may receive all X or M grades at the end of a term. A grade of X is defined as no basis for grade or non-attendance. A grade of M designates a missing grade.

Students who receive financial aid for a term and unofficially withdraw are identified at the end of each term. Each student receiving financial aid who has unofficially withdrawn must provide proof of attendance for the term(s). Students who provide proof of attendance may be subject to the Return of Title IV Funds policy. Students who fail to provide proof of attendance will have all financial aid received repaid to federal accounts (including PLUS loans) and a university accounts receivable will be established.

Refund calculations are based on total tuition and fees. Special fees are nonrefundable. Refunds are computed from the date of official withdrawal or drop; they are not based on when attendance in class ceased. Students who are delayed in withdrawal process for reasons beyond their control may petition for an earlier drop date via a Deadline Appeals petition obtained through the Office of the Registrar. Refund consideration is automatic; no special request is necessary. Action to process a refund cannot begin until after the end of the fourth week of the term.
Financial Aid and Scholarships

503-725-3461
askfa@pdx.edu

www.pdx.edu/student-finance

The staff in the Office of Student Financial Aid and Scholarships is ready to help students understand the financial aid application process and the details of the funds they have been awarded.

Eligibility

To determine students’ eligibility for assistance, the following estimated direct and indirect expenses are used to create the students’ Cost of Attendance: tuition and fees, books and supplies, housing and meals, transportation and personal/miscellaneous expenses. Because the Cost of Attendance uses average amounts, it may not reflect students’ actual costs.

The Office of Student Financial Aid and Scholarships provides eligible students with financial aid in the form of grants and scholarships, employment and loans. Underlying the awarding of financial aid at PSU is the nationally accepted philosophy that parents are the primary source responsible for helping their dependent students meet their educational costs. The amount of the contribution expected from parents is based on a family’s financial strength as indicated by taxed and untaxed income, household size, number in college, and assets. Both dependent and independent students have a responsibility to make a reasonable contribution toward their costs from earnings and savings. Financial aid resources serve to supplement these primary resources and are intended for educational expenses only. Financial aid eligibility is calculated using a formula determined by federal law.

Students should apply annually using the Free Application for Federal Student Aid (FAFSA). The FAFSA can be filed online at www.fafsa.gov. PSU’s federal school code to be used on the FAFSA is 003216.

Applications for Aid

Applications for financial aid must be submitted annually for the academic year and/or summer aid. The academic year at Portland State University begins with fall term and ends after summer term. While the Office of Student Financial Aid and Scholarships accepts FAFSA data at any time during the year, priority is given to admitted applicants who submit their FAFSA as soon as possible after October 1st, and who provide all requested information promptly. It is recommended that students apply no later than February 1st each year. It is not necessary to wait for formal admission to the University before submitting the financial aid application. Scholarship applications are only accepted within the scholarship application open and close dates.

In order to be eligible to receive federal, state or institutional financial aid, students must remain in good academic standing as defined in the University Scholastic Standards Policy and by the Satisfactory Academic Progress (SAP) Policy requirements described at the end of the Financial Aid section. The student must be officially admitted to an aid-eligible degree or certificate program, and must be a U.S. citizen or eligible non-citizen as defined by federal regulations. Students may not receive aid beyond established limits, which include a rate of course completion, a maximum time frame, as well as annual and aggregate dollar amounts. Information about each aid program is available at www.pdx.edu/student-finance/types-aid.

Undergraduate students

Eligible undergraduate students may receive consideration for financial assistance through the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (SEOG), Federal TEACH Grant, Federal Work-Study, and Federal Direct Loan programs. Oregon resident students may also be eligible for the Oregon Opportunity Grant. Eligible parents of dependent students may borrow a Federal Direct PLUS Loan through the Federal Direct Loan Program, described in the Educational Loans section.

Post-baccalaureate students

Eligible post-baccalaureate students may receive consideration for financial assistance through the Federal Direct Loan Program. Parents of dependent post-baccalaureate students may borrow a Federal Direct PLUS Loan through the Federal Direct Loan Program, described in the Educational Loans section.

Graduate students

Eligible graduate students may receive consideration for financial assistance through the Federal TEACH Grant, and Federal Direct Loan Program, which includes Federal Direct Unsubsidized Loans and Federal Direct Graduate PLUS Loans.

International students

International students are not eligible to participate in
federal financial aid programs but are eligible for certain scholarships offered through PSU.

**Award Notification**

An Award Notification will indicate the types and amounts of financial aid from all sources for which the student is eligible, along with the terms and conditions of receiving and using the funds awarded. Award amounts will be displayed on the PSU student account at www.banweb.pdx.edu. Students must review and accept the terms and conditions for specific awards if necessary, then accept or decline aid in an offered status.

**Delivery of Aid**

After the financial aid award is accepted and all requirements have been completed, available financial aid will be credited to the student account to pay tuition and other billed charges for enrolled students each term. Financial aid that exceeds billed charges is then delivered to the student by the Portland State University Student Financial Services Office according to the preference that the student has established with the University. See www.pdx.edu/student-finance/financial-wellness-center for more information.

Federal Work-Study is earned on a monthly basis and paychecks are issued at the end of each month by the University’s payroll office. Students may authorize direct deposit of their Federal Work-Study earnings to their bank account. More information can be found at www.pdx.edu/student-finance/financial-aid/apply.

**Aid Disbursement Policy**

Financial aid can begin being disbursed to a student’s Portland State University revolving charge student account up to ten days prior to the start of each term. Aid will only be disbursed if a student’s registered enrollment level matches their award enrollment level for the term, and there are no outstanding requirements. The ability to disburse aid prior to the beginning of a term means that the University must have a “census date” that is used to finalize a student’s official aid eligibility for a term. Census dates for the 2021-2022 aid year and minimum enrollment requirements for the various financial aid programs can be found on the Office of Student Financial Aid and Scholarships website at www.pdx.edu/student-finance/eligibility. At the census date of each term each student’s enrollment is "locked" and considered to be final. Financial aid for that term may then require adjustment based on their enrollment level at that time. When a reduction in aid is required due to a student’s reduced enrollment level at the census date the reduction can create a balance due on the student’s PSU account. If there is tuition refund because of dropped credits, the tuition refund will be used to reduce the balance due on the student’s account.

Students applying to borrow a federal student loan must be enrolled in a minimum of halftime credit hours, have demonstrated need and/or eligible costs to receive a disbursement from the federal student loan programs.

Students who have received a disbursement of a federal student loan and then reduce enrollment below half-time at any point will be required to complete federal student loan exit counseling. The PSU Registrar’s Office will report the less than half-time enrollment status to the federal student loan servicer which will result in the loss of In School Deferrment status. All prior federal student loans for a borrower who does not qualify for in school deferment will enter the grace period or repayment if a grace period was previously used. Students who regain eligibility to borrow from the federal student loan programs by increasing enrollment after the census date for any term must notify the Office of Student Financial Aid by submitting a Revision Request for to update their enrollment plan and request a reinstatement of their federal student loan.

Any current term aid disbursed after the census date will be based on the student’s enrollment on the census date, or their actual number of credits enrolled at the time of disbursement, depending on type of aid. Credits added after the census date cannot be used to increase aid eligibility. Retroactive aid (aid for a term that has ended prior to disbursement) must be disbursed based on completed grades/credit hours, or census date registration, whichever is less. This includes retroactive grants and loans. Grades that are considered “complete” for disbursement purposes are: A, B, C, D, F (if earned through course participation), P, I or IP.

Withdrawals—Official/Unofficial

Please see the annual Registration Guide, or visit www.pdx.edu/registration, for the university policy regarding dropping classes and tuition refunds. Students who withdraw completely during the term are receiving federal, state, or institutional financial aid may have a percentage of their aid reversed based on federal regulations and institutional policies. These students will have any unearned portion of their aid charged back to their PSU account, and may owe repayment directly to the U.S. Department of Education of any overpaid federal grants. Federal student aid recipients who begin attending classes and then stop attending prior to the end of the quarter are considered by the federal government to have unofficially withdrawn. For students who receive grades of X, M, NP, W or F in all of their classes, we must determine whether they unofficially withdrew. If University records indicate that student unofficially withdrew from the quarter, the University will consider the Withdrawal date to be the last date of attendance or participation in class by the student midpoint of the quarter as determined by the University. If University records show a federal student aid recipient never attended any class or performed any
academically related activity for a quarter or term, then the recipient never established eligibility for any federal aid funds that may have been disbursed for that quarter or term. The student must repay the entire amount of ineligible aid disbursed for that term. Any student aid recipient who drops all classes or voids their schedule with an effective date prior to the first day of class for a quarter or term did not establish eligibility for any funds that may have been disbursed for that quarter or term. More information can be found at www.pdx.edu/student-finance/eligibility.

Award Sources

Comprehensive details on the federal aid programs are available online at www.studentaid.gov. Students and families can also find Financial Aid consumer information and guides at www.pdx.edu/student-finance.

Educational Grants

Federal Pell Grant

This federally funded grant program is designed to provide assistance to eligible undergraduate students. The federal government determines the amount of the grant with the University acting as the disbursing agent. Eligibility is determined by the Expected Family Contribution (EFC) that results from the student’s FAFSA data. Students have a lifetime limit of the equivalent of 6 years of full-time enrollment for Federal Pell Grant eligibility. Students apply for this grant by completing the FAFSA.

Federal Supplemental Educational Opportunity Grant (SEOG)

This is a limited federally funded grant program available to Federal Pell Grant recipients who have the lowest EFCs. Students apply for this grant by completing the FAFSA.

Oregon Opportunity Grant

All Oregon resident undergraduate students applying for financial aid will be considered for the Oregon Opportunity Grant awarded by the State of Oregon's Office of Student Access and Completion (OSAC). Awards are based upon financial need. Details about eligibility can be found at www.oregonstudentaid.gov. Awards are renewable for up to 12 terms provided satisfactory academic progress and financial need continue each academic year. Oregon students apply for this grant by completing the FAFSA, or, if not eligible to complete the FAFSA, the Oregon Student Aid Application (ORSA). The ORSAA can be located at www.oregonstudentaid.gov.

Federal Teacher Education Assistance for College and Higher Education (TEACH) Grant

This grant provides up to $4,000 per year to graduate and undergraduate students who intend to teach full-time as a highly qualified teacher in high-need subject areas for at least four years at schools that serve students from low-income families. Graduate students may receive up to $8,000 for graduate study. Undergraduate students may receive up to $16,000 for undergraduate study. Part-time students are eligible, but the maximum grant will be reduced. Students apply for this grant by completing the FAFSA.

Important Notice: If TEACH Grant recipients fail to complete the four-year teaching obligation, they must repay the grant with interest under the Federal Direct Loan program.

Tuition Grants, Scholarships, and Remissions

A variety of school funded programs that provide tuition assistance to eligible students. Students apply for these institutional programs by completing the FAFSA. More information can be found at www.pdx.edu/student-finance/financial-aid/grants.

Athletic Grants-In-Aid and Scholarships

Athletic grants-in-aid and scholarships are administered by the institution’s financial aid and athletic departments. Each head coach is responsible for selecting recipients based upon eligibility and athletic ability. The National Collegiate Athletic Association (NCAA) sets forth the eligibility and financial aid requirements for Portland State University athletic teams. Any prospective PSU student should contact the coach of the desired sport about the availability of scholarships and the recruiting process. Each coach will then consider the prospective student’s athletic ability, eligibility, finances available, and the need of that particular sport. An athletic grant-in-aid request is then submitted to the director of Athletics for award to the prospective student.

Educational Loans

Federal Direct Loan Program

Portland State University participates in the Federal Direct Loan program. Under this program, funding for student loans comes from the U.S. Treasury and are disbursed by schools. When loan repayments are due, borrowers repay them directly to the federal government through a loan servicer assigned by the U.S. Department of Education. Any subsequent loans are then serviced by the assigned loan servicer. Undergraduate and post-baccalaureate students can borrow Federal Direct Subsidized and Unsubsidized Loans; graduate students can borrow Federal Direct Unsubsidized Loans and Federal Direct Graduate PLUS Loans; and parents of dependent students can borrow Federal Direct Parent PLUS Loans.

Federal Direct Loan applicants must submit a FAFSA to have their loan eligibility determined. After their loans have been awarded, they must accept them as part of their financial aid award acceptance process, and complete
Master Promissory Note and satisfy entrance counseling requirements at www.studentaid.gov.

**Federal Direct Subsidized Stafford Loan**

Subsidized loan eligibility is based upon the demonstration of financial need and in conjunction with other sources of student assistance. The federal government pays the interest on this loan while the student is enrolled at least half-time and during the six-month grace period directly after a student separates from school. For students who are new borrowers after July 1, 2013, interest is paid by the federal government up to 150 percent of the published length of the academic program. The student is responsible for all interest on the loan once repayment begins or after 150 percent of the published length of the academic program is exceeded.

The federal government has set annual borrowing limits of $3,500 for the first academic year of undergraduate study (up to 44 credits); $4,500 for the second academic year (45–89 credits); and $5,500 an academic year for the remaining years of undergraduate study. Not all students are eligible for the maximum loan amount.

Student borrowers must be enrolled in good standing at least half-time and have been accepted for admission to a program leading to a degree or eligible certificate. Once repayment begins, borrowers are charged the interest rates that were in effect for each year they borrowed. For current interest rates, visit the Department of Education’s website at www.studentaid.gov/understand-aid/types/loans/interest-rates.

Students must complete a FAFSA each year to participate in this loan program.

**Federal Direct Unsubsidized Stafford Loan**

This program provides unsubsidized Federal Direct Loans to undergraduate and graduate students who do not demonstrate federally defined need. Unsubsidized loans are not eligible for the federal government payment of interest while the student is in school. The student may make interest-only payments while in school, or the interest will be added to the loan balance upon entering repayment. The interest rates for the Federal Direct Unsubsidized Loan are specific to each year that the student borrows. For current interest rates, visit the U.S. Department of Education’s website at www.studentaid.gov/understand-aid/types/loans/interest-rates. Students are responsible for the interest that accrues while in school, during their six-month grace period, and during any authorized deferment periods. The federal government has set annual borrowing limits of $2,000–$5,500 for the first academic year of undergraduate study (up to 44 credits); $2,000–$6,500 for the second academic year (45–89 credits); and $2,000–$7,500 an academic year for the remaining years of undergraduate study. Undergraduate borrowing limits vary based on the borrower's dependency status as indicated by the FAFSA.

**Lifetime (aggregate) Federal Direct Loan Borrowing Limits by Academic Program**

A student may borrow up to an aggregate limit of $31,000 (only $23,000 may be subsidized) as a dependent undergraduate or post baccalaureate student; $57,500 as an independent undergraduate or post baccalaureate student (only $23,000 of this amount may be subsidized); and $138,500 as a graduate or professional student (only $65,500 of this may be subsidized). The aggregate amount for graduate students includes all previous loans borrowed as an undergraduate or post baccalaureate student.

**Additional Federal Direct Unsubsidized Stafford Loan**

Dependent undergraduate students whose parents' Federal Direct Parent PLUS Loan applications are denied may be eligible for additional Federal Direct Unsubsidized Loan. Students who have earned fewer than 90 credits may borrow up to $4,000 a year in additional funds above the maximum Federal Direct Loan annual limits (but may not exceed aggregate limits). Students who have earned 90 credits or more may borrow up to an additional $5,000 per year (but may not exceed aggregate limits). Not all applicants will qualify for the maximum additional funding. The Federal Direct Unsubsidized Loan may be used to replace the Expected Family Contribution, but total Federal Direct Loan (subsidized and unsubsidized) borrowing, plus other financial assistance received, cannot exceed the Cost of Attendance.

Students must complete a FAFSA each year to participate in this loan program.

**Federal Direct Parent PLUS Loan (PLUS)**

This program provides loans to parents of dependent undergraduate students. Parents may borrow up to an annual amount that is equal to the Cost of Attendance minus any financial assistance the student receives during the periods of enrollment. The parent borrower may use the amount of the Federal Direct PLUS to replace the Expected Family Contribution and cover unmet need for the loan period. The Federal Direct PLUS Loan is limited to parents who do not have adverse credit history or who have obtained an endorser who does not have adverse credit history. A servicer, contracted by the federal government, performs the required credit check. The interest on the Federal Direct PLUS Loan is fixed. For current interest rates, visit the U.S. Department of Education’s website at www.studentaid.gov/understand-aid/types/loans/interest-rates.

Parents interested in participating in the Federal Direct PLUS Loan program can apply online at www.studentaid.gov.
Students must complete a FAFSA each year for their parent to participate in this loan program.

Federal PLUS Loan for Graduate and Professional Students (Graduate PLUS)

This program is available to credit-qualified graduate students with or without financial need. Repayment begins within sixty days after the Federal Direct Graduate PLUS Loan is fully disbursed. Students who meet deferment requirements may obtain an in-school deferment from the U.S. Department of Education. Interest is fixed for each loan, and begins to accrue at the time the first disbursement is made. For current interest rates, visit the Department of Education’s website at www.studentaid.gov/understand-aid/types/loans/interest-rates.

Students must complete a FAFSA each year to be eligible for Federal Direct Graduate PLUS Loans.

Private Alternative Loans

Privately funded education loans are not based on need, and no federal formula is applied to determine eligibility. The amount borrowed cannot exceed the Cost of Attendance minus other financial aid, including other loans. Interest rates and repayment terms vary by lender, and should be carefully considered when making borrowing decisions. Privately funded education loans may be used to supplement the federal programs when the cost of attendance minus the maximum federal aid still leaves unmet need. For information on alternative loans, visit the PSU website at www.pdx.edu/student-finance/financial-aid/apply.

Loan Repayment

Repayment of Federal Direct Loans (subsidized and unsubsidized) begins after the grace period, which is six months after the student withdraws or graduates from school, or has been enrolled less than half-time. Repayment of Federal Direct PLUS Loans begins within sixty days of the last disbursement. There are no penalties for making payments while in school or during the grace period. Students or parents may make payments at any time directly to their loan servicer.

Entrance and Exit Counseling

First-time Federal Direct Subsidized and Unsubsidized Loan and Federal Direct Graduate PLUS Loan borrowers must complete entrance counseling, which focuses on a borrower’s rights and responsibilities and provides information about responsible borrowing. Shortly before graduating or enrolling in less than half-time credit hours at Portland State University, borrowers must also complete student loan exit counseling. Both entrance and exit counseling are completed online at www.studentaid.gov.

Debt Management and Default Reduction

Portland State University is committed to helping students with sound financial planning and debt management. Information about loans, repayment options, and debt management strategies is available in the Office of Student Financial Aid and Scholarships at www.pdx.edu/student-finance and through the Financial Wellness Center in the Student Financial Services office at www.pdx.edu/student-finance/financial-wellness-center.

Federal Work-Study

The Federal Work-Study Program is a limited, need-based program available to eligible undergraduate students. Employment opportunities are on-campus and off-campus. On-campus jobs are available with nearly every academic and administrative department. Off-campus jobs are available with government agencies and nonprofit groups; many are community service jobs that involve directly serving the community while providing a good work experience. The America Reads program, which tutors young children in public schools, is one of these programs. The Portland State University Career Center lists openings for on-campus and off-campus jobs at www.pdx.edu/careers. More information can be found at www.pdx.edu/student-finance.

Scholarships

Portland State University has a number of scholarships which are administered by individual academic departments, the PSU General Scholarship committee, or special committees developed for specific scholarships. Scholarships generally are awarded on the basis of academic achievement or promise, and financial need. More information can be found at www.pdx.edu/student-finance/scholarships.

Satisfactory Academic Progress and Financial Aid

To be eligible for federal, state or institutional aid students must make satisfactory academic progress (SAP), as defined by federal regulations, toward completion of their program of study. Portland State University monitors the following: 1) student’s course completion rate which is a percentage calculated by taking the number of PSU + transfer credits passed divided by PSU + transfer credits attempted but not passed, according to student level; 2) grade point average (GPA) for PSU + transfer courses, according to student level; and 3) maximum time frame for PSU courses + accepted transfer credits. The maximum time frame for undergraduate students is 270 attempted credits. The maximum time frame for post-baccalaureate students is 90 attempted credits. The maximum time frame for graduate students is established according to the student's degree or program.
Repeated coursework: students may only receive aid once for repeating a previously passed class; students may receive aid for multiple repeats of failed classes as long as they maintain compliance with satisfactory academic progress requirements.

Multiple withdraws: financial aid recipients who withdraw from all of their classes, or who receive all non-passing grades in their classes TWICE within the school year, will have their financial aid eligibility suspended.

Graduate students must take courses at the appropriate level; at least 67% of all credits enrolled in during each academic year must be graduate level courses.

Students who do not meet all requirements of the satisfactory academic progress policy during a term will be placed on Financial Aid Warning; students who do not meet all requirements of the satisfactory academic progress policy during a second term will have their eligibility for financial aid suspended. Students whose eligibility is suspended may submit a written appeal. Students who appeal successfully will be placed on Financial Aid Probation and may need to submit and follow an academic plan.

For more information on Portland State University’s SAP Policy, visit www.pdx.edu/student-finance/satisfactory-academic-progress.

Undergraduate Programs

Portland State University is committed to providing its students with maximum opportunities for intellectual and creative development within the context of its urban and international mission. Students earning a baccalaureate degree will complete a rigorous program of study leading to mastery of the chosen field of study at the undergraduate level. In addition, Portland State University is committed to providing the foundation for continued learning after completing the baccalaureate degree. This foundation includes the capacity to engage in inquiry and critical thinking, to use various forms of communication for learning and expression, to gain an awareness of the broader human experience and its environment (local, national, and international), along with an ability to appreciate the responsibilities of individuals to themselves, each other, and community.

Undergraduate students at Portland State University may work toward a Bachelor of Arts, a Bachelor of Science, a Bachelor of Fine Arts, or a Bachelor of Music degree with one or more majors. See Programs of Study (p. Error! Bookmark not defined.) for majors leading to a baccalaureate degree.

Students working toward a bachelor's degree must complete the (1) University requirements, (2) University Studies (general education) requirement, (3) University Writing Requirement, (4) Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science requirements, (5) requirements for a major, and (6) Foreign Language competency if admitted with a high school foreign language deficiency. Students majoring in Liberal Studies or completing the Urban Honors Program do not need to meet the University Studies general education requirement. Specific requirements for a baccalaureate degree are detailed here. Students pursuing supplementary programs must complete additional requirements as specified in the curricula of these programs.

Students working toward a bachelor’s degree may wish to supplement their major coursework with:

A **Certificate Program** which is an approved academic award given in conjunction with the satisfactory completion of a program of instruction, signifying a standard of knowledge in a specific subject. Certificate types vary, with some available as part of a baccalaureate degree program, others available in non-degree status, and others available to post-baccalaureate students.

A **Minor** is an optional, undergraduate credential, comprised of a formally defined set of courses in a declared secondary subject area/field of study, distinct from and outside of the degree major.

For a list of available certificates and minors, see Programs of Study (p. Error! Bookmark not defined.).

**Intensive English Language Program (IELP)**

UCB Suite 400  
503-725-4088 | 503-725-2311 Fax  
esl@pdx.edu  
Mailing Address:  
Intensive English Language Program  
Portland State University  
PO Box 751  
Portland, OR 97207-0751  
Street Address:  
Intensive English Language Program  
527 SW Hall Street  
University Center Building, Suite 400  
Portland, OR 97201

**Program Information**

The Intensive English Language Program (IELP) offers courses designed to develop students’ competence in listening, speaking, reading, and writing. The IELP offers a wide variety of courses to help students meet their goals. The IELP Intensive Program is offered throughout the regular academic year and summer. There are two program options: (1) for students that desire academic preparation for undergraduate studies and (2) for students that desire academic preparation for graduate studies.

(1) Academic Preparation for Undergraduate Study – In this program there are six levels from Level 0 (Pre-Entry) for low beginners to Level 5 for advanced students. New students must take the IELP placement exams given by the program the week prior to the new term. Students placed in Level 0 (Pre-Entry) must successfully pass that level before taking courses in Levels 1-5. Full-time students in the Level 0 register for 22 credits per term. Full-time students in Levels 1-5 register for 18 - 20 credits per term. For more information on the Intensive Program, see our IELP website: http://www.pdx.edu/esl/program-options.

(2) Academic Preparation for Graduate Study – This program has one level. Students who plan to enter the
Graduate Preparation Program must complete Level 4 and Level 5 in the Academic Preparation for Undergraduate Study Program with passing grades before entering the Academic Preparation for Graduate Study Program. For students who are in both levels 4 and 5, movement to one or more graduate preparation track courses may take place before all level 5 classes are completed, based upon review of the students’ overall academic record.

**Accelerated Entry to Academic Preparation Program for Graduate Study**

Students planning to pursue graduate study and planning to enroll in Academic Preparation for Graduate Study (AP-G) courses may request to move from Level 4 directly into AP-G courses if they meet the following requirements:

- Complete EACH level 4 class with a 3.0 GPA in each class
- Earn an overall 3.0 GPA in the program (cumulative IELP GPA). Students who wish to enter the accelerated graduate track option must meet with their IELP academic advisor to determine their eligibility.

Students who elect to enter the Accelerated Graduate Track retain the option to take level 5 classes in the Academic Preparation for Undergraduate Study Program at the same time or upon completion of the Graduate Track classes.

**ADMISSION REQUIREMENTS**

No IELP application is required for students admitted to Portland State University. New PSU students should contact the IELP about placement and registration prior to the start of the term. Non-PSU students who wish to enroll in the IELP may apply directly to the IELP by submitting an application form and supporting documents to ielpadm@pdx.edu. All new students must take a placement test in English administered by the IELP. Placement into courses will be based on these test results as well as on other standardized test scores if available.

Students admitted to PSU without an ESL restriction may elect to take Academic Preparation courses in Levels 4 and 5. Up to 24 credits in the Academic Preparation programs may be applied towards an undergraduate degree.

For information and application materials, contact the IELP: http://www.pdx.edu/esl/contact

**Interdisciplinary Minors**

Portland State University offers numerous disciplinary minors in almost every department. In addition, PSU offers several interdisciplinary minors that explore topics or professional areas that are better understood through multiple disciplines. The minors listed below involve three or more departments in developing a curriculum to engage students in an interdisciplinary area.

- Advertising Management Minor for Communication Studies Majors
- Business Minor in Advertising for Graphic Design Majors
- Classical Studies
- Climate Change Science and Adaptation
- Elementary Education
- Elementary Education Science
- History and Philosophy of Science
- Law and Legal Studies
- 417 Middle Eastern Languages
- Neuroscience
- Secondary Education
- Special Education
- Sustainability 250
- Sustainable Urban Development Systems

**Military Science**

UTS room 204
2121 SW 4th Ave
503-725-3512
https://www.pdx.edu/rotc/

The department of military science entails the study of techniques, psychology, and practice used with the training of officers and soldiers. Military Science encompasses six major branches as follows:

**Military Organizations** — Develops optimal methods for the administration and organization of military units, as well as the military as a whole.

**Military Education and Training** — Studies the methodology and practices involved in training soldiers, NCOs (non-commissioned officers, i.e. sergeants), and officers.

**Military History** — Military activity has been a constant process over thousands of years, and the essential tactics, strategy, and goals of military operations have been unchanging throughout history.

**Military Geography** — Military geography encompasses much more than protestation to take the high ground, it studies the obvious, the geography of theatres, also the additional characteristics of politics, economics, and other natural features of locations.

**Military Technology and Equipment** — Military technology is not just the study of various technologies and applicable physical sciences used to increase military power. It may also extend to the study of production methods of military equipment, and ways to improve performance and reduce material and/or technological requirements for its production.
Military Strategy and Doctrine – Military strategy is in many ways the centerpiece of military science. It studies the specifics of combat, and attempts to reduce the many factors to a set of principles that govern all interactions of the field of battle. Portland State University and the Oregon Army National Guard offer a unique leadership development program specifically for the civilian career-minded student. This program, Guard Officer Leadership Development or GOLD/ROTC provides motivated young men and women with exciting and valuable instruction in a variety of areas such as decision-making, goal-setting, team-building, and small-group leadership. Classroom and outdoor activities are designed to physically, mentally, and emotionally challenge you, build your self-confidence, and develop your leadership skills. If you qualify, you could earn a commission as an Army officer upon graduation in the Oregon Army National Guard.

Program
GOLD/ROTC is a four-year program that provides on-campus military science instruction in two parts: the Basic Course and the Advanced Course. For this training, you are paid as a Sergeant (E-5). Both Courses are fully accredited and applicable towards fulfilling academic requirements for a baccalaureate degree.

Basic Course
The Basic Course is comprised of 100 and 200-level lower division courses, is usually taken in your freshman and sophomore years, and is open to any student enrolled at PSU. Your participation in this course is completely voluntary and requires no military commitment. Instruction is oriented on adventurous outdoor activities that give you insight into the military service, basic soldiering, and leadership.

You also get to learn about the citizen-soldier and his or her social contributions, duties, and responsibilities. Through your personal involvement, you get to see whether this role appeals to you.

Advanced Course
The Advanced Course is a two-year pre-commissioning phase that integrates classroom instruction, military training, and practical experience to progressively develop your leader skills, qualities, and character. Further leadership development will occur in 300/400 level Military Science and Army Physical Fitness classes. We will continuously assess your performance and provide you the essential feedback and reinforcement you need to become a leader in business, the community, and the Army National Guard.

Eligibility For The Basic Course. This course is open to any student enrolled at PSU.

Eligibility For The Advanced Course. You must meet these requirements to be accepted into the Advanced Course:

- Be between 18 and 30 years old. Age waiver may be granted up to age 35 by the Adjutant General or Commanding General of the State or Territory you reside in. (NGB-ARH Memo #06-11)
- Be a U.S. citizen.
- Be a member of the Army National Guard, Army Reserves or completed MS 100/200 level classes or attended LTC (Leadership Training Course) during the summer of your sophomore year.
- Be in good health as evidence by a current Chapter II or DODMERB physical.
- Be of good moral character and behavior.
- If you are currently in the Army National Guard or Reserves you do not have to participate in the Basic Course to enter the Advanced Course, but it is encouraged.

Assessment
Portland State University assesses undergraduate student learning and engagement related to the eight Undergraduate Campus-Wide Learning Outcomes: Communication; Creative and Critical Thinking; Disciplinary and/or Professional Expertise; Diversity; Engagement; Ethics and Social Responsibility; Internationalization; and Sustainability through a variety of activities.

Assessment of student learning and engagement occurs at classroom, departmental and institutional levels. Your participation in assessment matters, as results are used to improve teaching and learning, program structure, course content, and the overall student experience at Portland State University.

The types of assessments students might engage include standardized tests, placement tests, surveys, course evaluations, portfolios of student work, group or individual interviews, or classroom research, to name a few.

Incoming students to PSU may be required to take a writing assessment and, based on the results of that assessment, take an assigned writing course.

Academic standing policy
Undergraduate, Postbaccalaureate and Non-Degree Seeking Students
The faculty Scholastic Standards Committee (SSC) has the authority to place on Academic Warning, Probation or Dismissal any student according to the following standards:
Academic Warning

Any student with 12 or more attempted credits (including PSU and transfer work) whose cumulative PSU GPA falls below 2.00 will be placed on academic warning. A registration hold will also be applied to the student record until completion of a mandatory intervention facilitated by advising and career services. Students on academic warning are restricted to registering for 13 or fewer credits per term.

Academic Probation

Students on academic warning will be placed on academic probation if they do not meet at least one of the following requirements:

1. Raise the cumulative PSU GPA to 2.00, thereby returning to good standing
   or
2. Earn a GPA for the given term of 2.25 or above, thereby remaining on academic probation and subject to the same requirements in the next term.

Students on academic probation are restricted to registering for 13 or fewer credits per term.

Academic Dismissal

Students on academic probation will be dismissed if they do not meet at least one of the following requirements:

1. Raise the cumulative PSU GPA to 2.00, thereby returning to good standing
   or
2. Earn a GPA for the given term of 2.25 or above, thereby remaining on academic probation and subject to the same requirements for the next term.

Notes

1. Grade changes or removal of Incomplete grades do not change academic standing status.
2. Academic standing status in the current term may be changed by engaging the repeat policy, however repeating courses will not retroactively change the status of a past term.
3. Students who are academically dismissed from PSU are not permitted to register either full-time or part-time.
4. When evaluating undergraduate academic standing, only PSU undergraduate credit is considered.
5. Students on academic warning or academic probation who receive only grades of I, X, and/or NP will lose academic standing.

Reinstatement

A student who is dismissed may be reinstated in one of two ways. One is to petition and be approved for reinstatement by the Scholastic Standards Committee. Petitions for current term reinstatement must be returned to the Office of the Registrar prior to the beginning of the term for a timely decision. Alternatively, conferral of an accredited transferable Associate’s or Bachelor’s degree earned subsequent to the dismissal from PSU, will constitute automatic reinstatement to the University. An official transcript with the degree posted must be presented to the Office of the Registrar. Reinstated students are given probation status.

Graduate Students and Postbaccalaureates taking graduate level courses

Graduate Academic Standing is administered by the Graduate School. See the Graduate Studies section of this Bulletin (p. 41) for policy details.

Credit for Prior Learning (CPL)

Portland State University recognizes that adults entering or returning to college bring with them a wide variety of prior learning experiences including work, travel, volunteering, activities in professional organizations, or self-study. CPL allows qualified undergraduate students to earn credit for college-level learning outside of the classroom.

PSU offers four types of CPL credit:

1. PSU Departmental Challenge Exam
2. Prior Learning Portfolio (The portfolio option is not available at this time)
3. College Level Examination Program (CLEP)
4. Military Credit

CPL Academic Policies

1. Student Eligibility:
   a. PSU Challenge Exam and Prior Learning Portfolio review requires students to be formally admitted to PSU as an undergraduate and to be enrolled in or have completed one PSU course. Students enrolling in Prior Learning Portfolio must also be in Academic Good Standing.
   b. CLEP and Military Credit is evaluated and awarded as transfer credit at the time a student is formally admitted to PSU, prior to matriculation/enrollment.
2. Grading: CPL credit is limited to Pass-only grading and, as such, will not have a GPA effect. A "No Pass" assessment is not recorded on the PSU transcript and will have no impact on the GPA calculation.
3. Pass/No Pass Limit: PSU Exam and Portfolio credit are included in the calculation of the 45-hour limit on Pass credit. CLEP and Military Credit are exempt from the 45 P/NP limit.
4. Transcripts:
a. Credit earned by PSU Challenge Exam and Prior Learning Portfolio will be included and appear as institutional credit on the PSU official transcript. It will be identified as CPL credit.
b. CLEP and Military Credit awards are not included on the PSU Official Transcript. CLEP and Military Credit awards are treated like transfer credit and may apply towards PSU degree requirements and appear on the PSU Degree Audit.

5. CPL Limits: No more than 45 credits of PSU Challenge Exam and Prior Learning Portfolio credit can apply toward a PSU degree. CPL can be used to complete degree requirements unless it is restricted in a major by a particular academic unit.

6. Repeat Policy: CPL is not eligible for the PSU Repeat Policy. Earning CPL credit for a course in which a student had previously earned a D or F does not remove the prior grade from the GPA calculation.

7. Residency Requirement: CPL credit will not count toward the PSU credits in residence requirement.

8. University Studies Placement: CLEP and Military Credit will be combined with the transfer credit to establish placement into the University Studies general education program. PSU Exam and Portfolio credit will not be used to establish placement.

9. CPL can be awarded in courses that have been approved by academic departments. Not all courses in all departments are open to challenge. Each academic unit decides which of its courses are available to undergraduates for CPL credit. No courses numbered 199, 299, 399, or 401 to 410 inclusive are eligible for CPL credit.

10. Credit earned by CPL may not be received in a course which:
   a. Duplicates credit previously earned by a student, or
   b. Is more elementary, as determined by departmental, college, or school regulations, than a course in which the student has already received credit.

11. Department permission is required in order to re-attempt CPL credit for the same course, after a non-passing prior attempt.

Undergraduate Degree and Credential Requirements

To earn a baccalaureate degree a student must complete (1) University requirements, (2) University Studies - General Education requirements, (3) University Writing Requirement, (4) specific requirements for the Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science Degree, (5) requirements for a major, and (6) Second Language competency if admitted with a

High School Second Language Deficiency. Students earning a single major in Liberal Studies, or completing the Urban Honors program do not need to meet the University Studies General Education requirements.

Students bear final responsibility for ensuring that the courses taken are applicable toward satisfying their degree requirements.

1. General University Requirements: GPA, Credits and Limitations

   Minimum number of credits, including lower-division plus upper-division (some programs require more than 180 credits)

   Minimum number of upper-division credits (300 and 400-level)

   Minimum cumulative grade point average (2.00 on all PSU work and 2.00 on all courses no matter where taken in major field of study. Some departments require GPA higher than 2.00 in major.)

   Residence Credit: 45 of the final 75, or 150 total must be taken at PSU. (Restrictions: PSU Exam credit and Credit for Prior Learning portfolio credit are excluded. At least 25 of the last 45 credits must be for differentiated grades.)

   Maximum number of credits transferred from regionally accredited two-year institutions

   Maximum number of correspondence credits

   Maximum number of credits graded P (Pass) that may apply to a degree (This does not include credits with Pass grades accepted in transfer from institutions that do not offer differentiated grades.)

   Maximum number of Credit for Prior Learning credits that may apply to a degree
Maximum number of Physical Education activity credits that may apply to a degree 12

Maximum number of Cooperative Education credits that may apply to a degree 12

Maximum number of English as a Second Language (ESL) credits that may apply to a degree 24

(Note: to apply, courses must be at the advanced or academic college-level of study, which is defined as equivalent to PSU "level 4" courses or above.)

2. University Studies (General Education Requirement)

This requirement does not apply to Liberal Studies majors or students formally admitted to the Urban Honors College. Urban Honors College general education requirements are satisfied with specific Honors courses.

The purpose of the general education program at Portland State University is to enable students to acquire and develop the knowledge, abilities, and attitudes which form a foundation for lifelong learning. This foundation includes the capacity and the propensity to engage in inquiry and critical thinking, to use various forms of communication for learning and expression, to gain an awareness of the broader human experience and its environment, and to appreciate the responsibilities of persons to themselves, to each other, and to community.

To accomplish this purpose all freshmen entering with fewer than 30 prior university credits are required to complete the following program (See www.pdx.edu/unst/ for course descriptions and capstone offerings):

- **Freshman Inquiry** (15 credits). One year-long course which must be taken in sequence (UnSt 100-level).

- **Sophomore Inquiry** (12 credits). Students are required to choose three Sophomore Inquiry courses, each linked to a different University Studies cluster for a total of 12 credits UnSt 200-level).

- **Upper-Division Cluster** (Junior and Senior Years) (12 credits). Students are required to select three courses (for a total of 12 credits) from one upper-division cluster (300 to 400-level courses designated with a U) which is directly linked to one of the three Sophomore Inquiry classes previously taken.

- **Senior Capstone** (6 credits). This 6-credit capstone course (UnSt 421) is the culminating general education course for seniors. Students join an interdisciplinary team, develop a strategy to address a problem or concern in the community, and implement this strategy over one, two, or three quarters of work.

Note: Students may not use any course to satisfy both cluster and major requirements. Cluster courses must be taken outside of the major. This includes courses that might be cross-listed elsewhere with the student's major prefix.

**Attention transfer students:**

The following placement within University Studies is based on total credits accepted at term of admission to PSU.

- Transfer students who have earned fewer than 30 quarter credits of transfer work are required to complete all of the University Studies program requirements, including the entire sequence of Freshman Inquiry.

- Transfer students who have earned 30-89 quarter credits of transfer work are required to complete the University Studies program beginning with Sophomore Inquiry as follows: 30-59 credits, three courses; 60-74 credits, two courses; and 75-89 credits, one course. (The upper-division cluster must be linked to one of these Sophomore Inquiry classes.)

- Transfer students who have earned 90-134 quarter credits of transfer work are required to complete the University Studies program beginning with the Senior Capstone (6 credits).

3. University Writing Requirement – 2 college-level composition courses

Students must complete 2 college-level composition courses or their approved equivalents. The requirement may be satisfied in one of the following ways:

- Students admitted to PSU as freshmen (0-29 transfer credits) meet the requirement by completing the first two years of University Studies or Urban Honors College (both approved equivalents of composition courses);

- Students admitted to PSU having earned 30-89 transfer credits meet the requirement with Wr 121 (required for transfer admission) and the requisite number of Sophomore Inquiry courses determined by placement into University Studies or HON 201, 202, 203;
• Students admitted having earned 90 or more transfer credits have four options for meeting the requirement:
  • Transfer into PSU with an approved equivalent of Wr 121 plus one approved composition course for which Wr 121 (or its approved equivalent) is a pre-requisite;
  • Transfer into PSU with two approved composition courses for which Wr 121 (or its approved equivalent) is a pre-requisite;
  • Complete Wr 121 plus an additional course from the following PSU course list: Wr 200, Wr 222, Wr 227, Wr 228, Wr 300, Wr 301, Wr 323, Wr 327, Wr 333, Wr 394, Wr 400, Wr 420 or a 4-credit Writing Intensive Course (WIC). Composition writing courses transferred into PSU may also be considered.
  • Complete any two courses from the PSU list above.
For information about Writing Intensive Courses or for questions about approved equivalents for composition courses, please email the English Department at eng@pdx.edu.

4. Requirements for Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Science Degrees

Courses taken to satisfy BA/BS requirements may also be used to meet any other requirements if they conform to the regular qualification for those requirements.

• For the Bachelor of Arts degree: Students must complete a minimum of 23 credits to include a minimum of 10 credits in the arts and letters academic distribution area, with a minimum of 3 credits in the area of fine and performing arts; a minimum of 10 credits in the science and/or social science distribution areas, with a minimum of 3 credits in the science distribution area; and a minimum of 3 credits in a second language numbered 203 or higher (conducted in the target language). See second language requirements listed below.

• For the Bachelor of Fine Arts degree: Students must complete the specific programs as prescribed by the department.

• For the Bachelor of Music degree: Students must complete the specific programs as prescribed by the Department of Music.

• For the Bachelor of Science degree: Students must complete a minimum of 23 credits to include: one year of science courses (minimum 10 credits total) in the Science academic distribution area (excluding mathematical sciences/statistics), and two of the science courses (6 credits minimum) must contain integrated or associated laboratory or field work; a minimum of 10 credits in the Arts and Letters and/or the Social Sciences distribution areas; and minimum of 3 credits in mathematical sciences/statistics. Science courses may, but do not need to, be taken from the same science department. Unless otherwise specified, only courses within the Science distribution area that have an explicit indication of lab or field work as part of the catalog description will satisfy the B.S. degree requirement for lab/field work.

Academic Distribution Areas

• The Arts and Letters academic distribution area consists of undergraduate courses from the following: Applied Linguistics, Architecture, Art, Arts and Letters, Black Studies (BSt 221, BSt 351U, BSt 352U, BSt 353U, BSt 421, BSt 424U, BSt 425U, BSt 426U, BSt 427U only), Communication, Conflict Resolution, Dance, English, Film, Judaic Studies (JSt 325, JSt 431, JSt 435 only), Music, Philosophy, Speech and Hearing Sciences, Systems Science (SySc 421 only), Theater Arts, World Languages and Literatures, Writing.

Geog 497), History, International Studies, Judaic Studies (except JSt 325, JSt 431, JSt 435), Native American Studies, Political Science, Psychology, Social Science, Social Work (SW 310, SW 320, SW 340, SW 341, SW 350, SW 351, SW 375, SW 384, SW 399 Intro to Oppression & Privilege, SW 416, SW 430, SW 431, SW 440, SW 451 only), Sociology, Systems Science (SySc 336, SySc 338, SySc 340, SySc 342, SySc 350, SySc 413, SySc 418 only), Urban Studies and Planning, Women’s Studies.

Fine & Performing Arts Requirement
The Fine & Performing Arts area consists of undergraduate courses from the following College of the Arts subject areas: Architecture, Art, Dance, Film, Music, Theater Arts. Courses from other colleges that satisfy this requirement include: BST 353U, 356U, 363U, 425, 426, COMM 362, DANE 361U, ENG 305U, 334, 335U, 435, FR 105, 305, HST 497, IT 361U, JPN 361U, MGRK 361, PHE 455, PS 317U, RSU 331U, SOC 454, SPAN 430 (Ibero-American Film), 436, USP 314U, WS 309, WR 416.

5. Major Requirements
Students must complete the requirements for at least one major field of study. Descriptions for major program requirements can be found in the individual department sections of this catalog.

6. High School Second Language Admission Deficiency
Students graduating from high school in 1997 or later who did not meet the Second Language Proficiency requirement at the time of admission must complete the requirement prior to earning an undergraduate degree at Portland State University.

Second Language Proficiency Requirements (2 units) –
includes demonstrated proficiency equivalent to two years of the same high school-level second language. Students who did not meet this requirement in high school may demonstrate proficiency by meeting one of the following options:

- Pass with a D- or better two quarters or two semesters of college-level second language
- Pass an approved proficiency exam
- American Sign Language qualifies as a second language.

For a complete list of proficiency options available for meeting the second language requirements, please contact the University’s Office of Admissions.

Catalog Eligibility and Degree Requirements
To earn an undergraduate degree, a student must meet the degree and major requirements published in an annual PSU Bulletin (catalog) for which the student is eligible and which is still valid at the time of the student’s graduation. This applies to a first bachelor’s degree, subsequent bachelor’s degrees and to certificates earned by undergraduate and postbaccalaureate students.

Catalog Eligibility Rules
Students may select the requirements of the PSU catalog in effect during the year they first enrolled at any accredited, postsecondary institution, or any subsequent year, regardless of whether the student was enrolled or not, as long as the student graduates within seven years of the year selected.

Seven-year Rule
The requirements in any Bulletin (catalog) are valid for seven years. Specifically, a catalog is valid through the summer term following the seventh academic year after issuance of the catalog. Example: The 2021-22 catalog requirements will expire at the end of summer term 2028.

Double Major
Students with two or more majors must identify which major is considered the primary/first major. The primary/first major will determine how the University Studies general education requirements are applied. Specifically, primary/first major courses cannot apply to University Studies clusters. (For this purpose, major courses include any course with a subject code that matches the major, plus any specific course required or used to meet major requirements, even if from another department.) Also, a few majors require an additional, specific Sophomore Inquiry course. If double majoring, the liberal studies major (which does not require University Studies general education requirements) cannot serve as the primary/first major. In this case the other major will be considered the primary/first major and the University Studies cluster restrictions will apply accordingly.

Concurrent Degrees
Students may earn two degrees at the same time, as long as the degrees are different and the majors are different, by 1) meeting the requirements in the specific Bachelor’s degree (e.g. BA, BS, BFA, BM) and in each major, 2) earning 36 credits beyond the 180 minimum required for a single Bachelor’s degree (i.e. 216 credits total), and 3) meeting the PSU Residence Credit requirement by completing 45 of the last 75 or 150 of the total 216 at PSU.

Minors
A Minor is an optional, undergraduate credential. It is a formal, defined set of courses in a declared secondary subject area/field of study, distinct from and outside of the student’s degree major, in which knowledge is gained in a coherent pattern of courses. A minor is intended to supplement the major field of study, and as part of a
baccalaureate degree program may only be awarded at the same time the baccalaureate degree is awarded. A minor is posted to the official transcript, but does not print on the diploma.

**Undergraduate Certificates**

A certificate is an approved academic award given in conjunction with the satisfactory completion of a program of instruction, signifying a standard of knowledge in a specific subject. Certificates are posted to the official transcript and documented on a separate diploma.

In addition to meeting the specific course requirements of the certificate, students must meet the Residency Requirement: a minimum of 16 credits or 3/4 of the credits required for the certificate, whichever is higher, must be earned at Portland State University.

Three types of certificates are available at the undergraduate level, each differing in terms of the minimum required admission status and in the timing of when the certificate is awarded, as described below. Individual certificates may have unique pre-requisites or program admission requirements defined by the academic departments.

**Undergraduate Certificate Awarded with Baccalaureate**

An Undergraduate Certificate Awarded with Baccalaureate is intended to supplement the major field of study and is an optional credential. Undergraduate Admission is required, and as part of a baccalaureate degree program, this type of certificate may only be awarded at the same time the baccalaureate degree is awarded. This certificate type may also be earned by students admitted and matriculated into Postbaccalaureate and Graduate status.

**Undergraduate Certificate Awarded at Completion**

An Undergraduate Certificate Awarded at Completion may supplement the major field of study or be awarded as an independent credential prior to completion of the bachelor’s degree. This certificate type may also be earned by students admitted and matriculated into Postbaccalaureate and Graduate status.

**Certificate – Admission Not Required**

Formal undergraduate admission is not required. Students may earn the certificate in the non-degree enrollment status. Financial Aid is not available to students enrolled in the non-degree status. This certificate type may also be earned by students admitted and matriculated into Undergraduate, Postbaccalaureate or Graduate status.

**Postbaccalaureate Credential Requirements**

**Second Baccalaureate Degree**

A candidate for a second baccalaureate degree must complete the following:

1. Residence credit after earning first degree: if the first degree was from Portland State University, 36 credits; if the first degree was from another college or university accredited by a recognized regional association, 45 credits. Restriction: At least 25 of the 45 credits must be for differentiated grades (A-F).

2. Bachelor of Arts degree: if the first degree was not a B.A., students must complete a minimum of 23 credits to include:
   a. a minimum of 10 credits in arts and letters distribution area with minimum of 3 in fine and performing arts
   b. a minimum of 10 credits in science and/or social science distribution area with minimum of 3 in science
   c. a minimum of 3 credits in a second language numbered 203 or higher.

3. Bachelor of Music degree: if the first degree was not a B.M., students must complete program in music and applied music as prescribed by the Department of Music

4. Bachelor of Science degree: if the first degree was not a B.S., students must complete a minimum of 23 credits to include:
   a. Minimum of 10 credits science including 6 with lab (excluding math/statistics)
   b. Minimum of 10 credits arts and letters and/or social science
   c. Minimum of 3 credits math/statistics

5. Bachelor of Fine Arts degree: if the first degree was not a B.F.A. students must complete program as prescribed by the department.

6. Requirements for a major: Courses taken as a postbaccalaureate student or as part of the first degree program count toward the major. Students do not need to meet the general education requirement.

7. Admitted postbaccalaureate students must maintain a cumulative GPA of 2.00 on all work taken at PSU. Failure to do so will result in academic warning, probation, or dismissal.

8. Postbaccalaureate students who do not hold a degree from a university in the U.S., English-speaking Canada, Great Britain, Ireland, Australia, or New Zealand must
Postbaccalaureate Certificates

Postbaccalaureate Certificates are approved academic awards given in conjunction with the satisfactory completion of a program of instruction, signifying a standard of knowledge in a specific subject. The curriculum is designed for students to complete after they have already earned a bachelor's degree. To be eligible to earn the certificate, the student must be admitted and matriculated into postbaccalaureate or graduate status. A Postbaccalaureate Certificate is posted to the official transcript and documented on a separate diploma.

In addition to meeting the specific course requirements of the certificate, students must:

- Hold a previously earned baccalaureate degree.
- Meet the Residency Requirement: a minimum of 16 credits or 3/4 of the credits required for the certificate, whichever is higher, must be earned at Portland State University.
- Students who do not hold a degree from a university in the U.S., English-speaking Canada, Great Britain, Ireland, Australia, or New Zealand must satisfy the Wr 323 requirement.

The undergraduate grading system applies only to undergraduate courses.

The undergraduate grading system gives students the choice of taking certain courses designated by departments for either differentiated (A, B, C, D, F) or undifferentiated (pass or no pass) grades.

The following grading scale is employed at the undergraduate level:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>A+</td>
<td>3.33</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
</tr>
<tr>
<td>B+</td>
<td>2.33</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.67</td>
</tr>
<tr>
<td>D</td>
<td>1.33</td>
</tr>
<tr>
<td>D-</td>
<td>1.00</td>
</tr>
<tr>
<td>F</td>
<td>0.67</td>
</tr>
<tr>
<td>P</td>
<td>0.00</td>
</tr>
</tbody>
</table>

Evaluation of a student’s performance is determined by the following grades:

A—Excellent
B—Good
C—Satisfactory
D—Inferior
F—Failure
P—Pass
NP—No pass

The following marks are also used:

Grading System for Undergraduates

I—Incomplete
IP—In Progress
W—Withdrawal
AU—Audit
X—Non-attendance and No basis for grade
M—Missing grade/No grade received

Pass/No Pass Grading Options

The online Class Schedule identifies courses as offered under the differentiated or undifferentiated option. Students electing the undifferentiated grade option when it is offered are graded pass or no pass. In the majority of instances, a pass grade is equated to a C- grade or better, although some departments may differ. (NOTE: At the graduate course level the equivalent of a B- grade or better is required to earn a grade of P). Pass/No Pass grades are not used in computing a student’s GPA. A maximum of 45 credits graded P may be applied toward Portland State’s baccalaureate degree. Students elect grade options for specific courses during the registration period. Grading options may not be changed after the seventh week of the term. The undifferentiated grade option may not be used to repeat a course previously taken for differentiated grade or for major requirements in some departments.

Incomplete Grades

Students do not have a right to receive/demand an Incomplete grade. The option of assigning an Incomplete grade is at the discretion of the instructor when the following criteria are met.

Eligibility Criteria

1. **Required satisfactory course completion/participation.**
   
   The quality of the work is satisfactory, but some essential work remains. In addition, the student must have successfully completed most of the course work at the time the student requests the Incomplete, with a minimum grade up to that point of a C- for undergraduate, or B- for a graduate level course.

2. **Reasonable justification for request.**
   
   Reasons for assigning the Incomplete must be acceptable by the instructor. A student does not have the right to demand an Incomplete. The circumstances should be unforeseen or be beyond the control of the student. The instructor is entitled to request appropriate medical or other documentation to validate the student’s request.

3. **Incomplete grade is not a substitute for a poor grade.**
   
   The Incomplete grade is not meant to create the opportunity for special or additional work for a student to
raise a poor grade, or for the opportunity to take the course 
over by sitting in on the course in a later term without 
registering or paying for it.

4. Written agreement.
A written or electronic agreement will be endorsed by both 
the instructor and student. The document will specify a) 
the remaining work to be completed, b) the highest grade 
which may be awarded upon submission of remaining 
items, and c) the date which the missing work is due. The 
latter may not exceed one year from the end of the term for 
enrollment for the given course. A template “Incomplete 
Contract” is available at 
www.pdx.edu/registration/grading-system.

5. Resolving the Incomplete.
Instructors may not encourage students to “sit in” an entire 
future course in order to resolve the Incomplete grade. If 
the student needs to retake the entire course, they should be 
given the grade presently earned, and must formally 
register for the future class they will be attending. If the 
missed portion of the course is no longer available, 
instructors may offer an alternative assignment. Grading 
weight of the alternative assignments should not exceed the 
original assignment. Students are fully responsible for 
monitoring all due dates.

Other Rules:

1. GPA Calculation:
Incomplete grades are not included when calculating GPA.

2. Deadline for Completion:
The deadline for completion of an Incomplete is one 
calendar year. The instructor may set a shorter deadline, 
which is binding. Any request for a longer deadline must be 
requested via petition to the Scholastic Standards 
Committee or Graduate Council.

3. Failure to make up an Incomplete by the end 
of one year:
a. Undergraduate Incomplete Grades: The mark of “I” 
will automatically change to a grade of “F” or 
“NP”, depending on the grading option chosen by 
the student upon registration. If the Incomplete 
converts to an F, the F grade is included in 
calculating GPA.
b. Graduate Incomplete Grades: The Incomplete will 
become part of the permanent record for a graduate 
course.

4. Graduating Undergraduate Students:
Incompletes awarded in undergraduate courses taken in 
Fall 2006 or later will automatically change to a grade of 
“F” or “NP” before conferral of the degree. The faculty of 
record may submit a grade change no later than 30 days 
after the degree is awarded. Grades of “F” or “NP” will 
remain on the academic record after this period and cannot 
be removed.

Drops and withdrawals
The student must initiate drop/withdrawals from a course. 
It is the student’s responsibility to withdraw properly by 
the deadline dates published online at 
www.pdx.edu/registration/calendar. To avoid having to 
pay special course deposit fees, students should refer to 
departmental policies.

A student may drop with no record of the course on the 
transcript up to the end of the second week of the term. As 
a courtesy, students are advised to notify the instructor 
concerned of the intended drop.

A student may withdraw for any reason before the end of 
the seventh week. A student withdrawing in the third 
through the seventh week will have a “W” recorded on the 
transcript.

A student cannot withdraw after the seventh week without 
approval of the Deadline Appeals Committee. A “W” is 
recorded if the petition is allowed.

Deadline dates for drops and withdrawals are found in the 
academic calendar published online at 
www.pdx.edu/registration/calendar.

X Grade: Non-attendance and No Basis for Grade
The X grade is used when there is little or no attendance 
and no work/performance upon which to base an academic 
evaluation. X grades cannot be changed after initial 
submission and other grades cannot be changed to X 
except in cases of bona fide grading error as documented 
by instructor, requiring department chair approval. X 
grades carry no credit and are not included when 
calculating GPA.

M Grade: Missing Grade
M grades are automatically assigned by the system when 
grades have not been submitted to the Office of Registrar 
by the grading deadline. M grades will change to a grade of 
X, one term after the initial term. Once converted to an 
X, grade cannot be changed except in cases of bona fide 
grading error as documented by instructor, requiring 
department chair approval. M grades carry no credit and 
are not included when calculating GPA.

Non-Completion of Course
A student who has participated in a course but who has 
failed to complete essential work or attend examinations, 
and who has not communicated with the instructor, will be 
assigned a D, F, NP, or whatever grade the work has 
earned. Students who have not attended, nor participated in 
a course may receive an X grade.
Grade Point Average (GPA)

The Office of the Registrar computes current and cumulative GPAs on student grade reports and transcripts, according to the following scale: A = 4, B = 3, C = 2, D = 1, F = 0. A plus grade increases the points by 0.33, a minus decreases it by 0.33 (e.g., B- = 2.67). Cumulative grade point averages include all credits and points earned at PSU. The GPA calculation is truncated at two decimal points (i.e., rounding up is not used). Separate GPAs are calculated for undergraduate courses and for graduate courses. Further details on academic standing can be found at www.pdx.edu/registration/academic-standing.

GPA Repeat Policy

This policy only applies to undergraduate duplicate courses. Credit and GPA are retained on the first A, A-, B+, B, B-, C+, C, C-, and all grades in subsequent attempts count in GPA. The first PSU grade of D or F may be forgiven if repeated at PSU for a differentiated grade (not P/NP). In this case, credit is retained on the last grade received. Both grades are retained on the transcript. If repeated more than once, each subsequent grade will be retained on the transcript and counted in the GPA. Credit for Prior Learning and Credit by Exam are not eligible for use in the Repeat Policy.

Latin honors at graduation

Latin honors designations are conferred at the baccalaureate level to students who have earned the requisite PSU GPA and who have earned a minimum of 72 credits from PSU, with at least 60 of those credits taken for differentiated grades (A–F). The GPA calculation is based on PSU credit and utilizes the current PSU repeat policy. The award levels are as follows:

summa cum laude—3.90-4.00
magna cum laude—3.80-3.89
cum laude—3.67-3.79

Latin honors are noted on academic transcripts, inscribed on diplomas, and honors candidates are identified in the commencement program.

President’s List and Dean’s List Awards

Portland State University recognizes and honors the academic accomplishments of our undergraduate students each term by awarding placement on the Dean’s List and the President’s List. High achieving students, as indicated by grade point averages, are placed on the Dean’s or the President’s List according to the criteria established by the Council of Deans. Dean’s List and President’s List awards are only given to undergraduate students who have not yet earned a baccalaureate degree. The awards are given at the end of each term and are not recalculated based on grade changes or the removal of incomplete grades. The award is acknowledged with a notation on the student’s academic transcript.

Full-time

Students who have a term GPA of 4.00 are placed on the President’s List, and students who have a term GPA of 3.75-3.99 are placed on the Dean’s List.

Students on both lists must be admitted undergraduate students with a cumulative GPA of 3.50 or better, carrying 12 credits or more (excluding AU and P/NP credits).

Part-time

Admitted undergraduate students with a cumulative GPA of 3.50 or better, carrying fewer than 12 credits for a given term may qualify for the President’s List (4.00 GPA) or Dean’s List (3.75-3.99 GPA) if both of the following conditions are met:

• A minimum of three part-time terms must be completed in succession, without interruption by either a term of full-time enrollment or the awarding of Dean’s List or President’s List
• At least 12 credits (excluding AU and P/NP credits) must be earned over the combined part-time terms and the student must have an average GPA of 4.00 (President’s List) or 3.75-3.99 (Dean’s List) over the combined terms

Transfer Credit Policies

Accredited colleges and universities

The Office of the Registrar, in consultation with academic units evaluates credits from accredited colleges and universities. Portland State University accepts college-level credits earned in academic degree programs at colleges and universities accredited by regional accrediting associations and as recommended in Transfer Credit Practices of Designated Educational Institutions. All courses are evaluated to be either equivalent or parallel to Portland State University courses. Equivalent means that the catalog course description is substantially equal to that in the Portland State University Bulletin. Parallel means that the course is in a discipline which is offered by Portland State, even though PSU does not offer the specific course.

Unaccredited institutions and foreign colleges and universities

Departmental representatives, working through the Office of the Registrar, are authorized to evaluate credits transferred from unaccredited institutions or foreign colleges and universities after a student has been admitted to PSU. For specific course equivalency, students may be asked to provide catalog descriptions and/or documents certifying course content. Work from unaccredited schools is evaluated in accordance with the institutions and policies
listed in Transfer Credit Practices, published by the American Association of Collegiate Registrars and Admissions Officers. Credit given for a particular course will not exceed credit given for the equivalent or corresponding PSU course.

Co-admission programs
Portland State University has established co-admission programs with Chemeketa Community College, Clackamas Community College, Clark College, Clatsop Community College, Mt. Hood Community College, Oregon Coast Community College, and Portland Community College. Each co-admission program allows students to concurrently enroll at both PSU and the community college campus. For more information go to https://www.pdx.edu/admissions/co-admission.

Associate degree transfer
Students who upon admission have completed an Associate of Arts-Oregon Transfer (AAOT) or an Associate of Science Oregon Transfer-Business (ASOT-B) or an Associate of Science Oregon Transfer - Computer Science (ASOT-CS) degree at an accredited Oregon community college or another PSU-approved associate degree, have met all lower-division general education requirements, which includes freshman and sophomore University Studies requirements. The student must still fulfill any outstanding upper-division general education requirements. The transfer Associates may not satisfy all requirements for admission to professional schools. Please check with each school for specific admission requirements.

Oregon Transfer Compass Programs
Core Transfer Map (CTM)
Transfer students who present an earned CTM from an Oregon community college will be granted a minimum of 30 quarter credits applied to PSU general education requirements.

Major Transfer Map (MTM)
Major Transfer Maps (MTMs) are statewide agreements that create streamlined and guaranteed paths for students transferring from an Oregon community college to an Oregon university, based on the chosen major field. MTMs specify clear course-taking paths necessary for on-track progress towards a specific major/bachelor’s degree. MTMs build on the 30-credit general education foundation defined by the generic Core Transfer Map (CTM), although MTMs may specify particular relevant/required General Education courses as part of the 30-credit CTM component of the MTM. The individual MTMs identify the optimal and specific set of community college courses students need to take to transfer efficiently into the major at the university.

The successful completion of an MTM program that PSU participates in allows students to receive status at PSU, based on the number of academic credits referenced in the MTM agreement, including at least 30 credits of general education satisfied, that is comparable to the status of students with the same number of academic credits in the major course of study who began their postsecondary studies at PSU. The students will not be required to retake a course, as long as the minimum required grades have been earned. Students must have earned a cumulative grade point average of 2.0 and meet the residency requirements at the community college awarding the MTM.

When students complete an MTM, the general education courses in the “Core Transfer Map” portion of the MTM, for which minimum required grades have been earned, are guaranteed to transfer into general education, degree, or major requirements for a bachelor’s degree.

Students who want to transfer prior to completing the MTM should talk with their community college advisor and an advisor at PSU prior to transfer about how their courses will count towards general education requirements and degree/major requirements. If the MTM is not awarded advisors can guide students to determine if they are eligible for a CTM. Students are responsible for informing the admissions counselor or intake advisors at PSU that they are completing an MTM. It is important for students to understand that completing the MTM in two years and the bachelor’s degree in four years requires them to complete a minimum average of 15 credits per quarter (or 45 credits per year).

Oregon Transfer Module (OTM)
Transfer students who present an earned OTM from another Oregon institution will be granted a minimum of 45 quarter credit hours toward their general education graduation requirements.

Vocational and Career-Technical credits
Portland State University grants up to 12 credits for courses which are deemed vocational-career technical. These credits are transferred to PSU as general elective credits.

Correspondence credit
A maximum of 60 correspondence credits are acceptable in transfer from regionally accredited schools recognized as institutions of higher education.

Community and junior colleges
The number of lower-division credits to be accepted in transfer from regionally accredited community and junior colleges is limited to 124.
College courses completed before high school graduation

College courses taken before a high school diploma is received are accepted in transfer provided the student receives grades of D- or above in the courses and the grades are posted on a college transcript.

Health Science Professions

Students who have completed preprofessional programs at PSU may transfer up to 48 credits of their professional health science work from schools accredited by a regional association and/or as indicated in Transfer Credit Practices. The health science students may not receive a bachelor’s degree from PSU and from the professional school when both degrees are based essentially on the same credits completed by the student. The residence credit requirement is satisfied by completing 45 of the last 60 credits at PSU, after admission to PSU and prior to formal enrollment in the qualifying professional program. The student must be within 48 credits of receiving a bachelor’s degree from PSU at the time of matriculation into the professional program.
Graduate School

Rossitza B. Wooster
Dean of the Graduate School
184 Parkmill (1633 SW Park Avenue)
503-725-8410
pdx.edu/gradschool

Portland State University graduate programs offer a variety of opportunities for advanced study and research, including preparation for academic or professional careers, continuation and improvement of skills for in-service professionals, personal intellectual enrichment, and professional development. More than 5,000 graduate students are enrolled in the University’s colleges and schools, and over 1,900 graduate degrees are awarded annually in the more than 80 master’s and the 21 doctoral programs.

The Graduate School oversees the University’s graduate programs in the interest of ensuring quality instruction and research and promoting the highest achievement of graduate students. It is the principal resource concerning graduate admission policies and procedures, advanced degree requirements, degree status, petition procedures, thesis or dissertation preparation, and final oral examinations.

All matters of graduate study are subject to the policies and procedures established by the Faculty Senate upon recommendation of the Graduate Council. The Graduate Council develops and recommends University policies and regulations for graduate studies, recommends standards for graduate courses and programs, and adjudicates petitions regarding graduate policies. The Dean of the Graduate School is responsible for conducting the affairs of the Graduate School and for certifying candidates who have fulfilled the requirements for advanced degrees.

Student responsibility

The student is responsible for knowing all regulations and procedures required by the University and the graduate program being pursued. In no case will a regulation be waived or an exception granted because of ignorance of the regulation or of the assertion that the student was not informed by the adviser or other authority. The student should be familiar with information published in the Portland State University Bulletin, including the section on the Graduate School and the section listing the requirements for the degree and the offerings and requirements of the major department. The department chair appoints a faculty adviser for each graduate student to assist in developing the course of study, determining deficiencies, planning the program, and clarifying special regulations. Departments can be expected to have additional degree requirements beyond those listed in the Bulletin.

A graduate student may petition the Graduate Council for the waiver of a University graduate academic regulation or degree requirement. The petition process is an option in unusual cases with extenuating circumstances. A petition is not a remedy for poor advising on the part of an academic unit or poor planning by the student. The responsibility of initiating the petition rests with the student. Petition forms are available from the Graduate School. The decision of the Graduate Council is final.

The University reserves the right to require the withdrawal of any student who fails to accept responsibilities, as evidenced by conduct or scholastic achievement.

Admissions requirements

Graduate admission requirements

Graduate admission is selective and meeting minimum requirements does not guarantee admission. The number of students admitted to a particular program is limited to the resources and space available in each program. All applicants for a graduate degree or certificate program must meet minimum University admission requirements as well as departmental requirements.

University admission requirements include:

- A bachelor’s degree from a regionally accredited institution
- Minimum GPA. To be considered for Regular admission, applicants must have a minimum cumulative undergraduate GPA of 2.75 or the equivalent (on the U.S. 4.0 scale) from the degree granting institution(s). Applicants who have earned 9 or more letter-graded graduate credits must have a minimum graduate GPA of 3.0 or the equivalent; this graduate GPA supersedes the undergraduate GPA. Applicants who have a cumulative undergraduate GPA between 2.5 and 2.74 or the equivalent from the degree granting institution(s) are eligible for University Conditional status. After completing 9 letter-graded graduate credits at PSU with a GPA of 3.0 or higher, students with University Conditional status will automatically be given Regular status.
- Copies of transcripts from all colleges and/or universities attended (except PSU), including junior colleges and community colleges
- $65 application fee + $2 processing fee
- Recommendation for admission from the appropriate graduate program’s department

University enrollment requirements include:
- Verification of official transcripts from degree granting institution(s) and all colleges and/or universities attended where any graduate credits were completed
- Proof of English language proficiency as demonstrated by:
  - Completion of a bachelor's degree, master's degree, or doctoral degree in the U.S., Australia, English-speaking Canada, Ireland, New Zealand, or the U.K., or;
  - Completion of Portland State's Intensive English Language Program (IELP) with a 3.50 GPA in all courses and recommendation from the IELP, or;
  - Completion of one of the following exams:
    - International Test of English as a Foreign Language (TOEFL), minimum overall score of 80; minimum subscores of 18 in reading and writing
    - International English Testing Systems (IELTS) exam, minimum overall score of 6.5; minimum subscores of 6.5 in reading and writing
    - Pearson Test of English Academic (PTE), minimum score of 60 overall
    - Duolingo English Test (DET), minimum score of 110
  - Tests more than two years old are accepted if the score exceeds the minimum requirement and the applicant has maintained continuous residency in the United States since the exam date

In cases when a student does not meet University admission requirements, departments may choose to submit a Graduate Admission - Special Approval Request to the Graduate School. This process may only be initiated by a department.

International applicants must also submit:
- Copies of official degree certificates/diplomas
- Certified translation of transcripts and degree certificates/diplomas
- Financial documentation demonstrating adequate financial support for at least the first year of study

Depending on the individual graduate program, additional departmental requirements may include:
- Personal essay or statement of purpose
- Letters of recommendation
- Standardized test scores, e.g. GRE or GMAT
- Resume
- Writing samples

- Portfolio
  Information regarding departmental requirements can only be obtained directly from the specific department.

Three-Year Bridge program
This program is an alternate method of meeting graduate admission requirements. It is designed for international students coming from non-Bologna-compliant three-year baccalaureate degree programs recognized by the Ministries of Education in their home countries. This program comprises approximately one year of academic study intended to bridge the differences between the applicant’s degree and a four-year U.S. baccalaureate degree. Students are invited to participate in this program only if they have been recommended for admission by their departments.

1. Students graduating from international educational institutions with thirteen years of pre-collegiate work, 'A-level' passes, and three-year bachelor's degrees are directly admissible to PSU graduate programs if they meet all other university requirements.

2. As a general principle, students with twelve years of pre-collegiate education and three-year bachelor's degrees are admissible to graduate programs at PSU only if they complete one additional year of acceptable coursework.
   a. When additional coursework is required for admission to graduate study, specific courses must be approved by the Graduate School, in consultation with appropriate program/college officials.
   b. Coursework is a year's duration and totals 30–42 credit hours, with 16 graduate credits that can be applied towards a graduate degree.

3. ‘Special Action’ exceptions of Graduate School Conditional Admission could waive the additional year of additional work describe in #2. Requests will be considered on the basis of acceptable evidence that the applicant is judged by appropriate campus authority to possess sufficient academic, professional and other potential pertinent to the applicant's educational objectives to merit such action. ‘Special Action’ exceptions require submission of additional information. Examples of additional information needed to support the request for Special Action admission are:
   a. Test score results (GRE general and/or specialty tests; GMAT; departmental placement examinations)
   b. Completion of one year of college-level work at a regionally accredited U.S. university in a field related to the field of application
   c. Department faculty evaluation of a portfolio of the student's work in the field (e.g., published articles,
research, creative work, relevant awards, professional licensure)

d. Department faculty evaluation of coursework taken at the international university (review of syllabi, reading lists, prerequisite preparation, recommendations) and of English communication skills

e. Commitment of individual faculty members who will act as advisors to the student.

4. All special approval admissions requests under either #2 or #3 above must be initiated by the department and processed through the Graduate School’s admissions system. Requests should include support for why special consideration should be considered.

5. When additional coursework is required for admission to graduate study, specific courses must be approved by the Graduate School, in consultation with appropriate program/college officials. Coursework is a year’s duration and totals 30–42 credit hours, with 16 of these credits countable towards the graduate program.

6. Admission to Portland State University to complete graduate admission preparation (#2) or with a ‘Special Action’ exemption (#3) does not confer ‘baccalaureate possession’ rights or privileges acceptable either for the seeking of an American teaching credential or for transfer to graduate programs at other U.S. higher education institutions. Moreover, students so admitted will not be eligible to earn a baccalaureate degree at the University.

Admission statuses

All admitted graduate certificate and degree students will be assigned one of the following admission statuses:

Regular status

To be considered for Regular status, applicants must have a minimum cumulative undergraduate GPA of 2.75 or the equivalent (on the U.S. 4.0 scale) from the degree granting institution(s). Applicants who have earned 9 or more letter-graded graduate credits must have a minimum graduate GPA of 3.0 or the equivalent; this graduate GPA supersedes the undergraduate GPA.

University Conditional status

Applicants who have a cumulative undergraduate GPA between 2.5 and 2.74 or the equivalent from the degree granting institution(s) are eligible for University Conditional status. After completing 9 letter-graded graduate credits at PSU with a GPA of 3.0 or higher, students with University Conditional status will automatically be given Regular status. Students with University Conditional status who do not earn a GPA of 3.0 or higher after completing 9 letter-graded graduate credits at PSU will have their admission canceled.

Department Conditional status

Department Conditional status may be imposed on a student who has a deficiency in departmental requirements. These conditions may include GPA requirements or additional coursework and may be more rigorous than University Conditional status or other University standards. Department Conditional status is removed once a department determines the appropriate requirements have been met. Students who do not fulfill the requirements of their Department Conditional status can have their admission canceled by the department.

Both University Conditional and Department Conditional status

Students who have both University Conditional status and Department Conditional status are subject to all of the policies stated above. University Conditional status and Department Conditional status are removed independent of each other, and usually not at the same time.

Postbaccalaureate

Students not currently working toward a degree but who wish to register for more than 8 graduate credits per term may be admitted to postbaccalaureate status. A postbaccalaureate student may find departmental enrollment limitations on many courses.

A postbaccalaureate student wishing to be admitted to a graduate certificate or degree program must apply in the same way as any other applicant, meet the general University requirements, and be recommended for admission by the department. Courses completed in a postbaccalaureate status are not automatically applied toward a graduate degree; each course must be evaluated and recommended by the department and is considered pre-admission credit to which all pre-admission limits and requirements apply. See Pre-admission and transfer credit (p. 46) for additional details.

Enrollment

Validation of admission

Students must register for a minimum of 1 credit during their term of admission; failure to do so will result in cancellation of admission.

Graduate grading system

The following grading scale is employed at the graduate level:

\[
\begin{align*}
A &= 4.00 \\
B- &= 2.67 \\
D+ &= 1.33
\end{align*}
\]
A- = 3.67  C+ = 2.33  D = 1.00
B+ = 3.33  C = 2.00  D- = 0.67
B = 3.00  C- = 1.67  F = 0.00

The grading system at the graduate level is defined as follows:

A—Ex cellent
B—Satisfactory
C—Below graduate standard
D—Failure
F—Failure

The following grades are also used; these marks do not impact the GPA:
P—Pass (B- or better)
NP—No Pass
I—Incomplete
IP—In progress
W—Withdrawal
X—Non-attendance/No basis for grade
M—Missing grade/No grade received
AU—Audit

Responsibility for dropping courses
It is the student’s responsibility to drop courses they do not wish to attend. Non-attendance does not cancel the tuition charges nor prevent the course from appearing on the student’s academic record.

Non-completion of course
A student who has participated in a course but has failed to complete essential work or attend examinations, and who has not communicated with the instructor, will be assigned the appropriate grade based on coursework completed.

Incompletes
Students do not have a right to receive/demand an Incomplete grade. The option of assigning an Incomplete grade is at the discretion of the instructor when the following criteria are met.

Eligibility Criteria

1. **Required satisfactory course completion/participation.** The quality of work is satisfactory, but some essential work remains. In addition, the student must have successfully completed most of the course work at the time the student requests the Incomplete, with a minimum grade up to that point of a B- for a graduate course.

2. **Reasonable justification for the request.** Reasons for assigning the Incomplete must be acceptable to the instructor. A student does not have the right to demand an Incomplete. The circumstances should be unforeseen or beyond the control of the student. The instructor is entitled to request appropriate medical or other documentation to validate the student's request.

3. **Incomplete grade is not a substitute for a poor grade.** The Incomplete grade is not meant to create the opportunity for special or additional work for a student to raise a poor grade, or for the opportunity to take the course over by sitting in on the course in a later term without registering or paying for it.

4. **Written agreement.** A written or electronic agreement will be endorsed by both the instructor and student. The document will specify a) the remaining work to be completed, b) the highest grade which may be awarded upon submission of remaining items, and c) the date which the missing work is due. The latter may not exceed one year from the end of the term of enrollment for the given course. A template Incomplete Contract is available from the Registrar.

5. **Resolving the Incomplete.** Instructors may not encourage students to "sit in" an entire future course in order to resolve the Incomplete grade. If the student needs to retake the entire course, they should be given the grade presently earned, and must formally register for the future class they will be attending. If the missed portion of the course is no longer available, instructors may offer an alternate assignment. Grading weight of the alternate assignment should not exceed the original assignment. Students are fully responsible for monitoring all due dates.

Other Rules:

1. **GPA Calculation.** Incomplete grades are not included when calculating GPA.

2. **Deadline for Completion.** The deadline for completion of an Incomplete is one calendar year. The instructor may set a shorter deadline, which is binding. Any request for a longer deadline must be requested via petition to the Graduate Council.

3. **Failure to make up an Incomplete by the end of one year.** The Incomplete will become part of the student’s permanent academic record for a graduate course.

Drops and withdrawals

Drops/withdrawals from a course must be initiated by the student. It is the student’s responsibility to drop/withdraw properly by the published deadlines dates.

A student may drop with no record on the transcript up to the end of the second week of the term. As a courtesy, students are advised to notify the instructor concerned of the intended or completed drop.
A student may withdraw for any reason before the end of the seventh week. Withdrawing in the third through seventh week will result in a "W" recorded on the transcript.

A student wishing to withdraw after the seventh week must petition the Deadline Appeals Committee. A "W" is recorded if the petition is approved.

Refunds are automatic and are calculated from the date of official drop/withdrawal. The refund is 100% only if the drop occurs within the first week of the term.

The above deadlines refer to fall, winter and spring terms. For deadlines during summer session, consult the Registrar's Academic Calendar.

No Basis for Grade (X grades)

An X grade indicates No Basis for Grade and is used when there is little or no attendance and there is no work/performance upon which to base an academic evaluation. X grades cannot be changed after initial submission, and other grades cannot be changed to an X.

An auditor may also be assigned an X for insufficient attendance.

Missing Grade (M grades)

If an instructor does not award a grade during the open grading window, an M grade (Missing) is automatically assigned. An M grade will change to a grade of X one term after the M was initially assigned. Once converted to an X, the grade cannot be changed.

A graduate student will not be certified for graduation who has any M grades in PSU graduate courses that could potentially be letter graded, even if the courses are not applied to the student's degree.

Audit (AU)

Graduate students may take any course for which they have the prerequisites and which is open to them on the basis of their admission category on an audit (no-credit) basis. The tuition and fees for auditing courses are the same as for taking the courses for credit, but a student’s load (total credit hours) does not include audit enrollments. Audited courses cannot be used to meet any requirement for degrees or certificates, for required registration for graduate assistants, or for scholarship students. Students cannot receive financial aid for audited courses. During the add-drop period, a student registered for a course for audit may change to credit status or vice versa through the official methods; thereafter, the change cannot be made.

Academic record sealed after degree awarded

PSU academic records are sealed thirty days after the conferral of a degree. After this date, no changes can be made to the academic record, such as removal of Incompletes or grade changes, except via petition to the Graduate Council.

Catalog eligibility

To earn a graduate degree, students must meet the degree requirements published in a single, valid PSU Bulletin (catalog). The requirements in a catalog are valid for seven years; for example, the 2021-22 Bulletin can be used through summer 2028 graduation. Students can only use a catalog year during which they were both admitted and enrolled.

At the time a graduate program has a change to their curriculum approved, they may set more restrictive limits about which set of requirements (catalog year) can be used.

Credit distribution and limitations

Courses applied to any graduate certificate or degree program must be at the 500 or 600 level. Courses at the 700 and 800 level are not acceptable in any graduate certificate or degree programs, with the exception of 800-level courses in the master’s degree programs in the College of Education as well as some M.A.T./M.S.T. programs; these programs may allow a maximum of 6 credits at the 800 level. Student teaching credits cannot be applied to a graduate degree or certificate.

Students who take 400/500 courses at the 500 level must complete distinct requirements from those in the 400-level section. With the exception of coursework taken as part of a bachelors+masters program (p. 47) or pre-admission (p. 46) credits taken while still an undergraduate, graduate tuition is charged for all graduate-level coursework.

At the master’s level, a minimum of 12 credits in a 45-credit program must be taken in residence in 500, 500/600, or 600 course level categories. The remainder of the required credits may be 400/500 courses taken at the 500 level.

Limitations are placed on the number of 501, 502, 503, 504, 505, 508, and 509 credits that can be applied to master’s degrees. In a 45-credit program, the limits are as follows: a maximum of 12 credits in 501, 502, and 505 combined; a maximum of 9 credits in 504, 508, and 509 combined; a range of 6 to 9 credits in 503. Courses numbered 60x are included in these limitations.

Repeat of graduate courses

If a graduate course is repeated, the grades awarded both times are included in the GPA. Repeating courses with the sole intent of raising the GPA is not acceptable.

A graduate course cannot be repeated and applied to degree requirements twice unless the course has been approved as repeatable for credit.
If a course offered as a 400/500 level course is taken for credit at the 400 level, the same course cannot be taken again for credit at the 500 level.

**Correspondence credit**

Under no circumstance will credit earned through correspondence study be acceptable toward a graduate degree or certificate.

**Academic load**

Full-time enrollment for graduate students is 9-16 credits. Graduate students must obtain approval for registration in excess of 16 credits (graduate and undergraduate credits combined) via the Overload Approval form. A student registering for 17 to 19 credits must obtain the approval from their department chair or faculty adviser. A student registering for 20 credits or more must obtain the approval of their department chair and the Graduate School. A graduate assistant registering for more than 16 credits must obtain approval from their department chair and the Graduate School.

Computer Science and Electrical & Computer Engineering graduate students have a lower maximum registration limit of 10 credits. These students must obtain approval to register for 11 or more credits via the Overload Approval form.

**Minimum enrollment**

PSU requires that graduate students who are involved in activities requiring faculty time or the use of University facilities register every term (excluding summer), including those engaged in any phase of research, such as collecting or developing data, or when engaged in any aspects of a project, thesis, or dissertation.

After advancement to candidacy, doctoral students must be continuously enrolled for a minimum of 1 graduate credit every term (excluding summer) through the term of graduation.

A minimum of 1 graduate credit of registration is required in any term (including summer) when students are completing a milestone for the degree such as taking any comprehensive or final examination, when holding a thesis/dissertation proposal or defense, and in the term of final thesis/dissertation submission and graduation.

The student’s department can require additional registration in any given term in relation to the amount of time required of faculty or the use of University facilities during the term.

**Residency requirements**

Residency credit is defined as credit taken at PSU after formal admission to a graduate degree program. Residency requirements are intended to ensure that students work in close association with other graduate scholars in the intellectual environment of PSU.

In a master's program, to meet the residency requirement a student must earn a minimum of two-thirds of the credits required for the degree after formal admission to a master's degree program at PSU.

In a doctoral program, the residency requirement can be satisfied in one of the following ways:

- Three terms of full-time enrollment (minimum 9 graduate credits applicable to the degree program each term) during the first two years after admission to the program. This may include one or more summer terms.
- Six terms of part-time enrollment (minimum 1 graduate credit applicable to the degree program each term) during the first two years after admission to the program. This may include one or more summer terms.
- A doctoral student who was enrolled in the same major at PSU, and whose matriculation to the doctoral program immediately follows (within one calendar year) the master's degree program, may fulfill the residency requirement during the period in which the student was enrolled in the master's program.

**Pre-admission and transfer credit**

Courses taken at any institution, including PSU, before the term of formal admission to a PSU graduate degree program are pre-admission credits. Courses taken at any other institution at any time are transfer credits. Transfer credits must be graduate credit taken at a regionally accredited institution and applicable to a graduate degree program without qualification at the originating institution.

A master’s student must earn a minimum of two-thirds of the credits required for the degree after formal admission to the graduate degree program at PSU and must earn a minimum of two-thirds of the credits required for the degree at PSU. Departments may have stricter limitations.

Pre-admission credits taken at PSU and applied to master's degree requirements must be letter-graded B- or higher or graded Pass. Pre-admission or transfer credits taken at another institution and applied to master's degree requirements must be letter-graded B- or higher (Pass or similar grading methods are not acceptable). All pre-admission and transfer credits (whether taken at PSU or elsewhere) and applied to master’s degree requirements must also meet all the following requirements: must not be used for any other degree at any institution (except for dual master’s degrees (p. 48)); must be no older than seven years old at the time the master’s degree is awarded; and must total no more than one-third of the required credits for a master's degree program. Otherwise eligible PSU credits applied toward a completed graduate certificate can be applied toward a subsequent master's degree without counting toward the pre-admission limits. For master’s
degrees, pre-admission credits taken at PSU are requested via a DARS exception submitted to the Graduate School. This request should be made soon after admission to the graduate program. Transfer courses from another regionally accredited institution are requested via the Proposed Transfer Credit form (GO-21M) submitted to the Graduate School. It is strongly suggested that this form be submitted early in the student’s program. (The M.S.W. program has specific transfer credit allowances resulting from accreditation requirements and inter-institutional agreements, but a minimum of 42 credits applied to the M.S.W. must be taken at PSU.)

For graduate certificates, two-thirds of the required credits, or 15 credits minimum, whichever is larger, must be taken at PSU. Individual programs may set higher minimums. Transfer credits for graduate certificates must be letter-graded B- or higher (Pass or similar grading methods are not acceptable) and must be no older than seven years old at the time the graduate certificate is awarded. Transfer credits from other institutions must be approved by the graduate certificate program and the Graduate School using the Proposed Transfer Credit form (GO-21M). Students are encouraged to apply for and be admitted to graduate certificate programs as early as possible.

For doctoral degrees, pre-admission and transfer limits are at the discretion of the doctoral program. Transfer credits are requested via the Proposed Transfer Credit form (GO-21D) submitted to the Graduate School.

Approved graduate transfer courses from other institutions are not entered on PSU transcripts and are not considered in the computation of PSU cumulative graduate GPA. However, transfer courses are included in the approved program of study for all graduate certificate and degree programs and are used to calculate the program GPA, which must be 3.0 or higher in order to graduate.

Pre-admission and transfer credits from international institutions are subject to the same requirements and limitations. Requests for international pre-admission and transfer credits require additional documentation to facilitate verification of eligibility.

**Joint campus courses**

Admitted graduate students at PSU may take graduate courses offered by the University of Oregon or Oregon Health and Science University through the Joint Campus registration process. Joint Campus (JC) registration allows PSU students to have a graduate course from UO or OHSU included in their current term enrollment and tuition assessment at PSU. For additional details, see the Graduate School website. JC courses will be listed on the student’s PSU transcript, however, JC courses are considered transfer credits (p. 46) for which all transfer credit limitations apply. After the course is completed, students will need to submit a GO-21 form to the Graduate School to request that the JC transfer credits be applied to their program of study at PSU.

**Course overlap between degrees and certificates**

In specific circumstances, coursework only (not a project, thesis/dissertation, comprehensive exam, or other culminating activity) can be shared between programs. There are limits on the use of eligible graduate courses between graduate programs.

- A graduate course that has been used to meet the requirements for a bachelor’s degree or any undergraduate program cannot be applied to any graduate program (degree or certificate) unless the courses are a part of a bachelor’s/masters program (p. 47) approved by the University, and the student has been admitted to that program.
- Graduate courses can be applied to two master’s degrees only under the dual master’s degree (p. 48) allowance.
- Graduate courses can be applied to a master’s degree and a doctoral degree provided the master’s degree is awarded prior to or concurrent with the doctoral degree.
- Graduate courses can be applied to a master’s degree and a graduate certificate.
- Graduate courses can be applied to a master’s degree and a post-bacc certificate.
- Graduate courses can be applied to a doctoral degree and a graduate certificate.
- Graduate courses can be applied to two graduate certificates.
- Graduate courses can be applied to more than one doctoral program (at the discretion of both doctoral programs), but the following items must be completed at PSU for each doctoral degree: comprehensive exams, residency, proposal, advancement to candidacy, and dissertation research. Departments can set more restrictive limits.

**Bachelors+masters programs**

Bachelors+masters degree programs allow students to complete a bachelor’s and master’s degree at an accelerated pace. Students with upper-division standing may apply to an approved bachelor’s/masters degree program. The minimum institutional undergraduate GPA for admission to a bachelor’s/masters degree program is 3.00. Beyond the GPA minimum, individual programs will set their own admissions criteria. Students admitted to an approved bachelor’s/masters program can share a maximum of 20 graduate credits between a bachelor’s and master’s degree. Programs may choose to allow fewer shared credits. Shared credits will be
considered pre-admission credits when applied to the
master’s degree.

After admission to a bachelors+masters degree program,
students must maintain an institutional undergraduate GPA
of 3.30 and earn a B or higher in graduate courses taken for
shared credit. Upon completion of the bachelor’s degree,
students who meet those requirements will be guaranteed
admission to the master’s program with shared credits.
Students who do not meet those requirements would need
to apply for admission to the master’s degree program
without the benefits of bachelors+masters shared
coursework.

Dual master’s degrees
A student may work toward the completion of the
requirements for two PSU master’s degrees in
complementary disciplines or toward a master’s degree at
PSU and a partner university when there is a formal
agreement between the two institutions. Dual master’s
degrees allow for sharing of credits between the two
degrees. The credits to be shared between both master’s
degrees cannot exceed one-third of the required credits for
a degree. If the two degrees have different total credit
requirements, the one-third limit is determined by the
smaller total credit requirement. Only coursework can be
shared between two master’s degrees; comprehensive
exam, internship, practicum, project, thesis, or other
culminating activity cannot be shared. Students are limited
to one use of one dual master’s degree allowance at PSU.
Dual degree credits must be approved by the student’s
departments and the Graduate School with a Dual Degree
Form (GO-14).

Leave of absence
An admitted graduate student in good academic standing
may request a leave of absence. A leave of absence
provides a guarantee that the student will be allowed to
return to their graduate program at the agreed-upon time
and exempts the student from the continuous enrollment
requirement (applicable only to advanced doctoral
students). However, a leave of absence does not constitute
a waiver of the time limit for completion of a graduate
program nor the one-year limit for completion of a course.

A leave of absence is granted for a specific time period, up
to a maximum of three terms (excluding summer).
Students may request more than one leave of absence but
all leaves combined cannot exceed six terms. A student with
an approved leave of absence cannot register for any
coursework or engage in any activities that require faculty
time or use of University resources. It is the student’s
responsibility to drop or withdraw from all courses as well
as notify other appropriate offices on campus of their leave
status (Financial Aid, etc.).

A Graduate Leave of Absence Request must be submitted
to the Graduate School no later than the Friday of the
second week of the term for which the leave of absence
should take effect. A leave of absence will not be approved
retroactively.

Re-enrollment
Admitted graduate students who fail to enroll for credits
for three consecutive terms (excluding summer) must
submit a Graduate Re-Enrollment Request to their
department. If this request is supported by their
department, the form is signed and forwarded to the
Graduate School for processing.

Students submitting the Graduate Re-Enrollment Request
who have enrolled in coursework elsewhere since PSU
admission must also submit one sealed, official transcript
to Graduate Admissions from each institution attended
subsequent to PSU graduate admission.

To ensure timely registration, the completed Graduate Re-
Enrollment Request should be received by the Graduate
School no later than three weeks prior to the start of the
term the student wishes to re-enroll.

Per Executive Order 13607, students who are re-enrolling
after an interruption due to military service can re-enroll in
the same program, with the same enrollment status and the
same academic standing, which they had when the military
service began if they wish. The period of military service
and an additional period of up to three years (limited to
five years total), may be excluded from standard
University time limits. Students must notify the Graduate
School that they are returning from military services (and
present appropriate documentation) so that the possible
impact on time limits can be identified.

Cancellation of admission to graduate program
If a student does not validate admission by registering and
paying for at least 1 credit at PSU in the term of admission,
that admission will be canceled unless the student contacts
Graduate Admissions and requests that the admission be
updated to another term within a one-year period. If the
student does not validate admission within a one-year
period, the admission will be canceled and the student
must submit a new application and a new application fee.

A student with validated admission to a graduate certificate
or degree program who during a one-year period (1) does
not have an approved leave of absence and (2) does not
successfully complete a graduate course in the approved
program of study for the degree OR does not make
satisfactory progress toward the degree (as determined by
the department) may have admission to the degree program
canceled. Additionally, a doctoral student who has not
been registered for three years will have admission to the
degree program canceled. For further information, students
are urged to contact individual departments for
departmental policies and practices.
Faculty as student policy

PSU faculty members are encouraged to pursue additional advanced degrees at other institutions. Faculty members above the rank of instructor are not eligible to receive an advanced degree in their own department or school at the University; however, in special circumstances, they may earn a degree in a department or school in which they do not hold an appointment.

Academic Standing

All admitted graduate certificate and degree students at PSU must maintain good academic standing during the course of their graduate program. Good academic standing is defined as maintaining a cumulative graduate GPA of 3.00 or higher in all graduate credits earned at PSU. All graduate students, especially those in a conditional admission status, are expected to keep in close communication with their departments and to avail themselves of departmental advising.

Academic probation

An admitted graduate student is placed on probation if their cumulative graduate GPA at PSU, based on the completion of 9 or more letter-graded graduate credits after admission to the graduate level at PSU, falls below 3.00. While on academic probation a student will not be permitted to graduate, to be admitted to a new or different graduate certificate or degree program, to be advanced to doctoral candidacy, to have a thesis or dissertation committee appointed, to receive or continue to hold a graduate assistantship, or to register for more than a total of 9 credit hours in any term. A student is removed from academic probation if their cumulative graduate GPA is brought up to 3.00 or higher once they have completed the next 9 letter-graded graduate credits after beginning probation status.

Academic disqualification

Disqualification occurs if:

1. A student on academic probation fails to achieve a cumulative graduate GPA of 3.00 or higher once they have completed the next 9 letter-graded graduate credits after beginning probation status; or
2. A student becomes subject to academic probation for a second time.

A student who is disqualified may not register for any graduate courses at PSU.

Readmission after disqualification

Readmission after disqualification is not automatic. A disqualified student may petition for readmission as a student in a graduate certificate or degree program after one calendar year. Readmission after the mandatory one-year period is initiated by the student's filing of a petition for readmission to the Graduate Council through the Graduate School. Such a petition would need to address the circumstances that led to disqualification and provide evidence of preparedness to resume graduate study.

If a student's graduate program recommends readmission, the Graduate Council may grant readmission, with or without additional academic requirements, or may recommend continued disqualification. A readmitted student must raise the cumulative graduate GPA to 3.00 or higher within the first 12 letter-graded credits after readmission or the student will be disqualified.

Graduate courses completed at other institutions while a student is under disqualification at PSU will not be applied toward a graduate program at PSU.

Academic honesty

Graduate students have a primary, unique relationship and responsibility to the faculty of the academic departments, the faculty upon whose recommendations graduate degrees are awarded. A major feature of the graduate student's responsibilities to the faculty is the adherence to academic honesty. Academic honesty is a requirement for all graduate activities and assumes that the student is honest, that all coursework and examinations represent the student's own work, and that all documents supporting the student's admission and graduation are accurate and complete. Any violation of academic honesty may be subject to disciplinary sanction as provided in the PSU Student Conduct Code.

Violations of academic honesty include but are not limited to:

1. Cheating in examinations and course assignments. The willful use or provision to others of unauthorized materials in written or oral examinations or in course assignments.

2. Plagiarism. The appropriation of language, ideas, and products of another author or artist and representation of them as one's own original work; failure to provide proper identification of source data; use of purchased or borrowed papers in graduate courses without complete identification of the source.

3. Selling or offering to sell course assignment materials. Selling or offering to sell material to another person; knowing, or under circumstances having reason to know, that the whole or a substantial part of the material is intended to be submitted in fulfillment of a course requirement.

4. Academic fraud. Furnishing false or incomplete information to the University with the intent to deceive; forging, altering, or misusing University documents or academic forms which serve as the basis for admission, course study, or graduation; misrepresenting a person's identity to an instructor or other University official.
Tuition, fees, and aid

Basic graduate fees
Tuition and fees associated with graduate study at PSU are available from Student Financial Services. The admission application fee is required and is nonrefundable. All newly admitted graduate students are assessed a one-time graduate matriculation fee in their initial term of admission. Graduate tuition and fees assessed each term depend on the total number of credits in enrolled classes, differential tuition, and resident or nonresident status in the state of Oregon.

Financial assistance

Graduate assistantships
The University offers graduate assistantships for teaching, research, and administrative support on a competitive basis for students working toward graduate degrees at PSU. To qualify and to remain eligible for an appointment, a student must be admitted to a graduate degree program, remain in good academic standing, and make satisfactory academic progress towards their degree. Students wishing to apply for graduate assistantships must correspond directly with the appropriate department offering the assistantship.

Scholarships
The Graduate School administers several scholarships and awards through our office, and also provides links to external funding sources.

WICHE
Under the Western Interstate Commission for Higher Education (WICHE) Regional Graduate Program agreement, residents of Alaska, Arizona, California, Colorado, Commonwealth of Northern Mariana Islands (CNMI), Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, South Dakota, Utah, Washington, and Wyoming admitted to specific degree programs are assessed resident tuition. A full list of approved programs is available on the application form. Completed applications are submitted to the Graduate School.

The graduate programs offered by Portland State University are listed below.

Graduate programs

Graduate Certificates
A graduate certificate program is a linked series of approved graduate-level courses which constitute a coherent body of study with a specific defined focus within a discipline. Candidates for a graduate certificate must earn a minimum of 15 credits in approved graduate courses; many programs have higher minimums. A final project or portfolio may be required to provide for integration of the sequence of course materials.

Master of Arts and Master of Science (M.A. and M.S.)
The University offers programs leading to the Master of Arts and the Master of Science. These programs are designed to develop a mastery of subject matter in a chosen discipline and to provide training and experience in research.

Candidates for the Master of Arts and Master of Science degrees must earn a minimum of 45 credits in approved graduate courses; many programs have higher minimums. A thesis may be required, depending on the program. The Master of Arts degree requires a demonstrated proficiency in a second language. Second language proficiency is not required for the Master of Science degree.

Master of Arts in Teaching and Master of Science in Teaching (M.A.T. and M.S.T.)
The Master of Arts in Teaching and Master of Science in Teaching degrees are designed to combine coursework in the major discipline with coursework in education. To this end, the programs are developed and administered within flexible guidelines to match the needs of students with varying backgrounds and professional plans. All M.A.T. degrees require a demonstrated proficiency in a second language. Second language proficiency is not required for the M.S.T. degree.

A minimum of 45 graduate credits is required. The program of study includes the following:
1. At least 24 graduate credits must be devoted to selected courses in academic fields which strengthen the candidate’s scholarship in a teaching field and related area. This minimum may be higher at the department’s discretion.
2. At least 9 credits of courses in education are required.
3. A final written and oral examination is required.

Professional Degrees
PSU offers a variety of degrees which are designed to prepare students for work in professional fields. The programs are designed to develop a mastery of the subject matter in a chosen discipline and to provide practical training and experience in the field. Many professional degrees require more than the minimum 45 credits required for all master's degrees at PSU.

Doctor of Philosophy (Ph.D.)
The Doctor of Philosophy degree is awarded for scholastic achievement based upon the candidate’s proven comprehensive knowledge in a specialized field of study and for creative scholarship through independent research. Judgment of such attainments is based upon the passing of
comprehensive examinations and evaluation of a dissertation grounded in independent research.

**Doctor of Education (Ed.D)**

The Doctor of Education degree is granted in recognition of mastery of theory, practice, and research in education. The Ed.D. in educational leadership program prepares highly qualified professional educators for positions in teaching, supervision, and administration in elementary and secondary education, in community and four-year colleges and universities, and in other educational institutions, both public and private.

**Degree and certificate requirements**

**Graduate certificates**

There are limits on the use of courses in graduate certificate programs that have not been fully approved through the curricular review process (i.e., courses numbered 501/601 through 510/610). A few graduate certificates require an omnibus course (e.g., 506 Project) as a culminating activity for the program. Apart from these required credits, courses numbered 501/601 through 509/609 are typically not allowed in graduate certificate programs. Experimental courses (i.e., courses numbered 510/610) can substitute for electives at the program's discretion, but all core courses must be fully approved.

All graduate certificates are approved with a minimum number of required credits. These minimum credit totals cannot be waived even if the approved program of study exceeds the University minimum of 15 credits for a graduate certificate.

Graduate certificate students must have a minimum 3.00 GPA on all courses applied to the program of study, as well as a minimum 3.00 GPA in all graduate-level courses taken at PSU, in order to graduate. Departments may establish a more rigorous standard. Although grades of C+, C, and C- are below the graduate standard, they may be counted as credit toward a graduate certificate with the specific written approval of the program. Grades of D or F indicate clearly unacceptable work and cannot be applied to graduate certificate requirements. Audited courses cannot be used to meet any requirement for graduate certificates.

Courses completed up to seven years prior to the certificate award date may be used to satisfy graduate certificate requirements (e.g., a course started in the fall term of 2014 will be beyond the seven-year limitation at the close of fall term 2021).

For graduate certificates, transfer credit is defined as any eligible letter-graded (B- or higher) graduate course taken at another regionally accredited institution. Two-thirds of the credits required for a graduate certificate, or 15 credits minimum, whichever is larger, must be taken at PSU.

Individual programs may set higher minimums. See the section on Course overlap between degrees and certificates (p. 47) for use of coursework in certificate programs.

Students must apply for graduation by the first Friday of the anticipated term of graduation; see the Graduate Candidate Deadlines for specific due dates. There is a required $30 fee per application as well as a $2 service charge. As a one-time courtesy, students who do not complete certificate requirements can have their application for graduation carried forward to a future term (typically the next term, but it could be at maximum up to one year in advance). To request that an application for graduation be carried, students must contact the Graduate School in writing and provide an explanation for the graduation delay. If students do not graduate a second time, the application for graduation will be dropped; they will then need to reapply for graduation by the appropriate deadline (and will be assessed a new application fee).

**Master’s degrees**

**Second language requirement**

The second language requirement for M.A. and M.A.T. students must be met before any final exam is taken or final graduation paperwork can be approved.

The Department of World Languages and Literatures has determined that the second language requirement for M.A. and M.A.T. students can be met in the following ways:

1. Equivalent coursework: Students who have passed a course equivalent to PSU level 203 or higher in a second language will be deemed to have met the language requirement. The Graduate School will certify completion upon evaluation of the student’s academic record if the requirement was completed at PSU. If the requirement was completed at a different institution, the Department of World Languages and Literatures will issue a certificate of completion. M.A. and M.A.T. students are responsible for making their academic records available in the first term of admission and requesting evaluation and certification.

2. Students who do not meet the requirement under 1. above should make an appointment with the Department of World Languages and Literatures during the first term after their admission to make an individualized plan for the completion of their language requirement. Options include preparing for and passing one of these evaluations:
   a. Oral proficiency interview
   b. A written test such as
      i. The Graduate Student Foreign Language Test
      ii. The CLEP exam
      iii. A special exam, administered by the Department of World Languages and Literatures
c. Coursework after admission: taking a course at level 203 or above in residence or abroad
d. Special reading courses, if available.

The Department of World Languages and Literatures will teach and test only in languages in which it has expertise. However, off-campus arrangements may be possible with the cooperation of other institutions and the approval of the chair of the Department of World Languages and Literatures. Certification of having passed a second language examination from an institution other than PSU must be approved by the Department Chair of World Languages and Literatures.

A student whose native language is not English may meet the second language requirement in English, except for students in the M.A. in World Languages and Literatures, who are required to demonstrate fluency in two foreign languages other than English at the time of admission and are not required to demonstrate additional competency except as necessary to complete their degree requirements.

Coursework and program of study

In the first year a student should prepare a proposed program of study in consultation with the faculty adviser. The purpose of the planned program of study is to present an organized, individualized plan for coursework, practica, and research activities consistent with the requirements for the proposed degree and approved by the faculty adviser.

If PSU pre-admission credits are to be included on the program of study, the department must submit a DARS exception to the Graduate School. If transfer credits (courses taken at any time from another regionally accredited institution) are to be included on the program of study, the Proposed Transfer Credit form (GO-21M) must be submitted to the Graduate School for approval. See Pre-admission and transfer credit (p. 46) for detailed information.

All master's degrees are approved with a minimum number of required credits. These minimum credit totals cannot be waived even if the approved program of study exceeds the University minimum of 45 credits for a master's degree.

A student must have a minimum 3.00 GPA on the courses applied to the program of study, as well as a minimum 3.00 GPA in all graduate-level courses taken at PSU, in order to graduate. Departments may establish a more rigorous standard. Although grades of C+, C, and C- are below the graduate standard, they may be counted as credit toward a master's degree with the specific written approval of the department if taken at PSU after the term of formal admission to the graduate program. Grades of D or F indicate clearly unacceptable work and cannot be applied to graduate degree requirements. Audited courses cannot be used to meet any requirement for master’s degrees.

A grade of IP (In Progress) may be used for 501 Research and for 506 Project when a student is progressing in an acceptable manner toward completion of the work; final grades for 501 and 506 credits are submitted by the instructor via an online grade change. An IP grade must be used for 503 Thesis when a student is progressing in an acceptable manner; final grades for 503 credits are assigned by the instructor on the Recommendation for the Degree form (GO-17M) and posted to the student’s transcript after approval of the thesis and certification for graduation by the Graduate School.

All coursework applied to the master's degree program must be completed within the seven years prior to the awarding of the degree (e.g., a course started in the fall term of 2014 will be beyond the seven-year limitation at the close of fall term 2021).

Degree application

Students must apply for graduation by the first Friday of the anticipated term of graduation; see the Graduate Candidate Deadlines for specific due dates. There is a required $30 fee per application as well as a $2 service charge.

As a one-time courtesy, students who do not complete degree requirements can have their application for graduation carried forward to a future term (typically the next term, but it could be at maximum up to one year in advance). To request that an application for graduation be carried, students must contact the Graduate School in writing and provide an explanation for the graduation delay. If students do not graduate a second time, the application for graduation will be dropped; they will then need to reapply for graduation by the appropriate deadline (and will be assessed a new application fee).

Validation of out-of-date graduate credit

A PSU course more than seven years old at the time of graduation, but no more than ten years old at the time of graduation, may be used toward master’s degree requirements after a successful validation exam (for example, a course taken in fall 2011 may be validated for a graduation term no later than fall 2021). A separate validation examination must be given for each course, in accordance with the full requirements listed on the GO-15 form. Departments are expected to limit validation examinations to those courses that are current and relevant in the discipline and meet the current requirements of the master’s degree program. Validated courses are limited to one third of the program requirements (e.g., 15 credits total in a 45-credit program). Each examination attempted, regardless of result, has a fee of $50.00, which will be credited to the department giving the exam. Payment must be arranged in advance of the exam through the Graduate School and Cashiers.

In very unusual cases, with the specific agreement of both the student’s department and the department most equivalent to the original course department, a student may validate a graduate course from another regionally
accredited institution, in accordance with the full requirements listed on the GO-15 form.

**Human Research Protection Program**

All research involving human subjects conducted by faculty, staff, or students in any program at PSU must have Human Research Protection Program (HRPP) approval. This policy applies to all research under the auspices of the University, including surveys and questionnaires, whether supported by grant, contract, gift, University, or personal funds. The student should allow a minimum of six weeks for the approval process. A student cannot have a thesis committee appointed until HRPP approval is granted.

**Final examination**

If a final examination is required by the student’s department, it must be taken after successful completion of any required second language examination and after at least 30 credits have been completed. The examination is not a re-examination over coursework but rather a test of the candidate’s ability to integrate material in the major and related fields, including the work in any thesis or research project. A minimum of 1 graduate credit of registration is required when taking any final oral or written examination.

**Oral examinations**

In the case of a non-thesis oral examination, the committee must consist of at least two members of the student’s department, including the student’s adviser. At the discretion of the department, a faculty member from another department may be added. For M.A.T. and M.S.T. students, one additional member of the committee is required to be a faculty member from the College of Education or a faculty member with pedagogical expertise in the student’s discipline.

Non-thesis final oral examinations (including final project presentations) can only be held during regular academic terms, i.e., not between terms. Examinations must be scheduled and completed by the Friday of finals week for graduation in that term. For summer term graduation, the deadline applies to the regular eight-week summer session dates, i.e., exams must be scheduled and completed by the Friday of the eighth week of summer term.

If the student fails the entire examination or any section thereof, the department may dismiss the student from the master’s degree program or permit the student to repeat the entire examination, or the section that was failed, after a minimum of three months. The results of the second examination are final.

**Thesis**

The presentation of a thesis as partial fulfillment of the requirements for the master’s degree is required in certain departments and is an option in others. Each school, college, and department defines the nature of research and scholarship accepted for a thesis, but in all cases a high level of resourcefulness, productivity, and mature perception of the discipline is expected. The quality of the culminating work must meet University standards and reflect those of other leading universities. Although the thesis is not required to show original results, it must reveal independent investigation, including the knowledge and application of the accepted methods of scholarship and research methodology. The thesis represents the independent work of the student and must be developed under the direction of the thesis adviser.

The thesis committee must be approved by the Graduate School using the GO-16M form in advance of the thesis defense. The committee must consist of at least three and not more than five faculty members. The chair of the thesis committee must be regular, full-time PSU instructional faculty, tenured or tenure track, assistant professor or higher in rank; the other committee members may be non-tenure track or adjunct faculty. Two of the committee members (the committee chair and one other member) must be from the student’s department; the third member may be from the student’s department or may be PSU faculty from another department or OHSU faculty. If it is necessary to go off campus for one additional committee member with specific expertise not available among PSU faculty, a CV for that proposed member must be presented with the GO-16M form; that member must be in addition to the required three PSU faculty members. All committee members must have master’s degrees or higher.

Students must be registered for at least 1 graduate credit in every term in which they are working on any phase of their thesis, including data development or collection, writing, revision, defense, and finalization through approval by the Graduate School. Students must register for at least 6 to 9 credits of 503 Thesis in their department. (Since students must be continuously enrolled while working on the thesis, they frequently accumulate more than 9 credits of 503 Thesis. However, a maximum of 9 credit of 503 Thesis may be applied to the program of study.) IP (In Progress)
is the interim grade reported until the thesis is defended and approved by the student’s thesis committee. Final grades for thesis credits are not recorded until the thesis has been approved by the Graduate School.

A thesis defense may be scheduled only during the regular academic term, no later than five weeks prior to the close of the term of application for graduation in which the degree will be granted (i.e., must be completed four weeks before the beginning of finals week). For summer term graduation, deadlines apply to the regular eight-week summer session dates. Later completion will result in graduation in a subsequent term. The student must deliver a final draft of the thesis to all members of the approved committee no fewer than 14 days before the thesis defense.

A thesis defense must take place in a meeting with the student and the entire, appointed committee. While it is expected that all members should be physically present, remote participation is permitted under specific conditions. The student’s oral presentation should not exceed 60 minutes. The thesis defense is open to the University faculty and may be open to the public at the department’s discretion. Passing of the thesis defense requires a majority approval. If the student fails the thesis defense, the department may dismiss the student from the master’s program or permit the student to hold a second defense after a minimum of three months. The results of the second defense are final.

The final thesis must be submitted to the Graduate School not later than three weeks prior to the close of the term of application for graduation. See the Graduate Candidate Deadlines for specific dates. For details about thesis formatting and submission, see the Thesis and Dissertation Information available from the Graduate School.

Doctoral degrees

Preliminary examination

Early in the doctoral program the student may be required to take preliminary examinations. The scope and content of the examination, and the standard of performance, is determined by the doctoral program.

Advisory committee

An advisory committee for the doctoral degree student should consist of at least three faculty members representative of the student’s field of study. When a student enters the doctoral program, a faculty adviser will be designated by the program director to advise the student and to meet in regular consultation concerning the program of study and research. The additional members of the advisory committee will be appointed after successful completion of 9 credits and not later than six months prior to the completion of the comprehensive examinations.

Language requirement

For the Ph.D. degree, the student may be required to demonstrate competency in at least one second language. This requirement is determined by the governing unit of the student’s program, department, or school. Any second language requirement must be completed before the comprehensive examinations.

Residency requirement

Residency for a doctoral degree program can be satisfied in one of the following ways:

- Three terms of full-time enrollment (minimum 9 graduate credits applicable to the degree program each term) during the first two years after admission to the program. This may include one or more summer terms.
- Six terms of part-time enrollment (minimum 1 graduate credit applicable to the degree program each term) during the first two years after admission to the program. This may include one or more summer terms.
- A doctoral student who was enrolled in the same major at PSU, and whose matriculation to the doctoral program immediately follows (within one calendar year the master's degree program, may fulfill the residency requirement during the period in which the student was enrolled in the master's program.

Coursework and doctoral program of study

The doctoral program of study includes coursework, research, internships, and/or seminar credits according to the requirements of the individual doctoral program. A minimum 27 credits of 603 Dissertation is required for all Ph.D. students; a minimum of 18 credits of 603 Dissertation is required for all Ed.D. students. A minimum of three academic years of graduate study beyond the bachelor’s degree (equivalent to 81 quarter credits minimum) is required for all doctoral degrees.

All doctoral degrees are approved with a minimum number of required credits. These minimum credit totals cannot be waived even if the approved program of study exceeds the University minimum of 81 credits for a doctoral degree.

For doctoral degrees, pre-admission and transfer limits are at the discretion of the individual doctoral programs. Transfer credits are approved via a GO-21D form submitted to the Graduate School. See Pre-admission and transfer credit (p. 46) for detailed information. While potentially all coursework for the degree can be transferred from another institution, the following items must be completed at PSU: comprehensive exams, residency, proposal, advancement to candidacy, and dissertation research.

A student must have a minimum 3.00 GPA on the courses applied to the program of study, as well as a minimum 3.00 GPA in all graduate-level courses taken at PSU, in order to graduate. Doctoral programs may establish a more rigorous standard. Although grades of C+, C, and C- are below the
graduate standard, they may be counted as credit toward a doctoral degree with the specific written approval of the doctoral program. Grades of D or F indicate clearly unacceptable work and cannot be applied to graduate degree requirements. Audited courses cannot be used to meet any requirement for doctoral degrees.

A grade of IP (In Progress) may be used for 601 Research and for 606 Project when a student is progressing in an acceptable manner toward completion of the work; final grades for 601 and 606 credits are assigned by the instructor via an online grade change. An IP grade must be used for 603 Dissertation when a student is progressing in an acceptable manner; final grades for 603 Dissertation credits are assigned by the instructor on the Recommendation for the Degree form (GO-17D) and posted to the student’s transcript after approval of the dissertation and certification for graduation by the Graduate School.

All coursework on the program of study, with the possible exception of seminar and internships, must be completed before a student can be advanced to doctoral candidacy. All coursework on the program of study must be satisfactorily completed before graduation.

For students entering a doctoral program with a master’s degree, a maximum of five years will be allowed from admission to completion of all required comprehensive examinations. For students entering with a bachelor’s degree, a maximum of two additional years will be added to this limit, for a maximum of seven years from admission to completion of all comprehensive examinations. Failure to meet this time limit will result in cancellation of admission to the doctoral program.

Comprehensive examination

Before advancement to candidacy and not less than one academic year before all requirements for the doctoral degree are expected to be completed, the student must pass a series of comprehensive examinations in the field of specialization. The examinations may be written, oral, or both. The comprehensive examinations may not be taken until the language requirement, if any, and substantially all the coursework for the degree have been completed.

Students must be registered for a minimum of 1 graduate credit during the term comprehensive exams are taken. Comprehensive exams are scheduled and administered in accordance with the established rules of the program, which must be made publicly available to students via the program’s website or doctoral student handbook.

Comprehensive exams can only be offered during regular academic terms, i.e., not between terms. The doctoral program must notify the Graduate School the student has passed comprehensive exams by submitting the GO-22 form.

If the student fails the entire comprehensive exam or any section thereof, the doctoral program may dismiss the student from the degree program or permit the student to repeat the entire examination, or the section that was failed, after a minimum of three months. The results of the second examination are final.

A maximum of three years will be allowed from the completion of comprehensive examinations to advancement to candidacy. Failure to meet this time limit will result in cancellation of admission to the doctoral program.

Dissertation proposal

After passing the comprehensive examination and identifying a dissertation topic, a dissertation committee is appointed and the student must pass a proposal defense. The dissertation committee will take the place of the advisory committee and the faculty advisor is superseded by the dissertation adviser. The dissertation committee must be approved by the Graduate School using the Appointment of Doctoral Dissertation Committee form (GO-16D).

The dissertation committee must consist of four to six PSU faculty members: the dissertation adviser and a minimum of three and a maximum of five regular members. The chair of the dissertation committee must be regular, full-time PSU instructional faculty, tenured or tenure track, assistant professor or higher in rank; the other three to five committee members may include non-tenure track or adjunct faculty and/or members of the OHSU faculty. If it is necessary to go off-campus for one committee member with specific expertise not available among PSU faculty, a curriculum vitae (CV) for that proposed member must be presented with the GO-16D form. This off-campus member may substitute for one of the three to five regular committee members. All committee members must have doctoral degrees. At the discretion of the program, the designation of co-chair can be requested on the GO-16D form for one regular member of the committee. The designation of co-chair recognizes the significant academic advising role of the committee member, but oversight of the process and procedures and all administrative responsibilities remains with the chair.

No proposal defense shall be valid without a dissertation committee approved by the Graduate School. The GO-16D form should be submitted to the Graduate School a minimum of six weeks in advance of the estimated date of the dissertation proposal meeting. The student must deliver a draft of the dissertation proposal to all members of the approved committee no fewer than 14 days before the proposal defense.

A dissertation proposal must take place in a meeting with the student and the entire, appointed committee. While it is expected that all members should be physically present, remote participation is permitted under specific conditions. The student will make an oral presentation of the written proposal for discussion, evaluation, and suggested
modification. The final proposal submitted to the committee for approval should be sufficiently detailed and clear to provide a blueprint for the study to follow. The proposal is expected to include the following:

1. General nature and present status of knowledge of the problem.
2. The theoretical and empirical framework within which the proposed problem exists.
3. The significance of the proposed research and its likely contributions.
4. The research methodology to be used.

The doctoral program recommends the student for advancement to candidacy once the dissertation proposal has been approved.

**Human Research Protection Program**

All research involving human subjects conducted by faculty, staff or students in any program at PSU must have Human Research Protection Program (HRPP) approval. This policy applies to all research under the auspices of the University, including surveys and questionnaires, whether supported by grant, contract, gift, University, or personal funds. After proposal approval, the student must submit a HRPP application to the Office of Research Integrity if human subjects are involved in the research in any way. A student cannot be advanced to candidacy until HRPP approval is granted. The student should allow a minimum of six weeks for the approval process.

**Advancement to Candidacy**

A student is advanced to candidacy after successful defense of the dissertation proposal and with the recommendation of the doctoral program, after verification of the student’s program of study, and after HRPP approval has been granted (if applicable). The doctoral program must request advancement to candidacy by submitting the GO-23 form to the Graduate School. The Dean of the Graduate School retains final approval authority for advancement to candidacy.

A doctoral candidate has a minimum of four months and a maximum of five years from the effective date of advancement to candidacy to complete all requirements for graduation, including defense of the dissertation and its final approval by the Graduate School (doctoral programs may have stricter requirements). Candidates must be continuously enrolled during that period. Failure to meet this time limit will result in cancellation of admission to the doctoral program.

**Dissertation preparation**

With guidance of the dissertation committee, the candidate presents a dissertation setting forth the results of original and independent investigation. The dissertation must constitute a contribution to knowledge, significantly enlarging, modifying, or reinterpreting what was previously known. Until the degree is granted, the student enrolls for the number of graduate credits appropriate to the amount of University services utilized, as determined by the dissertation adviser, with a minimum of 1 graduate credit each term. Ph.D. students must register for a minimum of 27 credits of 603 Dissertation before graduation; Ed.D. students must register for a minimum of 18 credits of 603 Dissertation before graduation. Continuous enrollment of a minimum 1 graduate credit is required through the term a student graduates, even if this results in more than 27 (18) credits of 603 Dissertation at the time of graduation. Ph.D. and Ed.D. students should only register for 603 Dissertation credits after advancement to candidacy.

**Degree application**

Students must apply for graduation by the first Friday of the anticipated term of graduation; see the Graduate Candidate Deadlines for specific due dates. There is a required $30 fee per application as well as a $2 service charge.

As a one-time courtesy, students who do not complete degree requirements can have their application for graduation carried forward to a future term (typically the next term, but it could be at maximum up to one year in advance). To request that an application for graduation be carried, students must contact the Graduate School in writing and provide an explanation for the graduation delay. If students do not graduate a second time, the application for graduation will be dropped; they will then need to reapply for graduation by the appropriate deadline (and will be assessed a new fee).

**Dissertation defense**

After preparation of the written dissertation, the candidate’s dissertation committee will conduct a dissertation defense. A dissertation defense may be scheduled only during the regular academic terms, no later than five weeks prior to the close of the term of application for graduation in which the degree will be granted (i.e., must be completed four weeks before the beginning of finals week). For summer term graduation, deadlines apply to the regular eight-week summer session dates. Later completion will result in graduation in a subsequent term. The student must deliver a final draft of the dissertation to all members of the approved committee no fewer than 14 days before the dissertation defense.

The dissertation defense, which is open to the public, is the culminating experience in the doctoral studies. The candidate is expected to prepare an oral presentation on the research methodology and results. The oral presentation, the candidate must present the dissertation as a worthy contribution to knowledge in its field and must demonstrate a mastery of the field of specialization as it is
related to the dissertation. The questioning and discussion are for the purpose of: (1) further enlightenment of the candidate and the committee of the significance and limitations of the research, and (2) demonstration that the candidate has met the high expectations of the University for the awarding of the doctoral degree.

A dissertation defense must take place in a meeting with the student and the entire, appointed committee. While it is expected that all members should be physically present, remote participation is permitted under specific conditions. For dissertation approval, there may be no more than one dissenting vote on the dissertation defense. If the student fails the dissertation defense, the doctoral program may dismiss the student from the program or permit the student to hold a second defense after a minimum of three months. The results of the second defense are final.

The final dissertation must be submitted to the Graduate School not later than three weeks prior to the close of the term of application for graduation. See the Graduate Candidate Deadlines for specific dates. For details about thesis formatting and submission, see the Thesis and Dissertation Information available from the Graduate School.

**Time limitations**

For students entering a doctoral program with a master’s degree, a maximum of five years will be allowed from admission to completion of all required comprehensive examinations. For students entering with a bachelor’s degree, a maximum of two additional years will be added to this limit, for a maximum of seven years from admission to completion of all comprehensive examinations. Doctoral programs may have stricter requirements. Failure to meet this time limit will result in cancellation of admission to the doctoral program.

A maximum of three years will be allowed from the completion of comprehensive examinations to advancement to candidacy. Doctoral programs may have stricter requirements. Failure to meet this time limit will result in cancellation of admission to the doctoral program.

A doctoral candidate has a minimum of four months and a maximum of five years from the effective date of advancement to candidacy to complete all requirements for graduation, including defense of the dissertation and its final approval by the Graduate School. Doctoral programs may have stricter requirements. Candidates must be continuously enrolled during that period. Failure to meet this time limit will result in cancellation of admission to the doctoral program.
A to Z List of Student Services

Advising and Career Services
The Advising & Career Services Division includes academic advising, career, and transfer services at Portland State University.

Undergraduate Advising Resource Center
FMH 360
503-725-3822
www.pdx.edu/advising

Undergraduate Advising Resource Center serves as the hub for the Advising and Career Services Division at Portland State University. Academic advising is organized into seven Advising Pathways which group majors with similar academic and career paths, giving students the best opportunity to stay with the same advisor and pathway, even if they change their major. Students are assigned to an advisor who helps them to understand graduation requirements, create degree plans, and successfully achieve their educational goals. (Please note some Advising Pathways are served in other locations.)

University Career Center
FMH 342
503-725-4613
www.pdx.edu/careers

The University Career Center provides support to all PSU students and alumni in all aspects of their career development including: exploration, preparation and planning, job and internship searching, and making career changes and transitions through individual appointments, drop ins, workshops, classes and extensive online resources. They also maintain the job and internship portal, Handshake, and coordinate several career fairs and employer visits each academic year.

Transfer & Returning Student Resource Center
FMH 342
503-725-2136
www.pdx.edu/transfer-center/

The Transfer and Returning Student Resource Center (TRSRC) helps prospective transfer students, and students returning or enrolling after a break in their education, smoothly transition to PSU. The TRSRC supports transfer and returning student degree completion through early and proactive academic and career advising and provision of assistance with accessing PSU resources and services.

ASPSU Children's Center
Smith Memorial Student Union, First Floor
1825 SW Broadway
503-725-2273

The Children's Center is designed for short hour and full-day care for students, staff and faculty who need 8 or more hours of child care each week. Hours are reserved each term to accommodate family schedule needs. The Center features two spacious classrooms in which children learn through active exploration in an environment with engaging materials and opportunities to connect socially. The Center is open M-Th: 8:00-6:00 and F: 8:00-5:30 serving children ages 6 months to age 9.

Box Office
Box Office
120 Smith Memorial Student Union
Broadway Lobby
503-725-3307
portlandstate.universitytickets.com

The Portland State Box Office is your one-stop shop for event tickets, campus information and locker rentals. We serve as the Information Desk for the university, and sell tickets for university events and external events held at Portland State venues, ranging from commencement ceremonies and Viking Athletics' games to student-organized functions and cultural events. Purchase event tickets online at portlandstate.universitytickets.com or in person at 120 SMSU in the Broadway lobby of the Smith Memorial Student Union.

Short-term and long-term general lockers are available for rent all year round through the Box Office. Lockers are located in Cramer Hall and Science Building One (SB1). No need to bring your own lock—the lockers have built-in locks with combinations for your convenience.

Campus Event Services
CAMPUS EVENT SERVICES
Campus Events & Student Union
1825 SW Broadway, Suite 119
Smith Memorial Student Union
503-725-2663
Portland State hosts thousands of on-campus events every year. Recognized student groups, PSU departments and external organizers can plan their gatherings with the assistance of the Campus Events & Student Union office. CESU provides all the basics for a successful meeting or event in clean, convenient spaces. The CESU staff also can connect you with CAVET audio-visual services and campus catering if your event needs something extra.

Campus Public Safety Office

Campus Public Safety Office
503-725-4407 (24/7)
503-725-5911 (emergencies only)
633 SW Montgomery
www.pdx.edu/cps o

Portland State University Campus Public Safety currently has an allocated force of 12 sworn police officers, 8 non-sworn public safety officers, 5 ambassadors, and 20 professional staff. Our police officers have graduated from a Department of Public Safety Standards and Training (DPSST) academy and are empowered by section 161.015 of the Oregon Revised Statutes. Sworn officers possess the same authority and adhere to the same state-mandated standards, as municipal police officers.

Whether on foot, behind the wheel of a patrol car, or on bike, officers are here to protect and serve the campus community 24-hours a day, every day of the year. Officers take pride in delivering superior law enforcement services to the University community. Public Safety Officers engage in preventative patrol to observe and report, may respond to calls for service that do not require the exercise of police authority.

Campus Dispatch is a 24-hour central communications hub located at 633 SW Montgomery that provides the University community with access to a myriad of resources both internally and externally, including but not limited to, escorts, suspicious activities, medical emergencies, or crime reporting.

Public Safety also provides an annual report on October 1st on the reported crimes occurring in the previous calendar years. Data is collected from a variety of sources, including PPB and various University departments; DOSL, ResLife, Athletics, HRC, SALP, GDI and the WRC.

Portland State University currently has over 27,229 registered students, and over 6,944 faculty and staff members. Our officers and dispatchers handle over 3,300 calls for service a year and address crime and quality of life issues. We are responsible for providing physical security services to Portland State University and to work closely with the local, state, and federal police agencies to provide a safe and healthy community for learning.

Campus Recreation

Campus Recreation
Academic and Student Rec Center
1800 SW Sixth Avenue
Portland, OR 97201
503-725-5127
campusrec@pdx.edu
www.pdx.edu/recreation

Campus Rec creates an environment where quality recreation and wellness programs inspire, empower and educate. Through our accessible and innovative programs and facilities, Campus Rec supports a healthy, happy, engaged Portland State community. All Portland State students are members and we also offer faculty, staff, alumni and plus one memberships.

As one of the largest student employers on campus, we support the occupational wellbeing of PSU students with practical job training, mentorship, and leadership opportunities that complement the academic experience. Good health, memorable experiences and learning are at your fingertips. Come play with us!

Aquatics & Safety

Make a splash with Campus Rec’s Aquatics program. De-stress, exercise, and have fun in our state-of-the-art, 25-yard pool and 10-person spa. Programs offered include lap swim, open rec swim, women-only swim, and special events that are available to Campus Rec members for free. Adult swim clinics, youth swim lessons, and First Aid/CPR/AED and lifeguard certification courses are available for a fee.

Fitness & Wellbeing

Campus Rec contributes to physical and emotional wellbeing by providing a flexible fitness program that is convenient for the Portland State community. We offer cardio, endurance, strength, mind/body, and dance fitness classes led by certified and motivational instructors. Our affordable personal training program brings clients closer to their goals, and our wellbeing team engages the entire campus community with annual events and programs such as Walktober. The Rec Center features an indoor track and nearly 200 pieces of cardio and strength equipment.

Inclusive Rec

Campus Rec celebrates diversity, inclusiveness, and
authenticity in all of our programs. Our Inclusive Rec offerings demonstrate our commitment to creating holistic wellbeing and a welcoming community for all. Enjoy accessible spaces, programs, and equipment, including outdoor trips, adaptive climbing and swimming, wheelchair sports, goalball, open inclusive rec time, and youth events for the entire PSU community.

**Intramurals**

Intramural Sports provide Campus Rec members of all skill levels with opportunities to participate in sports, make new friends, and be active in a safe, fun environment. Build community while playing in leagues, pickup games, tournaments, and events. Offerings change every term and include: basketball, soccer (indoor and outdoor), volleyball, slowpitch softball, kickball, cornhole, table tennis, and foam archery tag.

**Outdoor Program**

Since 1966, the Outdoor Program (ODP) has helped the Portland State community to access and enjoy the great outdoors, build community, increase environmental awareness, and provide exciting experiences in new settings. The ODP provides a wide variety of opportunities including guided outdoor trips, workshops and certification courses, outdoor rental gear at affordable rates, and an indoor Climbing Center. Whether you are looking to embark on an adventure or learn a new outdoor skill, join us in exploring the wild side of Oregon.

**Rec Clubs**

Portland State Rec Clubs is a student-led program that provides opportunities for recreation and intercollegiate competition between students of all skill and ability levels. Participate in your favorite sports and activities, build community, and practice transferable leadership skills in a safe and supportive environment. Our 30+ clubs are educational, accessible, organized by students, and funded by student fees. Join an existing Rec Club or start a brand new club of your own.

**Commencement**

commencement@pdx.edu

www.pdx.edu/commencement

“Graduation” and “Commencement” are terms of art at PSU. “Graduation” means actually fulfilling your degree requirements resulting in a diploma. In other words, “Graduation” is the technical obtainment of credits to receive a degree.

“Commencement” is the symbolic ceremony marking the closing of your academic career where you receive commendation for your hard work at PSU. It is an opportunity for you, your family, friends, and the PSU community to celebrate your accomplishment. Official diplomas are mailed to the student after their graduation term. Details about submitting an application to graduate, and registering for one of Portland State’s Commencement ceremonies can be found on the Commencement website.

**Committee for Improving Student Food Security**

https://www.pdx.edu/student-access-center/foodhelp@pdx.edu

Student food security is an integral element of a sustainable and equitable Portland State University (PSU) community. The Committee for Improving Student Food Security (CISFS) seeks to improve PSU students’ ability to access affordable, nutritious, culturally relevant food. This will be achieved through fostering community partnerships, increasing awareness, addressing barriers through policy advocacy, and using data to inform and build capacity for action.

CISFS provides several services to PSU students, including:

- **Free Food Market**, a monthly distribution of free produce and pantry staples
- **SNAP Application Assistance**. We coordinate a calendar of walk-in availability for students to ask questions or get assistance in completing applications for the Supplemental Nutrition Assistance Program
- **Emergency Meal Vouchers**. We provide students with a limited number of meal vouchers for Victor’s at Ondine.

**PSU Food Share**, students can opt-in to receive messaging when there is available leftover food from on-campus catered events.

**Cultural Resource Centers**

Cultural Resource Centers
Smith Memorial Student Union
1825 SW Broadway, Suite 228
Portland, OR 97201
503-725-5351
cultures@pdx.edu
www.pdx.edu/cultural-resource-centers
The Cultural Resource Centers create a student-centered inclusive environment that enriches the university experience. We provide student leadership, employment, and volunteer opportunities as well as resources such as computer labs, events, lounge/study spaces, and extensive programming. We value diversity, social justice, cultural traditions, student identities, success and leadership. All PSU students are welcome in our spaces!

La Casa Latina Student Center
Smith Memorial Student Union
1825 SW Broadway, Suite 229
Portland, OR 97201
503-725-6710
www.pdx.edu/cultural-resource-centers/la-casa-latina-student-center

La Casa Latina Student Center (LCL) is a hub on campus where Latino/a/x students and their allies come together to build and connect with community, develop leadership skills, empower their individual and collective identities, and participate in services that support academic success. The mission of the La Casa Latina Student Center is to attract Latino/a/x students to Portland State University and to provide cultural, social, and academic services and programs that enhance the quality of Latino/a/x student life. We seek to raise awareness about the rich diversity of Latino/a/x culture across campus. All PSU students are welcome!

Middle Eastern, North African, South Asian Student Center Initiative
Smith Memorial Student Union
1825 SW Broadway, Suite 228
Portland, OR 97201
503-725-5342
www.pdx.edu/cultural-resource-centers/middle-east-north-africa-south-asia-initiative

The Middle East, North Africa, South Asia (MENASA) Initiative is a Cultural Resource Centers program with the goal of creating a sixth center to support the MENASA student community at PSU. The Initiative started in 2016 when it was included in the Cultural Resource Centers Five-Year Strategic Plan. This Initiative formally recognizes MENASA students and their allies who are a critical mass in our spaces yet do not have dedicated services. While our other five cultural centers have demographic data to support their mission, the MENASA community does not. This presents a unique challenge in supporting these scholars. Currently, The MENASA team is working to help the CRCs raise the funds needed to complete the CRC expansion and accommodate space for MENASA. In the interim, the team is also working to open a temporary MENASA Center on the second floor of Smith this coming fall 2021.

Multicultural Student Center
Smith Memorial Student Union
1825 SW Broadway, Suite 228

The Multicultural Student Center provides a space where students can develop cultural competency through student engagement, programming, and meaningful dialogue. Folks can participate in events that explore intersectional identities, including our multiracial, first-generation, and international student populations. Resources such as student leadership opportunities, a computer lab, and spaces to relax and study are accessible and open to all. Students may also partake in a forum for collaborative cultural, education, and social experiences at PSU and beyond.

Native American Student & Community Center Cultural Resource Center Programs
Native American Student and Community Center
710 SW Jackson Street
Portland, Oregon 97201
503-725-9701
www.pdx.edu/cultural-resource-centers/native-american-student-community-center-student-programs
www.pdx.edu/native-american-center/

The NASCC Senior Program Coordinator is located at the Native American Student and Community Center. Their work includes supporting students in multiple ways. Some of them include: student centered-programming, supervision of student employees and confidential advocacy. In addition, their time is spent on PSU-wide committees representing the well-being of Native American, Alaska Native, and Pacific-Islander students. Last, they work collaboratively with the Multicultural Retention Services Retention Coordinator and the NASCC Manager to support all students that access any of the cultural resource centers on campus.

Pacific Islander, Asian & Asian American Student Center
Smith Memorial Student Union
1825 SW Broadway, Suite 225
Portland, OR 97201
503-725-9391
www.pdx.edu/cultural-resource-centers/pacific-islander-asian-asian-american-student-center

The Pacific Islander, Asian and Asian American (PIAAA) Student Center at Portland State University offers an engaging and accepting space to address the diverse and changing needs of our Asian and Pacific Islander student communities. PIAA strengthens the identity of API students through accessible programming, inter-cultural community building, and social justice education. All students are welcome!

Pan-African Commons
Smith Memorial Student Union
The Pan-African Commons (PAC) cultivates cultural, personal, academic, and professional development and opportunities through programming and resources that foster empowerment, enrichment, and principled solidarity that advocates liberation among peoples of the African diaspora. All students are welcome!

Dean of Student Life

433 Smith Memorial Student Union
503-725-4422
askdos@pdx.edu
www.pdx.edu/dean-student-life

The Office of the Dean of Student Life (DOSL) fosters student engagement, learning, and success through various programs and resource centers. DOSL also oversees Student Conduct & Community Standards, Housing and Residence Life, the Basic Needs Hub, and the C.A.R.E. program. Students can come to DOSL if they have conduct issues, experienced difficulties outside of the classroom affecting their academic success, would like to get involved in campus life, or questions/concerns and don’t know with whom to speak.

Disability Resource Center

Disability Resource Center
116 Smith Memorial Student Union
503-725-4150
drc@pdx.edu
www.pdx.edu/drc

The Disability Resource Center (DRC) serves students with all disability types (learning, ADHD, brain injuries, psychological, chronic medical, physical, visual, hearing, autism/Asperger’s, developmental, and others). We provide students with academic or other accommodations, removing or minimizing barriers in the environment so that they have the ability to be successful at PSU. We advocate on behalf of students as necessary in order to ensure other PSU faculty and staff are working toward the same goals in helping the student to the greatest extent possible. We also connect the student with other on- and off-campus resources as needed. Information about disability shared with the DRC is kept confidential (except for in extreme situations where sharing the information with emergency personnel or others is critical). DRC registration status does not become part of any permanent records or transcripts. Come visit us in the DRC and learn more!

Diversity and Multicultural Student Services

Diversity and Multicultural Student Services
Smith Memorial Student Union
1825 SW Broadway
Suite 425
Portland, OR 97201
503-725-4457
www.pdx.edu/dmss

Diversity and Multicultural Student Services (DMSS) serves and empowers student populations whose access, retention, academic success, and graduation are most challenged by socio-historical factors and contemporary inequities.

Our mission at DMSS is to provide an accessible inclusive environment that enriches the university experience and engages students, their families, and the community. There are seven departments within the DMSS unit: Multicultural Retention Programs (p. 64), Student Legal Services (p. 70), Disability Resource Center (p. 62), TRIO Student Support Services (p. 71), Cultural Resource Centers (p. 60), and the Veterans Resource Center (p. 72).

Global Diversity and Inclusion

503-725-5919
www.pdx.edu/diversity
Richard & Maurine Neuberger Center
1600 SW 4th Avenue, Suite 830

Global Diversity and Inclusion is the central division that leads and facilitates the continuous quest for Inclusive Excellence at Portland State University.

Diversity, equity, and inclusion is not only a value and a mission of Portland State University, it is the essential framework of who we are and what we do as an institution and community. Global Diversity and Inclusion is the central division that leads and facilitates the continuous quest for Inclusive Excellence. We structure our ongoing diversity, equity, and inclusion journey through four pillars:

Diversity Education & Learning ›

Global Diversity & Inclusion offers diversity, equity, and inclusion education addressing a variety of topics, needs, and experience levels. We provide a body of learning opportunities of breadth and depth, from beginner to advanced.

Student Support & Engagement ›

We commit to inclusion of historically marginalized communities and those underrepresented in higher education. Diversity and Multicultural Student Services (DMSS) serves and empowers student populations whose
success, retention, academic success, and graduation are most challenged by socio-historical factors and contemporary inequities.

**Equity & Compliance ›**

To learn to teach, to generate new knowledge for the benefit of humankind... To Let Knowledge Serve our city, our region, our state, and our world. This is the purpose of Portland State University. To achieve our purpose requires that together we, each of us, take responsibility for and guard against discrimination and harassment, and their pernicious effects.

**Diversity, Equity & Inclusion Advocacy ›**

Diversity, equity, and inclusion advocacy requires the ongoing examination of all endeavors, activities, practices, structures, and systems of Portland State University. We seek to identify the barriers and challenges to diversity, equity, and inclusion. We advocate for any and all needed changes that aid in making every person feel welcome, wanted, valued, and partnered with for their success.

**Helen Gordon Child Development Center**

**Helen Gordon Child Development Center**

1609 SW 12th Avenue

503-725-3092

www.pdx.edu/helen-gordon-center/

The Helen Gordon Child Development Center is a University-operated service that provides a quality educational laboratory preschool/extended day program for children 4 months to six years of age. The center is accredited by the National Academy of Early Childhood Programs, a division of the National Association for the Education of Young Children. The center is open from 7:30 a.m. to 5:30 p.m. daily. Children of PSU students, faculty, and staff are eligible for enrollment in the program. Enrollment is based on the date of application.

As a laboratory preschool/extended day program, the center enables students from education, psychology, and related fields to complete course requirements through observation, practicum, or research activities at the center. Interested students should contact the center’s office.

**Information Technology**

**Information Technology**

Fariborz Maseeh Hall (FMH)

1855 SW Broadway

Lobby

503-725-HELP (4357)

www.pdx.edu/oit/

help@pdx.edu

The Office of Information Technology (OIT) provides support for computing, networking, data storage, voice and data communication, multimedia, computer labs, classrooms, and audiovisual services. All faculty, staff, and students can receive support by calling, emailing, visiting the OIT website, or visiting the Helpdesk in the FMH lobby.

**Learning Center**

The Learning Center strives to foster the learning process by empowering PSU students to accomplish their academic and personal goals. To do this, the Learning Center provides a variety of academic support services for students: Academic Coaching, Peer Tutoring, College Success courses, ROADS to Success presentations, Testing Services, and Remote + Online Learning Support. All Learning Center programs are open to undergraduate, post-baccalaureate, and graduate students.

**Academic Coaching**

PSU’s Learning Center offers a flexible coaching service that allows students to work with coaches in creating measurable plans to meet their academic goals. These goals may address school/life balance, active learning strategies and various approaches to studying course content, improving communication skills, and learning about resources on and off campus. All academic coaches are matched to an academic pathway. Feel free to view the coaches’ bios on our website. To schedule an academic coaching appointment, visit the academic coaching page on our website, or call 503-725-4448.

**Tutoring Services**

The Learning Center provides free peer tutoring services in math, sciences, and world languages. The goal of our tutoring programs is to promote independence in learning and give students the tools to take control of their learning process. The Learning Center provides on campus, online, and group tutoring. In addition, we offer Live Streams for selected courses. All tutors are current PSU undergraduate and graduate students that have successfully taken the courses they provide help with. Check out the tutoring page for a complete list of subjects, schedules, and availability.

**College Success Courses**

College Success is a comprehensive (3-credit) course designed to enhance academic success by helping students identify barriers that hinder their ability to achieve their academic, personal and/or professional goals. Using guided, reflective journaling as a self-discovery tool, students explore the seven non-cognitive competencies: self-advocacy, confidence, emotional intelligence, resilience, perseverance, self-control, and growth mindset. In addition, College Success offers the opportunity to gain cognitive skills (study strategies) based on principles of learning and thinking, which students are encouraged to integrate and apply in order to become engaged, effective, and empowered learners.
Whether you are new to college, new to PSU (transfer student), or simply in need of a motivation jump start, there is much to gain from this course. Lower and upper-division options available. For more information, see the upcoming schedule, see the college success page.

Remote + Online Learning Support
The Learning Center is the home of Remote and Online Learning Support for all of PSU’s students. There are resources to help you navigate how you manage your studies while you take online courses, as well as a free course designed to get you more comfortable with the learning management system that PSU utilizes.

Testing Services
Testing Services through the Learning Center provides accommodated testing support for PSU students registered with the Disability Resource Center.

Learning Resources for Students
In addition to our services, we have a repository of many useful yet practical worksheets, website links, and other helpful tips. This information can be found on the subject resource page on our website.

Little Vikings and Baby Vikings
Little Vikings
Epler Hall, 1st Floor
503-725-8800
www.pdx.edu/students-with-children/little-vikings

Baby Vikings
Smith Memorial Student Union, 1st Floor
503-725-9622
www.pdx.edu/students-with-children/baby-vikings

Little and Baby Vikings provide walk-in, reserved, and occasional care for children ages 6 weeks to 12 years old. You can reserve care for the entire term, up to 5 hours per day and 20 hours per week. In addition to drop in care, Baby Vikings offers several full-time childcare slots available by reservation only. Little Vikings also provides day camps for days when Portland Public Schools do not have school, but classes are still in session at PSU.

Lockers Rental
LOCKER RENTAL
University Box Office
1825 SW Broadway, Suite 120
Smith Memorial Student Union, Broadway lobby
503-725-3307
tickets@pdx.edu

You don’t have to lug that stuff all over campus. Short-term and long-term general lockers are available for rent year-round through the University Box Office located in Cramer Hall and Science Building One (SB1). They include convenient built-in combination locks as part of the rental fee.

Multicultural Retention Services
Multicultural Retention Services
Smith Memorial Student Union
1825 SW Broadway, Suite 425
Portland, OR 97201
503-725-4457
https://www.pdx.edu/diversity-multicultural-student-services/

Multicultural Retention Services (MRS) strives to ensure the academic success, retention, and graduation of students through culturally inclusive programs and services that are designed to build a strong sense of community and belonging. We provide academic support, advising, referrals, and advocacy for first generation, low-income, and/or historically underrepresented students.

Diversity Scholarship Program
Smith Memorial Student Union
1825 SW Broadway, Suite 425
Portland, OR 97201
503-725-4457
www.pdx.edu/multicultural-retention-services/dsp

The purpose of the Diversity Scholarship Program is to expand and enrich Portland State’s learning community by recognizing and supporting outstanding students from first generation and various cultural, ethnic and socio-economic backgrounds, with diverse talents, interests, and life experiences. The Diversity Scholarship Program is committed to helping students achieve their academic goals. The program promotes diversity and student participation in campus life through volunteerism.

Black Student Services
Smith Memorial Student Union
1825 SW Broadway, Suite 425F
Portland, OR 97201
503-725-4457
www.pdx.edu/multicultural-retention-services/

Black Student Services (BSS) provides academic support services, advocacy and campus navigation centering the experiences of the African diaspora. We provide connections to communities of the color within and outside of the diaspora through services and resources for incoming freshman, transfer and continuing students. BSS also provides a supportive and welcoming environment for Black students through social groups such as Empowering Sisterhood and Building Brotherhood as they acclimate to the academic environment or continue their education at Portland State. Black Student Services assists students who are seeking a cultural connection at Portland State University through community building activities and connecting them to both PSU student groups and faculty.
as these are essential components to achieving academic success.

Asian and Pacific Islander Student Services
Smith Memorial Student Union
1825 SW Broadway, Suite 425F
Portland, OR 97201
503-725-4457
www.pdx.edu/diversity/student-support-programs

Asian, Pacific Islander & Desi (APID) Student Services supports students in the PSU Community through multicultural advising, engagement, advocacy, and empowerment. We are here for those who seek to build a cultural connection to campus resources, organizations, and services, including APID Staff, Faculty, and Community. We specifically provide: academic support; opportunities for leadership development; referrals to API community resources; and holistic support for new and continuing students at PSU. APID Student Services welcomes all students who seek resources, support, and a sense of community that will enable them to become successful students and leaders at PSU.

Latino/a/x Student Services
Smith Memorial Student Union
1825 SW Broadway, Suite 425
Portland, OR 97201
503-725-4457
www.pdx.edu/diversity/student-support-programs

Latino/a/x Student Services provides academic support services, advocacy and connections to campus and Latino/a/x community services and resources to new incoming freshman, transfer and continuing students. Latino/a/x Student Services provides a supportive and welcoming environment for Latino/a/x students as they transition to the PSU academic environment. Latino/a/x Student Services assists students who are seeking a cultural connection to the Portland State University campus by connecting them to student groups and faculty, an essential component to achieving academic success.

Native American Student Services
Native American Student and Community Center
710 SW Jackson Street
Portland, OR 97201
503-725-5348
www.pdx.edu/multicultural-retention-services/nations

The Native American Student Services Program provides support for Native American and Alaskan Native students through general advising, guidance, advocacy and referrals to appropriate campus-based and Portland Metro resources, especially organizations serving Native American people. Native American Student Services connects students to opportunities for Native American cultural enrichment and social activities, both on campus and in the community.

The PSU Native American Student & Community Center (NASCC) is a beacon to PSU’s commitment to American Indian tribes existing nation to nation treaty relationships. The NASCC is a gathering space to celebrate and empower student success through culturally relevant programming, academic support, and inter-generational community engagement to preserve and perpetuate inter-tribal connection for Native American, Alaskan Native, Pacific Islander students and our allies through tradition, ceremony, and storytelling. In addition to its own staff, the center also houses a Multicultural Retention Services Student Services Coordinator, Cultural Resource Centers Senior Program Coordinator, four student groups, a ten station computer lab, a children’s area, and a quiet study area with a fireplace. All students are welcome!

Queer Resource Center
Queer Resource Center
458 Smith Memorial Student Union
503-725-9742
qrc@pdx.edu
www.pdx.edu/queer

The Queer Resource Center supports queer and trans students at Portland State University in achieving their educational goals through advocacy, community, and celebration. We prioritize a racial justice framework to improve campus climate through education, policy change, and campus-wide organizing. Our vision is to provide students with the support they need to persist to graduation through increasing equity and access for queer and trans students at Portland State University. The QRC hosts social and support hours, creates programming geared toward building and connecting communities, and fosters a welcoming space with a library, computer lab, and lounge.

Office of the Registrar
1855 SW Broadway, FMH Student-Services Lounge
503-725-3220
www.pdx.edu/registration

The Registrar’s Office provides enrollment, certification, and records management services to students, faculty, staff and the public. Specific areas of service include the following:

• Course Scheduling and Classroom Assignments
• Student Registration
• Student Records Maintenance
Ronald E. McNair Scholars Program

Ronald E. McNair Scholars Program

503-725-9740
www.pdx.edu/mcnair-program/

The Ronald E. McNair Scholars Program at Portland State University works with undergraduates who want to pursue Ph.D. degrees. It introduces juniors and seniors who are first generation and low-income or members of under-represented groups to academic research and to effective preparation and strategies for getting into and graduating from Ph.D. programs.

The McNair Scholars Program has academic-year activities and a full-time summer research internship. Scholars take academic and skills-building seminars and workshops during the year, and each scholar works closely with a faculty mentor on original research in the summer. Scholars present their research findings at the McNair Summer Symposium and at other conferences, and are encouraged to publish their papers in the McNair Journal and other scholarly publications.

Services for Students with Children

Services for Students with Children
462 Smith Memorial Student Union
1825 SW Broadway
Portland, OR 97201
(503) 725-9878
www.pdx.edu/students-with-children

The mission of Services for Students with Children is to support students with children in achieving life-balance that helps them stay the course to successful completion of their academic goal. We offer subsidized child care tuition for eligible students through the Jim Sells Childcare Program; drop-in flexible childcare on-campus at Little and Baby Vikings; social and information events and celebrations; several family-friendly study rooms on campus; a free clothing closet and food pantry; and much more! We also support pregnant and postpartum students through individual consultation, and we oversee the 13 lactation spaces on campus. We actively advocate for student parents to faculty, staff, and administration.

Center for Student Health and Counseling (SHAC)

University Center Building
1800 SW 6th Avenue

www.pdx.edu/health-counseling

The Center for Student Health and Counseling (SHAC) provides high quality, accessible medical, counseling, dental, testing, and health promotion services to PSU students. All students taking five (5) or more* in-load credit hours in a term are assessed a Student Health Fee which provides access to SHAC services, no matter what health insurance they carry. The Student Health Fee is assessed on a per-term basis and is non-refundable.

Students who are SHAC-eligible in Spring term, and either graduate in June or do not plan to attend summer term, can still use SHAC services through the summer on a fee-for-service basis.

Visit www.pdx.edu/health-counseling for more information about SHAC’s services.

*SHAC Dental Services is available to PSU students enrolled in one (1) credit hour or more per term.

SHAC Counseling Services

Counseling Services
University Center Building, Suite 200
1800 SW 6th Avenue
503-725-2800
www.pdx.edu/health-counseling/counseling

Counseling Services in the Center for Student Health & Counseling (SHAC) offers a variety of services designed to support the emotional well-being of PSU students. Services are provided by a professional staff of licensed psychologists, social workers, psychiatrists, and doctoral and master-level students in training. Services include: initial consultations, brief individual therapy, group therapy and support groups, emergency/crisis counseling, psychiatric assessment and treatment, referral assistance, psycho-educational workshops and trainings, and consultation for the campus community. Counseling Services also offers comprehensive learning disability and ADHD assessment, and career assessment.
SHAC Dental Services
Dental Services
University Center Building Suite 307
527 SW Hall Street
503-725-2611
www.pdx.edu/health-counseling/dental

Dental Services in the Center for Student Health & Counseling (SHAC) is staffed by licensed, experienced professionals who provide dental care with the student’s health and comfort in mind. PSU students enrolled in one (1) or more credit hours per term may access Dental Services on a fee-for-service basis. All fees are billed to the student’s account. There is no student dental insurance plan, however the cost of services is greatly reduced compared to those of a private dental clinic. Dental Services’ staff will submit claims to all private insurers that allow it. However, Dental Services is not responsible for the determination of benefits. Dentists make referrals if a student needs a specialist or more intensive dental treatment.

Some of SHAC’s dental services include:
- Routine & emergency exams
- Teeth cleaning
- X-rays
- Fillings, crowns & bridges
- Oral surgery/wisdom teeth extraction
- Custom whitening trays
- Night guards & sports guards
- Root canals

For a comprehensive list of services and fees go to our website.

SHAC Health Promotion & Education
Health Promotion & Education
University Center Building, Suite 307
527 SW Hall Street
503-725-5339
www.pdx.edu/health-counseling/wellness

The focus of Health Promotion & Education rests in comprehensive community level interventions aimed to influence the environment in which students live, work, and learn. This work is accomplished through health promotion programs (planned, organized events and activities that empower students over time to make informed decisions regarding their health); health education (providing health enhancing learning experiences for faculty, staff, and students through campus-wide events, workshops, and classes); and environmental approaches (policies and partnerships).

Health Promotion & Education is comprised of:

Illuminate, an interpersonal violence prevention (IPV) program which uses the power of prevention education to promote healthy relationships and sexuality by addressing the underlying social determinants of violence and to create equal and respectful relationships. Illuminate seeks to shed light on the social injustices that lead to sexual and relationship violence and to create social change through prevention programming such as bystander intervention, anti-oppression, consent workshops, and campus social norms.

The Wellness & Health Action Team (WHAT), a group of student peer health educators who take a peer mentor approach to talking about and educating students on a wide variety of wellbeing topics and healthy lifestyle choices.

Mental Health Promotion, which encompasses trauma-informed trainings for faculty, staff, and students who serve other students, suicide prevention programming and support and advocacy for students in recovery including those involved with the Collegiate Recovery Community student organization.

The Mind Spa, which students can reserve by appointment to relax, reduce stress, and learn new skills to reduce stress and anxiety. The Mind Spa includes a yoga space, full-body massage chair, light therapy alcove, and a biofeedback station. There is also a Virtual Mind Spa Experience that can be found online and accessed whenever needed at https://sites.google.com/pdx.edu/virtual-mindspa/home.

SHAC Health Services
Health Services
University Center Building, Suite 200
1800 SW 6th Avenue
Suite 200
503-725-2800
www.pdx.edu/health-counseling/health

Health Services in the Center for Student Health & Counseling (SHAC) is staffed by licensed, experienced healthcare providers, Registered Nurses (RN’s), and allied health professionals who are available for diagnosis, treatment, consultation, and referrals for illness and injury. Health Services offers a range of primary care services including screenings for sexually transmitted infections (STIs), diagnostic laboratory work, women’s health services, family planning counseling and contraception, x-ray, immunizations, and student travel consultation. Health Services offers hormone replacement therapy (HRT) and trans medical services. Health Services has RN’s trained and licensed to provide examinations and support for sexual assault survivors.

If a student has a health question or concern and Health
Services is closed, students can access a 24-hour External Nurse Advice Line: 1-844-224-3145.

Smith Memorial Student Union

Smith Memorial Student Union
1825 SW Broadway St.
503-725-2663
smsu@pdx.edu
www.pdx.edu/student-union

Smith is the living room of Portland State’s downtown campus. Its resource centers, retail outlets and meeting spaces bring together students, faculty and the community. In the corridors of Smith, you’ll find amenities such as Smith’s Kitchen food court, the University Market with its snacks and supplies and the Smith’s Place coffee shop. In the basement of Smith you can hang out at the Viking Game room, which features pool tables, video gaming, Foosball and the smallest public bowling alley in Oregon.

Be inspired by Smith’s student-run art galleries, relax or study in the lounge spaces or find your people in the many cultural centers. Student resources such as the Dean of Student Life’s Office, Student Legal Aid, Queer Resource Center, Women’s Resource Center, Veterans Resource Center, Resources for Students with Children and TRIO support are under Smith’s roof. It’s also home to PSU student media, the student leadership programs (never too late to join!), campus meeting spaces and more.

Smith is unlike any other facility on campus. Come by and find out why you belong here.

UNIVERSITY BOX OFFICE

University Box Office
1825 SW Broadway
Suite 120 -- Smith Memorial Student Union
Broadway lobby
503-725-3307

The University Box Office at Portland State is the place to get event tickets, campus information and locker rentals (see also Locker Rentals). The box office sells and distributes tickets for university and external events held at Portland State venues. This makes it your starting point for attending Lincoln Hall performances, Viking Athletics events, commencement ceremonies, student-organized functions and cultural events. The Broadway lobby office in Smith also serves as the PSU Information Desk. If you can’t stop by, you can purchase tickets online at https://portlandstate.universitytickets.com/

VIKING PAVILION AT THE PETER W. STOTT CENTER

Viking Pavilion at the Peter W. Stott Center

930 SW Hall Street
503-725-2663
conferences@pdx.edu
www.pdx.edu/conferences/viking-pavilion-peter-w-stott-center

Most PSU students know Viking Pavilion is the home of Viking Women’s Volleyball and Men’s and Women’s Basketball, but the 3,000-seat arena also hosts orientations, commencements and student events for the entire campus community. Regional corporate partners such as OHSU, TechFestNW and Nike often use Viking Pavilion to host company evenings, banquets, trade shows and conferences. Weekdays, Viking Pavilion offers a cafe, student seating space and classrooms. It’s a contemporary, spacious facility for use by students and athletes alike.

VIKING GAMEROOM (BOWLING ALLEY)

Viking Game room
1825 SW Broadway
Basement of Smith Memorial Student Union
503-725-4529
gameroom@pdx.edu
www.pdx.edu/student-union/viking-gameroom

Yes, Portland State has a bowling alley, pool tables and gaming space in the heart of the campus. The Viking Game room, located in the basement of Smith Memorial Student Union, offers six bowling lanes available for open play and reservations. It’s a great place to have a birthday, celebration or friendly tournament. It’s available to students, staff and the general public – and features its own fully-stocked concession stand. Don’t bowl much? Drop by for free popcorn Fridays with a valid PSU ID.

Student Activities and Leadership Programs

Student Activities and Leadership Programs
Student Activities and Leadership Programs
Smith Memorial Student Union
Suite M113
1825 SW Broadway
Portland, OR 97201
503-725-4452
asksalp@pdx.edu
www.pdx.edu/student-leadership/

Student Activities and Leadership Programs’ mission is to enrich and integrate students’ leadership and academic experiences in order to educate students to be ethical, socially just, and civically engaged leaders on campus and in their larger communities. The following programs are supported by SALP:

Portland State Programming Board
Suite M110
1825 SW Broadway
Portland, Oregon 97201
(503) 725-5638
Portland State Program Board promotes community, pride, and tradition through student-initiated cross-campus events. PSPB plans free events to enhance the experience of all PSU students' campus life experiences such as the annual Portland State of Mind Concert, quarterly Midnight Breakfast and Mid-Term Stress Relief, and weekly Parkway North Project series including movies, concerts, and other fun activities.

Student Government—ASPSU
Smith Memorial Student Union
Suite 117
1825 SW Broadway
Portland, Oregon 97201
(503) 725-8973
aspsu@pdx.edu
www.pdx.edu/student-government

Greetings from the Associated Students of Portland State University! We serve as your Student Government, representing 27,000 students. The issues in which we constantly lobby for are lower tuition, lower fees, cultural competency and a safe campus for all. We aim to advocate for and represent the interest of students before internal and external bodies; facilitate formal needs of communication and interaction between students, student organizations, faculty, and University administration; identify and develop services not offered by other divisions of the University; and provide a process for students to fully participate in the allocation of student incidental fees.

Student Community Engagement Center
Smith Memorial Student Union
Suite M102/103
1825 SW Broadway
Portland, Oregon 97201
(503) 725-8132
volunteer@pdx.edu
www.pdx.edu/student-community-engagement

The Student Community Engagement Center is the hub for student civic engagement at Portland State University. Through meaningful service opportunities ranging from one-day service events to year-long service commitments, we strive to provide robust and varied co-curricular opportunities for all students at Portland State to engage with the community and become catalysts for change. If you are looking to volunteer, fulfill hours for a class, explore something you are passionate about, and/or make connections and explore Portland, reach out and we'll help you find an opportunity that matches your interest and schedule!

Student Media
Smith Memorial Student Union
Sub-basement
www.pdx.edu/student-media

Student Operated Services

www.pdx.edu/student-leadership

SALP is home to close to 200 different student organizations with new groups forming each year. Each student organization has a leadership team that works closely with SALP Student Organization Advisors to accomplish their group goals and grow as student leaders. If you are interested in joining a PSU student organization or starting your own, please visit PSU Connect (pdx.edu/connect), the SALP Clubhouse (Smith Memorial Student Union room 113M), or review the following webpage for more information: www.pdx.edu/student-leadership/join-or-start-student-organization.

Student Sustainability Center
Smith Memorial Student Union
Suite M104
1825 SW Broadway
Explore sustainability, build community, and strengthen your resume. Our programs, services, and activities are designed for students who want to create positive change in their own lives, on campus, and beyond. Choose your own adventure and thrive!

**Student Ambassador Program**

The mission of the Student Ambassador Program is to promote Portland State University. We represent the student experience to current and future students and their families. We promote our diverse Portland State community to guests, administrators, faculty, staff, alumni, community partners, dignitaries, and friends of the University.

Student Ambassadors are students first and must be able to balance their academics with the demands of the program. The primary purpose of the program is to provide a leadership laboratory through which Student Ambassadors enhance and supplement their academic, communication, time management, and other professional skills.

**Student Financial Aid and Scholarships**

The Office of Student Financial Aid and Scholarships assists students, parents and families in applying for aid from federal, state and university program sources. Financial aid advisors are available to assist students and their families with any questions they may have, to help them understand the financial aid programs available, and to guide them through the application process.

**Student Legal Services**

Student Legal Services
Smith Memorial Student Union
Suite M343
1825 SW Broadway
Portland, OR 97201
503-725-4556
www.pdx.edu/sls/

Student Legal Services (SLS) provides free confidential legal consultations and representation to PSU students paying student fees. SLS handles a wide range of legal issues including: landlord/tenant, immigration, family law, car/bike accidents, bankruptcy, consumer, debtor/creditor, criminal, criminal expungement, employment, interpersonal violence, name/gender change, and traffic citations. SLS also provides notary services, internships, and Explore the Law, a program for students interested in legal professions.

**Transportation and Parking Services**

1812 SW 6th Ave, in the Academic & Student Recreation Center (ASRC)
503-725-3442
www.pdx.edu/transportation

Whether you travel by bike, bus, car, train, skateboard or your own two legs, our mission is the same: Get you where you need to go on campus in the most efficient, affordable, and sustainable manner possible.

PSU has three light-rail lines, two streetcar lines and over 20 bus routes converging on campus, so it should come as no surprise that public transit is the most popular and convenient option for students. Our Student Viking Pass, allows full use of the TriMet system at a 50% discount. Many students also qualify for TriMet's Reduced Fare program, which provides an even better 72% discount. Contact our office for information about signing up!

PSU is also an award-winning bicycle friendly campus. Bicycle racks are available outside all buildings on campus as a convenient, short-term parking option. PSU also provides a variety of indoor bike parking facilities, which allow you to park your bike in a space that’s safe and dry. Best of all, you can keep your bike running smoothly with a visit to the PSU Bike Hub, an on-campus bike shop at the Student Rec Center. Students can rent or buy a bike, drop off a bike for professional repair or learn to service it themselves, and receive discounts on a wide selection of merchandise.

Need a car once in a while, but don't want the hassle of bringing one with you? Zipcar, Portland’s largest carsharing company, has over 20 vehicles available in the university district. PSU students and employees can join this service at a discount.

Parking on campus is very limited. For those who need to drive to campus, a variety of parking permits are available by the academic term and the academic year. Parking permits should be purchased in advance, prior to the term start, as they frequently sell out. Permits can be purchased online at pdx.edu/transportation approximately 4 weeks before the start of each term. Permits purchased online are sent by mail or held at will call. Daily and hourly parking is also available for those who prefer to drive infrequently.

If you have any questions, please call Transportation &
Parking Services at 503-725-3442 or visit www.pdx.edu/transportation.

TRIO Educational Talent Search

Educational Talent Search
1825 SW Broadway, M330
503-725-4458
www.pdx.edu/ubets

Educational Talent Search is a college access program sponsored by Portland State University, and funded through the U.S. Department of Education. Talent Search serves 685 students from grades 6-12 in the Portland School District. The program’s mission is to identify, motivate, and assist students in their educational transitions into college. We primarily work with students who come from low-income families and/or will be the first in their family to pursue post-secondary education. We encourage students to stay in school and graduate, and to enroll in a community college, a four-year university, or a vocational/technical college.

TRIO – Student Support Services (SSS)

TRIO – Student Support Services (SSS)
Smith Memorial Student Union Suite 425
1825 SW Broadway Portland, OR 97201 ph: 503-725-3815
https://www.pdx.edu/trio-student-support-services/triosss@pdx.edu

TRIO - Student Support Services is Portland State University’s federally funded academic and personal support services for college students. It is designed to provide special assistance to those who have traditionally had limited access to a college education. Specifically, students who are low-income, have a disability, or whose parents did not graduate with a bachelor’s degree can receive assistance from SSS if they have a need for academic support. The program provides academic counseling, financial literacy, scholarship assistance, skill development workshops, study spaces, computer lab, writing assistance, and referrals that are designed to help the students achieve their educational goals.

TRIO – Student Support Services (SSS) STEM

1825 SW Broadway Portland, OR 97201 ph: 503-725-3815
https://www.pdx.edu/trio-student-support-services/triosss@pdx.edu

TRIO - Student Support Services STEM is Portland State University’s federally funded academic and personal support services for college students who are majoring in Science, Technology, Engineering, and Math. It is designed to provide special assistance to those who have traditionally had limited access to a college education in the STEM fields. Specifically, students who are low-income, who have a disability, or whose parents did not graduate with a bachelor’s degree can receive assistance from SSS STEM if they have a need for academic support. The program provides academic counseling, financial literacy, scholarship assistance, skill development workshops, study spaces, computer lab, writing assistance, and referrals that are designed to help the students achieve their educational goals.

TRIO Upward Bound

TRIO Upward Bound (UB)
1825 SW Broadway, M330
503-725-4458
www.pdx.edu/ubets

Upward Bound, a college preparation program for high school students, has been hosted at Portland State University since 1980. Funded by the U.S. Department of Education, Upward Bound is a year-round program designed to improve students’ academic and study skills in high school, to develop their career and educational plans, and to help them enter and succeed in higher education. Upward Bound serves low-income, first generation high school students from the following school neighborhoods: Jefferson, Roosevelt, and McDaniel.

503-725-4535
market@pdx.edu

Snacks, drinks, coffee, grab-and-go lunch, everyday supplies and PSU gear can be found in one on-campus location -- the University Market in Smith. The Market offers regular specials, friendly service and accepts cash, Visa, MasterCard and Apple Pay. Open weekdays and Saturdays.

University Welcome Center

University Welcome Center
Academic Student and Recreation Center
Suite 101
1800 SW 6th Avenue
503-725-5555
campusvisits@pdx.edu
www.pdx.edu/visit/

The University Welcome Center welcomes prospective students and the community to Portland State University. The University Welcome Center oversees:

• Daily and group campus tours
• Admissions information sessions
• Large visit programs for prospective students
• Admissions drop-in counseling for prospective students
• Student Ambassador Teams supporting student recruitment and community outreach

University Housing & Residence Life
University Housing & Residence Life
The Broadway Building
Suite 210
625 SW Jackson Street
Portland, OR 97201
503-725-4375
housing@pdx.edu
www.pdx.edu/housing

University Housing and Residence Life (UHRL) provides PSU students with on-campus access to safe, convenient, student-centered, and supportive living options. Our mission is PSU student success. Consequently, students who choose to live with us receive access to direct staff interaction and support, academic success programs and coaching, facilities support, and hassle-free billing directly to the student's account. The UHRL Main Office provides information about on-campus housing, housing applications and contracts, building maintenance, and housing charges for prospective and current residents. Students who choose to live on campus make that choice because on-campus living leads to student success, on time graduation, and an experience with memories to last a lifetime.

Veterans Resource Center
Veterans Resource Center
Smith Memorial Student Union
Suite 401
1825 SW Broadway
503-725-5672
psuvrc@pdx.edu
www.pdx.edu/veterans-resource-center

The mission of the Veterans Resource Center (VRC) is to support all military-connected students with their transition from the military to academe. We provide academic support, professional development, VSOC counseling, information dissemination and wholistic health outings. In addition, we work in partnership with PSU staff, faculty and administrators who seek to better understand the unique cultural differences found in the veteran community and how we can all work together cohesively and respectfully for the success of the community. The vision of the Veterans Resource Center is to foster a comprehensive system of support for the students to enhance academic success towards graduation, professional and personal development. In addition, we strive to cultivate an environment within the VRC that is inclusive and engaging for all students: women, non-veterans, LGBTQ, and people of various racial/ethnic compositions and abilities.

Women's Resource Center
Women's Resource Center
439 Smith Memorial Student Union
1825 SW Broadway
503-725-5672
wrc@pdx.edu
www.pdx.edu/womens-resource-center

The Portland State University Women's Resource Center offers students of all genders a place for support, leadership development, and community building. Our Sexual & Relationship Violence Response Program provides confidential advocacy for students experiencing stalking, sexual harassment, sexual assault, and dating/domestic violence. Our Leadership Program offers unpaid engagement for students who want to develop their personal, professional, and academic skills through a framework of feminist theory and practice. Our events and programs offer the PSU community a place to engage with ideas and celebrate shared identities. We have a lounge space for studying and hanging out with comfortable seating, a kitchenette, and tea and coffee. We also offer menstrual products free of charge.
Student Policies and Guidelines

Reasonable Accommodation/Access Policy
PSU students with disabilities are provided with reasonable accommodations that give them the opportunity for equal access to educational programs, activities, and university life. Prospective students are provided with reasonable accommodations to assist them in the application process.

The Disability Resource Center (DRC) works to ensure equal access to University courses, programs, facilities, services, and activities by providing students with documented disabilities reasonable accommodations, academic adjustments, auxiliary aids and services, training, consultation, and technical assistance.

Creating a Culture of Respect Module
All PSU employees, including student employees, must complete the training module "Creating a Culture of Respect: Preventing Prohibited Discrimination and Unlawful Harassment." PSU strives to maintain a climate that values diversity and exemplifies mutual respect. To that end, you are required to complete this module in the first two weeks of employment. Your supervisor can assist you with any questions.

This training offers strategies for preventing unlawful discrimination, harassment, and retaliation within the University. It teaches our community how to respond appropriately when they become aware of potential discrimination or harassment, educates us about the risk of liability to Portland State University, its managers, and individual employees, and, in keeping with PSU's core values; promotes a culture of mutual respect.

Safe Campus Module
www.pdx.edu/sexual-assault

Portland State University desires to create a safe campus for our students. As part of that mission, PSU requires all students to take the learning module entitled Creating a Safe Campus: Preventing Gender Discrimination, Sexual Harassment, Sexual Misconduct and Sexual Assault.

Find the module in D2L. The module and accompanying exam will take approximately 30 minutes to complete. At the conclusion of the module, students should be aware of internal and external resources, reporting options, and PSU's policies and codes regarding gender discrimination, sexual harassment, sexual misconduct, sexual assault, dating violence and domestic violence.

Student Conduct
The Student Conduct and Community Standards Program administers policies and regulations that help the University to operate in a climate of free inquiry and expression, and supports the academic and educational purposes of the University. Students should seek assistance from the Student Conduct and Community Standards Program for policy information, and with concerns about potential student misconduct, as well as when they are charged with a violation of the Code.

Academic Integrity
The policy governing academic integrity is part of the Code of Student Conduct and Responsibility. Academic integrity is a cornerstone of any meaningful education and a reflection of each student’s maturity and integrity. The Code of Student Conduct and Responsibility, which applies to all students, prohibits all forms of academic misconduct, fraud, and dishonesty. These acts include, but are not limited to: plagiarism, buying and selling of course assignments and research papers, performing academic assignments (including tests and examinations) for other persons, unauthorized collaboration, disclosure and receipt of academic information, and other practices commonly understood to be academic misconduct.

Student Health Insurance
Domestic students enrolled in five (5) or more in-load credit hours per term, or international students enrolled in one (1) credit hour, are required to carry major medical health insurance while attending PSU. Students are assessed a quarterly health insurance fee that enrolls them in the PSU Student Health Insurance Plan. A student may waive out of the PSU-sponsored health insurance plan if they maintain personal health insurance that meets University criteria. For more information about the PSU student health insurance waiver process, waiver deadlines, or to review the benefits and rules of the PSU Student Health Insurance Plan, visit https://www.pdx.edu/health-counseling/insurance.
The Office of International Affairs (OIA) provides support for international students, scholars and faculty, as well as PSU students and faculty who are planning to study, intern and teach abroad. OIA also houses Centers and Institutes which focus on specific geographic regions with the goal of promoting cultural understanding and engagement. In addition, our Portland Center and International Special Programs offer individualized programs for international students visiting the U.S.

International Student and Scholar Services

Director: Christina Luther
Associate Director: Jill Townley
Assistant Director: Joshua Davis
Karl Miller Center, Suite 660
503-725-4094
ova@pdx.edu

International Student and Scholar Services staff work with admitted international students, visiting scholars, and international faculty. The office is a central source of information on the services and programs available to these groups. The staff work closely with sponsoring agencies, diplomatic missions, and other government agencies to resolve academic, financial, immigration and adjustment issues.

Services and programs offered to international students, scholars and faculty include:

- Intensive orientation programs for all incoming international students and faculty.
- Immigration advising for students, visiting scholars, and exchange students.
- Administration of scholarships specifically for international students.
- Educational and social events for international students and scholars with University and community groups, including a mentoring program which matches new international students with returning students.
- Weekly or quarterly workshops on issues affecting internationals, such as insurance, work permission, taxes, etc.
- A weekly International Coffee Hour open to all PSU students, staff, and faculty.
- Advising for faculty and staff regarding the invitation and employment of international faculty.
- Advising of international faculty (and their dependents) on regulations and procedures for maintaining legal status, travel, employment authorization, and other issues.

For more information about staff and services, please visit our websites:

www.pdx.edu/international-students and
www.pdx.edu/international-scholars.

For information about international student admissions, contact the Office of Admissions at 503-725-3511 or intladm@pdx.edu.

For information about English as a Second Language (ESL), contact the Intensive English Language Program, University Center Building Suite 400, 503-725-4088 or esl@pdx.edu.

Education Abroad

Director: Jen Hamlow
jhamlow@pdx.edu
Karl Miller Center, 6th Floor
503-725-5309

www.pdx.edu/education-abroad/

PSU supports the long-standing value that studying other cultures and places is an essential component of modern education. As a result of our commitment to internationalization, the Office of International Affairs sponsors a wide variety of education abroad programs for PSU students year-round. The University administers some of these programs directly, while others are conducted in cooperation with educational associations such as IE3 Global, the Council on International Educational Exchange (CIEE), and the University Studies Abroad Consortium (USAC).

Advisors in Education Abroad provide guidance and assistance for students who seek to enrich their university education through education abroad. PSU offers over 200 programs in more than 80 countries. Because these programs offer residence credit and home campus registration, participating students who are eligible for financial aid at PSU may apply it, in most cases, to these study programs.

PSU also has a long-standing tradition of working with faculty to develop a variety of short-term overseas experiences for students. The length of these programs ranges from ten days to six weeks, and they are offered
throughout the academic year. PSU faculty members have taken students to countries all over the world, including China, Costa Rica, Cuba, Ecuador, Ghana, India, Italy, Japan, Mexico, Nicaragua, Spain, and Vietnam.

Education Abroad opportunities are subject to change throughout the year. For the most current listing of programs available and to learn how to get started, please visit our website at www.pdx.edu/education-abroad/, or come to our offices on the 6th floor of the Karl Miller Center.

**International Special Programs**

**Director:** Jeff Baffaro  
**baffaroj@pdx.edu**  
**Karl Miller Center, 630A**  
**503-725-4181**

www.pdx.edu/intl-special-programs

International Special Programs (ISP) provides non-credit short-term training and education programs for professional and student groups, custom-designed for specific international organizations/agencies/institutions, which draw on resources and expertise of PSU faculty and the Portland community to provide specialized instruction.

ISP provides administrative, logistical, and curricular support services to provide for a custom-designed group package experience which includes instruction, extra-/co-curricular activities, transportation, housing and meals. ISP hosts 30-35 groups a year. For more information visit our website at www.pdx.edu/intl-special-programs.

**International Partnerships**

**Director:** Sally S. Mudiamu  
**strand@pdx.edu**  
**Karl Miller Center, 630D**  
**503-725-5726**

The Office of International Partnerships (OIP) is the focal point for all Portland State University international partnerships. PSU is committed to developing robust, multi-faceted partnerships that include transfer & pathway programs, study abroad at PSU, short-term special programs, education abroad for PSU students, collaborative online international learning, alumni involvement, private sector engagements, and scholarly exchange. Linking these opportunities together under the umbrella of a single comprehensive partnership facilitates a rich international experience for PSU students and faculty. OIP manages 293 partnerships in 54 countries and serves as a bridge to connect PSU faculty and staff to international opportunities. OIP also provides robust cultural and institutional expertise to PSU faculty, staff, and international partners seeking to navigate the complex international university landscape.

**Portland Center**

**Director:** Sally S. Mudiamu  
**Karl Miller Center, 630D**  
**503-725-5728**  
**strand@pdx.edu**

www.pdx.edu/portland-center/

In Fall 2018, the Office of International Affairs launched the Portland Center to run programming and support for visiting, non-degree seeking international students at PSU. The Portland Center collaborates closely with the Intensive English Language Institute to offer language and academic support to students from partner institutions wishing to take regular PSU undergraduate classes as part of their home baccalaureate degree. The program accepts students four times per year on a rolling admissions basis and assist students with housing, registration and student support. The Waseda Transnational Program, which has been running for nearly two decades at PSU, has been folded into the Portland Center. Sally Mudiamu will serve as Director, and the Portland Center will be housed in the Office of International Partnerships. The Office of International Affairs is excited about offering this opportunity to institutional partners and their students. It will offer PSU an opportunity to more intentionally meet the needs of short-term visiting international students while simultaneously offering an opportunity to advance the internationalization of the PSU undergraduate curriculum by working collaboratively across units and schools to offer programming that showcases Portland.

**Institute for Asian Studies**

**Director:** Suwako Watanabe  
**suwako@pdx.edu**  
**Karl Miller Center, 6th Floor**  
**503-725-8575**

asians@pdx.edu

www.pdx.edu/asian-studies

The mission of the Institute for Asian Studies (IAS) is to promote understanding of the landscapes, histories, cultures, politics, and peoples of Asia. The IAS leverages the energy and expertise of PSU faculty with deep-rooted and wide-ranging interests in Asia to support research and education about Asia. IAS serves as the center for Asia-related research, teaching, and outreach in Portland and the wider region through academic and cultural programs.

Founded in 1997, IAS provides programming related to Asia including lecture events of both academic and practical nature and cultural events covering a wide range of regional focuses and issues through networking and collaborations with the institutional units and community organizations.
The mission of the Middle East Studies Center (MESC) is to serve our students, city, and world through the creation of a diverse, inclusive community and the promotion and sharing of scholarship on the Middle East, North Africa, and Southwest Asia. The Center was created in 1959 as one of the first two federally supported undergraduate programs for Arabic language and Middle East area studies in the nation. Over the years, the university expanded to offer courses and programs in the four major Middle Eastern languages including Persian, Arabic, Hebrew, and Turkish and programs across different academic disciplines such as International and Global Studies, Political Science, Sociology, History, and Business.

Middle East studies at Portland State boasts a distinguished faculty and vast library resources. The Center serves as a resource on issues pertaining to the Middle East through activities that reach students and scholars, as well as businesses, educators, and the media. In addition, the Center supports academic conferences, workshops, cultural events, and lectures and provides support to area elementary and high school teachers and community college instructors.

The Center's core responsibilities are to coordinate and promote academic and outreach activities across the university and beyond, including conferences, speakers, and training programs for area students, teachers, faculty, and community members. The Center further seeks to guide and train students who plan to make a career in this field. To support these initiatives, MESC closely works with academic and administrative units across campus. As an outgrowth of these core responsibilities, it also conducts outreach activities with local, national, and international educational and community organizations.

Middle East-related degree programs at PSU include:
- Certificate in Middle East Studies
- Certificate in Global Studies
- Major or Minor in Middle East Language with programs in Arabic, Persian, and Hebrew.*

Please take a look at the various activities of our center on our web page and consider becoming a friend of MESC.

* PSU does not currently offer Turkish language courses or the Minor in Turkish. Turkish literature courses may be available.

Fulbright, Boren & Critical Language Scholarships

Director: Debra Z. Clemans
clemansd@pdx.edu
Assistant: Karin Waller
walerk@pdx.edu

Karl Miller Center, Suite 610
https://www.pdx.edu/fellowships/

Fulbright Program

Portland State participates in the Fulbright Program, first founded in 1946 by Senator J. William Fulbright and expanded in 1961 as the Fulbright-Hays Act. Awards available include those offered by the U.S. government, foreign governments, universities, and private donors, and most are managed by IIE, the Institute of International Education. Grants are available to qualified US undergraduate and graduate students and alumni for teaching or advanced research, to qualified faculty for lecturing and research, and to teachers for overseas teacher programs. Non-US citizens also have opportunities through Fulbright.

Grants for US students to Study, Research, or Teach Abroad - Fulbright opportunities for US students are announced annually on April 1 with submission deadlines in late Summer/early Fall. The annual campus deadline is September 8 for awards in the US student program that begin the following academic year. Information sessions are held in Spring term. The director manages PSU's campus interview process and assists applicants throughout the application cycle. https://us.fulbrightonline.org/

University Lecturing and/or Advanced Research - The application deadline for many faculty and professional level programs is late summer each year. This program also sends non-US scholars and researchers from overseas universities to the US. Visit https://www.cies.org/ or contact Debra Clemans to learn about how to invite a scholar from overseas to study, teach, or do research in your department at Portland State University.

Doctoral Dissertation Research Abroad - This Fulbright-Hays program provides grants to colleges and universities to fund individual doctoral students who conduct research in other countries, in modern foreign languages and area studies for periods of six to twelve months. Deadlines vary. Visit http://www2.ed.gov/programs/iegpsddrap/index.html and contact Debra Clemans at clemansd@pdx.edu if you decide to apply.

Fulbright for Foreign Students - Fulbright offers awards to students from outside the US through embassies and Fulbright commissions overseas. To learn more about this
program, visit this site: https://foreign.fulbrightonline.org/
Typically the student should be applying while still living in their home country.

**David L. Boren Scholarships (NSEP)**

Scholarships to undergraduate and graduate students are available through this federally funded program for the purpose of helping more Americans learn the languages and cultures of countries and regions deemed critical to U.S. national security and is managed by IIE, the Institute of International Education. It aims to build a base of future leaders and professionals who can help the United States make sound decisions, deal effectively with global issues, and to enhance and increase the faculty who can educate U.S. citizens toward achievement of these goals. This scholarship includes a service requirement once a student has completed their degree. Applications are due early in winter term each year. Interviews are held on the PSU campus prior to Boren deadlines. Those interested should contact the Boren director listed above for more information on requirements and application details and visit https://borenawards.org/. Information sessions are available during fall term.

**Critical Language Scholarship (CLS)**

The Critical Language Scholarship (CLS) is a program managed by American Councils for International Education that sends current and recent US students (graduate and undergraduate) to other countries as a cohort for immersive summer programs that focus on languages considered critical to US National Security. This fully funded summer program has early November deadlines each year for programs that typically begin in June. Debra Clemans offers info sessions about this program in early Fall. See the site for more info: https://www.clscholarship.org/.
University Library

Michael Bowman, Interim Dean
503-725-5874
library.pdx.edu

The University Library supports students with online and print resources, a variety of study spaces and technology, and research help and instruction. The electronic collections, available at the Library’s website, include thousands of academic resources like journals, books, streaming media, and databases, available online on- and off-campus. The Branford Price Millar Library, located on the west side of the South Park Blocks next to the Viking Pavilion, houses a large collection of books, journals, DVDs, and more. Students will find comfortable study spaces, tables for group work, computer labs, and quiet floors. The Library also loans technology like laptops, iPads, and calculators. Special Collections and University Archives feature unique materials of regional and scholarly interest. PDXScholar, the university’s digital repository, includes PSU theses, dissertations, open access textbooks, and student and faculty scholarly contributions.

Librarians teach classes and workshops on library information and resources. Faculty can use the website to request an instruction session for their class.

The Library encourages students to ask for help with research. Visit the Library Research Center on the Library’s second floor, call 503-725-2399, or contact us by chat, text, or email. Subject librarians are available to consult with faculty and students on in-depth research questions, theses, and dissertations.

To check out materials, visit the Circulation desk on the first floor. A valid PSU ID is required. More information about borrowing materials, loan periods, fines, and renewals is available online.

Course reserves materials may be checked out at the Circulation desk on the first floor. Online course reserves are available via the Library’s website.

The Library provides collaborative study spaces and technology-enabled environments designed to enhance students’ learning experiences. Group study rooms, three practice presentation rooms, and a family friendly study room are available. They can be reserved in advance online. Keys may be picked up at the Circulation desk. The Library also provides designated quiet study floors for individual study.

Food and drinks are allowed. Branford’s Bean, an onsite coffee cart on the first floor, is open during most Library hours.

The Library’s hours vary throughout the year. Visit the Library’s website or call 503-725-5874 for current hours.
University Studies

117 Cramer Hall
503-725-5890
www.pdx.edu/unst
askunst@pdx.edu

Please see University Studies (general education) baccalaureate requirements (p. 32).

The faculty of PSU have designed a four-year program of study required of all students (not required for Liberal Studies or Honors Program) planning to graduate from PSU. This nationally recognized program offers students a clear opportunity to acquire the foundation for the academic and problem solving skills needed to succeed in the 21st century. University Studies offers students a program of connected educational opportunities.

The purpose of the University Studies program is to facilitate the acquisition of the knowledge, abilities, and attitudes that will form a foundation for lifelong learning among its students. This foundation is built on four learning goals which include: building capacity and the propensity to engage in critical thinking, using various forms of communication for learning and expression, exploring and analyzing the broader human experience and its environment, and appreciating the responsibilities of persons to themselves, each other, and their communities.

University Studies begins with Freshman Inquiry, a year-long course introducing students to different modes of inquiry and providing them with the tools to succeed in advanced studies and their majors. At the sophomore level, students choose three different courses, each of which leads into a thematically linked, interdisciplinary cluster of courses at the upper-division level. Students are required to complete 12 credits from one of these clusters. Finally, all students are required to complete a capstone course which consists of teams of students from different majors working together to complete a project addressing an issue in the Portland metropolitan community.

University Studies courses transfer to other institutions. For more information or assistance visit the University Studies website www.pdx.edu/university-studies/transferring-credits or the Office in 117 Cramer Hall.

Freshman Inquiry

See the University Studies Program website (www.pdx.edu/unst) for course descriptions

Freshman Inquiry consists of a year-long course developed by a team of faculty from different disciplines. Freshman Inquiry has a maximum class size of 36 students. Each class is also divided into three small-group, peer mentor sessions led by specially selected upper-division students.

Class material is introduced and explored during the full class sessions and then assignments are developed and discussed in the peer mentor sessions.

While the themes and content of the Freshman Inquiry courses differ, the overall objectives are the same. Each of these classes builds a foundation of communication skills for learning and expression. Writing is the core, but communication also includes emphasis on improving oral, quantitative reasoning, and graphic/visual modes of communication. Freshman Inquiry is also designed to help students learn and effectively use current information technologies. Students will also learn how disciplines from the sciences, social sciences, humanities, and professional schools approach problems in different ways and how they work together to improve understanding of complex issues.

When students complete Freshman Inquiry they will be expected to be able to apply writing, quantitative reasoning, speech, and visual/graphic skills to problems requiring analysis and discovery. Freshman Inquiry will expand awareness of academic potential and prepare students to move onto increasingly rigorous and sophisticated levels of inquiry.

Sophomore Inquiry

See the University Studies Program website (www.pdx.edu/unst) or online schedule of courses for course descriptions.

At the sophomore level, students complete 12 credits of coursework in Sophomore Inquiry. Students select three Sophomore Inquiry classes. Sophomore Inquiry classes are structured similarly to those in Freshman Inquiry with a main class and smaller mentor inquiry workshops, except at this level the mentor classes are led by graduate students. Mentor inquiry workshops focus on weekly learning modules on study skills, writing, technology training, group dynamics, ePortfolio presentation and speech and oral communication.

Sophomore Inquiry classes maintain an interdisciplinary approach to their individual topics, and continue to emphasize the four University Studies goals of inquiry and critical thinking, communication, the diversity of human experience, and ethics and social responsibility. Each Sophomore Inquiry class also provides an introduction to important concepts, questions, and concerns that will be explored in greater depth in the upper-division cluster courses to which it is linked.

Upper-Division Cluster

See the University Studies Program website (www.pdx.edu/unst) for descriptions of upper-division clusters and lists of approved cluster courses.

After their Sophomore Inquiry coursework, students select one of three clusters represented in their Sophomore
Inquiry classes. From a list of courses approved for the selected cluster, students pursue a program of 12 upper-division credits offered by various departments across campus. These classes allow students to explore an aspect of the cluster’s theme in greater depth, while continuing to investigate the four University Studies goals in relation to the cluster topic.

Students might choose a cluster to broaden their perspective, allowing them the opportunity to take classes of interest outside their major, or students can choose a cluster to complement their major area of study. In either event, Upper-Division Cluster courses may not be used to fulfill a student’s major requirement. In addition, students cannot take cluster courses in their major or courses cross listed with their majors.

Beginning Fall 2020, the Registrars Office will begin transcripting Junior Cluster Courses.

**Senior Capstone**

*See the University Studies Program website (www.capstone.unst.pdx.edu) for course descriptions.*

The culmination of the University Studies program is the Capstone course requirement. This 6-credit, community-based learning course is designed to provide students with the opportunity to apply, in a team context, what they have learned in the major and in their other university studies courses to a real challenge emanating from the community. Interdisciplinary teams of students address these challenges and produce a summation product in a University Studies approved Capstone course under the instruction of a PSU faculty member.

The Capstone’s purpose is to further enhance student learning while cultivating critical life abilities that are important both academically and professionally: establishing connections within the larger community, developing strategies for analyzing and addressing problems, and working with others trained in fields different from one’s own.

Independent volunteering, work experience, by arrangement credits, internships and practica cannot fulfill the Capstone requirement. Students must have completed 90 credit hours before registering for their Capstone course. *Students should read and follow the Capstone attendance policy.*
College of the Arts

Leroy E. Bynum, Jr., Dean
Barbara Heilmair, Associate Dean
Lincoln Hall 349
503-725-3105
www.pdx.edu/arts

- B.A., B.S.—Architecture, Art History, Film, Music Performance, Music Theory, Musicology/Ethnomusicology, Sonic Arts and Music Production, Theater Arts
- B.F.A.—Art Practice, Graphic Design
- B.M.—Composition, Jazz Studies, Music Education, Performance, Performance with an Emphasis in Voice
- Certificate in Art History
- Certificate in Dance
- Minor in Architecture; Art History; Art Practice; Dance; Design Management (non-art majors only); Film Studies; Graphic Design; Music; Music History; Theater Arts
- Graduate Certificate in Music Performance
- Graduate Certificate in Public Interest Design
- Graduate Certificate in Urban Design
- M.A., M.S.—Music, Theater Arts (suspended)
- M.M.—Conducting, Jazz Studies, Performance
- M.Arch.—Architecture (2-year and 3-year tracks)
- M.F.A.—Contemporary Art Practice

The College of the Arts prepares talented students for creative careers and lifelong enrichment through intellectual discovery and myriad cultural experiences. Students are challenged to see their work within the artistic and critical traditions that provoke their own creative thinking and to seek interdisciplinary approaches and collaboration in both local and global contexts. Located on the Park Blocks in downtown Portland, the College joins the Portland Art Museum and Portland Center for the Performing Arts in the heart of the city's cultural district. Within blocks of the College, theaters, galleries, professional studios, and design and architectural firms provide a stimulating environment in which our students develop through interactions and internships. The combination of a celebrated faculty and a professional arts community creates exciting undergraduate and graduate programs with rigorous standards in all four Schools within the College—Architecture, Art + Design, Film, and Music & Theater.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for the College of the Arts' undergraduate degrees, go to https://www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Policy on admission to undergraduate programs

Students may declare the major at any time after enrolling at Portland State University, with the exception of Music, which requires admission immediately. Specific application deadlines, criteria for admission and applications are available on respective School websites.

Students transferring from other institutions who want to be admitted formally to a specific degree program must:

- Meet all eligibility requirements.
- Apply for admission to PSU.
- Have one copy of their transcripts sent to the Office of Admissions.
- Apply for program admission to the School of choice (including, if requested, one copy of their transcripts sent to the School of their choice).

Please see individual School websites for more specific admissions information.

DIFFERENTIAL TUITION

Graduate students and upper-division majors in the College of the Arts pay differential tuition—that is, slightly higher rates for more expensive programs—as also shown in the tuition charts online and elsewhere in this Bulletin:

Undergraduate residents $11.40 per credit hour
Undergraduate non-residents $46.00 per credit hour
Graduate residents $47.00 per credit hour
Graduate non-residents $51.00 per credit hour

Graduate students will be charged differential rates upon matriculation.

Lower-division undergraduates (freshmen and sophomores) will not be charged differential rates until they have completed 90 credit hours or passed review to upper-division status. Undergraduate transfer students with 90 or more credit hours will be charged differential rates immediately upon matriculation.

Double majors will be charged COTA differential tuition unless the second major is in another College or program also charging differential tuition (Business, Engineering),
Honors students will be charged both COTA differential tuition and Honors differential tuition.

Upper-division undergraduates changing majors to a COTA program from another School or College will be charged differential tuition.

Upper-division undergraduates changing majors from a COTA program to another College or School must ask their COTA School administrative staff to remove College Code 26 from their record so that COTA’s differential tuition will no longer be charged.

For those who fail to alert their COTA School immediately that they are leaving their major, refunds of differential tuition will only be issued for one term prior to the term in which students do notify the COTA School.

Students changing majors from a COTA School will no longer have access to certain restricted courses.

School of Architecture
235 Shattuck Hall
503-725-8405
www.pdx.edu/architecture/
• B.A., B.S.—Architecture
• Minor—Architecture
• M. Arch: 2-year track and 3-year track
• Graduate Certificate in Public Interest Design
• Graduate Certificate in Urban Design

The architecture program engages students in the fascinating creative questions that pertain to the making of architecture. The program develops the creative identity of each student while nurturing civic responsibility, critical judgment and the representational and technical ability to translate ideas into plausible architectural works. This lies at the core of an educational experience that provides a rich initiation into the world of architectural practice and preparation for a career as a licensed professional. The heart of the program resides in the architecture design studio and is nourished by the accompanying lecture and seminar courses that bring focused study in the humanities, technology, and the profession. Alongside a progressive attitude to design process and theoretical speculation, the program participates in the advancement of knowledge in contemporary issues and technologies of sustainable urban living and environmental stewardship.

In giving place to human situations architecture bears the responsibility of being the most public of the arts and it cannot be practiced meaningfully without a conversation with the community at large. Our design studio classes, in particular, are sustained by an engagement beyond the university to the life-world we share with our urban cohabitants, including direct interaction with the architectural practice community through our adjunct professors, critics, guest speakers and advisers. This fosters the generation of imaginative responses to the challenge of "what ought to be" in the context of "what is".

The educational emphasis of the program encourages students to recognize the value of creative engagement with the prevailing realities of the city as a primary means of cultural transformation, and to perceive Portland as an "urban laboratory" for experimental investigations of contemporary human issues. This takes place through interaction and dialogue with the communities at large and by continual acts of interpretive making with diverse media at multiple scales, including full-size fabrication.

Undergraduate programs
Portland State University encourages the study of architecture at the undergraduate level in the context of a broad and enriching liberal arts education. It is important to understand the place of a specialist or professional knowledge of architecture in relation to its wider cultural setting. Students studying for the undergraduate degree would include those seeking a professional education leading to graduate study and eventually licensure, those seeking careers in design and related fields, and those interested in a liberal arts education focused on architecture.

DEGREE MAPS AND LEARNING OUTCOMES
To view the degree maps and expected learning outcomes for the College of the Arts' undergraduate degrees, go to https://www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS
Admission as an undergraduate is based on general University admission requirements.

ARCHITECTURE B.A./B.S.
Portland State University encourages the study of architecture at the undergraduate level in the context of a broad and enriching liberal arts education. It is important to understand the place of a specialist or professional knowledge of architecture in relation to its wider cultural setting. Students studying for the undergraduate degree would include those seeking a professional education leading to graduate study and eventually licensure, those seeking careers in design and related fields, and those interested in a liberal arts education focused on architecture.
DEGREE REQUIREMENTS

The B.A./B.S. major in Architecture requires the completion of a minimum of 100 credits in addition to the general University requirements for a degree. The required courses are as follows:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arch 100</td>
<td>Introduction to Architecture</td>
<td>4</td>
</tr>
<tr>

</tbody>
</table>

Architectural Design Studios (380 sequence) is based on a competitive review of a student’s academic record, a statement of intent, and a portfolio of creative work. All students must obtain an adviser for academic planning of their program of study. At least one of the Architectural upper-division electives must be taken in the ‘Humanities’ subject area (43x numbered classes). Architecture courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling major requirements.

Students must obtain at least a B-grade in all 100- and 200-level required architecture classes for them to count towards the major. All other classes used to satisfy the major must be graded C- or higher. Students receiving a grade below the minimums in any architectural studio class, or having an outstanding Incomplete (I) in any sequential class, will not be permitted to progress to the next class in the sequence until the minimum grade or higher has been earned in that class, or the Incomplete has been replaced by the minimum allowable grade.

The School of Architecture reserves the right to retain permanently for archival or exhibition purposes any student work executed as part of a School of Architecture instructional program. In addition, the School reserves the right to document, reproduce, and publish images of any such student work in PSU publications, printed or electronic, for the purposes of research, publicity, and outreach, giving publication credit to the student.

Owning a laptop computer system will provide critical advantages in your progress through the Architecture program, especially the ability to work in any of our classrooms or studios. Therefore, all students studying Architecture are required to own a laptop computer that meets minimum system specifications published by the School, including software required for courses in our program. Contact the School office for complete information on our Student Laptop Program, or consult the school website.

ARCHITECTURE MINOR
## REQUIREMENTS

To earn a minor in architecture a student must complete the following 40 credits:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arch 100 Introduction to Architecture</td>
<td>4</td>
</tr>
<tr>
<td>Arch 101 Introduction to Environmental Design</td>
<td>4</td>
</tr>
<tr>
<td>Arch 120 Visual Communication 1</td>
<td>4</td>
</tr>
<tr>
<td>Arch 121 Visual Communication 2</td>
<td>4</td>
</tr>
<tr>
<td>Arch 230 Architecture and Cultural History I</td>
<td>4</td>
</tr>
<tr>
<td>Arch 231 Architecture and Cultural History II</td>
<td>4</td>
</tr>
<tr>
<td>Arch 232 Architecture and Cultural History III</td>
<td>4</td>
</tr>
<tr>
<td>Arch 280 Design Fundamentals Studio 1</td>
<td>6</td>
</tr>
<tr>
<td>Arch 281 Design Fundamentals Studio 2</td>
<td>6</td>
</tr>
</tbody>
</table>

Subtotal: 40

Architecture courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling minor requirements.

Eighteen of the final 24 credits must be taken in residence at PSU.

## Graduate programs

The NAAB accredited professional Master of Architecture at Portland State University encourages substantive investigation of significant urban situations and prevailing architectural issues pertinent to contemporary human experience. It meets the demands of an accredited first professional degree in architecture as determined by the National Architectural Accrediting Board.

Through a series of focused design studios, and courses in humanities, technology and the profession, the program encourages depth in questioning, aptitude in discursive thinking, and versatility in means of representation as each student simulates the skills, knowledge and dexterity to negotiate the professional demands of comprehensive design while developing a mode of creative inquiry that extends beyond established conventions to possibilities yet to be tested in a critical arena. Student generated questions and polemics will form the inspiration for the final year Design Thesis exploration culminating in a unique thesis proposal fully articulated in drawings, models and text.

We offer two tracks towards the Master of Architecture: the 2-year track for candidates with a pre-professional undergraduate degree in Architecture (74 credits); and the 3-year track for candidates with a Bachelor's degree in any discipline (134 credits).

We also offer two graduate certificates: a Graduate Certificate in Public Interest Design consisting of coursework and fieldwork that will prepare future leaders in architecture and related fields to aid currently underserved populations throughout the world through sustainable design methods, with an emphasis on addressing social, economic and environmental issues; and a Graduate Certificate in Urban Design, focusing on the design of urban public space, offered in partnership with the Toulan School of Urban Studies and Planning.

## ADMISSION REQUIREMENTS

To be eligible to enter the 2-year Master of Architecture program a candidate must have completed a 4-year undergraduate pre-professional degree majoring in architecture (BA, BS or BFA), including at least 67.5 quarter credits (45 semester credits) of general education classes. To be eligible to enter the 3-year track a candidate must have completed a Bachelor's degree in any discipline. Admission to the graduate program is based upon satisfaction of the institutional requirements together with competitive application. Submission materials include a portfolio of architectural design and other creative work, a statement of intent, undergraduate GPA, a GRE score, curriculum vitae, and at least 3 letters of recommendation. Please contact the School for detailed application information and deadlines.

Submission materials for the Certificate in Public Interest Design include the above with the statement addressing interest in public interest design and a proposed timeline for completing the Certificate. (A GRE score is not required for the Certificate.) Admission to the Certificate in Urban Design is based on evidence of suitable preparation and the probability of success. See school websites for application criteria and processes. All students wishing to earn the certificates must be formally admitted to the programs via the respective admissions processes.

## ARCHITECTURE M.ARCH: 2-YEAR TRACK

### DEGREE REQUIREMENTS

Students must complete a minimum of 74 graduate level credits including the following:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Arch 530 Contemporary Architectural Theory</td>
<td>4</td>
</tr>
<tr>
<td>Arch 53x Architectural Theory Elective</td>

<td>4</td>
</tr>
<tr>
<td>Arch 584 Design Development Studio</td>
<td>6</td>
</tr>
<tr>
<td>Arch 585 Design Thesis</td>
<td>6</td>
</tr>
</tbody>
</table>
The Master of Architecture program is designed for students intending to become licensed architects and has full professional accreditation with the National Architectural Accrediting Board.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Portland State University, School of Architecture offers the following NAAB accredited degree program in architecture: M.Arch (pre-professional degree + 74 graduate credits). Next accreditation visit for all programs: 2023.

The School of Architecture reserves the right to retain permanently for archival or exhibition purposes any student work executed as part of a School of Architecture instructional program. In addition, the School reserves the right to document, reproduce, and publish images of any such student work in PSU publications, printed or electronic, for the purposes of research, publicity, and outreach, giving publication credit to the student.

Owning a laptop computer system will provide critical advantages in your progress through the Architecture program, especially the ability to work in any of our classrooms and studios. Therefore, all students studying Architecture are required to own a laptop computer that meets minimum system specifications published by the School, including software required for courses in our program. Contact the School office for complete information on our Student Laptop Program, or consult the school website.

Grades of C+ or lower will not count towards meeting Master of Architecture degree requirements. Students are strongly advised to become familiar with the standards for academic accomplishment described in detail in the Graduate Studies section of this bulletin.

ARCHITECTURE M.Arch: 3-YEAR TRACK

DEGREE REQUIREMENTS

Students will enter the program in the Summer term and must complete 4-quarters of graduate transition courses with a minimum of 60 credits followed by the requirements for the 2-year track, for a total of 134 credits to graduate. The transition program includes the following:

Courses

- Arch 522: Architectural Graphics and Media
- Arch 536: Architectural History and Theory I
- Arch 537: Architectural History and Theory II
- Arch 538: Architectural History and Theory III
- Arch 539: Architectural History and Theory IV
- Arch 567: Architectural Structures
- Arch 568: Architectural Technology I
- Arch 569: Architectural Technology II
- Arch 564: Architectural Technology III
- Arch 570: Architectural Design Transition Studio I
- Arch 571: Architectural Design Transition Studio II
- Arch 572: Architectural Design Transition Studio III
- Arch 573: Architectural Design Transition Studio IV

Subtotal: 60

PUBLIC INTEREST DESIGN GRADUATE CERTIFICATE

DEGREE REQUIREMENTS

The course of study for the Certificate in Public Interest Design is divided into credits for coursework and fieldwork, with a minimum of 18 credit hours. Fieldwork will provide students with real world experience in the practice of public interest design through immersed applied-learning opportunities. Fieldwork may be achieved through participation in rotating programs through the Center for Public Interest Design, or through an approved practicum working with a firm or organization engaged in public interest design work. As the culmination of their certificate, students will submit a thorough portfolio of the work they participated in to complete their fieldwork, containing a thoughtful reflection of their
experience within the realm of public interest design and how it can inform their careers going forward.

**URBAN DESIGN GRADUATE CERTIFICATE**

Two things about cities, their design and planning, have become abundantly clear in the early 21st century: first, even at the largest scales, the details matter; second, good policy is important, but it’s not enough to create a great place. Together, these two lessons of the last 100 years of urban placemaking in America have brought new interest and attention to urban design.

What is Urban Design? The term generally means the process for shaping urban growth, conservation and change - making design decisions about individual buildings as well as big plans about the design of streets, public spaces, and collections of buildings. Urban design combines the aesthetic and three-dimensional design skills of the architect with the decision-making, engagement, and management methodologies of the urban planner. What excites the urban designer is the making of memorable and artful places - places that are pleasant to be in as well as go through, places that reflect the uniqueness of different communities.

The Graduate Certificate in Urban Design at Portland State University, a joint effort of the Toulan School of Urban Studies and Planning and the School of Architecture, has been created to offer planners, designers, and architects the opportunity to engage and incorporate in their own work the principles and methods of urban design. It utilizes the Portland-Vancouver metropolitan region as a laboratory, an urban place renowned for its use of urban design and attention to urban design concerns. This certificate is intended for those who are currently seeking an advanced planning or architecture degree, or who are currently employed as a professional planner, architect, or designer.

**COURSEWORK**

The Graduate Certificate in Urban Design consists of five required core courses, for a total of 20-22 SCH (course descriptions can be found in the PSU Bulletin).

**Core Requirements**

**Theory**

</tbody>
</table>
M.Arch candidates only may substitute Arch 585 Design Thesis (6 credits) with an urban design topic for USP 575. Subtotal: 20-22

Application and Admission Requirements

Admission to the Graduate Certificate in Urban Design program is limited to graduate students currently enrolled in either the MURP or M.ARCH programs; graduate students in other programs who have an undergraduate or graduate design degree, those who have completed an undergraduate or graduate design degree, or those who have completed a graduate planning degree from an accredited planning degree program.

In addition, admission to graduate study at Portland State University is granted on the basis of evidence of suitable preparation and the probability of success in the intended field of study. Admission generally requires a minimum of an accredited baccalaureate degree and a GPA which meets university graduate admission standards. Typically, students admitted to graduate study at Portland State have an undergraduate or graduate (minimum of 12 credit hours) GPA of at least 3.0.

If you meet all of these requirements, please visit the websites of either the Toulan School of Urban Studies and Planning (www.pdx.edu/usp) or the School of Architecture (www.pdx.edu/architecture) for more information.

If you are currently admitted to a masters or doctoral program at PSU, in good academic standing, and currently registered for classes, please contact the representatives named below.

For more information, please contact the GCUD coordinators: Aaron Golub, Toulan School of Urban Studies and Planning, agolub@pdx.edu, 503-725-4069; Anna Goodman, School of Architecture, good7@pdx.edu, 503-725-8405.

Course Overlap Between Degrees and Certificates

Graduate courses can be applied to a master's (or a doctoral) degree and a graduate certificate. However, graduate courses cannot be applied to two graduate certificates. See PSU Bulletin for more course overlap information.

School of Art+Design

110 Art Building
503-725-3515
http://www.pdx.edu/art-design

- B.A., B.S.—Art History
- B.F.A.—Art Practice, Graphic Design
- Minors in Art History, Art Practice, Design Management, and Graphic Design

- Secondary Education Program
- Certificate in Art History
- M.F.A. in Contemporary Art Practice (Studio and Social Practice tracks)

Driven by a belief in the power of art to shape society, the School of Art+Design and its dynamic faculty provide a place where emerging artists, designers and art historians can question, create, reflect and learn. The School of Art+Design offers an interdisciplinary course of study for students interested in the ways that art, art history and design serve the expressive aspirations of individuals and communities. Students work directly with faculty to plan and carry out a program of study that connects the history, theory and practices of art and design. Studio-based instruction is joined with lectures, seminars and workshop classes. The culture of the School is one of research, writing, art making, critique and reflection.

SCHOOL ARCHIVAL POLICY

The School of Art+Design reserves the right to retain for archival or exhibition purposes any student work executed as part of a School of Art+Design instructional program. In addition, the school reserves the right to document, reproduce, and publish images and any other media containing such student work in PSU publications, printed or electronic, for the purposes of research, publicity, and outreach, giving publication credit to the student.

Undergraduate programs

DEGREE MAPS AND LEARNING OUTCOMES

Degree maps display the sequence of courses leading to completion of the major or minor. To view the degree maps and expected learning outcomes for Art+Design's undergraduate degrees, go to https://www.pdx.edu/academic-programs/a-z for Art History, Art: Graphic Design, and Art: Practices.

UNDERGRADUATE ADMISSION REQUIREMENTS

Admission to the school is based on general admission to the University. Upper-division coursework is restricted to students who meet requirements established by their major. Review the Graduation Planner and the Art+Design website for further information.
ART MAJOR AND MINOR DEGREE REQUIREMENTS

All students entering the CORE Program are required to own a laptop computer that meets minimum system specifications as well as software required for courses. Those interested in studying graphic design, please review the laptop policy.

ART HISTORY—B.A./B.S.

The study of the history of art enables the student to analyze diverse works of art and to relate artistic production to historical, cultural, and philosophical factors.

Art history is a flexible degree that prepares students for a range of jobs that require strong communication, research, and critical thinking skills.

REQUIREMENTS FOR THE B.A./B.S. IN ART HISTORY

Two of the following three core courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ArH 106</td>

<tr>
<td>ArH 206</td>
<td>Art History: The Modern World</td>
<td>4</td>
</tr>
</tbody>
</table>

Eight 4-credit upper-division art history courses, at least two of which must be seminars: ArH 407, ArH 410, and/or ArH 449.

An additional 16 credits of advisor-approved lower- and/or upper-division courses in art history, art practices, graphic design; courses offered in Architecture, Film, Music & Theater; and/or other select liberal arts courses.

Total Credit Hours: 66

ART PRACTICE—B.F.A.

The BFA in Art Practice is a professional degree that provides students with knowledge and skills that will prepare them for careers as practicing artists and/or further pursuit of the Master of Fine Art degree. The program offers a comprehensive education in visual art practices, applications, theories, and history, with an emphasis on trends in contemporary art. BFA students are required to research, develop, assemble, present, and defend a body of well conceived and executed work.

Cultural History of the Arts - B.A./B.S.

This innovative flexible degree allows students to study the histories of music and art across cultures and time. We explore the important ways cultural history both reflects and shapes society, and by incorporating both musical and art history these connections can be made even more deeper and more nuanced ways.

The B.A. or B.S. in Cultural History requires 60 credit hours total, of which:
minimum 20 credit hours in Music
minimum 20 credit hours in Art History
minimum 52 credit hours need to be upper level courses (300-level or higher)

ArH 401 Advanced Research Workshop and additional research-intensive courses such as a seminar are strongly recommended for all students in this program, and would be taken as part of your upper level course requirement.

Students should note when planning their coursework both that some of the upper level courses they are considering have prerequisites. Additionally, you will not be able to use any of the cluster courses that could be applied towards this major to satisfy the the University Studies cluster requirement.

Course Offerings:

ArH 106 Introduction to Visual Literacy 2
ArH 204 Art History: The Ancient World 4

400-Level Courses

ArH 407 Seminar 0-12
ArH 449 Art History Methods 4
Art 439 BFA Vertical Lab II: Collaboration and Presentation Strategies 4
Art 485 Professional Practices for Artists 2
Art 496 BFA Project I 4
Art 498 BFA Project II 4
Art 499 BFA Oral Review 2

Choose three of the following 4-credit courses (12 credits total):
ArH 205  Art History: The Medieval World  4
ArH 206  Art History: The Modern World  4
ArH 329  Islamic Art: Major Themes and Periods:  4
ArH 337U  Nature into Art  4
ArH 355U  Medieval Monsters  4
ArH 356U  Early Medieval Art and Architecture  4
ArH 357U  Byzantine Art and Architecture  4
ArH 358U  Medicine and Magic in Romanesque Art  4
ArH 359U  Gothic Art and Architecture  4
ArH 360U  The Art of War: Representing the Crusades  4
ArH 381U  19th Century Art  4
ArH 382U  19th Century Art  4
ArH 383  Western Art in the 20th Century  4
ArH 384  Western Art in the 20th Century  4

Des 111  Design Thinking  4
Des 120  Digital Graphics  4
Des 121  Introduction to Type and Design Principles  4
Des 210  Introduction to Type and Design Principles  4
Mus  105  Introduction to Music Theory  3
Mus  203  Music in the Western World  4
Mus  205  Listening I  1
Mus  206  Listening II  1
Mus  231  Survey of Popular Music Since 1950  4
Mus  274  Introduction to World Music  4
Mus  355U  Jazz History  4
Mus  356U  Jazz And American Culture: How History Shaped Our Music, Then and Now  4
Mus  360U  The Guitar: its History and Music  4
Mus  361U  History of Rock Music I (1950-1970)  4
Mus  362U  History of Rock Music II (1970-Present)  4
Mus  363U  The Music of the Beatles  4
Mus  365U  Film Music  4
Mus  366U  New Orleans: Jazz and Culture in the Storyville Era  4
Mus  367U  The Music of Nashville: From Honky Tonk to Hip-Hop  4
Mus  368U  Motown: Detroit’s History and Music  4
Mus  369U  Music and Social Change  4
Mus  374U  World Music: Africa and the Middle East  4
Mus  376U  American Musical Traditions  4
Mus  377U  World Music: Latin America and the Caribbean  4

Note that other upper level architectural, art, film and music history classes offered at PSU might be applied to this degree, if you get prior approval from the Cultural History of the Arts program coordinator.

Total Credit Hours: 60

GRAPHIC DESIGN—B.F.A.

The graphic design program provides a comprehensive education in design principles, applications, theories, history, and practice.

The first two years of study culminate with a required Sophomore Portfolio Review, occurring once each year at the end of the Spring term. All students majoring in graphic design (including students transferring in with lower- or upper-division credits) must pass this review to enroll in 300-level graphic design courses. Visit the School of Art + Design website (http://www.pdx.edu/art-design/) or the graphic design program site (http://psu.gd) for details. Only after successfully passing the review are graphic design majors allowed to continue through the program.

All students majoring in graphic design are required to own a laptop computer that meets minimum system specifications, including software required for courses in the program. The current laptop policy is available for review at

**ART HISTORY—CERTIFICATE**

The Certificate in Art History offers the opportunity for students who have already completed a B.A. or B.S. to undertake an in-depth study in art history through a curriculum centered in small discussion-based seminars and other upper-level coursework.

**DEGREE REQUIREMENTS**

Students who have not already taken the 200-level art history survey sequence or its equivalent elsewhere are encouraged to do so before undertaking the post-baccalaureate certificate upper-level coursework:

Graduate Programs
The School of Art+Design offers a two-year in-residency program in Studio Practice or a three-year flexible-residency program in Social Practice leading to the Master of Fine Arts degree in Contemporary Art Practice. These 90-credit programs prepare the student to be a practicing artist within a regional, national, and international arts community.

GRADUATE ADMISSION REQUIREMENTS
Application for admission to the MFA program must be made by January 8 prior to the fall term in which the student intends to begin work toward the degree.

Applicants must have a B.A., B.S., or B.F.A. degree in Art or a related field. Exceptions may be made for related experience and a solid art history background.

The school application is submitted online. For the most up to date information on the MFA program and its application process please visit our web site www.pdx.edu/art-design.

CONTEMPORARY ART PRACTICES M.F.A.

DEGREE REQUIREMENTS
Working with designated faculty during the first year, students are encouraged to explore new media, models and ideas as they develop a proposal for creative activity that culminates with a graduate project in their final year of the program.

Students are admitted conditionally and must pass a midpoint candidacy review to gain regular admission to the university and continue work toward their degree. (Students in-residency receive a candidacy review at the end of their first year; flexible-residency students are reviewed at the end of their second year.) Students complete 90 credits, distributed in the following way:

- 40 credits Contemporary Art Practice/Directed Studies
- 12 credits Visiting Artist Program/Group Critique
- 12 credits Contemporary Art History/Theory
- 8 credits Electives (outside School of Art+Design)
- 12 credits Graduate Seminars

- 6 credits Exhibition Project/Statement

Upon successful completion of the candidacy review students work with a faculty adviser in their specified concentration to produce their graduate project. The project is presented in a public exhibition or other appropriate form in the spring quarter of the second or third year.

ART EDUCATION: SECONDARY EDUCATION PROGRAM

Grades K through 12 in public schools
Students who plan to teach at the middle- or high-school level should complete a bachelor’s degree in Art or prescribed art foundation/history courses before applying to the College of Education for teacher training in the graduate program.

Prospective teachers should contact an art adviser or the Art Practice Coordinator in the School of Art+Design to secure a departmental recommendation prior to applying to the COE.

Each student’s program is tailored to meet the requirements of the continuing endorsement license. Although licensure requirements are incorporated into degree programs, changes by the Oregon Teacher Standards and Practices Commission during the life of this catalog may alter the requirements. Applicants for licensure must meet the Commission's requirements in force at the time of the licensure application. Please refer to the College of Education requirements (p. 146).

School of Film

www.pdx.edu/film/

- B.A., B.S. in Film
- Minor in Film Studies

Undergraduate Program
The Bachelor of Arts/Bachelor of Sciences in Film is designed to offer students the opportunity to major in a diverse film curriculum that unites professional training in all aspects of film production with a deep understanding of film theory and scholarship. We ask students to engage with material that presents a wide range of academic and artistic challenges through critical thinking and hands-on practice. As such, the School of Film understands itself to work within the scholarly and pedagogical traditions of a liberal arts education, and faculty are committed to providing a strong emphasis on written, oral, and visual expression; critical thinking; and diverse and international perspectives.
DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for the College of the Arts' undergraduate degrees, go to https://www.pdx.edu/academic-programs/a-z.

ADMISSIONS REQUIREMENT

See “Admission requirements (p. 8)” for information on general admission to the University.

FILM B.A./B.S.

REQUIREMENTS

In addition to meeting the general University degree requirements, the major in film will plan a program with a faculty adviser that meets the following minimum requirements:

International Cinemas (8 credits)

- FILM 487 Topics in International Film and the Moving Image

Additional International Cinema electives that are offered within the university are listed on the program website and available from Pathway and School of Film advisors.

Film Curriculum Electives (12 credits)

Any FILM prefix course except FILM 331U Understanding Movies and FILM 130 Introduction to Digital Filmmaking for Non-Film Majors

Additional electives that are offered within the university are listed on the program website and available from Pathway and School of Film advisors.

Subtotal: 80

Courses taken under the differentiated grading option (pass/no pass) will not be accepted toward fulfilling major requirements. Except for FILM 131 and FILM 132, all courses used to satisfy the major requirements must be graded C or above. Majors must be graded at a C+ or above in both FILM 131 and FILM 132. Majors may take FILM 131 and FILM 132 each twice to earn a minimum C+ grade in both to advance to 200-level and upper-division courses.

At least 16 credits of upper-division major courses must be taken in residence at Portland State University.

FILM STUDIES MINOR
REQUIREMENTS

To earn the interdisciplinary minor in film studies, a student must complete 28 adviser-approved film credits to include the following:

Courses
- FILM 131 Film Analysis 4
- Eng 304 Critical Theory of Cinema 4
- 20 elective credits from the Film curriculum with at least 12 carrying numbers 300 or above

Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department minor requirements. All courses for the minor must receive a grade of C or above.

At least 16 credits of film studies courses must be taken in residence at Portland State University. Credits will be applicable to the student’s major when appropriate.

*Students may elect to pursue the film studies minor in the School of Film, English Department or Communications Department, and should consult the School/Department’s film advisor for a complete list of courses that would apply to the minor from offerings in each School/Department. Subtotal: 28

School of Music & Theater
231 Lincoln Hall
503-725-3011
www.pdx.edu/music-theater/

- B.A., B.S. in Music: Musicology/Enomusicology, Music Theory, Performance, Sonic Arts & Music Production (SAMP)
- B.A., B.S. in Theater Arts
- B.M.—Composition, Jazz Studies, Music Education, and Performance
- Minor in Dance, Minor in Music, Minor in Music History, and Minor in Theater Arts
- Certificate in Dance
- M.A., M.S. in Music and Theater Arts (suspended)
- M.M.—Conducting, Jazz Studies, and Performance
- Graduate Certificate in Music Performance

Mission statement

The School of Music & Theater provides professional training and liberal arts-based education to a highly diverse student body. Our primary goal is to generate and sustain an environment of creative inspiration and excellence in creation, practice, and appreciation of the performing arts. Framed by the University's motto "Let Knowledge Serve the City," the School presents a wide spectrum of activities by students, faculty, and guest artists which enhance the artistic and cultural life of the city of Portland.

We offer a comprehensive array of options for emerging artists, with ten distinct undergraduate degrees including five professional options and four distinct graduate programs. Our dedicated faculty are internationally recognized performers, conductors, composers, directors, playwrights, designers, and scholars. The School embraces the dual goals of open access and outstanding achievement to produce graduates who make a significant impact in the performing arts regionally and beyond.

Undergraduate programs

The School of Music & Theater is located within the hub of musical and theatrical activity in the Pacific Northwest, only three blocks from the Portland Center for the Performing Arts. It maintains close ties to the Oregon Symphony, Portland Opera, Portland Jazz Orchestra, Portland Piano International, Portland Youth Philharmonic, Chamber Music Northwest, Oregon Repertory Singers, Artists Repertory Theater, Portland Center Stage, Milagro Theatre, and Third Rail Repertory Theater, among other organizations. Faculty and students alike interact with these performing organizations in various ways.

Students have the opportunity to study with faculty members who are internationally recognized performers, conductors, composers, actors, directors, writers, and scholars. Standards are high as students pursue the conservatory-like Bachelor of Music degree or the more general Bachelor of Arts or Science in Music or Theater. Graduates have consistently demonstrated their excellence in the fields of performance, conducting, composition, acting, writing, production, and scholarship. Many are leaders in music, theater, and education around the Northwest and elsewhere.

Programs in the School of Music & Theater are accredited by the National Association of Schools of Music and National Association of Schools of Theater. Graduates have gained admission to both university graduate programs and professional training programs; they have become teachers and university professors; and they have pursued a range of related professions in the arts, education, business, administration, law, social services, and non-profit management.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for the College of the Arts' undergraduate degrees, go to https://www.pdx.edu/academic-programs/a-z.

ADMISSIONS REQUIREMENT
Admission to the School is based on general admission to the University. (See “Admission requirements (p. 8)” for more information.) Additionally, students seeking a B.A./B.S., B.M., or minor in Music (except for the B.A./B.S. in Theater Arts, the B.A./B.S. in Sonic Arts & Music Production, and the Minor in Music History) need to apply to the School and audition before they are accepted into the music program. See the School of Music & Theater website for application and audition requirements and deadlines.

DEGREE REQUIREMENTS

All courses used to satisfy the School of Music & Theater major and minor requirements, whether taken in the School or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements. Seventy-two (72) upper-division credits are required for all Baccalaureate degrees in the School of Music & Theater. In all degrees where upper division applied music is required, students must pass the mandatory upper division examination.

Admission to the B.M. in Music Education program or the B.M. in Composition program, and the B.A./B.S. in Sonic Arts and Music Production is contingent on a mandatory upper-division portfolio review.

MUSIC: MUSICOLOGY/ETHNOMUSICOCLOGY
B.A./B.S.

Program Coordinator: J. Schiff

Serving students who seek a broad liberal arts degree with a major in music, the B.A./B.S. in Music: Musicology/Ethnomusicology provides a music foundation with an emphasis in musicology within a broad liberal arts framework. Students take advanced coursework in music history and world music and receive direct mentorship from faculty as they complete a final research project. Students successfully completing the B.A. or B.S. in Music: Musicology/Ethnomusicology will have gained the necessary skills in musicology and supportive curriculum to prepare them for continued academic study in the discipline, along with the breadth of knowledge, critical thinking and expressive skills that can be translated to a wide variety of music-related fields and occupations.

REQUIREMENTS

Courses

In addition to meeting the general University degree requirements, music majors seeking the B.A. or B.S. in Musicology/ETHnomusicology must complete the following courses:

Upper-division music electives to be chosen by student in consultation with an advisor

Subtotal: 66

Mus 114 - Mus 116: (concurrent enrollment with Mus 111, Mus 112, Mus 113 required)

Mus 214 - Mus 216: (concurrent enrollment with Mus 211, Mus 212, Mus 213 required)

Music majors must enroll in Applied Music and the appropriate Large Ensemble each term until requirements are met.

In the Spring term of their sophomore year, interested students will submit a letter of interest, writing sample (2500 words), and current DARS report with a minimum cumulative GPA of 3.0.

All candidates for this degree must complete a final project approved by the Musicology Program Coordinator. The
project may be one of the following: 1) Research Paper (15-20 pages), 2) Paper Presentation with Performance, or 3) Video Critique of a current musical event.

**MUSIC: THEORY B.A./B.S.**

Program Coordinator: B. Hansen

Serving students who seek a broad liberal arts degree with a major in music, the B.A./B.S. in Music: Theory provides a music foundation with an emphasis in theory within a broad liberal arts framework. Students take advanced coursework in music theory and receive direct mentorship from faculty as they complete a final analytical or creative project. Students successfully completing the B.A. or B.S. in Music: Theory will have gained the necessary skills in music theory and supportive curriculum to prepare them for continued academic study in the discipline, along with the breadth of knowledge, critical thinking and expressive skills that can be translated to a wide variety of music-related fields and occupations.

**REQUIREMENTS**

In addition to meeting the general University degree requirements, music majors seeking the B.A. or B.S. in Music Theory must complete the following courses:

<table>
<thead>

Mus 114 - Mus 116: (concurrent enrollment with Mus 111, Mus 112, Mus 113 required)

Mus 214 - Mus 216: (concurrently enrollment with Mus 211, Mus 212, Mus 213 required)

Music majors must enroll in Applied Music and the appropriate Large Ensemble each term until requirements are met.

Interested students will submit a sample of their analytical work for admittance to the major after completing Music Theory II or upon transferring to PSU. Students must meet GPA requirement of 3.0 and minimum grades of B in all theory and sight singing/ear training classes.

All candidates for this degree must complete a final project approved by the Theory Program Coordinator. The project may be one of the following: 1) Extensive analysis of a composition or 2) Performance of a composition transcribed from one medium to another.

**MUSIC: PERFORMANCE B.A./B.S.**

Serving students who seek a broad liberal arts degree with a major in music, the B.A./B.S. in Music: Performance provides a music foundation with an emphasis in performance within a broad liberal arts framework. Students receive individualized instruction in applied lessons, participate in large ensembles, and performa culminating recital. Students successfully completing the B.A. or B.S. in Music: Performance will have gained the necessary skills in music performance and supportive curriculum to prepare them for continued academic study in the discipline, along with the breadth of knowledge, critical thinking and expressive skills that can be translated to a wide variety of music-related fields and occupations.

Mus 214 - Mus 216: (concurrent enrollment with Mus 211, Mus 212, Mus 213 required)

Music majors must enroll in Applied Music and the related Large Ensemble each term.

Candidates for this degree must complete a final project consisting of one of the following: 1) Half recital (30 minutes), 2) Performance project, or 3) Regular performances on area recitals.

**SONIC ARTS AND MUSIC PRODUCTION (SAMP) B.A./B.S.**

Program Coordinator: A. Willette

Serving students who seek a broad liberal arts degree with a major in music, the B.A./B.S. in Music: Sonic Arts & Music Production provides a music foundation with an emphasis in music technology within a broad liberal arts framework. Students engage multiple creative contexts including recording, mixing and mastering, working with visual media, live interactive performance, sound installations, and online possibilities. Students successfully completing the B.A. or B.S. in Music: Sonic Arts & Music Production will have gained the necessary skills in music technology and supportive curriculum to prepare them for continued academic study in the discipline along with the breadth of knowledge, creative thinking, and expressive skills that can be translated to artistic, technical, entrepreneurial, and research endeavors.

**REQUIREMENTS**

In addition to meeting the general University degree requirements, music majors seeking the B.A. or B.S. in Sonic Arts and Music Production must complete the following courses:

Mus 377U  World Music: Latin America and the Caribbean  4

Upper-division music electives  7
to be chosen by student in consultation with an advisor.

Subtotal: 66

Interested students will submit two creative projects and a written statement of purpose for acceptance as a SAMP major after completing Contemporary Music Theory and Mus 247 or upon transferring to PSU with equivalent coursework.

THEATER ARTS B.A./B.S.

Area Coordinator: K. Magaldi

Serving students who seek a broad liberal arts degree with a major in theater, the B.A./B.S. in Theater Arts provides students with training in performance, design and production, practice, and dramatic literature and theater history. These basic skills are developed in the core requirements. The remaining credits are met through a selected option, performance, design/production, or theater studies including criticism, literature and dramatic writing, which provides for flexibility and allows a student to specialize in an area of interest.

REQUIRED

In addition to meeting the general University degree requirements, the Major in Theater Arts must complete 68 adviser-approved theater arts credits to include the following:

38 Core Credits

<table>

</tr>
</tbody>
</table>

20 credits of the Theater Electives

20 elective credits from the theater curriculum including Jpn 422, Traditional Japanese Drama, with at least 12 credits at the 300 level or above.

Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements. All courses used to satisfy the major requirements must be graded C or above.

At least 20 credits of upper-division Theater Arts courses, including a minimum of 2 credits from TA 333, TA 334 and TA 335 must be taken in residence at Portland State University.

Subtotal: 68

COMPOSITION B.M.

Area Coordinator: B. Miksch
Serving students who seek a professional degree in music with an emphasis in music composition, the B.M. in Composition provides a thorough music foundation with specialized coursework in composition, analysis, orchestration, counterpoint, and computer music. Students receive individualized instruction in composition lessons and prepare live performances of their music in concerts and recitals. Students successfully completing the B.M. in Composition will have gained the necessary skills in composition and supporting curriculum to prepare them for continued academic study or to pursue professional work in composition, generally with teaching or performing as a secondary area.

REQUIREMENTS

In addition to meeting the general University degree requirements, music majors seeking the professional music degree (Bachelor of Music in Composition) must complete the following courses:

Music majors must enroll in Applied Music and the related Large Ensemble each term. Students must earn 6 credits at each level of Applied Music. With School approval, the distribution of Applied Music credits may be altered; however, a minimum of 12 of the 24 credits must be completed at the upper-division level. A minimum of 3 of the 9 Ensemble credits must be completed at the upper-division level.

Music majors must enroll in the related Chamber Music Ensemble.

NOTE: Applied Music performance (instrumental or vocal) through Mus 290 with 12 accumulated credits is required. Interested students will submit a portfolio of compositions for acceptance as a Composition Major after the Mus 240, Mus 241, Mus 242 sequence. Transfer students may be admitted on the basis of their portfolio of compositions and their transcript. Portfolio review begins in the Spring for the following academic year.

JAZZ STUDIES B.M.

Area Coordinator: G. Colligan

Serving students who seek a professional degree in music with an emphasis in jazz, the B.M. in Jazz Studies provides a thorough music foundation with specialized coursework in jazz performance, improvisation, jazz history, and arranging. Students pursue immersive jazz performance experiences in large ensembles and jazz combos and solo performances in their recitals. Students successfully completing the B.M. in Jazz Studies will have gained the necessary skills and confidence to pursue professional work as a jazz musician.

REQUIREMENTS

In addition to meeting the general University degree requirements, music majors seeking the professional music degree (Bachelor of Music in Jazz Studies) must complete the following courses:

Courses

Mus 114 – Mus 116: (concurrent enrollment with Mus 111, Mus 112, Mus 113 required)

Mus 214 – Mus 216: (jazz section), concurrent enrollment with Mus 211, Mus 212, Mus 213 required.

Music majors must enroll in Applied Music and the related Large Ensemble each term. Students must earn 6 credits at each level of Applied Music. With School approval, the distribution of Applied Music credits may be altered; however, a minimum of 12 of the 24 credits must be completed at the upper-division level. A minimum of 6 of the 12 Large Ensemble credits must be completed at the upper-division level.

Music majors must enroll in the appropriate Chamber Music Ensemble.

MUS I C EDUCATION B. M.

Program Coordinator: D. Glaze

Serving students who seek a professional degree in music with an emphasis in music education, the B. M. in Music...
Education provides a thorough music foundation with specialized coursework in instrumental and vocal methods, conducting, rehearsal techniques, orchestration, and literature. Students train to become music teachers in the K-12 setting and choose between our choral and instrumental music education tracks. Students successfully completing the B.M. in Music Education will have gained the necessary skills to pursue graduate teacher certification and placement as a music teacher in the public school system.

**REQUIREMENTS**

In addition to meeting the general University degree requirements, music majors seeking the professional music degree (Bachelor of Music in Music Education) must complete the following courses:

<table>

Total Teaching Sub-Specialty Credits: 27

Subtotal: 123

**PERFORMANCE B.M.**

Serving students who seek a professional degree in music with an emphasis in performance, the B.M. in Performance provides a thorough music foundation with specialized coursework in classical instrumental performance, keyboard skills, music theory, and pedagogy. Students pursue immersive performance experiences in large ensembles and chamber ensembles and solo performance in their recitals. Students successfully completing the B.M. in Performance will have gained the necessary skills in performance and supporting curriculum to prepare them for continued academic study or to pursue professional work as a performer generally with teaching as a secondary area.

**REQUIREMENTS**

In addition to meeting the general University degree requirements, music majors seeking the professional music degree (Bachelor of Music in Performance) must complete the following courses:

PERFORMANCE WITH AN EMPHASIS IN VOICE B.M.

Program Coordinator: C. Meadows

Serving students who seek a professional degree in music with an emphasis in vocal performance, the B.M. in Performance with an Emphasis in Voice provides a thorough music foundation with specialized coursework in classical vocal performance, diction and language study, and pedagogy. Students pursue ensemble performance experiences in choir and solo performance experiences in opera and their recitals. Students successfully completing the B.M. in Performance will have gained the necessary skills in performance and supporting curriculum to prepare them for continued academic study or to pursue professional work as a vocalist.

REQUIREMENTS

In addition to meeting the general University degree requirements, music majors seeking the professional music degree (Bachelor of Music in Performance with an Emphasis in Voice) must complete the following courses:

Music electives to be chosen by student in consultation with advisor 8

Subtotal: 123

Mus 114-Mus 116: (concurrent enrollment with Mus 111, Mus 112, Mus 113 required)

Mus 214-Mus 216: (concurrent enrollment with Mus 211, Mus 212, Mus 213 required)

Music majors must enroll in Applied Music and the related Large Ensemble each term. Students must earn 6 credits at each level of Applied Music. With departmental approval, the distribution of Applied Music credits may be altered; however, a minimum of 12 of the 24 credits must be completed at the upper-division level. A minimum of 6 of the 12 Large Ensemble credits must be completed at the upper-division level.

Mus 427: Opera Workshop is a one-credit ensemble. Voice majors are required to take Opera Workshop twice.

DANCE MINOR
The Dance Minor has been suspended effective Fall 2017, and no applications are being accepted at this time.

MUSIC MINOR

REQUIREMENTS

To earn a Minor in Music, a student must complete 30 advisor-approved credits (17 credits must be in residence at Portland State University), to include the following:

Courses
Mus 101, 102, 103
Mus 111, 112, 113
Mus 14, 115, 116
Mus 188
Mus 190
Mus 195, 196, 197, or 198
Mus 203, 274, 301, or 302

Any combination of the following for 14 credits:
Mus 191
Mus 192
Mus 193
Mus 194 or 197
Mus 304
Mus 305
Mus 306
Mus 355U
Mus 356U
Mus 360U
Mus 361U
Mus 362U
Mus 374U
Mus 375U
Mus 376U
Mus 377U
Mus 411

Subtotal: 30

Upper-division Music History, World Music, Popular Music, or Jazz History Course
Music Electives

THEATER ARTS MINOR

Program Coordinator: K. Magaldi

To earn a minor in theater arts a student must complete 28 advisor-approved credits to include the following:

Courses
Mus 101
Mus 102
Mus 188
Mus 203, 301, or 302
Mus 304, 305, or 306

Subtotal: 30

MUP 190 Applied Music
Mus 191 Group Lessons for Beginners I: Piano, Guitar or Voice
Mus 192 Group Lessons for Beginners II: Piano, Guitar or Voice
Mus 193 Group Lessons for Beginners III: Piano, Guitar or Voice
Mus 194 or 197 Chamber Music or Chorus
Mus 198 Performance Attendance (3 terms required)
Mus 195 Band, Orchestra, Chorus, or Jazz Lab Band
Mus 190, 191, 192, or 193 Music of the Western World, Introduction to World Music, or Survey of Music Literature
Mus 194 Group Lessons for Beginners II: Piano, Guitar or Voice
Mus 195 Group Lessons for Beginners III: Piano, Guitar or Voice
Mus 196, 197, or 198 Band, Orchestra, Chorus, or Jazz Lab Band

Subtotal: 30

Mus 114 – Mus 116: Concurrent enrollment in Mus 111, Mus 112, and Mus 113 is required.

Students who choose to minor in Jazz Performance will take Applied Music in the Jazz Area, Jazz History, and Jazz Lab Band.

MUSIC HISTORY MINOR

Program Coordinator: J. Schiff

REQUIREMENTS

To earn a Minor in Music History, a student must complete 30 advisor-approved credits (17 credits must be in residence at Portland State University), to include the following:

Courses
Mus 101
Mus 102
Mus 188
Mus 203, 301, or 302
Mus 304
Mus 305
Mus 306
Mus 355U
Mus 356U
Mus 360U
Mus 361U
Mus 362U
Mus 374U
Mus 375U
Mus 376U
Mus 377U
Mus 411

Subtotal: 30

Mus 114 – Mus 116: Concurrent enrollment in Mus 111, Mus 112, and Mus 113 is required.

Students who choose to minor in Jazz Performance will take Applied Music in the Jazz Area, Jazz History, and Jazz Lab Band.

Theater Arts Electives

Theater Arts electives (at least 8 upper-division) 16

Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department minor requirements. All courses used to satisfy the minor requirements must be graded C or above.

At least 16 credits must be taken in residence at Portland State University.

Subtotal: 28

DANCE CERTIFICATE

Admission to the Dance Certificate has been suspended effective Fall 2017, and no applications are being accepted at this time.

Graduate programs

Graduate Coordinator: S. Carlson

The School of Music & Theater offers graduate work in music leading to the degrees of Master of Music (M.M.) in Performance, Master of Music (M.M.) in Conducting, Master of Music (M.M.) in Jazz Studies, as well as a Master of Arts in Music (M.A.) and a Master of Science in Music (M.S.). The M.A./M.S. degrees are general master’s degrees in music. Graduate students in music may also pursue recommendation for standard teaching certification. This curriculum differentiates between specialists in vocal music and instrumental music, but candidates in both areas complete a core of required courses.

ADMISSION REQUIREMENTS

For admission to graduate study the student must hold a bachelor’s degree representing a course of study equivalent to that pursued by PSU undergraduates in music.

Students applying to the M.A./M.S. programs must complete an interview and submit one of the following as part of their application process:

1. History Paper
2. Theory Paper, descriptive analysis or composition.
3. Audition Performance demonstrating mastery at the MUP 490 level.
4. Teaching Certificate.

Students applying to the M.M. in Performance/Conducting/Jazz Studies must complete an interview and audition. See the School of Music & Theater's website at www.pdx.edu/music-theater for specific area requirements.

All Masters Programs

In addition to meeting the general requirements for admission to graduate study in the University, each student must successfully take the music placement examination prepared by and administered in the School of Music & Theater. The placement examination must be passed or the recommended review course must be passed with a grade of B or better before a student may enroll in a graduate history or theory course. All courses used to satisfy graduate requirements, whether taken in the School or elsewhere, must be graded B or above.

MUSIC M.A./M.S. PROGRAM

Serving students who seek a broad graduate degree in music, the M.A./M.S. in Music provides advanced studies in research methods, music theory, music history, literature, pedagogy, conducting, and arranging. Students take applied music in their performance area or in composition and in a secondary performance area. Students pursue a culminating project in performance, composition, pedagogy, musicology, ethnomusicology, or music theory. Students successfully completing the M.A./M.S. in Music will have gained the necessary skills to prepare them for continued study in a doctoral program or to pursue professional work as a teacher, performer, composer, church musician, or related career.

### Education/Pedagogy (chosen with adviser's assistance)

- **Mup 591**: (may substitute Mup 590 credits with adviser approval)

#### One of the following: (2-3 credits)
- **Mus 522**: Advanced Orchestral Arranging 3
- **Mus 523**: Advanced Choral Arranging 3
- **Mus 524**: Instrumental Jazz Arranging I 2

#### One of the following (3 credits)
- **Mus 530**: Song Literature 3
- **Mus 531**: Chamber Music Literature 3
- **Mus 532**: Band Wind Literature 3
- **Mus 533**: Orchestral Literature 3
- **Mus 534**: Choral Literature 3
- **Mus 536**: Opera Literature 3
- **Mus 537**: Keyboard Literature 3
- **Mus 538**: Keyboard Literature 3
- **Mus 539**: Instrumental Literature 3
- **Mus 540**: Jazz Literature 3

#### Three of the following: (6 credits)
- **Mus 560**: Music History: The Medieval Period 2
- **Mus 561**: Music History: The Renaissance Period 2
- **Mus 562**: Music History: The Baroque Period 2
- **Mus 563**: Music History: The Classical Period 2
- **Mus 564**: Music History: The Romantic Period 2
- **Mus 565**: Music History: Early 20th Century 2
- **Mus 566**: Music History: Music Since 1950 2

#### One of the following (determined in conjunction with advisor) (3 credits)
- **Mus 541**: Advanced Conducting Methods 3
- **Mus 542**: Advanced Choral Conducting 3
- **Mus 543**: Advanced Instrumental Conducting 3

- Elective Studies Selected with an Advisor 9-10

**Subtotal: 45**

Students must pass Mus 056, the Music History Entrance Exam, before taking any graduate music history course with the exception of Mus 529, Grad History Review. A grade of B or better in Mus 529 will constitute a Pass for the Music History Entrance Exam. Similarly, students must pass Mus 057, the Music Theory Entrance Exam, before taking any graduate music theory course with the exception of Mus 512, Graduate Theory Review. A grade of B or better in Mus 512 will constitute a Pass for the Music Theory Entrance Exam.

All M.A./M.S. candidates must take a final written examination. All graduate students must receive a grade of B or above in music courses.

### THEATER ARTS M.A./M.S. PROGRAM

**Advisor: R. Wattenberg**

Admission to the MA/MS in Theater Arts has been suspended effective fall 2015, and no applications are being accepted at this time.

### MASTER OF MUSIC M.M. PROGRAM

#### MASTER OF MUSIC IN PERFORMANCE

Serving students who seek a professional graduate degree in performance, the M.M. in Performance provides advanced studies in performance, music history, music theory, literature, pedagogy, and research methods. Students pursue immersive performance experiences in large ensembles and chamber ensembles and solo performance in their recitals. Students successfully completing the M.M. in Performance will have gained the necessary skills to prepare them for continued study in a doctoral program or pursue professional work as a performer generally with teaching as a secondary area.

For an M.M. in Vocal Performance consult the School of Music & Theater for Language Requirement.

**All of the following:**
- **Mus 056**: Graduate Music History Entrance Exam 0
- **Mus 057**: Graduate Music Theory Entrance Exam 0
- **Mup 590**: Applied Music 12
- **Mus 506**: Graduate Project or Recital 2
- **Mus 511**: Music Research Methods 3
- **Mus 520**: Analytical Techniques 3

**Two of the following: (4 credits)**
- **Mus 560**: Music History: The Medieval Period 2
- **Mus 561**: Music History: The Renaissance Period 2
- **Mus 562**: Music History: The Baroque Period 2
- **Mus 563**: Music History: The Classical Period 2
- **Mus 564**: Music History: The Romantic Period 2
Mus 565  Music History: Early 20th Century  2
Mus 566  Music History: Music Since 1950  2

Two of the following: (6 credits)
Mus 530  Song Literature  3
Mus 531  Chamber Music Literature  3
Mus 532  Band Wind Literature  3
Mus 533  Orchestral Literature  3
Mus 534  Choral Literature  3
Mus 536  Opera Literature  3
Mus 537  Keyboard Literature  3
Mus 538  Keyboard Literature  3
Mus 539  Instrumental Literature  3
Mus 540  Jazz Literature  3

One of the following (3 credits)
Mus 581  Pedagogy  3

Chosen with advice of graduate faculty: (3 credits)
Mus 527  Opera Workshop  1
Mus 594  Chamber Music  1
Mus 595  Band  1
Mus 596  Orchestra  1
Mus 597  Chorus  1
Mus 598  Jazz Lab Band  1

Elective Studies Selected with an Advisor  9

Students must pass Mus 056, the Music History Entrance Exam, before taking any graduate music history course with the exception of Mus 529, Grad History Review. A grade of B or better in Mus 529 will constitute a Pass for the Music History Entrance Exam. Similarly, students must pass Mus 057, the Music Theory Entrance Exam, before taking any graduate music theory course with the exception of Mus 512, Graduate Theory Review. A grade of B or better in Mus 512 will constitute a Pass for the Music Theory Entrance Exam.

All M.M. degree candidates must take a final oral examination. All graduate students must receive a grade of B or above in music courses.

Subtotal: 45

MASTER OF MUSIC IN PERFORMANCE (COLLABORATIVE PIANO)

Serving students who seek a professional graduate degree in performance, the M.M. in Performance (Collaborative Piano) provides advanced studies in accompanying, keyboard techniques, diction, music history, music theory, literature, and research methods. Students pursue immersive performance experiences as collaborative pianists working with soloists, chamber ensembles, choir, opera, and large ensembles. Students successfully completing the M.M. in Performance (Collaborative Piano) will have gained the necessary skills to prepare them for continued study in a doctoral program or to pursue professional work as a collaborative pianist.

All of the following:
Mus 590  Applied Music  12
Mus 056  Graduate Music History Entrance Exam  0
Mus 057  Graduate Music Theory Entrance Exam  0
Mus 506  Graduate Project or Recital  1-4
Mus 511  Music Research Methods  3
Mus 520  Analytical Techniques  3
Mus 550  Collaborative Piano Literature Strings  3
Mus 551  Collaborative Piano Literature Winds and Brass  3
Mus 552  Advanced Keyboard Techniques  3
Mus 585  Diction for Singers: Italian  2
Mus 586  Diction for Singers: German  2
Mus 587  Diction for Singers: French  2

Two of the following: (4 credits)
Mus 562  Music History: The Baroque Period  2
Mus 563  Music History: The Classical Period  2
Mus 564  Music History: The Romantic Period  2
Mus 565  Music History: Early 20th Century  2
Mus 566  Music History: Music Since 1950  2

One of the following: (3 credits)
Mus 530  Song Literature  3
Mus 536  Opera Literature  3

Chosen with advice of graduate faculty: (3 credits)
Mus 527  Opera Workshop  1
Mus 594  Chamber Music  1
Mus 595  Band  1
Mus 596  Orchestra  1
Mus 597  Chorus  1

Students must pass Mus 056, the Music History Entrance Exam, before taking any graduate music history course with the exception of Mus 529, Grad History Review. A grade of B or better in Mus 529 will constitute a Pass for the Music History Entrance Exam. Similarly, students must pass Mus 057, the Music Theory Entrance Exam, before taking any graduate music theory course with the exception of Mus 512, Graduate Theory Review. A grade of B or better in Mus 512 will constitute a Pass for the Music Theory Entrance Exam.

All M.M. degree candidates must take a final oral examination. All graduate students must receive a grade of B or above in music courses.
MASTER OF MUSIC IN CONDUCTING

Serving students who seek a professional graduate degree in conducting, the M.M. in Conducting provides advanced studies in conducting, literature, arranging, music history, music theory, score reading, and research methods. Students specialize in choral or instrumental conducting and receive hands-on experience conducting choir, orchestra, or band under the mentorship of our faculty. Students successfully completing the M.M. in Conducting will have gained the necessary skills to prepare them for continued study in doctoral programs or to pursue professional work as a music director working with professional, community, church, or school ensembles.

All of the following:
- Mus 056 Graduate Music History Entrance Exam 0
- Mus 057 Graduate Music Theory Entrance Exam 0
- Mus 506 Graduate Project or Recital 2
- Mus 511 Music Research Methods 3
- Mus 513 Score Reading 3
- Mus 520 Analytical Techniques 3

One of the following (3 credits)
- Mus 522 Advanced Orchestral Arranging 3
- Mus 523 Advanced Choral Arranging 3

One of the following (3 credits)
- Mus 532 Band Wind Literature 3
- Mus 533 Orchestral Literature 3
- Mus 534 Choral Literature 3

Three of the following (9 credits)
- Mus 541 Advanced Conducting Methods 3
- Mus 542 Advanced Choral Conducting 3
- Mus 543 Advanced Instrumental Conducting 3

Mus 541, Mus 542, and Mus 543: May be taken multiple times.

Two of the following (4 credits)
- Mus 560 Music History: The Medieval Period 2
- Mus 561 Music History: The Renaissance Period 2
- Mus 562 Music History: The Baroque Period 2
- Mus 563 Music History: The Classical Period 2
- Mus 564 Music History: The Romantic Period 2
- Mus 565 Music History: Early 20th Century 2
- Mus 566 Music History: Music Since 1950 2

Chosen with advice of graduate faculty (6 credits)
- Mus 595 Band 1
- Mus 596 Orchestra 1
- Mus 597 Chorus 1

Elective Studies Selected with an Advisor 9

Students must pass Mus 056, the Music History Entrance Exam, before taking any graduate music history course with the exception of Mus 529, Grad History Review. A grade of B or better in Mus 529 will constitute a Pass for the Music History Entrance Exam. Similarly, students must pass Mus 057, the Music Theory Entrance Exam, before taking any graduate music theory course with the exception of Mus 512, Graduate Theory Review. A grade of B or better in Mus 512 will constitute a Pass for the Music Theory Entrance Exam.

All M.M. degree candidates must take a final oral examination. All graduate students must receive a grade of B or above in music courses.

Subtotal: 45

MASTER OF MUSIC IN JAZZ STUDIES

Serving students who seek a professional graduate degree in jazz studies, the M.M. in Jazz Studies provides advanced studies in jazz performance, improvisation, jazz history, literature, arranging, pedagogy, and research methods. Students gain valuable jazz performance experience in large ensembles and develop leadership skills working with jazz combos. Students successfully completing the M.M. in Jazz Studies will have gained the necessary skills to prepare them for continued study in a doctoral program or to pursue professional work as a jazz musician generally with teaching as a secondary area.

All of the following:
- Mus 056 Graduate Music History Entrance Exam 0
- Mus 057 Graduate Music Theory Entrance Exam 0
- Mup 590 Applied Music 12
- Mus 506 Graduate Project or Recital 2
- Mus 511 Music Research Methods 3
- Mus 520 Analytical Techniques 3
- Mus 526 Instrumental Jazz Arranging III 2
- Mus 540 Jazz Literature 3
- Mus 567 Jazz History 2
- Mus 581 Pedagogy 3

Mus 520: jazz section

One of the following (2 credits)
- Mus 560 Music History: The Medieval Period 2
- Mus 561 Music History: The Renaissance Period 2
Mus 562  Music History: The Baroque Period  2
Mus 563  Music History: The Classical Period  2
Mus 564  Music History: The Romantic Period  2
Mus 565  Music History: Early 20th Century  2
Mus 566  Music History: Music Since 1950  2

Complete 3 credits from the following: (3 credits)
Mus 594  Chamber Music  1
Mus 598  Jazz Lab Band  1
Elective Studies Selected with Advisor  10

Students must pass Mus 056, the Music History Entrance Exam, before taking any graduate music history course with the exception of Mus 529, Grad History Review. A grade of B or better in Mus 529 will constitute a Pass for the Music History Entrance Exam. Similarly, students must pass Mus 057, the Music Theory Entrance Exam, before taking any graduate music theory course with the exception of Mus 512, Graduate Theory Review. A grade of B or better in Mus 512 will constitute a Pass for the Music Theory Entrance Exam.

All M.M. degree candidates must take a final oral examination. All graduate students must receive a grade of B or above in music courses.

Subtotal: 45

GRADUATE CERTIFICATE IN MUSIC PERFORMANCE

The Graduate Certificate in Music Performance provides students the framework to immerse themselves in applied performance, focusing on private study and ensemble playing. To complement their performance study, students will take additional coursework which can be elected from music literature, pedagogy, history, theory, wellness, and business. This certificate is intended as an alternative for students who have completed an undergraduate degree in music and wish to hone their craft in performance at the graduate level without engaging in the complete curriculum required in a master's degree.

REQUIREMENTS (14 CREDITS)

Mus 506  Graduate Project or Recital  2
MUP 590  Applied Music  6

Six credits of the following ensemble credits, chosen with advice of graduate faculty:
Mus 527  Opera Workshop  1
Mus 528  Opera Production  2
Mus 594  Chamber Music  1
Mus 595  Band  1
Mus 596  Orchestra  1
Mus 597  Chorus  1
Mus 598  Jazz Lab Band  1

ELECTIVES (12 CREDITS)

Any 500-level Music course may count towards the elective requirement.

Recommended Courses
Mus 511  Music Research Methods  3
Mus 512  Graduate Theory Review  3
Mus 529  Grad History Review  3
Mus 545  Business of Music  3
Mus 580  Body Mapping for Musicians: Anatomy, Physiology, Movement and Sensory Awareness  2
Mus 581  Pedagogy  3

Recommended for Instrumentalists
Mus 531  Chamber Music Literature  3
Mus 533  Orchestral Literature  3
Mus 537  Keyboard Literature  3
Mus 538  Keyboard Literature  3
Mus 539  Instrumental Literature  3
Mus 550  Collaborative Piano Literature  3
Mus 551  Collaborative Piano Literature  3

Recommended for Singers
Mus 530  Song Literature  3
Mus 534  Choral Literature  3
Mus 536  Opera Literature  3
Mus 585  Diction for Singers: Italian  2
Mus 586  Diction for Singers: German  2
Mus 587  Diction for Singers: French  2
Mus 590  Fundamentals of Acting for Singers  3

Recommended for Jazz Musicians
Mus 524  Instrumental Jazz Arranging I  2
Mus 525  Instrumental Jazz Arranging II  2
Mus 526  Instrumental Jazz Arranging III  2
Mus 540  Jazz Literature  3
Mus 571  Advanced Jazz Improvisation I  2
Mus 572  Advanced Jazz Improvisation II  2
Mus 573  Advanced Jazz Improvisation III  2

Total Credit Hours: 26

Up to an additional 6 credits of applied music and 3 credits of ensemble can be used towards elective credits for the certificate if the candidate takes more than a year to complete.

Graduate Programs

Accreditation Status

The School of Business and its programs are nationally accredited by AACSB—Association to Advance Collegiate Schools of Business. The School’s accounting program has separate accreditation from the AACSB. Such accreditation means that The School of Business is part of the community of leading business schools that are recognized for their commitment to continuous quality improvement in management education through engagement, innovation, and impact. As an AACSB accredited institution, The School of Business holds itself accountable for improving business practice through scholarly education and impactful intellectual contributions.

Undergraduate programs
The undergraduate program in business administration adheres to the principle that in a free society the business enterprise must be responsibly and efficiently managed. The undergraduate degree program includes both business and non-business courses. The mission of the undergraduate program is to provide students with a broad understanding of business and to equip them with the dynamic skills required to work successfully in a complex and changing global environment.

Special emphasis options are available within the business administration major and are designed to prepare students for positions in accounting, business technology & analytics, advertising, finance, human resource management, management & leadership, marketing, and supply chain management. Business minors include the general business minor, the business minor in social innovation, the property management minor, the business minor in advertising for graphic design majors, and the advertising minor for communications majors. Certificates in entrepreneurship, blockchain, food industry management, the athletic and outdoor industry, property management, international business, and social innovation & social entrepreneurship are also available. The School of Business offers study abroad opportunities at the undergraduate and graduate levels.

The School of Business offers online business concentrations in Business Technology & Analytics, Management & Leadership, Human Resource Management or Supply & Logistics Management and a hybrid degree option for Accounting.

Student Advising
Undergraduate academic and career advisors are located in the Karl Miller Center Suite 220. Students should plan to meet with their advisor at least twice a year to ensure that requirements are being met and to get assistance in their job search preparation.

The School of Business Website, http://www.pdx.edu/sba, contains announcements concerning upcoming activities, scholarships, student
organizations, internships, and career opportunities, policies, and other information vital to all business students.

**Atmos Program**

As the largest and most diverse business school in Oregon, we believe diversity, cultural awareness, and the inclusion of all people is paramount for institutional impact and global change. We believe inclusion and excellence are not mutually exclusive. This belief motivates everything we do. The Atmos program supports diverse and underrepresented minority business students of color and is a promise of academic and community support to help create an avenue for a brighter future.

**DEGREE MAPS AND LEARNING OUTCOMES**

To view the degree maps and expected learning outcomes for the School of Business' undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

**ADMISSION REQUIREMENTS**

Students may declare business administration as their major field of study at any time after admission to Portland State University. However, students must formally join The School of Business before they are allowed to enroll in almost all 200-, 300- or 400-level business administration courses or to graduate with a business administration degree.

To join The School of Business, students must be formally admitted to Portland State University and fill out the School's opt-in form available at www.pdx.edu/business/undergrad-degree-requirements#optin.

BA 101: (waived for post-baccalaureate students)
BA 205: (waived for post-baccalaureate students)

Students can submit the SBA opt-in form anytime during the term, it is available online at www.pdx.edu/business/undergrad-degree-requirements#optin.

**Undergraduate Academic Standing Policy**

A minimum Portland State University cumulative GPA of 2.50 and a minimum GPA of 2.50 in business administration courses taken at Portland State University are required to remain in good standing as a business administration student and for graduation with a degree in business administration. Details on the School of Business Academic Standing Policy can be found online at https://www.pdx.edu/business/undergrad-forms-policies.

**PSU Academic Dismissal**

If a student who has been admitted to the School of Business is academically dismissed by the University, that student will automatically lose School of Business admitted status. If a student who has lost admitted status desires to complete degree requirements for programs in the School of Business, that student must reapply. At the time of reapplication the student must meet the required 2.50 PSU and PSU School of Business GPA requirement.

**BUSINESS ADMINISTRATION B.A./B.S.**

**Requirements for major**

In addition to meeting the general University requirements, the student in business administration must take at least 82 credits in business administration courses of which at least 41 must be taken at PSU. This total will include the business core (52 credit hours if taken at Portland State), at least one option area (20-36 credits, depending on option chosen), and enough business electives to meet the minimum of 82 credits in business. Each student in business must also take at least 90 credits outside the School of Business. A minimum of 180 credits is required for graduation.

**Prerequisite policy**

Prerequisites are strictly enforced in the School of Business and exceptions are not made. Before enrolling in any business course, students should read the course description and must complete any prerequisites that are listed. If a student completes a course before completing the prerequisite and later completes the prerequisite, credit for the prerequisite will not count toward 82 credits required in business. The instructor and/or School's Administration have the authority to administratively drop any student who has not completed the prerequisites.
Students must successfully complete the prerequisite course with a C- or better.

Second Degree Students

Second degree (post-baccalaureate) students will need to meet the requirements for their major. In addition, post-baccalaureate students must request a review of their first degree to determine if they have met the Bachelor of Arts or Bachelor of Science requirements. This can be done by emailing their business advisor with the request for a first degree evaluation. Post-baccalaureate students should plan to meet with an advisor to determine if any of their previous coursework counts towards the business major requirements, to plan out their curriculum, and to discuss career resources.

REQUIREMENTS

Business administration students must complete the following courses with a C- or better:

Accounting

Objective: to enable students to acquire the necessary technical and professional skills for successful careers in public, management, or governmental accounting.

| Actg 335 Accounting Information Systems and Analytic Fundamentals | 4 |
| Actg 360 Management Accounting | 4 |
| Actg 381 Financial Accounting and Reporting I | 4 |
| Actg 382 Financial Accounting and Reporting II | 4 |
| Actg 383 Financial Accounting and Reporting III | 4 |
| Actg 421 Taxation | 4 |
| Actg 430 Governmental Accounting | 2 |
| Actg 492 Auditing Concepts and Practices | 4 |
| Actg 495 Integrated Accounting Issues | 4 |

One upper-division accounting course to be chosen from:

| Actg 422 Advanced Taxation | 4 |
| Actg 445 Forensic Accounting | 4 |
| Actg 460 Advanced Managerial Accounting | 4 |
| Actg 485 Business Law | 4 |
| Actg 490 Advanced Financial Accounting | 2 |
| Actg 493 Advanced Auditing | 4 |
| Actg 407 Seminar | 1-6 |

| Subtotal: 36-38 |

Business Technology and Analytics

Objective: to provide requisite knowledge and skills which enable the student to meet the challenges of working within information-rich business environments.

| Subtotal: 28 |
| Core |
| BTA 350 Business Problem Solving with Analytics and Visualization | 4 |
| BTA 415 Database Management | 4 |
| BTA 419 Business Analytics with Programming | 4 |
| BTA 420 Systems Analysis and Design | 4 |
| BTA 428 Data Privacy, Security and Ethics | 4 |

| Subtotal: 20 |

Electives

The 8 credits of electives can be either: within the Business Technology and Analytics area at the 400 level or from an approved list of courses.

Approved electives:

| Actg 407 Accounting Analytics | 4 |
| Actg 335 Accounting Information Systems and Analytic Fundamentals | 4 |
GSCM 412  Introduction to Enterprise Resource Planning Systems  4  
GSCM 450  Project Management  4  
Mgmt 442  Human Resources Information Systems & People Analytics  4  
Mktg 460  Marketing Research  4  
ISQA 481  Blockchain Fundamentals  4  
And  
BTA 482  Blockchain Fundamentals Lab  2  

Subtotal: 8

Additional electives (including GSCM 410) as approved.

**Advertising Management**

Objective: to provide the knowledge and skills necessary for students to create and execute advertising strategy within the broader context of the marketing function.

School of Business Honors Track

The School of Business Honors Program is a cohort of high performing, dedicated undergraduate business students who want to take core business courses and build lasting relationships with other honors students, build leadership skills, attend monthly professional development workshops that offer opportunities for networking, and give back to the community.

Honors students challenge themselves and polish their professional and academic business skills through a combination of special honors sections of core business courses and enjoy special opportunities to interact with business professionals, including CEOs and other business executives. Successful completion of all honors requirements results in an Honors designation on the student’s diploma.

Requirements for honors track designation include:

- Exclusive access to Honors-only sections for BA 301, BA 311, BA 385, BA 495, and a 1-credit leadership course
- Monthly professional development workshops (during the academic year), including events featuring guest speakers, business executives, and business communication content
- 30 hours of community service
- Cumulative PSU and business major GPA ≥ 3.5 upon completion of degree requirements

For admission to the honors track, students must be degree-seeking undergraduates who are admitted to the School of Business. Applications are evaluated based on GPA, application essays, and recommendation letters. Freshmen are encouraged to apply and will be conditionally admitted until all application materials are submitted at the end of their sophomore year.

Honors program requirements are subject to change. For the most current honors requirements, more detailed application information, and link to apply visit: www.pdx.edu/sba/business-honors-track
BUSINESS ADMINISTRATION MINOR

The School of Business offers a 28 credit minor to students majoring in other disciplines who wish to add a business background to their program of study. The minor emphasizes an applied approach to the basic functional areas of business, including accounting and finance, organizational management, marketing and advertising, and entrepreneurship. It is well-suited for the student majoring in the liberal arts and sciences, architecture, fine and performing arts, engineering, urban and public affairs, or pre-health sciences who intends to work as an independent contractor or operate a small firm or practice.

REQUIREMENTS

Coursework requirements for the minor in business administration are as follows.

Courses
- BA 101: Introduction to Business and World Affairs 4
- Fin 218: Personal Finance 4
- BA 306U: Essentials of Finance for Non-Business Majors 4
- BA 316U: Essentials of Marketing for Non-Business Majors 4
- BA 326U: Essentials of Management for Non-Business Majors 4
- BA 336U: Essentials of Information Technology for Non-Business Majors 4
- BA 346U: Essentials of Entrepreneurship for Non-Business Majors 4

Subtotal: 28

The PSU cumulative GPA and the PSU business GPA must be 2.00 for a student to graduate with the minor.

BUSINESS MINOR IN SOCIAL INNOVATION

The Business Minor in Social Innovation is designed for non-business majors interested in social innovation, social entrepreneurship, and social intrapreneurship as a field of study and career option. The minor teaches a mix of technical skills, such as marketing and finance, and 21st-Century or “changemaker” human skills, such as problem solving and social/emotional intelligence.

COURSE OF STUDY

- BA 101: Introduction to Business and World Affairs 4
- BA 306U: Essentials of Finance for Non-Business Majors 4
- Mgmt 421: Design Thinking for Social Innovation 4
- Mgmt 422: Money Matters for Social Innovation 4
- Mgmt 423: Storytelling and Impact Measurement for Social Innovation 4

Subtotal: 28

BUSINESS MINOR IN REAL ESTATE PROPERTY MANAGEMENT

The Business Minor in Real Estate Property Management is designed for non-business majors interested in real estate property management as a field of study and career option. The minor brings together core business courses and courses specific to real estate property management, to teach a mix of technical skills (marketing/leasing, finance, building maintenance) and people management skills (critical thinking and problem solving, human resource management, and customer service). Completion of the minor prepares students for careers as a real estate property manager, asset manager, as well as real estate lending, brokerage, and appraisal.

REQUIREMENTS

- BA 101: Introduction to Business and World Affairs 4
- BA 306U: Essentials of Finance for Non-Business Majors 4
- BA 316U: Essentials of Marketing for Non-Business Majors 4
- BA 326U: Essentials of Management for Non-Business Majors 4
- BA 332U: Property, Management & Society 4
- Mgmt 432: Multifamily Property Management 4
- Mgmt 433: Commercial Property and Asset Management 4

Total Credit Hours: 28

BUSINESS MINOR IN ADVERTISING FOR GRAPHIC DESIGN MAJORS

The Business Minor in Advertising for graphic design majors provides critical business, marketing and advertising skills to students who plan careers in the graphic design field. The seven courses in the minor provide an applied approach to the basic functional areas.
of business planning, finance, organizational management, marketing and advertising, including marketing’s role in business, consumer behavior, identifying target markets, creative and media strategy development, and promotional campaign planning. All courses must be graded, the minimum passing grade for the Advertising Management Minor courses is a C-.

**REQUIREMENTS**

Interested students should contact their advisor in the School of Business Undergraduate Programs Office to plan out the required courses. Courses in the minor include:

<table>
<thead>
<tr>

Total Credit Hours: 24

**ADVERTISING MINOR FOR COMMUNICATIONS MAJORS**

**REQUIREMENTS**

The Advertising Management minor for communication majors requires 24 credit hours. The objective of this minor is to familiarize communication majors with general business practices and the marketing communications industry specifically. The undergraduate minor’s focus is interdisciplinary, including courses in the School of Business and the communication department. Twenty of these hours will be taken within the School of Business and four credit hours can be a communication or business elective. All courses must be graded, the minimum passing grade for the Advertising Management Minor courses is a C-.

Five required courses:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 316U Essentials of Marketing for Non-Business Majors</td>
<td>4</td>
</tr>
<tr>
<td>Mktg 340U Advertising</td>

**Undergraduate Certificates**

**POST-BACCALAUREATE ACCOUNTING CERTIFICATE**

The Postbaccalaureate Accounting Certificate is a program for students who have earned one or more baccalaureate degrees and who wish to complete the coursework to prepare for a career in accounting. These recommendations include courses in accounting providing professional preparation for public or industry accounting. In addition, courses are recommended in law, basic business, and in other related areas for those whose undergraduate degree is not in business administration.

**PROGRAM PREREQUISITES**

The following must be complete prior to beginning the upper division program requirements:

1. Have earned a baccalaureate degree recognized by the PSU Office of Admissions, Registration and Records and be formally admitted as a post-baccalaureate student to PSU.

2. Have completed the following prerequisite courses with a grade of C- or better:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 211 Fundamentals of Financial Accounting</td>
<td>4</td>
</tr>
<tr>
<td>BA 213 Decision Making with Accounting Information</td>
<td>4</td>
</tr>
<tr>
<td>Stat 241 Application of Statistics for Business</td>
<td>4</td>
</tr>
<tr>
<td>Ec 201 Principles of Microeconomics</td>
<td>4</td>
</tr>
<tr>
<td>Ec 202 Principles of Macroeconomics</td>
<td>4</td>
</tr>
</tbody>
</table>

Subtotal: 20

Note: BA 101 prerequisite for BA 211 is waived for post-baccalaureate students; contact your advisor via email for a registration override to get into BA 211. Contact information for all School of Business Career & Academic
Advisors is available online at www.pdx.edu/sba/career-academic-advising.

REQUIREMENTS

Core
Actg 335  Accounting Information Systems and Analytic Fundamentals  4
Actg 360  Management Accounting  4
Actg 381  Financial Accounting and Reporting I  4
Actg 382  Financial Accounting and Reporting II  4
Actg 383  Financial Accounting and Reporting III  4
Actg 421  Taxation  4
Actg 430  Governmental Accounting  2
Actg 492  Auditing Concepts and Practices  4
Actg 495  Integrated Accounting Issues  4

Additional credits chosen from: (7-8 credits)
Actg 422  Advanced Taxation  4
Actg 445  Forensic Accounting  4
Actg 460  Advanced Managerial Accounting  4
Actg 485  Business Law  4
Actg 490  Advanced Financial Accounting  2
Actg 493  Advanced Auditing  4
Actg 407  Seminar  1-6

Other required credits
BA 303  Business Finance  4
BA 325  Information Literacy & Technical Competence for Business Professionals  4

It is recommended that PBA C Students take ACTG281 to cover debits and credits.

Total Credit Hours: 48-50

At least 30 credits required for the certificate and at least 27 of the credits in accounting must be taken in residence at Portland State University. Candidates must achieve at least a grade of C- in each course presented for the certificate. Entrance and exit GPA requirements are the same as for the School of Business undergraduate program. For retention in the program, grade point averages will be based only on coursework taken in the certificate program.

Post-baccalaureate students who do not hold a degree from a university where the language of instruction was English must satisfy the WR 323 requirement before completion of a certificate program. Students who received an accounting degree outside the United States may earn the post-baccalaureate accounting certificate. Students who received an accounting degree in the United States are not eligible to earn an accounting certificate.

ATHLETIC & OUTDOOR INDUSTRY UNDERGRADUATE CERTIFICATE

From concept to consumer, the Athletic and Outdoor Industry certificate program explores the unique challenges and competitive issues within the athletic and outdoor industry. It is for students who want to go beyond product design and sports management to examine the larger competitive industry issues in marketing, retailing, distribution, and sales. This certificate offers pathways from different majors, offering a diversity of talent and perspectives.

This certificate can be added to majors with approved pathways. School of Business students must complete degree requirements specified for a Business Administration major to be awarded the Athletic & Outdoor Industry Certificate. Non-business majors must complete BA 316U, MKTG 436, MKTG 437, MKTG 375, and two courses from their major.

To be awarded the certificate, non-business students must complete all certificate requirements specified below. Please note that there are different requirements for different majors.

Required Courses (16 credits):
BA 311  Marketing Management  4
or
BA 316U  Essentials of Marketing for Non-Business Majors  4

Mktg 375  Retailing  4
Mktg 436  Competitive Dynamics in the Athletic and Outdoor Industry  4
Mktg 437  Product Management in the Athletic and Outdoor Industry  4

Select two courses from the college/major as listed below (8 credits):

School of Business

Other courses may be substituted with the permission of the program director.
Mktg 338U  Professional Selling  4
or
Mktg 467  Sales Management  4

GSCM 429  Global transportation and Logistics management  4
or
GSCM 439  Global Sourcing and Negotiation  4
Communications Major
Comm 312U Media Literacy 4
Comm 314U Persuasion 4
Comm 445 Risk and Strategic Communication 4

Graphic Design Major
Des 321 Brand Lab 6
Des 408 Workshop 2

Psychology Major
Psy 361 Industrial Psychology 4
Psy 362 Organizational Psychology 4

Textile Arts
Art 313 Textile Design 4
Art 316 Fabric & Form 4
Art 416 Textile Arts Studio 4

Subtotal: 24

Total Credit Hours: 24

BUSINESS BLOCKCHAIN UNDERGRADUATE CERTIFICATE

The objective of the Business Blockchain Certificate is to provide students with knowledge of blockchain and cryptocurrency concepts and an understanding of how these technologies can transform businesses and industries. The program will equip students with the ability to 1) use analytical skills to address technical and business problems, 2) work with distributed ledger technologies, and 3) respond effectively to blockchain-related changes and opportunities in their companies and industries. Because all functional areas of business will be affected by blockchain technology, students from any business undergraduate concentration can strengthen their business knowledge and skill by adding the certificate to their degree programs.

ISQA 481 Blockchain Fundamentals 4
BTA 482 Blockchain Fundamentals Lab 2
BTA 483 Blockchain in Business 4
BTA 484 Blockchain in Business Lab 2
BTA 485 Blockchain Uses and Applications 4
BTA 486 Emerging Topics in Blockchain 2

Subtotal: 18

CONSUMER RETAIL PRE-BACCALAUREATE CERTIFICATE

20-credit certificate program offered to industry professionals in the food, beverage, and consumer packaged goods industry. The goal is to provide opportunities for professionals working in this industry to advance their education and career opportunities.

Apply for the certificate through the School of Business as a non-degree seeking student (including application fee and processing fee). Eligibility requirements include completion and receipt of the Western Association of Food Chains (WAFC) Retail Management Certificate (RMC); at least 5 years of professional industry experience; employer letter of support; and commitment to participate in a 1-credit free orientation program.

Select two courses from the following menu:
Mktg 338U Professional Selling 4
Mktg 467 Sales Management 4
Mgmt 461 Reward Systems and Performance Management 4
Mgmt 464 Contemporary Leadership Issues 4
Comm 220 Public Speaking 4
Stat 241 Application of Statistics for Business 4

Core
BA 316U Essentials of Marketing for Non-Business Majors 4
Mktg 363 Consumer Behavior and Customer Satisfaction 4
or
Mktg 435 Consumer Package Goods Marketing 4
GSCM 310 Introduction to Supply Chain Management of Food and Beverage Systems 4

<td>4</td>
</tr>
<tr>
<td>Emphasis Area Course</td>
<td></td>
<td>4</td>
</tr>
</tbody>
</table>

**Subtotal: 16**

Emphasis Area (choose 1 additional course from below; all prerequisites must be met).

- **Small/Family Business**
  - Mgmt 409 - Practicum: Small Business Consulting (Business Outreach Program) (4 credit hours)
  - Mgmt 404, Mktg 404, Fin 404 - Internship

  Internship options include, but are not limited to:
  - Internship with the Portland State Business Accelerator
  - Internship with a BA 495 Capstone Client (4 credit hours)

- **Innovation**
  - Mgmt 410 - Developing Creativity and Innovation in Business (4 credit hours)

Alternatively, students can select the one additional course from other certificate programs:

- Athletic & Outdoor Industry, Social Innovation, or Food Industry Leadership

Therefore, there will be a total of four courses completed for the certificate: three core and then one chosen by the student to tailor the experience to his/her interest.

Alternatively, students can select the 1 additional course from external certificate programs in Athletic & Outdoor, Social Innovation, the Business of Craft Brewing, or the Food Industry Management Certificate.

Alternatively, students can select the 1 additional course from external certificate programs in Athletic & Outdoor, Social Innovation, the Business of Craft Brewing, or the Food Industry Management Certificate.

**FOOD, BEVERAGE & GOODS LEADERSHIP CERTIFICATE**

The Food, Beverage & Goods Leadership Certificate provides undergraduate students with an educational foundation in the field of retail food, beverage and consumer packaged goods distribution, marketing, and management. Certificate requirements include the study of the overall competitive business marketplace of the retail industry from a cross-industry perspective, consumer trends, trade relationships, supply and logistics issues, retailing and distribution, purchasing and merchandising. Certificate courses include strong industry participation from guest speakers to current case studies.

Business majors must complete degree requirements specified for a business option to be awarded the Food, Beverage & Goods Leadership Certificate.

This certificate can also be added to majors with approved pathways. School of Business students must complete degree requirements specified for a Business Administration major to be awarded the Food, Beverage & Goods Leadership Certificate. Non-business majors must complete BA 316U, MKTG 375, MKTG 435, GSCM 310, and two courses from their major.

To be awarded the certificate, students must complete all certificate requirements specified below. Please note that there are different requirements for different majors.

**Select two courses from the college/major as listed below (8 credits):**

### School of Business

Other courses may be substituted with the permission of the program director.

- Actg 460 Advanced Managerial Accounting | 4
- Mgmt 351 Human Resource Management | 4
- Mgmt 461 Reward Systems and Performance Management | 4
- Mgmt 464 Contemporary Leadership Issues | 4
- Mktg 338U Professional Selling | 4
- Mktg 467 Sales Management | 4

### Communications Major

- Comm 312U Media Literacy | 4
- Comm 314U Persuasion | 4
- Comm 445 Risk and Strategic Communication | 4

### Graphic Design Major

- Des 321 Brand Lab | 6
- Des 408 Workshop | 2
Psychology Major
Psy 361 Industrial Psychology 4
Psy 362 Organizational Psychology 4

Required Courses (16 credits)
BA 311 Marketing Management 4
or
BA 316U Essentials of Marketing for Non-Business Majors 4
GSCM 310 Introduction to Supply Chain Management of Food and Beverage Systems 4
Mktg 375 Retailing 4
Mktg 435 Consumer Package Goods Marketing 4

Total Credit Hours: 24

INTERNATIONAL BUSINESS CERTIFICATE

The International Business Certificate provides undergraduate students with an educational foundation in the field of international business. Certificate requirements include the study of cultural, economic, social, and political aspects affecting business operations.

Students are required to complete degree requirements specified for a business administration option in order to be awarded the International Business Certificate. In addition, students must complete all certificate requirements as specified below.

Requirements

The international business certificate allows students to choose one of two options:

1. Study Abroad Option - Study abroad and take 24 credits of pre-approved internationally related courses.

2. Campus Option - Take 36 credits at PSU of pre-approved internationally related courses.

Abroad Option = 24 credits + Study Abroad

International business requirements (12 credits)
Selected any 12 credits from:
- Fin 456 International Financial Management
- Mktg 376 International Business
- Mgmt 446 International Management
- Mktg 466 Principles of International Marketing
- or other courses approved by advisor.

Language, Area Studies, or International Economics (12 credits)
Select any 12 credits of language, economics, or global perspectives cluster courses
- Language – Any foreign language offered at PSU
- Area Studies – Selected from the global perspectives cluster list or other courses with advisor approval. The area study courses will be upper division and must contribute to the student’s understanding of the area of the foreign language being studied.
- Economics courses selected from: Ec 340, Ec 440, Ec 441, Ec 442, Ec 443, Ec 445, Ec 446, Ec 447, Ec 448, Ec 450 or with approval, other upper division economic courses related to international studies.

Study Abroad or International Internship Experience (No Credit Minimum)
- This requirement can be fulfilled with any PSU-sanctioned study abroad or international internship. Internship must be sponsored for credit by a faculty member of the School of Business.

Campus Option = 36 credits

Language (12 credits)
- Any foreign language offered at PSU - 12 credits of the same language - any level.

Area Studies or International Economics (12 credits)
- Area Studies – Selected from the global perspectives cluster list or other courses with advisor approval. The area study courses will be upper division and must contribute to the student’s understanding of the area of the foreign language being studied.
- Economics courses selected from: Ec 340, Ec 440, Ec 441, Ec 442, Ec 443, Ec 445, Ec 446, Ec 447, Ec 448, Ec 450, or with approval, other upper division economic courses related to international studies.

International Business (12 credits)
Selected from:
- Fin 456 International Financial Management
- Mktg 376 International Business
- Mktg 446 International Management
- Mktg 466 Principles of International Marketing
- or other courses approved by advisor.

REAL ESTATE PROPERTY MANAGEMENT CERTIFICATE
The Certificate in Real Estate Property Management is open to undergraduate business school students and provides students with foundational, industry-specific knowledge in real estate property management. The Certificate introduces students to the fields of both multifamily (apartment) and commercial (office, retail, industrial, etc.) property management and prepares students for entry-level employment in operations and leasing as a property manager, asset manager, and corporate real estate professional as well as other jobs within the commercial real estate sector such as lending, brokerage, and appraisal, to name just a few.

Students are required to complete degree requirements specified for a business administration major in order to be awarded the Real Estate Property Management Certificate.

Total Credit Hours: 19-20

The Social Innovation and Social Entrepreneurship Certificate program is open to undergraduate and graduate students and equips students with the latest tools and approaches to tackle the world's biggest challenges. Together, the four courses in this majority-online program will enable students to deeply examine a social or environmental problem of their choice and design a new business, nonprofit organization, or internal program to address that problem.

Throughout the program, students will be mentored by experienced PSU faculty, learn from practicing social entrepreneurs, work with peer mentors, and interact with leading experts. Courses can be taken in any sequence, with permission. With a focus on leadership and purpose, Impact Entrepreneurs guides students through a transformational learning experience.

Graduate programs

The School of Business offers seven programs leading to master's degrees. The School also participates in the System Science Doctoral Program.

ADMISSIONS AND APPLICATION REQUIREMENTS

Application requirements vary by program. See the website for application criteria.

The entire application process can take up to 8 weeks for domestic students and 12 week for international students (due to foreign transcript evaluation), so it is best to apply early, taking care to ensure everything is completed properly. An admissions coordinator will contact you with a confirmation once your application is received at the Graduate Business Programs Office.
Fall Admission
Application and all supporting documents are due by May 1 for the following graduate business programs:
• The Portland MBA
• The Healthcare MBA
• Joint JD/MBA
• Master of Real Estate Development
• MS in Finance
• MS in Global Supply Chain Management
• MS in Applied Data Science for Business

Application and all supporting documents are due by September 1 for the following graduate certificates:
• Athletic & Outdoor Industry
• Business Blockchain
• Business Intelligence and Analytics
• Global Supply Chain Management
• HR Analytics
• Social Innovation
• Taxation
• Real Estate Investment and Finance

Winter Admission
Application and all supporting documents are due by December 1 for the following graduate certificates:
• Athletic & Outdoor Industry
• Business Blockchain
• Business Intelligence and Analytics
• Global Supply Chain Management
• HR Analytics
• Social Innovation
• Real Estate Investment and Finance

Spring Admission
Application and all supporting documents are due by March 1 for the following graduate business programs and certificates:
• Athletic & Outdoor Industry
• Business Blockchain
• HR Analytics
• Master of Real Estate Development
• MS in Global Supply Chain Management
• Social Innovation
• Real Estate Investment and Finance

Summer Admission
Application and all supporting documents are due by June 1 for the following graduate business programs and certificates:
• Master of Taxation
• Athletic & Outdoor Industry
• Social Innovation
• Taxation
• Real Estate Investment and Finance

DEGREE PREREQUISITE REQUIREMENTS

Master of Finance (MSF)
All applicants need to complete the following introductory coursework prior to admission: Financial Accounting, Managerial Accounting and Statistics. Applicants are also expected to be proficient in computer applications and spreadsheet skills.
See website for details.

Master of Taxation (MT)
In addition to meeting the requirements for PSU and the School of Business, program applicants should meet one of the following four criteria:
• Be a current undergraduate accounting major with a 3.0 or higher GPA in upper division accounting courses and completing their degree matriculation into the MT
• Hold a bachelor's degree in accounting
• Hold a bachelor's degree outside of accounting with a 3.0 or higher GPA in a specified set of upper division accounting courses or
• Hold a J.D. degree.
See website for details.

MASTER OF BUSINESS ADMINISTRATION (MBA)
The MBA is an integrated graduate program focused on leadership, innovation and sustainability. Students master essential technical skills through the Value Chain of Business courses and gain in-depth understanding of the global context of business in the Foundations of Competitiveness courses. In addition, students take a series of Applied Skills and Leadership courses that are integrated based on a set of managerial competencies, skills and perspectives. A highlight of the MBA program is the International Experience, which requires that all MBA
students participate in either a 10-14 day study abroad program or a Portland Metro-based international business experience during their MBA experience.

The MBA is designed to accommodate students with business and non-business undergraduate degrees and is best suited for those who have gained at least two years of industry experience prior to their admission date.

Students may elect to complete the MBA program in either the full-time or part-time evening format. Students are expected to progress through the program with their assigned cohort and follow the schedule of core courses. Both full-time and part-time students may complete optional certificates or other elective courses which are primarily offered during the evenings or online.

The goal of the MBA program is to develop highly effective managers and leaders. Students develop expertise in the technical areas of business, managerial competencies, and the ability to integrate technical expertise with managerial competencies to become effective leaders in organizations. This program seeks to produce future business leaders with an innovative spirit and a commitment to social, economic and environmental stewardship. The core coursework in the MBA program is grouped into three segments for a total of 62 credits: Foundations of Competitiveness, The Value Chain of Business, Applied Skills and Leadership, along with an International Experience.

FOUNDATIONS OF COMPETITIVENESS (16 CREDITS)

These courses provide the student with a deepened understanding of the global and competitive challenges facing businesses today.

Courses
Mktg 513 Pioneering Innovation 4
Fin 515 Economics and Sustainability of the Firm 2
Fin 516 Managerial Macroeconomics 2
BTA 519 Managerial Analytics 4
Mgmt 511 Foundations of Strategy 2
Mgmt 514 Integrated Strategy 2

THE VALUE CHAIN OF BUSINESS (24 CREDITS)

The value chain segment builds an integrated foundation of coursework and provides in-depth knowledge in applied skills related to accounting, finance, management, marketing, and operations.

Courses
Actg 511 Financial Reporting 4
Actg 513 Managerial Accounting and Control 4
Mktg 512 Marketing Strategy 4
Mgmt 512 Organizational Management 4

APPLIED SKILLS & LEADERSHIP (22 CREDITS)

In the MBA program, student's leadership skills are assessed and developed through integrated leadership courses, continuous attention to managerial competencies, skills and perspectives, and one-on-one leadership coaching. Students apply the technical business skills and leadership competencies gained through the MBA program in an intensive immersion experience midway through the program, and in a team-based consulting project with a regional organization.

Courses
BA 521 Leadership Development and Assessment 2
BA 522 Communications for Leaders 1
BA 523 Executive Perspectives on Leadership 1
BA 524 Leadership Immersion 1
BA 525 Capstone Consulting Project 4
BA 526 MBA International Experience 4
BA 527 MBA Domestic Business Experience 4

BA 528 MBA Culture Module 1
BA 529 Building Effective Teams 1
BA 530 Thought Leadership 1
Fin 517 Corporate Governance 2
Mgmt 516 Project Management 2
Mgmt 517 Negotiations for Managers 2

CERTIFICATES: OPTIONAL

See the MBA website for certificate options.

WAIVER POLICY

Students may be eligible for waiver of some required courses in the MBA program. A waiver is based upon the student holding an undergraduate degree (earned within the previous seven years) or an active license in the specific discipline for which the waiver is sought. Specifically, the following courses may be considered for waiver: Actg 511, Actg 513, Fin 515, Fin 516, Fin 517, ISQA 511 and Mgmt 512. A student can waive a maximum of 13 credit hours from the courses above only, thus reducing the required number of hours in the degree program. Students must apply for waivers during the summer prior to entering the program.
FINANCE OPTION

The Finance option offered in conjunction with the MBA creates an opportunity to develop a concentrated skill set within the finance area. This option provides students the skills to understand complex financial issues as well as experience in the application of financial tools that facilitate problem solving. Students must choose electives from the approved Finance option elective list.

IMMERSIVE EXPERIENCE

A highlight of our program is the Immersive Experience (IE) required for all MBA students. The primary goal of the IE is to provide a first-hand experience of the opportunities and challenges of competing in a global marketplace. The IE is also designed to enhance cultural knowledge and enhance students’ global mindsets in order to gain a global perspective. The IE requires either a 10- to 14-day immersion in a foreign country (BA 526) or a locally-based domestic business experience (BA 527) which may be available to students who petition for an approved exception to the international travel requirement. Students must complete at least their first year of the MBA core curriculum before participating in the IE or the domestic business experience.

Shared Master’s Credits

Admitted students in good standing may apply to use shared master’s credits between the MBA and MS GSCM degrees. For details contact the Academic Advising Team.

APPLIED DATA SCIENCE FOR BUSINESS (M.S.)

The online Master of Science in Applied Data Science for Business (MSADSB) focuses on the needs of business leaders to understand digital transformation and the importance of data science across functional areas. In addition to the core curriculum, students must complete at least 1 approved certificate plus additional credits from any of the other approved certificates or electives to complete a minimum of 45 credits. The core curriculum imparts the business fundamentals of accounting and strategy; the critical business implications of digital transformation and the organizational change that it will necessitate; the regulatory, ethical, and cybersecurity imperatives governing digital transformation; and an introduction to technical skills.

Core

22 core credits, or 24 core credits if a data visualization course is not offered in chosen certificate.

Mgmt 518  Digital Transformation of Business  4
Mgmt 519  Digital Transformation: Security, Privacy & Ethics  4
Mgmt 520  Leading Organizational Change During Digital Transformation  4
BTA 522  Special Topics in Data Science, Technology for Business  2
BTA 523  Special Topics in Data Science, Machine Learning Applications for Managers  2
GSCM 512  Global Managerial and Cost Accounting  4
GSCM 520  Global Supply Chain Strategy  2
ISQA 521  Data Visualization is required in core if no data visualization course in chosen certificate.

Actg 511 could substitute for GSCM 512.
Mgmt 511 could substitute for GSCM 520.

Certificate

If ISQA 521 Data Visualization is not taken in the core, then a minimum of 23 credits must be taken from at least 1 approved certificate, with the balance of credits taken from any of the other certificates or elective courses approved by the Academic Director.

If ISQA 521 Data Visualization is taken in the core, then a minimum of 21 credits must be taken from at least 1 approved certificate, with the balance of credits taken from any of the other certificates or elective courses approved by the Academic Director.

The following graduate certificates approved for the Master's program are:

• Human Resources Analytics (p. 129) (18 credits)
• Business Intelligence & Analytics (p. 129) (21 Credits)
• Business Blockchain (p. 128) (18 credits)
• OHSU Health and Clinical Informatics Certificate (24 credits)

Total Credit Hours: 45

HEALTHCARE MBA

The Healthcare MBA is a joint degree program offered by Portland State University’s School of Business and the Oregon Health & Science University’s School of Medicine. The Healthcare MBA is offered in a part-time, two-year format. Courses are online with two required residencies per year. Students in this program learn the knowledge, skills, and tools to function as effective managers and leaders in healthcare organizations. Specifically, graduates will be able to:

• Analyze the complex healthcare system across critical domains and scales.
Apply analytic frameworks to complex and ambiguous environments to create evidence-informed recommendations.

Use awareness of self and others to lead and manage in complex organizations.

Communicate with clarity and brevity, as appropriate to the audience and content.

The curriculum consists of 63 credits of courses and is arranged in thematic categories: Healthcare System, Leadership, Operations and Quality, Business and Financial Planning, and Application Projects and Capstone. Courses balance theory and knowledge with practical application. Healthcare is thoroughly integrated throughout the curriculum; however, where appropriate, attention will be called to best practices in other industries that could be beneficial in healthcare. Faculty are a blend of OHSU and PSU faculty and healthcare practitioners. The student cohort is comprised of individuals in roles across the healthcare spectrum, including those serving in direct patient care capacities as well as those in administration; students represent large and small healthcare systems, clinics, government, biotech industry, pharmaceuticals, research, medical device companies, and many more.

FINANCE M.S. (MSF)

The Master of Science in Finance (MSF) is an accelerated program that provides students the skills and knowledge required to start or advance a career in finance. The curriculum is designed to develop forward-thinking professionals with sharp analytic minds, effective communication skills, and the necessary vision to apply financial analysis skills in a wide variety of business situations. Business and non-business students will benefit from the depth and integration of the curriculum.

Students may take courses on a full-time or part-time schedule. Full-time students can complete the program in one year and part-time students can complete it in two years. Most classes are in the evening.

**REQUIREMENTS**

Successful completion of the MSF requires 49 credits.

Waiver Policy

Students may be eligible for waiver of required courses in the MSF program. A waiver is based upon the student holding an undergraduate degree (earned within the previous seven years) in the specific discipline for which the waiver is sought. Specifically, the following courses may be considered for waiver: Fin 516, Actg 550 and BA 522. A student can waive a maximum of 4 credit hours, thus reducing the required number of hours in the degree program. Students must apply for waivers.

*See MSF program website for a list of approved electives. Other courses can qualify as elective credit if pre-approved by the Academic Director.

GLOBAL SUPPLY CHAIN MANAGEMENT M.S. (MS GSCM)

The MS GSCM is a 45-credit-hour program that can be completed in six terms on a part time basis. This is an online degree that will start with a residency weekend orientation program. The program objectives are to prepare students to design and manage an effective and efficient global supply chain; understand and apply supply chain analytics; conduct demand forecasting, aggregate planning, and sales and operations planning for a supply chain; understand the implications of supply chain initiatives in terms of key financial performance metrics; utilize sustainability-based initiatives and/or circular economy model, including closed-loop processes, to lessen the social and environmental impact of supply chains; assess fundamental dimensions of supply chain strategy, social and environmental responsibility, innovation, transformation and organizational leadership.

The end goal of the MS GSCM is to prepare global leaders in developing strategies that support markets and innovation in a sustainable and efficient manner.

Total Credit Hours: 45

REAL ESTATE DEVELOPMENT MASTER (MRED)

The Master of Real Estate Development (MRED) is a professional degree, training students in the areas of real estate development within the context provided by principles of sustainability, social equity, and community-based development. By its nature, real estate education is multi-disciplinary, involving finance, urban planning, architecture, law, engineering, design, appraisal, and other disciplines. To deliver this education, the MRED degree is a joint degree of the School of Business Administration and the Toulan School of Urban Studies and Planning.

The objective for this program is to provide a unique and exceptional graduate degree that will enable students to
assist in the development, management and financing of property with an understanding of the role that such development plays in the context of broader community concerns and history, and in the context of the surrounding neighborhood and city. Students will work closely with high-level industry professionals in their classes and workshops.

The MRED degree is designed to accommodate students with a wide variety of undergraduate degrees and is best suited for students who have gained at least two years of industry experience prior to their admission date. The MRED program is designed to be completed in 12 months on a full-time basis or 24 months on a part-time basis. Full-time students are admitted for fall term only. Students will develop their skills in three areas: sustainable and equitable urban development, finance and policy, and project development, leading to the Real Estate Development Workshop culminating experience.

**REQUIREMENTS**

Students will develop their skills in three areas: sustainable urban development; real estate finance, markets and law; and project development, leading to the Real Estate Development Workshop culminating experience.

**REAL ESTATE DEVELOPMENT WORKSHOP**

The culminating experience of the MRED is RE 562 Real Estate Development Workshop. Students in this class form a team that produces a development proposal for a multi-block site in a major city, advised by local industry professionals. Each team will produce a professional report and present their findings before an audience of real estate professionals.

**MASTER OF TAXATION (MT)**

The Master of Taxation (MT) provides the specialized tax knowledge and skills required to start or advance a career as a tax professional. The foundation of the curriculum is the immersion of students in primary source authority, such as the Internal Revenue Code, Treasury regulations, and judicial and administrative authority. Skill development is focused on strengthening analytical, research, and written and oral communication skills. The program is designed to develop the tax expertise of a wide range of students, including current undergraduate accounting majors with a 3.0 or higher GPA, in their upper division accounting courses, bachelor degree holders outside of accounting that complete a specified set of upper division accounting courses with a 3.0 or higher GPA, bachelor degree holders in accounting currently employed in a tax-related field, and holders of a J.D.

The MT is a 45-credit-hour program, with cohorts starting in Summer term, which can be completed over 12 months (full-time) or 24 months (part-time). The program is a hybrid of in-class and online content: each course begins with a live on-campus class on a weekend at the start of each term and continues online thereafter, with both synchronous and asynchronous interactions among faculty and students. Faculty for the MT program are drawn from Portland State University and both local and nationally recognized professionals with expertise in specialized areas of taxation.

**REQUIRED TAXATION CORE COURSES**

The MT program requires a minimum of 45 credits.

**TAX ELECTIVES***

Students will complete twelve credits from the following courses:

- MTax 535  State and Local Taxation  4
- MTax 536  International Taxation  4
- MTax 539  Taxation of Estates, Gifts, and Trusts  4
- MTax 540  Practicum/Internship  4
- Actg 553  Financial Statement Analysis  4

*Subtotal: 12 Credits

**Graduate Certificates**

**ATHLETIC & OUTDOOR INDUSTRY GRADUATE CERTIFICATE**

The Athletic & Outdoor Industry Graduate Certificate provides students with a tool kit and an understanding of the culture, process, terminology and what it takes to succeed in a hyper competitive industry. The A&O Industry Graduate Certificate will help students prepare for careers in the A&O industry or help them advance their career by providing an overview of a go-to-market strategy, and help them expand their network of industry contacts.

The program differentiates itself with strong industry engagement. Industry professionals actively participate in the classrooms as teachers, guest speakers and mentors offering tangible examples and insights.

The A&O certificate was designed as a complement to a School of Business graduate program including the MBA, MSGSCM, or MSF. It can be taken as a stand-alone; priority is given to students enrolled in School of Business graduate programs.

**REQUIREMENTS**

Industry or related experience or education is strongly preferred.

**Courses**

- Mktg 514  Selling and Sales Leadership  4
- Mktg 534  Advertising and Brand Management  4
- Mktg 536/Mktg 536S  Athletic and Outdoor Marketing  4
- Mktg 537/Mktg 537S  Product Management in the Athletic and Outdoor Industry  4

**Electives***

Choose one course from the following:

- GSCM 511  Principles of Strategic Global Sourcing  4
- GSCM 516  Global Supply Chain Forecasting and Production Planning  4
- ISQA 511  Sustainable Operations Management  4
- BTA 519  Managerial Analytics  4
- Mktg 513  Pioneering Innovation  4

Enrollment in electives is based on space and availability.

*MBA students will need to choose an elective class that is not currently required as part of the MBA program. Specifically, they will choose from Forecasting and Production Planning (GSCM 516) or Principals of Global Sourcing (GSCM 511).

**BUSINESS BLOCKCHAIN GRADUATE CERTIFICATE**

The objective of the Business Blockchain Certificate is to provide students with knowledge of blockchain and distributed ledger concepts and an understanding of how these technologies can transform businesses and industries. The program will equip students with the ability to 1) use analytical skills to address technical and business problems, 2) work with distributed ledger technologies, and 3) respond effectively to blockchain-related changes and opportunities in their companies and industries. Because all functional areas of business will be affected by blockchain technology, students from any business undergraduate concentration or business graduate program can strengthen their business knowledge and skill by adding the certificate to their degree programs.

**Courses**

- BTA 581/BTA 581S  Blockchain Fundamentals  4
- BTA 582/BTA 582S  Blockchain in Business  4
- BTA 583/BTA 583S  Blockchain in Business Lab  2
- BTA 584/BTA 584S  Blockchain Uses and Applications  4
- BTA 585/BTA 585S  Blockchain Fundamentals Lab  2
GRADUATE CERTIFICATE IN REAL ESTATE INVESTMENT AND FINANCE

The Graduate Certificate in Real Estate Investment and Finance will provide students specialized knowledge concerning analyzing real estate investments, including core finance concepts, pro-forma modeling, valuation of real estate assets, and assessment of market demand. The Certificate will prepare students for careers in corporate real estate, underwriting, investment analysis, and appraisal or valuation.

REQUIRED COURSES

RE 521 Real Estate Finance I 4
RE 522 Real Estate Finance II 4
RE 539/RE 539S Real Estate Valuation I 4
539S
RE 548 Real Estate Market Analysis 3

Subtotal: 15

MRED students must find a 4-credit substitute for RE 522.

ELECTIVES

Choose one course from the following list:
Actg 511 Financial Reporting 4
Actg 550 Advanced Financial Reporting 4
RE 523 Real Estate Investment Analytics 4
RE 533/RE Commercial Property and Asset 4
533S Management
USP 596 Affordable Housing Finance 3

Subtotal: 3-4

BUSINESS INTELLIGENCE AND ANALYTICS GRADUATE CERTIFICATE

The Certificate in Business Intelligence and Analytics (Grad Cert BIA) is designed to meet the growing demand for advanced data analysis and communication skills. These skills will permit graduates to optimize the interconnection of devices, analyze large quantities of data, and harness information into useful decision-making models.

This certificate is intended for those who want to optimize their quantitative skills and develop the competence required to communicate data driven decisions within their organizations. The Grad Cert BIA graduate will be able to analyze ever growing quantities of data and contextualize this information through four areas of study; engineering management, systems science, mathematical statistics, and business communications.

Courses
ETM 538 Decision Support Systems: Data Warehousing 4
ETM 540 Operations Research 4
Stat 564 Applied Regression Analysis 3
SySc 531 Data Mining with Information Theory 4
BTA 520 Introduction to Business Intelligence and Analytics 4
BTA 521 Data Visualization 2

Subtotal: 21

ETM 538, ETM 540, Stat 564, and SySc 531 may be taken in any order but are prerequisites for ISQA 520; ISQA 520 is a corequisite to ISQA 521.

GLOBAL SUPPLY CHAIN MANAGEMENT GRADUATE CERTIFICATE

The G SCM certificate is designed as a standalone certificate for working professionals with significant work experience in business operations to gain an academic credential for advancement in their career. The certificate is also available to MBA students.

CORE COURSES

GSCM 511 Principles of Strategic Global Sourcing 4
GSCM 513 Principles of Strategic Global Logistics 4
GSCM 521 Global Information, Systems and Data Analytics 4

Subtotal: 12

ELECTIVES

Choose one of the following:
GSCM 517 Supply Chain International Field Study 4
GSCM 572 Business Analytics II 4
GSCM 5XX* 4

Subtotal: 4

*Other G SCM course approved by the Academic Director.

Total Credit Hours: 16

HUMAN RESOURCE ANALYTICS (HRA) GRADUATE CERTIFICATE
A growing number of organizations use human resource analytics (HRA) to inform and support strategy and to maintain a competitive advantage. Yet, a talent shortage has emerged, leaving many organizations searching for individuals who understand how to apply and implement HR analytics. The objective of the HRA Graduate Certificate is to address this talent shortage by developing knowledge and skills in HR analytics. Through hands-on application of data management, analysis, and visualization, using tools such as R and Tableau, HR professionals and graduate students with an interest in HR will learn how to answer HR questions using data and to grow an organization’s HR analytics capabilities. By the end of the certificate, students will be able to choose and implement appropriate data-analytic tools; follow ethical and legal standards; and improve critical organizational functions, such as staffing, learning and development, performance management, and retention.

CERTIFICATE REQUIREMENTS

The HRA Graduate Certificate is an 18 credit program.

REAL ESTATE DEVELOPMENT CERTIFICATE

Administered by the College of Urban and Public Affairs (p. 371) (CUPA). A concentration centering on issues of property development, finance and real estate, and housing economics.

SOCIAL INNOVATION AND SOCIAL ENTREPRENEURSHIP GRADUATE CERTIFICATE

Portland State University’s social innovation and social entrepreneurship certificate equips you to bring meaning and purpose to your career in business or nonprofit leadership by training you to create practical, effective solutions to social and environmental challenges.

Whether you’re a social entrepreneur starting something new, or an intrapreneur inside a mission-driven organization, this program can prepare you with the experience and skills to innovate. You can either design a new social venture—nonprofit, business, government program or advocacy campaign—to address an issue that matters to you, or evaluate and suggest improvements to an existing organization of your choice.

TAXATION GRADUATE CERTIFICATE

The Graduate Certificate in Taxation (GCT) allows accounting majors, and current practitioners, the opportunity to further their tax education. This program is aimed at recent accounting graduates seeking a limited number of graduate tax classes to prepare for entry into tax careers as well as practicing attorneys, accountants and other tax professionals seeking expertise in selected areas of taxation. Tax practitioners (including accountants and attorneys) often focus their practice to specific areas of taxation. The GCT allows a focused approach whereby only certain areas of taxation are targeted for study, allowing for an efficient use of time and financial resources in meeting needed educational requirements.
The GCT places emphasis on a thorough grounding in tax research and writing, and then allows students to further design a specific course of study focusing on their area of interest (e.g. corporations, state and local tax, international tax, trust, estate and gift, etc.).

**REQUIREMENTS**

The GCT is a 20 credit program; a 4-credit required course and 16 credits of elective courses.

**Required**

Graduate Programs

- Initial and Continuing Licenses
- Early Childhood Education
- Elementary Education
- Middle Level Education
- High School Education—in cooperation with appropriate departments
- Specialist Programs—Administrative Studies (P-12); Postsecondary, Adult and Continuing Education; Counselor Education (options: School, Clinical Mental Health, Clinical Rehabilitation, Marriage, Couple and Family); Literacy Education; Special Education, ESOL/Bilingual Education
- M.Ed., M.A., M.S.—Education
- M.A.T., M.S.T.—In cooperation with appropriate departments
- Ed.D.—Educational Leadership (Options: Administration; Curriculum and Instruction; Postsecondary Education; Special Education)

The College of Education (COE) has a wide range of comprehensive programs leading to degrees and licensure. It is authorized by the Oregon Teacher Standards and Practices Commission to recommend teacher education and specialist candidates for both initial licenses and added endorsements.

COE programs are fully accredited by the Council for the Accreditation of Educator Preparation (CAEP) and by the Oregon Teacher Standards and Practices Commission (TSPC). Counselor Education programs are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Although licensure requirements are incorporated into degree programs, changes by the TSPC during the life of this catalog may alter the requirements. Applicants for licenses must meet the TSPC requirements and license application.†

† Because licensure rules are controlled by the Oregon Teacher Standards and Practices Commission, it is possible that licensure requirements may change. All persons expecting to be recommended for initial (preliminary) or continuing (professional) licenses should consult with an adviser or contact the College of Education Licensure Office, 503-725-4758.

COE Vision: Educators and counselors create a just and equitable world.

COE Mission: We empower educators and human services professionals to engage in visionary thinking and transformative practices within schools and communities.

COE Values:

- Inclusiveness: we are welcoming and equity focused.
- Responsiveness: we mindfully serve our students and communities
- Engagement: we are connected and collaborative partners
- Creativity: we are innovative and create knowledge
- Impact: we are data-driven, process-oriented, and accountable

From the Pacific Northwest, the PSU College of Education serves the world through comprehensive offerings that educate a large and diverse student body for careers in teaching, counseling, and educational leadership:

- We educate graduate students, undergraduates, current practitioners, returning students, and those who are changing careers
- Our research connects us to a community of scholarship and positively impacts teaching and learning
- Our focus on inclusive excellence draws students to the PSU College of Education

Undergraduate programs

Undergraduate students interested in pursuing a career in teaching should refer to the “Teacher Preparation (p. 310)” section in this catalog for information regarding recommended preparatory programs for elementary and secondary teachers.

SPECIAL EDUCATION B.A./B.S.

In addition to meeting the general University requirements, the student must complete a minimum of 75 credits in the following special education courses.

**Transfer Policy for the Special Education Major Requirements in the BA/BS in Special Education**

Students must complete a minimum 64 Special Education major requirements at PSU. These are the Special Education courses completed during the junior and senior years.

**CAREER AND COMMUNITY STUDIES CERTIFICATE**

The programmatic focus of this pre-baccalaureate certificate is to develop knowledge and competencies for adult life and employment through inclusive academic, career development/employment, and social/community engagement experiences. Each student's CCS certificate program of study begins with a person-centered planning (PCP) meeting that includes: a) the student's choices of coursework to take, finding/maintaining paid employment and getting involved on campus; b) identification of needed individualized support services for college success (e.g., advising, individual learning plans (ILP) for college courses, academic coaching, career development and employment supports, etc.) and c) prepare for the start of college life. Each year across the 4-year college experience, students will participate and eventually lead their PCP meetings to fully engage in their college experience, establish goals, envision life after college, and develop their capacity to manage their individualized supports and make informed decisions about their future. Academic success, meaningful, integrated employment and social engagement within their communities are the anticipated outcomes after certificate completion. The CCS certificate culminates in an ePortfolio summarizing the student's academic and career/employment experiences and competencies.

Admission to this program is limited; please contact the College of Education for information.

The Certificate of Career & Community Studies is designed as a four-year college experience as shown below:

**Year 1**
- Freshman Inquiry 15
- SpEd 120 Career and Community Studies 6
- **Subtotal: 21**

**Year 2**
- SpEd 220 Career and Community Studies 6

- **Subtotal: 18-24**

**Year 3**
- SpEd 320 Career and Community Studies 6
- Third Year of Study Courses that support career and other interests 12-
- **Subtotal: 18-24**

**Year 4**
- SpEd 420 Career and Community Studies 6
- Fourth Year of Study
Courses that support career and other interests  12-18

Subtotal: 18-24

Total Credit Hours: 75-93

Graduate programs

ADMISSION REQUIREMENTS

To be admitted to a graduate program in professional education, the applicant must first satisfy minimum University requirements (p. 41). The applicant must also meet the admission requirements of specific degree, license, or specialist programs that the school is authorized to offer. Detailed information regarding admission requirements for the various graduate programs is available from the College of Education and at www.pdx.edu/education.

DEGREE REQUIREMENTS

See University graduate degree requirements (p. 51). Specific College of Education requirements for degree, educational specialists, or license candidates are listed below. Upon successful completion of all University and College of Education requirements, the candidate will be awarded the appropriate degree and be recommended, upon request, for the appropriate license.

COUNSELING M.A./M.S.

All students who are pursuing a Master's Degree in Counselor Education must complete core courses with some additional work needed based on program requirements. This program satisfies University and College of Education requirements and is part of the requirements needed prior to taking the NCE examination of the National Board for Certified Counselors (NBCC) or the CRC examination of the Commission on Rehabilitation Counselor Certification (CRCC). This program is also approved by the Oregon Board of Licensed Professional Counselors and Therapists and the Teacher Standards and Practices Commission of Oregon. Students should work with their advisors in the process of understanding the licensure requirements of both of these credentialing groups.

The primary purpose of the Counselor Education department is to educate competent counselors for public and private schools, community behavioral health agencies and rehabilitation settings. The program is designed to strengthen competencies in the behavioral sciences and to broaden the students' background in human growth and development, counseling theories and interventions, interpersonal relations, individual and group processes, career counseling, assessment, diagnosis and treatment planning, research and program evaluation, and multicultural aspects of counseling.

Students may pursue one of four areas of specialization within the Counselor Education department: Clinical Mental Health Counseling; Clinical Rehabilitation Counseling; School Counseling; Marriage, Couple, and Family Counseling. This is primarily an evening program. The program takes three years to complete.

Students can choose (a) written comprehensive exam, (b) thesis, or (c) professional portfolio (for school counseling students only). Thesis credits are in addition to the required credits for graduation. The thesis must be no less than 6 credits and no more than 9 credits.

Note: Students in all four specializations must complete COUN 541 Introduction to Counseling and one course in psychopathology prior to admission or before enrollment in the fall term of the first sequence of coursework. Additional prerequisites are specified for students in the School Counseling specialization (see “Licensure (p. 146)”). Courses numbered 808 are not allowed.

Clinical Mental Health Counseling Specialization

The Clinical Mental Health Counseling specialization prepares individuals to work as counselors in a range of private and public clinical mental health settings, including outpatient and inpatient treatment agencies, community
mental health, counseling centers at colleges and universities, and in private practice. This program intentionally integrates a multicultural and social justice-oriented lens throughout our coursework and clinical experiences. The program of study leading to an M.A./M.S. in Counselor Education with a Clinical Mental Health Counseling specialization must include the following 90 credits, in addition to the core CACREP curriculum:

**Clinical Rehabilitation Counseling Specialization**

Clinical Rehabilitation Counselors provide services to individuals with disabilities who are psychologically and vocationally adjusting to the disability experience. The Clinical Rehabilitation Counseling program prepares graduates to work in a wide variety of clinical mental health and rehabilitation settings, including public mental health agencies, public and private community counseling agencies, employee assistance programs, day treatment and inpatient hospital settings, private practice, group practice, community colleges, university settings, and public and private vocational rehabilitation agencies. Our CRC master’s degree is organized around core foundation courses, an intensive on-campus practicum training clinic experience, interpersonal growth experiences, advanced theory and practice courses, and a culminating half-time field internship placement. Our program consists of 90 graduate credits designed to meet CACREP national accreditation standards for professional counselors and the academic degree requirements to become licensed as a Licensed Professional Counselor (LPC) in Oregon and other states.

**Marriage, Couple, and Family Counseling Specialization**

The Marriage, Couple, and Family Counseling Program prepares individuals for specialized practice with relationships and families. The program emphasizes developmental systems thinking and relationship-focused counseling skills, with special attention paid to sociocultural factors, equity, and social justice in relationship and family practice. Graduates are trained to work as professional counselors in mental health centers, community agencies, private practice, and additional settings. The program leads to an M.A./M.S. in Counselor Education with specialty in Marriage, Couple, and Family Counseling, and requires completion of the following 90 credits:

School Counseling Specialization

The School Counseling specialization prepares individuals to work as counselors in school settings (P-12). Emphasis is placed on preparing school counselors to work with students to support them in the process of achieving academic, career, and personal/social success. Students who have a teaching license and two years teaching experience take 6 additional elective credits (Track I). Students who cannot document a teaching license and two years of teaching experience must complete a 6-credit, 200-hour Effective Teaching sequence to obtain licensure as a school counselor (see “Licensure (p. 153)”)(Track II).

Curriculum and Instruction M.A./M.S.

The College of Education’s Curriculum and Instruction Master’s Degree Program offers an innovative learning environment that engages and empowers individuals to develop the knowledge, skills, and dispositions to improve their professional practice and to become leaders for change and social justice in their learning communities. The Program is designed for professionals who want to pursue advanced studies in teacher leadership, educational theories and research, curriculum design, and instructional practices. Courses are intended to enhance equitable pedagogy and learning outcomes while providing opportunities for career development. The Program electives are flexible and can be used toward endorsements (e.g., ESOL, Reading), specializations (e.g., Math), and Certificates of Completion (e.g., Teacher Leadership, ESOL, Autism Spectrum Disorder).

Requirements for the Degree Are:

1. A program of study consisting of 45 graduate-level credits approved by the student’s graduate adviser and the department chair, to include:
   a. A minimum of 24 core credits in curriculum and instruction.
   b. A core of studies encompassing preparation in the areas of teaching and learning, curriculum, research and evaluation, human relations, and multicultural education. The precise nature of this core of studies is specified by the department. Degree plans are written in cooperation with an assigned adviser.
   c. All courses must be 500 level or above.
   d. No more than 6 credits may be 800-level courses numbers, if approved by the adviser prior to being used for a master’s program. Courses numbered 808 are not allowed.
   e. With adviser and department chair approval, up to 15 credits may be transferred in from other institutions.
   f. With adviser and department chair approval, up to 15 credits from PSU taken prior to admission may be included in the program.
   g. The total credits of (e.) and (f.) cannot exceed 15.

2. The student will select one of three options to complete the requirements for the master’s degree: (1) an independent action research project, (2) a thesis, or (3) a written comprehensive examination. The thesis requires an oral examination in addition to the written product.

Early Childhood Specialization

The College of Education offers graduate-level courses for professionals seeking to strengthen their understanding and skills in the area of early childhood education (ECE). This coursework focus is appropriate for those pursuing a
master’s degree in curriculum and instruction with a specialization in ECE.

**EARLY CHILDHOOD: INCLUSIVE EDUCATION M.A./M.S.**

This innovative early childhood education master's degree program emphasizes educating professionals to welcome multiple perspectives, engage all members of the community, experiment and build theories, make learning and listening visible, and think deeply together. Students develop a critical understanding of the role of development, diversity, and culture in the lives of young children and their families and their communities. Knowledge of inclusive early childhood ideas and practices foster the leadership necessary to ensure equity for all children.

Students have a choice of four specialty areas: Constructivism in Early Childhood, Early Childhood Special Education, Infant Toddler Mental Health, and a Distributed Pathway that draws from the other three specializations. All students will participate in core courses with a distinct focus on inclusive education and complete a culminating action research project focused on their own practice.

**EDUCATIONAL LEADERSHIP AND POLICY M.A./M.S.**

The Department of Educational Leadership and Policy (ELP) offers a department-wide Master of Arts and Master of Science degree with specializations in: Postsecondary, Adult, and Continuing Education (PACE); Leadership in Sustainability Education (LSE); and Educational Administration, Initial Administrator License/ Preliminary Administrative License (MS/MA+IAL).

The purpose of these programs is to inspire and guide educational leaders in creating a socially just world. Through teaching, research and advocacy, the ELP department inspires and guides educational leaders to create collaborative, sustainable practices that advance equity and social justice in our communities.

All students admitted to the 45-credit master’s program must complete four required courses from the Professional Studies Core. Within each specialization students may elect to develop, with their advisers, a general program or theme (special emphasis or focus).

</tbody>
</table>

In consultation with the adviser, students must complete courses that support their area of specialization and select one of two options to complete the requirements for the master’s degree (a thesis or a comprehensive examination). The majority of students complete the comprehensive exam which involves a professionally grounded theory-to-practice project formally contextualized in the research literature. The thesis is likely to significantly extend a student's time to completion. Courses numbered 808 do not count toward degree completion. Further information about each of these areas of specialization may be obtained from the Graduate School of Education. For more information please visit our website at www.pdx.edu/elp/.

Information about specific specializations and licensure programs can also be found on our website.

MA/MS Postsecondary Adult and Continuing Education

MA/MS Leadership for Sustainability Education

**Educational Administration:**

- Initial Administrative Licensure / Preliminary Administrative Licensure
- MA/MS+Initial Administrative Licensure / Preliminary Administrative Licensure
- Continuing Administrative Licensure / Professional Administrative Licensure

**Graduate Certificates**

- Teaching Adult Learners (p. 145)

- Service-Learning and Community-Based Learning in Higher Education (p. 143)
- Training and Development (p. 145)

**SPECIAL EDUCATION M.A./M.S.**

The College of Education offers comprehensive programs for the professional preparation of students in special education. A master’s degree in special education may be completed in conjunction with state licensure in special education or may be completed independently. For licensing information see “Programs Leading to Licensure: Special Education” on Special Education Licensure Programs.

Students completing a master’s degree must complete the special education master’s degree core program. The master’s core must total at least 9 credits. The remaining credits are drawn from the special education licensure program or other courses approved by the advisor. No more than 6 credits of 800-level courses may be used, and courses numbered 808 are not allowed. The master’s degree without Oregon licensure must total at least 45 credits (which includes the master’s core).

**Core Courses**

Students must complete SpEd 596 Topics in Special Education Research before SpEd 597 Topics in Special Education Issues and Practices. Topics such as Literacy, English Language Learners, Positive Behavior Intervention Supports, and Students with Significant Disabilities are offered. Students must fulfill a capstone experience by choosing either to complete a special project (SpEd 506) or...
a master’s thesis (SpEd 503) under the direction of a faculty advisor. The special project (SpEd 506) must include a written product and presentation and align with the topic area chosen for SpEd 597. With advisor approval students may take up to 9 credits of SpEd 596 and 9 credits of SpEd in three topic areas. Students opting to complete a thesis will follow Portland State University theses guidelines. Students are required to enroll in 3-6 credits of Special Project (SpEd 506) or 6-9 credits of Thesis (SpEd 503).

**The master’s degree program includes:**

- Advisor approved courses (from licensure program or electives) 30
- SpEd 596 Topics in Special Education Research 3
- SpEd 597 Topics in Special Education Issues and Practices 3

**A combination of the following:**

- SpEd 503 Thesis 6-9
- SpEd 506 Special Project 3-6

**Visually Impaired Learners Focus**

Students completing the Master’s program with a focus on Visually Impaired Learners have the option of completing the Master’s core program as described above or to complete SpEd 596, SpEd 597, an additional 6 elective hours in special education AND complete a proctored, written master’s comprehensive examination.

For students with a focus on Visually Impaired Learners completing the master’s degree program includes:

- Advisor approved courses (from licensure program or electives) 30

**Option 1:**

- SpEd 596 Topics in Special Education Research 3
- SpEd 597 Topics in Special Education Issues and Practices 3

**A combination of the following:**

- SpEd 503 Thesis 6-9
- SpEd 506 Special Project 3-6

**Option 2:**

- Electives with advisor approval Complete proctored master’s comprehensive examination 6

**Inclusive Elementary Educator Program**

Students completing the Master’s program as part of the Inclusive Elementary Educator Program must satisfy the special education Master’s core program requirements by completing the required courses as follows:

- Ed 530 Introduction to Inclusion and Special Education 2
- Ed 536 Educational Research and Inclusive Education 3
- SpEd 506 Special Project 6
- or
- SpEd 503 Thesis 6

**EDUCATION M.ED.**

The M.Ed. is earned by students who have completed PSU’s Graduate Teacher Education Program (p. 146) (GTEP) or Secondary Dual Educator Program (p. 149) (SDEP). Graduate level students in the Bilingual Teacher Pathway (p. 151) (BTP) Program may earn the M.Ed. with the completion of a research course to be approved by their advisor as equivalent to the former course CI 563: Teacher as Researcher. ITEP students may earn a M.Ed. with completion of coursework approved by their advisor.

Requirements listed below are for the M.Ed. only. Please refer to the licensure sections linked above for additional requirements for the licensure programs.

EDUCATIONAL LEADERSHIP ED.D.

The Ed.D. in Educational Leadership, offered by the College of Education, is the school’s highest professional degree. It is designed to prepare scholarly practitioners and to help formal and informal educational leaders develop their capacity to provide leadership that makes a positive and significant difference in the professional fields and diverse communities they serve. Emphasis is on the development of excellent professional performance as leaders in education in: public and private schools; community and four-year colleges and universities; community, state, and federal educational agencies; and nonschool settings, where appropriate.

Four specializations are available to students: administration (PreK-12); curriculum and instruction; postsecondary education; and special education. Each student is admitted to one of the four specializations.

GENERAL REQUIREMENTS

The program is a post-master’s degree program. Students must have earned a master’s degree or the equivalent prior to enrollment in the program. A minimum of 72 credits must be completed at Portland State University after admission to the doctoral program, to include the leadership core, specialization, and dissertation. Courses numbered 800 or above are not allowed. Continuous enrollment is required. Foreign language competency is not required for the Ed.D. degree.

</tbody>
</table>

Specialization (27 credits minimum)

Students will complete a minimum of 27 hours of coursework in the following specializations:

• Administration (P-12)
Comprehensive Examination

The comprehensive examination covers the leadership core and is taken when the student has completed the first year of the leadership core (ED 620, ED 630, ED 640, and ED 650). The comprehensive examination is designed to assess a student’s ability to analyze, synthesize, and apply frameworks from the leadership core to an educational topic of significance. Students write an academic paper for the examination. The paper is evaluated by a faculty committee. Specializations may require that the student present and defend the paper to a faculty committee in a public meeting.

Dissertation

The doctoral dissertation represents original and independent inquiry that is a contribution to knowledge or is of value for educational practice. Students may elect to employ one of several different approved inquiry strategies, including—but not limited to—traditional research designs and methods, ethnographic and descriptive case studies, policy analyses, product development and field testing, and program evaluation. A minimum of 18 credits is directed toward the dissertation project.

Residency

As is required for all doctoral degrees at PSU, candidates for the Ed.D. degree fulfill the residency requirement after admission to the doctoral program. Residency can be satisfied in one of the two following ways:

- Three terms of full-time enrollment (minimum 9 graduate credits applicable to the degree program each term) during the first two years after admission to the program in coursework, the study of practice (i.e., field-based work), credits by arrangement, and/or dissertation credits. This may include one summer term.
- Six terms of part-time enrollment (minimum 1 graduate credit applicable to the degree program each term) during the first two years after admission to the program in coursework, the study of practice (i.e., field-based work), credits by arrangement, and/or dissertation credits. This may include one or more summer term.

Graduate Certificates

GRADUATE CERTIFICATE IN APPLIED BEHAVIOR ANALYSIS

A 32-credit graduate certificate in Applied Behavior Analysis (ABA) offers a concentration of coursework in behavior analysis for those interested in pursuing advanced studies in ABA. Each course in the sequence builds on each other, enhancing students' knowledge and skills in implementing evidence-based behavior support strategies. Further, for those pursuing a BCBA®, the Association for Behavior Analysis International (ABAI) has verified our 7-course sequence toward the coursework requirements for eligibility to take the Board Certified Behavior Analyst® examination. Applicants will need to meet additional requirements before they can be deemed eligible to take the examination. Please refer to the BACB® (bacb.com) for additional requirements.

INFANT TODDLER MENTAL HEALTH CERTIFICATE

The graduate certificate in Infant/Toddler Mental Health: A Relationship-Based Approach is designed for professionals who are working with families who have children from the prenatal period to 36 months of age. This program is appropriate for professionals who are mental health, special education, child welfare, and social service providers; home visitors; teachers; childcare providers; and health care professionals. It is also appropriate for supervisors of these direct-service providers.

ORIENTATION AND MOBILITY FOR  
CHILDREN, YOUTH, AND ADULTS  

The Orientation and Mobility Graduate Certificate is a 34  
credit program that is designed to be stackable with the  
Special Education Master's Degree (p. 138).  

REQUIREMENTS  

SpEd 540  Foundations of Education for the 3  
Visually Impaired Learner  
SpEd 541  Implications of Vision Problems 3  
of Children/Youth  
SpEd 545  Introduction to Orientation and 3  
Mobility and Independent Living  
Skills  
SpEd 549  Orientation and Mobility 3  
Methods  
SpEd 550  Orientation and Mobility 3  
Assessment and Instruction -

Adults  
SpEd 552  Orientation and Mobility 4  
Advanced Techniques  
12 credits of SpEd 554  12  
Orientation and Mobility  
Practicum  

Students complete 12 credits of Orientation and Mobility  
(O&M) practicum which is equal to 400 hours of clinical  
O&M experience that align with ACVREP requirements.  
O&M practicum credits are variable and may be taken in  
3-12 credit increments across multiple terms depending  
upon the practicum placement hours and the availability of  
a supervising Certified Orientation and Mobility Specialist  
(COMS). The O&M Program Coordinator works with  
students to arrange practicum placements based on  
geography, student interests, and availability of clinical  
partners within educational, rehabilitation and community  
settings. Students are eligible to sit for the national  
certifying exam for Orientation and Mobility Specialists  
within 6 months of completing of coursework. A person  
may be certified after passing the national exam,  
submitting documentation of coursework completion, and  
with a signed documentation from the Program  
Coordinator.  

Total Credit Hours: 34  

SERVICE-LEARNING AND COMMUNITY  
BASED LEARNING IN POSTSECONDARY  
EDUCATION CERTIFICATE  

Gain high impact knowledge, skills, and strategies for how  
to teach, coordinate, lead, and assess forms of service-  
learning, community engagement, and community-based  
research in order to realize educational improvement and  
enhancement across diverse individuals and cultural  
communities (18 credits).

Subtotal: 18

**Total Credit Hours: 18**

**SUSTAINABLE FOOD SYSTEMS GRADUATE CERTIFICATE**

The Food Systems certificate utilizes a “Certificate Outcomes” approach, an innovative curriculum model that maps courses against 6 learning outcomes for the program. The learning outcomes and the courses that meet each outcome are listed below.

The certificate will be awarded at a minimum of 18 credits depending on the courses chosen and their respective credit hours. Students may count only one outcome per course, therefore requiring a minimum of 6 courses. In addition to the courses listed below, matriculated students have the option to combine other program requirements such as 504 / 506 / 509 courses or a community-based learning experience to satisfy Learning Outcome 3 for up to 6 credits. An independent study may also be pursued with approval from the program director or other designated faculty.

**LEARNING OUTCOMES AND CORRESPONDING COURSES**

**Outcome 1: Theoretical Frameworks/Ways of Knowing**

Identify multiple frameworks and ways of knowing:

Students will describe the complex and broad range of theories and perspectives, including non-Western epistemologies/traditions/ways of knowing, that exist in the sustainable food systems movement.

- Geog 549 Geography of Food 4

**Outcome 2: Power and Privilege**

Explain systems of power and privilege in food systems:

Students will give examples of how power and privilege affect the contemporary food system.

- ELP 548 Global Political Ecology 4
- Geog 549 Geography of Food 4
- Hst 592 Research in World History: World of Commodities 4
- PHE 522 Health and Social Inequalities 3
- Soc 510 Food, Justice, and Social Movements 4
- Soc 579 Food, Justice, and Social Movements 4
- USP 568 Oregon Land Use Law 3
- USP 576 Feeding the City 4

**Outcome 3: Community and/or Field-based Learning**

Engage in learning in a community based setting:

Students will demonstrate knowledge of food systems through a community or field-based experiential learning opportunity. This outcome can be achieved through a relevant course on our course list or through an individual internship (you may only count one internship towards the certificate).

- ELP 510 Permaculture and Whole Systems Design 4
- ELP 540 Urban Farm Education: Leveraging Policy and Research to Cultivate Garden-Based Education in Practice 4

Independent study or internship.

Students must get faculty approval and register for USP 504, PHE 504, ELP 506, PA 509, or other relevant course, to count the field experience toward the certificate.

**Outcome 4: Interdisciplinary Linkages**

Examine the interdisciplinary and cross-sector nature of contemporary food systems:

Students will critically examine the interconnected social, political, economic, and ecological components that influence food systems.

- ELP 540 Urban Farm Education: Leveraging Policy and Research 4
**Outcome 5: Strategies**

*Evaluate strategies to address food system challenges:* Students will critically examine strategies to address food system challenges.

- **ELP 510** Permaculture and Whole Systems Design 4
- **ESM 527** Watershed Biogeochemistry 4
- **GSCM 532/GSCM 532S** Craft Beverage Operations Management 4
- **PA 574** Food and Agriculture Policy 3
- **PHE 527** Food Systems and Public Health 3
- **SySc 513** Holistic Strategies for Problem Solving 4
- **USP 542** Land Use Implementation 3
- **USP 568** Oregon Land Use Law 3

**Outcome 6: Elective**

Students will select a relevant course for their own learning and professional goals, and to enable specialization. Can be another certificate class, an independent study, an individual internship (though note that you may only count one internship towards the certificate), or a course from the list below:

- **PA 525** Grantwriting for Nonprofit Organizations 3
- **PHE 517** Community Organizing 3

Other ideas? Obtain email confirmation from Certificate Director prior to enrolling.

**Total Credit Hours: 18**

Licensure

In Oregon, educator candidates become eligible for a state educator license by completing coursework, student teaching and assessments, used to determine their status as program completers. Once all criteria are met, candidates can then be recommended to Teacher Standards and Practices Commission (TPSC) for an educator license. Assessments during a program include subject matter test(s), a civil rights knowledge test, and a nationally-scored assessment, edTPA. For information on Oregon testing requirements please refer to the Teacher Standards and Practices Commission website.

Tools of multiple measure are available to programs to assist candidates for whom tests or assessments present a barrier to program completion. Each licensure program in the COE has processes for utilizing the multiple measures tools which were developed by TSPC.

GRADUATE TEACHER EDUCATION PROGRAMS

The College of Education offers two licensure programs, one in elementary and one in secondary, that also include a Master’s degree. This program is designed for students who wish to teach in public schools and is available in one-year and two-year formats. Successful completion of these programs culminates in a recommendation to Oregon’s Teacher Standards and Practices Commission for a teaching license. Specific program admission requirements and application details are available at www.pdx.edu/ci/gtep-info.

The M.Ed. is earned by students who have completed PSU’s Graduate Teacher Education Program (GTEP) and Secondary Dual Educator Program (SDEP). Graduate level students in the Bilingual Teacher Pathway (BTP) Program may earn the M.Ed. with the completion of ITP 551 Research and Classroom Inquiry.

Subtotal: 45-66
Secondary education at Portland State University is available in the following endorsement areas: art, biology, chemistry, world languages, health education, integrated science, language arts, mathematics, music, physical education, physics, and social studies. Initial subject matter endorsement requirements are outlined in the appropriate department section of this catalog.

**MATHEMATICS INSTRUCTIONAL LEADER: PREK-8 SPECIALIZATION**

The Mathematical Instructional Leader: Pre-K Specialization Program in the College of Education consists of graduate mathematics content, pedagogy, and leadership courses and a practicum specifically designed for teachers, teacher leaders, and coaches. The goals of the program are to offer a comprehensive mathematics education experience that:

- Deepens mathematical content knowledge including the specialized knowledge needed for teaching mathematics and the development of mathematical ideas across the grades.
- Attends to both content and pedagogy and the ways that teaching supports the learning of content.
- Develops expertise in using and helping others use effective instructional practices centered on students’ mathematical thinking.
- Increases ability to support school and district efforts that help all students learn important mathematics.

Upon completion of the PreK-8 Specialization, program completers are eligible for recommendation to TSPC to add the specialization to their license. Per TSPC, “A specialization is distinguished from an endorsement in that a specialization is not required to teach or work in the specialized area, whereas an endorsement is required to work in the subject-matter area.”

**REQUIREMENTS**

**PreK-Grade 8 program**

**MATHEMATICS INSTRUCTIONAL LEADER - GRADES 6-12 SPECIALIZATION**

The Mathematical Instructional Leader: Grades 6-12 Program in the College of Education consists of graduate mathematics content, pedagogy, and leadership courses and a practicum specifically designed for teachers, teacher leaders, and coaches. The goals of the program are to offer a comprehensive mathematics education experience that:
• Deepens mathematical content knowledge including the specialized knowledge needed for teaching mathematics and the development of mathematical ideas across the grades.

• Attends to both content and pedagogy and the ways that teaching supports the learning of content.

• Develops expertise in using and helping others use effective instructional practices centered on students’ mathematical thinking.

• Increases ability to support school and district efforts that help all students learn important mathematics.

Upon completion of the Grades 6-12 Specialization, program completers are eligible for recommendation to TSPC to add the specialization to their license. Per TSPC, “A specialization is distinguished from an endorsement in that a specialization is not required to teach or work in the specialized area, whereas an endorsement is required to work in the subject-matter area.”

DEGREE REQUIREMENTS

(choose three+)

**Mathematics Content-Focused Methods Courses**

CI 540 and CI 541 are designed specifically for 6-12 teachers, the others are for K-12 teachers. Choose three or more courses based on diagnostic assessment.

- **CI 540** Modeling with and Using Representations in Mathematics 3
- **CI 541** Reasoning and Proving Across Mathematics 3
- **CI 513** Enhancing Algebraic Thinking: Generalization about Operations 3
- **CI 514** Enhancing Algebraic Thinking: Patterns and Functions 3
- **CI 515** Developing Geometric Thinking and Concepts 3
- **CI 516** Exploring Measurement Concepts 3

**Advanced Mathematics Methods Course**

- **CI 518** Implementing Mathematics Reform 3

**Mathematics Leadership Focused Courses**

- **CI 519** Mathematics Leadership: Influencing and Facilitating Improvement 3
- **CI 521** Practicum: Mathematics Leadership 1-3

If desired, the graduate credit received can be applied toward an M.A., M.S., or Ed.D. in the Department of Curriculum & Instruction in the Graduate School of Education.

http://www.pdx.edu/ci/deepening-math

**INCLUSIVE ELEMENTARY EDUCATOR PROGRAM (IEEP)**

**with Master’s Degree**

The College of Education offers a dual licensure program in early childhood and elementary general and special education that also includes a master’s degree. This full-time program of integrated coursework and field experiences is completed over six terms. Students are licensed to teach early childhood and elementary (pre-K to grade 8) and special education. Faculty from both curriculum and instruction and special education departments are instructors in this program. This program reflects the rapidly changing nature of America’s schools, where a wide range of diverse learners can be found in most classrooms.

### SECONDARY DUAL EDUCATOR PROGRAM (SDEP)

The College of Education offers a dual licensure program in a content area (e.g., math, social studies, English, science, etc.) and special education that also includes a master’s degree. This full-time program of integrated coursework and field experiences is completed over six terms plus one summer. Students also receive additional instruction in supporting English language learners. Faculty from both the Curriculum and Instruction and the Special Education departments teach in the program. The program reflects the rapidly changing needs of America’s schools where a wide range of diverse learners are found in each classroom.

8 credits total in Secondary Methods courses ITP 521, ITP 522, ITP 523, ITP 524, ITP 525, ITP 526, ITP 527, and ITP 528 from your content area required.

### ORIENTATION AND MOBILITY SINGLE TRACK CERTIFICATE

The Orientation and Mobility (O&M) Certificate provides learners with the knowledge and skill competencies recognized by the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP) and the Association for Education and Rehabilitation of the Blind and Visually Impaired (AERBVI) to promote the safe and efficient travel skills of individuals who are blind, visually impaired or deafblind. O&M Specialists provide individualized assessment, and instruction to individuals with visual impairment based upon an individual’s needs, strengths, preferences and goals within settings that are important to the individual with visual impairment. The O&M Single Track certificate at PSU is a non-licensure program.
program of study for those who are not working as teachers of the visually impaired but who wish to provide O&M services in rehabilitation, community, or other educational settings.

**Total Credit Hours: 34**

All students complete 12 credits of Orientation and Mobility (O&M) practicum which is equal to 400 hours of clinical O&M experience that align with ACVREP requirements. O&M practicum credits are variable and may be taken in 3-12 credit increments across multiple terms depending upon the practicum placement hours and the availability of a supervising Certified Orientation and Mobility Specialist (COMS). The O&M Program Coordinator works with students to arrange practicum placements based on geography, student interests, and availability of clinical partners within educational, rehabilitation and community settings. Students are eligible to sit for the national certifying exam for Orientation and Mobility Specialists within 6 months of completing coursework. A person may be certified after passing the national exam, submitting documentation of coursework completion, and with a signed documentation from the Program Coordinator.

---

**ORIENTATION AND MOBILITY ADD-ON CERTIFICATE FOR TEACHERS OF THE VISUALLY IMPAIRED**

The Orientation and Mobility (O&M) Certificate provides learners with the knowledge and skill competencies recognized by the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP) and the Association for Education and Rehabilitation of the Blind and Visually Impaired (AERBVI) to promote the safe and efficient travel skills of individuals who are blind, visually impaired or deafblind. O&M Specialists provide individualized assessment, and instruction to individuals with visual impairment based upon an individual’s needs, strengths, preferences and goals within settings that are important to the individual with visual impairment. The O&M Add-On Certificate is an abbreviated program of study that builds upon the foundational knowledge of Teachers of the Visually Impaired and expands the learner’s knowledge and skills to provide O&M services to students with visual impairments.

INTERNATIONAL TEACHER EDUCATION PROGRAM

The College of Education offers an International Teacher Education Program for students who hold teaching licenses in other countries and who are seeking Oregon teaching licenses. It is designed to meet the Initial Teaching Licensure requirements set forth by Oregon’s Teacher Standards and Practices Commission. Through an individualized planned program, students fulfill all of the requirements stated above for the Graduate Teacher Education Program through either equivalency, substitution, or current coursework/classroom experiences. A 6-credit student teaching experience is required, along with a minimum of 17 credits of coursework taken at PSU. Candidates will need to pass a state required performance assessment. For admissions procedures, testing requirements, and an appointment with program faculty, please call the COE at 503-725-4619.

BILINGUAL TEACHER PATHWAY (BTP) PROGRAM

The College of Education offers a preparation program for bilingual/bicultural individuals who are employees in partner school districts or bilingual/bicultural individuals seeking initial teacher licensure at the elementary level. The BTP core consists of 38 credits and 13-16 credits of field experience. In addition, the Dual-Language specialization of 18 credit hours is integrated into the program plan of study. Required prerequisite classes should be completed prior to admission into the BTP program. Students may apply at the undergraduate (120 credits/senior status) or graduate level. BTP is a part-time program offering evening and weekend classes. For more information please see the BTP site at www.pdx.edu/ci/btp.

Please Note: The BTP Program is undergoing revisions during the 2019-2020 Academic Year (thus the multiple 410/510 course numbers).

READOREGON

The ReadOregon program is a PSU-based, fully online program that serves the entire state of Oregon, and offers:

- Reading Specialist Endorsement Program—graduate-level, online, 24-credit reading specialist endorsement program.
- Literacy Education Course of Study—graduate-level, online, 12-credit literacy education certificate of completion for general classroom teachers.

The goal of both options is to help pre-service and in-service teachers become stronger teachers of literacy and to help teachers develop skills in literacy leadership. ReadOregon courses were designed to be used toward a reading specialist endorsement, a concentration in a master's degree program, and/or a component of professional development in the area of literacy.

For more information about Portland State University’s ReadOregon courses and admission, visit http://www.pdx.edu/ci/ReadOregon.

ESOL ENDORSEMENT

The College of Education offers a program leading to an ESOL endorsement for teachers already holding a valid Oregon teaching license. The program is as follows:

EDUCATIONAL ADMINISTRATION

Two authorized programs comprise the Executive Leadership Program leading to institutional recommendations for initial/principal and continuing/professional administrator licensure of program completers for positions as building and district level administrators. All students are required to have an approved program of study, as described below, filed with the College of Education. Admission requirements and detailed program information for each program are available from the Department of Educational Leadership and Policy (ELP).

THE INITIAL/PRINCIPAL ADMINISTRATOR LICENSE (IAL) PROGRAM

This program prepares individuals for positions as building-level administrators. This license requires completion of a master’s degree and three years of academic years of experience as a full-time licensed educator. The licensure program may be completed either as part of a master’s degree in educational administration or subsequent to the completion of a master's or higher degree in the arts and sciences or an advanced degree in the professions from a regionally accredited institution in the United States, or the foreign equivalent of such degree, together with an equally accredited bachelor's degree. The initial/principal administrator curriculum includes:

THE CONTINUING/PROFESSIONAL ADMINISTRATOR LICENSURE PROGRAM (CAL)

This program prepares individuals for positions as continuing school administrators and as school district administrators. This program requires prior completion of the initial/principal administrator program or its equivalent, and three (3) years of one-half time or more experience on
any administrator license appropriate for the assignment in a public or accredited private school setting.

Subtotal: 28

Students who completed an earlier licensure program prior to 2007 should consult with the Department of Educational Leadership and Policy (ELP) to determine what new license requirements must be met.

**LITERACY EDUCATION/READING ENDORSEMENT**

The COE on-campus literacy program offers face-to-face and hybrid courses designed to help preservice and in-service teachers become stronger teachers of literacy and to help teachers develop literacy leadership skills.

**Students in the Literacy Education Program will:**

- Develop a theoretically-grounded, research-based, multi-faceted view of reading, writing, speaking, and listening with a focus on meaning making.
- Examine the roles of and language in literacy development, assessment, and instruction.
- Evaluate the strengths and limitations of assessment tools and assessment plans.
- Use a constellation of assessments to identify students' complex patterns of literacy strengths and needs.
- Design targeted, culturally-responsive instruction.
- Plan family literacy outreach and facilitate literacy professional development experiences for colleagues.
- Master the International Literacy Association standards for reading specialists and literacy coaches. **On-Campus program options include:**
  - A 25-credit reading endorsement program
  - A 12-credit certificate of completion

**Endorsement**

The PSU reading endorsement program is a 25-credit program including a core of 16 credits, 3 credits of practicum, and 6 credits of electives. The program is designed to prepare students for careers as Title I teachers, reading specialists, literacy coaches, consultants, and district-level reading and language arts coordinators. A reading endorsement is also useful for classroom teachers wishing to develop stronger knowledge about literacy and about teaching students from diverse linguistic and cultural backgrounds.

Completion of the following coursework, the PRAXIS Specialty Area Exam in Reading, and a 90 hour practicum are required for an Oregon Reading (Intervention) Endorsement. No 400 or 800 level courses are accepted.

**SCHOOL COUNSELING LICENSING**

The School Counseling specialization has three options: Track I, Track II, and Licensure-only.

**Track I & Track II**

The School Counseling specialization prepares individuals to work as counselors in school settings (P-12). Emphasis is placed on preparing school counselors to work with
students to support them in the process of achieving academic, career, and personal/social success. Students who have a teaching license and two years teaching experience take 6 additional elective credits (Track I). Students who cannot document a teaching license and two years of teaching experience must complete a 6-credit, 200-hour Effective Teaching sequence to obtain licensure as a school counselor (see “Licensure (p. 136)” (Track II).

Licensure-only

Students enrolled in the licensure-only option must be graduates from an accredited Master’s program in counseling, psychology, or social work that required a clinical practicum focused on individual and group counseling skills. Graduate degrees in teaching or education are not accepted. The program is designed to meet the requirements for the Preliminary School Counselor License approved by TSPC. Students must complete 27-33 credits in the school counseling core to be eligible for the Preliminary School Counselor license.

All students in the Licensure-only option must take the School Counseling specialization core courses. The Teacher Standards and Practices Commission requires school counselors to have two years’ experience as a licensed teacher in a public school setting. Individuals in need of the teaching requirement must take the six-credit, 200-clock-hour teaching experience sequence.

All students (Track I, Track II, and Licensure only) are required to:

- Be fingerprinted and clear Oregon State Police and FBI background checks.
- Complete a school counseling action research or related project and professional eportfolio documenting the knowledge, skills, and competencies required by TSPC.
- Complete a 600-clock-hour internship; internship includes placement in an early childhood/elementary and/or in a middle/high school setting.
- Have two years’ teaching experience. Students without two years’ teaching experience must complete a 200-hour teaching experience practicum in a year-long 6-credit course sequence.

Additional information about requirements and specific courses can be obtained from members of the Counselor Education faculty responsible for advising students in the School Counseling specialization.

SPECIAL EDUCATION LICENSURE PROGRAMS

The PSU College of Education offers licensure and endorsement programs for:

- Persons seeking their special education initial Oregon teaching license.
- Persons seeking an Oregon Preliminary Teaching License with elementary education and a special education endorsement through an integrated dual program (Inclusive Elementary Educator Program).
- Persons seeking mid-level and/or secondary education initial Oregon teaching license in a content area and a special education endorsement through an integrated dual program (Secondary Dual Education Program).
- Teachers who hold a valid Oregon teaching license in general education and wish to add the special education endorsement.
- Teachers who hold a valid Oregon teaching license in special education and wish to take advanced specialty coursework as part of their continuing professional development plan.
- Persons who wish to complete a Master of Arts (M.A.) or Master of Science (M.S.) degree in special education.

Dual endorsement options

The Special Education program offers a dual endorsement option in elementary education (general education licensure) and special education, referred to as the Inclusive Elementary Educators Program (IEEP). A Secondary Dual Endorsement Program (SDEP) is offered in mid-level high-school education and special education. Students who complete these programs receive two endorsements and their master's degree.

EXPERIENCE

In addition to a bachelor’s degree, experience in education such as: early childhood special education, elementary or secondary teacher, instructional assistant, substitute teacher, or community experience is strongly recommended. Applicants without experience are encouraged to enroll in UnSt421 or SpEd460 Outdoor Ed/Recreation for a two-week summer camp experience at Mt. Hood Kiwanis Camp with students with disabilities to determine if they wish to pursue a career serving populations with special needs.

Learn more about special education programs on our webpage for prospective students or attending one of our advising sessions.

PSU offers programs leading to state licensure and endorsements in the following areas:

- Special Educator Initial License or Endorsement
• Visually Impaired Learner Initial License or Endorsement
• Early Intervention Special Education Initial License or Endorsement

SPECIAL EDUCATOR INITIAL LICENSE PROGRAM

The Special Educator licensure program prepares teachers to work with children and youth with a range of disabilities in elementary and secondary settings. The Special Educator licensure program is offered either as a full time (one year) or part time (two year) program.

For current prerequisites please see: http://www.pdx.edu/sped/prerequisites

CENTERS

The Autism Training and Research Center
The Autism Training and Research Center provides training and consulting on evidence-based practices to educators and parents of individuals with autism spectrum disorders, and conducts research in areas that are important to educators and families of individuals with autism spectrum disorders.

The Center for Student Success
503-725-9519
centerforsuccess@pdx.edu

The Center for Student Success provides technical and consulting services to local and regional schools, school districts, education service districts, and nonprofit organizations working to increase student success and to bridge the achievement gap. The Center's experienced staff and consultants provide a range of services including program and grant evaluations, charter school evaluations, and professional development design and implementation.

The Northwest Early Childhood Center for Education, Research, and Policy
The Northwest Early Childhood Center for Education, Research, and Policy (NWECC) is a collaboration of early childhood programs and centers which focus on education, research, and policy to improve the lives of all young children (birth to age 8) and their families within the PSU, local, regional and national communities. The NWECC is committed to communities in which all young children and their families thrive.

The Oregon Center for Career Development in Childhood Care and Education (OCCD)

The Oregon Center for Career Development in Childhood Care and Education (OCCD) provides leadership in the development and operation of integrated and statewide professional development standards and systems. OCCD promotes professional development to achieve high quality care and education for children and youth, and creates and supports training and education. See www.pdx.edu/education-career-development.

The Research Center on Inclusive and Effective Educational Practices (RCIEP)

The Research Center on Inclusive and Effective Educational Practices (RCIEP) serves as a catalyst and provides support to special education faculty in the development and implementation of externally funded research that significantly impacts the quality and effectiveness of intervention and instruction provided to children and youth with a variety of educational challenges, to their families and to the schools and agencies that serve them.

- Graduate Certificates

Engineering and computer science professions will continue to be front and center in addressing grand challenges that affect society and the planet, from reinventing the built environment for human health to low-impact energy sources, and resilient physical and cyber systems to effective transportation networks. For these reasons, national projections indicate that the need for engineers and computer scientists will continue to increase significantly during the years ahead, with commensurate increases in what are already high wages and opportunities to make substantial positive differences in the world.

All undergraduate programs are accredited by ABET and require a core of engineering or computer science, mathematics, science, and liberal arts courses. Graduate programs provide extended educational opportunities in various engineering and computer science specialties, from cyber-security to healthy buildings, environmental monitoring to resilient infrastructure, technology management to nano-fabrication, water resources to artificial intelligence, neurosystems and robotics to power systems, and more.

Undergraduate programs

At the undergraduate level, the student may select degree programs in civil engineering, computer engineering, environmental engineering, computer science, electrical engineering, and mechanical engineering. Cooperative educational programs with Portland-area industries, government agencies, and engineering consulting offices are available to qualified students.

The degree programs in civil engineering, computer engineering, electrical engineering, environmental engineering and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone: (410) 347-7700. The computer science program is accredited by the Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - telephone: (410) 347-7700.

DEGREE MAPS AND LEARNING OUTCOMES

Please refer to each department to view the degree maps and expected learning outcomes for Engineering and Computer Science's undergraduate degrees.

ADMISSION REQUIREMENTS

Policy on admission to undergraduate programs

Students may declare engineering or computer science as their major at any time after enrolling at Portland State University. However, students must be admitted formally to a specific degree program in civil engineering, computer engineering, computer science, electrical engineering, environmental engineering or mechanical engineering before they will: (1) be allowed to enroll in restricted upper-division courses offered by the program and (2) be graduated from that program. Students apply for formal department admission one to two terms before completing all eligibility requirements. Specific department application deadlines, criteria for admission and applications are available on respective department websites.
Students transferring from other institutions who want to be admitted formally to a specific engineering degree program (civil engineering, computer engineering, computer science, electrical engineering, environmental engineering, mechanical engineering) must:

- Meet all eligibility requirements.
- Apply for admission to PSU.
- Apply for program admission to the Maseeh College of Engineering and Computer Science.
- Have one copy of their transcripts sent to their engineering or computer science department.
- Have one copy of their transcripts sent to the Office of Admissions.

Transfer courses that are not evaluated by the Office of the Registrar or specified in other MCECS agreements as discrete numbered/direct equivalent courses will be evaluated by the department chair or their designee. In addition to the transcript, the student requesting the specific course equivalency may be asked to provide catalog descriptions and/or documents certifying course content. To ensure that the student is well prepared for the current curriculum, course equivalency will be evaluated against the content of the current course. Appeals of transfer course equivalence may be made to the MCECS Associate Dean.

Please see department websites for more specific admissions information.

**Graduate programs**

The Maseeh College of Engineering and Computer Science offers graduate programs leading to the degrees of Master of Science, Master of Engineering, Master of Software Engineering, and Doctor of Philosophy.

Master’s programs are available in civil and environmental engineering, computer science, software engineering, electrical and computer engineering, mechanical engineering, engineering & technology management, materials science and engineering, and systems engineering.

Ph.D. programs are available in civil and environmental engineering, computer science, electrical and computer engineering, mechanical engineering, and technology management.

Graduate Certificates are also available in select departments.

**Master of Software Engineering**

Suite 120
Fourth Avenue Building

- M.S.E.—Master of Software Engineering

- Graduate Certificate in Software Engineering

Applications to the Master of Software Engineering and the Graduate Certificate in Software Engineering have been suspended pending a major curriculum revision.

**Systems Engineering**

- M.Eng. — Systems Engineering
- Graduate Certificate

Systems Engineering is the practice of creating the means of performing useful functions through the combination of two or more interacting elements. Systems engineering focuses on defining customer needs and required functionality early in the development cycle, documenting requirements, then continuing with design synthesis and system validation while considering the complete problem. Systems engineering integrates all the disciplines and specialty groups into a team effort, forming a structured development process that proceeds from concept to production to operation. Many of us already practice systems engineering, but call it something else: design or development of product, process, service. This course of study will enable the engineer to function in an interdisciplinary team and apply their area of engineering specialty toward the development of a product, process, or service.

**ADMISSION REQUIREMENTS**

**Master of Engineering and Graduate Certificate**

In addition to meeting general University admission requirements (p. 41), applicants to the program need a minimum of three years of professional experience, baccalaureate degree, and at least 2.50 GPA. Admission is based on program approval by the Director of Systems Engineering and the PSU Admissions office.

**M.ENG. SYSTEMS ENGINEERING**

The Master of Engineering in Systems Engineering and the Certificate in Systems Engineering Fundamentals programs are currently approved for the ETM department; however, we are not accepting applications at this time.

- Graduate Certificate in Transportation
- Graduate Certificate in Hydrology
- Graduate Certificate in Sustainability

Civil and environmental engineers plan, design, and manage the construction and operation of public and private infrastructure that are the foundation of our modern society including multimodal streets and highways, public transportation systems, water and wastewater distribution systems, energy systems, buildings, bridges, and dams. Civil engineers design structures such as buildings and bridges using concrete, steel, wood, masonry and composites. They are involved in predicting the quantity of water available for human use and in improving the quality of surface water, rivers, lakes, reservoirs, estuaries, and ground water systems. Civil engineers utilize fundamental understandings of rock and soil mechanics to design foundations, earth structures, and pavement subgrades. Finally, they are involved in understanding and improving air quality impacted by industrial, transportation and other pollution sources.

UPPER DIVISION PROGRAM ADMISSIONS REQUIREMENTS

ADMISSIONS ELIGIBILITY - BSCE

To be eligible for admission to the BSCE Upper Division (Junior/Senior) program, each student must meet the following minimum requirements:

1. Complete with a minimum grade of C the following courses:
   - Mth 251  Calculus I  4
   - Mth 252  Calculus II  4
   - Mth 254  Calculus IV  4
   - Mth 256  Applied Ordinary Differential Equations  4
   - Mth 261  Introduction to Linear Algebra  4
   - Ch 221  General Chemistry I  4
   - Ch 222  General Chemistry II  4
   - Ch 227  General Chemistry Laboratory  1
   - Ch 228  General Chemistry Laboratory  1
   - Ph 221  General Physics (with Calculus) I  3
   - Ph 222  General Physics (with Calculus) II  3
<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>

</tbody>
</table>

Ph 211-Ph 213 are interchangeable with Ph 221-Ph 223.
• If a student earned a D+ or below in a class the first time, then only the repeated (second) grade will be used in the Selective GPA calculation.

• If a student earned a C- or above in a class the first time, then both the first grade and the second (repeated) grade will be used in the Selective GPA calculation.

• Should a class be taken a third time it does not replace the second attempt regardless of either grade.

• Applicants with a Selective Admission GPA of 3.0 or above, and who are in progress to complete all required lower division courses by the fall admissions term, will be admitted. Remaining admission will be prioritized by the Selective admission GPA with the total number admitted based on available class and lab capacity.

• Students with low Selective Admission GPAs may be offered or required to complete the CEE Upper Division Preparation course. If required, successful completion of the Summer Bridge may result in admission to the Upper Division program.

• Admission decisions will be communicated to the student by email. Decisions will be:
  • Admit
  • Admit, Recommend CEE Upper Division Preparation Course
  • Defer, Require CEE Upper Division Preparation Course
  • Defer, Wait for Spring or Summer Grades
  • Deny

• Denied students may request a meeting with the Department Chair to review the decision.

Continuation Criteria - BSCE and BSENVE

After admission to the Upper Division Program, students will be expected to make satisfactory progress toward their declared degree (BSCE or BSENVE).

Satisfactory progress is defined as:

• The term GPA in all courses taken at PSU must be 2.0 or higher.

• Completion of 12 credits toward the degree in an academic year.

Students failing to meet (1) or (2) of the progress criteria will be placed on probation.

Students will be suspended from the degree program if:

• The student is placed on probation for two consecutive terms or for a total of three terms.

• The student has not enrolled in an engineering course for three consecutive terms.

Students who are suspended will not be allowed to take courses in civil or environmental engineering program for one term following suspension. Summer term is included in this calculation. Students who wish to be readmitted to the program need to schedule and attend an advising session with the Department Chair or designee. If readmitted, the suspended student will be given clear continuation criteria that may exceed the pre-suspension satisfactory progress (continuation criteria) listed above. Failure to meet the revised continuation criteria following the first suspension will result in permanent suspension from the academic program.

Appeals

Students may appeal department admission decisions or department continuation criteria decisions by submitting a petition to the Department Chair. The Chair's decision can be appealed to an ad-hoc departmental appeal's committee consisting of three faculty. The committee will review the appeal and communicate a written decision to the Department Chair and student. The committee's decision can be appealed to the Associate Dean of MCECS (info@cecs.pdx.edu).

CIVIL ENGINEERING B.S. (BSCE)

The BSCE degree includes required and elective courses in structural analysis and design, environmental engineering, water resources, transportation engineering or geotechnical engineering.

Students may elect to focus coursework in a specialty area in their senior year through electives. The program culminates with a final capstone design course that allows students to apply many of the principles and concepts on a community-serving project.

The BSCE program is accredited by Engineering Accreditation Commission of ABET, 415 North Charles Street, Baltimore, MD 21201, a national organization that sets standards for engineering education defined in terms of curricular content, quality of faculty, and adequacy of facilities of engineering programs.

BSCE Program Educational Objectives

The civil engineering program at Portland State University prepares graduates to practice civil engineering responsibly and ethically by (1) working effectively in the professional engineering community and (2) continuing to learn and enhance their abilities in civil engineering.
BSCE Student Outcomes

Graduates of the civil engineering program at Portland State University will have the skills and abilities to prepare them to begin professional practice or to succeed in graduate studies.

Graduates will have:

• an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
• an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
• an ability to communicate effectively with a range of audiences
• an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
• an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
• an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

BSCE majors must complete all University (p. 31) and department degree requirements:

1. Freshmen and sophomore math, science, and engineering courses must be completed with a minimum grade of C;

2. Junior and senior engineering and science courses, and EC 314U must be completed with a minimum grade of C;

3. Prerequisite courses must be passed with the minimum grade ("C" for 100 and 200 level courses, "C-" for 300 and 400 level courses) or better in order to move ahead in the sequence;

4. The student’s cumulative PSU GPA must be 2.33 or higher to graduate from the BSCE program;

5. Any deviation from the required courses including engineering and mathematics substitutions must be approved in writing by the Department Chair. Transfer students should follow the information found on the MCECS Transfer Page: https://www.pdx.edu/cecs/transferring-credits

Students may take one course outside the CEE Department to apply toward senior electives. Approved non-CE courses are ME 321 (p. 933), ME 455 (p. 937), G 424 (p. 824), Geog 488 (p. 843), and Geog 492 (p. 843).

Additional non-CE classes require prior approval of the CEE Department; requests should be sent to ceedept@pdx.edu prior to the start of the term.

**ENVIRONMENTAL ENGINEERING B.S.(BSENV E)**

The BSENV E program provides training for engineers to preserve the natural environment – an especially important part of our culture in Portland and in the state of Oregon. Oregon prides itself on its environmental commitments and efforts toward living sustainably. This degree focuses on the fundamentals of environmental and water resources engineering with required and elective courses in geo-environmental, surface water hydrology, surface and groundwater water quality, groundwater hydrology, and air quality. The program includes foundational and fundamental courses in chemistry, mathematics and statistics, physics, geology and biology. The program culminates with a final capstone design course that allows students to apply many of the principles and concepts on a community-serving project.

The BSENV E program at Portland State University is accredited by the Engineering Accreditation Commission of ABET, 415 North Charles Street, Baltimore, MD 21201, a national organization sets standards for curricular content, quality of faculty, and adequacy of facilities of engineering programs.

**BSENV E Program Educational Objectives**

The environmental engineering program prepares graduates to practice environmental engineering responsibly and ethically by (1) working effectively in the professional engineering community and (2) continuing to learn and enhance their abilities in environmental engineering.

**BSENV E Student Outcomes**

Graduates of the environmental engineering program will have the skills and abilities to prepare them to begin professional practice or to succeed in graduate studies.

Graduates will have:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make
informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
• an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
• an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
• an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

REQUIREMENTS

BSENV E majors must complete the following University (p. 31) and department degree requirements for their engineering coursework.

1. Freshmen and sophomore math, science, and engineering courses must be completed with a minimum grade of C;

2. Junior and senior engineering and science courses, and EC 314U must be completed with a minimum grade of C;

3. Prerequisite courses must be passed with the minimum grade ("C" for 100 and 200 level courses, "C-" for 300 and 400 level courses) or better in order to move ahead in the sequence;

4. The student’s cumulative PSU GPA must be 2.33 or higher to graduate from the BSENV E program;

5. Any deviation from the required courses including engineering and mathematics substitutions must be approved in writing by the Department Chair.

Transfer students should follow the information found on the MCECS Transfer Site: https://www.pdx.edu/cecs/transferring-credits

**Subtotal: 46**

Ec 314U is a required course that can be taken as a part of some upper-division clusters.

Electives: see below.

**Approved Environmental Engineering Electives:**

There are approved electives in geo-environmental engineering, surface water quality, surface hydrology and hydraulics, subsurface hydrology and contaminant transport, and air quality. 24 credits of technical electives are required to complete the BSENV E degree; a variety of the classes listed below are available each academic year.

- CE 401 Research 1-6
- CE 403 Honors Thesis 1-4
- CE 404 Cooperative Education/Internship 1-12
- CE 405 Reading and Conference 1-6
- CE 406 Special Projects 1-6
- CE 407 Seminar 1-6
- CE 410 Selected Topics 0-6
- CE 445 Geo-environmental Engineering with Geosynthetics 2
- CE 479/ESM 479 Fate and Transport of Toxics in the Environment 4
- CE 480 Chemistry of Environmental Toxins 4
- CE 481 The Columbia River as a System 2
- CE 482 Introduction to Sediment Transport 4
- CE 483 Estuarine Circulation 4
- CE 469 Subsurface Hydrology 4
- CE 485 Environmental Cleanup and Restoration 4
- CE 486/Ch 486 Environmental Chemistry 4
- CE 487/Ch 487 Aquatic Chemistry 4
- CE 488/ESM 460 Air Quality 4
- CE 489 Introduction to Advanced Environmental Fluid Mechanics 4
- CE 490 Soil and Groundwater Restoration 4
- CE 565/ESM 525 Watershed Hydrology 4
- CE 566 Environmental Data Analysis 4
- CE 568 Advanced Methods in Hydrologic System Analysis 4
- CE 571/CE 671 Subsurface Contaminant Transport 4
- CE 572 Environmental Fluid Mechanical Transport 4
- CE 573 Numerical Methods in Environmental and Water Resources Engineering 4
- CE 576 Environmental Fluid Mechanics 4
- CE 578 Water Quality Modeling 4

CE 401 – CE 406: 4 credits recommended maximum across all numbers, 2 maximum for CE 404 Internship; additional credits require Department Chair approval.

CE 407 in ENVE discipline area: 3 credits recommended maximum; additional credits require Department Chair approval.

CE 410 in ENVE discipline area only.

BSENV E Students are also allowed to take one of the following courses for elective credit:

- Ph 375U (p. 1057), Ph 471, Ph 477, G 424 (p. 824), Geog 488 (p. 843), or Geog 492 (p. 843). Additional elective classes outside of the CE subject area require prior approval from the CEE Department; requests should be sent to ceedept@pdx.edu prior to the start of the term. Subtotal: 187

**ENVIRONMENTAL ENGINEERING MINOR**

**Preparatory Prerequisite Courses**

These courses are required preparation for the Environmental Engineering Minor required courses, but are not part of the stated minor. Please meet with an Engineering Advisor for course planning support.

- Mth 251 Calculus I 4
- Mth 252 Calculus II 4
- Mth 261 Introduction to Linear Algebra 4
- EAS 211 Statics 4
EAS 215  Dynamics  4

**Subtotal: 20**

### REQUIREMENTS

A student wishing to minor in environmental engineering must complete the following courses with a minimum grade of C and a minimum GPA of 2.33:

<table>
<thead>
<tr>

</tbody>
</table>

**Subtotal: 54**

and a minimum of 4 credits of approved electives. All courses must be taken for letter grade and at least one-third of the credit hours must be taken at Portland State University.

**Subtotal: 54**

Course requirements for the minor also meet partial eligibility requirements for admission to the BSCE or BSENV E programs. Students who complete the requirements for the minor may wish to apply for admission to these programs. BSCE and BSENV E students cannot minor in environmental engineering. Students can schedule a meeting with an Engineering Advisor by calling 503.725.4631.

### HONORS PROGRAM - BSCE AND BSENV E

The Civil and Environmental Engineering Honors Program gives highly-motivated engineering students the chance to develop undergraduate degree programs that reflect their particular interests – many of these students go on to graduate school. Working closely with a CEE faculty advisor, Honors Program students choose a research area and complete an Honors thesis, usually during their senior year.

**Honors Program Admissions Requirements:**

- Submit CEE Honors Program application form found on the CEE website (www.pdx.edu/cee);
- Completion of a minimum of 90 credit hours;
- Completion of courses required for admission to the BSCE or BSENV E programs;
- Minimum PSU GPA of 3.50

Interested students should apply by spring quarter of the junior year but no later than the beginning of his/her senior year.

Upon acceptance into the Honors Program, the student will declare one of the following areas of interest within CEE for his/her research topic: Environmental/Water Resources, Geotechnical, Structural, or Transportation. The CEE Chair, in consultation with faculty, will assign the student an Honors advisor. The advisor will work with the student to complete a written proposal for the Honors thesis research. Honors thesis will follow ASCE document guidelines for style and formatting. CEE students who meet Honors Program requirements will graduate with Honors and will receive special recognition on their diploma.

**Honors Program Graduation Requirements:**

- Completion of a written honors thesis in conjunction with a faculty adviser with a minimum grade of B+
- Presentation of research to CEE faculty/students in seminar format
- PSU GPA above 3.50

Note: The Honors thesis will count as a BSCE or BSENV E elective in the senior year: CE 403, Honors Thesis, 4 credit hours. Students in the University Honors Program can substitute HON 403 for CE 403 credits, and apply the thesis credits to both the University Honors Program requirements, as well as the CE or ENVE engineering elective requirements. Students working in both programs should schedule advising sessions with both the University Honors Program and the CEE Department early to ensure correct course planning for those two programs.

**BACHELOR'S + MASTER'S PATHWAY**

The Bachelor's+Masters Pathway allows currently admitted PSU BSCE or BSENV E students to get a head-start on their master's degree. Undergraduate students admitted into the Bachelor's+Masters Pathway are able to take up to 16 credit hours of electives taken at 500 level and apply these credits to both their undergraduate and graduate degree
requirements. This benefit of shared coursework credit effectively shortens the minimum time required to complete the master’s degree. The CEE Master’s program requires meeting the appropriate core and elective course requirements for an individual specialty area in structural, geotechnical, transportation, or environmental and water resources engineering.

Pathway students must still apply to the Graduate Program and will be admitted to the CEE Master’s graduate programs as long as the Bachelors+Masters Pathway continuation criteria are satisfied. Students must start their master's program within one academic year of BSCE/BSENV E graduation in order to use their pathway courses towards their master's degree. Students not meeting the continuation criteria can still apply for admission to the master's degree program without the benefits of shared coursework credits.

As an undergraduate student, the cost of the 500 level credits will be at the undergraduate tuition rate. Post-bac students will be charged graduate rates per PSU policy. To be eligible for the Pathway program, students must meet the PSU institutional requirement for residency for the undergraduate degree program (45 of the last 60 credits to be taken in residence at PSU).

**Application of Shared Coursework Credits**

Once a Bachelors+Masters Pathway student is formally admitted into the graduate CEE program, the Department will request the 500 level credits taken as an undergraduate to be applied to the master's degree. Note that:
- Only coursework with a grade of B, or higher, will be applied.
- Any coursework taken prior to formal admission into the Bachelors+Masters Pathway is not eligible for shared credit.

**Admission Criteria to Pathway Program**

Students that meet the following admission criteria for the Bachelors+Masters Pathway will receive notification from the CEE Department that they are eligible to be enrolled in the program:
- Formally admitted into the PSU BSCE/BSENV E Program.
- Completed 16 credit hours of approved 300 or 400 level upper division BSCE/BSENV E coursework, excluding university studies upper division cluster courses.
- Institutional GPA of 3.30 at time of eligibility notification.

Eligible students must respond to the CEE Department eligibility notification with intent to join the pathway program by April 15th of the same year to be admitted to the Pathway.

**Continuation Criteria Pathway Program**

- Maintain an institutional GPA of 3.30 through to completion of BSCE/BSENV E degree
- Enroll in CEE Master’s graduate program within 1 year of graduation from BSCE/BSENV E

**Graduate programs - Civil and Environmental Engineering**

**ADMISSION REQUIREMENTS**

**MS and MEng**

Admission requirements for the MS and MEng degrees include a bachelor's degree in an engineering field, science, or closely related area with a minimum GPA of 3.00. Courses should include calculus through differential equations, physics and chemistry, and all the necessary prerequisites for the graduate courses that comprise the student’s program of study. Applicants without these qualifications may be considered for conditional admission. To be considered for admission as a conditional student, the applicant must have a minimum GPA of 2.75. Applicants must also meet PSU graduate admission requirements. Please refer to Graduate Studies for these requirements. Application instructions for the MS and MEng programs are available at pdx.edu/cee/graduate-admissions.

**PhD**

Admission requirements for the PhD program include a MS degree in an engineering field, science, or closely related area. All applicants must contact a CEE faculty member prior to submitting an application seeking a PhD advisor. For admission, a student must have a CEE faculty member agree to be his/her PhD advisor. Applicants must also meet PSU graduate admission requirements. Please refer to Graduate Studies for these requirements. Application instructions for the PhD program are available at pdx.edu/cee/graduate-admissions.

**CIVIL AND ENVIRONMENTAL ENGINEERING MS**

The Master of Science in Civil and Environmental Engineering program is designed to provide students with the technical and professional knowledge necessary to develop their abilities to seek creative solutions to complex problems in their field of interest. The program involves advanced courses in the areas of structural analysis and design, transportation engineering, water resources, environmental engineering, and geotechnical engineering, as well as science and mathematics. Flexibility is achieved by designing programs of study to meet individual needs. MS students must complete a thesis or research project.
conducted under the supervision of a faculty member. Please see the Degree Requirements section for full details.

**Application Deadlines - MS**

- Fall - January 1 (for strongest consideration for funding as a Graduate Research or Teaching Assistant)
- Winter - September 1
- Spring - November 1

**Degree Requirements - MS**

MS students are required to complete tentative degree plans after completing 18 credits. The degree plan must be approved by their advisor. An MS study plan form for this purpose is available on the CEE website (www.pdx.edu/cee). Coursework taken without advisor approval may not be accepted as part of the student’s program. Students must also meet the University master’s degree requirements.

The MS program consists of two options:

- The thesis option consists of a total of 45 credit hours including 6-9 hours of CE 503 Thesis credits plus successful completion of a final oral examination covering the thesis. Coursework may include up to 6 hours of CE 501 Research, CE 504 Internship, CE 505 Reading and Conference, or CE 506 Projects;
- The project option requires completion of 45 credit hours including 4 CE 501 Research credit hours on a research project that produces a report and technical presentation. Coursework may include up to 8 hours of CE 504 Internship, CE 505 Reading and Conference, or CE 506 Projects.

Internship credits (CE 504) require a project and final report; these credits must be arranged in advance between the CEE faculty advisor and the student.

Student research is conducted under the supervision of faculty. Please see CEE faculty profiles on the CEE website (www.pdx.edu/cee) to learn about current faculty research areas.

CEE courses for which the student receives a grade of "C+" or lower will not be counted toward fulfilling the requirements. Grades of C+, C, or C- may sometimes be counted toward the degree with the approval of the student’s advisor and the Graduate Program Chair.

All courses taken in the Department of Civil and Environmental Engineering by degree candidates must be taken for a letter grade, unless a course is only offered with a pass/no pass option. Courses outside the Department of Civil and Environmental Engineering may be taken pass/no pass only with the consent of the student’s advisor. Non-degree seeking students may take Civil and Environmental Engineering courses pass/no pass with the consent of the instructor.

In both options, a minimum of 30 credit hours must be taken in the CEE Department unless otherwise approved by the Graduate Program Chair. To become a candidate for the MS degree, the student must successfully complete all departmental requirements for one of the options described above.

Departmental policies and other helpful information for graduate students can be found in the Department’s Graduate Handbook, located on the CEE website (www.pdx.edu/cee). All other degree requirements for the MS program are established by PSU’s Graduate School. Please refer to the Graduate School for information concerning advanced degree requirements, degree status, petition processes, thesis preparation, and final oral exam.

**CIVIL AND ENVIRONMENTAL ENGINEERING MENG**

The Master of Engineering in Civil and Environmental Engineering program is a non-research based professional degree. MEng students may be full-time or part-time while working in the engineering field. These students complete an advanced degree without a thesis/project requirement and can also use internship credits toward their degree. Please see the Degree Requirements section below for full details.

MEng students are required to complete tentative degree plans after completing 18 credits. The degree plan must be approved by their advisor. An MEng study plan form for this purpose is available on the CEE website (www.pdx.edu/cee/graduate-programs). Coursework taken without advisor approval may not be accepted as part of the student’s program. Students must also meet the University master’s degree requirements.

**Application Deadlines - MEng**

- Fall - January 1
- Winter - September 1
- Spring - November 1

**Degree Requirements - MEng**

A total of 48 graduate credits are required for the MEng program. Coursework may include up to 8 hours of CE 501 Research, CE 504 Internship, CE 505 Reading and Conference, or CE 506 Projects.

Internship credits (CE 504) require a project and final report; these credits must be arranged in advance between the CEE faculty advisor and the student.
CEE courses for which the student receives a grade of "C+" or lower will not be counted toward fulfilling the requirements. Grades of C+, C, or C- may sometimes be counted toward the degree with the approval of the student's advisor and the Graduate Program Chair.

All courses taken in the Department of Civil and Environmental Engineering by degree candidates must be taken for a letter grade, unless a course is only offered with a pass/no pass option. Courses outside the Department of Civil and Environmental Engineering may be taken pass/no pass only with the consent of the student's adviser. Non-degree seeking students may take Civil and Environmental Engineering courses pass/no pass with the consent of the instructor.

A minimum of 30 credit hours must be taken in the CEE Department unless otherwise approved by the Graduate Program Chair. To become a candidate for the MEng degree, the student must successfully complete all departmental requirements as described above.

Departmental policies and other helpful information for graduate students can be found in the Department's Graduate Handbook, located on the CEE website (www.pdx.edu/cee). All other degree requirements for the PhD program are established by PSU's Graduate School. Please refer to the Graduate School for information concerning advanced degree requirements, degree status, and petition processes.

CIVIL AND ENVIRONMENTAL ENGINEERING PHD

The PhD in Civil and Environmental Engineering program offers advanced courses in the areas of structural analysis and design, water resources and environmental engineering, transportation engineering, and geotechnical engineering. This program aims to educate technical experts to meet challenges related to enhancing infrastructure and the environment. Students learn about conducting research and solving technical problems that have an impact both regionally and globally. The PhD program culminates in a written dissertation representing an original contribution to knowledge in the field, significantly enlarging, modifying or reinterpreting what was previously known. Students work closely with their advisor, but PhD research is an original, independent investigation of the chosen research topic.

Application Deadlines - PhD

- Fall - January 1 (for strongest consideration for funding as a Graduate Research or Teaching Assistant)
- Winter - September 1
- Spring - November 1

Degree Requirements - PhD

A PhD student must complete the following departmental requirements:

1. Complete a minimum of 51 credits (including coursework and dissertation credits) beyond the M.S. degree;
2. Complete an approved program of study, which includes a minimum of 24 hours coursework. Coursework may include up to 8 hours of CE 601 Research, CE 604 Internship, CE 605 Reading and Conference, or CE 606 Projects;
3. Meet the University's residency requirement;
4. Pass the comprehensive examination;
5. Present and pass a proposal defense for advancement to candidacy;
6. Complete 27 credit hours of dissertation credit (CE 603) leading to the completion of a doctoral dissertation;
7. Present and pass the final oral dissertation defense; and
8. Submit the written dissertation in compliance with University guidelines and deadlines.

Internship credits (CE 604) require a project and final report; these credits must be arranged in advance between the CEE faculty advisor and the student. CEE courses for which the student receives a grade of "C+" or lower will not be counted toward fulfilling the requirements. Grades of C+, C, or C- may sometimes be counted toward the degree with the approval of the student's advisor and the Graduate Program Chair.

All courses taken in the Department of Civil and Environmental Engineering by degree candidates must be taken for a letter grade, unless a course is only offered with a pass/no pass option. Courses outside the Department of Civil and Environmental Engineering may be taken pass/no pass only with the consent of the student's adviser. Non-degree seeking students may take Civil and Environmental Engineering courses pass/no pass with the consent of the instructor.

Departmental policies and other helpful information for graduate students can be found in the Department's Graduate Handbook, located on the CEE website (www.pdx.edu/cee). All other degree requirements for the PhD program are established by PSU's Graduate School. Please refer to the Graduate School for the university's doctoral degree requirements.

HYDROLOGY GRADUATE CERTIFICATE

The Graduate Certificate of Hydrology is designed to give students advanced training in hydrology, and leads to
professional certification with the American Institute of Hydrology (AIH). Requirements for the certificate are listed within the Environmental Science and Management section (p. 253).

**SUSTAINABILITY GRADUATE CERTIFICATE**

The Graduate Certificate in Sustainability offers an integrated series of post-baccalaureate courses that allow students to deeply explore and understand the three spheres of sustainability: social, economic, and environmental. The courses cover theory as well as practice, providing experience analyzing real-world approaches and solutions. Courses can be taken by students admitted solely to the certificate program or concurrently enrolled in masters and doctoral programs at PSU. The certificate is administered by the Economics department (p. 383). More information about the certificate and application procedures can be found at https://www.pdx.edu/economics/academics/programs/graduate/sustainability-graduate-certificate.

**TRANSPORTATION GRADUATE CERTIFICATE**

The Graduate Certificate in Transportation is a 21 credit hour program designed to build the technical and analytical knowledge of those who are in or wish to enter the transportation field. This program could be completed in a single year on a full-time basis or over two years on a part-time basis. The certificate includes courses from the Toulan School of Urban Studies and Planning and the Department of Civil and Environmental Engineering. Credits taken as part of this certificate program may be used to satisfy partial M.S. degree requirements in either program. Admission to this program will require an undergraduate degree at an accredited university and a GPA that meets university admission requirements. More information about the certificate and application procedures can be found in the catalog listing (p. 412).

**Computer Science**

120 Fourth Avenue Building
503-725-4036
www.pdx.edu/computer-science/

- B.S.—Computer Science
- Minor in Computer Science
- M.S.—Computer Science
- Ph.D.—Computer Science
- Graduate Certificate in Computer Security

The Department of Computer Science offers a full range of courses and degree programs that are designed to provide students with the educational background to achieve a career in the computing industry. We offer a community to learn, discover, innovate, and share a curriculum based on the application and theoretical foundations of Computer Science. Our faculty members specialize in a variety of research areas such as artificial intelligence & machine learning; computer science education; computer security & privacy; computer vision & computer graphics; data science; natural language processing; programming languages & formal methods; software engineering; systems & networking; and theory.

**Undergraduate program**

The undergraduate computer science program is designed to provide students with the educational background required for a professional career in the computing industry and for further study at the graduate level. The program includes a core of required courses and an elective program of courses over a wide range of topics. Seniors work in teams to carry out community-based projects during the two-term capstone course in software engineering.

The computer science curriculum at Portland State University is accredited by the Computing Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - Telephone: (410) 347-7700. This national organization sets standards for computer science education defined in terms of curricular content, quality of faculty, and adequacy of facilities.

**DEGREE MAPS AND LEARNING OUTCOMES**

To view the degree maps and expected learning outcomes for Computer Science's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

**PROGRAM OBJECTIVES**

The objectives of the undergraduate program in computer science are to produce graduates with:

- a thorough understanding of and ability to apply the core principles and practices of computing;
- the professional skills to meet the immediate needs of regional and other employers, while being able to adapt to rapidly changing technology;
- a foundation in the supporting areas of communication, science, and mathematics;
- an understanding of ethical responsibilities in the social context in which their contributions occur;
- the motivation and preparation to engage in life-long learning, including entering advanced degree programs in computer science.
Students who are intending to graduate with an undergraduate degree in computer science must be admitted to Portland State University and file the Application to the Computer Science Program with the Department of Computer Science after completing the lower-division requirements. Students with questions should contact the Computer Science Department. No more than 8 upper-division computer science credits (including any approved upper-division transfer credits) taken prior to admission to the program will be counted toward the student’s departmental requirement of 52 upper-division computer science credits (CS 300, CS 305, CS 320, CS 333, CS 350, CS 486, CS 469, CS 470 and 24 credits of upper-division computer science electives). Students also must be in admitted status during the term they intend to graduate.

**CS Admission Requirements**

Applies to students pursuing a B.S. in Computer Science wishing to enroll in upper-division CS courses for Fall 2021 and Winter 2022.

**Computer Science Dept. website:** www.pdx.edu/computer-science

**Terms of Admission & Deadlines**

- Fall and winter terms of admission only. Fall admission is preferred.
- The Application deadline for fall is April 15, for winter, September 1.
- The Application for Undergraduate Admission is available at https://go.cecs.pdx.edu/CS-ug-application
- A detailed four-year course plan is included in the “Computer Science Blue Sheet”, also available from the above website.

**Minimum Eligibility for Consideration**

1. Completion of each of the following core CS courses with a C or better by the application deadline and an All Attempts CS GPA of at least 2.0.
   - CS 162 Intro to Computer Science (4)
   - CS 163 Data Structures (4)
   - CS 202 Programming Systems (4)
   - CS 250 Discrete Structures I (4)
   - All Attempts CS GPA

2. Completion of each of the following Non-CS courses with a grade of C- or better by the application deadline.
   - MTH 251
   - MTH 252
   - First two terms of an Approved 3-term Lab Science Sequence

   While not required for admission, students are strongly encouraged to complete the third term of their Approved 3-term Lab Science Sequence and MTH 253 or MTH 261 before taking upper division Computer Science courses. These classes are graduation requirements.

3. Completion of Freshman Inquiry with grades of C- or better, or for students transferring 30 or more credits to PSU, WR 121 and COMM 220 with grades of C- or better by the application deadline.

4. Successful completion of the CS Transfer Programming Proficiency Demo.
   - As part of their application to the CS program, all students must satisfactorily complete a programming proficiency demonstration. See Computer Science Dept. website for more information. Students who have not yet completed CS 202 with a C or better at PSU will be sent a link to sign up for the proficiency demo upon submission and review of their CS application during the appropriate deadline.

**Competitive Admission**

- Capacity is limited. Admissions are competitive, based on students’ All Attempts CS GPA. Refer to Student Statistics on the Computer Science Department’s website for information on the GPA required for admission by recent cohorts.
- A student’s All Attempts CS GPA will be computed based on grades recorded in the PSU transcript system by the application deadline. Students transferring courses to PSU from other institutions are responsible for ensuring their grades are transferred to PSU prior to the admission decision deadline (approximately three
weeks after the application deadline). Students whose grades are transferred after the decision deadline will be considered for any remaining openings. Grades of courses completed after the application deadline will not be considered.

Appeals
- Students denied admission to the CS program may submit a written appeal using the official CS Appeals Form to the CS Appeals Committee. All decisions are final.

Priority Registration
- Most applicants will have completed 90 credits by the time they apply. This gives them registration priority over students that have completed less than 90 credits. Applicants with less than 90 credits may find classes are full by the time they are able to register. The Computer Science Department is unable to provide overrides to allow earlier registration.

Additional testing/bridge classes
- Proficiency testing is required of students who did not complete and pass CS 202 at PSU.
- No bridge class required.

Pass/No Pass
- All required classes must be taken for a grade (not P/NP) unless they are only offered as P/NP.
- No GPA penalty for a Pass or No Pass (but the student may be required to retake the class for a letter grade).

Additional Information (exceptions, preferences, etc.)
- No preference is given to PSU students versus students who completed required courses elsewhere.

Continuation Criteria
- Admitted CS undergraduate students who are not making acceptable progress towards their degree requirements will be dropped from the program and required to reapply for admission. Acceptable progress is defined as completion of at least eight credits of coursework with acceptable grades (C or better for required CS courses, C- or better for required non-CS courses), satisfying departmental requirements, over the preceding academic year. Readmission will be determined by the CS Undergraduate Committee.

Prerequisite Policy
- In order to enroll in any upper division or graduate Computer Science course, students must be admitted to the Computer Science program or have the instructor’s permission. Before enrolling in any Computer Science course, students should read the course descriptions and ensure that they have completed all prerequisites with a C or better for undergraduate courses, or a B or better for graduate courses. Students who have not met this requirement or who do not meet applicable admission requirements may be administratively dropped from the course.

Laptop Requirement
- Beginning in fall 2021, students registering for upper division (300- or above) Computer Science courses, must have access to a laptop with wireless Internet access meeting a set of minimum requirements. These minimum requirements can be found on the computer science website at https://www.pdx.edu/computer-science/laptop. Chromebooks, iPads, and similar devices do not meet the requirements to run many applications that may be used in various CS courses.

Department Communication
- Fall 2021 and winter 2022 admission requirements are available the preceding academic year’s spring term (spring 2021).

COMPUTER SCIENCE B.S.
Majors in computer science must complete the following University and departmental degree requirements.
1. All computer science courses used to satisfy the departmental major must be graded C or better. Courses taken outside the department as part of departmental requirements must be graded C- or better. If a course is offered only on a Pass/No Pass (P/NP) grading scale, it must be graded as a Pass.
2. All courses specifically required by the department must be taken for a letter grade unless a required course is only offered with a Pass/No Pass option.
3. After admission to the computer science program, students are required to complete a minimum of 44 upper-division computer science credits in residence at PSU.

4. Freshmen entering with 29 or fewer prior university/college credits must complete all University Studies requirements, including freshman and sophomore inquiry sequences and upper-division cluster courses.

5. Transfer students must have a minimum of 39 credits of University Studies courses and/or arts and letters/social science courses prior to graduation; 12 of these credits are upper-division cluster courses that must be taken at PSU. Transfer students should consult with the CS departmental adviser for more information.

The following is a sample curriculum. Students choosing to make modifications to this schedule are urged to consult with an adviser.

### REQUIREMENTS

#### Freshman year

**Subtotal: 44**

Note: The University requires all students to have a minimum of 72 upper-division credits to graduate. Since fewer than 72 upper-division credits are required in computer science, mathematics, and general education for the computer science major, the extra credits of upper-division work must be taken from either the approved math or science electives, or the free electives.

### UPPER DIVISION CREDITS

#### Approved upper-division Computer Science electives

The total may include any regular 300- and 400-level computer science course, and any of the courses:

- ECE 455 AI: Neural Networks I 4
- ECE 456 AI: Neural Networks II 4
- ECE 485 Microprocessor System Design 4
- ECE 486 Computer Architecture 4
- Stat 451 Applied Statistics for Engineers and Scientists I 4

except that no more than a total of 4 credits may be taken from:

- CS 401 Research 1-6
- CS 405 Reading and Conference 1-6
- CS 406 Special Projects 1-6
- CS 407 Seminar 1-6
- CS 409 Practicum 1-9

At least 4 credits of approved "Programming Intensive" courses must be taken. These courses can be identified by the "P" suffix in the course number (e.g., CS 410P, CS 465P, CS 494P, etc.). Additionally, CS 404, University Studies courses, and courses specifically described as not being applicable to the CS degree may not be used.
Approved Laboratory Science

Students must select one of the following 15 credit sequences, including their associated laboratories:

**Sequence 1:**
- Ph 211 General Physics (with Calculus) I 4
- Ph 212 General Physics (with Calculus) II 4
- Ph 213 General Physics (with Calculus) III 4
  With Ph 214 Lab for Ph 201 or Ph 211 or Ph 221 or Ph 231 1
- Ph 215 Lab for Ph 202 or Ph 212 or Ph 222 or Ph 232 1
- Ph 216 Lab for Ph 203 or Ph 213 or Ph 223 or Ph 233 1

**Sequence 2:**
- Ch 221 General Chemistry I 4
- Ch 222 General Chemistry II 4
- Ch 223 General Chemistry III 4
  With Ch 227 General Chemistry Laboratory 1
- Ch 228 General Chemistry Laboratory 1
- Ch 229 General Chemistry Laboratory 1

**Sequence 3:**
- Bi 211 Principles of Biology: Molecular Cell Biology & Genetics 4
- Bi 212 Principles of Biology: Development, Evolution & Ecology 4
- Bi 213 Principles of Biology: Organisms, Biodiversity & Conservation 4
  With Bi 214 Principles of Biology Lab I 1
- Bi 215 Principles of Biology Lab II 1
- Bi 216 Principles of Biology Lab III 1

Approved Science electives

Students must complete additional credits of approved science electives chosen from Biology, Chemistry, Physics, Geology, or Environmental Science. A total of at least 19 credits of approved laboratory science and approved science electives must be taken.

Approved Mathematics electives

Students must complete 7 or more credits of approved mathematics electives. The current list of approved courses includes:
- Mth 261 Introduction to Linear Algebra 4
- Mth 311 Introduction to Mathematical Analysis I 4
- Mth 343 Applied Linear Algebra 4
- Mth 344 Introduction to Group Theory and Applications 4
- Mth 346 Number Theory 4
- Mth 356 Discrete Mathematics 4
- Mth 457 The Mathematical Theory of Games I 3
- Mth 458 The Mathematical Theory of Games II 3
- Mth 461 Graph Theory I 3
- Mth 462 Graph Theory II 3
- Stat 366 Introduction to Experimental Design 4
- Stat 451 Applied Statistics for Engineers and Scientists I 4
- Stat 452 Applied Statistics for Engineers and Scientists II 3
- Stat 464 Applied Regression Analysis 3
- Stat 467 Applied Probability I 3
- Stat 468 Applied Probability II 3

Other upper-division mathematics or statistics courses may be used to satisfy the requirement with prior written approval from the Computer Science Undergraduate Adviser.

COMPUTER SCIENCE MINOR

A minor in computer science is available within the Maseeh College of Engineering and Computer Science in the area of computer science.

**REQUIREMENTS**

To earn a minor in computer science, a student must complete 24 credits as follows:

- **Courses**
  - CS 162 Introduction to Computer Science 4
  - CS 163 Data Structures 4
  - CS 201 Computer Systems Programming 4
  - CS 202 Programming Systems 4
  - Approved CS Minor courses 8

Only grades of C or better count toward departmental requirements. At least 12 of the required 24 credits must be taken at Portland State University.

Approved CS Minor courses include any lower-division or upper-division Computer Science course. Permission to register for upper-division CS courses requires successful completion of the Programming Proficiency Demonstration.

Subtotal: 24

COMPUTER SCIENCE - HONORS TRACK
The honors degree in computer science requires the writing of an honors thesis. Details about the program can be found on the computer science website at https://www.pdx.edu/computer-science/honors-track.

BIOMEDICAL INFORMATICS PROGRAM

Portland State University and Oregon Health & Science University offer an accelerated, collaborative degree program in biomedical informatics. Designed for high achieving freshmen, this program combines courses from both schools to award a B.S. in computer science and Master of Biomedical Informatics at the end of five years. Details about the program can be found on the computer science website at https://www.pdx.edu/computer-science/biomedical-informatics.

Graduate Programs

ADMISSIONS REQUIREMENTS

To be considered for admission to the graduate program in computer science, the student must have a four-year baccalaureate degree from an accredited institution. Prospective graduate students are not required to have a bachelor's degree in Computer Science, but they must make up the background needed for graduate study before applying for admission. The Grad Prep program described at https://www.pdx.edu/computer-science/grad-prep may be helpful in developing knowledge of the core curriculum of an undergraduate computer science degree.

An undergraduate GPA of at least 3.00 in upper-division is required. Note that the department has waived its requirement for the Graduate Record Examination (GRE) through fall 2022. Applicants should also submit two letters of recommendation, transcripts, and a statement of purpose to the department.

Normally, an applicant to the Ph.D. program will have an M.S. in computer science. Students may apply to the M.S. program and later apply to the Ph.D. program. Students with a bachelor’s degree may apply directly to the Ph.D. program.

COMPUTER SCIENCE M.S.

The Master's program in computer science is designed to prepare students for advanced careers in the computer industry, to create a research environment in computer science, and to prepare students for graduate work at the Ph.D. level.

See University Master's degree requirements (p. 51). The Master's program in computer science consists of two options. The first option involves the completion of an approved program of 45 credits. The second option requires the completion of an approved program of 45 credits, which includes 6 to 9 credits of thesis. In both options, coursework is to include core courses in theory and programming practice, plus a 9-credit concentration in one of the areas listed on the computer science departmental website. For the thesis option, successful completion of a final oral examination covering the thesis is required.

THEORY REQUIREMENT

One theory course from:

- CS 581 Theory of Computation 3
- CS 584 Algorithm Design and Analysis 3
- CS 578 Programming Language Semantics 3

Subtotal: 3

PRACTICE REQUIREMENT

One programming practice course from:

- CS 558 Programming Languages 3

Or any 500-level course designated by the department as a "Programming Intensive" course, as indicated by the "P" suffix in the corresponding 400-level course number.

Subtotal: 3

ELECTIVES

Students must take enough electives to complete 45 total credits for the Master's degree. Electives can be any 500-level CS course (CS 501, CS 502, CS 504, and CS 509 credits cannot be applied). A limited number of credits taken outside Computer Science can count towards the elective requirements, with advisor approval. A minimum of 30 credits must be taken in Computer Science at Portland State University. Given this, students may use a combined total of 15 pre-admission, transfer, and non-CS credits toward their Master's degree with CS Graduate Advisor approval. Students may use credits from a combination of these three categories, but if the total exceeds the 15 credit limit, then the excess will not be counted towards the degree.

- Pre-admission credits (taken before the term of formal admission) can include both transfer and PSU credits. Pre-admission credits taken at PSU are requested via a DARS exception submitted to the Graduate School. This request should be made soon after admission to the graduate program.
- Transfer credits refer to credits taken from another institution other than PSU. To request approval of transfer credits, complete and submit the GO-21M form (Proposed Transfer Credit) to the CS Graduate Advisor. Students should submit the GO-21 form during the first term of enrollment in the program, so there is sufficient time to complete any additional coursework that may be necessary. Any transfer credits must be approved before graduation paperwork can be processed. OHSU
joint campus credits are considered transfer credits and are transferred via a different process.

- Non-CS credits taken outside of Computer Science, such as ECE or Math, can count towards elective requirements once approved. Students should obtain advisor approval in advance to avoid the risk of taking a course that will not be approved. To request approval, submit a plan of study with the courses listed to the Graduate Advisor. Non-CS courses must be graduate level. Note that only one ETM course will count towards the elective requirements. All ETM courses are eligible to transfer but students are limited to using only one for the CS degree requirements.

Subtotal: 30

**TRACK REQUIREMENT**

Take three courses from one of the following tracks:

### Databases

Covers concepts, languages, implementation and application of database management systems. Other topics that have been offered in the track include formal foundations of databases, databases for cloud and cluster environments, and data stream systems.

- **CS 586** Introduction to Database Management Systems 3

And two courses from the following*:

- **CS 587** Database Management Systems Implementation 3
- **CS 558** Programming Languages 3

*Or any approved CS 510 course in Databases.

### Artificial Intelligence and Machine Learning

Covers modern algorithms underlying intelligent and learning systems. Examples of topics covered in courses on this track include knowledge representation, planning, reasoning, combinatorial and adversarial search methods, natural language processing, computer vision, statistical machine learning, and evolutionary and reinforcement learning.

- **CS 541** Artificial Intelligence 3
- **CS 545** Machine Learning 3

One course from the following*:

- **CS 542** Advanced Artificial Intelligence: Combinatorial Games 3
- **CS 543** Advanced Artificial Intelligence: Combinatorial Search 3
- **CS 546** Advanced Topics in Machine Learning 3
- **CS 570** Machine Learning Seminar 1
- **Stat 671** Statistical Learning I 3
- **Stat 672** Statistical Learning II 3

*Or any approved CS 510 course in Artificial Intelligence or Machine Learning.

### Languages and Programming

Focuses on the design, implementation, and use of programming languages. It includes exposure to a variety of programming paradigms, experience using programming languages to express the essential abstractions of a problem domain, courses on programming language implementation, and the study of formal methods for specifying and reasoning about programs and programming languages.

- **CS 558** Programming Languages 3

Two courses from the following*:

- **CS 515** Parallel Programming 3
- **CS 520** Object-Oriented Programming & Design 3
- **CS 553** Design Patterns 3
- **CS 557** Functional Programming 3
- **CS 578** Programming Language Semantics 3

*Or any approved CS 510 course in Languages and Programming.

### Security

Focuses on protecting computing systems and user data from unauthorized access and use. Topics include cryptography, network and host-based access control, vulnerability analysis, penetration testing, and reverse engineering.

- **CS 591** Introduction to Computer Security 3

Two courses from the following*:

- **CS 576** Computer Security Research Seminar 3
- **CS 585** Cryptography 3
- **CS 592** Malware Reverse Engineering 3
- **CS 593** Digital Forensics 3
- **CS 595** Web and Cloud Security 3
- **CS 596** Network Security 3

*Or any approved CS 510 course in Security.

### Software Engineering

Studies the principles, processes, techniques, and tools for building software systems. Topics include software requirement, design, development, validation, and maintenance.

- **CS 554** Software Engineering 3
Two courses from the following*:

- CS 552 Building Software Systems with Components 3
- CS 553 Design Patterns 3
- CS 555 Software Specification and Verification 3
- CS 556 Software Implementation and Testing 3
- CS 561 Open Source Software Development Laboratory 3

*Or any approved CS 510 course in Software Engineering.

Systems and Networking

Studies the design and implementation of operating systems, wired and wireless computer networks including high performance computer systems, data centers, cloud computing architectures, distributed systems, fault tolerance, concurrency, systems programming, and theoretical topics related to these areas.

- CS 533 Concepts of Operating Systems 3
- CS 594 Internetworking Protocols 3

One course from the following*:

- CS 515 Parallel Programming 3
- CS 538 Computer Architecture 3
- CS 572 Operating System Internals 3
- CS 598 Introduction to Wireless Network Protocols 3

*Or any approved CS 510 course in Systems and Networking.

Subtotal: 9

Total Credit Hours: 45

Application for Graduation

You must apply for graduation no later than the first Friday of the term you wish to graduate.

The application for graduation can be found at:
http://www.pdx.edu/ogs/forms

Cumulative Graduate GPA

You must have a graduate GPA of 3.0 or above in all graduate level coursework taken at PSU to graduate from a master's degree, doctoral degree, or graduate certificate program at PSU.

Degree Program GPA

You must have a GPA of 3.0 or above in all courses being used to meet your degree requirements. The number of credits being used to meet your degree requirements appears below along with the GPA for those courses. You must have the minimum number of credits needed for your degree before you can graduate.

COMPUTER SCIENCE PH.D.

The doctoral degree program in computer science is designed to prepare students for advanced research or university teaching in the field.

See University doctoral degree requirements (p. 54). The student must complete an approved program of 90 graduate credits, including 18 credits of core courses and 27 credits of dissertation research. To be admitted to Ph.D. candidacy, a student must pass the Research Proficiency Examination (RPE) and must present an acceptable dissertation proposal. The dissertation comprises original research work, which is expected to be of a quality meriting publication in a refereed journal or conference.

CYBERSECURITY GRADUATE CERTIFICATE

The cybersecurity certificate program requires admission as a graduate student, similar to admission to the Master's program, in the Computer Science department. The program requires 21 hours total of graduate classes. There are three core classes for a total of 6 hours. In addition, four optional classes must be taken for the needed additional 15 credit hours. In summary, seven graduate classes must be taken, two are core, and five classes are electives.

**Required Core Courses**

- CS 591 Introduction to Computer Security 3
- CS 595 Web and Cloud Security 3

Subtotal: 6

**Five of the following courses***:

- CS 554 Software Engineering 3
- CS 555 Software Specification and Verification 3
- CS 556 Software Implementation and Testing 3
- CS 576 Computer Security Research Seminar 3
- CS 585 Cryptography 3
- CS 592 Malware Reverse Engineering 3
- CS 593 Digital Forensics 3
- CS 594 Internetworking Protocols 3
- CS 596 Network Security 3

*Or any CS 510 course in Security.

Subtotal: 15

Total Credit Hours: 21

Electrical and Computer Engineering

1900 SW Fourth Ave., Suite 160
503-725-3806
WELCOME TO PORTLAND STATE UNIVERSITY

www.pdx.edu/electrical-computer-engineering/
- B.S.—Computer Engineering
- B.S.—Electrical Engineering
- Minor in Electrical Engineering
- M.S.—Electrical and Computer Engineering
- Ph.D.—Electrical and Computer Engineering

Mission, Vision & Values

Mission
We prepare students for successful engineering careers and lifelong learning, and we conduct research that creates new technologies and engineering knowledge.

Vision
Our vision is to be a source of premier electrical and computer engineering talent and high-impact research. This means our graduates are successful, our research is recognized worldwide, and we are the intellectual center for our discipline in the Portland region.

Values
We value
- The success of our graduates
- Contributions to research and knowledge creation
- High intellectual and ethical standards
- High quality education for traditional and nontraditional students
- A diverse student population
- Our contribution to the Oregon economy
- Lifelong learning
- Technical and professional relationships with the engineering community

Undergraduate programs
The Department of Electrical and Computer Engineering offers programs in electrical and computer engineering. Cooperative educational arrangements with Portland-area industries, government agencies, and engineering consulting offices are available to qualified students. Qualified freshmen are encouraged to participate in the University Honors Program. Qualified upper-division students should consider the Electrical and Computer Engineering departmental honors track as described below.

The electrical engineering and computer engineering programs at Portland State University are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 - Telephone: (410) 347-7700.

DEGREE MAPS AND LEARNING OUTCOMES
To view the degree maps and expected learning outcomes for Electrical and Computer Engineering's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

PROGRAM EDUCATIONAL OBJECTIVES
The electrical and computer engineering programs prepare our graduates for the following program educational objectives:

1. Graduates are expected to be employed as electrical or computer engineers or in related fields that benefit from an electrical and computer engineering education.
2. Graduates are expected to advance in their profession and engage in the professional community.
3. Graduates are expected to continue to learn and adapt in a world of constantly changing environment and technology.

ADMISSION REQUIREMENTS

ECE Admission Requirements
For students gaining 300-level ECE course admission
Fall 2021

Terms of Admission & Deadlines
Before students can begin taking 300-level ECE courses, they must be admitted to the program and satisfy the course prerequisites.
- The application deadline for admission to the program during fall term is April 15.
- If you are not a current PSU student, please apply to PSU before you apply for admission to our program.
- The application for our program is on the department website.

Application Requirements
Only students who meet the following requirements by April 15 are eligible to apply for admission to our electrical engineering or computer engineering programs:
- Completed at least six of the following courses:
  - Mth 251, Mth 252
  - Ph 211 or Ph 221, Ph 214
  - ECE 102, ECE 103, ECE 171, ECE 221
- Selective GPA of at least 2.25
- Received a letter grade of C or above in every course required for the degree
Application Recommendations

We recommend that students complete the following courses before applying for admission:

- Mth 256, Mth 261
- Ch 221, Ch 227
- Ph 212 or Ph 222, Ph 215
- ECE 101, ECE 172, ECE 222
- Freshman Inquiry or Wr 121 and Comm 220 for transfer students

Selective GPA Calculation

- The selective GPA is calculated from all lower and upper division math, science, computer science, and engineering courses that are required for one of our undergraduate degree programs and that have been completed with a letter grade by the time of application. See the PSU Bulletin for a list of courses required for our undergraduate degree programs.
- If a student retakes a course in which they received a grade lower than a C-, the assigned grade during the first time they took the course will be excluded from the calculation. The grades in all subsequent attempts will be included in the calculation.

Admission Criteria and Process

- All students who have a selective GPA of 3.0 or higher will be admitted.
- Students who meet our admission requirements but have a selective GPA below 3.0 will be considered for admission by a committee. The committee considers each student's academic record, life experience, recent academic performance in engineering courses, extenuating circumstances, and leadership qualities.
- We do not give preference to any group of students. Students with transfer credits are treated the same as students who complete their courses at PSU.

ELIGIBILITY

To be eligible for admission, each student should meet the following minimum requirements:

1. Complete, with a minimum grade of C and a minimum GPA of 2.25, a designated set of courses for each program as follows:

   Electrical Engineering:
   The engineering core consisting of:
   - Ch 221: General Chemistry I 4
   - Ch 227: General Chemistry Laboratory 1
   - ECE 101: Exploring Electrical Engineering 4
   - ECE 102: Engineering Computation 4
   - ECE 103: Engineering Programming 4
   - ECE 171: Digital Circuits 4
   - ECE 172: Digital Systems 4
   - ECE 221: Electric Circuit Analysis I 4
   - ECE 222: Electric Circuit Analysis II 4
   - ECE 223: Electric Circuit Analysis III 4
   - Mth 251: Calculus I 4
   - Mth 252: Calculus II 4
   - Mth 253: Calculus III 4
   - Mth 254: Calculus IV 4
   - Mth 256: Applied Ordinary Differential Equations 4
   - ECE 103: Engineering Programming 4
   - ECE 171: Digital Circuits 4
   - ECE 172: Digital Systems 4
   - ECE 221: Electric Circuit Analysis I 4
   - ECE 222: Electric Circuit Analysis II 4
   - ECE 223: Electric Circuit Analysis III 4
   - Mth 251: Calculus I 4
   - Mth 252: Calculus II 4
   - Mth 253: Calculus III 4
   - Mth 256: Applied Ordinary Differential Equations 4
   - Ph 221: General Physics (with Calculus) I 3
   - Ph 222: General Physics (with Calculus) II 3
   - Ph 223: General Physics (with Calculus) III 3
   - Freshman Inquiry 3
   - Freshman Inquiry: General Chemistry I 4
   - Freshman Inquiry: General Chemistry II 3
   - Freshman Inquiry: General Chemistry III 3
   - Freshman Inquiry: General Physics (with Calculus) I 3
   - Freshman Inquiry: General Physics (with Calculus) II 3
   - Freshman Inquiry: General Physics (with Calculus) III 3
   - Freshman Inquiry: Exploring Electrical Engineering 4
   - Freshman Inquiry: Engineering Computation 4
   - Freshman Inquiry: Engineering Programming 4
   - Freshman Inquiry: Digital Circuits 4
   - Freshman Inquiry: Digital Systems 4
   - Freshman Inquiry: Electric Circuit Analysis I 4
   - Freshman Inquiry: Electric Circuit Analysis II 4
   - Freshman Inquiry: Electric Circuit Analysis III 4
   - Freshman Inquiry: Calculus I 4
   - Freshman Inquiry: Calculus II 4
   - Freshman Inquiry: Calculus III 4
   - Freshman Inquiry: Applied Ordinary Differential Equations 4

   Freshman Inquiry: Comm 220, and Wr 121 for transfer students

   Computer Engineering:
   - Ch 221: General Chemistry I 4
   - Ch 227: General Chemistry Laboratory 1
   - ECE 101: Exploring Electrical Engineering 4
   - ECE 102: Engineering Computation 4
   - ECE 103: Engineering Programming 4
   - ECE 171: Digital Circuits 4
   - ECE 172: Digital Systems 4
   - ECE 221: Electric Circuit Analysis I 4
   - ECE 222: Electric Circuit Analysis II 4
   - ECE 223: Electric Circuit Analysis III 4
   - Mth 251: Calculus I 4
   - Mth 252: Calculus II 4
   - Mth 253: Calculus III 4
   - Mth 256: Applied Ordinary Differential Equations 4
   - Mth 261: Introduction to Linear Algebra 4
   - Ph 221: General Physics (with Calculus) I 3
1. Students who complete their entire program at Portland State University meet the requirement by taking 39 credits of University Studies. (15 credits Freshmen Inquiry, 12 credits Sophomore Inquiry, and 12 credits Upper-division Cluster.)

2. Transfer students meet the requirement by having Wr 121, Comm 220, and 39 credits as a combination of University Studies courses and liberal arts/social science transfer credits. (At a minimum the 12 credit upper-division cluster must be taken at PSU. Please contact ECE departmental adviser for details of this requirement.)

3. Courses specifically required in a program must be taken on a graded basis unless those classes are only available with a pass/no-pass grading option. Classes not specifically identified by a unique number, for example an upper-division cluster class, may be taken on a P/NP basis.

**GPA requirements**

In order to graduate, electrical engineering and computer engineering students must have an overall GPA, which includes all courses taken at PSU, greater than 2.00. Their major GPA must be greater than 2.00. Major GPA includes all of the engineering courses used toward satisfying the degree requirements, whether taken at PSU or transferred. Normal PSU policies apply for grade replacement in major GPA calculation. If at any point either of these GPAs falls below 2.00 students will be placed on probation, as explained in the Continuation Criteria section above.

**ELECTRICAL ENGINEERING B.S. REQUIREMENTS**

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone: (410) 347-7700. It is designed to provide a comprehensive background in the electrical sciences and offers an opportunity for specialization in the areas of analog/RF circuits, digital/VLSI design, electromagnetics, microelectronics, power engineering, and signal processing. This program provides the student with the educational background necessary for employment in virtually all electrical engineering fields. Majors in electrical engineering must complete the following University and departmental degree requirements. Any deviation from the required courses must be approved by the department.

Ec 314U is a required course contained within some upper-division clusters.

Junior-level ECE electives are ECE 323, EE 348, ECE 351, ECE 361, ECE 362, ECE 372, ECE 373. One of the junior- or senior-level electives may be a Mth, CS, ME, or Ph course numbered 311 (or 411) and above.

Senior-level ECE electives are any ECE course numbered 400 and above.

**ELECTRICAL ENGINEERING MINOR**

A minor program is available within the Maseeh College of Engineering and Computer Science in the area of electrical engineering.

**REQUIREMENTS**

A student wishing to minor in this area should complete, with a minimum grade of C, and a minimum GPA of 2.25, a designated set of courses as follows:

**Courses**

At least four lecture courses from this list must be taken at Portland State University. Course requirements for the minor also meet partial eligibility requirements for admission to the electrical engineering and computer engineering programs. Students who complete the requirements for the minor may wish to apply for admission to one of these programs. Students graduating in computer engineering may not claim a minor in electrical engineering. Students planning to minor in electrical engineering should consult with an advisor in the Department of Electrical and Computer Engineering.

**COMPUTER ENGINEERING B.S.**

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, 111...
This program provides the student with the educational background necessary for employment in virtually all branches of the digital electronics and computer industry. Majors in computer engineering must complete the following University and departmental degree requirements. Any deviation from the required courses must be approved by the department.

REQUIREMENTS

| Freshman year | 
| ECE 101 | Exploring Electrical Engineering | 4 |
| ECE 102 | Engineering Computation | 4 |
| ECE 103 | Engineering Programming | 4 |
| ECE 171 | Digital Circuits | 4 |

| Junior-level ECE electives | 
| ECE 322, ECE 323, ECE 315, ECE 316, EE 347, EE 348, ECE 331, ECE 332. |

| Senior year | 
| ECE 411 | Industry Design Processes | 2 |
| ECE 412 | Senior Project Development I | 4 |
| ECE 413 | Senior Project Development II | 2 |
| ECE 424 | Engineering Professional Practice | 2 |
| ECE 485 | Microprocessor System Design | 4 |
| ECE 486 | Computer Architecture | 4 |
| Ec 314U | Private and Public Investment Analysis | 4 |
| **Upper-division cluster** | | 8 |
| **Subtotal:** 34 |

| Ec 314U | is a required course contained within some upper-division clusters. |

| Junior-level ECE electives | 
| ECE 322, ECE 323, ECE 315, ECE 316, EE 347, EE 348, ECE 331, ECE 332. |

| Senior-level ECE electives | 
| ECE 400 and above. |

**ELECTRICAL ENGINEERING AND COMPUTER ENGINEERING HONORS TRACK**

The Electrical Engineering and Computer Engineering departmental honors tracks permits highly motivated, qualified students to pursue a subject in the field of electrical or computer engineering in greater depth than is normally possible within the undergraduate ECE programs. Students who meet honors track requirements will receive special recognition on their diploma.

**Admission Criteria**
1. Admission to the Electrical or Computer Engineering Program and completion of minimum 90 credit hours of degree required courses.
3. At least three quarters of EE or CMPE degree program study left.

**Application Procedure**

Typically, students should apply for admission during the spring quarter of their junior year, but applications will be considered year-round. Students should submit the following:

- ECE Honors Program application form;
- official transcripts of all university work;
- letters of reference from at least two ECE faculty members; and
- statement of interest indicating reasons for seeking admission to the honors program.

After admission, student will work with the ECE department to identify the faculty advisor and develop an honors project plan.

**Additional graduation requirements:**

1. Completion of 6 credits of ECE 403 Honors Thesis with a minimum grade of B+ (Note: 4 credits can replace one senior elective.)
3. Overall and major GPA greater than 3.40.

More details are available from the ECE department.

**FAST TRACK BS+MS PROGRAM**

Since the amount of knowledge required for state-of-the-art design is much greater than can be gained in a four-year BS program, a Master’s degree is now considered the “career” degree in the Electrical and Computer Engineering field. An ECE graduate who enters the field with a BS degree is expected to obtain a Master’s degree as part of his/her long term career advancement. Graduates who enter the profession with Master’s degrees start with considerably higher salaries and are eligible for more advanced positions.

The usual time required to directly obtain a BS in Electrical Engineering or a BS in Computer Engineering and an MS in Electrical and Computer Engineering is 4 years for the BS and an additional 5 quarters for the MS. This total of more than five and a half years is financially difficult and excessively delays entry into the industry. The Fast Track BS+MS program significantly shortens this path for top students by allowing up to 15 credits of ECE graduate credits to be used for both the BSEE degree or the BSCMPE degree and the MSECE degree.

**Admission criteria**

Students will apply for this program using an online application format that is a slightly modified version of the standard graduate application form. Since many ECE students are making their way through their programs on a part-time basis and are therefore ready to enter the program at different times, students may apply to enter the program during any quarter. A GRE score is not required. The admission criteria for the program are as follows:

- Admitted to the ECE Department for BSEE or BSCMPE
- 3.3 cumulative GPA
- 3.3 upper division major GPA with at least 16 credits of upper division ECE classes

**Admission process and program flow**

Applications for this program will be processed by the Graduate Program Director just as regular graduate applications are. When a student is accepted, he/she will be assigned an ECE Faculty Advisor who is an expert in the MS coursework track choice stated in the application. Since the M.S. tracks closely parallel the coursework tracks in the BS programs, the MS track chosen will usually be just an extension of the track the applicant is pursuing in his/her undergraduate program. In most cases, the 400 level senior classes specified in an undergraduate track have both 400 and 500 levels available and the 500 level versions of these courses are included in either the Core list or the Depth and Breadth list for the related graduate level track. With Advisor approval, students in the Fast Track BS+MS program will take the 500 level versions of these courses and use up to 15 credits of these to satisfy both BS requirements and MS requirements. Note that 3 credits from a 4 credit class can be used to bring the shared total up to 15 credits but all shared classes must have grades of B or higher.

**Graduate programs**

The ECE Department offers M.S., and Ph.D. degrees in a variety of Electrical and Computer Engineering technical areas. Programs are available on both a full-time and part-time basis. Many classes are offered in the late afternoons and early evenings.

Please refer to the departmental website at www.pdx.edu/ece for detailed program information.

**ADMISSION REQUIREMENTS**

**Master of Science in Electrical and Computer Engineering**
Admissions to our M.S. programs are selective and capacity is limited. Learn how to apply. Master of Science in Electrical and Computer Engineering applicants with a B.S. degree in either electrical or computer engineering, and a grade point average of 3.00 or better in all junior- and senior-level technical courses will be directly considered for admission to the Department of Electrical and Computer Engineering as regular graduate students.

Applicants with a B.S. degree in some other field (e.g., mathematics, physics, computer science, mechanical engineering, economics, etc.) will be required to take an individually specified group of undergraduate ECE classes as a Post-Baccalaureate student to gain the basic skills needed to succeed in an ECE Master’s program. Upon successful completion of these undergraduate ECE “bridge” classes with grades of B or better, an applicant will be considered for admission to the Department of Electrical and Computer Engineering as a regular M.S. student.

M.S. applicants with electrical or computer engineering B.S. degree from a non-ABET accredited university must submit official GRE scores. An applicant whose B.S. degree is from a university in a country where English is not the native language must provide proof of English language proficiency as required by PSU International Admissions.

Applications are accepted for fall (starting in September) and winter (starting in January). Most graduate course sequences begin in the fall or winter quarters, and students who arrive in spring or summer may have more difficulty finding suitable courses for their desired track.

**Application for Admission to M.S. Program**

Please apply online.

More information (required documents, deadlines, etc.) is available on our Admissions Process page.

---

Doctor of Philosophy in Electrical and Computer Engineering

Applicants to the Ph.D. program in electrical and computer engineering will normally have completed a master's degree in electrical engineering or a related field. However, admission directly to the Ph.D. program from a bachelor's degree program is possible if desired.

The following application items are required for the ECE Department:

- Statement of purpose
- GRE score
- 3 references
- Unofficial transcripts
- Writing sample

Please see our application page for more information.

Students are normally only admitted to our program if a faculty member has agreed to serve as the adviser. Before applying to our Ph.D. program, you should contact faculty working in an area of research that is of interest to you. Your adviser will stay the same throughout your time in the doctoral program. You can find a list of our faculty on our website. The department has many ongoing research programs and supporting research laboratories which are listed on our website.

**Application for Admission to Ph.D. Program**

Please apply online.

More information (required documents, deadlines, etc.) is available on our Admissions Process page.

---

**ELECTRICAL AND COMPUTER ENGINEERING M.S.**

Master of Science (M.S.)

Thesis and coursework-only options are available in the ECE M.S. program. All ECE M.S. students are required to complete a Program Completion Form approved by their faculty advisers before completion of sixteen EE and ECE graduate credits. In addition to the university master's degree requirements, an M.S. student must complete at least 45 graduate level credits. Coursework taken without adviser approval may not be accepted as part of the student's program. Each student will be assigned an interim adviser at the time of admission.

**THESIS OPTION**

Thesis M.S. students usually follow one of the graduate track study plans consisting of four core courses (16 credits), two depth and breadth courses (8 credits), 9 credits of thesis, and 12 elective credits. Elective credits may include additional EE and ECE graduate courses, ECE 501-509 credits, or, with adviser approval, graduate classes from another department. Only 3 credits of ECE 507 may be counted as elective credits. A student may substitute an appropriate alternative class or classes for core or depth classes in a track by obtaining written permission from his/her adviser before taking the class(es).

Students should choose a research topic and adviser for their thesis; information on research in the department can be found on the department's web site. Thesis M.S. students must also develop, write, and give an oral defense of a thesis approved by the student’s thesis committee. The
defense is public and its schedule must be posted in the Electrical and Computer Engineering Department at least two weeks in advance. Please contact the Graduate Coordinator to schedule the defense and announcement. See the department’s web site for additional information about thesis requirements and deadlines.

COURSEWORK-ONLY OPTION

For the coursework-only M.S. option, students take courses following an adviser-approved track of graduate classes. Please see the pre-approved coursework-only tracks below. These tracks were designed by the faculty to give both depth and breadth of knowledge in the specified study area. It is also possible for students to develop a custom track with their faculty adviser and approval by the Graduate Program Director. The coursework-only option requires students to complete sixteen credits of EE and ECE graduate lecture classes that form a core specialization area, sixteen credits of EE and ECE graduate lecture classes that provide depth and breadth, four credits of elective EE and ECE graduate lecture classes, and nine credits of approved graduate electives.

APPROVED TRACKS

In addition to completing the other requirements for the degree, all students will take the core courses (16 credits) within their selected track. The core courses for each track are listed below.

Students pursing the thesis option will take two courses (8 credits) from the depth and breadth course list. Students pursing the coursework-only option will take four courses (16 credits) from the depth and breadth course list. The depth and breadth course lists are available from the department.

In addition to the University doctoral degree requirements listed in the PSU Bulletin, a candidate for the Ph.D. degree in electrical and computer engineering must complete a minimum of 80 graduate credits consisting of at least 45 ECE graduate credits, 8 elective graduate credits and at least 27 credits of ECE 603 (dissertation). Of the 45 ECE credits, 32 credits must come from ECE lecture courses (24 lecture credits if the student successfully completed an ECE MS Thesis). The 8 elective credits may come from any academic department, but must be lecture credits only.

Each Ph.D. must have at least one journal publication. Specific course requirements depend on the student’s area of emphasis, and the student’s program must be approved by his/her academic adviser. Students in the Ph.D. program in Electrical and Computer Engineering are required to pass a comprehensive examination (written or oral) after completing a substantial amount of coursework. They are also required to obtain approval of their proposed research plan by their doctoral committee before they can be advanced to candidacy. A dissertation containing a real contribution to knowledge based on the candidate’s own investigation and a final oral dissertation defense are required. The dissertation must show a mastery of the literature of the subject and be written in credible literary form. The defense is public and its schedule must be posted in the Electrical and Computer Engineering Department at least two weeks in advance. Please contact the Graduate Coordinator to schedule the defense and announcement.

Lecture courses taken under the undifferentiated grading option (P/NP) shall not be used to satisfy any graduate degree program requirements. All coursework must be completed with a grade of B- or better.

Students should choose a research topic and adviser for their dissertation; information on research in the department can be found HERE.

Check List for Ph.D. Degree Requirements
1. Appointment of the Advisory Committee
2. Study Plan Approved by the Advisory Committee
3. Comprehensive Exam Passed
4. Doctoral Dissertation Committee Approved
5. Residency requirement
6. Dissertation Proposal Approved
7. Advancement to Candidacy

- M.Eng.—Manufacturing Engineering Management
- Ph.D.—Technology Management
- Graduate Certificates

Strong management skills are increasingly important to technical professionals. Managing R&D projects, technological systems, technical organizations and resources, and other professionals requires management knowledge and skills.

Engineers and scientists are faced with these challenges very early in their careers. Typically, within three to seven years after graduation, they find themselves addressing complex issues which necessitate that they play two roles simultaneously: the role of the specialist and the manager of technology. Those who choose the management path start moving toward management responsibilities while maintaining identity in their technical backgrounds - the Department of Engineering and Technology Management (ETM) has been designed for them.
The Department of Engineering and Technology Management addresses the needs of engineers and scientists whose objective is to advance to technical management positions in business, industry, or government. We also address the needs of those wishing to continue their engineering/technology management research-based studies while pursuing careers at either academic institutions or R&D organizations.

ETM draws on the strengths of the Maseeh College of Engineering and Computer Science, the School of Business Administration, and several other relevant academic disciplines. By utilizing the diverse faculty resources of Portland State University, the program offers the opportunity to study the human, technical, and analytical aspects of management.

Most of the courses in the program are offered during the evening hours to fit the schedule of practicing professionals.

**ADMISSION REQUIREMENTS**

**Master of Science in Engineering and Technology Management**

In addition to meeting general University admission requirements (p. 51), applicants to the program are required to have a baccalaureate degree in engineering or related discipline, background in probability/statistics, and four years of professional experience. Admission is granted to applicants who are judged to have a higher potential as reflected by their past academic performance and professional experience. Any variation from these requirements must be approved by the ETM department.

**Graduate Certificate in New Product Development, Strategic Management of Technology, Technology Management, Project Management, and Technological Entrepreneurship**

Admission requirements for the ETM certificates are identical to the ETM Department’s MS program.

**ENGINEERING AND TECHNOLOGY MANAGEMENT, M.S.**

A minimum of 52 credits in approved graduate courses is required to complete the Master of Science degree in Engineering and Technology Management. The program consists of 28 credits in the core, 4 credits (or 8 with thesis option) in the capstone requirement, and 20 credits (or 16 with thesis option) in electives.

**REQUIREMENTS**

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>

**Electives (20 credits or 16 credits with the thesis option)**

The Engineering and Technology Management Department offers a wide range of elective courses. In addition, students may choose electives in several other programs throughout the University with the approval of their adviser.

**TECHNOLOGY MANAGEMENT, PROJECT MANAGEMENT, AND MANUFACTURING ENGINEERING MANAGEMENT**

These Master of Engineering programs are currently approved for the ETM department; however, we are not accepting applications at this time.

**TECHNOLOGY MANAGEMENT PH.D.**

Admission requirements include Bachelors or higher degree in engineering, sciences, management with technology emphasis, or related disciplines; minimum 3.0 undergraduate GPA or 3.50 GPA in at least 12 graduate credits; GRE scores obtained within two years of application to the program; a detailed statement of research interests acceptable to the ETM faculty; minimum 575 TOEFL score for international applicants; and three letters of recommendation. In addition to the University’s general degree requirements, the Ph.D. program in Technology Management consists of the following nine steps:

(Step-1): Admission to the program;

(Step-2): Successful completion of the equivalent of at least 60 credits of coursework beyond the Bachelor's degree distributed as follows: CORE: at least 20 credits from the following courses with at least one course from each group. All courses are four credits each. Additional courses taken from this group beyond the minimum required 20 credit hours can be counted toward the fulfillment of the specialization course requirements described below.
Group-1: ETM-620 Management of Engineering and Technology, ETM-649 Management of Technology Innovation;

Group-2: ETM-645 Project Management, ETM-655 Technology Marketing;

Group-4: ETM-631 Technology Assessment and Acquisition, ETM-633 Technology Transfer.

(Step-3): 12 project credits of ETM 606 supervised by ETM faculty culminating in the preparation of a research paper evaluated by the ETM faculty as being at the level of acceptable papers for a national or international conference on Engineering and Technology Management.

(Step-4): Successful completion of a comprehensive examination to demonstrate mastery of the Engineering and Technology Management field, including the defense of the research paper described in step 3 above.

(Step-5): Selection of the dissertation adviser from the ETM faculty and formation of the Ph.D. committee including one member appointed by the Dean of Graduate Studies.

(Step-6): Development of the dissertation proposal and its approval by the Ph.D. committee resulting in the advancement to Ph.D. candidacy.

(Step-7): Registering for at least 27 dissertation credits while conducting research after successful completion of the comprehensive exam.

(Step-8): Preparation of at least one publishable paper for a research journal or a recognized refereed technical conference proceedings based upon the dissertation research.

(Step-9): Defense of the dissertation.

### Mechanical & Materials Engineering

Suite 400, Engineering Building  
503-725-4290  
mmdept@pdx.edu  
www.pdx.edu/mechanical-materials-engineering/

- Bachelor of Science in Mechanical Engineering (BSME)
- Master of Science in Mechanical Engineering (MSME)
- Master of Science in Materials Science and Engineering (MSMSE)
- Doctorate in Mechanical Engineering (PhD)

Mechanical & Materials Engineering is a multi-faceted program offering a strong educational experience steeped in a variety of research areas, which includes mechanical design, additive manufacturing, robotics, microgravity fluid management, microfluidics, nanomaterials, semiconductor materials, biomaterials, and metallurgy. Located in Portland, Oregon, the Department benefits from strong ties to local industries, as well as international partnerships.

### Undergraduate program

The Bachelor of Science in Mechanical Engineering (BSME) program is a 2+2 program. Students spend their first two years taking lower-division courses in math, science, and engineering. At the end of their sophomore year, students apply for admission into the BSME upper-division program.

Students admitted to the BSME upper-division program will be placed on one of two course plans for their junior year. These two course plans are the ME 313 First Course Plan and the ME 320 First Course Plan. These course plans are designed to maintain a healthy class size and help make sure that seats are available for newly admitted students. All juniors will complete the same courses, just in a different order, and still meet prerequisites.

**MECOP students are placed on the course plan that aligns with MECOP program requirements.**

By following the assigned course plan, a student is able to complete the BSME in four years. As a reminder, the Department requires students to complete all highlighted classes with a grade of ‘C’ or better, prior to applying for admission into the upper-division program.

Our BSME program is accredited by the Engineering Accreditation Commission of ABET, 415 North Charles Street, Baltimore, MD 21201; telephone 410-347-7700. ABET is the national organization that sets standards for engineering education defined in terms of curricular content, quality of faculty, and adequacy of facilities.
DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Mechanical & Materials Engineering's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

PROGRAM OBJECTIVES

The BSME curriculum has the following Program Educational Objectives:

- Graduates are employed as mechanical engineers or in related fields that benefit from a mechanical engineering education.
- Graduates advance in their profession and engage in the professional community.
- Graduates participate in post-graduate educational opportunities.

The BSME Program Educational Objectives were formulated in a process of consultation with students, faculty, PSU administrators, and the MME Industrial Advisory Board. The Program Educational Objectives were updated in April 2011 to allow attainment of the objectives to be measured quantitatively. These objectives describe the goals we expect our students to attain within three years of graduating with a BSME degree.

MME ADMISSION REQUIREMENTS

For students applying for 300-level MME course admission FALL 2022

Terms of Admission & Deadlines

- Fall admission only
- Application deadline is April 15
- MME application is on department website: www.pdx.edu/mechanical-materials-engineering/bsme-admission
- If not a current PSU student, please apply first to PSU: www.pdx.edu/admissions/undergraduate-admissions

Minimum Eligibility for Consideration

- All required/shaded classes on the BSME course plan completed prior to fall 2022 with a grade of C or better. A C- will not count as meeting admission criteria.
- A Selective Admission GPA of 2.25 or higher. The Selective Admission GPA is calculated using only the required/shaded courses on the BMSE course plan, excluding Freshman Inquiry or, for transfers, Wr 121 and Comm 220.
- Freshman Inquiry (for those who began PSU as freshman) or Wr 121 and Comm 220 (for transfer students) must be completed prior to fall

Selective Admission

- All students who meet the minimum grade requirement and have no more than 6 required/shaded Selective Admission GPA courses outstanding as of April 15, 2022 will be considered. The outstanding courses must be completed prior to the start of fall term. Examples:
  - OK =
    - Spring 2022 – EAS 212, EAS 215, ME 122, Mth 261
    - Summer 2022 – Mth 256, Ph 213/216, Comm 220
    - 7 classes total, 6 are required for GPA
  - Not OK =
    - Spring 2022 – EAS 212, EAS 215, ME 122, Mth 261
    - Summer 2022 – Mth 256, Ph 213/216, ECE 241
    - 7 classes total, 7 are required for GPA

Selective Admission GPA will not be calculated for any student until winter grades are received by the MME Department. Students with a Selective GPA of 2.50 or
above will be conditionally admitted into the program. Conditions will be the completion of outstanding required courses, outlined in the admission letter. A ‘pending spring grades’ decision will be relayed to students with a Selective GPA below 2.50. Transfer students who do not provide unofficial transcripts with winter grades may be denied admission. Transcripts can be sent to mmedept@pdx.edu.

- Admission will be offered to the top students (approximately 120), including conditionally admitted students, based on their Selective Admission GPA.

- If a conditionally admitted student does due diligence and cannot locate the necessary course(s) at PSU or local community colleges, it is possible the condition may be extended through end of fall. Extension must be approved by the MME Academic Advisor. Official transcripts must be provided to both PSU Admissions Office and MME Department once grades post to determine if the conditions were met.

- Admission decisions will generally be communicated to students via email by May 15, 2022. Decisions will be:
  - Admit
  - Conditionally Admit
  - Pending spring Grades (official decision will be sent after spring grades are evaluated)
  - Deny (students may request a meeting with the MME Academic Advisor to review decision)

Repeated Classes

- Standard PSU repeat/replace policy applies to Selective Admission GPA:
  - If a student earned a D+ or below in a class the first time, then only the repeated (second) grade will be used in the Selective GPA calculation
  - If a student earned a C- or above in a class the first time, then both the first grade and the second (repeated) grade will be used in the Selective GPA calculation

Should a class be taken a third time it does not replace the second attempt regardless of either grade

Additional Testing

- No test required

Pass/No Pass

- Required classes must be taken for a grade (not P/NP)

Note: Due to COVID-19, P grades will be accepted for courses completed during spring 2020 through spring 2021 only. Please reach out to mmedept@pdx.edu for additional information.

- If a student earns a NP in a required class it will be calculated in selective admission GPA as an F and the course must be taken for a grade

Note: There is no COVID-19 exception to the NP policy

Additional Information (exceptions, preferences, etc.)

- No preference given to PSU students versus students who completed required/shaded courses elsewhere

Department Communication

- The MME Department (mmedept@pdx.edu) will communicate to students via email. If the student has a pdx.edu email, all email communications will be sent to that address.

- Fall 2023 admission requirements available spring 2022 (in time for fall 2022 registration in May 2022)

ELIGIBILITY

Students must complete the following required/shaded courses with a minimum grade of C:

| Ch 221 | General Chemistry I | 4 |
| Ch 222 | General Chemistry II | 4 |
| Ch 227 | General Chemistry Laboratory | 1 |
| Ch 228 | General Chemistry Laboratory | 1 |
EAS 211  Statics  4
EAS 212  Strength of Materials  4
EAS 215  Dynamics  4
ECE 241  Introduction to Electrical Engineering  4
ECE 241L  Introduction to Electrical Engineering Lab  0
ME 120  An Introduction to Engineering  3
ME 121  Introduction to Systems and Control  3
ME 122  Introduction to Design  3
Mth 251  Calculus I  4
Mth 252  Calculus II  4
Mth 254  Calculus IV  4
Mth 256  Applied Ordinary Differential Equations  4
Mth 261  Introduction to Linear Algebra  4
Ph 211  General Physics (with Calculus) I  4
Ph 212  General Physics (with Calculus) II  4
Ph 213  General Physics (with Calculus) III  4
Ph 214  Lab for Ph 201 or Ph 211 or Ph 221 or Ph 231  1
Ph 215  Lab for Ph 202 or Ph 212 or Ph 222 or Ph 232  1
Ph 216  Lab for Ph 203 or Ph 213 or Ph 223 or Ph 233  1
Freshman Inquiry  15

Ph 221, Ph 222, and Ph 223 also accepted, if completed prior to Fall 2018.
Freshman Inquiry: Comm 220 and Wr 121 for transfer students.

CONTINUATION CRITERIA

After admission to the BSME Program, students will be expected to make satisfactory progress toward their declared degree and will be subject to the following rules:

1. The term GPA in all courses taken at PSU must be 2.00 or higher.
2. At the conclusion of each term of the academic year, full-time students are normally expected to complete a minimum of 12 credits applicable toward their degree program. Part-time students are expected to complete a minimum of 12 credits per year applicable toward their degree program.
3. Students will be placed on probation when their term GPA as described in (1) is below 2.00, or their progress toward the degree is less than that described in (2).
4. Students placed on probation for two consecutive terms or for a total of three terms will be suspended from the BSME program. Students also will be suspended if not enrolled in engineering and/or computer science courses for three consecutive terms.
5. Students who are suspended must meet with an advisor to determine whether and under which conditions readmission is feasible.
6. Students must have a major GPA of at least 2.0 in order to graduate with their BSME.

APPEALS

Students denied admission or suspended may request reconsideration by submitting a petition. The petition and supporting materials will be reviewed by the Undergraduate Advisor of the Mechanical & Materials Engineering Department; a recommendation will be forwarded to the Chair. The Advisor's decision can be appealed by the Chair. Appeals must be made within 30 days of denial of admission or suspension notification.

PASS/NO PASS GRADING POLICY

All courses specifically required by the University or by the Department must be taken for a letter grade unless a required course is only offered with a pass/no pass option.

BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING DEGREE REQUIREMENTS

All majors in Mechanical Engineering must complete the following University and Departmental degree requirements. Any deviation from the required courses, including engineering and mathematics course substitutions, must be approved, in writing, by the Chair of the Department of Mechanical & Materials Engineering.

Approved Mechanical Engineering electives

Electives include any non-required 400/500*-level mechanical engineering course, except that no more than 4 credits be taken from:

- ME 401  Research  1-6
- ME 404  Cooperative Education/Internship 1-12
- ME 405  Reading and Conference 1-6
- ME 406  Special Projects 1-6

Further, students can take one MCECS non-ME 400/500*-level course and apply it toward elective credits. Students can take an additional MCECS non-ME course, if taken at the 500*-level, with advisor approval.

MECOP students must complete EAS 407, MECOP Seminar.

*Non-Pathway students completing any 500-level course(s) will need to complete a Request to Use Graduate Courses for Undergraduate Degree Form and waive their ability to apply the course(s) to a graduate program.

**HONORS TRACK**

**Entry Requirements**

- Admission to the BSME Program
- Minimum PSU GPA of 3.50
- Minimum 16 credits of 300-level ME coursework completed
Application to the Mechanical Engineering Honors Track

Statement of purpose outlining research interest areas

**Application Deadline**

Students must apply by the end of the third term of their junior year. Applications need to be submitted by the end of finals week.

**Graduation Requirements**

- Completion of 4 ME 403 Honors Thesis credits with a minimum grade of B+ (will be considered an approved mechanical engineering elective)
- Presentation of research to MME faculty and students in a seminar format
- Minimum PSU GPA of 3.50

Each student participating in the Honors Track will be assigned an honors advisor. The advisor will work with the student to complete a written proposal for the Honors Thesis research, conducted in a specialty area within Mechanical Engineering. Students who successfully complete the MME Honors Graduation Requirements will graduate with Honors and will receive special recognition on their diploma.

**BACHELOR’S + MASTER’S PATHWAY**

**Bachelor’s + Master’s Pathway Overview**

The Bachelor's + Master's Pathway Program allows currently admitted BSME students to get a head-start on their master's degree. Students admitted into the Pathway Program are able to take up to 16 credit hours of approved 500-level coursework as an undergraduate, at an undergraduate tuition rate*, and apply the credits to their undergraduate and graduate degrees. Admitted Pathway students have the potential to start their graduate program with 16 credits already completed.

Students must apply by the third term of their junior year, and if admitted, will automatically matriculate into an MME graduate program as long as they meet the pathway continuation criteria. Students in the Pathway Program can pursue any of the MME master-level graduate programs.

*Post-bac students will be charged graduate tuition rates per PSU policy.

**Credit Application**

Once Pathway students are formally admitted into an MME graduate program, the Department will request the 500-level credits taken as an undergraduate to be applied to their master’s degree. Only coursework with a grade of B or higher will be applied. Students must start their master's program within one academic year of BSME graduation in order to use their pathway courses towards their master's degree.

**Admission Criteria**

Students applying to the Pathway Program must meet the following criteria:

- Admitted into the BSME Program
- Completed 10 credit hours of 300- or 400-level upper-division BSME coursework
- Institutional GPA of 3.3 at time of application
- Three letters of recommendation from faculty members (MME faculty members preferred)
- Statement of purpose

**Continuation Criteria**

Students must have a combined undergraduate and graduate institutional GPA of 3.3 upon graduation from the BSME program to be fully admitted into the graduate program.

**Application Deadline**
Students must apply by the end of the third term of their junior year. Applications need to be submitted by the end of finals week.

**Graduate programs**

The MME Department offers three graduate degrees: Master of Science in Mechanical Engineering (MSME), Master of Science in Materials Science (MSMSE), and PhD in Mechanical Engineering. Each program is designed to help students achieve career goals, meeting industry, or research interests.

Master's students who plan to work or who are currently working in industry have the ability to earn a master's degree by completing coursework and foregoing research, while students seeking research opportunities or advancement to a PhD program have the option to perform research with a variety of faculty members, and complete either a thesis or project. PhD students are required to conduct research and complete a dissertation. Focus areas, research possibilities, faculty and lab information can be found here: Graduate Focus Areas.

**ADMISSION REQUIREMENTS**

**Master of Science in Mechanical Engineering (MSME)**

Applicants who have received a Bachelor of Science degree, and who meet University graduate admission requirements, will be considered for admission as outlined below:

Regular admission:
- Applicants who have a Bachelor of Science in Mechanical Engineering or in a closely related engineering field
- Applicants who have a Bachelor of Science in a related field such as materials science, physics, chemistry, or biology who have also completed the following undergraduate courses (or equivalents) based on focus area:
  - Design & Manufacturing: ME 313 Analysis of Mechanical Components, ME 314 Analysis and Design of Machine Elements, and ME 351 Vibrations and System Dynamics
  - Thermal & Fluid Science: ME 320/L Fluid Mechanics, ME 321 Engineering Thermodynamics I, and ME 323 Heat Transfer

Conditional admission:
- Applicants who have received a Bachelor of Science degree in a related field such as materials science, physics, chemistry, or biology, but have not completed the recommended pre-admission courses listed above.

Applicants will need to provide three letters of recommendation, a statement of purpose, and a resume or curriculum vitae.

Note: The MME Department does not provide conditional admission for English language proficiency deficiencies.

**Master of Science in Materials Science and Engineering (MSMSE)**

Applicants who have received a Bachelor of Science degree, and who meet University graduate admission requirements, will be considered for admission as outlined below:

Regular admission:
- Applicants who have a Bachelor of Science in Materials Science & Engineering or in a closely related engineering field
- Applicants who have a Bachelor of Science in a related field such as mechanical engineering, physics, chemistry, or biology who have also completed the following undergraduate course (or equivalent):
  - ME 213/L Properties of Materials

Conditional admission:
- Applicants who have received a Bachelor of Science degree in a related field such as mechanical engineering, physics, chemistry, or biology, but have not completed the recommended pre-admission courses listed above.

Applicants will need to provide three letters of recommendation, a statement of purpose, and a resume or curriculum vitae.

Note: The MME Department does not provide conditional admission for English language proficiency deficiencies.

**Doctorate in Mechanical Engineering (PhD)**

A Master of Science degree in Mechanical Engineering, or a closely related field, is required for students applying to the mechanical engineering PhD program. Applicants will need to provide three letters of recommendation, a statement of purpose, a resume or curriculum vitae, and current GRE scores. GRE scores are not required if the master's degree was completed at PSU. Additional admission requirements and details are published on the MME Department website at https://www.pdx.edu/mechanical-materials-engineering/.
We require that qualified PhD applicants be assigned a faculty advisor who is in the applicant's related area of research interest in order to be admissible.

Note: The MME Department does not provide conditional admission for English language proficiency deficiencies.

MASTER OF SCIENCE IN MECHANICAL ENGINEERING

The Master of Science in Mechanical Engineering provides advanced coursework and research within the various facets of mechanical engineering. Strongly tied to local industry and international partnerships, the program supports research in microfluidics, fluid flow in microgravity, manufacturing, electronic packaging, engineering science and energy conservation in the built environment. Current faculty research areas include energy systems, electronic cooling, dynamic systems modeling, computational mechanics, thermo-fluid systems, and FEM applications in mechanical design.

Candidates must meet the requirements of the University and the Department for the MSME degree. The program offers three tracks: thesis, project and coursework-only. For all tracks, candidates must complete 45 graduate credits, which include ME 551 and up to 2 credit hours of ME 507.

Candidates pursuing the thesis option must complete 9 thesis credits (ME 503). Those pursuing the project option must complete 6-9 research credits (ME 501). All candidates can apply up to 17 credit hours in total of ME 501, ME 503, ME 504 (maximum 6 credits), ME 505, and ME 506 to their degree. Candidates may apply a maximum of 8 credit hours of approved non-mechanical engineering credits toward their electives.

All candidates must submit a study plan approved by their advisor by the beginning of their third term. Updates to the study plan may be requested by the advisor or the graduate committee. Student research (thesis or project) is conducted under the supervision of faculty and a final oral examination covering the thesis or project must be successfully completed.

MATERIALS SCIENCE AND ENGINEERING M.S.

The Master of Science in Materials Science and Engineering degree provides advanced coursework and research that blends basic materials science with fundamental engineering principles and practice. Closely tied to industry needs and applications, the program supports research in nanomaterials, semiconductor materials, biomaterials, composites, metallurgy, welding, micro-joining, manufacturing, computational modeling, materials synthesis, post-treatment, and characterizations. The flexibility of the program structure encourages students to explore research not only in conventional disciplines, but also in inter- or multi-disciplines. There are many research thrusts in this program that span a wide range of cutting-edge and cross-disciplinary areas.

Candidates must meet the requirements of the University and the Department for the MSMSE degree. The program offers three tracks: thesis, project, and coursework-only. For all tracks, the candidate must finish 45 graduate credits. Among these credits, a minimum of three core courses selected from ME 513 (or MSE 513) ME 527, ME 528, ME 529, ME 576, ME 578, MSE 515, and MSE 547 are required. One credit of seminar course of ME 507 is also required. If the candidate chooses the thesis option, a total of 6-9 MSE 503 credits will be received after successful completion of the defended thesis. If the candidate chooses the project option, a total of 6-9 MSE 501 credits will be received after successful completion of the project report and a departmental-level presentation. For the rest of the credits, the candidate can obtain them from a set of specialty courses approved by the student program committee. If the candidate chooses the coursework-only option, a minimum of five core courses selected from the list mentioned above is required. The rest of the graduate credits can be chosen from electives recommended by the student program committee. For all tracks, a maximum of two credits of ME 507 or approved seminar can be applied to the degree.

Each student is assigned to an advisor upon acceptance to the program, and the advisor will be the primary contact for the student in the Department. The student program committee, a group of three faculty members, will meet with each student twice per year to review the course of study that the student and advisor have chosen and to monitor overall program quality.

DOCTORATE IN MECHANICAL ENGINEERING

The PhD program in Mechanical Engineering aims to educate technical experts and researchers to fill leadership roles in industry, research and education. The program culminates in a written dissertation representing an original contribution to knowledge in the field. Research areas for the degree include, but are not limited to, bioengineering, building science and energy systems, controls and dynamics, fluid mechanics, heat transfer, materials science, and mechanical design. Candidates for the PhD must meet the University requirements for the degree in addition to the requirements listed below.

In addition to the University doctoral degree requirements (p. 54), the program requirements include a minimum of 27 credit hours of Mechanical Engineering coursework, a
comprehensive examination, prospectus defense, 27 credit hours of dissertation (ME 603) and final dissertation defense. The 27 credit hours of Mechanical Engineering coursework must consist of a minimum of 8 credits of 600-level courses, which can include up to 3 credits of ME 607 seminar. For further information on admission and degree requirements, current course schedule, and research opportunities, students should refer to the Department website: https://www.pdx.edu/mechanical-materials-engineering/.

SEMICOMDUCATOR MATERIALS & MANUFACTURING

The Semiconductor Materials & Manufacturing Graduate Certificate is a 16-credit program. Graduate-level courses in semiconductor materials, manufacturing processes, materials characterization and failure analysis techniques are bundled in this program.

Students are required to take ME 577 and a minimum of 3 additional courses from the list below to earn the certificate.

**Required course:**
- ME 577: Introduction to Semiconductor Manufacturing 4

**Choose three of the following:**
- ME 513: Engineering Material Science 4
- ME 527: Phase Transformations and Kinetics in Materials 4
- ME 528: Scanning Electron Microscopy for Materials and Device Characterization 4
- ME 529: Transmission Electron Microscopy and Chemical Analysis of Materials 4
- ME 547: Transfer and Rate Processes 4
- ME 576: Materials Failure Analysis 4
- ME 578: Introduction to Electronic Packaging 4
Graduate School Programs

Rossitza B. Wooster
Dean of the Graduate School
184 Parkmill (1633 SW Park Avenue)
503-725-8410
pdx.edu/gradschool

Portland State University graduate programs offer a variety of opportunities for advanced study and research, including preparation for academic or professional careers, continuation and improvement of skills for in-service professionals, personal intellectual enrichment, and professional development. More than 5,000 graduate students are enrolled in the University’s colleges and schools, and over 1,900 graduate degrees are awarded annually in the more than 80 master’s and the 21 doctoral programs.

The Graduate School oversees the University’s graduate programs in the interest of ensuring quality instruction and research and promoting the highest achievement of graduate students. It is the principal resource concerning graduate admission policies and procedures, advanced degree requirements, degree status, petition procedures, thesis or dissertation preparation, and final oral examinations.

All matters of graduate study are subject to the policies and procedures established by the Faculty Senate upon recommendation of the Graduate Council. The Graduate Council develops and recommends University policies and regulations for graduate studies, recommends standards for graduate courses and programs, and adjudicates petitions regarding graduate policies. The Dean of the Graduate School is responsible for conducting the affairs of the Graduate School and for certifying candidates who have fulfilled the requirements for advanced degrees.

GRADUATE CERTIFICATE IN FUTURES THINKING AND FORESIGHT PRACTICE

This certificate offers students and experienced professionals the opportunity to deepen their understanding of futures thinking and foresight practice to positively impact a highly volatile and complex landscape recently referred to as “post-normal times.” Given rapid and exponential acceleration that is occurring across both public and private sectors, a new mindset and new skills are needed to navigate this complexity and build success pathways to desired futures. Increasing “readiness for the future” has become an urgent call to action across disciplines and professional spheres of influence. This 18-credit learning experience includes focus on technological change, climate change, geo-political shifts, racial equity and such topics as the future of work, food, learning and more.

Foresight is an emerging interdisciplinary social science comprised of psychology, sociology, anthropology and social work, the arts, political science, business, technological studies, urban studies, public administration, engineering and technology sciences, economics, and other geo-political focal areas (to name a few). Futures thinking and foresight practice reflect a collection of applied skills and tools related to a specific type of anticipatory thinking, applied ethics in a futures context and related change management/navigation skills. It is also about increasing proficiency in building collective intelligence, imagination, agency and agility in individuals, groups, organizations and civic collectives with regard to self-determination and democratically anchored futures planning. Interdisciplinary elective coursework will allow students to personalize from among a list of future forward courses that best meet their professional goals and their intended future focus.

The certificate includes a deep exploration of settings and methods where foresight is currently being practiced in both the public and private sectors, a review of foresight research and methods and profiles of futurists who lead these processes. With a special focus on leading efforts to build foresightfulness within communities and/or organizations through trend mapping, power analysis, goal setting in a “VUCA” practice environment (volatility, uncertainty, complexity and ambiguity), students learn the fundamentals of engaging individuals, groups and organizations in a positive experience of navigating futures conceptualization and planning. Issues of equity and strategies to democratize co-creation of shared futures, acknowledge/address bias and patterns of historical bias are prioritized. A concluding integration course provides a culminating experience to engage in shared learning and cross-disciplinary review of foresight projects, as well as creation of a professional foresight portfolio useful to those seeking to enhance their career readiness in this area.

honors@pdx.edu

Honors in the City
University Honors College combines the benefits and rigor of a small liberal arts college with the opportunities and resources of a large urban research university. The College centrally engages Portland State’s mission to “Let Knowledge Serve the City,” drawing on PSU’s institutional commitment to community engagement, sustainability, and internationalization as well as its civic leadership and location in downtown Portland. The Honors College serves high-achieving, academically motivated students by providing an engaged and challenging educational experience that uses the city of Portland as a living/learning laboratory. Students in any department or major can join the University Honors College; all Honors students graduate with prestigious University Honors in their chosen field.

Honors at PSU offers courses in the theory and research methods of the human, natural, and social sciences as well as a wide-ranging selection of intensive interdisciplinary seminars. Students have the opportunity to work closely with faculty on research projects, network and gain experience through internships, and study abroad with Honors faculty. In their final year, Honors students research and write a baccalaureate Honors thesis.

Engaging faculty from across PSU’s campus, the University Honors College gives students the opportunity to work with our finest teachers and researchers. Honors students become disciplined, nimble thinkers, prepared to become leaders, and ready to apply their academic learning to the challenges and uncertainties of the real world.

ADMISSION REQUIREMENTS

Interested students must complete the additional Urban Honors application questions available as part of the PSU undergraduate application. Current PSU students wishing to transfer into the Honors College should see the Honors website for instructions on completing an application: www.pdx.edu/honors. Students are welcome to transfer into the University Honors College from outside institutions or from within PSU at any point in their freshman, sophomore, or junior years. Students wishing to transfer into Honors as seniors should contact the University Honors Director to discuss their research experience and thesis plans.

In order to be admitted to the Urban Honors College, all students must first be admitted to Portland State University.

Minimum criteria for admission:

First-year students (entering from high school):
- 3.50 cumulative unweighted high school GPA
- 1200 on the SAT
- 27 on the ACT

Transfer/Current PSU students:
- Cumulative GPA of 3.25 or higher in college-level courses

GRADUATION REQUIREMENTS

All Honors students must complete the Honors College curriculum and a senior thesis supervised by a faculty advisor. Honors theses are presented at a public symposium and are published on PDX.Scholar, PSU’s open source thesis and dissertation database.

Honors students must meet the undergraduate degree requirements set by the University, including those governing total credits earned, upper division credits, the writing requirement, residence credit, and degree (BA/BS) requirements, as well as any additional degree requirements set by their major department.

Graduating from Honors requires a cumulative PSU GPA of 3.25 or higher and a cumulative 3.25 GPA in all Honors (HON) courses.

First Year: The Global City (15 credits)

- Hon 101, Hon 102, Hon 103
- The sequence fulfills 8 credits of Arts and Letters and 4 credits in Social Science
- The sequence fulfills the University’s lower division writing requirement, and meets the requirement for Wr 121.
- First year students must complete the Global City sequence regardless of the number of AP/IB credits they may have completed.
• Incoming first year transfer students with 29 or fewer college credits must complete the Global City sequence. **Second Year: Urban Discourses (12 credits)**

- Hon 201, Hon 202, Hon 203
- These three courses fulfill 4 credits in Arts and Letters, 4 credits in Social Science, and 4 credits in sciences respectively. The sequence completes the lower-division writing requirement.
- Students entering Honors with 30-79 college credits should begin with the second year curriculum; all three courses are required. It is recommended that transfer students begin with HON 202. **Junior Year: Theory & Practice (12 credits)**

- Transfer students must begin with the 4-credit Hon 399: Honors Writing. This course counts towards the 12-credit third year requirement for transfer students entering at the junior level or above.
- Hon 399: Honors Writing is an approved Writing Intensive Course (WIC). It fulfills the university's second writing requirement.
- Students are required to take at least one 4-credit Honors Junior Seminar: Hon 407
- The additional 8 credits of Junior requirements may be fulfilled through any combination of Honors seminars (Hon 407), internships (Hon 404), research (Hon 401), departmental honors seminars, or approved study abroad courses.
- Students entering Honors with 80+ credits are required to take HON 202 or its equivalent during their first term in Honors. 12 credits of junior level coursework are also required. **Senior Year: Honors Thesis (8 credits)**

- Hon 403: Thesis Prospectus (4 credits); Hon 403: Thesis Continuation (4 credits); public presentation and defense
- Hon 403: Thesis Prospectus is an approved Writing Intensive Course (WIC). It fulfills the university's second writing requirement.
- Students wishing to transfer into Honors as seniors should contact the Honors College Director to discuss their research experience and plans.

---

**FIRST YEAR: FOUNDATIONS (15 CREDITS)**

**The Global City:** Hon 101, Hon 102, Hon 103 (15 credits)

This year-long sequence serves as a foundations course and provides the basic intellectual framework for the social, cultural, political, and material study of the urban environment. "The Global City" introduces the means to think critically about the urban environment and the interdependence between the city and the global world. The sequence fulfills the university's lower division writing requirement, and meets the requirement for Wr 121.

Over the course of three terms, this course focuses on developing and refining student understanding and practice of the three writing tools dealt with throughout the Honors curriculum: summary of argument, explication, and placement in relation to a discourse community, as part of the preparation for writing the undergraduate thesis.

While each section of the course will have different material, the writing tools studied throughout the year are the same from section to section. "The Global City" sequence is taken in a cohort model, with students remaining with the same peers and faculty throughout the academic year. Class size is limited to 24.

**SECOND YEAR: RESEARCH METHODS (12 CREDITS)**

**Urban Discourses:** Hon 201, Hon 202, Hon 203 (12 credits)

The three connected courses of the sophomore year take the urban as an appropriately dynamic subject for research shaped by the three “domains” of academic knowledge: the social sciences, the humanities, and the natural sciences. Students progress through an integrated set of research projects that develop not only their understanding of the systems by which cities operate but also their own critical capacities as urban residents and knowledge producers. Class size limited to 30.

**Hon 201: Urban Social Sciences**

This course examines urban structures and processes through a combination of social science methodologies including, but not limited to, spatial analysis, qualitative and quantitative methods and archival research. Field drawn upon may include sociology, anthropology, geography, and other social sciences. Students will explore and practice these skills by conducting original research in the Portland area.

**Hon 202: Urban Humanities**

This course examines the city as text, using humanities methodologies that produce close analysis of cultural artifacts and texts placed in cultural and historic contexts. Disciplinary approaches may include History, Languages and Literatures, Art History, Film Studies, Gender Studies, Cultural Studies, and others.
Hon 203: Urban Ecology
Utilizing Portland as a living laboratory, this course introduces methodologies in the natural sciences. We explore foundations of experimental design while also sharpening observational skills and awareness of physical and ecological patterns and processes in the city. Different focus areas depend upon seasonal activity and include a range of topics such as stream ecology, plant science, and ornithology.

THIRD YEAR: "LET KNOWLEDGE SERVE THE CITY" (12 CREDITS)

Honors Writing for Transfer Students: HON 399 (4 credits - counts towards 12-credit third-year HON requirement)

This 4-credit course is the required entry point for transfer students entering Honors College at the junior level. HON 399 introduces transfer students to ways of thinking about the urban experience, introduces and develops the basic writing and research tools necessary for upper-level seminar work in Honors and for the senior thesis, and provides working examples of disciplinary scholarship. This is an approved Writing Intensive Course (WIC); it fulfills the university's second writing requirement. Class size limited to 24.

Honors Junior Seminars: Hon 407 (minimum 4 credits - maximum 12 credits)

At least one 4-credit Hon 407 Junior Seminar is required; additional seminars are encouraged. Students choose from among a wide variety of interdisciplinary seminars, taught by Honors and departmental faculty, broadly focused around key methodological and interdisciplinary questions. Seminar classes challenge Honors students to think creatively and analytically as well as rehearse the essential research and writing skills necessary for the production of a senior thesis. Class size limited to 20.

Honors Abroad: Hon 407 (4 credits - 8 credits)

The Honors College offers faculty-led global Hon 407 seminars for Honors students every year. Past trips have investigated cultural and ecological sustainability in Borneo, studied sustainable development in the highlands of Nicaragua, explored global cities in Vietnam, and examined the history of plague and pestilence in London. These courses fulfill the Hon 407 Junior Seminar requirement.

Internships: Hon 404 (4 credits - 8 credits)

Students have the opportunity to gain experience, apply their academic learning, and make connections through approved cooperative education/internships. During their internship, students must enroll in and complete the online Hon 404: Internship module on D2L. Honors students have in the past interned at OHSU, the U.S. Attorney's office, Portlandia, the National Institutes for Health, the Portland Art Museum, Mercy Corps, the Beaverton City Library, Willamette Week, and the Smithsonian, among many other organizations.

Research: Hon 401 (4 credits - 8 credits)

Students are encouraged to join ongoing research projects, conduct independent research, and develop creative projects under the supervision and mentorship of faculty.

FOURTH YEAR: UNDERGRADUATE THESIS (8 CREDITS)

Hon 403 Thesis: Prospectus (4 credits)

Hon 403 Thesis: Continuation (4 credits)

Honors students are required to complete a thesis in their major field during their final undergraduate year. Students first take the 4-credit Hon 403 Thesis: Prospectus seminar, in which they identify their advisor and write their thesis prospectus. Upon successful completion of the Prospectus course, the student enrolls in one or more Hon 403 Thesis: Continuation sections, in which they complete their thesis. Finally, the student presents the thesis at the Honors Thesis Symposium. Honors theses are published online through the PSU Library database PDX.Scholar, and are also available in the Undergraduate Research Commons, showcasing undergraduate research from universities nationwide.

Hon 403 Thesis: Prospectus is an approved Writing Intensive Course (WIC). It fulfills the university's second writing requirement.
The College of Liberal Arts and Sciences provides an opportunity for students to obtain a liberal education—an education that both broadens and deepens their understanding of the major areas of knowledge and scholarship, and develops their expertise in an area of specialization. A liberal education is an education for life. It prepares students to make informed decisions about their lives and to think critically and analytically.

All students—Liberal Arts and Sciences majors as well as those from professional schools and programs—take a selection of courses that represent the three areas of the college: arts and letters, science, and social science. Course offerings range from those designed to provide a foundation for all baccalaureate degrees to those of an advanced, specialized nature.

Acquiring a balanced and integrated liberal education requires planning and consultation with an adviser. Faculty advisers in each department and program are available to help students structure their academic careers so they may get the most from their college experience.

The instructional units of the college include Anthropology (p. 207), Applied Linguistics (p. 211), Biology (p. 215), Black Studies (p. 221), Chemistry (p. 222), Chicano/Latino Studies (p. 227), Communication (p. 228), Conflict Resolution (p. 231), English (p. 235), Environmental Science and Management (p. 244), Geography (p. 255), Geology (p. 262), History (p. 270), Indigenous Nations Studies (p. 276), Judaic Studies (p. 279), Mathematics and Statistics (p. 281), Philosophy (p. 301), Physics (p. 302), Psychology (p. 316), Sociology (p. 319), Speech and Hearing Sciences (p. 321), Systems Science (p. 325), Women, Gender, and Sexuality Studies (p. 329), and World Languages and Literatures (p. 333).

Undergraduate programs
Baccalaureate Degrees

The College of Liberal Arts and Sciences is a large and diversified unit offering more than 20 majors (some with additional choices of sub-specialization), several academic certificates and teaching endorsements, and numerous departmental minors.

The college also offers a selection of alternative programs for students who are highly motivated and who have a record of high scholarly achievement. Students may obtain information concerning any one of several departmental honors tracks from the participating department. These programs generally allow an accelerated exposure to higher education, thereby broadening the experience of the student.

All majors in the College of Liberal Arts and Sciences, along with University and general education requirements, lead to a bachelor’s degree. Requirements for each major are listed under the appropriate department. (Students wishing to emphasize a broad study in arts and letters, science, or social science may do so by majoring in liberal studies. For these options see Interdisciplinary Studies: Arts and Letters, Social Science (p. 277).)

Certificates

Specialized undergraduate and graduate academic certificates are offered by the following units in the College of Liberal Arts and Sciences: the School of Gender, Race, and Nations; Applied Linguistics; Black Studies; Chicano/Latino Studies; Conflict Resolution; English; Environmental Science and Management; Geography; Geology; Mathematics; Speech and Hearing Sciences; Systems Science; Women, Gender, and Sexuality Studies; and World Languages and Literatures. Requirements for these certificates are listed under the appropriate department.

Minors

The following departments and programs in the College of Liberal Arts and Sciences offer academic minors: Anthropology; Applied Linguistics; Biology; Black Studies; Chemistry; Chicano/Latino Studies; Communication; Conflict Resolution; English; Environmental Science and Management; Geography; Geology; History; Indigenous Nations Studies; Judaic Studies; Mathematics and Statistics; Philosophy; Physics; Pre-Education (Elementary Education, Elementary Science, Secondary Education, and Special Education), Psychology; Sociology; Systems Science; Women, Gender, and Sexuality Studies; and World Languages and Literatures. Students majoring in a field of study outside Liberal Arts and Sciences may also declare an academic minor in one of these programs. The requirements for these minors are indicated within the appropriate department sections of this Bulletin.
DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for the College of Liberal Arts and Science’s undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

HIGH SCHOOL COLLEGE PROGRAMS

503-725-3430
Joy Beckett, Director
Stephanie Gustafson, Program Coordinator
Sarah Holliday, Event Coordinator

Challenge Program

The Challenge Program is a cooperative program between Portland State University and metropolitan area high schools. It provides eligible high school juniors and seniors an opportunity to take regular PSU college courses on their own campuses at reduced cost.

Students who have a minimum cumulative grade point average of 3.00 and have met course prerequisites are eligible to enroll in Challenge courses offered in their high school.

The Challenge Program currently offers introductory college courses in Chemistry, English, World Languages and Literatures, History, Mathematics, Geology, PSU Honors, and Computer Science. Course content is equivalent to that offered to Portland State University students on the home campus. College-level texts and materials are used.

Students who complete their Challenge Program coursework are entitled to a regular Portland State University transcript. The credit earned by the student can be transferred to many colleges and universities regionally and nationally.

More information is available at http://www.pdx.edu/challenge-program.

Graduate programs

There are many options available for graduate study within the College of Liberal Arts and Sciences. Students may specialize in any one of the many master’s programs or doctoral programs.

Master of Arts and Master of Science programs

Master of Arts and Master of Science degrees are designed for the student who wishes to conduct advanced studies in a particular discipline. Generally the programs are flexible enough for students, with the aid of an adviser, to design a program of study that allows them to pursue their particular interest. The requirements of each discipline are listed under the departments that have the M.A./M.S. option available.

Doctoral Programs

Departments in the College of Liberal Arts and Sciences that offer doctoral programs include Biology, Chemistry, Mathematics, Physics, Psychology, and Sociology. Many other departments participate in one or more multidisciplinary doctoral programs: Earth, Environment, and Society; Systems Science; and Urban Studies. The doctoral degree is for the person who wants the most advanced academic degree, generally with a life-long objective of expanding the scope of knowledge of a specialized field of study. The specific requirements of each available option are listed under the participating departments and programs.

Earth, Environment and Society Ph.D.

EARTH, ENVIRONMENT AND SOCIETY PH.D.

The Earth, Environment, & Society (EES) doctoral program provides an opportunity for the student to engage in relevant research while acquiring advanced academic training in Environmental Science and Management, Geography, or Geology. One of the goals of the program is to provide a broadly based understanding of one of the above fields coupled with scientific training in one or more specialty areas. The student will follow a program of study and research approved by the EES program. The graduating student will be awarded a degree in Earth, Environment, & Society.

ADMISSION REQUIREMENTS

Applicants for admission to the Earth, Environment, & Society (EES) doctoral program normally will be expected to have completed a Bachelor’s or Master’s degree in a related field that will have prepared them to become engaged in state-of-the-art research.

DEGREE REQUIREMENTS

In addition to the requirements listed above, each student must complete the following.

At least 81 credits past the bachelor’s degree and the following courses:

Course requirements

• Four credits of seminar, which may be satisfied by any combination of ESM/G/Geog 507 Speakers Series, ESR 655/ESR 656/ESR 657, Professional Prep series, Research Group Seminars at the departmental 500 level, and Journal Clubs offered in the student’s area at the departmental 500 level (4 credits);

• Two credits of professional development, ESR 655 and ESR 656 or other similar courses recommended by the Advisory Committee and subject to approval by the
EES doctoral program director (2 credits);

- One course in research methods, such as ESM 566, ESM 567, G 523, Geog 525, Geog 597, Geog 694, USP 683, Soc 592 or other similar course recommended by the Advisory Committee and subject to approval by the EES doctoral program director (3-4 credits);

- Dissertation credits (27 credits).

Subtotal: 36-37

Substitutions for the courses listed above may be granted by petitioning the EES doctoral program director.

Subtotal: 36-37

ADDITIONAL REQUIREMENTS

In addition to the general requirements, each student will be required to complete any coursework necessary to indicate competence in environmental scholarship at the graduate level, as determined by the Advisory Committee. It is required that all EES doctoral students take at least one 1-credit seminar course (as defined above) for every term they’re in residence until advancing to candidacy.

Dissertation

The student must submit a prospectus outlining a proposed research project suitable for the doctoral dissertation in Earth, Environment, & Society. This is done under the guidance of the student’s advisor and is approved by the Dissertation Committee and the Director of the Earth, Environment, and Society doctoral program. The research for the dissertation is conducted under the guidance of the student’s dissertation committee. After the dissertation is complete and after advancement to candidacy (see below), a final oral defense will be conducted, open to the public, within the subject area of the dissertation.

Advancement to candidacy

As soon as the student has successfully completed the course and comprehensive examination requirements and has had the dissertation prospectus approved, the student is recommended for advancement to candidacy for the degree of Doctor of Philosophy. This recommendation is approved by the dean of Graduate Studies.

Financial support

There are a limited number of teaching assistantships and research assistantships available that are offered through the College and through the constituent departments (ESM, Geography, Geology).

Withdrawal

Any student who ceases to be enrolled for more than one academic term without formal leave of absence will be assumed to have withdrawn from the degree program and will be formally dropped from it. Students who fail to make satisfactory progress toward the degree may be dropped from the program.

The student can be readmitted only by formal application, subject to all current admission requirements. In addition, completion of the degree will be subject to the student’s meeting all current degree requirements.

Leave of absence

Under special circumstances, requests for a leave of absence may be approved.

School of Gender, Race, and Nations

150 Parkmill (PKM)
503-725-9093
www.pdx.edu/gender-race-nations/

- Graduate Certificate in Gender, Race, and Nations

The School of Gender, Race and Nations (SGRN) is comprised of four units: Black Studies (p. 221), Chicano/Latino Studies (p. 227), Indigenous Nations Studies (p. 276), and Women, Gender, and Sexuality Studies (p. 329). This collaboration is interdisciplinary at its core. The overarching areas evident in the school’s name feature the rich constellation of interlocking and challenging factors key to understanding our society and making changes for a more socially just future. Our goal is to create a space for excellence in studies and research of culture, race, ethnicity, sovereignty, nation, migration, class, gender and sexuality. The School of Gender, Race and Nations offers a graduate certificate (p. 207). Those who enroll in the GRN certificate program include those from existing graduate programs and professionals seeking additional grounding in such studies.

These are the programs offered in the four SGRN units. Full details can be found on their individual websites.

Black Studies (p. 221)

- B.A., B.S. in Black Studies
- Minor in Black Studies
- Post Baccalaureate Certificate in Black Studies

Chicano/Latino Studies (p. 227)

- Minor in Chicano/Latino Studies
- Certificate in Chicano/Latino Studies

Indigenous Nations Studies (p. 276)

- B.A., B.S. in Indigenous Nations and Native American Studies
- Minor in Indigenous Nations Studies
Women, Gender, and Sexuality Studies (p. 329)

- B.A., B.S.—Women's Studies
- B.A., B.S.—Sexuality, Gender, and Queer Studies
- Minor in Women's Studies
- Minor in Sexuality, Gender, and Queer Studies
- Postbaccalaureate Certificate in Women's Studies

Anthropology

141 Cramer Hall (CH)
503-725-3361
www.pdx.edu/anthropology

- B.A., B.S.
- Minor in Anthropology
- Secondary Education Program—Social Science
- M.A., M.S.

Anthropology is the study of biological and cultural diversity across time and space, from the primates and our bipedal ancestors to human societies in prehistory and the modern world. As anthropologists, we have a keen understanding of the complexities of our past, the interconnections between biology and culture, and the urgent social problems of our times.

Students can develop their expertise in topics such as cultural heritage, human-environment interactions, climate change, and biodiversity conservation, design and user experience, structural racism, violence, migration, primatology, gender and sexuality, food systems, globalization, and human health and medicine. Students gain knowledge and skills through a variety of classroom, online, lab and internship opportunities. This experience prepares students for careers with federal and state agencies, NGOs, tribes, public/community health organizations, biomedical research institutions, consulting firms, activist groups, museums, corporations, academia and more.

Our department supports three subfields: archaeology, sociocultural anthropology, and biological anthropology. Our regional specializations lie in Madagascar, Asia, Latin America, the Arctic, and western North America. We are dedicated to applied research and scholarship that addresses real world issues through problem solving and the co-creation of knowledge and solutions with the communities where research and interventions are conducted.

Central to our collective endeavors is critically reflecting on the colonial histories and epistemologies of anthropology as an academic discipline and profession. We are committed to including a plurality of theoretical and methodological perspectives in our pedagogy, particularly those of non-Western and underrepresented scholars. Our research practices advance collaborative, participatory, and praxis-based approaches that decenter authority in knowledge production. We prioritize engaging with practitioner communities, extending anthropological knowledge and insights beyond the academy, and expanding diversity within the faculty, student body and discipline as a whole.

Undergraduate program

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Anthropology's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

Limitations
Students majoring in anthropology should consult a department adviser no later than the beginning of the junior year. Selection of appropriate courses to supplement the student’s major work should be made in consultation with the adviser. No student majoring in anthropology will be permitted to offer more than 72 credits of work in anthropology for the bachelor’s degree. This limitation will be waived only through petition to the department.

ANTHROPOLOGY B.A./B.S.

REQUIREMENTS

In addition to meeting the general University degree requirements, the anthropology major must meet minimum departmental requirements as follows:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Cred</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anth 101</td>
<td>Introduction to Biological Anthropology</td>
</tr>
<tr>
<td>Anth 102</td>
<td>Introduction to Archaeology</td>
</tr>
<tr>
<td>Anth 103</td>
<td>Introduction to Social/Cultural Anthropology</td>
</tr>
<tr>
<td>Anth 304</td>
<td>Social Theory</td>
</tr>
<tr>

</tr>
</tbody>
</table>

Students earning the B.S. are required to take Stat 244

NOTE: Anthropology B.A. majors must complete two years of a foreign language or demonstrate equivalent proficiency.

Subtotal: 53-54

ELECTIVE REQUIREMENTS

Students are required to take 20 upper division elective credits including at least one methods course (i.e., Anth 412, Anth 415, Anth 452, Anth 453, Anth 454, Anth 455, Anth 477, Anth 478, Anth 479). At least 12 of the 20 credits must be in 400-level courses. Four of the 20 credits may be in omnibus numbered-courses (i.e., Anth 401, Anth 404, Anth 405, Anth 407).

Four of the required 20 elective credits may be taken on a pass/no pass basis; all other anthropology courses used to satisfy the departmental major requirements must be taken for a letter grade and must have been assigned a grade of C- or better. Courses taken outside the department as part of departmental requirements (i.e. Ling 232, Ling 233, Ling 390 or Stat 244, World Languages and Literatures courses) may be taken pass/no pass (subject to the University limitations on the maximum number of hours taken pass/no pass) or for a letter grade. However, students who take these courses for a letter grade must earn a C- or better. Students must earn a cumulative grade point average of 2.00 or better in all courses required for the anthropology bachelor’s degree (including those courses taken outside the department as part of departmental requirements).

ANTHROPOLOGY MINOR

REQUIREMENTS

To earn a minor in anthropology a student must complete 28 credits (12 credits of which must be taken in residence at PSU), to include the following:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Cred</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anth 101</td>
<td>Introduction to Biological Anthropology</td>
</tr>
<tr>
<td>Anth 102</td>
<td>Introduction to Archaeology</td>
</tr>
<tr>
<td>Anth 103</td>

<td>Paleanthropology</td>
</tr>
<tr>
<td>Anth 372</td>
<td>Human Variation</td>
</tr>
<tr>
<td>Anth 373</td>
<td>Primate Ecology and Behavior</td>
</tr>
</tbody>
</table>
Three upper-division anthropology electives
(Upper-division electives must include at least one 400-level course, excluding courses numbered Anth 401, Anth 404, Anth 405, Anth 407)
Subtotal: 28-29

All anthropology courses used to satisfy the departmental minor requirements, whether taken in the department or elsewhere, must be graded C- or above. Students must earn a cumulative grade point average of 2.00 or better in all courses required for the anthropology minor (including those courses taken outside the department as part of departmental requirements).

Graduate programs
The Department of Anthropology offers the degrees of Master of Arts and Master of Science. The program is designed to give the student a graduate level of competence in general anthropology, including the major subfields of biological anthropology, archaeology, and social-cultural anthropology. At the same time, the program will permit the student to pursue a special interest in one of the subfields. Students have the option of choosing from three tracks: a thesis track, an internship track, or a skills track. The thesis track candidate is required to do research in an area of special interest and prepare a thesis based upon it. The internship and skills tracks are designed to prepare students for professional employment related to applied anthropology. Students in the internship track will complete an internship and a thesis that combines an internship deliverable and a final internship paper. Students in the skills track will take 7 additional hours of coursework, complete comprehensive exams, and submit a portfolio that documents the skills they obtained during the program. For more information, interested students are urged to go to the Department’s Web site: www.pdx.edu/anthropology.

The master’s program has been planned for students who hold an undergraduate degree in general anthropology or its equivalent in course coverage. For students with this preparation, the master’s degree, including research and thesis, may be completed in two to three years. Graduate applicants who lack an undergraduate major in Anthropology may be admitted to the program, but completion of the degree may require a more extended period of study. Students without an adequate background in anthropology will be required to take selected undergraduate courses to remove deficiencies. These courses normally do not offer graduate credit.

ADMISSION REQUIREMENTS
For admission to graduate study, the student must have a minimum of a 3.25 grade point average in anthropology courses and an overall GPA of 3.00. In addition, the applicant must submit GRE scores, a 500-word statement indicating why he or she is interested in pursuing a graduate degree in anthropology, and a sample of written work (e.g., a term paper). All applicants must also arrange to have three letters of recommendation indicating professional promise addressed to the Department’s Graduate Admission Committee. To facilitate scheduling of graduate courses, students ordinarily are admitted for fall term only.

ANTHROPOLOGY M.A./M.S.

THESIS TRACK

Of the 45 required credits, 32 must be in anthropology and must include:

<table>
<thead>
<tr>

Adviser-approved Research Methods course: This course must be formally numbered and described in the PSU Bulletin. It may not be a course numbered 501/601, 502/602, 503/603, 504/604, 505/605, 506/606, 507/607, 508/608, 509/609.

Subtotal: 52

Four calendar years from the term of admission will be the maximum time allowed to complete all requirements for a master's degree. Terms on approved leave of absence will be charged against the four-year limitation.

In addition to formal course requirements, the following are also necessary:

1. Candidates for an MA degree must fulfill the second language requirement. Options for meeting the graduate foreign language requirement for MA students include: A) Passing a course equivalent to PSU level 203 or higher. The Department of World Languages and Literatures will verify completion of the requirement upon evaluation of the student's academic record. B) Students who do not meet the course equivalent should contact the Department of World Languages and Literatures during the first term after their admission to schedule an oral proficiency interview or a written test. Ordinarily the examination is taken in French, Spanish, or German. Other languages may, upon departmental approval, be substituted. Students must complete the foreign language requirement no later than one calendar year following entrance to the program. Foreign Language Requirement Verification Request Forms should be submitted for completion to the Department of World Languages and Literatures and a copy should be given to the Anthropology Department.

2. Candidates for an MS degree are strongly encouraged to discuss with their advisers the selection of appropriate courses in science, math, and technical skills that would complement their course of study.

3. Advancement to candidacy involves successful passing (a minimum grade of B-) of the core seminars (Anth 511, Anth 550, Anth 570). Advancement to candidacy can only be accomplished before the close of the next-to-the-final term of work.

4. For the thesis track, approval of a thesis topic and the appointment of the graduate committee. For the internship track, approval of an internship contract (including deliverables), a final paper topic and format, and the appointment of the graduate committee. For the skills track, approval of a course plan, portfolio content, and the appointment of the graduate committee. Students develop a thesis proposal (thesis...
track), internship contract and final paper score (internship track), or coursework/portfolio plan (skills track) and submit it to the department faculty for approval and for the formal appointment of the graduate committee. Students in the thesis track should have a master’s thesis proposal submitted to and approved by the department faculty as soon as possible following admission to the program, but in no case later than the end of the seventh term (excluding Summer Session) following admission to the program. Students in the internship track should have an approved internship contract as soon as possible following admission into the program, but in no case later than the end of the fifth term (excluding Summer Session). Students in the skills track should have an approved course plan by the end of their first quarter in the program.

5. For students on the internship track, submission of internship deliverable to partnership organization and presentation and approval of the final internship paper.

6. For students on the thesis track, presentation and approval of thesis and passing of an oral defense of thesis.

7. For students on the skills track, passing comprehensive exams, submitting and presenting an approved portfolio that demonstrates the skills obtained during the program.

Applied Linguistics

The Department of Applied Linguistics offers a B.A. in Applied Linguistics, a minor in Applied Linguistics, a Certificate in Teaching English as a Second Language (TESL), and an M.A. in Teaching English to Speakers of Other Languages (MA TESOL).

The B.A. major in Applied Linguistics provides a strong foundation in both analytical and communication skills while building students’ understanding of the structure and use of human languages. It also serves as strong preparation for graduate study. A minor in Applied Linguistics allows students to integrate language analysis skills and a basic knowledge of language structure into a major in another field. The Certificate in Teaching English as a Second Language provides thorough undergraduate-level preparation for teaching. The MA TESOL provides graduate-level preparation for teaching, language consulting, and research.

Undergraduate programs

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Applied Linguistics’ undergraduate degrees, go to www.pdx.edu/academic-programs/a-z. Terms of course offerings may change. Check the department website: https://www.pdx.edu/applied-linguistics/course-schedule

APPLIED LINGUISTICS B.A.

Admission requirements

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

REQUIREMENTS

In addition to meeting the general University requirements for the B.A. degree, majors must complete an adviser-approved program to include the following:

Required Courses

<table>

**NOTE:** Students should consult with the departmental undergraduate adviser to determine which of the paired options above is the more appropriate choice for their program of study.

**ADVISER APPROVED ELECTIVES 16 credits**

Students should meet with the departmental undergraduate adviser to determine which options are most appropriate for them. Students interested in general applied linguistics should choose from Ling 409, Ling 414, Ling 416, Ling 418, Ling 419, Ling 432, Ling 433, Ling 445, Ling 470, Ling 472, Ling 476, Ling 480, Ling 481, Ling 482, and Ling 490. Students interested in theoretical or structural linguistics should choose from Ling 411, Ling 412, Ling 414, Ling 416, Ling 418, Ling 420, Ling 432, Ling 433, Ling 445, Ling 476, Ling 480, Ling 482, and Ling 490. Students interested in language use in the classroom should choose from Ling 409, Ling 416, Ling 439, Ling 470, Ling 472, Ling 473, Ling 476, Ling 480, Ling 481, and Ling 490. Ling 410 requires prior advisor approval.

At least 8 of the 16 elective credits are required to be from PSU Linguistics courses. For a course not taken in PSU Linguistics to count toward the major, students must get approval from the chair or the departmental undergraduate adviser.

Students planning to complete the TESL certificate concurrently with the BA or to enter the MA TESOL program after the BA should work with an adviser to carefully plan their program.

**TYPOLOGICALLY DIFFERENT LANGUAGE FROM ENGLISH / LANGUAGE STRUCTURE REQUIREMENT 8 credits**

All students must complete one of the three following requirements:

1. Take 2 terms of a single language that is typologically different from English (choose from Arabic, ASL, Chinese, Hebrew, Japanese, Korean, Persian, Russian, Swahili, or Turkish).

2. Take 2 classes that focus on language structure across languages:
   - Ling 418 Linguistic Morphology 4
   - Ling 419 Language Typology 4
   - Ling 420 Historical and Comparative Linguistics 4
   - Ling 481 World Englishes 4
   - Ling 482 Pidgins and Creoles 4
   - Ling 410 Selected Topics 4

   Ling 410 requires prior advisor approval

3. Take one term of a typologically different language and one language structure class.

All courses used to satisfy the department major requirements must be graded C or above. Courses taken pass/no pass are not acceptable toward fulfilling department major requirements. By the end of the first quarter of admission to the program, students must consult with the adviser to select the appropriate courses. On completion, the entire program must also be approved by the undergraduate adviser.

**APPLIED LINGUISTICS MINOR**

**REQUIREMENTS**

To earn a minor in applied linguistics a student must have a major in another department and must complete 28 adviser-approved credits (at least 24 credits of which must be taken in residence at PSU), to include the following:

**Courses**

**28 credits**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ling 390</td>
<td>Introduction to Linguistics</td>
<td>4</td>
</tr>
<tr>
<td>Linguistics electives</td>
<td></td>
<td>24</td>
</tr>
</tbody>
</table>

All linguistics electives require prior approval by the departmental undergraduate adviser. At least 20 of the 24 elective credits are required to be from PSU Linguistics courses. A maximum of 4 of the 24 elective credits may come from linguistics-focused coursework in another PSU department.

All courses used to satisfy the department minor requirements must be graded C or above. Courses taken pass/no pass are not acceptable toward fulfilling department minor requirements.

**TEACHING ENGLISH AS A SECOND LANGUAGE (TESL) CERTIFICATE**

The TESL Certificate provides undergraduate-level preparation to teach English to speakers of other languages. It is especially useful for people who want to teach in non-university settings internationally or limited situations in the U.S. The TESL Certificate also combines well with a major in a language-related field such as
Applied Linguistics, World Languages and Literatures, Communication, Education, and other social sciences. Students may enroll in the programs as undergraduates or as post-baccalaureate students.

Admission requirements

1. Admission to Portland State University.

2. English proficiency in spoken and written English if the student is not a native speaker of English (a TOEFL iBT score of 80 or higher or an IELTS band score of 6.5 or higher is required for proof of proficiency).

3. One year proficiency in at least one foreign language if the student is a native speaker of English. (Note: If not fulfilled at the time of admission, this requirement can be fulfilled concurrently with the Certificate courses.)

COURSE REQUIREMENTS

In addition to fulfilling minimum University requirements, the following courses are required:

<table>
<thead>
<tr>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>28 credits</td>
</tr>
<tr>
<td>Ling 390 Introduction to Linguistics 4</td>
</tr>
<tr>
<td>Ling 392 Structure of the English Language 4</td>
</tr>
<tr>
<td>Ling 438 Second Language Acquisition 4</td>
</tr>
<tr>
<td>Ling 471/Int 471 Experience 4</td>
</tr>
<tr>
<td>Ling 477 TESOL Methods I 4</td>
</tr>
<tr>
<td>Ling 478 TESOL Methods II 4</td>
</tr>
<tr>
<td>Ling 409 Language Teaching Practicum 4</td>
</tr>
</tbody>
</table>

All courses used to satisfy the certificate requirements must be graded C or above. Courses taken under the undifferentiated grading option (P/NP) are not acceptable for department requirements. Before the end of the first quarter in the program, the student is required to consult with the departmental adviser to select the appropriate course sequence.

Graduate program

MASTER'S IN TEACHING ENGLISH TO SPEAKERS OF OTHER LANGUAGES (MA TESOL)

The MA TESOL degree prepares its recipients for teaching English to speakers of other languages and other language-related professions. The MA is increasingly the degree expected for teachers both in the United States and abroad, where it is generally a requirement for university-level teaching.

Admission Requirements

1. Admission to graduate study at Portland State University.

2. Admission to the MA TESOL program. See the department website for application information (www.pdx.edu/applied-linguistics).

3. Proficiency in English. If the student is not a native speaker of English and doesn't hold a valid B.A. degree or equivalent from an American university, a minimum TOEFL iBT score of 100 or IELTS 7.0 is required for admission. Alternatively, students can be admitted after completing Portland State’s Intensive English Language Program (IELP) with a GPA of 3.5 and receiving a recommendation for graduate study from the IELP.

Persons interested in applying for the MA TESOL program should write to the Department of Applied Linguistics at linginfo@pdx.edu or visit the department's website at www.pdx.edu/applied-linguistics for additional information. Regular information sessions are held for prospective students. Contact the department for details.

DEGREE REQUIREMENTS

Students must meet with an adviser regularly, starting in the first term of the program. In addition to the minimum graduate school requirements, students must have an adviser-approved program that meets the criteria below. (For those students who have completed the Certificate in TESL, adviser-approved courses will be used to substitute for some of the following requirements.)

Each student will complete a total of 48-50 credits: 20 credits of required courses, 24 credits of additional coursework from one of the three tracks listed below, and 4-6 credits of culminating experience. The three tracks are: (1) MA TESOL - Standard Track, (2) MA TESOL - Language Assessment Not Required, (3) MA TESOL with focus in Applied Linguistics. Based on their professional goals and previous experience, and in consultation with their adviser, students choose one of the three tracks.

For all tracks, students must complete either a four-credit Culminating Workshop course (Ling 566), in which they prepare their professional portfolio based on work throughout their MA, or a six-credit Thesis (Ling 503). All electives must be adviser approved.

</table>
Foundations of Language Structure and Use 12 credits 12 credits 16 credits
Language Education 20 credits 16 credits 8 credits
Electives 8 credits 12 credits 16 credits
Research and Culminating Experience 8 credits or 10 credits if thesis option 8 credits or 10 credits if thesis option

Total credits for all tracks: 48 credits or 50 credits with thesis option

TRACK 1: TESOL - STANDARD TRACK

Foundations of Language Structure and Use: Required Courses
Ling 513 Applied Phonetics and Phonology 4
Ling 521 Applied English Grammar 4
Ling 531 Language, Identity, and Culture 4

Language Education: Required Courses
Ling 538 Second Language Acquisition 4
Ling 577 TESOL Methods I 4
Ling 578 TESOL Methods II 4
Ling 539 Language Assessment 4
Ling 509 Language Teaching Practicum 4

Elective Courses
1 Language Use Elective 4
1 Language Education Elective 4

Research and Culminating Experience
Ling 565 Research in Language Teaching and Applied Linguistics 4
Ling 566 Culminating Workshop for TESOL and Applied Linguistics or
Ling 503 Thesis 6

TRACK 2: TESOL - LANGUAGE ASSESSMENT NOT REQUIRED

Foundations of Language Structure and Use: Required Courses
Ling 513 Applied Phonetics and Phonology 4
Ling 521 Applied English Grammar 4
Ling 531 Language, Identity, and Culture 4

Language Education: Required Courses
Ling 538 Second Language Acquisition 4

Elective Courses
1 Language Use Elective 4
1 Language Education Elective 4

Research and Culminating Experience
Ling 565 Research in Language Teaching and Applied Linguistics 4
Ling 566 Culminating Workshop for TESOL and Applied Linguistics or
Ling 503 Thesis 6

TRACK 3: APPLIED LINGUISTICS

Foundations of Language Structure and Use: Required Courses
Ling 513 Applied Phonetics and Phonology 4
Ling 521 Applied English Grammar 4
Ling 531 Language, Identity, and Culture 4
Ling 516 Discourse Analysis 4

Language Education: Required Courses
Ling 538 Second Language Acquisition 4
WLL 598 Methods of Teaching Foreign Languages 4

Elective Courses
4 graduate-level Ling courses 16

Research and Culminating Experience
Ling 565 Research in Language Teaching and Applied Linguistics 4
Ling 566 Culminating Workshop for TESOL and Applied Linguistics or
Ling 503 Thesis 6

LANGUAGE USE AND LANGUAGE EDUCATION COURSES

Language Use Courses
Ling 514 Linguistic Pragmatics 4
Ling 515 Linguistic Phonetics 4
Ling 516 Discourse Analysis 4
Ling 532 Sociolinguistics 4
Ling 537 First Language Acquisition 4
Ling 576 Corpus Linguistics 4
Ling 580 Bilingualism 4
Ling 581 World Englishes 4
Ling 582 Pidgins and Creoles 4

Ling 510 can be used only with adviser approval.

**Language Education Courses**

Ling 509 Language Teaching Practicum 4
Ling 539 Language Assessment 4
Ling 570 Grammar for TESOL 4
Ling 572 Teaching Pronunciation 4
Ling 573 Computer Assisted Language Learning 4
Ling 575 Curriculum Design and Materials Development in TESOL 4

Ling 510 can be used only with adviser approval.

The thesis will conform to departmental and university guidelines for details such as thesis proposal meetings, defenses, and formatting.

All courses need to be passed with a grade of “B” or better in order for them to count toward this degree. Ling 507 (Seminar) and Ling 510 (Selected Topics) will count for credit in a particular curriculum component area, depending on course content, with prior approval by the student’s adviser.

Additionally, the department and the university require at least two years’ study of a language in addition to the student’s native language or an equivalent level of proficiency in a non-native language. For non-native speakers of English, proficiency in English as described above fulfills this requirement. For native speakers of English, two years of college-level study of an additional language as documented by a transcript fulfills this requirement. Students who have not already had two years or the equivalent of an additional language at the college level can complete the graduation requirement while working on the M.A., but doing so will likely lengthen the time for completing the degree.

**Biology**

246 Science Research and Teaching Center (SRTC) 503-725-8757

- B.A., B.S.
- Minor
- Secondary Education Program
- M.A., M.S.
- M.A.T. and M.S.T. (Science/Biology)
- Ph.D.—Biology

**Academic Affiliations and Cooperative Programs**

The Center for Life in Extreme Environments (CLEE) is housed at Portland State University and includes faculty members and students who study organisms from some of the most extreme habitats on Earth. Cooperative programs at Portland State University include the Marine Mammal Stranding Network, Oregon Zoo, Malheur Field Station, Oregon Health Sciences University, Oregon National Primate Research Center, Oregon Museum of Science and Industry (OMSI), and the Oregon Department of Fish and Wildlife. The Oregon University System maintains the Institute of Marine Biology near Coos Bay and The Hatfield Marine Sciences Center in Newport on the Oregon coast.

**Undergraduate programs**

The biology program is designed to prepare students for careers in biological research, teaching, health sciences, biotechnology, conservation biology and wildlife management, forestry, and other applied fields. It also provides the necessary background for advanced study leading to graduate degrees in the more specialized fields of the biological sciences.

A student planning to enter medicine, dentistry, or other professional fields should consult the catalog of the professional school to which the student intends to apply following pre-professional work in biology and other sciences at Portland State. Biology is also a teaching endorsement area in the program of secondary education.

**DEGREE MAPS AND LEARNING OUTCOMES**

To view the degree maps and expected learning outcomes for the Biology undergraduate degree, go to www.pdx.edu/academic-programs/a-z.

**ADMISSION REQUIREMENTS**

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

**BIOLOGY B.A./B.S.**

**REQUIREMENTS**

In addition to satisfying general University requirements, a student majoring in biology must meet general department requirements as well as fulfill the biology major requirements.

General requirements are completion of two terms of statistics or two terms of calculus; three terms of science
majors’ introductory chemistry with laboratory; one term of organic chemistry; Ph 201, Ph 214; and 12 elective credits from anthropology, chemistry, computer science, environmental science, geology, mathematics, physics, psychology, public health education, or statistics at the 200 level or higher. Courses used to meet any other general departmental requirement cannot also be used in the 12 elective credit area, and university studies courses are not accepted toward fulfillment of this requirement.

All biology majors must complete a minimum of 60 credits in biology including three terms of science majors’ introductory biology with laboratory. Of the 60 credits required for the major a minimum of 44 credits must be completed in upper-division biology specific coursework.

Biology courses taken under the pass/no pass grading option are not accepted toward fulfillment of departmental major requirements, with the exception of courses numbered Bi 401, Bi 404, Bi 405, and Bi 406 which are offered with either the A-F or P/NP grading option, and Bi 407 Seminar which is only offered as P/NP. Of the 60 credits required in biology, a minimum of 46 credits must be in courses other than Bi 401, Bi 404, Bi 405, Bi 406, and Bi 407. Students may apply a maximum of 6 cumulative credits from the following research and experiential learning elective options Bi 401, Bi 404, Bi 405, Bi 406 toward fulfillment of the biology major credit requirements.

Biology majors interested in the Biology Honors Research Program may obtain information in the Biology Dept. Office.

**General Departmental Requirements**

**All Biology majors must complete the General Departmental coursework listed below in addition to the Biology major requirements.**

<table>

Additional science/social science electives: Any combination of courses at the 200+ level that are not part of the University Studies Program from the following departments: Anth, Ch, CS, ESM, G, Mth, PHE, Psy, Ph, or Stat. Courses utilized to fill any other general departmental or biology major requirement cannot also be counted in the elective sciences area. University Studies courses taken in any of the listed departments cannot be applied toward fulfillment of this area.

**Biology Major Requirements**

**Lower Division Biology Core**

Enrollment requires concurrent enrollment in Ch 221 & Ch 227 or prior completion of Ch 221 & Ch 227

</tbody>
</table>

**Upper Division Biology Core**

Complete a minimum of 44 upper division Biology credits and satisfy Requirements 1, 2, and 3 below

**Requirement 1**

Complete a minimum of one course in Area A and one course in Area B. Complete both courses in Area C.

**Area A: Cellular/Molecular**

Complete at least one course from the list below:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bi 334</td>
<td>Molecular Biology</td>
<td>4</td>

</table>

**Requirement 3**

Choose a minimum of 12 credits from courses with the Bi prefix numbered between 412-499 (can include courses listed in Requirement 2 that were not also used to fulfill Requirement 2 (Lab/Field Area)).

**Additional upper division elective credit options to consider:**

Experiential learning elective options in research, co-op education, internships, workshops, and projects are available and students are highly encouraged to pursue these opportunities. A maximum of 6 credits total from Bi 401 Research, Bi 404 Cooperative Education, Bi 405 Reading and Conference, Bi 406 Laboratory Project may be applied toward fulfillment of biology major credit requirements.

Subtotal: 60

**BIOLOGY MINOR**

**REQUIREMENTS**

To earn a minor in biology, a student must complete at least 27 credits in Biology (at least 9 credits of which must be taken in residence at PSU). Courses must include three terms of science majors’ introductory biology with laboratory (Bi 211/214, Bi 212/215, Bi 213/216) and at least one course from each of Areas A, B, and C.

**Lower Division Biology Core**

Enrollment requires concurrent enrollment in Ch 221 & Ch 227 or prior completion of Ch 221 & Ch 227

Courses taken under the undifferentiated grading option (pass/no pass) cannot be used to fulfill biology minor requirements. Bi 401, Bi 404, Bi 405, Bi 406, and Bi 407 are not allowed for the minor. Additional courses may be required as prerequisites. 
Subtotal: 27-30

NEUROSCIENCE MINOR

CORE (12 CREDITS):
Each track must complete the following core requirements:

Area A: Neurophysiology (4 credits)
- Bi 462 Neuroscience I: Physiology of synapses and circuits 4
- or
- Psy 200 Psychology as a Natural Science 4
- or
- Psy 451 Introduction to Neurophysiological Psychology 4

Area B: Sensory/Motor Systems (4 credits)
- Bi 463 Neuroscience II: Sensory and Motor Systems 4
- or
- Psy 347 Perception 4
- or
- SpHr 461 Neurology of Speech and Hearing 4

Area C: Research/Outreach (4 credits)
- An approved 401 Research or 403 Thesis course 4

ELECTIVES (16 CREDITS)
Each track must complete 16 credits of electives selected from the following list of approved courses:

Track 1: Biology Majors (16 credits)
- CS 441 Artificial Intelligence 4
- CS 445 Machine Learning 4
- Ling 233 Language and Mind 4
- Ling 433 Psycholinguistics 4
- Ling 445 Linguistics and Cognitive Science 4
- PHE 466 Mind/Body Health: Disease Prevention 4
- PHE 467 Mind/Body Health: Human Potential 4
- PHE 473 Physiology of Exercise 4
- Phil 432 Philosophy of Mind 4
- Phil 471 Topics in Philosophy of Science: Cognitive Science 4
- Phil 471 Topics in Philosophy of Science: Psychiatry 4
- Psy 346 Learning 4
- Psy 348 Cognition 4
- Psy 399 Neuroscience and Behavior 4
- Psy 410 Cognitive Neuroscience 4
- Psy 410 Neuroscience Outreach: The Brain in Real Life 4
- Psy 434 Introduction to Psychopathology 4
- Psy 450 Psychopharmacology 4
- Psy 452 Advanced Neurophysiological Psychology 4
- Psy 471 Health Psychology 4
- SpHr 471 Neurolinguistics 4
- SpHr 495 Neurogenic Communication Disorders 4

Track 2: Psychology Majors (16 credits)
- Bi 207 Biology for Allied Health I 4
- or
- Bi 211 Principles of Biology: Molecular Cell Biology & Genetics 4
- And
- Bi 214 Principles of Biology Lab I 1
- Bi 208 Biology for Allied Health: Evolution and Diversity of Life 4
- or
- Bi 212 Principles of Biology: Development, Evolution & Ecology 4
- And
- Bi 215 Principles of Biology Lab II 1
- Bi 209 Biology for Allied Health: Anatomy and Physiology Systems 4
- or
- Bi 213 Principles of Biology: Organisms, Biodiversity & Conservation 4
- And
- Bi 216 Principles of Biology Lab III 1
- Bi 301 Human Anatomy and Physiology 4
- Bi 302 Human Anatomy and Physiology 4
- Bi 303 Human Anatomy and Physiology 4
- Bi 320 Introduction to Organismal Physiology 4
- Bi 412 Animal Behavior 4
- Bi 456 Developmental Biology 4
- CS 441 Artificial Intelligence 4
- CS 445 Machine Learning 4

Total Credit Hours: 28

SECONDARY EDUCATION

Adviser: Dr. Sarah Eppley

Students who wish to teach biology in secondary schools should complete one of the two programs shown, but may also want to consider pursuing a Master's of Education dependent upon overall career goals as it includes additional preparatory coursework generally required for most secondary school teaching positions. Courses for the Biology MAT/MST are to be taken for differentiated grades, except for those offered for pass/no pass only. Students must have at least a 3.00 GPA in the recommended science courses and must earn at least a C in each course of the endorsement area. Students should also take Psy 311. If you are interested in pursuing teaching in secondary schools please also review the Master's of Education with science endorsement program as it may be a better fit for your career aspirations and is more widely accepted for employment in secondary education in Oregon. For more information on the Master in Education (M.Ed.) program for secondary educators please see:

https://www.pdx.edu/ci/gtep

REQUIREMENTS

Biology majors

Students must complete a biology major's program as outlined above, and include an upper-division course each in microbiology, ecology, genetics, cell biology, and evolution. (See adviser.)
Non Biology majors

Graduate programs

The Department of Biology offers graduate degrees leading to the Master of Arts or Master of Science, and the Master of Arts in Teaching or Master in Teaching Science/Biology. The department also offers an advanced Ph.D. degree in biology. The latter specialized degree is attained through the successful completion of requirements as stipulated by the department and the student’s research committee (see below).

ADMISSION REQUIREMENTS

In addition to the instructions for admission to the graduate program (p. 41), the department requires the following information from each applicant to the M.A., M.S., M.S.T., or Ph.D. program in biology:

1. Satisfactory scores on the general Graduate Record Examination (GRE).
2. Two letters of evaluation from persons qualified to assess the applicant’s promise as a graduate student.
3. The student should submit an application using the online form found on the Graduate School’s website.

The prospective student should realize that a high GPA and acceptable GRE scores do not guarantee admission to the graduate programs in biology because of variables including the availability of appropriate advisers, research space, and departmental resources.

BIOLOGY M.A./M.S.

See University master's degree requirements (p. 51). Specific departmental requirements are listed below.

Satisfactory completion of at least 45 credits of approved graduate-level courses required for a master's degree. Students must complete Bi 598 Graduate Research Prospectus, and Bi 599 Graduate Grant Writing in the fall and winter quarters following admission to the program. The student must complete at least 30 credits in the field of biology. No more than 9 credits may be in Bi 503 Thesis. No more than a total of 12 credits may be in Bi 501 and Bi 505 Reading and Conference. No more than a total of 9 credits may be in Bi 507 Seminar. A maximum of 12 credits may be programmed as electives in fields related to biology in consultation with the degree adviser. Successful completion of a final oral examination and a thesis is required. Full-time students must complete their degree within 4 years of entry into the program.

BIOLOGY M.A.T./M.S.T.

The College of Liberal Arts and Sciences offers the M.A.T./M.S.T. degrees in Science/Biology. In consultation with the graduate adviser, the student should establish the degree program before the completion of 15 credits of coursework. The program must include a minimum of 45 credits in approved graduate courses, to include a minimum of 24 credits in the area of concentration. Students must complete Bi 598 Graduate Research Prospectus, and Bi 599 Graduate Grant Writing in the fall and winter quarters following admission to the program. At least 9 credits, but no more than 15 credits, must be in education courses and must include Ed 520 Introduction to Education and Society. The 45 credits required must include 6 credits in either Bi 501 Project Track: Research Project relating to biology teaching (i.e. curriculum module, grant proposal, community development project) as approved by student’s committee; or Bi 504 Practicum Track: 6 credits in practicum/ internship/community outreach experience as approved by student’s committee. In order to fulfill requirements for the degree, the student must satisfactorily complete the degree program and pass both a final written examination and a final oral examination.

BIOLOGY CONTINUING TEACHING LICENSE

The requirements for the continuing teaching license include satisfactory completion of 45 credits of upper-division and graduate work earned subsequent to receipt of a bachelor's degree. The 45 credits are in addition to those required for the initial teaching license. For the continuing endorsement in biology, the student must take at least 15 credits of adviser-approved graduate-level work distributed to strengthen the student’s background in science. Although no specific courses in science are required for the continuing endorsement, combined undergraduate and graduate preparation must include at least 36 credits in biology and must include specific courses. Each student’s program is tailored to meet the needs of the individual and the requirements of the continuing endorsement and the continuing license. See Licensure (p. 146) for the required education courses.
Prospective Ph.D. students are required to take Bi 698 Biology Ph.D. the program. Students must also complete 6 credits of Bi 607 Seminar, 27 credits of Bi 603 Dissertation, and 39 credits of coursework at the 500/600 level and above.

The student must also have taken a departmental comprehensive exam by the fifth quarter after entering the program, followed the next quarter by a formal defense of their Ph.D. prospectus. Successful completion of the degree is contingent on the completion of original research, and presentation of results in a public oral defense and production of a formal dissertation that is submitted to and approved by the student’s research committee and the Graduate School. Students must complete their degree within seven years of entry into the program.

### Black Studies

150 Parkmill (PKM)
503-725-3472
www.pdx.edu/blackstudies
- B.A., B.S. in Black Studies
- Minor in Black Studies
- Post Baccalaureate Certificate in Black Studies

The Department of Black Studies is an academic interdisciplinary unit within the College of Liberal Arts and Sciences. It is one of four units in the School of Gender, Race, and Nations. The Department of Black Studies is devoted to the exploration and analysis of all aspects of African people and people of African descent in the United States, the Caribbean/Latin America, and Europe. It seeks to research and teach about the Black experience through the interdisciplinary contributions of its faculty by providing comprehensive learning programs aimed at greater understanding of the historical and contemporary experiences of people in Africa and African descended people across the Americas, the Caribbean and Europe.

The Department of Black Studies provides students who opt for the Black Studies major, minor, certificate, or as an addition to majors such as anthropology, English, sociology, community studies, history, etc., a variety of course offerings. These courses serve to expand students’ breadth of knowledge in related courses offered by the department or as a complement to those in other departments. Students gain an understanding of the complex relationships across and between race/racism, gender/sexism, sexuality/homophobia, class differences and inequalities. The Department of Black Studies attempts to incorporate in its understandings and analysis of Black Life cultural themes such as music, literature, and film; institutions like the family, religion, housing, employment, criminal injustice systemand health care; and the more general realms of culture and political economy into its curriculum and its courses.

The program provides students with a general historical background of the Black experience in Africa and the Western hemisphere, as well as locally. Students also examine contemporary inter- and intra-racial/ethnic dynamics and are encouraged to engage in study and/or civic engagement courses to support their interests in global and community studies. The Department of Black Studies prepares students to work with African, Black or African American communities and to apply for graduate studies in a variety of disciplinary and professional programs. It will also give students a crucial competitive advantage in obtaining careers in those areas and within communities that interact with African, African American, and Caribbean/Latin American cultures.

Students interested in any of the degree programs offered in the Department of Black Studies are strongly encouraged to enroll in BST 202: Introduction to Black Studies or any other 200-level course. Students should meet with the undergraduate advisor for assistance with course selection based on their interests. For students who plan to apply to graduate school, it is important that they meet with one of their professors, the undergraduate advisor, or the department chair during their junior year, in order to discuss options for courses to enhance their research skills, such as the practicum, reading and conference, or other experiential learning courses.

### DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for the Black Studies Department’s undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

### ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

### BLACK STUDIES B.A./B.S.

#### REQUIREMENTS

In addition to meeting the general University degree requirements for completing a B.A. or B.S., candidates enrolled in the Black Studies major must meet the 60-credit minimum. Courses taken under the undifferentiated grading option (pass/no pass) are not acceptable toward fulfilling the major requirements in the area of specialization. At least 30 of the total 60 credits required for the major or 45 of the total credits presented for
To earn a minor in Black Studies, a student must complete 28 credits (12 credits of which must be taken in residence at Portland State University). These courses must include eight credits in lower division (those listed below or other Black Studies lower-division courses approved by the department chair), 12 credits in upper division, and eight upper-division advisor-approved credits chosen from departments in the College of Liberal Arts and Sciences. Students interested in declaring a minor in Black Studies should see the department undergraduate advisor or the department chair for assistance with Black Studies course selection.

- BST 411: African American History Seminar (4 credits)
- BST 450: Topics in African/Caribbean History And Culture (4 credits)

**Subtotal: 60 credits**

**BLACK STUDIES POSTBACCALAUREATE CERTIFICATE**

**Requirements**

Conferral of a B.A. or B.S. degree is a prerequisite for a certificate in Black Studies. Candidates for the Black Studies certificate must complete 36 credits with 24 of these credits in courses in Black Studies. Twenty-four credits will be upper-division courses within an area of specialization constructed with the consent of the adviser. Students interested in declaring a postbaccalaureate certificate in Black Studies should see the department undergraduate advisor or the department chair for assistance with Black Studies course selection.

Courses taken under the undifferentiated grading option (pass/no pass) are not acceptable toward fulfilling certificate requirements.

**CENTER FOR BLACK STUDIES**

150 Parkmill (PKM)
503-725-3472

Established in 1969, the Center for Black Studies at Portland State University facilitates the study of the past and present experiences of black America. Among the goals of the center is to act as a forum between faculty members and students of different disciplines who share an interest in Black Studies; to collect and disseminate information which accurately reflects and helps improve the black experience; and to link the University and Black communities by maintaining an active role in community service.

The Center provides the University and the broader community with cultural activities and the stimulation of an exciting and enlightening intellectual atmosphere in the Portland community, contributing to greater understanding and cooperation between people of various racial and ethnic backgrounds. The Black Bag Speaker Series brings to the campus and the Portland community speakers of different disciplines and philosophies who have made notable contributions to society. The center promotes national and international activities in this area through the generation of grants, proposals, and programs that combine University staff, money, and expertise with resources from the government and the private sector.

**Chemistry**

262 Science Research & Teaching Center (SRTC)
Undergraduate programs

Chemistry is the study of the reactions of atoms and molecules, the stuff from which people and their physical environment are made. With a relatively small knowledge of atoms and molecules, it is possible to have a considerable understanding of many chemical phenomena we see and use. A comprehensive knowledge of chemistry is essential for the person who wishes to help solve the problems of today—problems of illness and disease, problems of wise use of our resources—and for the person who wants to do basic research in chemistry or who wants to work in the chemical industry.

The Department of Chemistry is committed to maintaining a teaching program of excellence at the undergraduate level as well as having a graduate program emphasizing cutting-edge research in the chemistry of the environment, novel materials and biological systems. Courses tailored for the student desiring only an introduction to the field are offered on a regular basis. A wide variety of other courses in the program are designed to offer fundamental training for students majoring in chemistry or for students in other science areas, such as biology or health-related occupations.

The curriculum, faculty, library, and facilities of the department are approved by the American Chemical Society. Graduating chemistry majors are eligible for certification to become members of the ACS after two years of professional experience.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Chemistry’s undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

CHEMISTRY B.A./B.S.

REQUIREMENTS

A student majoring in chemistry is required to take a minimum of 70 credits in the subject and will take courses in the core areas of general chemistry, analytical chemistry, organic chemistry, physical chemistry, inorganic chemistry, and biochemistry. For transfer students, a minimum of 20 credits in upper-division chemistry courses must be earned at PSU.

In addition to meeting the general University degree requirements, the major in chemistry must meet the following departmental requirements:

Option I: Chemistry

Bi 214  Principles of Biology Lab I 1
Bi 215  Principles of Biology Lab II 1
Bi 216  Principles of Biology Lab III 1

Ch 490 requires the Ch 334, Ch 335, Ch 336 Organic Chemistry sequence as a prerequisite.

All courses used to satisfy the departmental major requirements, whether taken in the department or elsewhere, including courses from supporting departments (e.g., mathematics, physics, and biology), must be graded C- or above, with a combined GPA of 2.25 or higher, except for those major course requirements offered only on a pass/no pass basis. If an unsatisfactory grade is received in an upper-division course offered in the Department of Chemistry, a student will be allowed to retake the course to improve their grade only once.

A student will be certified by the American Chemical Society, and is eligible to become a member of the society after graduation, if the student is following Option I, and if the student also completes Ch 411, Ch 490 (or Ch 350), and a lab course that includes at least 30 clock hours (including Ch 401 and Ch 406). Note that CH 411 and CH 490 can also be used to satisfy the Approved 400-level Chemistry elective requirement.

The Department of Chemistry has an approved thesis-based Honors Degree program. Interested students should consult the Chemistry website and meet with the departmental Honors adviser for details.

### CHEMISTRY MINOR

#### REQUIREMENTS

To earn a minor in chemistry a student must complete the courses outlined below; at least 10 credits of these must be taken in residence at PSU.

Subtotal: 52-60

Those majoring in general studies/science are advised to strengthen their preparation for teaching by taking additional chemistry and physics courses as their degree programs permit. Consult with the secondary education adviser for suitable courses. Chemistry teachers in many schools also teach physics, so it is recommended that additional physics courses be taken in preparation for eventually adding a physics endorsement to the license.

Courses should be taken for differentiated grades, except those offered only on a pass/no pass basis. A positive departmental recommendation for admission to the fifth-year teacher-education program will depend on at least a C- in all chemistry and physics courses, as well as a combined 2.25 GPA for these courses.

### Graduate programs

The Department of Chemistry offers graduate work leading to the following degrees: Master of Arts or Master of Science; Master of Arts in Teaching or Master of Science in Teaching (Science); Ph.D. in Chemistry.

The M.S. program is designed for the student who wishes to pursue a career as a professional chemist or a scientist in other allied disciplines. The program involves work in advanced courses with training in research techniques. An integral part of the program is the individual research project and thesis.

The M.A. program is designed for the student who wishes to obtain an advanced degree in chemistry, but for whom the time commitment of a traditional research degree (M.S.) is not feasible, this program involves advanced coursework and a literature project.

The M.A.T./M.S.T. is offered to provide scientific training for teachers in secondary schools. The program is composed of courses intended to increase the sophistication of the student in chemical principles and to acquaint the student with current techniques in teaching methods.

The program leading to the Ph.D. in Chemistry combines original research with advanced coursework in various disciplines of chemistry. Research foci in the department are biological chemistry, materials chemistry, and environmental chemistry. Students that complete the program are prepared to pursue careers in academic, industrial, or government research.

### ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See the Graduate Programs page (https://www.pdx.edu/chemistry/graduate-programs) on
the Department’s website for admissions requirements, program information, and application instructions.

CHEMISTRY M.A.

Designed for the student who wishes to obtain an advanced degree in chemistry, but for whom the time commitment of a traditional research degree is not feasible, this program involves advanced coursework and a literature project.

The candidate must complete a minimum of 45 credits in approved graduate courses. Of these, 36 credits must be chosen from substantive classes at the graduate level, excluding Chem 501, Chem 503, Chem 505, Chem 507 and Chem 605.

For the M.A., if the student has not successfully completed two academic years of a foreign language at the undergraduate level, the student must show competence by examination.

STUDENTS NEED TO COMPLETE (ON THEIR OWN TIMELINE):

- A total of 45 graduate-level credits (foreign language classes don't count for this requirement)
- 36 credits of substantive coursework (graduate level: 510+) - up to 8 credits of which may be "approved" graduate-level classes outside Chemistry (e.g. Physics, Biology, Systems Science)
- Department seminar (CH507) - offered each FWS term, enrollment required in all FWS terms in which the student is in the program.
- Complete a 10+ page written report - give to the Chair of the Graduate Admissions and Advising Committee (GAAC) before the ninth week of the term in which you expect to graduate (will be graded by Chemistry faculty: expect at least one round of revisions)
- A foreign language requirement - can test out or take classes

An example of an enumeration of credits is as follows:

- 9 grad-level classes at 4 credits each = 36 credits
- CH507 seminar (Fridays): 1 credit each FWS term enrolled, for 6 terms
- CH501 research: 1 credit
- CH505: graded literature paper: 2 credits

CHEMISTRY M.S.

The MS in Chemistry consists of a combination of coursework, research, and thesis (an experimental or theoretical research project resulting in an original contribution to chemical knowledge). Candidates must complete a minimum of 45 approved graduate courses.

All students undertake a series of entrance examinations at the beginning of the program. These exams cover five areas of chemistry: organic, inorganic, analytical, physical, and biochemistry and exams in any three areas must be passed by the end of the first three academic terms of residence.

24 credits of formal graduate instruction must be chosen from substantive classes at the graduate level (CH501-509 and CH601-609 may not be applied to this requirement). Included in the required 24 credits of coursework, all students must complete a one term Scientific Communication course.

Each candidate for the MS degree in chemistry must complete a research project culminating in the preparation and defense of a thesis. Further details of all requirements are outlined in the Department of Chemistry’s Graduate Student Handbook.

STUDENTS NEED TO COMPLETE (ON THEIR OWN TIMELINE):

- A minimum of 45 graduate-level credits
- 24 credits of substantive coursework (graduate level: 510/610+) - up to 8 credits of which may be "approved" graduate-level classes outside Chemistry (e.g. Physics, Biology, Systems Science)
- CH510: Scientific Communication (1st year) – included in the 24 credits of graduate coursework
- CH501: Research (research credits are normally accrued in every term that the student is in the program)
- 6-9 Credits of CH 503: Thesis

CHEMISTRY M.A.T./M.S.T.

The College of Liberal Arts and Sciences offers the M.A.T./M.S.T. degrees in Science/Chemistry. In consultation with the graduate adviser, the student should establish the degree program before the completion of 15 credits of coursework. The program must include a minimum of 45 credits in approved graduate courses, to include a minimum of 24 credits in the area of concentration. At least 9 credits, but no more than 15 credits, must be in education courses. In order to fulfill
requirements for the degree, the student must satisfactorily complete the degree program and pass both a final written examination and a final oral examination.

CHEMISTRY PH.D.

The PhD in Chemistry consists of a combination of coursework, research, and dissertation (an experimental or theoretical research project resulting in an original contribution to chemical knowledge). Candidates must complete a minimum of 81 approved graduate credits courses.

All students undertake a series of entrance examinations at the beginning of the program. These exams cover five areas of chemistry: organic, inorganic, analytical, physical, and biochemistry and exams in any three areas must be passed by the end of the first three academic terms of residence.

24 credits of formal graduate instruction must be chosen from substantive classes at the graduate level (CH 501–509 and CH 601–609 may not be applied to this requirement). Included in the required 24 credits of coursework, all students must complete a one term Scientific Communication course.

Each candidate for the Ph.D. degree in chemistry must complete the comprehensive examination, a prospectus examination and an original program of research. In addition candidates will present a research seminar to the department in their fourth year in residence. The culminating experience of the PhD is the preparation and defense of a dissertation. Further details of all requirements are outlined in the Department of Chemistry’s Graduate Student Handbook.

STUDENTS NEED TO COMPLETE (ON THEIR OWN TIMELINE):

- A minimum of 81 graduate-level credits
- 24 credits of substantive coursework (graduate level: 510/610+) - up to 8 credits of which may be "approved" graduate-level classes outside Chemistry (e.g. Physics, Biology, System Science)
- CH 610: Scientific Communication (1st year) – included in the 24 credits of graduate coursework
- CH 601: Research (research credits are normally accrued in every term that the student is in the program)
- CH 507: Seminar Presentation (4th year)
- 27 credits of CH 603: Dissertation

Chicano/Latino Studies

150 Parkmill (PKM)
503-725-8499
www.pdx.edu/chicano-latino-studies/

- Minor in Chicano/Latino Studies
- Certificate in Chicano/Latino Studies

Chicano/Latino studies is the interdisciplinary study of social, cultural, political, economic, and historical forces that have shaped the development of the people of Mexico and other Latin American countries in the United States over the past 300 years. Emphasis is on the experience of the Chicano and other Latinos as residents and citizens in the United States and not in their countries of origin or descent.

The Chicano/Latino experience predates from the mid-19th century when territories belonging to Mexico were occupied by the United States. Latinos living in the United States have, over the years, developed a rich and extensive literature. They have been involved in all aspects of American life and have made major contributions in all areas of society.

Graduates with a minor or certificate in Chicano/Latino studies will have augmented their major field of study by broadening their scope of knowledge. They will have gained important insight into a very different culture within U.S. borders. This increased awareness and insight will lead to successful interaction on many levels of society. Graduates also will be better prepared to enter the workforce with its rapidly changing demographics.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Chicano/Latino Studies’ undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the program is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

CHICANO/LATINO STUDIES MINOR

REQUIREMENTS

In addition to meeting the general PSU requirements for a degree in any field, students pursuing a minor in Chicano/Latino studies must complete 28 credits to be distributed as follows:
Core courses (16 credits)

- ChLa 201 Introduction to Chicano/Latino Studies 4
- ChLa 301U Chicano/Latino Communities 4
- ChLa 302U Survey of Chicano/Latino Literature 4
- ChLa 303U Chicana/Latina Experience 4

Upper Division Electives (12 credits)

- One 400-level course and two others from the following:
  - ChLa 325/Hst 325 Mexican American/Chicano History I, 1492-1900 4
  - ChLa 326U/Hst 326U Mexican American/Chicano History II, 1900-Present 4
  - ChLa 330U Latino Popular Culture 4
  - ChLa 331U Barrio Culture: Art and Literature 4
  - ChLa 335 Chicano/Latin American Film 4
  - ChLa 340 Mayas, Aztecs, and Chicanos 4
  - ChLa 360 Bilingualism in U.S. Latinx Communities 4
  - ChLa 375U Southwestern Borderlands 4
  - ChLa 380U Latinos in the Economy and Politics 4
  - ChLa 390U Latinos in the Pacific Northwest 4
  - ChLa 399 Special Studies 1-8
  - ChLa 405 Reading and Conference 1-8
  - ChLa 407 Seminar 1-8
  - ChLa 408 Workshop 1-8
  - ChLa 410 Selected Topics 1-8
  - ChLa 411 Chicano/Latino History Seminar 4
  - ChLa 414 Chicano/Latino Literature 4
  - ChLa 450U Latinos in Education 4

Subtotal: 28

CHICANO/LATINO STUDIES CERTIFICATE

REQUIREMENTS

A candidate for a certificate must satisfy all University requirements for a baccalaureate degree with an academic major in any field. A Chicano/Latino Studies Certificate may be pursued as a post-baccalaureate program. A student pursuing a certificate in Chicano/Latino Studies must complete 36 credits, distributed as follows:

Core courses (16 credits)

- ChLa 201 Introduction to Chicano/Latino Studies 4
- ChLa 301U Chicano/Latino Communities 4
- ChLa 302U Survey of Chicano/Latino Literature 4
- ChLa 303U Chicana/Latina Experience 4

Spanish Language Proficiency (8 credits)

- Span 301 Third-year Spanish 4
- Span 302 Third-year Spanish 4

Upper Division electives from the following: (12 credits)

One 400-level course and two others from the following:

- ChLa Mexican American/Chicano 4
- ChLa 325/Hst 325 History I, 1492-1900 4
- ChLa Mexican American/Chicano 4
- ChLa 326U/Hst 326U History II, 1900-Present 4
- ChLa 330U Latino Popular Culture 4
- ChLa 331U Barrio Culture: Art and Literature 4
- ChLa 335 Chicano/Latin American Film 4
- ChLa 340 Mayas, Aztecs, and Chicanos 4
- ChLa 360 Bilingualism in U.S. Latinx Communities 4
- ChLa 375U Southwestern Borderlands 4
- ChLa 380U Latinos in the Economy and Politics 4
- ChLa 390U Latinos in the Pacific Northwest 4
- ChLa 399 Special Studies 8
- ChLa 405 Reading and Conference 4
- ChLa 407 Seminar 4
- ChLa 408 Workshop 4
- ChLa 410 Selected Studies 8
- ChLa 411 Chicano/Latino History Seminar 4
- ChLa 414 Chicano/Latino Literature 4
- ChLa 450U Latinos in Education 4

Subtotal: 36

Communication

University Center Building (UCB)
520 SW Harrison St., Suite 440
503-725-5384
www.pdx.edu/communication/

- B.A., B.S.
- Minor
- Honors
- M.S.

Undergraduate programs

The Department of Communication offers programs leading to degrees at both the undergraduate and graduate levels.

The courses offered in communication are based on the premise that an educated individual must be able to think critically and analytically, comprehend political, social, cultural, institutional, international, and mediated communication, listen effectively, and be sensitive and adaptive to communicative encounters with persons of diverse abilities, backgrounds, and situations. The effective communicator has an understanding of the complexity and
dynamic nature of the communication process, as well as a sense of responsibility for the substance and consequences of communicative interaction.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Communication’s undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

COMMUNICATION B.A./B.S.

All classes in the major or minor must be taken for a letter grade and only classes graded C or better will be counted toward the major or minor. Courses taken under the undifferentiated grading system (pass/no pass) will not be counted.

REQUIREMENTS

In addition to meeting the general University requirements, the student must complete a minimum of 60 credits in communication courses plus Wr 222 or Wr 323 for a total of 64 credits.

</table>

Of the 44 credits of communication electives,

- At least 32 must be in upper-division (numbered 300 and above) communication studies courses, of which
- At least 16 must be in course numbered 400 and above, of which
- At least 12 must be in courses numbered 410 and above.
- No more than 8 credits may be counted toward the major from courses numbered Comm 401 through Comm 409, including Communication Internship.

Total Credit Hours: 64

COMMUNICATION MINOR

To earn a minor in communication, a student must complete 28 credits with a minimum of 16 credits at the upper-division level. Total for Comm 401 through Comm 409 may not exceed 8 credits. A minimum of 12 credits must be taken in residence at PSU.

FILM STUDIES MINOR

Students may elect to pursue a minor in film studies, jointly offered by Communication, English, and Theater Arts and should consult the department for a complete list of courses that apply to the minor from offerings in Communication, English, and Theater Arts. A minimum of 20 advisor-approved credits in film studies is required. At least 16 of these credits must be taken at Portland State University from any of the three participating departments, and 16 credits must be upper-division.

Courses taken under the undifferentiated grading system (pass/no pass) will not be counted. A minimum grade of C is required for courses to be counted toward the minor. Advisor-approved film courses taken in communication will also be credited toward the major.

COMMUNICATIONS 4 + 1 ACCELERATED BACHELORS PLUS MASTERS PROGRAM

Students currently enrolled in the BA or BS in Communication program may be admitted directly into the MS in Communication program and share up to 16 credits of graduate level credit with the BA/BS and MS in Communication. Students can complete both degrees in 4 + 1 years.

Students can apply for the Bachelors plus Masters in spring of their junior year to be eligible to take 500-level courses in their senior year. The Bachelors plus Masters program must begin in fall of their final year as an undergraduate with enrollment in Comm 521. For more information on applications or the Bachelors plus Masters program, email commgradinfo@pdx.edu.

Graduate program

The Department of Communication offers graduate work leading to the Master of Science in Communication. We offer two tracks for master’s students. The Research Track is designed for students who want to focus on communication research in their careers and for those interested in doctoral studies. The Professional Track is designed for students who prefer to focus on applying their
studies to their careers in communication. We especially encourage mid-career professionals to apply for this track. Students decide at the time they apply which track is most suitable for them. Our faculty concentrate on research in the areas of media, politics, health, conversation, persuasion, propaganda, and language and social interaction.

ADMISSION REQUIREMENTS

Application reviews begin February 1 and end on May 31 each year. Early applications are strongly encouraged to secure placement and assistantships.

Applicants must also apply separately to Portland State University (see The Graduate School's website (p. 41) for information and deadlines).

For admission to graduate study, the student's background and preparation should reflect an ability to pursue graduate work in communication. Students with undergraduate backgrounds in communication or a related discipline are encouraged to apply. Should the student's preparation be deemed inadequate in certain areas, the student will be required to overcome those deficiencies through formal coursework and/or directed readings. All such work is separate from work toward the master's degree.

Application process

Prospective students interested in graduate work should first check the Department website for current application and program information. Applicants should submit: Letter of application and statement of purpose (these may be combined into one document); Writing sample; Three letters of recommendation; Official transcripts; Official GRE scores (GREs are required for Research Track students and students who receive assistantships. Other students are encouraged—but not required—to provide GRE scores); Official TOEFL/IELTS scores (for international and English second-language students); and the PSU application and fee (send separately). Decisions about admission, fellowships and assistantships will be made on a first-come, first-serve basis. All applicants are notified in late April.

All students are admitted to the program conditionally. Faculty evaluate your progress after one-third of the coursework is completed. Students in good standing will have their conditional status removed.

Good standing is defined in graduate studies as a B (and higher) Grade Point Average (GPA). Students who stop taking courses need the approval of the Department Chair or Director of Graduate Studies to take a leave of absence, even for one quarter (except Summer). Students are required to be enrolled for at least 1 credit each term until they have completed all work, including thesis, project or exams. Students who receive an incomplete grade in a course must finish outstanding coursework and earn a grade by the end of the following term/quarter. Students who have two outstanding incomplete grades are required to complete their coursework in good standing and earn grades before enrolling in additional courses. Note that students who receive a stipend, fellowship or assistantship must resolve incomplete grades immediately.

COMMUNICATION M.S.

All students must meet both University and Department requirements to successfully complete the graduate program in communication. Successful students earn a Master's of Science degree with a major in Communication.

All students must complete a total of 46 graduate credits, of which 40 are taken in coursework, plus an additional 6 credits toward the student’s Thesis or Project (exam). Every student completes the three core courses (12 credits) in addition to elective courses (28 credits). All students complete 6 credits toward their culminating thesis or project. Research Track students complete a thesis. Professional Track students may complete either a thesis or the project (exam) with the approval of the graduate faculty.

Communication graduate students are expected to develop an understanding and appreciation of the theoretical, conceptual and methodological breadth of the discipline and to develop expertise in the pursuit of particular interests in the study of communication.

REQUIREMENTS

Each student's program must be based on the following:

Core theory courses:

Each student is required to take one core theory course:
- Comm 511 Introduction to Communication Theory

Core methods courses:

Each student is required to take two core methods courses as follows:
- Comm 521 Quantitative Methods in Communication Research
- Comm 531 Qualitative Methods in Communication Research

Total required core course credits: Subtotal: 12

Minimum elective course credits: Subtotal: 28

Minimum Thesis or Project credits: Subtotal: 6
Students are encouraged to choose electives from within the Department, and courses taken outside the Department must be approved by the student's program advisor in order to count toward the requirements of the degree.

Every student is encouraged to take one credit of Comm 507 (Communication Research Apprenticeship) per quarter (a maximum of 6 credits may be counted toward the requirements of the degree). Comm 507 involves working closely with a faculty member in order to gain hands-on experience in how to conduct communication research.

All students need at least 40 credits in graduate coursework, including the core requirements, electives and apprenticeship courses. In addition, all students need at least 6 credits of Thesis or Project, bringing the total number of credits to 46.

Subtotal: 46

PROGRAM OPTIONS

All students complete one of the following with close supervision of their advisor. We strongly encourage students to pursue the thesis option.

a. Thesis

The thesis entails a systematic study of a significant problem and contributes to the body of knowledge relevant to the study. A thesis is a research report completed in close consultation with the student's academic advisor and may be either quantitative or qualitative. Each student who elects the thesis option will complete a written thesis and pass a final oral examination. Prior to beginning work on the thesis, students must demonstrate proficiency in relevant theories and research methods. Students must complete at least 6 thesis credits (Comm 503).

b. Project

Students who choose the Project Option work closely with their faculty advisor on planning a course of study grounded in relevant theories, concepts and practices. All students who choose this option must demonstrate appropriate research and methodological competency by successfully completing 3 exams as the culminating project. Students must complete at least 6 project credits (Comm 506).

Conflict Resolution

Smith Memorial Student Union (SMSU)
Suite M310
503-725-9175
www.pdx.edu/conflict-resolution

- B.A., B.S. Minor.
- Undergraduate Certificate in Transformative Messaging
- M.A., M.S.

- Graduate Certificate in Conflict Resolution (GCCR-CR)
- Graduate Certificate in Applied Conflict Resolution (GCCR-GCAP)

The Bachelors of Arts/Sciences, the Minor and Master of Arts/Sciences degree programs in conflict resolution are trans-disciplinary, encompassing the practical and theoretical bases of mediation and negotiation, involving research, theory, and competency-based education to help build conditions necessary for positive peace, conflict transformation (from destructive to constructive), and universal respect for context-sensitive human rights.

Students in the conflict resolution programs learn how to analyze conflict, uncover the underpinnings of conflicts in a wide variety of settings and scales. Students gain skills to defuse and deescalate destructive conflicts that arise among individuals, groups, and countries. Bachelor's degree holders are suited to entry-level careers in the field of conflict resolution, as well as being prepared to add value in any community setting, occupational field or workplace by bringing conflict transformation strategies to bear. Master's degree holders are prepared for leadership positions in conflict management and intervention via governmental, non-governmental, and corporate actors in local, regional, national and international settings. Minor degree holders add a conflict resolution component to their credentials while majoring in any field of study.

Both the graduate and undergraduate programs provide skill development through an integration of theory, method, and practice. Undergraduates acquire these skills commensurate with those required for working in peace and conflict settings, as well as those that add value to any community and occupational category. They go on to focus on transformation of conflict for the achievement of peace and social justice at the small group and community level. Graduate students emphasize implications of skill development for leadership in conflict and peace intervention, and go on to focus on perspectives, strategies and processes at the organizational level of peace building and conflict transformation.

Courses in conflict resolution are also offered in support of programs in other fields.

Undergraduate programs

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Conflict Resolution's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS
Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

## CONFLICT RESOLUTION B.A./B.S.

The Conflict Resolution BA/BS major is a 56-credit combination of 20 credits of required classes and 36 credits of CR electives. Eight (8) credits must be taken at the 400-level. The learning outcomes prepare the CR major degree holder equally for graduate school and employment in a CR-related field.

### REQUIREMENTS

#### Required courses

All required classes must be graded A-F and students must earn a minimum of a C grade for it to apply toward a CR degree.

## TRANSFORMATIVE MESSAGING CERTIFICATE

The certificate in Transformative Messaging foregrounds communication skills in multiple social change contexts. The learning in this certificate can augment the work of conflict managers, activists, communication specialists, or students pursuing academic fields that feature the many intersectional and transdisciplinary domains of human communication. The certificate provides theoretical grounding and practical training to navigate this critical area of social and political life.

Total Credit Hours: 16

### ADMISSION REQUIREMENTS

For admission to graduate study, the student’s background and preparation should reflect an ability to pursue graduate work in conflict resolution. It is not required that the applicant’s undergraduate degree be in any specific academic discipline. Because the program is broadly interdisciplinary, students with any undergraduate degree are encouraged to apply for admission. Should the student’s preparation be deemed inadequate in certain areas, the student will be required to overcome those deficiencies through formal coursework and/or directed readings. All such work is separate from work toward the master’s degree.

Each applicant to the conflict resolution graduate program must submit a statement of purpose explaining his or her reasons for pursuing an advanced degree, along with an academic writing sample of at least ten pages in length. Additionally, each applicant must submit three letters of recommendation from individuals closely acquainted with the applicant’s academic career and, where applicable, with the applicant’s professional background and competencies.

All students are admitted to the program on conditional status. Regular status and retention in the graduate program requires the satisfactory completion of 12 graduate credits with a minimum grade of 3.00 in each course and evidence of satisfactory progress toward the degree.

Students entering this program are expected to develop an understanding and appreciation of the theoretical, conceptual, and methodological breadth of the field and to develop expertise in the pursuit of their own particular interests in the study of conflict resolution. In conjunction with the student’s adviser, each student will design a program based upon particular interests within the field of conflict resolution.

### GRADUATE CERTIFICATE IN HOLOCAUST AND GENOCIDE/ATROCITY PREVENTION

The Graduate Certificate in Holocaust and Genocide/Atrocity Prevention (H-GAP) will teach students about historic and current genocides and atrocities, and build foundational knowledge of best practices for identifying threats of atrocities and for implementing strategies to prevent future atrocities. Building upon historic examples of the Holocaust and other atrocities that have shaped the language and scope of the field, students will explore emerging scholarship about how identity issues, climate change, political trends and migration patterns impact the risks of genocide and mass atrocities; and about how to maximize the role of civil society actors, local governments, and international bodies in effective prevention efforts.

All students will complete a program of study to the H-GAP Coordinator. Other variable and special topic courses that incorporate more than one dimension of Genocide and Atrocity Prevention can be submitted for approval by the H-GAP Coordinator.

### REQUIRED COURSES

<table>

**Total Credit Hours: 20**  
All courses must be taken at the graduate level. Courses taken under the undifferentiated grading option (pass/no pass) are not acceptable toward fulfilling certificate requirements.

**CONFLICT RESOLUTION GRADUATE CERTIFICATE**

The graduate certificate in Conflict Resolution offers a mature foundation for any student seeking techniques for engaging and transforming disputes in organizational and community life. The required twenty credits will typically be completed in three terms of study.

**CONFLICT RESOLUTION M.A./M.S.**

Students in this program will study the theoretical, conceptual, and methodological dimensions of conflict resolution. In order to fulfill the MA/MS requirements, each student will design and complete a thesis or project reflective of their interests in the field.

</tbody>
</table>

**ELECTIVES**

12 credits of 500-level Conflict Resolution courses.

**PROJECT OPTION**

In the project option, the MA/MS culminates in project that follows from a program planned in consultation with the student’s adviser. Guidelines for the project proposal are available from the program office. Once approved by the adviser and committee, a signed copy of the proposal is filed with the program office. Projects typically involve a synthesis of learning and practice in service to a community need for a conflict resolution application. Upon completion of the project and write up, the student will present it in an oral examination before a committee comprising the project adviser, a second reader from among program or PSU faculty and, optionally, a third reader. Projects in their final form are filed in the program office. Students must complete 8 credits of CR 506 for the project option.

**THESIS OPTION**

In the thesis option, the MA/MS culminates in the preparation and defense of a thesis based upon original research that follows from a program planned in consultation with the student’s adviser. Guidelines for the thesis proposal are available from the program. Once accepted and approved by the adviser and thesis committee, a signed copy of the proposal is filed with the program office. Upon completion of the thesis, each student must defend it in an oral examination before a thesis committee. Thesis committees typically consist of three faculty members from PSU, with no more than one member from outside of the CR faculty. After a successful defense and in accordance with PSU’s Procedures for the
Master’s Degree, the thesis in its final form is filed with the Graduate School.

Students must complete 8 credits of CR 503 for the thesis option.

**Total Credit Hours: 54**

Up to 8 credits from outside Conflict Resolution may be counted towards fulfilling degree requirements with approval of adviser.

## Undergraduate programs

The study of English has long been considered one of the best ways to obtain a liberal education. Courses are designed to develop students’ critical capabilities, to deepen their understanding of diverse cultural issues, and to improve their abilities to analyze and produce complex texts. The department prepares its majors for careers in writing and teaching, as well as for a variety of professions in which high levels of literacy and critical thought are required. Indeed, the breadth of knowledge and the communication skills that English majors typically acquire make them attractive to many potential employers and prepare them for graduate work leading to professions in fields such as law, public policy, administration, and business. For those who wish to teach, the English Department prepares majors for graduate work leading to teaching certification or for entry into graduate master’s or doctoral programs in English.

## DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for English's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

### ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

### ENGLISH B.A./B.S.

#### REQUIREMENTS

In addition to meeting the general University degree requirements, the English major must meet the following departmental requirements:

**I. Critical Approaches and Methods: (8 credits)**

These courses reinforce foundational training in close reading, formal and rhetorical analysis, evidence-based argument construction, and research methods that are indispensable for higher-level work in English.

Students must take both Eng 300 and Wr 301.

<table>

Subtotal: 4

IV. Electives: (40 credits)

These courses provide students with the opportunity to pursue their own interests and design a purposeful course of study.

Take ten Eng or Wr courses. At least seven courses (28 credits) must be at the 300 or 400 level. Three ENG courses (12 credits) may be at the 200-level; 200-level WR courses do not apply to the English major. Please read the “Notes and restrictions” section below for more information.

Subtotal: 40

Total Credit Hours: 60

Notes and restrictions

- Eng 300 Literary Form and Analysis is a prerequisite for 400-level courses in the English major.
- Wr 301 is expected preparation for 400-level courses in the English major but may be taken at the same time as 400-level courses.
- Students must take at least 3 courses (12 credits) at the 400 level. Eng 404, Wr 404, and Wr 411 Internship credits may not be used to fulfill this requirement.
- Only courses taken under the differentiated grading option (i.e., a letter grade instead of pass/no pass) can be used to fulfill the requirements of the English major and the minimum grade required is C.

- A minimum of 28 credits in English and/or Writing must be taken at PSU to graduate from PSU with a major in English.
- In the case of topics courses that may be taken more than once, no more than 8 credits of the same course number will count toward the English major.
- One upper-division literature course (4 credits) in the Department of World Languages and Literatures may be used as an elective in the English major with adviser approval.
- Ling 390 Introduction to Linguistics may be used as an elective in the English major.
- Wr 200, Wr 210, Wr 211, Wr 222, and Wr 323 will not count toward the English major.
- No more than 8 credits total from the following may be applied to the English major: Eng 401, Eng 402, Eng 404, Eng 405, Eng 408, Eng 409 and Wr 404, and Wr 405.
- No more than 12 credits taken for the minor in Writing may be applied to the English major.
- No more than 8 credits taken for the minor in Film Studies may be applied to the English major.
- Chiron Studies courses will not count toward the English major or the minors in English, Writing, and Film Studies.

CREATIVE WRITING B.F.A.

ADMISSION REQUIREMENTS

Admission to the degree program is based on (a) general admission to the university (see University Admissions (p. 8) for more information) and (b) admission to the Creative Writing program, which includes submission of a Statement of Purpose and a writing sample (10-15 pages of poetry or 15-25 pages of prose).

REQUIREMENTS

In addition to meeting university B.A. degree requirements, the Creative Writing major must meet the following requirements for the B.F.A. degree: Literature Courses, Writing Courses, Fine Art Electives, English Electives, Writing Electives, and a Graduation Requirement (Senior Portfolio).

Fine Art Electives (8 credits)

Two courses in arts appreciation, theory, or performance (8 credits).

This requirement is fulfilled through courses in the College of the Arts prefixed Arch, ArH, Art, D, FILM, Mus, and TA.
English Electives (12 credits)

12 upper division Eng credits (With adviser approval, one upper-division WLL literature course may be applied to this requirement.)

Required Literature Courses

Historical Literacy (8 credits)

These courses provide students with the opportunity to explore different historical periods, regions, and genres, thus enabling them to find connections between multiple topics and cultural moments.

Take two courses from the following list.

- Eng 301U  Topics in Shakespearean Genre   4
- Eng 320U  The English Novel I   4
- Eng 340U  Medieval Literature   4
- Eng 341U  Renaissance Literature   4
- Eng 342U  Eighteenth Century Literature   4
- Eng 343U  Romanticism   4
- Eng 351U/BSt   African American Literature I   4
- Eng 360U  American Literature and Culture I   4
- Eng 416  History of Rhetoric   4
- Eng 426  Advanced Topics in Medieval Literature   4
- Eng 441  Advanced Topics in Renaissance Literature   4
- Eng 450  Advanced Topics in Eighteenth-Century Literature   4
- Eng 458  Advanced Topics in Romanticism   4
- Eng 460  Advanced Topics in American Literature to 1800   4
- Eng 491  History of Literary Criticism and Theory I   4

Culture, Difference, and Representation (4 credits)

These courses explore the politics of representation in the contexts of identity and subject formation, cultural encounter and domination, and canon formation and contestation.

Take one course from the following list.

- Eng 326  Literature, Community, and Difference   4
- Eng 327  Culture, Imperialism, and Globalization   4
- Eng 428  Canons and Canonicity   4

Writing Electives (32 credits)

16 credits in the genre of portfolio (fiction, nonfiction, or poetry), at least 8 of which must be at the 400-level:

- Wr 312  Intermediate Fiction Writing   4
- Wr 313  Intermediate Poetry Writing   4
- Wr 328  Media Editing   4
- Wr 399  Special Studies   1-5
- Wr 407  Writing Seminar   1-6
- Wr 412  Advanced Fiction Writing   4
- Wr 413  Advanced Poetry Writing   4
- Wr 428  Advanced Media Writing   4
- Wr 456  Forms of Nonfiction   4
- Wr 457  Personal Essay Writing   4
- Wr 458  Magazine Writing   4
- Wr 459  Memoir Writing   4

16 credits of additional upper-division WR courses, 8 of which must be 400-level.

Note: Wr 312, Wr 313, Wr 407, Wr 412, and Wr 413 may be repeated for credit.

Graduation Requirement: The Senior Portfolio

The Senior Portfolio is submitted for approval by the end of the third week of the term in which a student intends to graduate. For summer graduates, note that portfolios must be turned in by the end of the third week of spring term. Portfolios will not be accepted over the summer.

The Portfolio showcases the clean revised copy of the student's creative writing in a chosen genre (i.e., fiction, nonfiction, or poetry) and should contain: (a) An introductory statement of artistic intent (6-10 pages), which provides an overview and analysis of the development and revision of their portfolio work; and (b) Writing within a genre: 30-50 pages (fiction or nonfiction), or 20-30 pages (poetry). Email the portfolio and introductory statement in a DOC format to grdstudy@pdx.edu; it will be forwarded to a departmental committee for review.

The Portfolio consists of a Title Page, a Table of Contents, a Statement of Artistic Intent, and your Writing. All pages must be proofread and properly formatted with 1-inch margins, and double-spaced in a readable standard 12-point font. (There are no spacing instructions for poems.) All pages except the Title Page should be numbered.

- Title page must include name, date, student ID #, email address, BFA genre (fiction, nonfiction, poetry), and identify itself as the BFA in Creative Writing Portfolio. Students may additionally title or subtitle the collection if desired.
- Table of Contents must include page numbers, and titles for each piece in your Writing section. Statement of Artistic Intent will address a set of
prompts available from the Program Coordinator and Undergraduate Advisor.

- Writing section may consist of a single or multiple works within BFA genre; they may be thematically connected, but this is not required. Pieces written within courses may be used, and this is indeed encouraged, but they must be clean revised copies. Each piece within the Writing section should be numbered and titled.

- Work will not be judged by its subgenre or subject matter perse, or on its experimental or conventional nature; however, students are expected to carefully analyze and contextualize their artistry in the Statement of Artistic Intent.

- The Statement and Writing will be expected to meet a high standard of aesthetic achievement and writing craft, and to observe University standards of academic honesty.

**Additional Information on Requirements**

- Creative Writing majors in upper-division English courses are expected to be able to write a research paper when required. The department recommends that majors without prior training in research paper writing enroll in Wr 222.

- Only courses in which a student receives a C or above can count for the Creative Writing major.

- Only courses taken for a letter grade can count toward the Creative Writing major.

- No more than 12 credits taken for the Minor in English may be applied to the Creative Writing major.

- A minimum of 24 credits in English and/or Writing at PSU is required to graduate from PSU with a major in Creative Writing.

**Total Credit Hours: 76**

### ENGLISH MINOR

**REQUIREMENTS**

To earn a minor in English a student must complete 28 adviser-approved credits (12 credits of which must be taken in residence at PSU).

- Twelve credits must be ENG courses.

- Sixteen credits must be at the upper-division level.

- No more than 8 credits total and no more than 4 credits in each of the following may be applied to the English minor: Eng 199, Eng 399, Eng 401, Eng 405, Eng 408, Eng 409, Wr 199, Wr 399, and/or Wr 405.

- With the exception of upper-division creative writing courses, any course used to satisfy departmental minor requirements must be taken under the differentiated grading option (i.e. a letter grade instead of pass/no pass) and must have been assigned a grade of C or above. Upper-division creative writing courses assigned a grade of pass may apply to the minor.

**Note:** The following courses will not count as part of the English minor: Wr 115 Introduction to College Writing, Wr 121 College Writing, Wr 211 Writing Practice, Wr 222 Writing Research Papers.

### WRITING MINOR

**REQUIREMENTS**

To earn a minor in writing, a student must complete 28 WR credits (12 credits of which must be taken in residence at PSU).

- Sixteen credits must be taken at the upper-division level.

- One WIC course may be applied to the minor requirements.

- No more than 8 credits total from the following may be applied to the Writing minor: Wr 399, Wr 404, Wr 405.

- No more than 8 credits total of courses taken with undifferentiated grading (i.e. Pass/No Pass) may be applied to the Writing minor.

- Any course used to satisfy the minor requirement must have been assigned a grade of Pass (undifferentiated grading) or a grade of C or higher (differentiated grading).

**Note:** The following courses will not count as part of the Writing minor: Wr 115 Introduction to College Writing, Wr 121 College Writing, Wr 199 Special Studies, Wr 210 Grammar Refresher, Wr 211 Writing Practice, Wr 222 Writing Research Papers, or Wr 323 Writing as Critical Inquiry.

### FILM STUDIES MINOR

**REQUIREMENTS**

The film studies minor is offered through the Departments of English, Communication, and Theater and Film. The minor requires 28 credit hours in appropriate coursework, including internships and adviser-approved courses at the Northwest Film Center (Note: NWFC operates on a semester system). Students may select from a number of courses listed in various departments throughout PSU. These include courses offered by the Departments of World Languages and Literatures, Art, History, Black Studies, Women, Gender, and Sexuality Studies, Sociology, and others.
28 adviser-approved credits must include:

- FILM 131 Film Analysis 4
- Eng 304 Critical Theory of Cinema 4
- 20 elective credits with at least 12 upper-division credits

Note: Electives may include additional theory or history classes, as well as classes in film production at the Northwest Film Center. All courses in the minor must be taken for a letter grade. Courses taken for fulfillment of the Minor in Film Studies may also be applied to University Studies requirements.

Certificates

COMICS STUDIES UNDERGRADUATE CERTIFICATE WITH BACCALAUREATE

Application Requirements for Comics Studies Certificate

In order to receive the certificate, students must:

1. be admitted as a PSU student.
2. meet academic standards—Students must have a cumulative GPA of 3.0 in the following categories:
   a. all undergraduate course work outside PSU (if applicable)
   b. all PSU graded credits.
      i. Students who do not meet these standards may apply with a statement explaining their background and academic plans and may be accepted on a probationary status.
3. complete the online application.

To continue in the program, students are required to be in good academic standing, requiring a cumulative 3.00 GPA for all coursework taken at PSU and a term GPA of at least 2.67 each term.

Application Process

Deadlines: Applications will be accepted on a rolling basis.

University Application: Complete the University application.

Departmental Application: Complete the application at www.pdx.edu/comics-studies/apply

The Comics Studies application requires:

- A statement of intent: A personal introduction that describes your interest in comics and comic art, your reasons for pursuing the Certificate in Comics Studies, and what most interests you about comics (creation, writing, editing, drawing, history, theory, critical scholarship, etc.).

- Copies of transcripts from previously-attended universities and/or colleges.

REQUIREMENTS

Core Requirement

- Eng 496 Comics Theory 4

Elective Options (Choose 5):

All courses counted towards the Comics Studies Certificate must be completed at Portland State; no transfer credits will be accepted.

Other courses (e.g., internships) may be substituted for electives at the direction of the Program Director.

Other courses in additional departments TBA.

- Art 297 Book Arts 4
- Art 2/399 Creating Short Comics: Practical Comic Creation 4
- Art 356 Visual Storytelling Techniques 4
- Art 370 Topics in Printmaking Culture 4
- Art 455 Time-Based Art Studio 4
- Eng 306U Topics in Literature and Popular Culture 4
- Eng 410 Special Topics in Comics Studies 4
- Eng 497 Comics History 4
- Jpn 343 Topics in Japanese Literature (In Translation) 4
- Phil 317U Philosophy of Art 4
- WLL 448U Major Figures in World Literature 4
- Wr 300 Topics in Composition 4
- Wr 398 Topics: Writing Comics 4
- Wr 400 Special Topics: Advanced Writing for Comics 4
- Wr 460 Introduction to Book Publishing 4
- Wr 462 Book Design Software 4

Subtotal: 20

Please note that Wr 398 may be repeated for credit.

Eng 410: Special Topics in Comics Studies, listed above as an elective option, may include courses such as:

- Editing Comics
- Focus on Frank Miller/Will Eisner
- European Comics
- Autobiographical Comics
- Superheroes and Society
- Censorship and the Comics Code

Completion Requirements

To be awarded the certificate, students must complete the core requirement and 5 elective courses (for 24 total
credits) with a grade of C or higher (or Pass) for each course.

SECONDARY EDUCATION ENDORSEMENT (GTEP)

For students who complete a major in English and wish to teach Language Arts in middle or high schools, PSU’s Graduate School of Education offers a M.Ed. with certification in Language Arts through their Graduate Teacher Education Program (GTEP). Applicants to the GTEP program in Language Arts must complete specific prerequisites in the content area with grades of B- or better. PSU English majors may do this as part of their major requirements: early consultation with the department’s Language Arts content area advisor can streamline this process and is strongly recommended for students interested in careers in secondary education.

Graduate Programs in English

ENGLISH M.A.

The Department of English offers graduate work leading to the Master of Arts degree, which is designed for students who are prepared to undertake advanced work in the field. The program provides a range of courses in literatures in English, including British, American, and Anglophone literature; composition and rhetorical theory; cultural studies; and literary history, theory, and critical methods. Students in the program go on to work in humanities-related fields from higher education and K-12 teaching to arts education and public relations; still others pursue the degree solely for their own interest and enrichment.

Admission Requirements

Application deadline January 15th.

- Applications received after this date may not be reviewed.
- Applicants will be asked to submit the following through the online application found at http://www.pdx.edu/english/graduate-admissions:
  - A minimum of two letters of academic recommendation
  - Statement of purpose of study
  - Two recent samples of written work to include an analytical essay
  - A complete set of transcripts
  - GRE (Graduate Record Exam) scores. Verbal and quantitative scores are required; the subject area exam is not required.

Applicants are expected to have extensive experience in literary studies, especially English language and literature. Applicants who do not already have a bachelor’s degree in English are expected to have taken 20-30 credit hours in literatures in English and writing, so that they come into the program with a knowledge of literary history, excellent writing skills, and experience doing advanced critical analysis in upper-division coursework. Applicants are also expected to have a minimum GPA of 3.25 in all English courses.

Those who do not meet these requirements may be considered for conditional admission. They will need to provide satisfactory evidence of preparedness to undertake advanced work. Their application will need to include:

- 3.25 GPA in four or five graduate English courses
- Explanation of undergraduate record and purpose of study
- Two samples of written work from recent English courses

Students whose native language is not English must score at least 600 on the TOEFL paper examination, at least 100 total on the internet-based exam, and at least 250 on the computer-based exam.

REQUIREMENTS

See University master’s degree requirements (p. 51). Department requirements are described in detail on the English Department website and in the MA in English Handbook, which is also available on the website.

For the M.A., the department requires a minimum of 32 graduate credits in English (courses prefixed with "Eng"), including Eng 500 Problems and Methods of Literary Study, Eng 507 Seminar, 4 credits of pre-1800 British or American literature, 4 credits in literature or rhetoric, whether Anglophone or in translation, before 1900, and 4 credits of critical theory. The remainder of the student’s program may, with the approval of the adviser, include coursework in fields related to English. A minimum of 45 graduate credits is required for the M.A. in English.

All students must take the oral field exam. Students interested in developing a specific research topic also have the option of writing an extended essay of approximately 8,000 words in addition to the oral field exam. This option requires the approval of the student’s advisor and the M.A. Director. Further details on the oral field exam and the optional extended essay are available from the department's Academic and Program Coordinator.

Graduate Programs in Writing

The Department of English offers graduate work leading to the M.F.A. in Creative Writing (Fiction, Nonfiction, and Poetry), the M.A. or M.S. in Book Publishing, and the M.A. or M.S. in Professional and Technical Writing.
CREATIVE WRITING M.F.A.

The M.F.A. degree offers an intensive program of writing in small, core workshops and seminars taught by established writers. In workshop, students engage in close readings and critiques of their peer’s work, while recent seminars have included Forms, Defamiliarization, Constraint-based Writing, Fragments, and Aspects of Translation.

Prospective students must apply to the strand in which they want to focus: fiction, nonfiction, or poetry. Seminars and Core workshops and eight credits of seminar are taken in the student’s primary strand, while electives allow students to explore other strands, as well as classes in the larger English Dept and outside of the department. The M.F.A. emphasizes faculty mentorship throughout each student's coursework and thesis completion. Engagement in Portland’s vibrant community of writers is also central to the development of our students’ work.

Many students come to the M.F.A. with a background in English literature, writing or journalism, but others have backgrounds in the social sciences, sciences, and fine arts. Our program is further distinguished for the diversity of its student body, including a range of ages and life experience, as well as for its flexibility. The program can be completed in two years of full-time coursework, but students have up to four years to complete the degree in order to accommodate those who choose to attend part-time or want to take additional courses.

Admission Requirements

Applicants to the M.F.A program must provide satisfactory evidence of preparedness to undertake advanced work, which would include a B.A., B.F.A., or B.S. degree from a regionally accredited college or university and a 3.25 GPA in undergraduate work. The application deadline is January 15. Applicants must submit the following:

Applicants must submit the following, using the online application process:

• A Departmental application form indicating the strand they will focus on: fiction, nonfiction, or poetry.

• Three letters of recommendation from individuals who can speak to your creative and intellectual work, and your ability to successfully undertake graduate work.

• A 500-700 word statement describing the applicant’s background as a writer, goals, and interest in this particular program.

• A transcript from every post-secondary institution you have attended. Unofficial transcripts or photocopies are acceptable for the Department application.

• A manuscript in the applicant’s primary strand. Manuscript forms are defined as having one inch margins, double-spaced text, a single, clear, 12-point typeface, no extra space between paragraphs, indented first line for each paragraph, information identifying the author and title of the manuscript on every page, and page numbers. Poetry manuscripts may be single-spaced; each poem should begin on a new page. Only single-authored work will be accepted. Manuscripts should demonstrate mastery of basic craft and literary promise, and should represent your best work regardless of whether or not it has been published. Writing samples can be comprised of one or multiple bodies of work equal the page requirements listed below.

  - In poetry: 12-15 pages
  - In fiction: 20-30 pages
  - In nonfiction: 20-30 pages of magazine articles or creative nonfiction

Writing Samples and optional additional material in the form of a CV or resume may be uploaded in one of the following supported file types: PDF, DOC, DOCX, RTF, or TXT.

Note: Graduate Record Examination (GRE) scores are not required for admission to the M.F.A. in Creative Writing program.

Subtotal: 48

Core Workshops (4 classes): WR 521, WR 522, and WR 523 are restricted to students admitted to the M.F.A. in the strand. Students will take the Workshop in their strand no fewer than four times and no more than six times, to earn a minimum of 16 credits. First-year students are required to take core workshops in their first two terms.

WR Seminars in Strand (2 classes): Seminars must focus on the student’s strand (i.e. fiction, nonfiction, or poetry) or be a cross-genre course which includes the student’s strand. Fiction seminars are all listed as WR 507: Fiction; poetry seminars are all listed as WR 507: Poetry, and nonfiction seminars include WR 507: Nonfiction. Other MFA seminars may be included by advisor approval.

Electives (4 classes): Graduate ENG and/or WR courses chosen from within the department. Of these, students are encouraged to take at least one WR 507 seminar outside of their genre. Up to 8 credits may be taken in LING 590, TA 574, or TA 575 or, with advisor approval, in graduate courses outside the department in an area related to the student’s thesis.

Wr 503 Thesis: (8 credit hours to be arranged)
M.F.A. students also complete a creative thesis of high literary merit, pass a written examination based on the thesis, and pass an oral examination based on the written examination and creative thesis.

BOOK PUBLISHING M.A./M.S.

The Department of English offers graduate work leading to the Master of Arts or Master of Science in Book Publishing. The 48-credit M.A./M.S. in Book Publishing is designed for students who are prepared to undertake advanced work in the field. Courses are taught in areas such as editing, design, online documentation, and information technology.

The program has rolling admissions which follow the University's admission deadlines as follows: April 1st for Fall admission; Sept. 1st for Winter; and Nov. 1st for Spring.

Please note that Graduate Assistantship applications can only be accepted from full term applicants, who must meet the April 1 deadline. Book Publishing also awards Graduate Assistantships in the second year of the program for one year only; the deadlines for application will be announced within the program annually, and receiving such an appointment is conditional on the appointee remaining for the entire coming school year.

Admission Requirements

Admission to graduate study is granted on the basis of evidence of suitable preparation and the probability of success in the intended field of study; strong writing skills are considered central. Applicants do not need to have a previous degree in English or Writing, but must hold a B.A. or B.S. degree from a regionally accredited college or university. Applicants must also submit the following:

- A letter of introduction.
- A complete set of transcripts. A transcript from each post-secondary institution you have attended is required. Unofficial transcripts or photocopies are acceptable. You will be asked to upload a transcript for each institution in one of the following supported file types: PDF, JPG, PNG, GIF, or TIF.
- A minimum of three letters of recommendation.
- A writing sample of fifteen to thirty pages of writing that demonstrates your potential as a publishing professional. Previously published work is welcome, and your sample can consist of multiple pieces, so long as they do not exceed the page limit. Your sample can be of a professional, academic, or artistic nature (or a mixture of the three). Indeed, a diversity of materials is often most effective at demonstrating your strengths as a prospective student for the graduate program in Book Publishing. If you have editing or design experience, samples of this work are welcome, but in these instances, please be sure to include a brief cover letter that details your role in these projects. With editing samples, it’s particularly important that we can actually see the editing you’ve done; one way to achieve this is to submit both pre- and post-editing versions, another is to submit a document with your copyediting marks handwritten on it, and yet another is to submit a document with track changes.

You will be asked to upload your writing samples and optional material such as a C.V. or resume in one of the following supported file types: PDF, DOC, DOCX, RTF, or TXT.

Note: Graduate Record Examination (GRE) scores are not required for admission.

Requirements

Students will complete 24 core credits (6 courses), 12 elective credits (3 courses) in writing, and 12 elective credits (3 courses) that may involve coursework in another discipline with Adviser’s approval. Of the 24 elective credits, candidates are expected to take a total of eight (8) credits working at Ooligan Press in either or both Wr 574 Publishing Studio or Wr 575 Publishing Lab.

The final project, in addition to completing the coursework, will be a portfolio of work demonstrating competence at a professional level, but with adviser approval, may be a single, substantive work. Upon completion and delivery of the final project or portfolio to the student's orals committee, a topic will be assigned by the student's adviser for a final paper of approximately 4000 words (excluding front matter and back matter).

The student will take an oral exam in defense of the final project and final paper. Work included in a portfolio will be representative of that done in each course, and appropriate to it, but may otherwise focus in greater detail on one or more areas of study. For instance, the portfolio may include samples of editorial work, query letters for fiction and nonfiction books, book marketing plans, book design proposals and finished designs, research and writing on issues in contemporary publishing. Other possibilities are negotiable with the assigned graduate adviser in Book Publishing.

Core Courses (24 credits)

Students choose 6 out of 7 available core courses to satisfy the 24-credit requirement.

Electives (24 credits)

24 credits from other writing courses, from literature courses, or from another discipline.

Students earn eight (8) of their elective credits by participating in the work of Ooligan Press, a small trade publishing house. Students work in groups to review, accept, and edit manuscripts; design the interior and the exterior of books; send books to press; and market the books to booksellers, libraries, and other outlets.

Note: the M.S. option does not require students to demonstrate proficiency in a language other than English. In cases where a student does opt to demonstrate proficiency in a language other than English, the M.A. in Writing: Book Publishing will be awarded.

Subtotal: 48

PROFESSIONAL AND TECHNICAL WRITING
M.A./M.S.

The Department of English offers graduate work leading to the Master of Arts in Writing and the Master of Science in Professional and Technical Writing. The 48-credit M.A./M.S. in Professional and Technical Writing is designed for students who are prepared to undertake advanced work in the field. The program is designed for those who wish to work in the professional writing industry.

The program has rolling admissions which follow the University's admission deadlines as follows: April 1st for Fall admission; Sept. 1st for Winter; and Nov. 1st for Spring.

Please note that Graduate Assistantship applications can only be accepted from fall term applicants, who must meet the April 1 deadline.

Admission Requirements

Admission to graduate study is granted on the basis of evidence of suitable preparation and the probability of success in the intended field of study; strong writing skills are considered central. Applicants do not need to have a previous degree in English or Writing, but must hold a B.A. or B.S. degree from a regionally accredited college or university. Applicants must also submit the following:

- A letter of introduction.
- A complete set of transcripts. A transcript from each post-secondary institution you have attended is required. Unofficial transcripts or photocopies are acceptable. You will be asked to upload a transcript for each institution in one of the following supported file types: PDF, JPG, PNG, GIF, or TIF.
- A minimum of three letters of recommendation.
- A writing sample of fifteen to thirty pages from customary genres, including (but not limited to) descriptions, specifications, computer documentation, proposals, memoranda, formal reports, newsletters, online documentation, or web pages. Writing samples should represent your best work and demonstrate mastery of basic craft and promise of success in technical/professional writing. Your writing sample can be comprised of one or multiple bodies of work equal to the page requirements listed above.

You will be asked to upload your writing samples and optional material such as a C.V. or resume in one of the following supported file types: PDF, DOC, DOCX, RTF, or TXT.

Note: Graduate Record Examination (GRE) scores are not required for admission.

Requirements

The department requires a minimum of 28 graduate credits in writing. The remainder of the student's program may, with the approval of the adviser, include coursework in fields related to writing. In every case, the student's program must be approved by the adviser.

Students will complete 16 core credits (4 courses), 20 technical writing elective credits (5 courses), and 12 credits (3 courses) of open electives that may involve coursework in another discipline.

Students will be required to submit a final project in addition to completing their coursework. This project will be either a portfolio of their work demonstrating competence at a professional level or a research-based thesis.

Note: the M.S. option does not require students to demonstrate proficiency in a language other than English. In cases where a student does opt to demonstrate proficiency in a language other than English, the M.A. in Professional and Technical Writing will be awarded.

Core Courses (16 Credits)

4 courses form the foundation of the curriculum. These 4 courses reflect the curriculum's balanced attention to critical academic inquiry and professionalization for work in industry, government or the non-profit sector. Core courses do not have to be taken sequentially, although students starting in the fall quarter are advised to enroll in WR 525 their first term.

</tbody>
</table>

Students are limited to a combination of 8 credits of Wr 501, Wr 502, Wr 505 and Wr 509, and a combination of 8 credits of Wr 504 and Wr 511.

Student may also do relevant graduate coursework outside of the department for open elective credit with approval from the Director of Professional and Technical Writing. Relevant courses are commonly offered in Communications, Applied Linguistics and The School of Business, although other units may also offer relevant courses.

**Students with a GTA teaching appointment are required to take the following courses:**

### Environmental Science and Management

218 Science Research and Teaching Center (SRTC)
503-725-4982
www.pdx.edu/environmental-science

- B.A., B.S. in Environmental Science
- B.A., B.S. in Environmental Studies
- Minor in Climate Change Science and Adaptation
- Minor in Environmental Science
- Minor in Sustainability
- Certificate in Lake and Reservoir Management
- M.S., M.E.M., P.S.M.
- Ph.D. via Earth, Environment and Society Doctoral Program
- Graduate Certificate in Hydrology

Environmental science and management is the study of the interactions among society and the physical, chemical, ecological, and biological processes that structure and maintain ecosystems. Our work is critical to understanding and developing sustainable ecosystems, human societies, and economies. Environmental Science and Management at PSU focuses on processes that link terrestrial, urban and aquatic ecosystems, consequences of human alteration of those linkages, and development of policies to manage human interaction with the environment. We conduct our research by studying organisms and specific linkages and processes across systems and by studying interactions between organisms, processes, and linkages in a specific ecosystem or watershed, such as the Columbia River Basin. The Department of Environmental Science and Management prepares students to develop the skills and interdisciplinary understanding to be scholars and managers of human interaction with, and impact on, environmental systems.

The Department of Environmental Science and Management cooperates with several departments and centers, including the departments of Anthropology, Biology, Chemistry, Civil Engineering, Economics, Geography, Geology, History, Mathematics, Physics, Political Science, Sociology; and the School of Business.
Administration and the College of Urban and Public Affairs.

Undergraduate programs

The Department of Environmental Science and Management offers two undergraduate degrees. The Environmental Science degree is focused on natural science, whereas the Environmental Studies degree is focused more on policy and management. The B.A./B.S. degrees in both Environmental Science and Environmental Studies rest on an interdisciplinary curriculum that develops understanding and expertise in environmental science by building on a foundation in mathematics, natural sciences, and economics complemented by related courses in environmental policy and management. Students should consult with their department adviser to assure proper course planning. Students can complete field experiences by working on projects in the University, metropolitan community, and region.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Environmental Science and Management's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See page Admissions Requirements (p. 8) for more information.

ENVIRONMENTAL SCIENCE B.A./B.S.

The Environmental Science degree is focused on natural science and is offered with two track options, a focus on the scientific and field study of the environment (Science track) or a focus on environmental management and policy (Management track).

In addition to satisfying general University requirements (45 credits), the Environmental Science and Management degree requires 74-87 core credits plus 30-31 credits in either the Science or Management track.

All courses used to satisfy the Environmental Science major requirements, whether taken in the department or in other departments, must be graded C- or above. Department requirements are listed below.

REQUIREMENTS

Students must complete the core requirements and either the Science Track or the Management Track.

CORE REQUIREMENTS

Students must complete the ESM, Biology, Chemistry, and GIS requirements.

**ENVIRONMENTAL STUDIES B.A./B.S. REQUIREMENTS**

Department of Environmental Science and Management and the Department of Geography are collaborating to offer a degree in Environmental Studies. The degree prepares the students for more sophisticated upper division courses at the interface between science and policy by requiring them to take some foundational courses in natural sciences, geography, and environmental policy.

A summary of the requirements are listed below:

- 28 credits in the Environmental Studies Core
- 24-26 credits in Foundation courses including the subjects of biology, chemistry, and geography
- 22 credits from list of "Skills" that includes quantitative analysis, visualization of spatial data, field methods, and communication
- 20 credits in Environmental Systems (12 credits) and Geography & Human Systems (8 credits)

There is a minimum of 94 credits required for this major.

Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling major requirements except for ESM 150 and ESM 407, which are only available as pass/no pass courses. Additional courses may be required as prerequisites. All courses used to satisfy the Environmental Studies major requirements, whether taken in the department or in other departments, must be graded C- or above.

<td>Environmental Communication</td>
<td>4</td>
</tr>
</tbody>
</table>

**Subtotal: 8 credits**

### Environmental and Human Systems (20)

Students must take at least 3 400-level courses in Environmental Systems and 2 400-level courses in Geography/Human Systems from an approved list of focus areas [http://www.pdx.edu/esm/environmental-studies](http://www.pdx.edu/esm/environmental-studies).

**Subtotal: 20 credits**

### Total Credit Hours: 94-96

**ENVIRONMENTAL SCIENCE/ENVIRONMENTAL STUDIES HONORS TRACK**

The Honors Track in Environmental Science or Environmental Studies will allow outstanding undergraduate students to obtain recognition for exceptional performance in coursework and research. Students will gain real life experience that will assist them when applying to graduate school and/or for a professional career position. Acceptance into the ESM Honors Track gives students an opportunity to work closely with a faculty mentor and the graduate students in his/her lab. In addition, participation in the Honor’s Track strengthens the student's resume and provides them access to professional networking contacts.

This program is designed for upper division ESM majors who wish to deepen their knowledge base in a particular area of interest. Under the guidance of an assigned faculty adviser, participants will identify a research project that will include readings, field or lab work, and a thesis. For additional information about the ESM Honors Track, please visit the department website.

**CLIMATE ADAPTATION AND MANAGEMENT CERTIFICATE**

The department is currently not accepting applications to this certificate.

Over the coming decades, governments and the private sector around the world will spend billions of dollars to support adaptation measures that seek to reduce climate-
related vulnerabilities for people and the ecosystems on which they depend. To contribute to climate risk management and adaptation at local to global levels, students will need to understand the fundamentals of adaptation planning, assessing climate impacts, evaluating risk and vulnerability, identifying adaptation strategies, as well as monitoring climate impacts. Students who complete the certificate will be prepared to take active roles in and contribute to climate adaptation.

This is a rigorous certificate that will require a total of 21 credits in 300- and 400-level courses. The courses are split between science and management/policy courses. Although the certificate could be earned by any student, they will have to have had many pre-requisites (or equivalent preparation) in ESM or Geography.

**CERTIFICATE REQUIREMENTS**

The certificate requires 21 credits of which 13 required credits are offered in ESM.

**Electives (choose 2)**

Subtotal: 21

**Total Credit Hours: 21**

**FOREST ECOLOGY AND MANAGEMENT CERTIFICATE**

The department is currently not accepting applications to this certificate.

Forest management requires a consideration of the ecological, social, and policy context of Oregon’s forests, including urban forests. This certificate is designed to provide the academic background required for understanding and managing forests beyond traditional industrial forestry needs. Students who complete the certificate will be prepared to take active roles in and contribute to management of Oregon’s forests.

This is a rigorous certificate that will require eight 400-level courses. The courses are split between forest ecology, watershed functioning, management, and policy areas. Although any student could earn the certificate, they will have to have had many pre-requisites (or equivalent preparation) in ESM or Geography.

**Total Credit Hours: 29**

**LAKE AND RESERVOIR MANAGEMENT CERTIFICATE**

PSU has a range of expertise in managing watersheds, lakes and reservoirs for ecological and water resources. PSU also has the Center for Lakes and Reservoirs that was established by the Oregon State legislature to address lake management and invasive species issues. Many of our faculty are active in the North American Lakes Management Society (NALMS) and the local chapters of the Oregon Lakes Association Washington State Lake Protection Association.

This is a rigorous certificate that will require eight 400-level courses. The courses are split between aquatic ecology, watershed processes, management, and policy areas. Although the certificate could be earned by any student, they will have to have had had many pre-requisites (or equivalent preparation) in ESM or Geography. Students who complete the certificate will be prepared to take active roles in and contribute to management of lakes and reservoirs. In addition, this certificate is designed to provide the academic background required by the NALMS Professional Lake Manager certification program.

**CERTIFICATE REQUIREMENTS**

The certificate requires 33 to 34 credits total and 22 of these credits must be in ESM. The student must complete courses in each of the following five areas.

**Aquatic Ecology (10 credits)**

**Required**

<table>
<thead>
<tr>

Students must take required courses for a differentiated grade and earn a C- or better for it to count toward the certificate.

**Subtotal: 33-34**

**Total Credit Hours: 33-34**

**CLIMATE CHANGE SCIENCE AND ADAPTATION MINOR**

The Climate Change Science and Adaptation Minor is a collaboration between the ESM and Geography departments. Full details regarding this undergraduate minor may be found on the Climate Change Science and Adaptation Minor (p. 258) page.

**ENVIRONMENTAL SCIENCE MINOR**

**REQUIREMENTS**

To obtain a minor in environmental science, a student must complete at least 34 credits as listed below (at least 12 of which must be taken in residence at PSU). At least 4 credits each in biological sciences, physical sciences (physics, chemistry, geology), economics, and Mth 241 or Mth 251 are expected before admission to the minor.

**Courses**

Upper-division environmental policy management courses 4
Upper-division environmental sciences courses 8

Subtotal: 34

Environmental policy/management courses (minimum 4 credits) include selected upper-division courses in environmental science and management, economics, and geography. Environmental science courses (minimum 8 credits) include selected upper-division courses in environmental science. A list of approved courses is available from the Environmental Science and Management office and the department website.

Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling minor requirements. Courses with omnibus numbers 401, 404, 405, 406, and 407 are not allowed for the minor. Additional courses may be required as prerequisites. Only grades of C- or above count toward satisfying the minor requirements.

SUSTAINABILITY MINOR

This minor requires a multidisciplinary study of the environmental, social, and economic dimensions of sustainability

REQUIREMENTS

To obtain a minor in sustainability a student must complete at least 30 credits (at least 15 of which must be taken in residence at PSU), to include the following:

**Courses**

<table>
<thead>
<tr>
<th>Course Code</th>

</table>
ESM 404  Cooperative Ed/Internship ESM 6
Sustainability Minor

(A list of acceptable capstone and internship courses will be prepared for each year).
Subtotal: 30-31

Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling minor requirements. Courses with omnibus numbers 401, 404, 405, 406, and 407 are not allowed for the minor. Additional courses may be required as prerequisites. Only grades of C- or above count toward satisfying the minor requirement.

NOTE: Students earning the minor in sustainability may not also earn the sustainable urban development minor offered by the Toulan School of Urban Studies and Planning unless the courses presented for the minors differ by at least 12 credits. Only grades of C- or above count toward satisfying the minor requirements.

Graduate Programs

The Environmental Science and Management (ESM) graduate program provides a curriculum that will develop scientists and managers able to analyze and understand environmental systems, predict environmental change and participate in the management of the environment. Each student conducts research and completes a thesis or project; each student develops depth in a specific academic area; and each student develops breadth through a set of core courses that include concepts in physical systems, ecological systems and management. Areas of primary specialization are terrestrial, urban and aquatic ecology as they relate to human impacts and management. ESM offers the Masters of Science (MS), the Masters of Environmental Management (MEM), and the Professional Science Masters (PSM) degrees. The Department also participates in the Earth, Environment, & Society Ph.D. degree (p. 205).

The following procedures are designed to assure that the student is qualified to pursue both the program itself and a successful career in environmental science and management.

ADMISSION REQUIREMENTS

Master of Science, Master of Environmental Management, and Professional Science Masters

In addition to the instructions for admission to the university graduate program, ESM master’s programs require the following information from each applicant.

1. Satisfactory scores on the Graduate Record Examination (GRE) aptitude test. A satisfactory score on the Test of English as a Foreign Language (TOEFL) is required for international students.
2. Three letters of evaluation from persons qualified to assess the applicant’s promise as a graduate student.
3. Evidence of undergraduate or graduate coursework in biology, chemistry, statistics, physics, and mathematics (including differential and integral calculus) approximately equivalent to the foundation course requirements for undergraduate students in environmental science or environmental studies.
4. One official transcript from every college or university attended, including junior colleges and community colleges.
5. Statement of Interest.
6. Current resume or CV.
7. Identification of advisers.

Prospective students should contact the program for a statement of current admission policy. A high GPA and acceptable GRE scores do not guarantee admission to master’s programs in Environmental Science and Management; admission is contingent on the availability of department resources and the identification of an appropriate adviser for each student.

ENVIRONMENTAL SCIENCE AND MANAGEMENT M.E.M.

University master’s degree requirements must be met. In addition, specific degree program requirements are listed in each program.

The graduate study program is developed through discussions involving the graduate student, the student’s adviser, and the student’s graduate committee. The M.E.M. graduate committee consists of at least three members including the major adviser. The major adviser and one other committee member must be a member of the graduate faculty. The graduate committee must be approved by the ESM Chair.

To encourage the development of interdisciplinary graduate study programs, guidelines for course selection are flexible. M.E.M. students must complete at least 45 graduate credits.

M.E.M. REQUIREMENTS

The M.E.M. program of study consists of the following minimum credit requirements:

Courses

<table>
<thead>
<tr>
<th>Course</th>

### ENVIRONMENTAL SCIENCE AND MANAGEMENT M.S.

University master’s degree requirements must be met. In addition, specific degree program requirements are listed in each program.
leading to a thesis, which complies with standards established by the Graduate School.

ENVIRONMENTAL SCIENCE AND MANAGEMENT P.S.M.

University master’s degree requirements must be met. In addition, specific degree program requirements are listed in each program.

The graduate study program is developed through discussions involving the graduate student, the student’s adviser, and the student’s graduate committee. The P.S.M. graduate committee consists of at least three members including the major adviser. The major adviser and one other committee member must be a member of the graduate faculty. The graduate committee must be approved by the ESM Chair.

To encourage the development of interdisciplinary graduate study programs, guidelines for course selection are flexible. P.S.M. students must complete at least 57 graduate credits.

P.S.M. REQUIREMENTS

The P.S.M. program of study consists of the following minimum credit requirements.

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>

</tr>
</tbody>
</table>

Subtotal: 57

CORE COURSES

Core courses are required in physical environmental processes, ecological processes and environmental management for all master’s students. P.S.M. students must also complete a core course in project management (ESM 551). Lists of approved core courses are available from the ESM office or online at http://www.pdx.edu/esm.

QUANTITATIVE ANALYSIS

A course in research methods, experimental design, or statistical analysis, is required to ensure students have sufficient skills for environmental research.

ELECTIVE COURSES

Elective courses are to be defined in the student’s program of study, and agreed upon by the student’s adviser and graduate committee. Courses may be selected to provide additional background, to explore new areas, and to add depth to a scholastic program.

THESIS OR PROJECT

The culminating experience of the students seeking a P.S.M. degree is the completion of a project. This element of the curriculum serves to integrate coursework, further develop skills required to function effectively in a professional setting (e.g., communication, presentation, and project management) and provide an opportunity to participate in the solution of a real environmental problem. Working with local agencies or and organizations, an ESM faculty member and possibly in a group of other students, the P.S.M. student identifies a problem, formulates a project with the community partner, formally proposes a project, completes the scope of work detailed in the proposal, and documents and presents the results of the project to an appropriate audience. This project is ESM 506 - Project, 5 credits.

P.S.M. PLUS COURSES

In addition to the above courses, the P.S.M. degree also requires at least four courses (12 credits) focused on business and professional management and practices. These "Plus Courses" are what distinguish the P.S.M. degree from the M.E.M. degree. The student is required to complete at least two credits in each of the four areas of "Plus Courses" (project management, communication, law/policy, and ethics). Lists of approved "Plus Courses" are available from the ESM office or online at http://www.pdx.edu/esm.

HYDROLOGY GRADUATE CERTIFICATE

The Graduate Certificate of Hydrology is designed to give students advanced training in hydrology, and leads to professional certification with the American Institute of Hydrology (AIH).

Surface Hydrology Core

Take one of the following:
CE 565/ESM 525 Watershed Hydrology 4
G 566 Glaciology 4
Geog 514 Hydrology 4

Subtotal: 4

Hydrogeology Core
Take one of the following:
CE 569 Subsurface Hydrology 4
ESM 579/CE 579 Fate and Transport of Toxics in the Environment 4
G 543 Ground Water Geology 4
G 545 Geochemistry 4

Subtotal: 4

Water Quality Core
Take one of the following:
CE 578 Water Quality Modeling 4
ESM 527 Watershed Biogeochemistry 4
ESM 575 Limnology and Aquatic Ecology 4
ESM 579/CE 579 Fate and Transport of Toxics in the Environment 4
G 545 Geochemistry 4
G 548 Chemical Hydrogeology 4

Subtotal: 4

Category I Elective
Take one of the following:
CE 561 Water Resource Systems Analysis 4
CE 565/ESM 525 Watershed Hydrology 4
525
G 543 Ground Water Geology 4
G 544 Well Dynamics 4
G 545 Geochemistry 4
G 548 Chemical Hydrogeology 4
G 566 Glaciology 4
Geog 514 Hydrology 4
Geog 547 Urban Streams 4
Geog 594 GIS for Water Resources 4
Ph 526 Thermodynamics and Statistical Mechanics 4

Subtotal: 4

Category II Elective
Take two of the following:
Bi 523 Microbial Ecology 4
CE 561 Water Resource Systems Analysis 4
CE 565/ESM 525 Watershed Hydrology 4
525
CE 569 Subsurface Hydrology 4
CE 572 Environmental Fluid Mechanical Transport 4
CE 573 Numerical Methods in Environmental and Water Resources Engineering 4
CE 574 Unit Operations of Environmental Engineering 4
CE 576 Environmental Fluid Mechanics 4
CE 578 Water Quality Modeling 4
CE 581 The Columbia River as a System 2
CE 582 Introduction to Sediment Transport 4
CE 583 Estuarine Circulation 4
CE 587/Ch 587 Aquatic Chemistry 4
587
CE 590 Soil and Groundwater Restoration 4

ESM 571/Ph 571 Atmospheric Physics 4
ESM 573 Phytoplankton Ecology 4
ESM 575 Limnology and Aquatic Ecology 4
ESM 577 Limnology Laboratory 2
ESM 579/CE 579 Fate and Transport of Toxics in the Environment 4
ESM 580 Coastal Marine Ecology 4
ESM 583 Marine Conservation and Management 4

Subtotal: 4
Undergraduate programs

The Geography Department at Portland State University links environmental studies and cultural studies in a program centered on environmental issues, social and cultural landscapes, sustainability in urban and natural areas, and Geographic Information Science. Coursework emphasizes systematic and regional approaches to understanding the physical environment and human-environment interactions. Techniques classes (in GIS, remote sensing, cartography, and spatial analysis) provide the tools to analyze complex local, regional, and global phenomena. Access to the Pacific Coast and the Cascade Mountains provides ample opportunity for fieldwork-based classes and opportunities for research. The PSU Department of Geography is an excellent choice for undergraduate and graduate students with interests in the linkages between human and natural systems.

Faculty engage in local, regional, and international research projects in hydrology, water resources, biogeography, geomorphology, sustainable development, land use analysis, climate change, cultural and political ecology, cultural landscapes, the urban environment, geographic education, and geographic information science. Ongoing faculty research sites in international areas include Patagonia, the Amazon Basin, Sub-saharan Africa, and the Pacific Rim.

Geography participates in the Earth, Environment and Society (EES) Ph.D. Program. Over 120 undergraduate majors and 30 graduate students participate in two departmental groups, the Friends of Geography and the Student Chapter of the American Society for Photogrammetry and Remote Sensing/Columbia River Region. Several research groups and outreach programs in the department provide additional job and internship opportunities for interested students in public agencies and businesses in such fields as planning, environmental management, GIS, and cartography.

The geography program gives students an appreciation and understanding of the human environment on global, regional, and local scales. It provides background and requisite training for careers in resource, planning, environmental, or education fields. Geography majors find work in urban and natural resource management, spatial/GIS analysis, urban planning, map design and production, and statistical analysis. Geography is the lead department on campus for training in GIS, remote sensing, cartography, and spatial analysis.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Geography's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.
ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

GEOGRAPHY B.A./B.S.

In addition to meeting the general University degree requirements, the major in geography must complete at least 52 credits in geography courses, including 12 credits in each of the following areas: geographic techniques, physical geography, and human geography—as detailed below. Of the courses presented for the major, 12 credits are in required courses (Geog 210, Geog 230, and Geog 380), and at least 36 Geography credit hours must be at the upper division, to include 16 hours at the 400-level. Geog 496, or Stat 243 and Stat 244, or equivalent is required for the B.S. degree.

Geog 380U: required

Geography Electives (16)
Subtotal: 52

Course taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements.

All courses used to satisfy the departmental major requirements must be graded C- or above.

GEOGRAPHY MINOR

To earn a minor in geography a student must complete a minimum of 28 credits in geography (at least 12 credits of which must be taken in residence at Portland State University, and 16 credits of which must be upper-division), to include the following:

REQUIREMENTS

Courses
Geog 210 Physical Geography 4
Geog 230 Environment and Society: Global Perspectives 4
Geog 380U Maps and Geographic Information
Geography electives (upper-division) 16

Subtotal: 28

All courses used to satisfy the departmental minor requirements must be graded C- or above.

WATER RESOURCES MINOR

The minor may be earned simultaneously with a B.A. or B.S. degree, or post baccalaureate in any major.

REQUIREMENTS

Advisor-approved courses (16 credits)
Students must take at least one 300-level course and two 400-level courses from these current offerings.
Geog 310U/Sci 333U Climate and Water Resources 4
Geog 320/G 374 Geomorphic Processes 4
Sci 335U Water in the Environment I 4
ESM 424 Wetland Ecology 4
ESM 425 Watershed Hydrology 4
ESM 426 Ecology of Streams and Rivers 4
ESM 475 Limnology and Aquatic Ecology 4
G 443 Ground Water Geology 4
G 448 Chemical Hydrogeology 4
Geog 414 Hydrology 4
Geog 446 Water Resource Management 4
Geog 447 Urban Streams 4
Geog 494 GIS for Water Resources 4

Students may use up to four credits of other coursework toward minor requirements.

For students pursuing both the Geography major and the Water Resources Minor OR both the Environmental Science major and the Water Resources minor OR both the Environmental Studies major and the Water Resources minor, courses presented for the minor must differ from the major by at least 12 credits.

Foundational Courses (12 credits)
Students must choose three of the foundational courses from the following Geography and Environmental Sciences and Management courses.
Geog 210 Physical Geography 4
Geog 230 Environment and Society: Global Perspectives 4
Geog 340U Global Water Issues and Sustainability 4
ESM 220 Introduction to Environmental Systems 4

GEOGRAPHIC INFORMATION SYSTEMS MINOR
REQUIREMENTS

To earn a minor in GIS (Geographic Information Systems) a student must complete a minimum of 28 credits in geography (at least 16 credits must be taken in residence at Portland State University), to include the following:

**Core courses: (16 credits)**

<table>
<thead>

<tr>
<td>Geog 497</td>
<td>Advanced Spatial Quantitative Analysis</td>
<td>4</td>
</tr>
</tbody>
</table>

All courses submitted to satisfy requirements for the minor in GIS must be graded and passed with a C- or better. At least 16 credits must be taken in residence at PSU. Subtotal: 28

Students who are also working toward the major in Geography must take (in addition to the core courses for the GIS minor) at least 12 credits from the list of electives that will be uniquely applied to the GIS minor.

Students considering the GIS minor are strongly encouraged to meet with a geography adviser to work out an instructional program that best meets their needs.

CLIMATE CHANGE SCIENCE AND ADAPTATION MINOR

Students will need to complete at least 27 credits to complete the Climate Change Science and Adaptation Minor. The minor may be earned simultaneously with a BA or BS degree or postbaccalaureate in any major. Students can choose from a range of core and elective courses from the social and physical sciences. For students pursuing both the Geography major and the Climate Change Science and Adaptation Minor OR both the Environmental Science (or Studies) and the Climate Change Science and Adaptation Minor, courses presented for the minor must differ from the major by at least 12 credits.

**CORE COURSES**

Pick five from the following core courses, at least 2 courses must be 400-level:

<table>

### GEOGRAPHY SECONDARY EDUCATION PROGRAM

Adviser: See CLAS Advising  
(See Interdisciplinary Studies (p. 279))

#### Graduate programs

The Department of Geography offers the degrees of Master of Arts, Master of Science, Master of Arts in Teaching, and Master of Science in Teaching (General Social Science). The department also participates in the Earth, Environment, & Society Ph.D. degree. 

Areas of primary concentration are urban geography, physical geography, resource management, culture, environment and society, GIS, and cartography. The M.A. and M.S. degrees are in part designed to meet the needs of students preparing for careers in research or administration in government and industry, urban and regional planning, and in secondary education and community college teaching. The M.A. and M.S. degrees also provide a predoctoral program in geography for students planning to take advanced work leading to professional careers in university teaching, research, or public service. Students are encouraged to follow a program that combines breadth of knowledge with depth in one field of interest.

#### ADMISSION REQUIREMENTS

For admission to graduate study for the M.A. and M.S. degrees, a student normally should have completed the minimum preparation for an undergraduate major in geography with a 3.00 grade point average in all work. Students with majors in other fields are encouraged to apply. Normally such students are admitted on a conditional basis, with the student required to take courses to remedy deficiencies.

In addition to the general University admission requirements for advanced degrees the student must provide letters of recommendation from three faculty members of colleges previously attended.

Students for whom English is a second language must present a score of at least 550 (paper-based) or 213 (computer-based) in the Test of English as a Foreign Language (TOEFL) with their application for admission.

#### GEOGRAPHIC INFORMATION SYSTEMS GRADUATE CERTIFICATE

Certificate requirements: Successful completion of 20 specified graduate credits with a cumulative PSU graduate GPA of 3.0 or higher (all graduate credit taken at PSU) and

Subtotal: 8

**Total Credit Hours:** 27-28

**GEOGRAPHIC INFORMATION SYSTEMS GRADUATE CERTIFICATE**

Certificate requirements: Successful completion of 20 specified graduate credits with a cumulative PSU graduate GPA of 3.0 or higher (all graduate credit taken at PSU) and
a cumulative program GPA of 3.0 or higher (all courses used for the Graduate Certificate), distributed as follows: 8 credits of core courses and 12 credits of electives. All certificate requirements must be fulfilled within three calendar years of admission. Courses taken three years before the program completion date cannot be used to fulfill the program requirements. All certificate program courses must be taken for a letter grade (A-F). The program prerequisite, GEOG 380 (Maps and Geographic Information), cannot be used toward the certificate requirements.

**REQUIRED CORE COURSES**

| Courses         | | Credit Hours |
|-----------------|-----------------------------|
| Geog 588/USP591 | Geographic Information Systems I: Introduction | 4 |
| Geog 588L       | GIS Lab                    | 0 |
| Geog 592/USP592 | Geographic Information Systems II: Advanced GIS | 4 |
| Geog 592L       | GIS II Lab                 | 0 |

A student may request a waiver of these courses from the program director on the basis of prior educational background under the following circumstances:

1. The student has taken the course at the undergraduate level or taken them as part of an undergraduate program at PSU.
2. If GIS I and GIS II equivalent were taken at another institution, syllabi from those courses must be submitted as part of the waiver request.

Waivers are at the discretion of the program director. If the waiver is not approved, a student must take GIS I and GIS II. If the waiver is approved a student must take additional credits from the following list to fulfill the required 8 credits of core curriculum:

- Geog 575 DigitalCompilation and Database Design (4)
- Geog 581 Digital Image Analysis I: Introduction (4)
- Geog 597 Spatial Quantitative Analysis (4)

Subtotal: 8

**ELECTIVES**

12 credits from this list or similar discrete-numbered courses approved in advance by the director.

| Courses         | | Credit Hours |
|-----------------|-----------------------------|
| Geog 525        | Field GIS                  | 4 |
| Geog 575        | Digital Compilation and Database Design | 4 |
| Geog 580        | Remote Sensing and Image Analysis | 4 |
| Geog 581        | Digital Image Analysis I: Introduction | 4 |
| Geog 582        | Digital Image Analysis II: Advanced Remote Sensing | 4 |
| Geog 584        | Cartographic Applications of GIS | 4 |
| Geog 585        | Map Design and Production GIS | 4 |
| Geog 589        | Building a GIS Database with GPS | 4 |
| Geog 590        | GIS Programming            | 4 |
| Geog 594        | GIS for Water Resources    | 4 |
| Geog 595        | Maps, Models, and GIS      | 4 |
| Geog 597        | Advanced Spatial Quantitative Analysis | 4 |
| USP 543         | Geographic Applications to Planning | 4 |
| USP 593         | Public Participation GIS    | 3 |

Subtotal: 12

**Total Credit Hours: 20**

**Program Completion Application**

Application for award of the Graduate Certificate must be filed by the student in the Graduate School no later than the first week of the anticipated term of graduation (deadlines for each term are available at the Graduate School).

**Transfer Credits**

Transfer credit is defined as eligible graduate credit taken at other accredited institutions. Two-thirds of the Graduate Certificate program requirements or 15 credits minimum, whichever is larger, must be taken at Portland State University. Transfer credits must be letter-graded with a B or higher and eligible for use in master’s degree programs at PSU. The Proposed Transfer Credit form (GO-11GC) must be used for approval of transfer credit.

**Experimental 510 Courses**

Due to the fast developments in geospatial technologies, some experimental courses can be used toward the Certificate with the approval of the Program Director. Please verify the eligibility with the instructor or Geography department before taking a 510 course to fulfill the Certificate requirements. Each student can have a maximum of one 510 course per program. The experimental course can only be used as a substitute for an elective, not a core course. Joint campus courses (JC 510) are considered transfer credits for which all transfer credit limitations apply.
Course Overlap between Degrees and Certificates

Graduate courses can be applied to a master's (or a doctoral) degree and a graduate certificate. However, graduate courses cannot be applied to two different graduate certificates. See PSU Bulletin for more information about course overlap.

GEOGRAPHIC INFORMATION SCIENCE M.S.

Students will plan a program of study with an adviser and other members of the supervisory committee during the first term of residence (the first term after admission to the program). The program of study must include a minimum of 45 graduate credits. Of these, a minimum of 32 graduate credits must be in geography, to include 6 credits of Geog 509 (GIS Practicum), 12 credits of core geography courses, 8 credits in core GIS competency courses, 4 credits in non-GIS, topical courses, at least two courses (6-8 credits) from one of the five specialized geospatial data science focus areas, and 7-9 elective credits to meet the 45 credits required by the program.

Students in the program must complete a project-based practicum. The practicum requires the presentation of the student's practicum project into a topic approved by the student's graduate committee, which may include a community partner. The practicum represents an original contribution to knowledge in the field of GIScience and normally involves working with a community partner. A final oral presentation of the project and a project report are required for completion of the degree.

The Geography Department follows the University requirement for minimum and continuous enrollment.

The program consists of coursework in the following areas:

<table>
<thead>
<tr>
<th>Core Geography Courses</th>

Students may need to complete additional courses to meet the prerequisite requirements for a course. Please check with the instructor before registering.

GIS Practicum
Geog 509  Practicum  6
Subtotal: 6

Electives

Graduate-level GIS courses or seminars:
G 525  Field GIS  4
Geog 507  Seminar: Speaker Series  1
Geog 576  3D Terrain Analysis & Visualization  2
Geog 589  Building a GIS Database with GPS  4
Geog 594  GIS for Water Resources  4
Subtotal: 7-9

Other elective courses may approved by the committee.

Total Credit Hours: 45

GEOGRAPHY M.A./M.S.

See University master’s degree requirements (p. 51).
Specific departmental requirements are listed below.

REQUIREMENTS

The student will plan a program of study with an adviser and other members of the supervisory committee during the first term of residence (the first term after admission to the program). The program of study must include a minimum of 45 graduate credits for thesis students and 54 graduate credits for non-thesis students. Of these, a minimum of 36 graduate credits must be in geography for the thesis option, to include 6 credits of Geog 503 (Thesis); a minimum of 40 graduate credits must be in geography for the non-thesis option, including 3 credits of Geog 501 Research. Both thesis and non-thesis programs must include the following: Geog 521, Geog 522, and Geog 523.

Students seeking the M.A. degree must demonstrate their competence in the use of a foreign language for geographic research; those preparing for an M.S. degree must show proficiency in advanced skills in geography or an equivalent research technique (8 credits of Techniques/Skills coursework).

Students in the M.A. program must complete a thesis. Those in the M.S. program may choose between thesis and non-thesis options. The thesis option requires the presentation of the student’s independent research into a topic approved by the student’s graduate committee. It normally involves field work and is an original contribution to knowledge in the field of geography. A final oral examination by the student’s committee includes defense of the thesis.

Candidates electing the non-thesis option must register for 3 credits of Geog 501 Research to rewrite, edit, and revise a research paper or project that must evolve from graduate coursework in geography at PSU. A final oral presentation of the paper is required for completion of the degree. All graduate students, whether in thesis or non-thesis programs, are encouraged to attend the department’s colloquia.

The Geography Department follows the University requirement for minimum and continuous enrollment.

Geology

17A Cramer Hall (CH)
725-3022
www.pdx.edu/geology

• B.A., B.S. in Geology
• B.A., B.S. in Earth Science
• Minor in Geology
• Minor in Environmental Geology
• Minor in Space and Planetary Science
• M.A., M.S.
• M.A.T. and M.S.T. (Science/Geology)
• Ph.D. in Earth, Environment, & Society

Undergraduate Programs

The Department of Geology offers programs leading to the bachelor’s degree in geology and earth science, as well as studies in geochemistry, planetary science, volcanology, glaciology, hydrogeology, and environmental and engineering geology.

The programs serve both majors in geology and earth science and non-majors: those who may wish to broaden their science background; those preparing to teach general or earth sciences or geology in elementary or secondary schools; and those preparing for a master’s or a doctoral degree.

Post-baccalaureate students (with a bachelor’s degree not in geology) who wish to become professional geologists may complete this curriculum while doing both undergraduate and graduate work in geology.

Geologists are employed by government agencies at federal, state, county, and city levels; by independent consulting firms to work with engineers, architects and planners; in the construction, mining, and energy industries; and as teachers in elementary, middle and high schools and at the college level.
Geologists who have graduated from PSU are employed in natural hazards analysis and planning, climate change research, assessment of ground and surface water resources, exploration, development, and management of mineral and energy resources, geotechnical and geoengineering studies, urban planning and GIS, and instruction at all educational levels. Students majoring in geology and earth science should plan to complete the required mathematics, chemistry, and physics courses as early in their programs as possible.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Geology undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

GEOLOGY B.S./B.A.

In addition to meeting the general University degree requirements, the major must meet the following departmental requirements:

REQUIREMENTS

Geology Courses (46-47 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tbody>
</table>

**At least 16 credits of electives must be chosen from upper-division geology courses**

May include either G 355 or G 450, but excludes:

G 301  Geology for Engineers                           3
G 340U Life of the Past                                4
G 341U Geology of the Oregon Country                   4
G 342U Volcanoes and Earthquakes                       4
G 344U Geology and the National Parks                  4
G 345U Life in the Universe                            4
G 346 Exploring Mars                                    4
G 351U Introduction to Oceanography                    4
G 352U Minerals in World Affairs                       4
G 355 Earth and Space Sciences for Elementary Educators| 4
G 453 Geology of the Pacific Northwest                 4

Up to 8 credits may be taken in upper-division math, science, or engineering.

**Eight credits from the following courses:**

G 340U Life of the Past                                4
G 341U Geology of the Oregon Country                   4
G 342U Volcanoes and Earthquakes                       4
G 344U Geology and the National Parks                  4
G 345U Life in the Universe                            4
G 346 Exploring Mars                                    4
G 453 Geology of the Pacific Northwest                 4

**Non-Geology Courses**

**8 credits of upper-division pre-approved sustainability-related courses**

**Mathematics to include either**

**Option 1**

<table>

</table>

And
Statistics to include:
Stat 243  Introduction to Probability and Statistics I  4
Stat 244  Introduction to Probability and Statistics II  4
Stat 244: recommended

Allied Sciences
One year of 200-level college chemistry or equivalent with labs  15
One year of 200-level biology plus labs  15
or
One year of 200-level physics plus labs  15

Subtotal: 98-103

Courses taken under the undifferentiated grading option (pass/no pass) are not acceptable toward fulfilling departmental major requirements.

GEOLOGY MINOR

REQUIREMENTS

To earn a minor in geology, a student must complete a minimum of 29 credits (at least 14 credits of which must be taken in residence at PSU), to include the following:

Courses
G 200  Field Studies  1
G 201  Dynamic Earth: Interior  3
G 202  Dynamic Earth: Surface  3
G 204  Geology Laboratory  1
G 205  Geology Laboratory  1
or
G 207  Computer Based Geology Laboratory  2

Subtotal: 29

ENVIRONMENTAL GEOLOGY MINOR

REQUIREMENTS

To earn a minor in environmental geology, a student must complete a minimum of 29 credits (at least 14 credits of which must be taken in residence at PSU), to include the following:

Courses
G 200  Field Studies  1

Subtotal: 29

SPACE PLANETARY SCIENCE MINOR

REQUIREMENTS

To earn a minor in space and planetary science, a student must complete a minimum of 28 credits (at least 16 credits of which must be taken in residence at PSU), to include the following:

Eight credits selected from the following:
G 201  Dynamic Earth: Interior  3
G 204  Geology Laboratory  1
G 202  Dynamic Earth: Surface  3
G 205  Geology Laboratory  1
or
G 207  Computer Based Geology Laboratory  2

Subtotal: 29
Twenty credits of electives selected from the following
(may include other elective courses pre-approved by the undergraduate adviser):

- G 203 Historical Geology 3
- G 206 Historical Geology Lab 1
  or
- G 340U Life of the Past 4

- G 345U Life in the Universe 4
- G 346 Exploring Mars 4
- G 456 Astrogeology 4
- G 446 Meteorites 4
- G 404 Cooperative Education/Internship 1-2
- G 405 Reading and Conference 1-2

Subtotal: 28

Pass/No Pass: Upper division courses must be taken for a letter grade to count toward fulfilling department minor requirements with the exceptions of G404 and G405, which are offered only for pass/no pass.

Prerequisite requirements exist only for G446 Meteorites (G201 and one year of chemistry). This is the only course in the program that has a prerequisite.

Students are encouraged to contact the Department of Geology and ask for the undergraduate adviser for help in designing a program leading to a minor in geology, environmental geology, or computer applications. Please contact Dr. Alex Ruzicka for help with the space and planetary science minor.

COMPUTER APPLICATIONS WITH AN EMPHASIS IN GEOSCIENCES MINOR

REQUIREMENTS

To earn a minor in computer applications with an emphasis in geosciences, a student must complete 30 credits (at least 24 credits of which must be taken in residence at PSU) to include the following:

Courses

- G 324 Data Management and Analysis 5
- G 326 Numerical Modeling of Earth Systems 5
  - Lower Division Computer Science
- Three adviser-approved courses in advanced computer applications, with at least 4 credits outside of geology 12

Subtotal: 30

A one-term, adviser-approved, upper-division research project or practicum

Adviser-approved courses in advanced computer applications: these courses may come from any unit in the University but may not include 405 reading/conference courses

Graduate Programs

The Department of Geology offers programs leading to a graduate certificate, the Master of Arts or Master of Science in geology with an option in geohydrology, the Master of Arts in Teaching or Master of Science in Teaching (Science), and to the Earth, Environment, & Society Doctoral Program.

The M.A./M.S. program is designed to train geology students beyond the baccalaureate degree for professional employment or for advanced graduate work. The M.A.T./M.S.T. program is offered for teachers in secondary schools and community colleges.

Geology participates in the Earth, Environment, & Society Doctoral Program. Specialized studies in hydrogeology, geomicrobiology, environmental geology, engineering geology, geomechanics, glaciology, and applied stratigraphy, along with multidisciplinary environmental science courses and seminars, will partially fulfill the requirements for the Ph.D. See Earth, Environment and Society Ph.D. (p. 205) for information relative to the Ph.D. program in Earth, Environment, & Society.

ADMISSION REQUIREMENTS

Master of Arts and Master of Science

To be admitted to the graduate degree program, the student must have a baccalaureate degree in geology or its equivalent, as determined by the departmental graduate committee. It is required that the General Graduate Record Examination be taken before admission.

Master of Arts in Teaching or Master of Science in Teaching

The College of Liberal Arts and Sciences offers the M.A.T./M.S.T. degrees in Science/Geology. To be admitted to the M.A.T./M.S.T. program in Science/Geology, a student must hold a bachelor’s degree in geology, or in the physical or life sciences—including the equivalent of a minor in geology. Students must take the general Graduate Record Examination and submit scores before admission for advising purposes.
Graduate Certificates

All PSU Graduate Certificate programs require admission by the University, and an applicant must have a bachelor’s degree in Physical Sciences or Civil Engineering from an accredited institution and a cumulative GPA of at least 2.75 in all undergraduate courses. Applicants with cumulative undergraduate GPAs between 2.50 and 2.74 may be considered for conditional admission only.

GEOLOGY M.A./M.S.

See University master’s degree requirements (p. 51). Specific departmental requirements for the M.S./M.A. Geology or the M.A./M.S. Geology-Geohydrology with a thesis option are:

1. Completion of a minimum of 45 credits in approved graduate courses.
   a. Students must take G 523 Statistics and Data Analysis in the Geosciences unless already taken as G 423 as an undergraduate.
   b. Students must take at least 8 credits in geology courses numbered G 610 or higher.
   c. Students must take at least another 12 credits (16 credits if G 423 Computer Application in Geology was completed as an undergraduate) in the field of geology from G 510 or higher-level courses.
   d. A maximum of 9 credits will be allowed for courses numbered G 501 Research, G 504 Cooperative Education/Internship, G 505 Reading and Conference, or G 506 Special Problems. These courses are offered for P/NP credit only.
   e. Students must complete at least 6 credits of G 503 Thesis (P/NP only); up to 9 credits can count for the degree.
2. The department will evaluate a student’s record for deficiencies at the time of admission and develop a list of courses that must be completed for a grade of B or better in each course within a length of time specified in the admission letter.
3. Completion of field camp (could have been taken as an undergraduate) or equivalent field experience as approved by the field camp director.
4. Presentation of a research project.
5. Completion of a final oral examination on the subject area and the research project.

GEOLOGY M.A.T./M.S.T.

In consultation with the graduate adviser, the student should establish the degree program before the completion of 16 credits of coursework. The program must include a minimum of 45 credits in approved graduate courses, to include a minimum of 30 credits in geology and related sciences, and 6 credits in G 506. At least 9 credits must be in education courses. In order to fulfill requirements for the degree, the student must satisfactorily complete the degree program and pass both a final written examination and a final oral examination.

GRADUATE CERTIFICATE IN ENGINEERING GEOLOGY

Purpose

The Graduate Certificate in Engineering Geology provides practicing geologists an opportunity to upgrade their engineering credentials and post-baccalaureate students in
an accessible way to obtain skills in engineering geology while partially fulfilling requirements towards a Professional Masters. The certificate is designed to accommodate professionals and students who are employed full or part-time.

**Career Opportunities**

This Certificate is designed for professionals and students interested in the field of engineering geology. It can represent a portion of a professional geologist’s training, as well as a portion of the background needed by registered professional engineering geologists in the state of Oregon. Practicing geologists can use this Certificate, which indicates added skills and background, for professional development. This Certificate program can also be used towards a graduate degree.

- B.A., B.S.
- Minor in History
- Minor in World History
- Minor in Science, Technology, and Society
- Minor in Medieval Studies
- M.A.

**Undergraduate Program**

Students of history, through investigation of the past, gain skills and perspectives that foster a better understanding of the world and their place in it. The study of history
contributes to the goals of a liberal arts education by enabling students to gain a deep appreciation of the diversity of human experience over time. Through the study of history, students learn how to interpret their own experience and to shape their own values by engaging in dialogues with the past. The study of history also nurtures the ability to view the world from multiple perspectives, including interdisciplinary ones. Finally, history provides the foundation for informed participation in both the local and the global community by teaching how to apply critical thinking skills to solving problems. The study of history offers excellent training for a variety of occupations, from teaching to law, government, business, and the arts.

The Department of History encourages active engagement in historical inquiry, whether at the introductory survey level, in seminars, or in community-based learning. Active engagement requires students to learn how to master basic knowledge, ask historical questions, access and evaluate information, and communicate what they have learned in both written and oral forms. Helping students master the use of a variety of sources and tools to unlock the past is a goal of all history courses.

The combined expertise of faculty in the Department of History encompasses a diversity of fields ranging from Oregon and the Pacific Northwest to World History. The department offers lower-division surveys in World History and U.S. history, but the gateway course for the major is Hst 300 Historical Imagination, which provides an introduction to the discipline—both the theory and practice—of history. Upper-division offerings include a wide range of subject areas, from the Ancient Near East to American Family History. Reading seminars (Hst 491) and research seminars (Hst 492) on specialized topics—such as medieval Spain or Japanese nationalism—provide the opportunity for majors to write a substantial research paper and to participate in intensive reading and discussion of topics. Hst 490 Comparative World History—a thematic course—is required for the major to ensure that students develop the ability to frame what they know in a world historical context and to apply comparative analysis to important historical topics. Advising is critical, because majors are encouraged to develop their own thematic, chronological, or geographical focus through their choice of upper-division elective courses.

In line with the University’s mission as an urban, public institution, the Department of History supports internships and partnerships with the Oregon Historical Society and other local and regional museums, archives, and historical societies and offers training in public history. All faculty consider both teaching and research, along with community service, to be part of their responsibilities as members of the Department of History. The creation of knowledge, as well as its dissemination through teaching and publication, is a vital part of the department’s mission.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for History's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

HISTORY B.A./B.S.

REQUIREMENTS

In addition to meeting the general University degree requirements, the major in history must meet the departmental requirements listed:

Courses

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lower-division history electives</td>
<td>20</td>

<td>24-44</td>
</tr>
</tbody>
</table>

Upper-division electives: Selected in consultation with their adviser, these courses may be geographic, thematic, or period-based.

- All courses are to be taken for differentiated grades, and the history major must earn at least a C- in each course presented to meet major requirements.
- Of the electives students apply to the upper-division history major requirements, at least two courses must examine a non-European and non-U.S. subject, and at least two courses must examine either Europe or the United States.
- Students are required to take at least one linked Reading Seminar (491) and Research Seminar (492) sequence.
- A minimum of 20 credits in history must be taken at the 400-level (including courses that count toward other major requirements, such as Hst 490, Hst 491, and Hst 492).
- A maximum of 20 lower-division credits in history may be applied to the major requirements.
- A minimum of 32 credits in history must be taken in residence at Portland State University.

Total Required Credits in History: 60
HISTORY HONORS OPTION

The honors track in history affords outstanding history majors the opportunity to propose, carry out, and formally present independent research on a topic of their choosing, under the guidance of a faculty adviser. Students who successfully complete an approved thesis and its associated 14 or 16 credit-hour department honors curriculum will be formally designated History Honors graduates and receive notice of this distinction on their diplomas. Students who wish to pursue the honors in history option must apply to do so after having completed a minimum of 24 credit hours in the major and before they have attained senior standing. The history honors option requires a 3.50 GPA in history prior to admission to the program.

The history honors option requires an undergraduate thesis which students produce in their junior and senior years. Following successful admission to the program, during the junior year the student develops a thesis topic in a reading and conference course (four credits of Hst 405) directed by a faculty member who has agreed to supervise the student’s honors thesis. In the senior year, the first term is devoted to research (four credits of Hst 401), the second term to writing (four credits of Hst 403), and the third to presentation and revision of the thesis (two to four credits of Hst 403).

HISTORY MINOR

REQUIREMENTS

To earn a minor in history a student must complete 28 credits, 16 of which must be at the upper division level and 8 at the 400 level.
Subtotal: 28

- All courses are to be taken for differentiated grades and the history minor must earn at least a C- in each course presented to meet minor requirements.
- A minimum of 16 credits in history in residence at Portland State University is required.

WORLD HISTORY MINOR

REQUIREMENTS

The World History Minor requires the completion of 28 credits from the following list of courses.

Required Courses

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Students must complete 16 credits at the upper-division level, 4 of which must be at the 400 level.

Total Credit Hours: 28

All courses are to be taken for differentiated grades; pass/no pass courses cannot be counted toward the minor. Students must earn at least a C- in each course presented to meet minor requirements.

A minimum of 16 credits in History in residence at Portland State University is required for the minor.

SCIENCE, TECHNOLOGY, AND SOCIETY INTERDISCIPLINARY MINOR

In the Minor in Science, Technology, and Society, students use multidisciplinary perspectives to study science and its applications as a system of knowledge and as a social institution. Goals are to gain a deeper appreciation of reasoning and evidence in science; of the historical development of science and related disciplines; and of the social, cultural, political and ethical contexts of science and technology.

This interdisciplinary Minor in Science, Technology, and Society requires 24 credits distributed as follows:

Three core courses (12 credits) chosen from:

MEDIEVAL STUDIES MINOR

The interdisciplinary minor in medieval studies is an interdisciplinary program with courses offered in the departments of Art History, English, History, Philosophy, World Languages and Literatures, and Theatre and Film. Students will fulfill 28 credits of coursework in a minimum of three disciplines, distributed as follows:

- Courses must be completed in at least three separate departments or programs;
- At least 20 credit hours must be completed in upper-division courses, with at least 8 of those credit hours at the 400-level.

REQUIREMENTS

Courses may be selected from the list below:

- ArH 329 Islamic Art: Major Themes and Periods: 4
- ArH 355U Medieval Monsters 4
- ArH 356U Early Medieval Art and Architecture 4
- ArH 357U Byzantine Art and Architecture 4
- ArH 358U Medicine and Magic in Romanesque Art 4
- ArH 359U Gothic Art and Architecture 4
- ArH 360U The Art of War: Representing the Crusades 4
- ArH 361U Northern Renaissance Art 4
- ArH 371U Italian Renaissance Art 4
- ArH 407 Art History Seminar 4
- ArH 432U Issues in Gender and Art 4
- Eng 319U Northern European Mythology 4
- Eng 340U Medieval Literature 4
- Eng 426 Advanced Topics in Medieval Literature 4
- ENG 447 Major Forces in Literature: Arthurian Literature 4
- Eng 448 Advanced Topics: Major Figures in Literature 4
- ENG 449 Advanced Topics in Cultural Studies: Medieval Women 4
- Fr 341U Literature and Culture of the Middle Ages and Renaissance Literature 4
- Ger 341U Introduction to German Literature 4
- Grk 101-203 First- and Second-year Greek 4
- Hst 319U/JSt 319U Rabbinic Culture in the Roman World 4
- Hst 350U English History from 1066 to 1660 4

Any course from the core list may count towards the elective requirements once the 12-credit core requirement has been fulfilled.

Hst 427: with different topics, may be repeated for credit
Hst 460: with different topics, may be repeated for credit

Students should take note of any prerequisites established by the respective departments.
Graduate Program

ADMISSION REQUIREMENTS

Master of Arts

The Department of History offers a Master of Arts degree. The degree program is designed to develop historians with special competence by systematic training in the content, methods, and interpretation of history. Although each degree program will vary, as will the individual’s purpose for pursuing graduate work, the same level of scholarly competence and intellectual attainment is expected of all students.

To be considered for admission to the graduate study, applicants normally should have the minimum preparation undertaken by an undergraduate major in history and should demonstrate good research and writing skills. Most students admitted to the program have maintained a GPA of at least 3.50 in upper-division history courses. Non-history majors or students with a lower history GPA may be considered for admission to the graduate program on a qualified basis. In addition to the University application for graduate studies, students are required to submit:

- Two letters of recommendation from faculty or other individuals who can evaluate their preparation for graduate studies,
- A statement of purpose, describing their objectives in graduate study,
- Two examples of their writing, preferably history research papers.

Foreign students must comply with the University requirements of a minimum grade of 550 in the Test of English as a Foreign Language (TOEFL).

Applications for fall-term admission are due by February 1.

HISTORY M.A.

See University master's degree requirements (p. 51). Specific departmental requirements for the M.A. in history are listed below.

ALL STUDENTS

For either track in history a minimum of 45 credits of approved graduate-level courses are required for the M.A. in history. Of these 45 credits students must complete a minimum of 32 credits in history, including HST 500 (Introduction to the Master’s Program in History) and at least one HST 591-HST 592 seminar sequence. Per university policy all students must complete the second language requirement outlined below. Students are strongly advised to take HST 500 in their first term of the program. Students will enter one of the following tracks.

Fr 341U: taught in French

Ger 341U: taught in German

Span 341U: taught in Spanish

All courses must be passed with a C- or better.

For advising concerning the minor, please consult the History Department office.
Students may enter either track at any time but they must still fulfill all of the requirements.

**THESIS TRACK**

Students in the thesis track must complete the following:

- Prepare a proposal outlining their area of study (defined geographically and / or thematically), any preparatory courses necessary for their thesis, and their thesis topic that must be approved by the student’s adviser, who must be a tenured or tenure-track faculty member of the History Department.

- Enroll in a minimum of 6 credits (a maximum of 9 may be counted towards the degree) of HST 503 (Thesis) in which they will complete their thesis.

- Defend the thesis in an oral examination before a committee comprising the thesis adviser and two other tenured or tenure-track members of the History Department, one of whom should be someone with whom the student has not taken a course. A fourth committee member from outside the History Department (if the adviser deems it necessary or advisable) may be added.

- After completing any necessary revisions, the student must submit the thesis to the Graduate School.

**EXAMINATION TRACK**

Students in the examination track must complete the following:

- A second HST 592.

- Prepare a proposal outlining an area of study (defined geographically and / or thematically), and any preparatory courses necessary for their written examination that must be approved by the student’s adviser, who must be a regular (tenured or tenure-track) faculty member of the History Department.

- Enroll in 4 credits of HST 506 (Project) during their final term before graduation in which they will complete their examination.

- Complete a written examination (while enrolled in HST 506) on their area of study which will be graded Pass or Fail by the adviser who must be a tenured or tenure-track member of the History Department.

**SECOND LANGUAGE**

Graduate Students should demonstrate proficiency in a second language no later than the point at which they have completed 32 credits of graduate study. Per university policy, proficiency may be demonstrated by successfully completing language coursework equivalent to PSU’s 203-level course, or by passing an examination administered for this purpose by the Department of World Languages and Literatures. However, some fields of research may require language preparation beyond the formal University requirements. All M.A. students are urged to consult their advisers about expectations for study of languages prior to or soon after admission to the program.

**PUBLIC HISTORY CONCENTRATION**

Students wishing to pursue a career in public history are urged to consider the department’s public history M.A. concentration. Coursework is comprised of a balance of classroom and practical offerings, including supervised internships. Students in the thesis track may select a thesis topic within the public history field and/or one that makes use of public history methods (i.e., oral or digital history). Students in the examination track may select public history as their field of study. In addition to fulfilling all other requirements for a Master of Arts in history in the track of their choosing, students are also required to complete the following:

1. **Required Courses**
   - Hst 593 Introduction to Public History 4
   (unless student has successfully completed this course as an undergraduate)

2. **A digital public history portfolio**
   To be approved by the student’s advisor and submitted to the department as documentation of the student’s public history work.

3. **One public history seminar**
   - Hst 594 Public History Seminar 4

4. **A minimum of 6 public history internship credits**
   - Hst 504 Public History Internship 6

5. **One public history lab course**
   - Hst 595 Public History Lab 4

**WORLD HISTORY CONCENTRATION**

A specialization in world history is available through the department’s world history M.A. concentration. Students pursuing the world history concentration must fulfill all the requirements for a M.A. in History, in the track of their choosing, as well as:

1. **8 credits of Hst 590 Comparative World History**

   An appropriate advisor-approved course can replace 4 credits of Hst 590.

2. **8 credits in fields other than that covered by the Hst 591-Hst 592 seminar.**
Indigenous Nations Studies
150 Parkmill Building (PKM)
503-725-5920
www.pdx.edu/indigenous-nations-studies/

- B.A., B.S. in Indigenous Nations and Native American Studies
- Minor in Indigenous Nations Studies

Indigenous Nations Studies (INST) is an interdisciplinary department with coursework drawn from emerging and Native scholars and interweaves Indigenous Ways of Knowing with elements from Anthropology, English, History, Public Administration, Social Work, and other departments and schools. The substantive focus of this curriculum is the sovereignty, scholarship and cultures of American Indians, Alaska Natives, and global Indigenous communities.

Undergraduate programs

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Indigenous Nations Studies' undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the program is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

INDIGENOUS NATIONS AND NATIVE AMERICAN STUDIES B.A., B.S.

The major in Indigenous Nations and Native American Studies (INNAS) is 56 credits.

The major focuses on critical studies and practices of Tribal race theory, decolonizing methodologies, traditional and cultural ecological knowledge, and contemporary themes, such as community health, food sovereignty, Indigenous land/resource management, community development, resilience, and self-determination.

NOTE: Other variable and special topic courses with a focus on Indigenous Nations, Native Americans, and American Indians/Alaska Natives may count as electives; in these instances students should consult with an INNAS advisor for approval.

The minimum grade allowed to pass major requirements will be 1.7 C-. P/NP grading option are by arrangement only and subject to department approval.

Total Credit Hours: 56

INDIGENOUS NATIONS STUDIES MINOR

The department offers a minor that is meant to serve three primary student constituencies:

- students who have a serious academic interest in Indigenous Ways of Knowing and who wish to combine the study of Native Epistemologies with their major;
- students who plan careers in non-profit, education, social services, tribal government, and academic sectors and wish to develop a diverse eye towards working with Native/Indigenous communities;
- students who have a nascent interest in Native/Indigenous communities and wish to fulfill their general education requirements with courses in this area.

The objective of the internship requirement is to place INST students in community or government organizations so that each student has an opportunity to acquire understanding of Native issues.

For information and advising, contact the Program Coordinator, Josh Powell at josh@pdx.edu.

Interdisciplinary Studies: Arts and Letters, Liberal Studies, Science, Social Science
503-725-3822
Suite 360 Fariborz Maseeh Fall (FMH)
• B.A., B.S. (Arts and Letters, Liberal Studies, Science, and Social Science)

Programs which are of an interdisciplinary nature and which do not conveniently fit within the normal department areas are listed under Interdisciplinary Studies and Liberal Studies.

Students interested in Interdisciplinary Studies will complete their major requirements by taking a concentration of courses in the arts and letters or science or social science academic areas. Students interested in all three categories (arts and letters, science, and social science) major in Liberal Studies by taking upper-division courses across all three categories.

Outside of the requirement that Interdisciplinary Studies and Liberal Studies students take Wr 323 or a Writing Intensive Course (WIC), there are no specific courses required for the Interdisciplinary Studies and Liberal Studies majors. To take full advantage of the opportunities afforded these majors, students should plan a program which includes a coherent set of courses providing an in-depth study in the area of special interest as well as providing enhancement of problem-solving and communication skills.

Undergraduate program

For advising in these majors, please go to: https://www.pdx.edu/advising/advising-locations.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Interdisciplinary Studies' undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

ARTS & LETTERS B.A./B.S.

For a list of courses under the Arts and Letters academic distribution area, review the Requirements website (p. 33).

<table>

| Additional credits in the major academic area | 20 |

Wr323 Writing as Critical Inquiry or WIC course 4

Courses used to satisfy the major requirements, whether taken at PSU or elsewhere, must be graded C- or above. A maximum of 12 credits may be graded P.

LIBERAL STUDIES B.A./B.S.

A student majoring in liberal studies must complete the general University requirements (except general education requirements), either Wr 323 or an approved Writing Intensive Course, and the following requirements for the liberal studies major:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Upper-division credits from the arts and letters, science and/or social science academic distribution areas</td>
<td>81</td>
</tr>
</tbody>
</table>

4 credits Wr 323, or an approved Writing Intensive Course which can be included in the 81 upper-division requirements.

Courses used to satisfy the major requirements, whether taken at PSU or elsewhere, must be graded C- or above. A maximum of 12 credits may be graded P.

Students majoring in Liberal Studies and also in a second major must meet the general education requirement and the upper-division requirement in the academic distribution areas for the second major.

SCIENCE B.A./B.S.

For a list of courses under the Science academic distribution area, review the Requirements website (p. 33).

<table>
<thead>
<tr>

</tbody>
</table>
Additional credits in the major academic area  20

WR 323 Writing as Critical Inquiry or WIC course  4

Courses used to satisfy the major requirements, whether taken at PSU or elsewhere, must be graded C- or above. A maximum of 12 credits may be graded P.

SOCIAL SCIENCE B.A./B.S.

For a list of courses under the Social Science academic distribution area, review the Requirements website (p. 33).

In addition to meeting all of the non-major and general education baccalaureate degree requirements, a student in one of the above majors must complete 52 credits in one of the following areas: arts and letters or science or social science. A minimum of 32 of the 52 credits must be upper-division with at least 8 upper-division credits in each of two departments. In addition to 52 credits, all students must take WR 323 or a Writing Intensive course for a total of 56 credits.

Courses

Upper-division credits from one department in the major academic area  8
Upper-division credits from a second department in the major academic area  8
Additional upper division credits from any department(s) in the major academic area  16
Additional credits in the major academic area  20

WR 323 Writing as Critical Inquiry or WIC course  4

Subtotal: 56

Courses used to satisfy the major requirements, whether taken at PSU or elsewhere, must be graded C- or above. A maximum of 12 credits may be graded P.

BILINGUAL TEACHER PATHWAY PROGRAM

The Bilingual Teacher Pathway program is an initial teacher licensure program designed for bilingual paraprofessionals/prospective teachers at the elementary level.

The program consists of 66-70 credits, including BTP core courses as well as requirements for the ESOL endorsement, which are offered in a 2-year cohort model beginning every Fall term. Prior to starting this program at either the undergraduate or graduate level, students are required to complete MTH 211, MTH 212, MTH 213, and LIB 428 (or an equivalent course in children’s literature) with grades of B- or better, which amounts to at least 15 credits of prerequisites.

For a student to enter this program at the undergraduate level, they are expected to have earned a minimum of 120 credits total, including those prerequisite courses, WR 323 (or another 4-credit upper division writing intensive course), and at least 15 upper division credits in the academic distribution areas of Arts & Letters, Science, and Social Science, which can include credits from WR 323.

Undergraduate credits can be applied toward the bachelor’s degree in Liberal Studies. www.pdx.edu/ci/btp.

Undergraduate programs

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Judaic Studies’ undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the program is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

JUDAIC STUDIES B.A.

A bachelor's degree in Judaic Studies from Portland State University prepares you to succeed in our interconnected world of diverse cultures and religions.

In the Harold Schnitzer Family Program in Judaic Studies, we take the 3,000-year-long history and culture of the Jews as our point of our departure for grappling with urgent
human questions about justice and knowledge, tradition and change, and crisis and resilience. Truly interdisciplinary, the Judaic Studies major explores topics in history, English literature, Hebrew language, religion, and film studies.

We welcome students of all backgrounds who seek an intensive liberal arts experience. Our faculty offer close mentoring to support your success. Our partnerships provide opportunities for internships, study abroad and scholarships.

Students pursuing the major in Judaic Studies gain broad exposure to the study of Jews and Judaism in multiple historical and geographical contexts, from ancient Israel to 21st-century America. Through a combination of courses, lectures, research symposia, scholarly conferences, and cultural events, you will gain a unique insight into the roles of religion and culture in society. We offer:

• An Intimate Learning Environment: You’ll enjoy small classes taught by our scholar-teachers who foster the kind of close-knit academic community usually associated with small liberal arts colleges, all nestled within a major urban university.

• Exciting Opportunities for Study Abroad in Israel: The Lorry I. Lokey Endowed Fund for Israel Scholarship provides up to $5,000 annually for a Judaic Studies major to travel to and study abroad in Israel.

• Funded Internships at Local Community Organizations: The Sara Glasgow Cogan Memorial Internship provides you with the opportunity to gain real-world experience with community partners.

• Generous Scholarships: We offer several scholarships for students majoring in Judaic Studies, from $500 to $7,000 annually.

Graduates with a bachelor’s degree in Judaic Studies go on to fulfilling professions in education, community and social services, the rabbinate and ministry, research, the arts, marketing, consulting, and law. You will develop marketable skills perennially relevant in the future of work:

• Critical thinking and problem-solving

• Ability to communicate ideas clearly and compellingly

• Cultural intelligence and global perspective

• Analytical acumen

• Leadership, empathy, and collaboration

DEGREE REQUIREMENTS

Requirements for major. In addition to meeting the general University degree requirements, the major in Judaic Studies must meet the departmental requirements listed.

Upper-Division Courses

At least 12 of the upper division credits must be comprised of Judaic Studies program courses in one of the following areas:

Area A: Jews in Antiquity

<table>

Total Credit Hours: 60

JUDAIC STUDIES MINOR

Portland State University offers a conceptually structured yet flexible undergraduate minor in Judaic Studies. Students completing the minor will have gained exposure to the study of Jewish history and culture in a variety of national and international contexts. Students completing the minor are required to take Introduction to Judaism and at least one term of the two-term sequence in Jewish history, as well as coursework dealing with Jews and Judaism in Europe, Israel, and the United States, the major historical centers of Jewish life in the modern period. Students are also required to take coursework focusing on Jewish history or culture prior to the modern period (defined as 1700 and earlier). Through exploration of Jewish culture, Jewish contributions to other cultures, and the impact of modernity on national, ethnic, and religious identity, students will have broadened and deepened their education, better preparing them for our interconnected world of diverse cultures and religions.

Students undertaking the minor in Judaic Studies at PSU may be eligible for the Sara Glasgow Cogan Memorial Scholarship and the Abigail Jacobs-Kaufman Scholarship.

REQUIREMENTS

To earn a minor in Judaic studies a student must complete 28 credits, at least 16 credits of which must be upper-division courses, and at least 12 credits of which must be taken in residence at PSU. These 28 credits must include the following:

Courses
JSt 201 Introduction to Judaism 4
Area electives (see below) 12
Advisor-approved electives (see below) 12

Subtotal: 28

Area electives must include at least 4 credits of coursework from the list of electives above (see requirements for the major) focusing on each of the following categories:

Jewish history/culture in the United States 4
Jewish history/culture in the State of Israel 4
Jewish history/culture prior to 1700 4

Subtotal: 12

Approved Electives

Advisor-approved electives may include up to 4 credits of coursework not on the list of approved electives, but which has a conceptual, topical, or methodological relevance to the discipline of Judaic studies. Up to 8 credits of Heb 203 or higher may be applied.

For information about special by-arrangement courses, and for-credit academic internship opportunities with local cultural and community institutions such as the Oregon Jewish Museum, contact the program adviser.

Fariborz Maseeh Department of Mathematics + Statistics
460 Fariborz Maseeh Hall (FMH)
503-725-3621
www.pdx.edu/math/
• B.A., B.S. in Mathematics
• B.S. in Data Science
• Minor in Mathematics
• Minor in Mathematics for Middle School Teachers
• Mathematics for Teaching License Requirements
• Graduate Certificate for Middle School Mathematics Teachers
• Graduate Certificate in Applied Statistics
• M.A., M.S. in Mathematics
• M.S. in Statistics
• M.S. in Mathematics for Teachers
• Ph.D. in Mathematical Sciences
• Ph.D. in Mathematics Education

**Undergraduate programs**

The mathematical sciences have long provided the proper language of the physical sciences and engineering, and they are playing an increasingly important role in areas as diverse as data science, computer science, the social sciences, business administration and economics, and the biological and medical sciences. Many are drawn to the study of mathematics and statistics precisely because of this broad applicability. Others are attracted by the rigorous training these disciplines provide in abstract reasoning, and the many surprising results and elegant arguments they encounter. The department offers a wide variety of courses in mathematics and statistics to meet the needs of a student body having very diverse interests. Anyone who would like to learn more about the department’s faculty, programs, courses, activities and other services is encouraged to explore the department website, or visit the department office.

**DEGREE MAPS AND LEARNING OUTCOMES**

To view the degree maps and expected learning outcomes for undergraduate degrees in mathematics and data science, go to [https://www.pdx.edu/math/bachelor-arts-bachelor-science-mathematics](https://www.pdx.edu/math/bachelor-arts-bachelor-science-mathematics) and [https://www.pdx.edu/math/bachelor-science-data-science](https://www.pdx.edu/math/bachelor-science-data-science).

**ADMISSION REQUIREMENTS**

In order to help students plan their programs, the Fariborz Maseeh Department of Mathematics and Statistics provides placement assistance and the opportunity to meet with a faculty adviser. All students are urged to avail themselves of these services, especially those students who are enrolling in their first mathematics or statistics courses.

Students interested in majoring in mathematics and/or data science are urged to meet with a departmental adviser. Students who have decided to major in mathematics and/or data science should inform both the department and the registrar’s office of that decision. Mathematics and data science majors are encouraged to participate in the activities of the department and to meet on a regular and continuing basis with a departmental adviser.

**MATHEMATICS B.A./B.S.**

The degree program requires a basic core of courses (44 credits) and elective courses (18-21 credits). This structure gives flexibility to the program that allows students to pursue special areas of interest in mathematics. The program is designed to provide a foundation for more advanced work and/or a basis for employment in business, government, industry, or secondary education.

**REQUIREMENTS**

In addition to meeting the general University degree requirements, the major in mathematics must complete the following requirements:

**Courses**

Stat 468  Applied Probability II  3

Check with the department for the list of approved Mth or Stat sequences and for additional courses, including omnibus-numbered courses, which may be approved as electives.

All courses used to satisfy the mathematical major requirements, whether taken in the department or elsewhere, must be graded C-, P, or above, but no more than 4 courses graded P will count toward these requirements. Transfer students majoring in mathematics are required to take a minimum of 15 credits of PSU upper-division mathematics or statistics courses in residence.

MATHEMATICS B.A./B.S. OPTIONS

In addition to the specific required courses (p. 282), the following options are intended to help the student plan a program of study with a specific goal or career in mind.

Option I—Applied Mathematics

Recommended electives:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mth 322</td>
<td>Applied Partial Differential Equations</td>
<td>4</td>
</tr>
<tr>
<td>Mth 343</td>
<td>Applied Linear Algebra</td>
<td>4</td>
</tr>
<tr>
<td>Mth 371</td>
<td>Large-Scale Data Algorithms</td>
<td>4</td>
</tr>
<tr>
<td>Mth 421</td>
<td>Theory of Ordinary Differential Equations I</td>
<td>3</td>
</tr>
<tr>
<td>Mth 422</td>
<td>Theory of Ordinary Differential Equations II</td>
<td>3</td>
</tr>
<tr>
<td>Mth 424</td>
<td>Elementary Differential Geometry I</td>
<td>3</td>
</tr>
<tr>
<td>Mth 425</td>
<td>Elementary Differential Geometry II</td>
<td>3</td>
</tr>
<tr>
<td>Mth 427</td>
<td>Partial Differential Equations I</td>
<td>3</td>
</tr>
<tr>
<td>Mth 428</td>
<td>Partial Differential Equations II</td>
<td>3</td>
</tr>
<tr>
<td>Mth 430</td>
<td>Topics in Mathematical Modeling</td>
<td>3</td>
</tr>
<tr>
<td>Mth 451</td>
<td>Numerical Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>Mth 452</td>
<td>Numerical Calculus II</td>
<td>3</td>
</tr>
<tr>
<td>Mth 457</td>
<td>The Mathematical Theory of Games I</td>
<td>3</td>
</tr>
<tr>
<td>Mth 458</td>

</tbody>
</table>

**MATHEMATICS AND STATISTICS HONORS TRACK**

The Honors Track in Mathematics and Statistics offers an opportunity for outstanding mathematics majors to engage in independent research under the supervision of a faculty member. Students who successfully complete the honors track will receive notice of this distinction on their academic transcripts and on their diplomas.

The requirements for admission to the Mathematics and Statistics Honors Track are:

1. Completion of 12 credits in the Fariborz Maseeh Department of Mathematics and Statistics, 4 of which should be at a 300-level or above;
2. A minimum cumulative GPA of 3.5 points and a minimum GPA of 3.67 points in the mathematics major;
3. A complete application form submitted to the Fariborz Maseeh Department of Mathematics and Statistics no later than three quarters before graduation.

**Requirements**

The Mathematics and Statistics Honors Track requirements for graduation are:

**Courses**

<td>Approved 300- or 400-level elective course</td>
</tr>
</tbody>
</table>

The chair of the Fariborz Maseeh Department of Mathematics and Statistics, in consultation with faculty, will assign the student a faculty honors project adviser to guide their research. The research topic will be at a 400-level or above and will not have been discussed or presented in courses the students have taken. Concluding the work, the students will give an oral presentation of the honors project to faculty and students.

Students must have a cumulative GPA no lower than 3.5 points and a GPA no lower than 3.67 points in the major.

No mathematics or statistics courses taken under the undifferentiated grading option are acceptable towards fulfilling the requirements for the Mathematics and Statistics Honors Track. Transfer students majoring in mathematics are required to take a minimum of 15 credits of PSU upper-division mathematics or statistics courses in residence.

The chair and an undergraduate adviser will monitor the progress of the students accepted in the Mathematics and Statistics Honors Track. If this progress and/or performance are found to be unsatisfactory and if corrective actions cannot be identified, the students will be dropped from the Mathematics and Statistics Honors Track (the students may opt out to pursue a regular mathematics major or to select another major).

**University Honors College Students**

Students in the University Honors College majoring in mathematics have two options for completing their Honors thesis project:

**Option 1**: Apply to join the Mathematics Departmental Honors Track program, complete the required coursework, and register for Hon 403: Thesis Prospectus (4 credits) in the quarter immediately preceding the Mth 401: Honors Project (3 credits). During the thesis prospectus course students will work with their mathematics honors project adviser in the department of Mathematics and Statistics to identify a research question and topic, which they will then carry out during the quarter they are registered for Mth 401. University Honors College will accept the Mth 401 credits in lieu of additional Hon 403 thesis credits. The Mth 401 research project will fulfill the honors thesis requirement. (Students are permitted to register for Hon
403: Thesis Continuation credits if they would prefer additional support or credit hours.) Students are required to give an oral presentation of their completed research projects to faculty and students in the Mathematics and Statistics department as well as at the Honors Thesis symposium for University Honors College faculty and students. Students earn both Mathematics Departmental Honors and University Honors.

**Option 2:** University Honors College students who do not meet the minimum requirements or who choose not to join the Mathematics Departmental Honors Track program must still fulfill the requirements of two approved 400 level sequences in mathematics and/or statistics. They are then eligible to proceed with the math honors research project, taking Hon 403: Thesis Prospectus and then Mth 401: Honors Project under the supervision of a Mathematics and Statistics faculty adviser. Students earn University Honors but not Departmental Honors.

Subtotal: 62-63

**B.S. IN DATA SCIENCE**

The degree program requires a basic core of courses (61 credits) and elective courses (12-15 credits). This structure gives flexibility to the program that allows students to pursue special areas of interest in applications of data science. The program is designed to provide a foundation for more advanced work and/or a basis for employment in business, industry, and government.

**REQUIREMENTS**

In addition to meeting the general University degree requirements, the major in data science must complete the following requirements.

**Courses**

<table>
<thead>

Check with the department for the list of additional courses, including omni-numbered courses, which may be approved as electives.

**Approved Mth/Stat Electives are:**

| Mth 451 | Numerical Calculus I  | 3      |
| Mth 452 | Numerical Calculus II | 3      |
| Mth 453 | Numerical Calculus III| 3      |
| Mth 461 | Graph Theory I        | 3      |
| Mth 462 | Graph Theory II       | 3      |
| Mth 464 | Numerical Optimization I | 3      |
| Mth 465 | Numerical Optimization II | 3     |
| Stat 461  | Introduction to Mathematical Statistics I | 3 |
| Stat 462  | Introduction to Mathematical Statistics II | 3 |

**Approved electives from other disciplines are:**

| Actg 335 | Accounting Information Systems and Analytic Fundamentals | 4 |
| Comm 389U | Communication | 4 |
| CS 430P | Internet, Web, & Cloud Systems | 4 |
| CS 441   | Artificial Intelligence                       | 4       |
| CS 445   | Machine Learning                             | 4       |
| G 324    | Data Management and Analysis                 | 5       |
| GSCM 412 | Introduction to Enterprise                   | 4       |
| ISQA 481 | Blockchain Fundamentals                      | 4       |
| Mgmt 442 | Human Resources Information                  | 4       |
| PHE 350  | Health and Health Systems                    | 4       |
| PHE 427  | Introduction to Health                       | 4       |
| PHE 450  | Epidemiology                                 | 4       |
| Phil 314U | Computer Ethics                             | 4       |

**Total Credit Hours: 73-76**

All courses used to satisfy the data science major requirements, whether taken in the department or elsewhere, must be graded C-, P, or above, but no more than 4 courses graded P will count toward these requirements. Transfer students majoring in data science are required to take a minimum of 15 credits of PSU
upper-division mathematics or statistics courses in residence.

MATHEMATICS MINOR

Mathematics is one of the original liberal arts. For centuries, since the time of Plato’s Academy, the study of mathematics has been one of the hallmarks of being well educated. The skills that are learned in mathematics and statistics classes are especially valued in today’s world. Whether a student’s program is philosophy, business, fine art, physics, or engineering, it will be more valuable if a strong program in mathematics and statistics accompanies it.

REQUIREMENTS

A student must complete the following program (3 upper-division courses must be taken in residence at PSU):

<table>
<thead>
<tr>
<th>Courses</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Mth 251 Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>Mth 252 Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>Mth 253 Calculus III</td>
<td>4</td>
</tr>
<tr>
<td>Mth 261 Introduction to Linear Algebra</td>
<td>4</td>
</tr>
<tr>
<td>Mth 254 Calculus IV</td>
<td>4</td>
</tr>
<tr>
<td>Mth 311 Introduction to Mathematical Analysis I or Introduction to Group Theory and Applications</td>
<td>4</td>
</tr>
<tr>
<td>Mth 344</td>
<td></td>
</tr>
</tbody>
</table>

Approved electives for the Minor in Mathematics are:

<table>
<thead>
<tr>
<th>Courses</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Mth 255 Calculus V</td>
<td>4</td>
</tr>
<tr>
<td>Mth 256 Applied Ordinary Differential Equations</td>
<td>4</td>
</tr>
<tr>
<td>Mth 311 Introduction to Mathematical Analysis I</td>
<td>4</td>
</tr>
<tr>
<td>Mth 312 Introduction to Mathematical Analysis II</td>
<td>4</td>
</tr>
<tr>
<td>Mth 344 Introduction to Group Theory and Applications</td>
<td>4</td>
</tr>
<tr>
<td>Stat 351 Probability and Statistics for Electrical and Computer Engineering</td>
<td>4</td>
</tr>
</tbody>
</table>

or any course approved as an elective for major credit.

Total Credit Hours: 33-36

MATHEMATICS FOR MIDDLE SCHOOL TEACHERS MINOR

This mathematics minor is intended for those who plan to enter a Graduate Teacher Education Program and be licensed in middle school mathematics (grades 5-9).

REQUIREMENTS

A student must complete the following program (12 credits must be upper-division; 9 of these 12 upper-division credits must be taken in residence at PSU):

<table>
<thead>
<tr>
<th>Courses</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Mth 211 Foundations of Elementary Mathematics I</td>
<td>4</td>
</tr>
<tr>
<td>Mth 212 Foundations of Elementary Mathematics II</td>
<td>4</td>
</tr>
<tr>
<td>Mth 213 Foundations of Elementary Mathematics III</td>
<td>4</td>
</tr>
<tr>
<td>Mth 491 Experimental Probability and Statistics for Middle School Teachers</td>
<td>4</td>
</tr>
<tr>
<td>Mth 493 Geometry for Middle School Teachers</td>
<td>4</td>

Total Credit Hours: 36

Only grades of C-, P, or above count toward satisfying the department minor requirements. No more than three courses with a grade of P may be counted toward these requirements.

MATHEMATICS FOR TEACHING LICENSE REQUIREMENTS

To receive a teaching license from PSU, after completing a baccalaureate degree a student must complete the Graduate Teacher Education Program (GTEP) (p. 146) through the College of Education.

Below is a list of the minimal mathematics/statistics coursework required for individuals needing a Departmental Recommendation to enter the Graduate Teacher Education Program (GTEP) in Advanced Mathematics and in Foundational Mathematics. GTEP is a program in the College of Education, but these mathematics/statistics prerequisites are taken in the
Fariborz Maseeh Department of Mathematics and Statistics. A bachelor's degree is also required by GTEP, although not necessarily in mathematics. One may apply for the GTEP program before completing all coursework, but coursework must be completed before entrance to GTEP.

SECONDARY EDUCATION PROGRAM REQUIREMENTS FOR THE ADVANCED MATHEMATICS

The program must include the following courses or approved substitutions required by the Fariborz Maseeh Department of Mathematics and Statistics (12 courses).

**Graduate programs**

The Fariborz Maseeh Department of Mathematics and Statistics offers work leading to the degrees of Master of Arts, Master of Science, the Ph.D. in Mathematical Sciences and the Ph.D. in Mathematics Education as well
as the Graduate Certificate for Middle School Mathematics Teachers and the Graduate Certificate in Applied Statistics.

**MATHEMATICS M.A./M.S.**

The Master of Arts/Master of Science in Mathematics program is designed for the student who wishes to prepare for community college teaching, employment in government or industry, or further advanced work toward a Ph.D. in mathematics.

**ADMISSION:**

**Program prerequisites:**

Transcript(s) must show satisfactory completion of at least the following undergraduate courses: Differential Equations, Linear Algebra, Introductory Analysis/Advanced Calculus, and Abstract Algebra/Group Theory. These are equivalent to the following PSU courses: Mth 256, Mth 261, Mth 311 and Mth 344.

In addition to program prerequisites, applicants must meet the university's minimum admission requirements including English language proficiency.

This program currently offers rolling admissions. See instructions on how to apply: https://www.pdx.edu/math/graduate-application-instructions

**DEGREE REQUIREMENTS**

Candidates must complete an approved 45-credit program that includes at least 30 credits in mathematics or statistics. Students shall select either Option A or Option B.

Option A: The student must satisfy the following requirements:

- Complete 30 credits in Mathematics and Statistics which include approved courses distributed as follows: two 6-credit sequences at the 600 level, 6 additional credits at the 600-level, and a 3-credit Mth 501 course on Mathematical Literature and Problems;
- Pass one written Master's examination in either Algebra or Analysis.

Option B: The student must satisfy the following requirements:

- Complete 30 credits in Mathematics and Statistics which include approved courses distributed as follows: two 6-credit sequences at the 600 level, 6 additional credits at the 600-level;
- Pass two written Master's examinations, one of which must be in either Algebra or Analysis.

Regardless of the option, students interested in pursuing the M.A. degree must also show proficiency in a second language.

A student must have a minimum 3.00 GPA on the courses applied to the program of study, as well as a minimum 3.00 GPA in all graduate-level courses taken at PSU. Although grades of C+, C, and C- are below the graduate standard, they may be counted as credit toward a master's degree with the specific written approval of the department if taken at PSU after the term of formal admission to the graduate program. All courses counting toward the degree must be letter-graded. The pass/no pass option is not allowed.

Students are responsible for knowing University-level graduate policies and procedures for obtaining the degree. These policies and procedures are in the Graduate School section of the PSU Bulletin. Several of the most frequently asked about University-level graduate policies and procedures can also be found on the Graduate School website.

</table>

"Approved as elective" means that it is approved inside the 45 total credit hours but not inside the 30 mathematics/statistics credit hours. Check with the program adviser for additional approved electives.

**MA/MS EXAMINATIONS**

Depending on the option chosen, students must pass one or two Master’s exams.
Option A: Student must pass one written examination in either Algebra or Analysis.

Option B: Student must pass two written examinations, one of which must be in either Algebra or Analysis. Other subject areas include: Geometry, Mathematical Statistics, Numerical Methods, Ordinary Differential Equations, Partial Differential Equations and Set Theory/Topology.

Exams are offered twice a year, during the week prior to the start of fall term and during the first week of spring term. Students may take a given area examination at most two times. Students must be registered for and complete at least one graduate credit during the term(s) in which they take an exam. For complete details see the full MS Exam Policy (https://www.pdx.edu/math/ms-exam-policy).

MTH 501 MATHEMATICAL LITERATURE AND PROBLEMS

In this 3-credit course, a student works under the supervision of a faculty member in an area of mathematics in which the student has acquired the background needed to read current mathematical literature, prepare a research paper, and present this research in a colloquium. Requirements for the course are contained in the Guidelines and Deadlines for Literature and Problems Seminar which is also available in the department office. Please note that you must be registered for at least one graduate credit during the term in which you plan to present your 501 research.

PLANNING AN MA/MS MATHEMATICS DEGREE PROGRAM

The department offers courses in pure and applied mathematics and in statistics. Students may choose an emphasis in one or more of these areas. The Course Projection Guide (CPG: https://app.banner.pdx.edu/cpg/) lists the projected future 600-level course offerings. These projections enable students to plan programs that include any necessary 500-level prerequisites. Students also need to plan programs that will prepare them to pass one MA/MS examination or two MA/MS examinations depending on the degree option. New students are urged to meet with the MA/MS adviser regarding degree requirements and for help with program planning.

STATISTICS M.S.

The Master of Science in Statistics program is designed for students who wish to pursue careers as practicing statisticians in industry, government, or academia. It is also designed to prepare students for community college teaching or entry into a Ph.D. in Statistics degree program. The degree is also valuable for people working in other fields who need mastery of a broad range of statistical methods.

ADMISSION

Program prerequisites

Transcript(s) must show successful completion of at least the following undergraduate courses: Advanced Statistical Methods, Introductory Analysis/Advanced Calculus, Linear Algebra, and Differential Equations. These courses are equivalent to PSU's Stat 452 or higher, Mth 311, Mth 261, and Mth 256.

In addition to program prerequisites, applicants must meet the university's minimum admission requirements including English language proficiency.

This program admits once per year for fall term only. See instructions on how to apply: https://www.pdx.edu/math/graduate-application-instructions.

DEGREE REQUIREMENTS

Candidates must complete an approved 45-credit program, which includes at least 33 core credits in courses with the Stat prefix. In addition, students must pass two examinations, one in Mathematical Statistics and one in Applied Statistics.

A student must have a minimum 3.00 GPA on the courses applied to the program of study, as well as a minimum 3.00 GPA in all graduate-level courses taken at PSU. Although grades of C+, C, and C- are below the graduate standard, they may be counted as credit toward a master’s degree with the specific written approval of the department if taken at PSU after the term of formal admission to the graduate program.

Students are responsible for knowing University-level graduate policies and procedures for obtaining the degree. These policies and procedures are in the Graduate School section of the PSU Bulletin. Several of the most frequently asked about University-level graduate policies and procedures can also be found on the Graduate School website.

CORE REQUIREMENTS (33 CREDITS)

The 33 core credits must include courses distributed as follows:

Two 9-credit sequences:
- Stat 561 Mathematical Statistics I 3
- Stat 562 Mathematical Statistics II 3
- Stat 563 Mathematical Statistics III 3
- Stat 564 Applied Regression Analysis 3
- Stat 565 Experimental Design: Theory and Methods I 3
- Stat 566 Experimental Design: Theory and Methods II 3
Topics in Statistical Consulting (3 credits)
Stat 570  Statistical Consulting  1-3
Stat 570 is currently offered during Spring term only.

STAT 501 Statistical literature and problems (3 credits)
Stat 501  Research  1-6

One 9-credit sequence chosen from
Stat 661  Advanced Mathematical Statistics I  3
Stat 662  Advanced Mathematical Statistics II  3
Stat 663  Advanced Mathematical Statistics III  3
or
Stat 664  Theory of Linear Models I  3
Stat 665  Theory of Linear Models II  3
Stat 666  Theory of Linear Models III  3
or
Mth 667  Stochastic Processes and Probability Theory I  3
Mth 668  Stochastic Processes and Probability Theory II  3
Mth 669  Stochastic Processes and Probability Theory III  3
Stat 671  Statistical Learning I  3
Stat 672  Statistical Learning II  3
Stat 673  Statistical Learning III  3
CS 545  Machine Learning  3
Ec 572  Time Series Analysis and Forecasts  4
USP 655  Advanced Data Analysis: Structural Equation Modeling  3
Psy 526  Multilevel Regression  4

Other statistically oriented courses outside the Department and other mathematics courses may be substituted, but must be approved as electives by the statistics graduate program adviser. "Approved as elective" means that it is approved inside the 12 elective credit hours but not inside the 33 statistical credit hour core requirements. A course or sequence cannot be counted both within the 33-hour core and as an elective course or sequence.

ELECTIVES (12 CREDITS)
A total of 12 elective credit hours must be completed. The following list of courses is pre-approved for elective credit.

Stat 571  Applied Multivariate Statistical Analysis  3
Stat 572  Bayesian Statistics  3
Stat 576  Sampling Theory and Methods  3
Stat 577  Categorical Data Analysis  4
Stat 578  Survival Analysis  3
Stat 580  Nonparametric Methods  3
Stat 661  Advanced Mathematical Statistics I  3
Stat 662  Advanced Mathematical Statistics II  3
Stat 663  Advanced Mathematical Statistics III  3
Stat 664  Theory of Linear Models I  3
Stat 665  Theory of Linear Models II  3
Stat 666  Theory of Linear Models III  3
Stat 567  Applied Probability I  3
Stat 568  Applied Probability II  3
Mth 667  Stochastic Processes and Probability Theory I  3
Mth 668  Stochastic Processes and Probability Theory II  3
Mth 669  Stochastic Processes and Probability Theory III  3
Stat 671  Statistical Learning I  3
Stat 672  Statistical Learning II  3
Stat 673  Statistical Learning III  3
CS 545  Machine Learning  3
Ec 572  Time Series Analysis and Forecasts  4
USP 655  Advanced Data Analysis: Structural Equation Modeling  3
Psy 526  Multilevel Regression  4

MS EXAMINATIONS
Students must pass two examinations, one in Mathematical Statistics which covers Stat 561, Stat 562, Stat 563 and one in Applied Statistics which includes the core topics covered in Stat 564, Stat 565, and Stat 566. Examinations are offered twice a year, the week prior to the start of fall term and during the first week of spring term. Students may take any examination at most two times. Students must be registered for and complete at least one graduate credit during the term(s) in which they take an exam. For complete details see the full MS Exam Policy (https://www.pdx.edu/math/ms-exam-policy).

Grading Policy for the MS Exam in Applied Statistics
The Applied Statistics Exam is comprised of two components:
1. Applied regression analysis
2. Design of experiments and ANOVA

Both components consist of a written exam portion and a separate, in-laboratory, statistical computing applications portion. The Applied Statistics Exam may be repeated once; that is, a maximum of two tries is permitted.

A Pass (P) or Fail (F) is given on each component.
- Two P’s equals a PASS on the exam.
- One P equals a CONDITIONAL PASS on the exam.

The Examination Committee will inform the student of the requirements for removal of the Conditional.
• Two F’s equal a FAIL on the exam. In this case the entire exam must be retaken.

STAT 501 STATISTICAL LITERATURE AND PROBLEMS

In this required 3 credit course for the MS in Statistics, a student works under the supervision of a faculty member in an area of probability and statistics in which the student has acquired the background needed to read current probability and statistical literature, prepare a research paper, and present this research in a colloquium. Requirements for the course are contained in the handout: Guidelines and Deadlines for Stat 501 Statistical Literature and Problems.

PLANNING AN MS DEGREE PROGRAM

The Course Projection Guide (CPG, https://app.banner.pdx.edu/cpg/) lists the projected future 600-level course offerings. These projections enable students to plan programs that include any necessary 500-level prerequisites. Students also need to plan a program that will prepare them to pass the two MS examinations. Students entering the program with core courses Stat 561, Stat 562, Stat 563 and Stat 564, Stat 565, Stat 566 successfully completed and considering future pursuit of the Ph.D. are encouraged to take Mth 511, Mth 512 and in addition to the required 600 level sequence, at least one additional sequence from among Stat 661, Stat 662, Stat 663, Stat 664, Stat 665, Stat 666, and Mth 667, Mth 668, Mth 669. All students are urged to meet with the graduate program advisor regarding degree requirements and for help with program planning.

MATHEMATICS FOR TEACHERS M.S.

The M.S. in Mathematics for Teachers (MS-MTCH) is designed for individuals interested in strengthening their understanding of mathematics to enrich the teaching of mathematics. The program prepares teachers in subjects such as geometry, algebra, analysis/calculus, history of mathematics, probability, statistics, discrete mathematics, and use of technology in the classroom. The program is intended for individuals with a mathematics degree or a strong background in mathematics.

The M.S. in Mathematics for Teachers program offers advanced training and specialized courses for secondary school teachers of mathematics. The MS-MTCH does not lead to a teaching license. If you are interested in teaching secondary mathematics, please contact the School of Education, GTEP program.

ADMISSION

Program prerequisites:

Transcript(s) must show satisfactory completion of at least the following undergraduate courses: Linear Algebra, Introductory Analysis/Advanced Calculus, College Geometry, and Abstract Algebra/Group Theory. These courses are equivalent to PSU’s Mth 261, Mth 311, Mth 338, and Mth 344. Undergraduate courses in introductory statistics and discrete mathematics are recommended.

In addition to program prerequisites, applicants must meet the university's minimum admission requirements including English language proficiency.

This program currently offers rolling admissions. See instructions on how to apply: https://www.pdx.edu/math/graduate-application-instructions

DEGREE REQUIREMENTS:

An MS-MTCH candidate must complete an approved program of 45 graduate credits which includes a mathematics curriculum project.

A student must have a minimum 3.00 GPA on the courses applied to the program of study, as well as a minimum 3.00 GPA in all graduate-level courses taken at PSU. Although grades of C+, C, and C- are below the graduate standard, they may be counted as credit toward a master’s degree with the specific written approval of the department if taken at PSU after the term of formal admission to the graduate program. For the MS-MTCH program, all courses must be graded A-F. The pass/no pass grading option is not allowed.

Students are responsible for knowing University-level graduate policies and procedures for obtaining the degree. These policies and procedures are in the Graduate Studies section of the PSU Bulletin. Several of the most frequently asked about University-level graduate policies and procedures can also be found on the Graduate School website.

History/Foundations of Math (3 credits)
Mth 586 Topics in The History of Mathematics 2-3

Discrete Math (3 credits)
Mth 587 Topics in Discrete Mathematics for Mathematics Teachers 2-3

Computing (3 credits)
Mth 588 Topics in Computing for Mathematics Teachers 1-3

Math Education (3 credits)
Mth 589 Topics in Mathematical Exposition and Curriculum Development or Approved graduate mathematics education course 3

Curriculum Project (3 credits)
Mth 501 Curriculum Research, Mathematics 3

Mathematics Electives (9 credits)
Approved graduate-level mathematics courses or statistics courses.

University Electives (6 credits)
Graduate-level courses (Mathematics, Education, or other) approved by the MS-MTCH program adviser.

Alternative math/stat courses may be substituted with approval from the MS-MTCH program adviser. Note also that many of these courses are "Topics" courses, and with MS-MTCH adviser approval may be repeated for credit.

For those in MEd/GTEP program, consult with the MS-MTCH program adviser for Dual-Degree option.

Courses at the 700 and 800 level are not acceptable in this degree program.

MTH 501 MATHEMATICS CURRICULUM PROJECT

As part of the degree requirements, the student will complete a mathematics curriculum project. In this independent research project, the student will explore a mathematical topic and will develop and classroom-test curriculum materials related to that topic. Under the guidance of a faculty member, the student will prepare a research paper and present this research in a colloquium. Requirements for the course are contained in the handout: M.S. in Mathematics for Teachers’ Curriculum Projects.

Planning a MS-MTCH Degree Program:

Many of the courses are offered on a three-year cycle. Refer to the Course Projection Guide (CPG, https://app.banner.pdx.edu/cpg/). It is important to take as many of the required courses as you can prior to choosing elective courses. Also, start thinking about the 501 Math Curriculum Project early in your program. It generally takes at least three terms to narrow in on a topic, choose a 501 adviser, put a project committee together, do the background research, develop the materials and test them with students, evaluate the results, finish the entire paper, and make a public presentation of your work. Meeting with the MS-MTCH program adviser to plan your degree will make the process much smoother. Additional degree planning tips can be found on the Crucial Issues in Your MS in Mathematics for Teachers Program.

MATHEMATICAL SCIENCES PH.D.

The Ph.D in Mathematical Sciences at Portland State University is a research degree. It aims to develop student's ability to conduct and share original research. The program is flexible, learner driven, and provides participants with a structured environment, professional guidance, and advising support. Mathematical Sciences at PSU encompass a wide range of specialties as can be seen from our faculty profiles webpage. Traditionally at PSU, students often engage in interdisciplinary research work and take graduate courses in other departments. The program prepares for academic professions as well as a broad range of non academic professions. Indeed, Mathematical Sciences form an integral part of emerging fields such as computational medicine/biology, artificial intelligence, information security, and e-sciences. In today’s data-intensive world, Mathematical Sciences allow to answer questions and solve problems in areas as diverse as economics and finance, government and law, the arts and music, medicine, weather and air quality forecasting, climate modeling, and national defense in addition to its traditional application in the physical sciences. The program is flexible, learner driven, and provides participants with a structured environment, professional guidance, and advising support.

The program accommodates a broad range of interdisciplinary partners. Students choose a main concentration within the Mathematical Sciences as well as a secondary concentration. This secondary concentration can be chosen within the Mathematical Sciences or alternatively, within the natural sciences, social sciences, or engineering. Typical examples of secondary concentrations outside of Mathematical Sciences include Computer science, Engineering, Physics, Biology, Economics, Systems Science, Finance, Urban Studies and Planning, Public Health and Medicine.

ADMISSION

Program prerequisites:

Applicants for admission to the Mathematical Sciences Ph.D. program will be expected to have completed an undergraduate degree with the equivalent of a bachelor's
degree in Mathematics or Statistics containing an adequate background in Computer Science. Applicants with degrees in related disciplines will be considered provided the applicant demonstrates a strong mathematical proficiency. Admission to the program requires that the department find the applicant prepared to undertake study leading to the doctoral degree in mathematics.

In addition to program prerequisites, applicants must meet the university's minimum admission requirements including English language proficiency.

This program admits once per year for fall term only. See instructions on how to apply: https://www.pdx.edu/math/graduate-application-instructions

**DEGREE REQUIREMENTS**

Below is an overview of the program. For additional details please read the general rules in the Graduate School section of the PSU Bulletin.

**I. Planning a Ph.D. in Mathematical Science Program:**

Upon admission to the program the student will be assigned an academic adviser providing support for the student's exam schedule and program of courses. After satisfactory completion of the qualifying and comprehensive examinations, a dissertation committee headed by a thesis adviser will be appointed to supervise the remainder of the student's program. The Graduate School has a summary of the procedures for doctoral degrees on their website: https://www.pdx.edu/gradschool/summary-of-procedures-doctoral-degrees

**II. Course Requirements:**

A minimum of 81 credit hours distributed as follows:

Approved graduate level courses - 42 credits

a) Primary concentration: Mathematics and Statistics courses at the 600 level - 18 credit minimum.

b) Secondary concentration: courses at the 600 level in Mathematics and Statistics or courses at the 500 and 600 level offered in another discipline - 9 credit minimum.

c) Other courses in Mathematics and Statistics at the 500 and 600 level, including Mth/Stat 601 (non-dissertation research) - 15 credits. For students entering the program with a Master's degree, up to 9 credits can be transferred from graduate Mathematics or Statistics courses offered in other universities.

d) Other courses in Mathematics and Statistics at the 500 and 600 level, including Mth/Stat 601 (non-dissertation research) - 15 credits. For students entering the program with a Master's degree, up to 9 credits can be transferred from graduate Mathematics or Statistics courses offered in other universities.

e) Other courses in Mathematics and Statistics at the 500 and 600 level, including Mth/Stat 601 (non-dissertation research) - 15 credits. For students entering the program with a Master's degree, up to 9 credits can be transferred from graduate Mathematics or Statistics courses offered in other universities.

Mathematical/Statistical Literature and Problems course (Mth/Stat 501) - 3 credits. This requirement can be waived in full or partially in case of a Master's thesis or a similar exercise performed in another university. When a partial waiver is provided, the candidate is asked to perform oral presentation of his Master's thesis or similar exercise under the rules of the Mth/Stat 501 course.

Doctoral seminar (Mth 607) or Internship (Mth 604) - 9 credits.

Dissertation (Mth 603) - 27 credits.

Moreover, the candidate will be expected to participate in colloquia and research seminars presented in the department.

**III. Examinations:**

**Qualifying Examinations:** These exams are intended to verify that the student has the prerequisites for high-level mathematical courses and also to verify that the student has the basic capabilities and interest in mathematical research. This examination consists of two Master's level written examinations offered in the Fariborz Maseeh Department of Mathematics and Statistics ("the department"), as well as defending a Mth 501/Stat 501 Mathematical/Statistical Literature and Problems course. In both cases, this course consists of reading critically a research article and presenting it in writing as well as orally in front of a mathematically literate audience. The qualifying examinations are to be completed before the end of the second year after enrollment in the program, so that the student may engage early-on in the study of higher level mathematics and in research.

**Comprehensive Examinations:** This is an oral exam conducted by an examining committee composed of three or more PSU faculty members, a majority of which hold a primary appointment in the department. The scope of the exam is determined by a syllabus prepared by the candidate's examining committee. The syllabus reflects the primary as well as the secondary concentration of the candidate. A student may receive from the examining committee a grade of unconditional pass, conditional pass (with conditions specified by the examining committee), or fail. A (strict) majority of votes in favor of either pass or conditional pass is needed for the student not to fail the exam. The candidate is allowed to stand for this exam at most twice, and must pass this exam within five years after entering the program to continue.

**IV. Dissertation:**

Upon the successful completion of the course and examination requirements, the student proposes for approval by the Mathematical Sciences Ph.D. committee and subsequently by the Graduate School, a dissertation committee. This committee comprises a research adviser who is a faculty member in the department and at least three other faculty members. Additional faculty members may also serve on the dissertation committees. Overall, at least half of the members of the dissertation committee must be members of the department. The dissertation committee must also satisfy the rules dictated by the Graduate School.
V. Advancement to Candidacy:

With guidance from the dissertation committee, the student will prepare a thesis proposal and presentation. The goal of this presentation is to inform the committee of the intent of the dissertation and receive their critical comments. Upon subsequent recommendation of the dissertation committee, the student is recommended for advancement to candidacy for the degree of Doctor of Philosophy.

VI. Thesis Defense:

After preparation of the written dissertation, and with the approval of the dissertation committee, the Ph.D. degree candidate will present their work in a dissertation defense culminating in their research activities.

VII. Residency:

A minimum of three consecutive terms in this program must be spent in full-time residence at Portland State University.

MATHEMATICS EDUCATION PH.D.

The Fariborz Maseeh Department of Mathematics and Statistics offers a Ph.D. in Mathematics Education. The main objective of this program is to develop educators with an understanding of mathematics and its teaching and learning, and with the capabilities for research and professional practice in the field. This program provides a balance between mathematics and mathematics education in order to develop mathematics educators who can become: (i) Faculty members in mathematics departments or schools of education in universities, four year colleges, or community colleges; (ii) Curriculum specialists in mathematics, supervisors of mathematics at the middle school level or secondary school level, or mathematics specialists in state or local departments of education; (iii) Private sector specialists in mathematics education.

ADMISSION:

Program prerequisites:

Candidates in this program must currently have (or complete during their program) a master's degree in mathematics equivalent to the MA/MS in Mathematics degree or the MS-MTCH degree at Portland State University.

In addition to program prerequisites, applicants must meet the university's minimum admission requirements including English language proficiency.

This program admits once per year for fall term only. See instructions on how to apply: https://www.pdx.edu/math/graduate-application-instructions

DEGREE REQUIREMENTS

Students are responsible for knowing University-level graduate policies and procedures for obtaining the degree. These policies and procedures are in the Graduate School section of the PSU Bulletin. Several of the most frequently asked questions about University-level graduate policies and procedures can also be found on the Graduate School website.

Candidates must complete an approved program of 84 credit hours consisting of three major components: coursework, a research practicum experience, and dissertation research.

Coursework must include a minimum of:

- 18 credit hours in Mathematics Education Research Courses (Mth 690-695);
- 18 credit hours of other 500-600 level mathematics courses; and
- 18 hours of graduate coursework in supporting areas outside of mathematics (such as curriculum and instruction, psychology, educational policy, science, computer science, philosophy, sociology, anthropology, etc.)

Research Practicum Mth 601 (3 credits)

The purpose of the research experience will be to provide candidates with an opportunity to use methodological techniques in mathematics education early on in their course of study. Prior to the dissertation, candidates will be expected to gain experience with the qualitative and quantitative approaches that are now used by many researchers and curriculum developers in mathematics education. Some examples of possible research practicum experiences are: case studies of students' learning documented over time, studies of teachers' practice in the mathematics classroom, documentation of teachers' beliefs about mathematics as they implement new curricula.

Dissertation Research Mth 603 (27 credits)

The Ph.D. dissertation research will ordinarily be conducted under the guidance of a mathematics educator in the Fariborz Maseeh Department of Mathematics and Statistics. The dissertation is the most important part of a candidate's program, and involves identifying and researching a significant problem which builds upon previous research, and which will make an original contribution to an area of research in mathematics education. Dissertation committees consisting of a mix of faculty with expertise in mathematics education, mathematics, curriculum and instruction, and other areas outside of mathematics education will be encouraged. After completing the comprehensive examinations, the chairperson and dissertation committee will be appointed. The student will develop a dissertation proposal which will be defended in an oral presentation to the committee.
When the proposal has been approved by the committee, and if necessary by the University Human Subjects Research Review committee, the student will be considered a candidate for the Ph.D. in mathematics education. The dissertation must be completed according to the outlines of the proposal approved by the candidate’s committee. Students must register for dissertation credit during each term they are engaged in dissertation research. Upon completion of doctoral thesis work, the candidate will defend the dissertation before the committee in an oral presentation that is open to other interested faculty and students. The student is expected to demonstrate knowledge of the research literature in mathematics education that relates to the particular problem chosen for research, and to show how the dissertation contributes to work in this area.

**Demonstrated competency areas:**

Prior to completing their program, candidates in the Mathematics Education Ph.D. program will be expected to demonstrate competency in the following 7 areas:

1. mathematics education
2. mathematics
3. supporting content areas
4. teaching
5. the use of technology in teaching mathematics
6. the application of mathematics education in an urban setting
7. research in mathematics education

**1. Mathematics Education:**

The competency in mathematics education can be met by successfully completing graduate coursework in mathematics education and the psychology of learning and by passing a written, comprehensive exam.

**Coursework:** Candidates must successfully complete the 6 graduate seminars in Mathematics Education (Mth 690, Mth 691, Mth 692, Mth 693, Mth 694, and Mth 695) and at least one course in the psychology of learning. Course titles and descriptions are listed below.

**Comprehensive Exam in Mathematics Education:** Prior to being advanced to candidacy, students must pass and orally defend a written comprehensive exam in mathematics that covers the key developments and theoretical perspectives on the history of mathematics education, the teaching and learning of mathematics, and the development of curriculum in mathematics. The implications of this information for urban populations and settings will also be included. Students will have two weeks to compose their responses, which they will defend orally before an examination committee.

**2. Mathematics:**

Applicants to the Ph.D. in Mathematics Education are expected to have at least a master’s degree in mathematics or a degree equivalent to the MS-MTCH (p. 293) degree at Portland State University. The competency in mathematics can be met by successfully completing additional graduate-level coursework in mathematics beyond the masters and by passing a written comprehensive exam.

**Coursework:** Candidates must complete an additional 18 graduate-level credits in mathematics beyond the masters (or the equivalent of the MS-MTCH degree at PSU) that together with their master’s program reflects a sufficient breadth and depth of the topics in elementary calculus and analysis, linear and abstract algebra, geometry and topology, probability and statistics, and other applications

**Comprehensive Exams in Mathematics:** Prior to being advanced to candidacy, students must pass and orally defend a written comprehensive exam in mathematics that covers the key ideas of analysis, linear and abstract algebra, plus one of the following areas: probability, statistics, topology, geometry, or applied mathematics. Students will sit for the exam but will have the opportunity to defend their responses orally before an examination committee.

**3 Supporting Content Areas:**

The competency in supporting content area(s) can be met by successfully completing 18 graduate credit hours in areas outside of mathematics such as, curriculum and instruction, psychology, educational policy, science, computer science, philosophy, sociology, anthropology, etc. Candidates will be expected to plan this portion of their program in consultation with their adviser so that the 18 credits forms a coherent supporting focus and includes at least one course in the psychology of learning.

**4. Teaching:**

It is recommended that candidates in the Ph.D. program acquire mathematics teaching experience at both the K-12 and the college level. At a minimum, candidates must demonstrate competency in teaching mathematics for at least one of these two levels.

**5. The Use of Technologies in Teaching Mathematics:**

Students will be expected to acquire background and experiences in how students best learn mathematics within technologically enhanced learning environments either by working with students in K-12 classrooms or by teaching courses in the department that utilize technology (e.g., pre-calculus, calculus, linear algebra, or differential equations). The role of technology in mathematics education will be addressed throughout the doctoral program. In the seminar courses on teaching and learning (Mth 693 and Mth 694) and in the topics courses (Mth 695) students will become versed in the research literature on technology in mathematics education.
The Fariborz Maseeh Department of Mathematics and Statistics also offers Mth 588 "Technology for Teachers" which provides exposure to a variety of technologies including symbolic algebra manipulators (i.e., Maple, Mathematica, and Derive), graphing packages (Derive, various graphing calculators), and geometrical tools (Cabri geometry, Geometer's Sketchpad). In addition students are introduced to the various mathematics resources and information available on the World Wide Web. This course, or its equivalent, will be required of all participants in the program.

6. Applications of Mathematics Education in an Urban Setting:

Portland State University and the Portland Metro area provide a "natural laboratory" for conducting research on the teaching and learning of mathematics within an urban setting. Moreover, integral to the mission of Portland State University is a commitment to work with community partners in the promotion of educational reform K-16. Candidates in the Ph.D. program will be expected to demonstrate competency in working with urban populations and settings either by providing service or conducting research with community partners.

7. Research in Mathematics Education:

The competency in research in mathematics education can be met by successfully completing coursework in research in mathematics education, a research practicum project, and the doctoral dissertation.

Coursework: Students need to demonstrate experience with both quantitative and qualitative research methods which can be done through coursework and within the research practicum. Students must successfully complete Mth 692, Research Methodology and Research Design in Mathematics Education. Some students may also wish to take some additional coursework in research methodologies from outside areas.

Residency

In a doctoral program, the residency requirement can be satisfied in one of the follow ways:

- Three terms of full-time enrollment (minimum 9 graduate credits applicable to the degree program each term) during the first two years after admission to the program. This may include one or more summer terms.
- Six terms of part-time enrollment (minimum 1 graduate credit applicable to the degree program each term) during the first two years after admission to the program. This may include one or more summer terms.
- A doctoral student who was enrolled in the same major at PSU, and whose matriculation to the doctoral program immediately follows (within one calendar year) the master's degree program, may fulfill the residency requirement during the period in which the student was enrolled in the master's program

MATHEMATICS FOR MIDDLE SCHOOL MATHEMATICS TEACHERS GRADUATE CERTIFICATE

The Graduate Certificate in Mathematics for Middle School Mathematics Teachers (GCMS) consists of six graduate mathematics courses specifically designed for teachers who desire to teach middle school mathematics. The program provides a broad mathematics background appropriate for middle school teachers, a familiarity with the current middle school curriculum ideas, and a sensitivity to the special characteristics and needs of early adolescents.

The Graduate Certificate program by itself does not lead to a teaching license. If you are interested in information on how to obtain teacher licensure, please contact the School of Education, GTEP program.

ADMISSION

Program prerequisites

1. Completed B.A. or B.S. degree.
2. GPA: 3.0 cumulative undergraduate, or 3.0 for upper division courses, or 3.0 in all graduate credit courses (a minimum of 12 credits).
3. Completion of Mth 111 and Mth 112 (College Algebra/Trigonometry) and Mth 211, Mth 212, Mth 213 (Foundations of Elementary Mathematics) or the equivalent.

The admission requirements are consistent with admission to graduate study in the Department of Curriculum and Instruction in the College of Education. If admitted to graduate study in the Department of Curriculum and Instruction, the graduate credits of the GCMS may be applied toward an M.A. or M.S. in that department (please see an adviser in the College of Education for this option).

In addition to program prerequisites, applicants must meet the university's minimum admission requirements including English language proficiency.

This program currently offers rolling admissions.

Instructions on how to apply: if you are not already enrolled in a graduate degree program at Portland State University then see this page for admission instructions: https://www.pdx.edu/math/graduate-application-instructions

If you are currently a graduate student and wish to add the certificate to your program, please submit a GO-19 Request for Change of Major form. The form must be signed by your current department's Chair before submitting it to the Mathematics and Statistics department.
PROGRAM GOALS, OBJECTIVES:

The goals of the middle school mathematics certificate program are to offer a comprehensive mathematics program that:

- Directly relates the content of mathematics courses for pre- and in-service teachers to the mathematical content appropriate for middle school students.
- Is geared to the special characteristics of the student population of an urban university, and takes advantage of the varied resources found in an urban setting.
- Models a philosophy of teaching and learning mathematics that is consistent with current recommendations for effective instruction in middle school classrooms.

The course content and instructional practices of this graduate certificate program are consistent with the mathematical reform recommendations of the National Council of Teachers of Mathematics and the Mathematical Association of America.

The GCMS gives teachers an opportunity to enrich and broaden their mathematics background and to experience an environment that models the way we believe middle school mathematics should be taught. That is, teaching prospective middle school teachers in the manner that we would expect them to teach mathematics in middle school classrooms. In our courses we try to practice the following:

- Problem solving activities that promote exploration and experimentation and which allow students to construct (and reconstruct) mathematical understanding and knowledge.
- Use of models, concrete materials, diagrams, and sketches that promote visual reasoning as well as symbolic deductive modes of thought.
- Development of multiple strategies or approaches to problems - discussing and listening to how others think about a concept, problem, or idea.
- Small group work and cooperative learning.
- Extensive use of writing on mathematical investigations and problems summaries.
- Written communication between instructors and individual students.
- Multiple methods of assessment.
- Developing an awareness of one's own mathematical thought processes (and feelings about mathematics) and those of others.
- Supportive and cooperative class environment.

CORE REQUIREMENTS

The certificate program consists of the following six (6) mathematics courses totaling 24 credits.

<table>

Successful completion of the certificate requires students to have a cumulative PSU graduate GPA of 3.0 or higher (computed on all graduate credits taken at PSU) and a cumulative program GPA of 3.0 or higher (computed on all courses used for the graduate certificate). Please contact the program advisor during the term prior to the term of anticipated graduation to confirm that all program requirements have been completed. Instructions for applying to graduate as well as application deadlines can be found on the Graduate School's website.

Students are responsible for knowing University-level graduate policies and procedures for obtaining the degree. These policies and procedures are in the Graduate School section of the PSU Bulletin. Several of the most frequently asked about University-level graduate policies and procedures can also be found on the Graduate School's website.

APPLIED STATISTICS GRADUATE CERTIFICATE

The Graduate Certificate Program in Applied Statistics (GCAS) is primarily designed to provide a companion credential for students in other graduate programs (including Mathematics) who have demonstrated expertise in methods and techniques for the quantitative analysis and modeling of data. Graduate programs that share a common interest in the application of statistical methods to the analysis of data and the solutions of problems include: Psychology, Civil and Environmental Engineering, Economics, Electrical and Computer Engineering, Computer Science, Engineering and Technology Management, Environmental Sciences and Resources, Mechanical Engineering, Political Sciences, Sociology, Urban Studies, Systems Science. However, the GCAS
program equally serves those who want to pursue just the graduate certificate.

ADMISSION:

Program prerequisites:

Prospective students must have a basic preparation in mathematics and statistics and in a particular disciplinary field that would allow for advanced work in statistical methods as well as applications in one or more content areas. This preparation must be demonstrated by the completion of calculus-based courses in probability and distribution theory. A background in basic statistical methodology is assumed. Prerequisites for the GCAS are: 3 terms of Calculus (Mth 251-253), Linear Algebra (Mth 261), and a statistical methods course (Stat 452/552 or Stat 244). As the sequence Stat 551, Stat 552 is a prerequisite, it is not applicable toward program requirements.

In addition to the program prerequisites, applicants must meet the university's minimum admission requirements including English language proficiency.

This program currently offers rolling admissions.

Instructions on how to apply: if you are not already enrolled in a graduate degree program at Portland State University, see this page for admission instructions: https://www.pdx.edu/math/graduate-application-instructions. If you are currently a graduate student and wish to add the certificate to your program, please submit a GO-19 Request for Change of Major form. The form must be signed by your current department's Chair before submitting it to the Mathematics and Statistics department.

PROGRAM GOALS, OBJECTIVES:

Many graduate programs include a research methods component that requires the student to acquire some exposure to statistical methods as the basis for the design of experiments and analysis of data. The Graduate Certificate in Applied Statistics (GCAS) goes well beyond those requirements - the student develops both a depth of understanding of methods and a breadth of application across disciplines. It is expected that a student who earns this certificate would be capable of performing sophisticated statistical analysis and modeling for problems within his or her particular discipline. They would also be expected to be able to access and understand consultation with professional statisticians and provide consultation in the application of statistical methods for research purposes and in the solution of practical problems. The goal of the GCAS program is a coordinated plan for which students will be assured of exposure to statistical techniques needed in most applications.

CORE REQUIREMENTS:

This Graduate Certificate credential may be completed with a minimum of 24 credit hours of statistical graduate coursework with no comprehensive exam, while the MS in Statistics requires more extensive coursework and examinations.

Graduate certificate students must have a minimum 3.00 GPA on all courses applied to the program of study, as well as a minimum 3.00 GPA in all graduate-level courses taken at PSU. Although grades of C+, C, and C- are below the graduate standard, they may be counted as credit toward a graduate certificate with the specific written approval of the program.

Students are responsible for knowing University-level graduate policies and procedures for obtaining the certificate. These policies and procedures are in the Graduate School section of the PSU Bulletin. Several of the most frequently asked questions about University-level graduate policies and procedures can also be found on the Graduate School website.

Course of Study

The program of study leading to a GCAS requires the successful completion of a minimum of 24 graduate credit hours of coursework distributed as three components:

1. Applied statistics core sequence: The goal of this sequence is to introduce students to fundamentals of applied statistics. The three-term core course sequence: Stat 564 Applied Regression Analysis (3 credits) and Stat 565, Stat 566 Experimental Design: Theory and Methods I, II, (3 credits each)

2. Additional applied statistics courses: The objective is developing a breadth of knowledge in the application of statistical methods within the discipline and in related areas. A minimum of 12 additional hours chosen from the list of interdisciplinary courses below. Please note that 510/610 courses and Stat 551, Stat 552 are not acceptable toward the certificate.

3. Statistical consulting: To provide experience in dealing with real statistical problems Stat 570 Statistical Consulting (3 credits). Please note that this course is only offered during spring term.

All courses applied to the certificate program must have a B- or better grade. To continue in the program, students are required to maintain regular graduate student status, requiring a cumulative 3.00 GPA for all coursework and a term GPA of at least 2.67.

Philosophy
175 Fourth Avenue Building (FAB)
503-725-3524
www.pdx.edu/philosophy/

• B.A., B.S.
• Minor
• Minor in History and Philosophy of Science

For the requirements for this interdisciplinary minor, see History (p. 272)

Undergraduate program
Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value. Its fields include metaphysics (ultimate nature of reality), epistemology (nature of knowledge and reasoning), and ethics (principles of moral obligation). Through the study of the Philosophy Department’s curriculum, students learn about the historical traditions and contemporary theories in these fields. Philosophy also examines the basic concepts, principles, and arguments of the major scientific and intellectual disciplines concerned with the study of domains of reality, features and practices of knowledge, and social values and arrangements. These topics are addressed in areas such as philosophy of science, philosophy of mind, philosophy of language, philosophy of law, political philosophy, and philosophy of religion.

The study of philosophy enriches students’ lives as metaphysical, epistemological, and ethical reflection is essential to individual development and cultures across time and place. Moreover, philosophy enhances skills of abstract thinking, clear argumentative writing, careful reading and analysis of texts, and oral argument. Philosophical training is then valuable in almost any area of life and any occupation that requires examination and analysis of problems, critical evaluation of alternative solutions, and rational advocacy of conclusions and courses of action. Philosophy is also an excellent undergraduate major for pre-professional students: philosophy majors outscore all other majors on the Graduate Record Exam (GRE’s) and receive scores among the highest on the LSAT’s, GMAT’s, and MCAT’s. It is ideal for those who aspire to work in the legal profession and fitting for students planning careers in medicine. And finally, as the quintessential interdisciplinary course of study, philosophy is a wonderful second-major and compliments the course of study in the physical and social sciences, arts, and humanities.

DEGREE MAPS AND LEARNING OUTCOMES
To view the degree map and expected learning outcomes for Philosophy’s undergraduate degree, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS
Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

PHILOSOPHY B.A./B.S.

REQUIREMENTS

In addition to meeting the general University degree requirements, the philosophy major must take a minimum of 56 credits in philosophy courses. Specific requirements are as follows:

Courses
- Phl 201 Introduction to Philosophy 4
- Phl 301U Ancient Philosophy 4
- Phl 303U Early Modern Philosophy 4
- Phl 308U Elementary Ethics 4
- Phl 324U Introduction to Formal Logic I 4
- Phl 380 Philosophical Writing 4

Two courses taken from the following (historical figures): (8 credits)
- Phl 414 Plato 4
- Phl 415 Aristotle 4
- Phl 416 The Rationalists: Descartes, Leibniz, Spinoza 4
- Phl 417 The Empiricists 4
- Phl 419 Kant 4
- Phl 420 Wittgenstein 4
- Phl 451 Classical Figures 4

Four courses taken from the following (thematic courses): (16 credits)
- Phl 423 Metaphysics 4
- Phl 424 Epistemology 4
- Phl 432 Philosophy of Mind 4
- Phl 433 Philosophy of Language 4
- Phl 445 Advanced Ethics 4
- Phl 446 Topics in Ethics 4
- Phl 447 Topics in Social and Political Philosophy 4
- Phl 448 Biomedical Ethics 4
- Phl 449 Philosophy of Sustainability 4
- Phl 460 Contemporary European Philosophy 4
- Phl 470 Philosophy of Science 4
- Phl 471 Topics in Philosophy of Science 4
- Phl 474 Philosophy of Logic 4
- Philosophy electives 12

Philosophy electives: to include a minimum of 8 credits in upper-division courses

Subtotal: 56

A maximum of 4 credits of philosophy taken under the undifferentiated grading option (pass/no pass) are acceptable toward fulfilling department major requirements.

PHILOSOPHY HONORS OPTION

The Philosophy Department’s Honors Option is designed to challenge and enrich the educational experience of outstanding philosophy majors and, with a successful completion, recognize and honor their achievements. Application process: students must apply to be admitted. To apply, fill out an application (available at the department office) and submit it together with a DARS report and a writing sample to the honors option coordinator. The requirements to qualify for departmental honors include: at least junior standing; completion of at least 20 credits of Philosophy including at least one 400-level course; minimum GPA of 3.5 in Philosophy courses; writing sample. Requirements for receiving departmental honors include: completion of Honors Seminar (Phl 485) and Honors Thesis (Phl 403) with receipt of A- or above in both courses; minimum GPA of 3.5 in philosophy courses at graduation; at least 60 credits in Philosophy. For further details on requirements, expectations, and procedures, please contact the department office or honors option coordinator.

PHILOSOPHY MINOR

REQUIREMENTS

To earn a minor in philosophy a student must complete 28 credits (8 credits of which must be taken in residence at PSU), to include the following:

Courses
- Phl 201 Introduction to Philosophy 4
- Phl 301U Ancient Philosophy 4
- Phl 303U Early Modern Philosophy 4
- Phl 308U Elementary Ethics 4
- Philosophy electives 12

Philosophy electives: to include a minimum of 8 credits in upper-division courses

Subtotal: 28

A maximum of 4 credits of philosophy taken under the undifferentiated grading option (pass/no pass) are acceptable toward fulfilling department minor requirements.

Physics

134 Science Research and Teaching Center (SRTC)  
503-725-3812  
www.pdx.edu/physics/

- B.A., B.S.
- Minor
- Secondary Education Program
- M.A., M.S.
- Ph.D. – Applied Physics
**Undergraduate programs**

Physics is the branch of knowledge that attempts to explain all of the phenomena we observe or infer on earth and in the universe. Its study has made possible a modern understanding of the origin of the universe as well as the behavior of biological materials and chemical processes. Scientists trained in this field can engage in such diverse areas as solid state devices, particle physics, energy and the environment, biotechnology, and space travel.

The study of physics does not involve the following of a specific recipe or set of rules; rather it entails developing an attitude or way of looking at phenomena and asking questions. Physicists seek to understand how the physical universe works, no matter what the scale of observation—from quarks to quasars, from the time it takes the proton to spin, to the age of the cosmos. The answers to these questions are summarized into statements called laws. We live in the age of physical law. Awareness of the beauty, harmony, and interplay of the laws of physics greatly enhances our view and appreciation of our environment.

As an undergraduate, you will take a group of core courses that will give you a general background in the subject. You will study force and motion, heat, optics, electricity, magnetism, atomic and nuclear physics, quantum mechanics, and the physical properties of materials, learning both the theoretical and the experimental aspects.

Physicists are employed by almost all industries, particularly by the technical industries and government laboratories. Roughly half of all students with a bachelor’s degree in physics go onto graduate work. In addition to a traditional graduate curriculum in physics or astronomy, they can enter programs in optics, applied physics, engineering physics, and education. Biophysics, material science, atmospheric physics, environmental science, medical physics, and finance are particularly popular fields, now. Environmental programs, electrical engineering, nuclear engineering, and computer science are common graduate school tracks. Medicine and law are also fields that welcome students with physics degrees. Many physicists are entrepreneurs who start their own companies.

**DEGREE MAPS AND LEARNING OUTCOMES**

To view the degree maps and expected learning outcomes for Physics' undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

**ADMISSION REQUIREMENTS**

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

**PHYSICS B.A./B.S.**

It is important that students planning to major in physics contact the Department of Physics prior to the start of their work in order that a coherent program can be planned with their assigned adviser.

Students planning to transfer to PSU from community colleges or other universities are strongly advised to contact the Department of Physics well ahead of their proposed date of transfer so that a smooth transition, which avoids course duplication and untimely delays, can be accomplished. Students need to choose between the standard option, the environmental physics option, the engineering physics option, and the biomedical option.

**REQUIREMENTS**

In addition to meeting the general University degree requirements, the student must meet the following minimal departmental course requirements:

**Standard Option**

Mth 253  Calculus III  4
Mth 254  Calculus IV  4
Mth 256  Applied Ordinary Differential Equations  4
Mth 261  Introduction to Linear Algebra  4
Stat 451  Applied Statistics for Engineers and Scientists  4

One year of general chemistry:
Ch 221  General Chemistry I  4
Ch 222  General Chemistry II  4
Ch 223  General Chemistry III  4
Ch 227  General Chemistry Laboratory  1
Ch 228  General Chemistry Laboratory  1
Ch 229  General Chemistry Laboratory  1

At least two of the following courses:
Ph 315  Experimental Physics II  4
Ph 316  Experimental Physics III  4
Ph 411  Introduction to Quantum Mechanics  4
Ph 424  Classical Mechanics I  4
Ph 432  Electricity and Magnetism II  4
Ph 434  Methods of Mathematical Physics  4
Ph 464  Applied Optics  4

Choose 12 credits of electives from the following:
Bi 211  Principles of Biology: Molecular Cell Biology & Genetics  4
Bi 212  Principles of Biology: Development, Evolution & Ecology  4
Bi 213  Principles of Biology: Organisms, Biodiversity & Conservation  4
Bi 214  Principles of Biology Lab I  1
Bi 215  Principles of Biology Lab II  1
Bi 216  Principles of Biology Lab III  1
Bi 357  General Ecology  4
Bi 476  Population Ecology  5
Ch 360U  Origins of Life on Earth  4
WELCOME TO PORTLAND STATE UNIVERSITY

Be sure to check the current catalog or contact your academic adviser for the most current information.

Biomedical Option

Required physics courses:

- Ch 426 Instrumental Analysis 4
- Ch 427 Instrumental Analysis 4
- CE 371 Environmental Engineering 4
- ESM 220 Introduction to Environmental Systems 4
- ESM 221 Applied Environmental Studies: Problem Solving 4
- ESM 222 Applied Environmental Studies: Policy Consideration 4
- ESM 320 Environmental Systems I 4
- ESM 321 Environmental Systems II 4
- ESM 322 Environmental Risk Assessment 4
- ESM 324 Environmental Systems Laboratory II 2
- ESM 460/CE 488 Air Quality 4
- G 322 Global Biogeochemical Cycles 5
- G 351 Introduction to Oceanography 4
- G 426 Numerical Modeling of Earth Systems 4
- G 426L Lab for G 426 0
- G 434 Structural Geology and Tectonics 5
- G 458 Astrobiology 4
- G 462 Hillslope Materials and Processes 4
- G 476 Earthquake Geology 4
- Geog 310U/Sci 333U Climate and Water Resources 4
- Geog 311U Climatology 4
- Geog 312U/Sci 334U Climate Variability and Change 4
- Geog 314U Severe Weather 4
- ME 320 Fluid Mechanics 4
- ME 415 Advanced Topics in Energy Conversion 4
- ME 426 Solar Engineering 4
- Ph 333U/Geog 333U Weather 4

Subtotal: 103-106

See adviser for substitutions.

Required non-physics courses:

- Bi 211 Principles of Biology: Molecular Cell Biology & Genetics 4
- Bi 214 Principles of Biology Lab I 1
- Ch 221 General Chemistry I 4
- Ch 222 General Chemistry II 4
- Ch 223 General Chemistry III 4
- Ch 227 General Chemistry Laboratory I 1
- Ch 228 General Chemistry Laboratory II 1
- Ch 334 Organic Chemistry I 4
- Ch 337 Organic Chemistry Laboratory I 2
- Mth 251 Calculus I 4
- Mth 252 Calculus II 4
- Mth 253 Calculus III 4
- Mth 254 Calculus IV 4
- Mth 256 Applied Ordinary Differential Equations 4
- Mth 261 Introduction to Linear Algebra 4

At least 12 credits of the following electives:

1. Courses particularly recommended for pre-professionals in biophysics, biomedical engineering, medical physics:
   - Ph 315 Experimental Physics II 4
   - Ph 337 Physics in Biomedicine 4

2. Additional electives:
   - Bi 315 Principles of Biology: Molecular Cell Biology & Genetics 4
   - Bi 314 Principles of Biology Lab I 1
   - Ch 221 General Chemistry I 4
   - Ch 222 General Chemistry II 4
   - Ch 223 General Chemistry III 4
   - Ch 227 General Chemistry Laboratory I 1
   - Ch 228 General Chemistry Laboratory II 1
   - Ch 334 Organic Chemistry I 4
   - Ch 337 Organic Chemistry Laboratory I 2
   - Mth 251 Calculus I 4
   - Mth 252 Calculus II 4
   - Mth 253 Calculus III 4
   - Mth 254 Calculus IV 4
   - Mth 256 Applied Ordinary Differential Equations 4
   - Mth 261 Introduction to Linear Algebra 4

Total: 103-106
Ph 411 | Introduction to Quantum Mechanics | 4
Ph 424 | Classical Mechanics I | 4
Ph 431 | Electricity and Magnetism I | 4
Ph 432 | Electricity and Magnetism II | 4
Ph 451 | Electron Microscopy | 4
Ph 464 | Applied Optics | 4
Ph 490 | Cellular and Molecular Biophysics | 4

**b) Courses particularly recommended for pre-health care professionals:**

Bi 212 | Principles of Biology: Development, Evolution & Ecology | 4
Bi 213 | Principles of Biology: Organism, Biodiversity & Conservation | 4
Bi 215 | Principles of Biology Lab II | 1
Bi 216 | Principles of Biology Lab III | 1
Bi 301 | Human Anatomy and Physiology | 4
Bi 302 | Human Anatomy and Physiology | 4
Bi 303 | Human Anatomy and Physiology | 4
Ch 335 | Organic Chemistry II | 4
Ch 336 | Organic Chemistry III | 4
Ch 338 | Organic Chemistry Laboratory II (nonmajors) | 2
Ph 337 | Physics in Biomedicine | 4
Ph 490 | Cellular and Molecular Biophysics | 4

**Please see the undergraduate adviser to register for the following OHSU substitute courses:**

RDFT 331 | Radiation Therapy Physics I | 3
RDFT 430 | Radiation Therapy Physics II | 3

**Subtotal: 101**

**Engineering Physics Option**

Ph 201 | General Physics | 4
Ph 202 | General Physics | 4
Ph 203 | General Physics | 4
Ph 204 | General Physics (with Calculus) | 4
Ph 205 | General Physics (with Calculus) | 4
Ph 211 | General Physics (with Calculus) | 4
Ph 212 | General Physics (with Calculus) | 4
Ph 213 | General Physics (with Calculus) | 4
Ph 214 | Lab for Ph 201 or Ph 211 or Ph 221 or Ph 231 | 1
Ph 215 | Lab for Ph 202 or Ph 212 or Ph 222 or Ph 232 | 1
Ph 216 | Lab for Ph 203 or Ph 213 or Ph 223 or Ph 233 | 1
Ph 311 | Introduction to Modern Physics I | 4
Ph 312 | Introduction to Modern Physics II | 4
Ph 319 | Solid State Physics for Engineering Students | 4
Ph 314 | Experimental Physics I | 4
Ph 315 | Experimental Physics II | 4
Ph 316 | Experimental Physics III | 4
Ph 322 | Computational Physics | 4
Mth 251 | Calculus I | 4
Mth 252 | Calculus II | 4
Mth 253 | Calculus III | 4
Mth 254 | Calculus IV | 4
Mth 256 | Applied Ordinary Differential Equations | 4
Mth 261 | Introduction to Linear Algebra | 4

**At least four of the following electives**

Ph 401 | Research | 4
Ph 402 | Independent Study | 4
Ph 411 | Introduction to Quantum Mechanics | 4
Ph 424 | Classical Mechanics I | 4
Ph 432 | Electricity and Magnetism II | 4
Ph 434 | Methods of Mathematical Physics | 4
Ph 440 | Physics of Solid State Devices | 4
Ph 445 | Microelectronic Device Fabrication I | 4
Ph 464 | Applied Optics | 4
Ph 481 | Introduction to Nano(materials)-Science and Engineering | 4
Ph 495 | Materials Physics: Structure and Physical Properties of Ordered and Disordered Condensed Matter | 4

**Three courses in a related area of science or engineering (minimum 9 credits):**

- chemistry, computer science, 9-12
- electrical engineering,
- mechanical engineering, physics,
- or statistics

**Subtotal: 100-103**

Courses taken under the undifferentiated grading option (pass/no pass) are not acceptable toward fulfilling department major requirements except for those major courses offered on a pass/no pass basis only.

**PHYSICS MINOR**
REQUIREMENTS

To earn a minor in physics, a student must complete 27 credits (9 credits of which must be taken in residence at PSU, and 12 to 15 credits of which must be upper-division), to include the following:

Courses

Ph 201  General Physics  4
Ph 202  General Physics  4
Ph 203  General Physics  4
or
Ph 211  General Physics (with Calculus)  4

Ph 212  General Physics (with Calculus)  4

Ph 213  General Physics (with Calculus)  4

With

Ph 214  Lab for Ph 201 or Ph 211 or Ph 221 or Ph 231  1
Ph 215  Lab for Ph 202 or Ph 212 or Ph 222 or Ph 232  1
Ph 216  Lab for Ph 203 or Ph 213 or Ph 223 or Ph 233  1

Upper-division physics electives  12-15

Subtotal: 27

A maximum of one-third of the courses taken under the undifferentiated grading option (pass/no pass) is acceptable toward fulfilling department minor requirements. Additional courses may be required as prerequisites.

PHYSICS HONORS TRACK

Adviser: Erik Sánchez

The Physics department’s honors track is designed to challenge and enrich the educational experience of superior physics majors and, with a successful completion, recognize and honor their achievements. It is designed specifically for those students who plan to pursue graduate studies in physics or other disciplines that involve scientific research which is either experimental or theoretical in nature. Participation in the track is elective and because honors studies involve a close mentoring relationship with faculty, students will need to coordinate their proposed research topic(s) with an appropriate faculty member.

PHYSICS SECONDARY EDUCATION PROGRAM

Adviser: Andrew Rice

Students who plan to obtain a teaching license with an endorsement to teach physics at the high school level should complete a baccalaureate degree which includes at least 40 credit hours in physics.

REQUIREMENTS

An acceptable course of study should include:

Courses

Ph 201  General Physics  4
Ph 202  General Physics  4
Ph 203  General Physics  4
or
Ph 211  General Physics (with Calculus) I  4
Ph 212  General Physics (with Calculus) II  4
Ph 213  General Physics (with Calculus) III  4

With

Ph 214  Lab for Ph 201 or Ph 211 or Ph 221 or Ph 231  1
Ph 215  Lab for Ph 202 or Ph 212 or Ph 222 or Ph 232  1
Ph 216  Lab for Ph 203 or Ph 213 or Ph 223 or Ph 233  1

Ph 311  Introduction to Modern Physics I  4
Ph 312  Introduction to Modern Physics II  4
Ph 314  Experimental Physics I  4
Ph 315  Experimental Physics II  4
Ph 316  Experimental Physics III  4
Ph 322  Computational Physics  4
Ph 464  Applied Optics  4
or
Ph 426  Thermodynamics and Statistical Mechanics  4

Other courses that may qualify should be discussed with the secondary education adviser.

Courses are to be taken for differentiated grades. A positive recommendation to the Graduate Teacher Education Program will depend on at least a C grade in all physics courses, as well as a cumulative 2.75 GPA.

Graduate programs

The Department offers the degrees of Master of Arts and Master of Science in Physics and Ph.D. in Applied Physics. The M.A. and M.S. programs are designed to further the development of the student as a professional physicist. Specific programs designed to meet the needs of the individual student are planned in consultation with the graduate advisers.
The department offers graduate courses in classical mechanics, quantum mechanics, electromagnetism, statistical mechanics, physics of condensed matter, atmospheric physics, and biophysics. Current research areas in theoretical and experimental physics include: statistical physics, surface and materials physics (scanning tunneling microscopy, near-field optical microscopy, AFM, electron microscopy), molecular biophysics and membrane biophysics (detection of life in extreme environments and transport in biological and artificial membranes), physics educational research, and global change science (climate change and atmospheric physics and chemistry).

The department also participates in the Earth, Environment, and Society PhD Degree Program in areas of climate change and policy.

DEGREE REQUIREMENTS

Specific departmental requirements are listed below. The complete details of all M.A., M.S. and Ph.D. requirements are outlined in the Department of Physics Graduate Student Handbook and on the web at www.pdx.edu/physics.

PHYSICS M.A./M.S. REQUIREMENTS

The program must be approved by the student’s adviser and must include a minimum of 45 graduate credits in science, including not fewer than 30 credits in physics. These 30 credits in physics must be in 500- or 600-level courses as follows for thesis and non-thesis options:

**Thesis Option**

Three of the following 600-level courses:

- Ph 617 Quantum Mechanics 4
- Ph 624 Classical Mechanics 4
- Ph 631/ECE Electromagnetic Fields and Interactions 4
- Ph 664 Statistical Mechanics 4

And

- Ph 507 Seminar 3
- Electives 24
- Ph 503 Thesis 6

Subtotal: 45

**Non-Thesis Option**

Three of the following 600-level courses:

- Ph 617 Quantum Mechanics 4
- Ph 631/ECE Electromagnetic Fields and Interactions 4
- Ph 624 Classical Mechanics 4
- Ph 664 Statistical Mechanics 4

Subtotal: 45

APPLIED PHYSICS PH.D. REQUIREMENTS

All doctoral students must earn a minimum of 81 credits beyond the bachelor’s degree. Candidates for the Ph.D. in Applied Physics must satisfy requirements related to coursework, seminar, and a dissertation, including a minimum of 69 credits as follows:

**Courses**

- Ph 585 Experimental Methods in Applied Physics 4
- Ph 617 Quantum Mechanics 4
- Ph 618 Quantum Mechanics 4
- Ph 624 Classical Mechanics 4
- Ph 631/ECE Electromagnetic Fields and Interactions 4
- Ph 632/ECE Electromagnetic Fields and Interactions 4
- Ph 607 Seminar 6
- Ph 603 Dissertation 27
- Electives: (all from one specialty area) 12

Subtotal: 69

Typically, a thesis involves research, Cooperative Education/Internship involves relevant student experiences obtained in industry or government, and a project involves review of the literature in a certain area of physics. In all cases, a written report, a presentation, and final oral exam are required.

Approved electives in the three specialty areas of Nanoscience and Materials Physics, Atmospheric Physics, and Biophysics are found in the Physics Graduate Student Handbook and on the web at www.pdx.edu/physics. Candidates for the Ph.D. in Applied Physics are required to pass the comprehensive examination, a prospectus examination, and write and orally defend a dissertation.

Pre-professional Programs

503-725-3822,
Suite 360 Fariborz Maseeh Hall (FMH)
Portland State offers courses which meet the pre-professional requirements of professional schools within Oregon and, in most cases, the requirements of out-of-state professional schools as well. The programs schedules in this section are typical and will vary in individual cases. The majority of pre-professional programs are based on the graduation requirements of other institutions. All pre-professional students should check with their assigned advisor to keep current on all recent changes and remaining requirements.

**Pre-Professional Health Programs**

Professional advisors in the Health, Science, and the Earth advising pathway administer programs designed to support students’ efforts to prepare for and apply to professional health programs. Pre-professional health programs at Portland State University are not majors. Rather, they are programs in which students take advantage of advising, coursework and resources all designed to support and guide students’ efforts to apply to undergraduate and graduate health programs offered at other institutions. There are two types of pre-professional health programs at Portland State – 1) transfer programs, and 2) bachelor’s degree programs.

**Transfer programs** are those in which students complete a set of prerequisite courses at Portland State and then transfer to undergraduate professional health sciences programs at other institutions to complete their bachelor’s degrees. The students’ focus at Portland State is on fulfilling the admissions requirements of receiving institutions. Transfer programs include the following:

- Medical Laboratory Science
- Dental Hygiene
- Nursing
- Radiation Therapy

Students choosing to continue at PSU, rather than pursue a pre-professional transfer program should meet with their assigned advisor within the Health, Science, & the Earth advising pathway to determine PSU graduation requirements.

**Bachelor’s degree programs** are those designed to prepare students for masters and doctoral programs in the health sciences that require or recommend completion of a bachelor’s degree prior to entry. However, pre-professional bachelor’s degree programs at Portland State are not majors. Thus, students must a) select a major and fulfill Portland State’s graduation requirements, and b) fulfill the prerequisite coursework required by the professional graduate programs to which they plan to apply. Majors commonly selected by pre-professional health students include biology, chemistry, public health studies, science, social science and psychology. However, a student can select any major offered at Portland State, as long as he or she completes both Portland State’s graduation requirements and those of the receiving professional institutions. Professional schools do not prefer one major over another. They do look for students who perform well in prerequisite coursework and who are broadly educated; this can be accomplished with any major.

Professional health sciences programs that require or recommend that applicants earn a bachelor’s degree before matriculating include the following:

- Allopathic and Osteopathic Medicine
- Chiropractic Medicine
- Dentistry
- Naturopathic Medicine
- Occupational Therapy
- Optometry
- Pharmacy
- Physical Therapy
- Physician Assistant
- Veterinary Medicine

A typical pre-professional health program, whether it is a transfer or a bachelor’s degree program, includes but is not limited to coursework in mathematics, biology, chemistry, physics, English composition, and social science. However, coursework varies, depending on the admissions requirements of the institutions granting the professional degrees. It is essential that a student’s academic program be planned with an advisor in the Health, Science, and the Earth pathway.

PSU’s pathway advisors work closely with students to facilitate their ability to plan coursework and activities strategically; to integrate personal, academic, and career goals; to develop the ability to evaluate options and make decisions; and to be aware of the available resources across campus that can support their efforts to gain admission to professional health sciences programs. Advisors also provide students with guidance on selecting a major, preparing for graduate admissions tests such as the MCAT and GRE, organizing letters of evaluation, and writing the personal statement for admissions applications.

**POSTBACCALAUREATE PRE-MEDICAL PROGRAM**

For students who already have a bachelor’s degree but are lacking the specific science prerequisites for medical
school, PSU offers a loosely structured postbaccalaureate program. The timeline for completion varies based on the individual student’s previous preparation. At least two years is a common timeline for those without significant prior coursework in the sciences. The two-year timeline allows for a balanced (though still challenging) schedule as well as more time to gain clinical exposure, demonstrate long-term service in the field, and include study time for the MCAT. Coursework may include year-long sequences in general chemistry, biology, organic chemistry, and physics, as well as single term courses in genetics and biochemistry. It is possible to further expedite the completion of pre-med courses with previous math coursework or utilizing summer accelerated sequences. Postbac students will work with their pathway advisor to determine a course plan that works best with their goals.

The postbaccalaureate pre-medical program is not a certificate program. Many postbaccalaureate pre-medical students do, however, easily complete a degree in science (science is an interdisciplinary major at Portland State) while completing prerequisite coursework for medical school. Most students need only add two to three classes to the pre-medical coursework in order to finish the degree. Pursuing a second degree while working on pre-professional coursework often enables postbaccalaureate students to receive financial aid for a longer period of time. For more information, contact an advisor in the Health, Science, and Earth advising pathway.

POSTBACCALAUREATE PRE-DENTAL PROGRAM

For students who already have a bachelor’s degree but are lacking the specific science prerequisites for dental school, PSU offers a loosely structured postbaccalaureate program. It typically takes postbaccalaureate students who are lacking all of the science prerequisites for dental school at least two years to complete the core coursework. Courses can be planned in a variety of ways. Postbaccalaureate pre-dental students will work with their pathway advisor to develop a plan for completing the pre-dental coursework as well as gain relevant experiences prior to applying to dental school.

The postbaccalaureate pre-dental program is not a certificate program. Many postbaccalaureate pre-dental students do, however, easily complete a degree in science (science is an interdisciplinary major at Portland State) while completing prerequisite coursework for dental school. Pursuing a second degree while working on pre-professional coursework often enables postbaccalaureate students to receive financial aid for a longer period of time. For more information, contact an advisor in the Health, Science, and Earth advising pathway.

K-12 Teacher Preparation

Portland State University educates prospective K-12 teachers in the College of Education, through the Graduate Teacher Education Program (GTEP) and the Special Educator Program (SPED). The Special Educator Program prepares teacher candidates to work as Special Education Teachers in Pre-K through grade 12 settings and results in the teacher candidate receiving the Oregon Preliminary Teaching License with added Special Education Generalist Endorsement and option to complete the MA or MS in Special Education. Both GTEP and SPED are split into separate tracks to emphasize either elementary (K-6/7-8 self-contained) or secondary (middle/high school) education, and both result in a master’s degree (Master of Education or Master of Special Education) and an initial teaching license.

Undergraduates at Portland State University may prepare for competitive admissions by consulting with appropriate advisors, by achieving high academic standards in the recommended and required courses for specialization, and in courses in liberal arts, and by documenting successful experience with children in public schools. For students interested in the BA/BS in Special Education degree and licensure program, please visit https://www.pdx.edu/sped/sped-undergraduate. Passing scores on teacher exams mandated by the Oregon Teachers Standards and Practices Commission (TSPC) are also required for entry into the GTEP.

PRE-EDUCATION UNDERGRADUATE ADVISING

503-725-3822, Suite 360 Fariborz Maseeh Hall (FMH)
Advisors: B. Alberts and E. Benner

CHILD, YOUTH, AND FAMILY STUDIES MAJOR ADVISING

503-725-3822 Suite 360 Fariborz Maseeh Hall (FMH)
Advisors: K. Utschig and E. Benner

EARLY CHILDHOOD AND ELEMENTARY EDUCATION

Students who want to be elementary teachers choose from a wide range of majors to complete their undergraduate degrees. Pre-Education advisors have traditionally recommended interdisciplinary majors – such as Arts and Letters, Social Science, General Science, and Liberal studies – because they can include multiple subjects that are highly relevant to the elementary curriculum. However, specific disciplinary majors can also be fitting for the goal of progressing into GTEP. Such disciplines include (but are not limited to) English or History (especially those...
Prospective elementary teachers should consult with a Pre-Education Advisor in the advising office.

SECONDARY (MIDDLE/HIGH SCHOOL) EDUCATION

Prospective middle and high school teachers may receive general introductory pre-professional advising with a Pre-Education Adviser; however, subsequent advising for pre-secondary education should be with the academic advisor for the secondary education content area they wish to teach. These specialized advisors are familiar with all GTEP admission requirements for their respective content areas, and the College of Education relies on their recommendations to determine whether an applicant has sufficient understanding of the subject matter they wish to teach. Secondary Education content advisors can be found at https://www.pdx.edu/education/academics/programs/graduate/graduate-teacher-education-program/admissions

Academic majors and their respective secondary endorsements are as follows: biology (biology and general science); physical education (physical education); history, anthropology, sociology, philosophy, political science, geography, and economics (social studies); health (health); mathematics (mathematics); English (English language arts); art (art); world languages and literatures (foreign language); music (music); chemistry (chemistry); physics (physics); business and economics (business); drama (drama); speech (speech).

Additional information is available online, or by contacting GTEP admissions at (503) 725-4619.

SPECIAL EDUCATION

All prospective special educators, whether they wish to teach special education at the elementary or secondary level, should consult with a pre-education advisor.

GRADUATE TEACHER EDUCATION PROGRAM

Any current or prospective PSU Students who are considering application to GTEP at PSU should attend one of the College of Education's regularly held information sessions for prospective applicants. A current schedule of upcoming information sessions is available online, along with an online form to register to attend a specific session. For additional information, please contact the College of Education (askcoe@pdx.edu; 503-725-4619).

PREPARATORY COURSEWORK

Early childhood and elementary educators:

Required:
- Lib 428 Children's Literature, K-5 3

Required:
- Mth 211 Foundations Of Elementary Mathematics I 4
- Mth 212 Foundations Of Elementary Mathematics II 4
- Mth 213 Foundations Of Elementary Mathematics III 4

Recommended:
- Art 312 Art in the Elementary School 4
- Ci 432 Computer Applications for the Classroom 3
- Ed 420 Introduction to Education and Society 4
- Mus 381 Music for Elementary Teachers 4
- Psy 311U Human Development 4
- SpEd 418 Survey of Exceptional Learners 3

Middle, junior, and high school educators:

In addition to a strong liberal arts education, all students should complete the requirements for their major in the endorsement area of their choice.

Required:
- Psy 311U Human Development 4

Recommended:
- Psy 311U Human Development 4
- Ci 432 Computer Applications for the Classroom 3
- Ed 420 Introduction to Education and Society 4

INTEGRATED SCIENCE

Advisor: Dr. Rolf Koenenkamp, Physics

The integrated science endorsement is valid for teaching middle school, intermediate school, high school integrated science, or high school earth science. See the other secondary endorsements for a high school biology, chemistry, or physics content focus. Coursework highlighted here is beneficial preparation for those intending to teach in states that have adopted the Next Generation Science Standards (Oregon included). Students who wish to obtain the integrated science endorsement under an interdisciplinary general science major should be aware that the integrated science endorsement requires additional science courses beyond the coursework required for a major in general science. Courses pertaining to all of the Earth/Space, Life, and Physical Science Content Standards are required. Guidelines for a course of study for the integrated science endorsement include the following.

Science Requirements

Earth/Space Content Area: (20 credits)
- Lower division geology with labs/field studies 8
Upper-division earth science courses

Upper-division earth science courses: distributed among geology, paleontology, geomorphology, oceanography, hydrology, weather and climate, planetary science, astronomy.

**Life Science Content Area: (15 credits)**

- WS 301 | Gender and Critical Inquiry | 4 |
- WS 360U | Introduction to Queer Studies | 4 |

Subtotal: 25-28

The total may vary depending on the transfer of community college equivalent courses which carry, in some cases, fewer credits. A minimum of 18 credits must be upper-division. Only grades of C- or above may be counted toward these requirements. Students must take all coursework for differentiated grades. At least 16 credits must be in residence at PSU. A minimum cumulative GPA of 2.5 in coursework is required. Students must also complete the required content courses for the subject they plan to teach to apply to GTEP.

SPECIAL EDUCATION MINOR

The Minor in Special Education is intended for students who plan to enter a graduate teacher education program and be licensed to teach Special Education. While the minor is not a requirement for admission to the PSU College of Education, Special Education Program (SPED), it does include all the prerequisites and highly recommended courses for admission to the program. Students seeking a license for teaching special education must complete a graduate-level program. The Graduate School of Education recommends students for teacher licensure at the completion of the Special Education Program.

Subtotal: 41-43

Pre-Law Preparation

Pre-Law Preparation

For Liberal Arts and Sciences students:
R. Kevin Hill, Philosophy, 503-725-3594, hillrk@pdx.edu
For Urban and Public Affairs students:
Chris Shortell, Political Science, 503-725-3920, shortell@pdx.edu

Law schools in the United States, unlike medical, dental, and other professional schools, generally do not require specific pre-law majors or particular courses of study in preparation for law school. Pre-law students are generally free to select their own undergraduate programs (there is no “pre-law” major as such), but they are advised to choose broad cultural fields in which they have keen intellectual interests, such as economics, history, literature, mathematics, philosophy, political science, science, or sociology, to suggest only some examples. Business administration and criminology and criminal justice, when strongly supplemented with work in arts and letters, science, or social science, are also suitable. Law schools do recommend that the prospective law student acquire a broad liberal education providing a sound basic understanding and appreciation of arts and letters, science, and social science.

All three Oregon law schools, Lewis & Clark, Willamette, and the University of Oregon, and the major law schools in other states, now require that applicants for admission have a bachelor’s degree. Valuable information about pre-law study and law school admissions can be found on the Law School Admission Council’s website at http://www.lsac.org.

3+3 Accelerated Baccalaureate and Juris Doctor Agreements

PSU maintains 3+3 Accelerated Baccalaureate and Juris Doctor agreements with Lewis and Clark Law School and Willamette University College of Law. These programs are restricted to certain undergraduate majors and allow for a student to complete a B.S. or B.A. degree at PSU and a law degree in six years.

Preparing for Law School

Students are cautioned not to have a large number of ungraded or pass/no pass credits. Law schools also advise against concentration in courses given primarily as vocational training. Whatever the undergraduate program, pre-law students should develop as fully as possible the ability to read with understanding, to think logically, and to express themselves clearly and cogently in written and oral work. The importance of analytical skills in dealing with concepts, abstract ideas, and complex fact situations, and of communications skills, cannot be overemphasized, for lawyers must be able to research, analyze, and communicate.

And since law is a part of the larger social order, the pre-law student should seek to understand the political, social, economic, and cultural institutions within which the legal system functions. As illustrative of specific subjects (with PSU course numbers) which may be helpful toward that end, the following are suggested with a reminder that they are not prerequisites for law school admission: introductory economics (Ec 201, Ec 202); ethics (Phl 308U, Phl 445, Phl 446, Phl 447); U.S. history (Hst 201, Hst 202, Hst 203); American constitutional history (Hst 447, Hst 448, Hst 449); political theory (PS 208, PS 483); constitutional interpretation, constitutional law, the judicial process (PS 221, PS 421, PS 422, PS 423, PS 424); criminology and criminal justice (CCJ 420, CCJ 440, CCJ 460 and CCJ 310); psychology (Psy 204); and general sociology (Soc 200). In addition, many law schools recommend taking a course in accounting principles. PSU does offer a Law & Legal Studies minor for those who wish to concentrate their study in the area of law, but should note that this is not required for admission to law school.

Completion of the Law School Admission Test (LSAT), administered nationally by the Law School Admission Council, is required by nearly all law schools. You can find information about the exam, and about the law school admissions process, at www.lsac.org. The exam is offered four times each year, but should be taken at the earliest possible date in the student’s senior year or as early as their late junior year. According to the Law School Admissions Council, the LSAT “is designed to measure skills that are considered essential for success in law school: the reading and comprehension of complex texts with accuracy and insight; the organization and management of information and the ability to draw reasonable inferences from it; the ability to think critically; and the analysis and evaluation of the reasoning and arguments of others.” It does not test knowledge of specific subjects, and is in no sense a test of knowledge about law. There is no standard “passing score” on the test, for each law school makes its own evaluation of an applicant’s admissibility, using the LSAT score, GPA (grade point average) and such other factors as it deems relevant.

Competition for admission to law schools can be very keen; thus high grade point averages and high LSAT scores are very desirable. Many law schools use the LSAT score and the GPA in computing a total numerical score which constitutes one important factor in determining admissibility. In such a computation a higher score on the LSAT can help to offset a lower GPA or vice versa. Although the LSAT may be repeated, it is generally advisable to prepare for the test as if it can only be taken.
once. Retakes should be reserved for situations where you are confident that you can increase your score. Information concerning the exact test dates is available from the Law School Admission Council’s website. Students interested in attending law school are strongly encouraged to meet with one of the pre-law advisors listed above for more specific guidance about the application process.

Psychology
317 Cramer Hall (CH)  
503-725-3923  
www.pdx.edu/psychology

- B.A., B.S.
- Minor
- M.A., M.S.
- Ph.D. in Applied Psychology

Undergraduate programs
The program in psychology has been planned with the idea that all students, regardless of major, will have to solve significant psychological problems in their relations with others, at home and at work, in their personal decisions, and in their efforts to understand the problems and processes of society. The program serves students intending to do professional work in the field; liberal arts majors who are interested in psychology as part of a liberal arts education; and students of other social sciences or in a professional field such as business, education or medicine who seek a working knowledge of psychological principles.

DEGREE MAPS AND LEARNING OUTCOMES
To view the degree maps and expected learning outcomes for Psychology's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS
Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

PSYCHOLOGY B.A./B.S.

REQUIREMENTS
The major in psychology requires a minimum of 60 credits in the field. Students must complete the required courses in statistics before taking any 400-level course or any course with statistics as a prerequisite.

All students majoring in psychology, especially those that are considering graduate work in psychology, are encouraged to plan their program with an advisor from the Department of Psychology no later than the beginning of their first term of junior standing.

All psychology majors are strongly encouraged to participate in the advising process, which includes a Group Orientation session, peer mentoring, and faculty advising. Information about the psychology advising program is available on the Psychology Department website.

It is recommended that freshmen not enroll in psychology courses unless they have a B average (3.00 GPA) or above in high school.

In addition to meeting the general University degree requirements, the student must meet the following requirements for major:

All majors are encouraged to begin their work in statistics as soon as possible in preparation for Psy 321, which is a prerequisite for many of the upper-division courses.

Human Diversity Requirement
Besides taking courses in a range of subjects in psychology, majors are also required to take a course in human diversity. To fulfill this requirement students can choose to take any 300- or 400-level class in the following
subjects: Black Studies, Chicano/Latino Studies, Indigenous Nations Studies, and Women’s Studies, or any of the following classes:

The list above is not comprehensive; students can also use courses not included here with advisor approval.

Subtotal: 60

All courses submitted to satisfy the requirements for a major in psychology, including the mandatory math courses, must be passed with a grade of C- or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements.

Students considering graduate work in psychology should be especially well prepared in mathematics and should take experimental psychology (Psy 454). They should consider participating in research with a faculty member. They are encouraged to develop breadth by pursuing interests in diverse fields outside psychology before beginning the greater specialization of graduate work.

PSYCHOLOGY MINOR

REQUIREMENTS

To earn a minor in psychology a student must complete 28 credits (8 credits of which must be taken in residence at PSU), to include the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>Psy 401-409</td>
<td>300- or 400-level psychology courses (excluding 401 to 409)</td>
<td>20</td>
</tr>
</tbody>
</table>

Subtotal: 28

All courses submitted to satisfy the requirements for a minor in psychology must be passed with a grade of C- or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department minor requirements.

PSYCHOLOGY SECONDARY EDUCATION PROGRAM

Advisor: A. Mashburn

(See Interdisciplinary Studies: Social Science (p. 279))

Graduate programs

The Department of Psychology offers work leading to the degrees of Master of Arts and Master of Science. The department also offers a Ph.D. in Applied Psychology.

Graduate training in psychology at Portland State University provides a sound basis in traditional areas of psychology, while emphasizing applications of psychological theory and research to problems of contemporary society.

The program focus is on applied psychology with an emphasis on five areas: Applied Developmental, Industrial/Organizational, Applied Social, Community, and Applied Quantitative Psychology. The aim is to prepare graduates for research and service roles in a variety of settings such as government agencies, businesses, educational systems, and hospitals. It should be noted that the graduate program in psychology does not offer graduate degrees in clinical or counseling psychology.

ADMISSIONS REQUIREMENTS

Applications may be made to either the doctoral (Ph.D. in Applied Psychology) or the terminal master’s degree
(M.A. or M.S. in Psychology) programs. Those admitted to the master’s program may later apply for admission to the doctoral program, conditional upon demonstrated competence at the master’s level. Applicants to either program are expected to have had preparation in experimental psychology and methods of data collection and analysis, in addition to content areas in psychology. Admissions granted to applicants who do not meet these requirements may be conditional upon completing preparatory coursework.

Applicants should provide the following documents: Graduate Record Examination scores (i.e., GRE scores for verbal, quantitative, and analytic abilities), if required by the area to which the applicant is applying; three letters of recommendation from individuals knowledgeable about the applicant’s abilities (preferably from faculty members at colleges or universities attended); transcripts; and a 500- to 1000-word statement of academic and personal goals, which specifically addresses experiences with scientific writing, research methods, and statistics. The psychology subject test of the GRE is not required. Completed applications should be received by December 15 for admission the following academic year.

**PSYCHOLOGY M.A./M.S.**

Candidates for the master’s degree must earn a minimum of 54 credits, including thesis, in approved graduate courses, forty of which must be earned in psychology. Proficiency in a foreign language is required for the Master of Arts degree, but not for the Master of Science degree. Students’ individual programs are determined in consultation with their advisors.

**REQUIREMENTS**

The required coursework for the master’s program is as follows:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Subjects</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Psy 521</td>
<td>Univariate Quantitative Methods</td>
<td>5</td>
</tr>

</tr>
<tr>
<td>Psy 503</td>
<td>Electives</td>
<td>24</td>
</tr>
<tr>
<td>Thesis</td>
<td>Thesis</td>
<td>8</td>
</tr>
</tbody>
</table>

**Thesis**

The student must submit and defend the thesis at an oral examination. Subtotal: 54

**APPLIED PSYCHOLOGY PH.D.**

Candidates for the Ph.D. in applied psychology must earn a minimum of 108 credits in approved graduate courses. Candidates will undertake a program of study determined in consultation with an advisory committee. The doctoral program is equivalent to the two-year master’s program described above plus additional required courses in research design, methodology, and ethics.

**REQUIREMENTS**

The required coursework for the Ph.D. program, including the equivalent to the two-year master’s program, is as follows:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Subjects</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

www.pdx.edu/sociology/

• B.A., B.S.
• Minor
• M.A., M.S.
• Ph.D.
• Ph.D.—Participating department in Urban Studies Doctoral Program

Undergraduate programs
Sociology is the study of society and human interaction. Sociologists examine groups as small as two or as large as billions. From the smallest friendship or family group to the great global web of human activity, sociologists analyze and interpret our world.

Sociologists use many theoretical approaches, data, and research techniques. Information comes from many sources including surveys, historical documents, census data, intensive interviews, and participant observation. This information is analyzed and used to explain phenomena such as power relations, beliefs and value systems, organizations, and the larger structure of society.

Sociology provides valuable tools for thought and a strong foundation for careers in many fields including education, business, journalism, government, and social service. A major in sociology prepares students for graduate programs leading to careers in research, public service, and higher education. Sociological knowledge helps create informed and thoughtful citizens.

DEGREE MAPS AND LEARNING OUTCOMES
To view the degree maps and expected learning outcomes for Sociology's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

SOCILOGY B.A./B.S.

REQUIREMENTS

In addition to meeting the general University degree requirements, the sociology major is required to take a minimum of 49 credits in sociology courses (including 28 credits in electives in the field) and the mathematics course in statistical methods.

Courses

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>

</tbody>
</table>

Up to 10 credits of electives taken under the undifferentiated grading option (pass/no pass) in 200- or 300-level sociology courses can be applied toward fulfilling departmental major requirements. Differentiated grades of C or above are required for all other sociology courses and for Stat 243. A student must pass Soc 301 and Soc 302 with a grade of C or better before taking other required courses as a sociology major.

Subtotal: 53

SOCILOGY MINOR

To earn a minor in sociology a student must complete 28 credits (16 credits of which must be taken in residence at PSU, and 16 credits of which must be upper-division), to include the following:

Upper-division sociology credits: 12 credits of which must be at the 400-level.

Up to 10 credits taken under the undifferentiated grading option (pass/no pass) can be applied toward fulfilling departmental minor requirements.

Subtotal: 28
SOCIOLGY B + M ACCELERATED BACHELORS PLUS MASTERS PROGRAM

Students currently enrolled in the BA or BS in Sociology program may be admitted directly into the MA/MS in Sociology program and share up to 20 credits of graduate level credit with the BA/BS and MA/MS in Sociology. Students can potentially complete both degrees in 4 + 1 years.

Students can apply for the Bachelors plus Masters in their junior year to be eligible to take 500-level courses in their senior year. The Bachelors plus Masters programs should begin in fall of their final year as an undergraduate with enrollment in SOC 590. For more information on applications or the Bachelors plus Masters program, email asksoc@pdx.edu.

SOCIOLGY SECONDARY EDUCATION PROGRAM

(See Interdisciplinary Studies: Social Science (p. 279)).

Graduate programs

The department of Sociology offers coursework leading to the degrees of Master of Arts (M.A.) and Master of Science (M.S.), as well as the Doctor of Philosophy (Ph.D). Students with a Bachelor’s degree may enter our Master’s degree program, which offers training in both quantitative and qualitative research methods. The candidate pursuing a terminal M.A./M.S. degree must complete a minimum of 45 graduate credits, including 25 credits in core sociology courses and 20 credits of electives (8 of which may be in departments other than Sociology).

Students with a Bachelor’s degree can also choose to enter the graduate program to earn a Ph.D. in Sociology. The candidate pursuing a Ph.D must first complete their Master’s degree, which includes a thesis project for doctoral-degree seeking students. Students pursuing a Master’s degree on the way to a Ph.D must complete a minimum of 54 graduate credits, including 22 credits in core Sociology courses, 24 credits of electives (12 of which may be in departments other than Sociology), and 8 credits of thesis. The student must pass an oral defense of their Master’s thesis. Once they have earned their Master’s degree they can, with approval, continue on after receiving a Master’s degree to complete a Ph.D degree.

Students with Master’s degrees from other programs and/or universities can apply to enter the graduate program at the Ph.D. level.

Graduate training in Sociology prioritizes community engagement and policy-relevant research focused on improving people’s daily lives and society more broadly.

Students focus on the integration of theory with a variety of quantitative and qualitative methodological approaches to study the dynamics of human behavior and social interaction in five substantive areas including health and medicine; environmental sociology, sociology of education; sociology of gender; and law, criminology, and deviance. The program aims to prepare graduates for research and service positions in government, the non-profit sector, private industry, and the academy.

(p. 407)

ADMISSIONS REQUIREMENTS

Students must be admitted to the master’s and Ph.D. programs by the department and by the University. Admission ordinarily is granted only to those students beginning the program in the Fall term. Students are expected to move through the core courses as a cohort and work together with the faculty in a team environment.

In addition to the general University admission requirements for advanced degrees, the applicant for a sociology master’s or Ph.D. degree program must have the following materials to submit as part of a complete application:

- Sociology online application.
- Three letters of recommendation from persons familiar with the applicant’s academic performance.
- Unofficial transcripts from all post-secondary institutions attended for evaluation purposes. Official transcripts will be requested once admitted.
- A letter of application describing their sociological interests.
- A writing sample.
- A resume, or Curriculum Vita.

Applicants for the graduate degree are normally expected to have a bachelor’s degree in Sociology. Students with other undergraduate majors may be accepted; however, they must have completed courses in sociological theory, research methods, and statistics, or their equivalents.

DEGREE REQUIREMENTS

See University master’s degree requirements (p. 51). Specific departmental requirements are listed below.

SOCIOLGY M.A./M.S.

Students working for the Master of Arts degree must satisfy the language requirement.

503-725-3533
www.pdx.edu/speech-hearing-sciences

- B.A., B.S.
- M.A., M.S.
- Undergraduate Certificate

The Department of Speech and Hearing Sciences offers courses and clinical experiences designed to meet the needs of individuals pursuing careers in speech-language pathology, audiology, and the speech, language, and hearing sciences, and related career paths. Advanced degree holders in these fields provide services across a variety of settings to people with communication challenges and/or differences. The department offers an undergraduate and master's degree program in Speech and Hearing Sciences, as well as a Communication Sciences and Disorders certificate with baccalaureate. The master's degree program is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA).

**Undergraduate programs**

Undergraduates in the Speech and Hearing Sciences Department explore human communication, which includes development, diversity, and complexity of communication, as well as developmental and acquired
disorders. The program leads to a B.S. or B.A. in Speech and Hearing Sciences, or a certificate with baccalaureate in Communications Sciences and Disorders (CSD).

The coursework explores foundational knowledge in speech and hearing sciences, clinically-based knowledge related to communication, cognition, swallowing and hearing disorders, and the complexity and diversity of human communication. In addition to providing a rigorous liberal arts education, this degree provides a foundation for many career paths, including graduate work in speech-language pathology, audiology, and/or speech, language, and/or hearing research. Because communication is central to most human activities, a degree in Speech and Hearing Sciences can also lead to a career in many other fields, including Education, Counseling, Psychology, Social Work, and Community Relations. Coursework or a degree in Speech and Hearing Sciences complements degrees in other programs, such as education, linguistics, psychology, public health administration, social work, music, and allied health professions. The CSD Certificate provides a strong educational foundation for entry into graduate programs in Speech-Language Pathology and Audiology, fulfills all but one requirement for entry into PSU's graduate program in SPHR, and provides the required educational component for licensing of Speech-Language Pathology Assistants in Oregon and other states.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Speech and Hearing Sciences' undergraduate degrees, go to https://www.pdx.edu/academics/programs/undergraduate/speech-and-hearing-sciences.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

SPEECH AND HEARING SCIENCES B.S./B.A.

REQUIREMENTS

In addition to meeting the general University degree requirements, the speech and hearing sciences major must meet the minimum departmental requirements as follows: all Core Courses, 8 credits of SpHr electives, and 4 credits of Stat 244, Soc 396, or equivalent course covering basic statistical reasoning for the social sciences.

In addition, students are strongly encouraged to gain proficiency in a second language. Students planning to pursue graduate study should complete one or more courses in each of the following areas: statistics (a standalone statistics course), biological science, physical sciences (Physics or Chemistry), and social/behavioral sciences (see current ASHA Certification Standards). It is strongly recommended that these courses are taken prior to taking Advanced Core Courses. A grade of C- or above is required for all major requirements.

Foundational Core Courses (28 credits)

SpHr 222 Introduction to Speech, Language & Hearing Sciences 4
SpHr 370 Phonetics and Acoustics 4
SpHr 371 Anatomy and Physiology of Speech and Swallowing 4
SpHr 372U Speech and Language Development in Children 4
SpHr 461 Neurology of Speech and Hearing 4
SpHr 487 Hearing Sciences 4
SpHr 465 Introduction to Research Methods for Clinical Scientists 4

Clinical Core Courses (25 credits)

SpHr 394 Guided Observation 1
SpHr 463 Language Disorders in Children 4
SpHr 464 Speech Disorders in Children 4
SpHr 488 Clinical Audiology 4
SpHr 489 Aural Rehabilitation 4
SpHr 495 Neurogenic Communication Disorders 4
SpHr 496 Introduction to Clinical Management 4

Elective Courses (choose 8 credits)

SpHr 385 Autism Spectrum Disorders 4
SpHr 471 Neurolinguistics 4
SpHr 473 Perspectives on Disability 4
SpHr 480 Introduction to Sociocultural Aspects of Interactions 4
SpHr 485 Bilingualism and Communication Disorders 4
SpHr 491 Principles of Behavior Analysis: Clinical Applications 4
SpHr 410 Selected Topics 0-12

COMMUNICATION SCIENCES & DISORDERS UNDERGRADUATE CERTIFICATE

A candidate for a certificate must satisfy all University requirements for a baccalaureate degree with an academic major in any field. A CSD Certificate may be pursued as a post-baccalaureate program. A student pursuing a certificate in CSD must complete 49 credits, distributed as follows:

The above list is not comprehensive; students can also select a course not included here with advisor approval.

**Total Credit Hours: 49**

Students need to earn a C- or higher in all courses to earn the certificate. Students cannot take courses for the certificate pass/fail, with the exception of SpHr 394 Guided Observation. Students preparing for graduate programs in Speech-Language Pathology or Audiology should know that a stand-alone Statistics course is a prerequisite requirement, as well as the American Speech-Language Hearing Association (ASHA) requirements of a biological science course, a chemistry or physics course, and a social science course.

### Graduate program

The department offers a program leading to the Master of Arts or Master of Science degrees with specialization in speech-language pathology. The Council for Accreditation of Academic Programs (CAA) of the American Speech-Language-Hearing Association accredits the SPHR graduate program. Graduates of the program meet the requirements for clinical certification of the CAA and are eligible for licensure as speech-language pathologists by the state of Oregon.

The graduate curriculum includes courses aimed at providing students with a strong foundation in the nature of speech, language, communication, and swallowing disorders as well as the screening, assessment, and treatment of those disorders. A second major component of the program consists of supervised clinical practica in which students work directly with individuals who have swallowing, cognition, and/or communication disorders, challenges, or differences. This type of activity enables students to apply knowledge gained in the classroom and acquire requisite professional skills by partnering with clients from different backgrounds and of all ages. Students obtain practical experience through department-based clinics and in a broad range of externship community placements, including medical and educational settings.
ADMISSION REQUIREMENTS

In addition to the University requirements for admission to graduate programs (p. 41), candidates for the Master’s degree program in speech-language pathology must have a background of undergraduate courses in speech and hearing sciences and related disciplines. The following courses (or their equivalents) are required prerequisites:

PREREQUISITES

| Courses | SpHr 370: Phonetics and Acoustics | 4 |
| SpHr 371: Anatomy and Physiology of Speech and Swallowing | 4 |
| SpHr 372U: Speech and Language Development in Children | 4 |
| SpHr 461: Neurology of Speech and Hearing | 4 |
| SpHr 487: Hearing Sciences | 4 |
| SpHr 488: Clinical Audiology | 4 |
| SpHr 489: Aural Rehabilitation | 4 |
| Stat 243: Introduction to Probability and Statistics I | 4 |
| And Stat 244: Introduction to Probability and Statistics II | 4 |

These prerequisites can be met by completing a Bachelor’s degree in Speech and Hearing Sciences at Portland State University or elsewhere. Individuals with Bachelor’s degrees in other disciplines may complete prerequisite courses by enrolling in the Department as a post-baccalaureate student. All prerequisites must be completed within 5 years of beginning the graduate program.

STRONGLY RECOMMENDED - NOTE: THE FOLLOWING ARE LISTED ON THE UNDERGRADUATE DEGREE PROGRAM, NOT THE POSTBACCALAUREATE PROGRAM

The following courses are strongly recommended:

| Courses | SpHr 463: Language Disorders in Children | 4 |
| SpHr 464: Speech Disorders in Children | 4 |
| SpHr 495: Neurogenic Communication Disorders | 4 |
| SpHr 496: Introduction to Clinical Management | 4 |

All students applying for admission to the Master’s degree program should also have successfully completed one or more courses in each of the following areas: statistics (a stand alone Statistics course), biological science, physical sciences (Physics or Chemistry), and social/behavioral sciences (see current ASHA Certification Standards).

Students may apply for admission to the master’s degree program while in the process of completing their Bachelor’s degree or post-baccalaureate coursework. Completion of the prerequisite courses does not guarantee admission into the program.

Application procedure

Candidates applying for admission to the graduate program in Speech and Hearing Sciences must submit application packets to both the Department and the PSU Admissions Office, as outlined in Master of Arts and Master of Science (M.A. and M.S.). Specific requirements of the Department include:

1. Three letters of reference completed by individuals closely acquainted with the applicant’s academic or employment background. We recommend at least two letters address academic abilities and potential to succeed in the graduate program.

2. Official transcripts from all colleges and universities attended.

3. A written narrative (Personal Statement) outlining the candidate’s academic background and professional goals.

Detailed information regarding the application process can be obtained from the Web site: www.pdx.edu/speech-hearing-sciences.

SPEECH AND HEARING SCIENCES M.A./M.S.

See University Master’s degree requirements (p. 51). Specific departmental requirements are as follows:

REQUIREMENTS

1. Students must demonstrate the knowledge and skills required for the Certificate of Clinical Competence (CCC) from the Council for Clinical Certification (CFCC) of the American Speech-Language-Hearing Association.

2. Students must complete a minimum of 77 graduate credits: 50 credits of core coursework, 6 credits of at least 3 elective courses, 18 credits of practicum, and a minimum of 3 credits of a culminating experience.

3. Coursework. Students must complete 14 required core courses and three elective courses. A grade of B- or above must be obtained for each course.

CORE Courses (50 credits):

| Course | SpHr 530: Evidence-based Practices in Communication Disorders | 4 |
| SpHr 540: Multicultural Topics in Communication Disorders | 2 |
| SpHr 541: Bilingual Topics in Communication Disorders | 2 |
| SpHr 545: Pathways to Professional Practice | 2 |
SpHr 554  Advanced Speech Sound Disorders: Theories and Application  4
SpHr 555  Assessment and Treatment of Dysphagia in Adults  2
SpHr 556  Assessment and Treatment of Dysphagia in Pediatrics  2
SpHr 558  Symbol Systems in Early Communication  2
or
SpHr 559  Augmentative and Alternative Communication  2
SpHr 560  Research Methods in Communication Sciences and Disorders  4
SpHr 562  Cognitive Rehabilitation  4
SpHr 563  Adult Language Disorders  4
SpHr 566  Motor Speech Disorders  4
SpHr 581  Stuttering  3
SpHr 582  Voice Disorders  3
SpHr 584  Assessment and Treatment of Language Disorders: Birth to Age Five  4
SpHr 585  Assessment and Treatment of Language Disorders in School-aged Children and Adolescents  4

**ELECTIVE Courses (choose three; 6 credits):**
SpHr 546  Professional Ethics  2
SpHr 553  Counseling in Communication Disorders  2
SpHr 564  Medical Speech-Language Pathology I  2
SpHr 567  Cleft and Craniofacial Disorders  2
SpHr 586  Autism  2
SpHr 587  Advanced Topics in Literacy in Children with Language Impairments  2
SpHr 588  Advanced Assessment and Intervention for Bilinguals  2

Additional electives may be offered as SpHr 510 courses.

5. Culminating Experience. Students must complete one of the culminating experiences listed below. The decision as to which of these options to pursue is to be made in conjunction with the student’s academic adviser.

a. Comprehensive Examination—The student must pass written comprehensive examinations. These are normally taken in the term preceding graduation, in the student’s second year of graduate study. Specific details of the administration and scoring of the exams will follow current departmental guidelines. Students will register for 3 credits of SpHr 501 Research: Comprehensive Examination during the term in which they write the examination. This is the only graduate course offered on a Pass/No Pass basis.

b. Master’s Project—The student will complete a scholarly project related to his or her academic discipline at the invitation of a faculty member. The student will comply with current departmental guidelines on the selection of the topic and format of the project. The project will be completed under the direction of a faculty member in the department of Speech and Hearing Sciences. Students pursuing this option are required to register for 3 credits of SpHr 506 Special Project with their project director. A letter grade of B- or above is required.

c. Master’s Thesis—Students opting to complete a thesis at the invitation of a faculty member will follow the University guidelines for theses outlined in Thesis (p. 53). In addition to the written thesis, the student must pass a final oral examination before a committee consisting of at least three faculty members from the department of Speech and Hearing Sciences. Students pursuing this option are required to register for a minimum of 6 to 9 credits of SpHr 503 Thesis. A letter grade of B- or above is required.

**Systems Science Program**
Harder House
1604 SW 10th Avenue
503-725-2070
www.pdx.edu/systems-science

**SYSTEMS SCIENCE M.S.**

**Master of Science in Systems Science**
Students choose a combination of systems science courses plus approved courses in associated disciplines. Topics and subject areas are the same as those for the PhD program (see below). Students learn a wide variety of systems ideas, use them for modeling and analysis in conjunction with ideas and methods from other disciplines, and gain expertise in problemsolving and integrative thinking.
ADMISSION REQUIREMENTS

Students applying to the Masters program must submit the following for evaluation by the Systems Science Admissions Committee:

1. A completed Application to Graduate Program form,
2. Official or unofficial copies of academic transcripts from all colleges and universities attended,
3. Two letters of recommendation,
4. The student’s personal statement, explaining the applicant’s goals for the program, and
5. If applicant would be a foreign student, TOEFL score (or other suitable evidence of English competency).

DEGREE REQUIREMENTS

General requirements for master’s degrees can be found at http://pdx.smartcatalogiq.com/en/2014-2015/Bulletin/Graduate-Studies/Degree-requirements/Master-s-Degree. Among the 45 hours required, 24 credits must come from letter-graded courses (pass/no pass are not applicable) listed under Systems Science in the PSU Bulletin numbered SySc 510-599 or SySc 610-699. The remaining 21 credits can be satisfied through one of three options:

1. Thesis Option: An additional 12 credits that can be letter-graded Systems Science courses (numbered as above), approved courses from other departments (see http://www.pdx.edu/sysc/approved-courses-ms-sysc), up to 3 credits of SySc 507 (Seminar) with a pass grade, and/or up to 4 Systems Science by-arrangement credits. The student must also complete 9 thesis credits and write a master’s thesis. A student selecting the thesis option must form a thesis committee of at least three faculty members, including a core faculty member from Systems Science.

2. Examination Option: An additional 21 credits that can be Systems Science courses (numbered as above), up to 3 credits of SySc 507 (Seminar) with a pass grade, approved courses from other departments (see http://www.pdx.edu/sysc/approved-courses-ms-sysc), and/or up to 4 Systems Science by-arrangement credits. A student selecting the examination option will be required to pass two written comprehensive exams, each of which covers a minimum of 16 credit hours of coursework.

3. Coursework-Only Option: An additional 8 letter-graded Systems Science courses (numbered as above), plus 13 credits of courses that may be either Systems Science courses (numbered as above), approved courses from other departments (see http://www.pdx.edu/sysc/approved-courses-ms-sysc), up to 3 credits of SySc 507 (Seminar) with a pass grade, and/or up to 4 credits of Systems Science by-arrangement credits.

More detailed information is available in the Systems Science Graduate Student Handbook at http://www.pdx.edu/sysc.

SYSTEMS SCIENCE PH.D.

Doctor of Philosophy in Systems Science

The doctoral program emphasizes systems ideas and methods, more specifically systems thinking, system structure and dynamics, data modeling, computer simulation, networks, complex adaptive systems, and decision analysis. Subject areas include environmental systems, sustainability, energy, health policy, biomedicine, and other areas where systems ideas or methods make unique contributions to knowledge.

ADMISSION REQUIREMENTS

To apply to the doctoral program, applicants must submit the following to for evaluation by the Systems Science Admissions Committee:

1. A completed Application to Graduate Program form,
2. Academic transcripts from each institution attended,
3. GRE scores,
4. Three letters of recommendation,
5. Personal statement explaining student’s interests and goals, and
6. TOEFL score or other evidence of English competency if attending as foreign student.

DEGREE REQUIREMENTS

General requirements for doctoral degrees can be found at the Graduate School (p. 50). Additionally, Systems Science requires that students complete 84 graduate credit hours, which can include up to 28 hours of graduate credits completed at other institutions. 48 credits must be completed prior to comprehensive exams; 9 additional credits are required prior to advancement to candidacy, and 27 dissertation credits are required prior to graduation. Students must take SySc 511 (Systems Theory) and SySc 513 (Problem Solving) as letter-graded courses, and must take 3 credits of SySc 507 (Seminar). The remaining 46 hours are completed via one of two options:

1. Core option. Students must complete an additional 24 credits of letter-graded Systems Science labeled courses. The remaining 22 credits might be systems science labeled courses, by-arrangement credits, or courses from an outside discipline. The student’s three comprehensive exams will cover 48 credit hours, including two SySc exam areas of at least 16 credits each, and one field exam area of at least 15 credits.

2. Multidisciplinary option. Students must complete an additional 16 credits of letter-graded Systems Science...
labeled courses plus 15 or more credits from each of two outside and distinct disciplines. The student’s three comprehensive exams will cover 48 credit hours, including one SySc exam area of at least 16 credits, and two choice exam areas with at least 15 credits each.

All doctoral students must pass all letter-graded courses with at least a B grade, and their cumulative GPA must be at least 3.25. Once a student has completed all of the coursework required for his or her comprehensive examinations, he or she forms a comprehensive examination committee with three members, including a core faculty member from Systems Science.

Comprehensive Examinations. Within two to three years after admission (five years maximum), doctoral students must pass their comprehensive exams consisting of three written exams and an oral exam by his or her comprehensive exam committee. For core option students, two exams will cover SYSC areas and one will cover a field area of the student’s choice. For multidisciplinary option students, one exam will cover SYSC areas and two exams will cover field areas representing two distinct and different disciplines of the student’s choice.

Advancement to Candidacy. After passing comprehensive exams, the student prepares a prospectus for dissertation research and recruits dissertation committee members under his or her adviser’s supervision. An application is sent to the Graduate School, who will officially appoint the committee. Once appointed, the chair of the committee becomes the student’s adviser. The student then prepares a proposal for independent research that will result in a significant and original contribution to knowledge in the systems field. When the proposal is approved by the committee and the 57 credit hour requirement (including transfer credits) and all other conditions have been met (including IRB approval if human subjects are involved), the student is advanced to candidacy. PSU requires students to be advanced to candidacy within 3 years of completing their comprehensive examinations.

Dissertation. Once the doctoral student has been advanced to candidacy, he or she completes the proposed dissertation work. Prior to their dissertation defense, doctoral students present their research at the Systems Science Seminar. The candidate’s final defense of his or her completed dissertation is a presentation open to the public. It must be completed by the end of the 6th week of a term, and no later than 3 years after the student’s advancement and no later than 12 years after the student’s admission. Typically, the dissertation is completed in one or two years after the proposal is approved. The formal defense is often preceded by a pre-defense meeting two weeks earlier, where the committee may recommend the candidate do more work before attempting the final formal defense.

Prior to graduation, students must register for 27 credits of dissertation research (SySc 603), 9 of which may be taken upon completion of comps; another 9 may be taken after the dissertation committee has been requested (with form GO-16D); the rest must be taken after the dissertation proposal has been approved. The student can anticipate approximately four to six years of full-time study beyond the baccalaureate degree in order to satisfy the program requirements. More detailed information is available in the Systems Science Graduate Student Handbook at http://www.pdx.edu/sysc.

SYSTEM SCIENCE GRADUATE CERTIFICATES

The Systems Science program offers graduate certificates in two specialty areas: Computational Intelligence and Computer Modeling & Simulation. Students should apply to the Graduate Certificate Program before they finish all of the coursework for the graduate certificate, because they must be currently enrolled in order to validate their admission to the graduate certificate programs, and they must be currently enrolled in order to be awarded the Graduate Certificate. All courses applied to the Graduate Certificate must be no more than 7 years old at the time of the awarding of the Graduate Certificate. Students should notify the Systems Science office when they are finishing their last course for the Graduate Certificate and run a DARS audit to ensure all requirements have been met.

Certificate Requirements

In order to earn a graduate certificate, a student must:
- complete 15 credit hours of courses in the specialty area,
- earn a GPA of 3.25 for these courses, and
- complete the online Application for Graduation.

Admission requirements

Students admitted to the master’s or doctoral program need not apply separately for admission to a graduate certificate. But to add the certificate to their master’s or doctoral program, they must submit the GO-19M or GO-19D form (see http://www.pdx.edu/ogs/forms to The Graduate School at least one term before they apply for completion of the certificate.

Students not admitted to the doctoral or master’s program must submit to Systems Science: (1) a completed Application to Graduate Program form, and (2) official or unofficial copies of academic transcripts from an institution. The admissions committee will recommend the student’s admission if his or her academic transcript shows a completed undergraduate degree with a GPA of 2.75 or higher.
Certificate Requirements

Graduate certificate students must earn at least a B in all courses and their cumulative GPA must be at least 3.25. More detailed information is available in the Systems Science Graduate Student Handbook at http://www.pdx.edu/sysc.

COMPUTATIONAL INTELLIGENCE GRADUATE CERTIFICATE

The graduate certificate in Computational Intelligence encompasses neural networks, evolutionary computing, fuzzy set theory, and artificial intelligence. Typical application areas include pattern recognition, data-mining, control, signal processing, and non-linear optimization.

SYSTEMS MINOR

A Minor in Systems is an ideal complement to majors in the Natural and Social Sciences, Philosophy, Mathematics, Computer Science, Engineering, Public Administration and Business, and to anyone with an interdisciplinary focus. Systems ideas deepen our understanding of complexity and offer general principles that are useful in every field. Applications include environmental, biomedical, and other social and technical problems.

Systems thinking and methods of computer modeling and data analysis empower both practitioners and academics.

REQUIREMENTS (24 CREDITS)

Choose six from the following list:

At least two of the six required courses MUST be taken at the SySc 410-SySc 499 level. A maximum of 4 SySc 405 and/or SySc 409 credits can apply. All courses must be graded and passed with a B- or higher.

Women, Gender, and Sexuality Studies

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Women, Gender, and Sexuality Studies’ undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.
ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See page for Admissions Requirements (p. 8) for more information.

WOMEN'S STUDIES B.A./B.S.

In addition to meeting the general University degree requirements, the student majoring in Women's Studies must complete a required core program of 36 credits and 20 credits of WS electives (with a minimum of 16 upper-division credits) for a total of 56 credits to complete the major.

Each student pursuing a Women's Studies major will select or be assigned an adviser who is knowledgeable in the student's area(s) of academic interest.

Courses taken under the undifferentiated grading option (pass/no pass) are not acceptable toward fulfilling major requirements with the following exceptions: one Women, Gender, and Sexuality Studies elective course, WS 404 Cooperative Education/Internship, or WS 409 Practicum.

The minimum grade allowed to pass major requirements will be 1.7 C-.

SEXUALITY, GENDER AND QUEER STUDIES
B.A./B.S.

In addition to meeting the general University degree requirements, the student majoring in Sexuality, Gender, and Queer Studies must complete a required core program of 36 credits and 20 credits of approved WS electives (with a minimum of 16 upper-division credits) for a total of 56 credits to complete the major.

Each student pursuing a Sexuality, Gender, and Queer Studies major will select or be assigned an adviser who is knowledgeable in the student's area(s) of academic interest.

REQUIREMENTS

The major in Sexuality, Gender and Queer Studies (SGQS) is 56 credits. Those credits are divided as follows:

Core Courses (28 credits)

Other variable and special topic courses with a focus on sexuality may count as electives (e.g., FILM 370U Queer Cinema or Eng 494 Queer Theory); in these instances consult with a SGQS advisor for approval.

The minimum grade allowed to pass major requirements will be 1.7 C-. The only major requirement with a P/NP grading option is WS 409.

Subtotal: 56

**WOMEN'S STUDIES MINOR**

**REQUIREMENTS**

A minor in Women's Studies will consist of 28 credits. Students will be required to take:

- **Core Courses (12 credits)**
  - WS 101 Introduction to Women's Studies 4
  - UnSt 231 Gender and Sexualities 4

- **As well as two of the following courses:**
  - WS 301 Gender and Critical Inquiry 4
  - WS 305 Women of Color Feminist Theory 4
  - WS 307 Resistance, Activism, and Social Change 4
  - WS 315 Feminist Analysis 4
  - WS 412 Feminist Methodologies 4

- **Electives (16 credits)**

  Elective requirements may be fulfilled by any of the following core courses or by WS electives (see WS major electives listing (p. 329)), including courses cross-listed with other departments or approved by a WS adviser.

  - WS 409 Practicum 6
  - WS 411 Experiential Learning Seminar 2
  - WS 415 Senior Seminar 4

  Subtotal: 28

Courses taken under the undifferentiated grading option (pass/no pass) are not acceptable toward fulfilling minor requirements with the following exceptions: one Women, Gender, and Sexuality Studies elective course or WS 409 Practicum.

**SEXUALITY, GENDER, AND QUEER STUDIES MINOR**

The minor in Sexuality, Gender, and Queer Studies is an interdisciplinary program which examines sexual desire, sexual practice, gender expression, gender identity, and the sexed body as more than products of biology, but rather as socially organized, even socially produced phenomena located within specific power formations and subject to historical change. This program questions commonplace knowledge, providing new frameworks for the critical study of gender and sexuality. The curriculum includes a broad spectrum of topics related to sexuality and gender, from queer theory and film to the psychology of masculinities, the history of sexualities, and global issues in sexual health.

The minor consists of 32 credits, including four core courses (16 credits) and 16 credits of electives:

demonstrate proficiency in a second language as an admission requirement. And most BA or MA programs require students to achieve proficiency in a foreign language as a degree requirement. Students may satisfy the foreign language requirements by taking courses offered through the Department of World Languages and Literatures, or as an alternative, by passing a language test. Testing for language requirement equivalence is only available for languages listed on the WLL website. If your language does not appear in the testing list, you must satisfy the language requirement through transcripted university or community college coursework. If you have questions about any foreign language requirement, go to http://www.pdx.edu/wll/foreign-language-requirement.

Credit for Prior Learning

Credit for Prior Learning (CPL) may be granted for first- and second-year language sequences only. A student may be awarded credit by taking an exam through CPL for a maximum of one language sequence (12-15 credits). CPL is available only for those languages taught by the department. Credit received by examination is graded P/NP only.

Students of French, German, or Spanish may receive credit for first- or second-year by taking a CLEP exam. The amount of credit awarded will depend on the score received. Students of American Sign Language, Arabic, Chinese, Danish, Modern Hebrew, Italian, Japanese, Korean, Latin, Norwegian, Persian, Portuguese, Russian, Swedish, or Vietnamese should contact the department for individual testing.

Native speakers (defined as students whose formal secondary education was completed in the foreign language) may not receive credit by examination for their native language.

Undergraduate programs

The Department of World Languages and Literatures offers undergraduate majors in Arabic, French, German, Japanese, Russian, and Spanish. (Please note, applications are currently being accepted for the concentration in Chinese.) An undergraduate world language major must complete 32 upper-division credits (numbered 300 or higher) in language, literature and culture, an additional 8 credits in 400-level language and literature courses (excluding 401-410, except for Fr which accepts 401-410), 8 credits in adviser-approved electives, and 4 credits in linguistics (Ling 390, WLL 390, or a linguistics course in the target language). French majors must include a minimum of two courses from the 341, 342, 343, 344 sequence and a minimum of 16 400-level credits in their total program. Spanish majors must include at least one course from the 341, 342, 343, 344, 345 sequence and a minimum of 16 400-level credits in their total program.

REQUIREMENTS

Courses

Language, literature, and culture (32 credits)

(in Fr this must include two courses from the 341-342-343-344 sequence and at least 16 400-level credits in their total program)

(in Span this must include one course from the 341-342-343-344-345 sequence and at least 16 400-level credits in their total program)

400-level courses in the major language (8 credits)

(excluding 401-410, except for Fr which accepts 401-410)

Adviser-approved electives (8 credits)

Linguistics (4 credits)

WLL 390 Languages of the World 4
Ling 390 Introduction to Linguistics 4
or a linguistics course in the major language

Subtotal: 52

• Before being admitted to 400-level courses, students will be expected to demonstrate proficiency at a level determined by the individual language program.

• No more than 8 credits of courses numbered 404 (Cooperative Education) may be counted toward the major.

• 20 of the required 52 credits must be taken in residence at PSU (excludes credit by exam but includes study abroad credit from PSU approved programs).

• All courses used to satisfy major requirements must be passed with a grade of C or higher. (C- and P are not acceptable.) Students majoring in a world language must maintain a minimum GPA of 2.50 on all courses used to satisfy the major requirements.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for World Languages and Literatures' undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

WORLD LANGUAGE B.A.
WORLD LANGUAGE MINOR

The Department of World Languages and Literatures offers undergraduate minors in American Sign Language (ASL), Arabic, French, German, Italian, Japanese, Modern Hebrew, Persian, Russian, Spanish, and Turkish. (Please note, applications for the concentration in Chinese are not currently being accepted.) An undergraduate world language minor must complete 20 upper-division credits (numbered 300 or above) in language, literature, or culture, at least 12 of which are in the target language, and 4 credits in general linguistics (WLL 390, Ling 390, or a linguistics course in the target language).

REQUIREMENTS

Courses

| Phil 415 | Aristotle | 4 |
| TA 471 | Theater History: Periods and Topics | 1-4 |

Subtotal: 40

- Twelve of the required 40 credits must be taken in residence at PSU.
- All courses used to satisfy minor requirements must be graded C or higher. Students minoring in classical studies must maintain a minimum GPA of 2.50 in all courses used to satisfy the minor requirements.

INTERCULTURAL COMPETENCE FOR THE WORKPLACE UNDERGRADUATE CERTIFICATE

The Certificate in Intercultural Competence for the Workplace offers a focused trajectory of coursework options designed to enhance intercultural competence in professional and workplace settings. The required 16-27 credits (total number of credits varies according to the language a student studies and prior knowledge of language) can be completed as an integrated part of an undergraduate bachelor’s degree or as a stand-alone course of study. The Certificate in Intercultural Competence for the Workplace would be completable within one academic year or, for students who have prior knowledge of a world language, 1-2 terms.

AREA 1: WORLD LANGUAGE

Completion of one year of world language study, equivalent to 12 or 15 credits of first-year language, OR one 4- or 5-credit language course at the level of 103 or higher.

Subtotal: 4-15

AREA 2

**Subtotal:** 4

**Total Credit Hours: 16-27**

At least 12 credits towards the certificate must be taken at PSU.

All courses used to satisfy certificate requirements must be passed with a grade of C or higher. (C- and P are not acceptable.)

**WORLD LANGUAGE PEDAGOGY CERTIFICATE**

The Certificate of World Language Pedagogy familiarizes students with the instructional methodology of teaching world languages. It is designed to fit into WLL major and minor programs as well as other fields, including Applied Linguistics, Education, and Communication. It is especially suitable for people who have a high level of proficiency in a world language, wish to teach a world language at a private or public K-16 school in the US, or intend to apply to GTEP or other teacher education programs. Candidates may enroll as undergraduate or post-
baccalaureate students. The certificate will be available in
the following languages: Arabic, Chinese, French,
German, Italian, Japanese, Persian, Russian and Spanish.
Students are required to take a total of 20 upper-division
credits covering the following four areas: 1. Methods, 2.
Linguistics, 3. Content, 4. Practicum. They are expected to
have a degree of language proficiency that is determined
by each language section in order to qualify for the
certificate. Students will have an adviser for the certificate
who will guide them through the coursework.

REQUIREMENTS

Students are required to take a total of 20 credits covering
the following four areas: Methods, Linguistics, Content,
and Practicum. Students are expected to have a language
proficiency at the level required to complete Methods and
Practicum courses. The required level of proficiency is
determined by each language section. Students will have
an adviser for the certificate who will guide them through
the coursework.

Area 1: Methods (8 credits)

Students will take 2 courses from among the following
methods courses in World Languages or Linguistics
to earn a total of 8 credits in language teaching
methods. With approval of an adviser, methods courses
from other accredited institutions can be used. Ling 438
can only be applied to Area 1 or Area 2.

- Jpn 477 Teaching Japanese As a Foreign Language
- Jpn 478 Teaching Japanese As a Foreign Language
- Span 312 Introduction to Teaching Spanish
- WLL 498 Methods of Teaching Foreign Languages
- Ling 477 TESOL Methods I
- Ling 438 Second Language Acquisition

Area 2: Linguistics (4 credits)

Students will take one linguistics course relevant to the
world language of their choice from the following list. If a
linguistics course is not available in their chosen language
section, the course from Applied Linguistics (Ling 390,
Ling 438) may be taken to meet this requirement. Ling 438
can only be applied to Area 1 or Area 2.

- Ar 414 Advanced Arabic Grammar
- Ar 490 History of the Arabic Language
- Chn 490 History of the Chinese Language
- Fr 325 French Phonetics and Phonology
- Fr 414 Advanced French Grammar
- Fr 490 History of the French Language
- Fr 494 French Linguistics
- Fr 497 Applied French Linguistics
- Ger 414 Advanced German Grammar
- Ger 490 History of the German Language
- Ger 494 German Linguistics
- Ger 497 Applied German Linguistics
- It 390 History of Italian Language
- Jpn 414 Advanced Japanese Grammar
- Jpn 494 Japanese Sociolinguistics
- Rus 325 Russian Phonetics and Phonology
- Rus 414 Advanced Russian Grammar
- Rus 494 Russian Linguistics
- Rus 497 Applied Russian Linguistics
- Span 414 Advanced Spanish Grammar
- Span 490 History of the Spanish Language
- Span 494 Spanish Linguistics
- Span 497 Applied Spanish Linguistics
- WLL 390 Languages of the World
- Span 498 Spanish Linguistics
- Ling 390 Introduction to Linguistics
- Ling 438 Second Language Acquisition

Area 3: Content (4 credits)

Students will take one course of literature, language,
culture, or content area relevant to the language of their
choice. The course may be taught in English or the target
language. Upper division courses from the following areas
can count towards this requirement: Arabic, Chinese,
French, German, Italian, Japanese, Persian, Russian,
Spanish, and World Languages and Literatures.

Area 4: Practicum (4 credits)

Students will complete 4 credits of Practicum in the world
language of their choice (Arabic, Chinese, French,
German, Italian, Japanese, Persian, Russian, or Spanish).
The total of 4 credits can be taken all at once or over
multiple terms. At least 1 credit hour of practicum should
involve instructional experience supervised by WLL
faculty in existing language courses, content courses, or in
the community, (which would be pre-arranged by the
adviser of the target language). The practicum may include
practicum or internship experience abroad. Cooperative
Education/Internship (404 with language prefix, e.g.,
Ar404) and Senior Capstone courses ("Japanese and
Chinese Language for Youth," "Bilingual Education," and
"Teaching/Tutoring Adult ESL") may substitute for
Practicum credits.

All credits should be 300 or above. They may include up to
12 credits taken outside of PSU’s program, and credits
earned through study abroad at a PSU’s partner institution
will be considered as residential credits.

Subtotal: 20

Total Credit Hours: 20

ADVANCED PROFICIENCY IN RUSSIAN
CERTIFICATE (CAPR)

The Certificate of Advanced Proficiency in Russian
(CAPR) is designed to permit students majoring in any
subject to achieve Superior (professional) proficiency in Russian. Candidates may enroll in the program as undergraduate or as post-baccalaureate students.

**Admission requirements**

Students who wish to complete the Certificate program must first be admitted to the Russian Flagship Program (RFP). Sponsored by The Language Flagship, RFP offers both Introductory and Advanced tracks. See www.pdx.edu/russian-flagship/ for details.

**COURSE REQUIREMENTS**

Students in the program take five advanced Russian classes, three content classes conducted in Russian, and six Russian across the curriculum classes attached to the students' general education requirements and individual majors. Students complete their Senior Capstone in Russian.

**Courses**

- **Advanced Russian Language Classes (5 classes):**
  - Rus 325: Russian Phonetics and Phonology, 4
  - Rus 411: Advanced Russian, 4
  - Rus 412: Advanced Russian, 4
  - Rus 413: Advanced Russian, 4
  - Rus 414: Advanced Russian Grammar, 4

  **Subtotal:** 20

- **Content Classes (3 classes) chosen from:**
  - Rus 421: Topics in Contemporary Russian Culture, 4
  - Rus 427: Topics in Russian Literature of the 19th Century, 4

**Total Credit Hours:** 56

- All courses used to satisfy CAPR certificate requirements must be graded C or higher.

**TEACHING JAPANESE AS A FOREIGN LANGUAGE (TJFL) CERTIFICATE**

This program is designed to familiarize participants with principles of instructional methods in teaching Japanese to speakers of languages whose orthography is not kanji-based. It is designed to fit into the programs of majors in a wide variety of fields, including Japanese, education, linguistics, and the social sciences. Candidates may enroll as post-baccalaureate students or while completing undergraduate degree requirements in another field.

**Admission requirements**

1. Admission to Portland State University.
2. Japanese proficiency at the ACTFL Intermediate High level.

Students whose proficiency is lower may be provisionally admitted; they will need to study Japanese while taking other courses in the certificate program.

**COURSE REQUIREMENTS**

To qualify for the TJFL certificate, the student must complete 16 credits in theoretical and applied linguistics (through the departments of World Languages and Literatures or Applied Linguistics), 16 credits in Japanese area studies (literature, history, anthropology, etc.), and 8 credits in TJFL Methods (Jpn 477, Jpn 478).

**Subtotal:** 40

All courses used to satisfy certificate course requirements must be graded C or above.

**FOREIGN LANGUAGE SECONDARY EDUCATION PROGRAM**

Students who wish to teach a foreign language in Oregon secondary schools must be admitted into the Graduate Teacher Education Program (GTEP) in Portland State’s College of Education and complete the requirements for an
Oregon Teaching License. Admission to GTEP as a foreign-language specialist requires a bachelor’s degree or equivalent preparation in a world language taught in Oregon schools and the recommendation of the Department of World Languages and Literatures. For other criteria, please refer to the College of Education section of this Bulletin.

In order to be recommended by the department, the applicant must have:

1. Applied for admission to the Graduate Teacher Education Program in the College of Education (see Graduate Teacher Education Program (p. 146)).
2. Completed a B.A. or B.S. which includes coursework equivalent to the 52 credits required for a major in one foreign language at Portland State University.
3. Maintained a 3.00 GPA in the last 40 of the above 52 credits earned.
4. Obtained an Oral Proficiency Rating of Advanced High or higher on the ACTFL scale in French, German, or Spanish, or a rating of Intermediate High or higher in Japanese or Russian.

The Department of World Languages and Literatures highly recommends that applicants earn upper-division credits in their chosen language beyond the minimum of 52 required; that they spend time in a relevant program abroad; and that their coursework include as many of the following as possible: Phonetics, General Linguistics, Applied Linguistics, Culture and Civilization, Practicum, and Methods of Teaching Foreign Languages.

Graduate programs

The Department of World Languages and Literatures offers degree programs leading to the M.A. in World Language with a major in German, Japanese, or Spanish, and the M.A. in World Languages and Literatures, with a concentration in two world literatures and linguistics. Admission to the MA in French has been suspended effective fall 2020, and no applications are being accepted at this time.

ADMISSION REQUIREMENTS

All applicants for admission must meet the University admissions requirements (p. 8).

Master of Arts in World Language

Applicants for admission must also meet the following departmental requirements:

1. A Bachelor of Arts degree or its equivalent in the major language, with a minimum GPA of 3.00 in all coursework.
2. Oral and written proficiency: Advanced High on the ACTFL scale in French, German, and Spanish; Advanced Low in Japanese.

Master of Arts in World Languages and Literatures

Applicants for admission must also meet the following departmental requirements:

1. In the primary language:
   a. Bachelor of Arts in the language with a 3.00 GPA in the literature courses, or its equivalent as determined by the Department;
   b. Oral and written proficiency: Advanced High on ACTFL scale
2. In the secondary language: Demonstration of third-year proficiency.

DEUTSCHE SOMMERSCHULE AM PAZIFIK

Graduate credits earned in German through the Deutsche Sommerschule am Pazifik (DSaP) can be accepted as in-residence credit at Portland State University only if taken after formal admission to the M.A. in World Language program in German or the M.A. in World Languages and Literatures in German. Graduate credit earned at the DSaP prior to admission to either program is normally limited to 15 credits, in accordance with the University’s transfer regulations.

An M.A. degree in German earned solely by attendance at the Sommerschule normally entails four summers’ work plus thesis.

WORLD LANGUAGE M.A.

The M.A. in World Language is a graduate degree with a major in German, Japanese, or Spanish language and literature. Admission to the MA in French has been suspended effective fall 2020, and no applications are being accepted at this time. It is available with a thesis and a non-thesis option. Students should consult with their adviser to determine the best option.

A candidate for the Master of Arts in World Language must complete a minimum of 45 graduate credits, of which 30 must be taken in residence after admission to the degree program. The 45 credits are to be distributed as follows:

REQUIREMENTS

Thesis option

<table>

</tr>
<tr>
<td>Span 597</td>
<td>Applied Spanish Linguistics</td>
<td>4</td>
</tr>
</tbody>
</table>

#### English

- **Thesis option:** Submit a thesis, written in either the foreign language or in English, and pass a final examination (in Spanish this includes both written and oral examinations) in accordance with University requirements.

- **Non-thesis option:** Submit two research papers in different adviser-approved subject areas, written either in the foreign language or in English, and pass a final written and oral examination.

### WORLD LANGUAGES AND LITERATURES M.A.

The M.A. in World Languages and Literatures is a graduate degree with concentration in a primary language, a secondary language, and in linguistics. The primary language may be German, Japanese, or Spanish; the secondary language may be Arabic, Chinese, French, German, Japanese, Russian, or Spanish. Admission to the MA in French has been suspended effective fall 2020, and no applications are being accepted at this time.

### Notes

- Note: The student's program may include, with adviser's approval, a maximum of 12 credits in 501 and/or 505 and a maximum of 9 credits in 508 and/or 509 combined. See Credit Distribution and Limitations for Master's Degrees.

- In addition to the required coursework, the candidate will have to:
  - **Thesis option:** Submit a thesis, written in either the foreign language or in English, and pass a final examination (in Spanish this includes both written and oral examinations) in accordance with University requirements.
  - **Non-thesis option:** Submit two research papers in different adviser-approved subject areas, written either in the foreign language or in English, and pass a final written and oral examination.

Note: 500-level literature may not include Literature in Translation.

Note: If upper-division courses in fourth-year language have been successfully completed at the undergraduate level (with a GPA of 3.00 or above), the equivalent number of Advanced Language credits can be waived, reducing the total credits required by a maximum of 8.
Subtotal: 12

In addition to the required coursework, the candidate will have to:

• Submit two research papers to the graduate committee, one dealing with the primary, the other with the secondary area. These may be written either in the primary or secondary languages, respectively, or in English.

• Pass a final comprehensive written and oral examination over coursework taken in the primary and secondary areas and over the research papers.

About the School of Public Health

Ending health disparity, in Oregon and around the globe

The School of Public Health unites two of Oregon’s leading universities to educate the next generation of public health leaders, with a vision of ending health disparities in Oregon and around the globe. This unique collaboration combines the strengths of a world-class academic health center with the deep community involvement and diversity of the state’s only urban research university. Our vision is to be the premier destination in Oregon for students of all backgrounds who want to enter the health field and improve lives in their communities.

Collaboration

Two universities, one mission: Better health for all

Oregon Health & Science University is known internationally for groundbreaking and life-saving research in cancer and medicine. Portland State University is a national model for community engagement and academic innovation. Together, the two universities offer unmatched opportunity for students to learn in the classroom and apply that knowledge in real-world settings.

Access & Equity

A vision of health equity

One of our top goals is to increase the number of underserved and historically marginalized students in the health field. This serves two purposes: to ensure a diverse student body and to enable students to help end health disparities by working in communities that are negatively affected by social, environmental, and health system limitations. Part of our mission is to be an access university, we take pride in the number of students we accept, not how many we reject.

Value

Research + engagement: The best of both worlds

The deep community engagement of PSU faculty and biomedical research expertise at OHSU give students direct access to two distinct but connected areas of academic excellence. Graduates emerge with degrees endorsed by both universities in a field where demand is growing rapidly.

Expanding Role of Public Health

Building healthy populations

With a focus on healthy populations rather than individuals, public health seeks to understand the foundations and social determinants of health and works to resolve disparities. Nutrition, maternal-child health, gun violence, health policy, health literacy and homelessness are only some of the factors in ending health disparities. Populations can be as small as a local neighborhood or as big as an entire region of the world.

Community Partnerships

Connecting with the community

PSU and OHSU have an established network of local and regional partners, including clinics, governmental agencies and nonprofit agencies. This network offers students a wealth of opportunity for internships, hands-on learning and contacts for future employment.

Affordability

An affordable degree with excellent ROI

The cost of a degree from the OHSU-PSU School of Public Health is among the lowest in Oregon and far lower than similar degrees from private colleges. Graduates enter health fields that offer above-average salaries, along with opportunities to work anywhere in the world.

Demand for Graduates

Boundless career opportunities
The health workforce is reaching retirement age, creating a significant gap between demand and supply of health workers in the near future. Graduates can expect a robust career market.

**Doctoral programs**

**COMMUNITY HEALTH PH.D.**

The Community Health program is an interdisciplinary course of study providing students with specialized training in public health promotion. Students will learn to address factors in the broader social, economic, policy and built environments to improve the health of populations. In this program, students build practice and research skills for population-level interventions—including program development, implementation and evaluation. The curriculum further offers opportunities to focus on health across the lifespan. Graduates of the Community Health program will be able to effectively recognize and assess health disparities, promote health equity, and mobilize resources for social change.

Students admitted with a Master’s Degree in Public Health will take the required coursework as shown. Students admitted with an undergraduate degree or a graduate degree other than a Master in Public Health will be required to take EPI 612 Epidemiology I and PHE 511 Foundations of Public Health as electives.

For more information and instructions on how to apply visit the PhD in Community Health web page.

**Subtotal: 37**

Students are required to be enrolled in the 1-credit per quarter PHE 623 Doctoral Seminar in Health Research for a total of 6 credits during the first two years (6 quarters) of the program. The Doctoral Seminar in Health Research will meet weekly with a faculty instructor on topics such as the critical evaluation of health research, hypothesis generation, publication and review process, grant application process, and program requirements.

### Methods Core

</tr>
</tbody>
</table>

**Subtotal: 23**

The required methods courses will cover traditional epidemiological as well as other social science research methods. Competencies will include study design, sampling, measurement, evaluation, qualitative research and analysis.

### Electives

#### Methods Electives

In addition to the required methods courses, students must enroll in at least 6 credits of methods electives. Elective course selections must be approved by the student’s advisor.

#### Substantive Area Electives

Students must also take at least 12 credits of electives on health topics related to whichever of the three defined areas of emphasis the student has chosen (i.e., social and behavioral health, aging and health, or urban health) or otherwise related to the student's interests and approved by the student’s advisor.

**Subtotal: 21**

### Comprehensive Exam

The written and oral comprehensive examination is taken after the student has finished all required and elective coursework. For full-time students, this exam is expected to take place during the fall term of the student’s third year. Scheduling of this exam for part-time students will be negotiated by the student and his/her advisor.

### Dissertation

Upon successful completion of the comprehensive exam, the student will form a committee of 4 faculty members and a Graduate Office representative who will help guide
the preparation of the dissertation proposal. After committee approval of the student’s written and oral presentation of a dissertation proposal, then approval of the project by the University Human Subjects Research Review Committee application, the student will advance to doctoral candidacy. Students must complete at least 27 credits of PHE 603 Dissertation credits, in addition to having an approved written dissertation and successful oral defense of the dissertation, to be eligible for graduation. The PHE 603 Dissertation credits are by-arrangement credits supervised by the PHE advisor or the dissertation chair (faculty within PHE). Continuous registration with a minimum of 1 PHE 603 Dissertation credit is required while engaged in dissertation research.

**Subtotal: 27**

### Total Credit Hours: 108

### Other Professional Development

The core curriculum has a strong emphasis on community engagement, research mentorship, critical evaluation of research, and professional development. Doctoral students, however, are expected to do more than simply fulfill degree requirements while in the Community Health doctoral program. Some of these extracurricular activities, such as attending lecture series, workshops, and brown bag seminars, are expected of any member of the community of scholars. Other activities, such as serving as research or teaching assistants, provide opportunities for professional development, publication, presentation at conferences, and remuneration.

### EPIDEMIOLOGY PH.D.

Epidemiology is the study of the distribution and determinants of disease frequency in human populations. It is a fundamental science of public health and medicine enabling estimation of disease burden, assessment of risk and resilience factors, and assessment of interventions to reduce disease burden over time. Epidemiology requires a foundation of coursework in epidemiologic methods, biostatistical analysis, and public health disciplines. Epidemiologists with doctorates focus on the causes and prevention of disease in human populations, as well as methods to advance epidemiologic research. Objectives 

Graduates of the OHSU-PSU School of Public Health PhD Program in Epidemiology will acquire the advanced quantitative and analytical skills needed to conduct innovative independent research that advances knowledge of the etiology, prevention, and amelioration of human disease. They will be prepared for positions as scientists in a wide range of public health settings, including universities, federal and state agencies, business, and industry.

### Core Competencies

Students graduating from this program will be able to:

- Apply population-based concepts of chronic and infectious disease epidemiology within appropriate biological, pathophysiological, social, and community contexts.
- Apply methods for collecting, evaluating, and synthesizing existing evidence of health determinants to research on public health problems.
- Apply appropriate data quality assurance and statistical methods for the research questions and study designs used in epidemiologic research.
- Formulate a testable hypothesis and propose a related study design and analytic approach that have the potential for advancing knowledge of the determinants of health and disease.
- Apply ethical principles to problems that arise in epidemiologic research and practice.
- Evaluate scientific, cultural, and political issues on epidemiologic research, including research goals, recruitment of study participants, and communication of results in the appropriate contexts.
- Demonstrate excellent verbal and communication skills in teaching epidemiologic principles and concepts at appropriate levels to different audiences.

For more information and instructions on how to apply visit the PhD in Epidemiology web page.

HEALTH SYSTEMS AND POLICY PH.D.

The Doctoral Program in Health Systems and Policy (HS&P) is an interdisciplinary program of study. It is administered through the OHSU - PSU School of Public Health and draws on faculty with educational backgrounds in public health, health policy, health services research, public affairs, management, economics, epidemiology, social work, psychology, systems science, and sociology from the OHSU - PSU School of Public Health, PSU’s College of Urban and Public Affairs, and other academic units at Portland State University (PSU) and Oregon Health & Science University (OHSU). The program is designed to provide doctoral students with advanced knowledge, analytic skills, and competencies in conducting research and developing teaching and learning skills in health systems and policy with foundations in public health, management theory, health services research, and policy analysis. The program provides a unique educational experience for students interested in immediately applying theory to practice as they prepare for careers as researchers and teachers.

The HS&P curriculum includes core content in health systems and public health, extensive study of policy domains and applications, and intensive training in research methods and research design. This program design helps students to integrate coursework with applied research and practice, and emphasizes community-engaged learning and scholarship reflecting the mission of the SPH.

Students in the HS&P PhD program will master the following competencies by graduation.

Program Competencies

• Apply relevant theories and frameworks to issues pertaining to health systems and policies.
• Select and apply appropriate qualitative and quantitative research techniques to identify strategies to improve health system effectiveness.
• Formulate a testable research question and propose a relevant study design and analytic approach that has the potential to advance knowledge of health systems and policy.
• Conduct an independent study that demonstrates synthesis of knowledge and application of research skills.
• Apply principles of ethics and cultural competence when conducting health systems and policy research and education.
• Evaluate evidence-based public health policy and health systems transformation strategies to identify emerging issues in health systems and policy.
• Create and deliver effective presentations of scholarly activities to academic and lay audiences.

The HS&P curriculum reflects the vision, mission and competencies of the OHSU-PSU School of Public Health. It prepares graduates to address the social determinants of health, and lead in the implementation of new approaches and policies to improve the health of populations. The curriculum is framed around seven competencies that reflect the expectations of doctoral programs in public health. The HS&P program includes core curricular content in health systems and public health, extensive study of policy domains and applications, and intensive training in research methods and research design. The curriculum is designed to help students integrate coursework with applied research and practice, and emphasizes community-engaged learning and scholarship.

For more information and instructions on how to apply visit the PhD in Health Systems and Policy web page.

DEGREE REQUIREMENTS

Prerequisites

Admitted students who have completed a relevant masters degree in health management/policy will be able to waive portions of the required curriculum. All students are required to fulfill prerequisite courses of the equivalent of Epidemiology I, Introduction to Biostatistics, and Foundations of Public Health; students entering with an MPH will usually have completed such content.

Credit requirements

The program includes a minimum of 103 required credits, including 21 credits in required core courses, 18-22 credits in policy courses, 12 credits in health systems courses, and 19-23 credits in research design and analytic methods courses. Students are required to enroll in a one-credit health systems and policy dissertation seminar each quarter during their first two years of coursework to help prepare them for the dissertation process (up to 6 credits). Finally, students complete 27 credits of dissertation preparation. Additional major requirements include a written and oral comprehensive exam at the completion of course requirements and before advancement to the dissertation, a written dissertation proposal with an oral defense, and a final written dissertation with an oral defense.

The credits are distributed as follows:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Required core courses</td>
<td>21</td>
</tr>
<tr>
<td>Policy Courses</td>
<td>18-22</td>
</tr>
<tr>
<td>Health systems courses</td>
<td>12</td>
</tr>
<tr>
<td>Research design and analytic methods</td>
<td>19-23</td>
</tr>
<tr>
<td>Dissertation seminar</td>
<td>6</td>
</tr>
<tr>
<td>Dissertation credits</td>
<td>27</td>
</tr>
</tbody>
</table>

Subtotal: 103-111

Each admitted student’s past masters coursework will be reviewed upon admission and a determination made regarding waiver of courses. A program of study will then be developed with the assigned advisor. No waiver of credit will be given for professional experience.

Core coursework

The required core courses (21 credits) should be completed early in the program of study.

<table>

- PHE 520 Qualitative Research Design 3 or USP 683 Qualitative Analysis 4
- Research Design and Analytic Methods Electives 9-12

Doctoral seminar in health systems and policy

Students enroll in a one-credit seminar (HSMP 607) each quarter during their first two years to help prepare them for the dissertation process; they are encouraged to continue to attend the seminar throughout their entire program. The seminar meets regularly with a selected faculty mentor to discuss research topics, including critical evaluation of health systems and policy research, framing research questions, proposal writing, the grant application process, data collection and synthesis, human subjects review, dissertation writing and presentation, the review process, program requirements, and publication opportunities. Students present their developing work at the seminar to receive peer feedback. HSMP 607 Doctoral Seminar may be taken for up to 6 credits.

Comprehensive examination

Students must pass a written and oral comprehensive examination at the conclusion of course requirements before they may proceed to the dissertation. This examination assesses the student’s competence in integrating, analyzing and critiquing the diverse bodies of knowledge covered in the HS&P curriculum. The examination committee consists of three HS&P/SPH faculty.

Dissertation research

The dissertation process is designed to evaluate the student’s ability to successfully conduct a substantial, independent, applied research project. The dissertation represents the culmination of a student’s doctoral studies. The dissertation is critiqued by the dissertation committee, and presented in an oral defense. The dissertation committee consists of 4-5 relevant HS&P or SPH faculty, and one external member. Students register for HSMP 603 Dissertation Research for a minimum of 27 credits during the research and writing of the dissertation.

Total Credit Hours: 103-111

RESEARCH AND TEACHING OPPORTUNITIES

The HS&P program offers students a number of research and teaching opportunities.

Graduate research assistantships

Dependent on available funds, graduate research assistantships are available each year with faculty in the School of Public Health and in various research centers. Assistantships pay tuition and a small stipend. Additional summer research opportunities may be available.

Teaching opportunities

Doctoral students may wish to gain experience teaching prior to completing their program. There are a number of opportunities available within the School of Public Health, the Hatfield School of Government, the College of Urban and Public Affairs, and PSU’s University Studies program. More information is available in the HS&P program guide.

Graduate programs

The School of Public Health graduate programs are designed to prepare students for professional work in the fields of community health, health promotion, health management, and health policy in a wide variety of settings. Students may also complete a plan of study that prepares them to pursue a doctoral degree in a health-related area.

The School of Public Health offers eight graduate degrees.

1. A Master of Public Health (M.P.H.) degree in Health Promotion.
3. A Master of Public Health (M.P.H.) degree in Biostatistics
4. A Master of Public Health (M.P.H.) degree in Environmental Systems and Human Health
5. A Master of Public Health (M.P.H.) degree in Public Health Practice
6. A Master of Public Health (M.P.H.) degree in Epidemiology
7. A Master of Science (M.S.) degree in Biostatistics.

Students with a wide variety of undergraduate degrees and professional experience are admitted to the School of Public Health.
BIOSTATISTICS MPH

The MPH Biostatistics program provides training for biostatistics methods as they apply to public health. Courses in this program emphasize intermediate to advanced applied statistical methods and statistical programming commonly used in public health research and practice, and program competencies highlight population-based study design, analytic methods, data interpretation, and communication. Epidemiological study design and methods are also an important component of the training provided by this program. Graduates of the program will be equipped to pursue careers in local, state and federal agencies, health and medical centers, and research institutions.

Program Competencies

Students graduating from this program will be able to:

- Apply appropriate principles of research design and population-based concepts to assess health problems;
- Apply appropriate descriptive and inferential statistical methods to analyze risk determinants of disease and health conditions;
- Apply descriptive and inferential statistical methods that are appropriate to the different study designs used in public health research;
- Interpret and summarize results and communicate them to lay and professional audiences, in the context of proper public health principles and concepts;
- Evaluate strengths and weaknesses of alternative research designs and analytic methods, and critically review and assess statistical analyses presented in public health literature.
- Apply basic ethical principles pertaining to the collection, maintenance, use, and dissemination of public health data.
- Identify cultural dimensions of conducting research, including culturally sensitive recruitment of study participants, and develop strategies for interpretation of data in the larger cultural context.

ENVIRONMENTAL SYSTEMS AND HUMAN HEALTH MPH

The MPH in Environmental Systems & Human Health (ESHH) program offers ecosystem-based public health
training for students who would like to investigate and remediate environmental impacts on human health. Believing that a healthy environment is a cornerstone of preventive medicine, the goal of the ESHH track is to produce graduates who will be able to analyze relationships between human activities, the environment, and human health. Areas of emphasis include environmental change and its effect on human health, environmental pathogens, environmental transport, fate and remediation of chemical contaminants, food web bioaccumulation, wastewater treatment, environmental risk assessment and toxicity testing, culturally competent risk communication, and social justice issues. Within the program special attention will be given to mediating and modifying the effects of environmental disruptions on the health of vulnerable populations in a culturally competent, ethical manner.

**Program Competencies**

Students graduating from this program will be able to:

- Communicate the relationship between environmental systems and human health, particularly in response to a changing climate.
- Analyze how environmental hazards (chemical, physical and biological) interact with natural and built systems, including the mechanisms of their adverse effects on humans.
- Assess and interpret relevant literature in the area of public health and environmental hazards.
- Evaluate the risk of environmental exposures to human populations through the incorporation of exposure, toxicological, and other relevant data into risk assessment methodology.
- Discuss how federal and state regulatory programs, guidelines and authorities impact environmental and occupational health issues.
- Apply ethical principles that govern the practice of environmental risk assessment, management, and communication.
- Specify approaches for assessing, preventing and controlling environmental and occupational hazards that pose risks to human health and safety.
- Integrate, synthesize and apply theory to practice in the context of a research study, policy consequences, or environmental exposure.
- Explain the general mechanisms of toxicity in eliciting a human health effect in response to various environmental and occupational exposures.

HEALTH MANAGEMENT AND POLICY M.P.H.

The goal of the Health Management & Policy program is to develop and strengthen the knowledge and practice of the delivery and management of health services. The program prepares individuals for the exercise of competent and effective policy and administrative leadership in the health sector. The Health Management & Policy curriculum includes the core concepts of public health with specific instruction in management, finance, strategy, policy, economics, and ethics.

Program Competencies

Students graduating from this program will be able to:

- Demonstrate effective verbal, written and interpersonal communication and messaging skills.
- Demonstrate ethical, social, and cultural competency in the practice of health management and policy.
- Engage with, and integrate the knowledge and experience of other health professions, system stakeholders, and communities to address health system challenges.
- Demonstrate critical and self-reflective thinking in the practice of health management and policy.
- Apply theory to practice to design, implement, manage, and evaluate processes to improve organizational performance and health policy.
- Apply policy process knowledge and advocacy techniques to support the development and implementation of policies that advance health.
- Select and apply appropriate theories and qualitative and quantitative methods to analyze, evaluate, and manage health system programs and services.
- Demonstrate professional, collaborative, and ethical leadership skills to address health system management and policy issues.

REQUIREMENTS

Students admitted to the health management and policy M.P.H. degree are required to complete 62 hours of coursework. Instruction is provided at Portland State University and Oregon Health & Science University. Students are required to pass the Certified in Public Health (CPH) examination before graduation.

HEALTH PROMOTION M.P.H.

The Health Promotion program is an interdisciplinary course of study providing students with specialized training in public health promotion and education. Through coursework and community-based experiences, students learn to address factors in the broader social, economic, policy, and built environments to improve the health of populations. In this track students build practice and research skills for population-level intervention, including program development, implementation, and evaluation.

The curriculum further offers opportunities to focus on health across the lifespan. Graduates of the Health Promotion track will be able to effectively recognize and assess health disparities, communicate health information, promote health equity, and mobilize resources for social change.

Program Competencies

Students graduating from this program will be able to:

- Apply theory in the development, implementation, and evaluation of health promotion interventions, programs, and policies.
- Develop interventions and programs to effect change at multiple levels, including individual, community, organizations, and policy.
- Design and implement strategies to promote health.
- Solicit and integrate input from community and organization stakeholders.
- Design and deliver health communication messages.
- Evaluate and interpret results from program evaluations and other research.
- Define research problems, frame research questions, design research procedures, and outline methods of analysis.
- Apply ethical principles that govern the practice of public health.
- Demonstrate cultural competency in health promotion among all social and cultural communities.

Area of Emphasis (9 credits)

The student’s academic advisor will work the student to define and must approve the Area of Emphasis.

Total Credit Hours: 60-61

For more information and instructions on how to apply visit the MPH in Health Promotion web page.

MPH IN PUBLIC HEALTH PRACTICE (ONLINE)

Students in the OHSU-PSU School of Public Health MPH in Public Health Practice acquire broad knowledge about and perspectives on public health policy and practice, with particular emphasis on improving primary healthcare accessibility and quality for underserved populations based on the concepts and principles of primary health care defined by the World Health Organization (universal coverage, service delivery, public policy, leadership, and stakeholder participation). To support working and distance students, coursework for the MPH in Public Health Practice program may be completed entirely online. Online MPH students are fully matriculated into the School of Public Health and have the option to complete some of their courses in person. Graduates are employed by state and local governmental agencies, non-profits, and community organizations.

Program Competencies
Students graduating from this program will be able to:

- Assess, analyze and synthesize the health status of vulnerable populations
- Identify, develop and manage interventions to promote and protect the health of populations at risk
- Lead and participate in interprofessional efforts to address health inequities with community partners
- Conduct, participate in or apply research which improves the health of a population
- Assess and integrate cultural beliefs and practices into public health interventions
- Develop & apply effective communication strategies across multiple sectors of the community
- Apply program planning and quality improvement principles in the development, management and/or evaluation of population health services.
- Demonstrate basic skills in development of a grant proposal.
- Employ techniques to manage human, fiscal, and other public health resources

**BIOSTATISTICS MS**

The Master of Science in Biostatistics degree is designed to provide graduate level training in the application and theory of biostatistics. The program is primarily aimed at those wishing to pursue careers as intermediate level biostatisticians or apply for doctoral programs in Biostatistics. The program is also appropriate for individuals who have earned a Graduate Certificate in Biostatistics and wish to pursue further training.

Target audiences for this program include individuals who desire careers as collaborative biostatisticians in the basic, clinical, translational or population sciences. The program will also be appropriate for some clinical and translational
researchers (e.g. K awardees or postdoctoral trainees), students in other Oregon graduate programs, as well as working professionals throughout the state and region (e.g. public health practitioners, laboratory scientists, data managers, database programmers, other research professionals).

All faculty members in the Department’s Division of Biostatistics are actively involved with externally funded projects. Students will have opportunities to work with real world applications under the supervision of faculty.

Program Competencies

Students graduating from this program will be able to:

- Apply intermediate to advanced biostatistical theory and techniques to design, plan, and manage data collection to conduct analysis for own research projects or support collaborative research teams
- Translate broad research goals into specifications and procedures for statistical analysis and interpretation of results in basic, clinical, translational and public health research studies
- Select and use appropriate statistical analysis software for assessment, decision-making and information-sharing (e.g., Stata, SAS, R or other special programs)
- Communicate statistical methods and findings clearly and unambiguously to specialists and non-specialist audiences

Other courses may be used as electives with approval from the Program Director.

**Total Credit Hours: 54**

For more information and instruction on how to apply visit the MS in Biostatistics web page.

### Graduate Certificates

**BIOSTATISTICS GRADUATE CERTIFICATE**

The Graduate Certificate in Biostatistics program will provide basic and intermediate graduate level biostatistics training for a diverse range of students in the health sciences. It is primarily aimed at researchers, students in other programs, and working professionals who are interested in becoming more skilled in applied biostatistics methods and theory. Many students have also chosen the graduate certificate program to start learning biostatistics prior to applying to the MS in Biostatistics program.

Candidates should possess an aptitude for mathematics. Thirty credits (18 credits in core courses, 12 in electives) will be required to earn the Certificate in Biostatistics. The program is comprised of formal didactic sessions and hands-on statistical computing. Classroom and laboratory training will include ample contextualized examples, and analysis projects using real life data. Opportunities exist for mentored collaborative health science research experiences involving ongoing projects with our faculty.

### Core Competencies

Students graduating from this program will be able to:
• Perform a broad range of basic and intermediate level applied statistical procedures that are required in basic, clinical, population and translational sciences
• Interpret and summarize analysis results in research reports and papers and communicate them to individuals with varying degrees of statistical knowledge
• Apply the principles of research design to address problems in basic, clinical, and population sciences
• Identify strengths and weaknesses of alternative designs and analytic methods
• Conduct analyses for the student’s own research projects or provide support to collaborative research teams

Subtotal: 8

Total Credit Hours: 24

Students in the Graduate Certificate may apply to the MS or MPH in Biostatistics program if they wish to pursue more training in Biostatistics beyond the Graduate Certificate. They may apply while going through, or after completing the graduate certificate program. All credits earned in the certificate program may be applied to the MS degree, or, most credits as appropriate, to the MPH degree.

For more information and instructions on how to apply visit the Certificate in Biostatistics web page.

PUBLIC HEALTH GRADUATE CERTIFICATE

The Graduate Certificate in Public Health (GCPh) is an online program designed to enhance the preparation of public health professionals not currently prepared in a public health academic specialty, and provide a broad introduction to public health for students. The GCPh is open to applicants with a bachelor’s degree in any discipline.

There is an identified urgent and ongoing need for suitable public health preparation in the current workforce. The GCPh will provide you an exceptional foundation that will enhance your marketable public health expertise, improve your professional flexibility and mobility, and provide core public health competencies.

Program Competencies

Students graduating from this program will be able to:

• Use principles of statistical inference for critical reading and interpretation of reports of statistical analysis and of public health problems;
  • Apply epidemiologic methods to identify patterns of disease and injury;
  • Analyze the environmental and occupational impacts on the health of a population;
  • Identify and analyze major issues in health services and systems associated with the delivery, quality and costs of health care;
  • Communicate theoretical principles, constructs, and models used to understand and affect the behavioral aspects of health.

For more information and instructions on how to apply visit the Certificate in Public Health web page.

Undergraduate Programs

The OHSU-PSU School of Public Health’s multidisciplinary undergraduate programs provide students with the opportunity to customize a focus of study and to create a trajectory toward careers of interest in the health field.

Undergraduate degrees in the School of Public Health are offered in Public Health Studies and in Applied Health &
Fitness. The Public Health Studies curriculum is designed around a common core and five specialized concentrations: healthy aging, community health promotion, pre-clinical health science, school health educator, and health services administration.

The Applied Health & Fitness degree has 3 specialized focus areas: fitness & exercise, fitness for special populations, and health coaching.

DEGREE MAPS, LEARNING OUTCOMES, AND GRADE REQUIREMENTS

To view the degree maps and expected learning outcomes for the School of Public Health's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

A grade of C- or better is mandatory in all coursework required for degrees in the School of Public Health. With the exception of internship credits, courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling the majors or minors offered within the School. Students must fulfill all general University requirements in addition to specific school requirements.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

APPLIED HEALTH & FITNESS B.A./B.S.

REQUIREMENTS

Required Coursework

In the BA/BS in Applied Health and Fitness students will explore and apply the most current research and science in the field of exercise, physical activity, and health. With three specialized focus areas (Fitness and Exercise, Health Coaching, and Fitness for Special Populations), your coursework includes a core foundation in public health and specialized skills in exercise science.

In addition to meeting the general University degree requirements all majors in Applied Health & Fitness must take the following required coursework. Majors must also complete coursework in one of three focus areas: Fitness & Exercise, Fitness for Special Populations, or Health Coaching.

HUMAN LACTATION CERTIFICATE

The Human Lactation Certificate offers comprehensive lactation training for:

- Non-health professionals who want to become certified as International Board Certified Lactation Consultants (IBCLC).
- Health professionals who want to become certified as International Board Certified Lactation Consultants (IBCLC).
- Students wishing to seek a bachelor's degree in Clinical Health Sciences with an emphasis on lactation education and professional lactation consultant training.
- Students interested in politics, policy and research from the perspective of improving maternal and infant health outcomes.

Completion of the Lactation Pathway enables students to sit for the International Board Certified Lactation Consultant (IBCLC) exam. IBCLC designation enables students to provide advanced practice clinical lactation care for families in a variety of settings.

REQUIREMENTS

PHE 418  Lactation Education 1: Introduction to Human Lactation  4
PHE 419  Lactation Education 2: Advanced Lactation Care  4
PHE 420  Lactation Education 3: Clinical Considerations in Lactation Practicum  2
PHE 409  15

Total Credit Hours: 25

For more information about the Human Lactation Certificate, please visit: https://ohsu-psu-sph.org/undergraduate/lactation/.

HEALTHY AGING CONCENTRATION

In the Healthy Aging concentration, students will learn about the societal, community, and individual-level strategies needed to support our aging population. Students will build foundations in gerontology while also acquiring skills in administration and finance, prevention of chronic disease, and health promotion programming, which will position students to enter careers as assisted living or nursing home facilities administrators, long-term care coordinators, health promotion program implementers, or senior health promotion specialists.

In addition to the previously listed common core requirements, students pursuing a concentration in aging services must complete the following:

Required coursework (28 credits)

PHE 325U  Nutrition for Health  4
PHE 354U  Social Gerontology  4
PHE 416  Families and Aging  4
PHE 423  Business and Aging  4
PHE 456  Health Aspects of Aging  4
PHE 478  Program Planning and Evaluation: Needs Assessment and Interventions  4
PHE 479  Program Planning and Evaluation in Health Education: Implementation and Evaluation  4

Choose one of the following:

BA 306U  Essentials of Finance for Non-Business Majors  4
BA 316U  Essentials of Marketing for Non-Business Majors  4
BA 326U  Essentials of Management for Non-Business Majors  4
16 credits from the following courses

Other electives may be taken with advisor approval.

COMMUNITY HEALTH PROMOTION CONCENTRATION

Students pursuing the Community Health Promotion concentration will learn the societal, community, and individual-level factors that create risk – or promote good health – in populations. In particular, students will build skills to identify and address health disparities across populations, define health problems, and learn to design and implement strategies to promote health in the larger community.

In addition to the previously listed common core requirements, students pursuing a concentration in community health promotion must complete:

**Required coursework (24 credits)**

HEALTH SERVICES ADMINISTRATION CONCENTRATION

The health services administration concentration is designed for individuals who wish to develop or enhance a career in health systems administration, including such activities as health program management, health policy analysis, patient support, health finance, quality improvement, and other administrative functions.

Students who complete the course work required for the concentration will possess a basic understanding of health systems with particular knowledge and skills in administration and finance, health policy, and health systems.

The program of study includes common core requirements, required courses, and elective course options. Students pursuing a concentration in health services administration must complete the following:
Required Courses (44 credits)

Other electives may be taken with advisor approval.

PRE-CLINICAL HEALTH SCIENCE CONCENTRATION

The Pre-Clinical Health Science concentration prepares students for continued clinical study in one of the many licensed health professions. Students will gain a foundation in public health while also completing prerequisites for their chosen clinical path, including medicine, nursing, physical therapy, occupational therapy, pharmacy, dentistry, dental hygienics, ophthalmology, and others.

In addition to the previously listed common core requirements, students pursuing a concentration in health sciences must select one of the following options: pre-medicine, pre-dentistry, pre-physical therapy, pre-occupational therapy, pre-chiropractic medicine, pre-osteopathy, pre-podiatry, pre-nursing, pre-naturopathic medicine, pre-optometry, pre-pharmacy, and pre-physician assistant and pre-physician assistant or adviser approved.

</tr>
</tbody>
</table>

Other electives may be taken with advisor approval.

SCHOOL HEALTH EDUCATOR CONCENTRATION

The School Health Educator concentration is a pre-licensure program, preparing students according to state guidelines for “best practices” in school health education. School health educators teach in middle school and high school settings covering a variety of topics from safety to preventive health behaviors and decision-making. Upon completion of the bachelor degree (BA/BS), students will be eligible to apply to the fifth-year Graduate Teacher...
Education Program or the Secondary Dual Education Program in the Graduate School of Education at PSU.

In addition to the previously listed common core requirements, students pursuing a concentration in school health education must complete the following:

**Required coursework (36 credits)**

- **PHE 275** Stress Management 4
- **PHE 295** Health Promotion/Disease Prevention 4
- **PHE 325U** Nutrition for Health 4
- **PHE 326U** Drug Education 4
- **PHE 335U** Human Sexuality 4
- **PHE 365** Health Promotion Programs for Children and Youth 4
- **PHE 448** Health Education Techniques and Strategies 4
- **Psy 311U** Human Development 4
- **Ed 420** Introduction to Education and Society 4

It is required that students who intend to apply to the GTEP program complete an anatomy/physiology sequence.

**8 Credits of electives from the following list:**

- **CFS 390U** Sex and the Family 4
- **CI 432** Computer Applications for the Classroom 3
- **Psy 346** Learning 4
- **Soc 337U** Prejudice, Privilege, and Power 4
- **SpEd 418** Survey of Exceptional Learners 3
- **PHE Elective Classes as approved by advisor**
- **Women's Studies courses on Violence and Sexuality**

---

**AGING SERVICES MINOR**

The minor in aging services includes coursework that will introduce the student to basic understanding of gerontology along with particular skills in administration and finance, chronic disease, and health promotion. This program also will enhance the skills of students planning to enroll in industry-provided training to become administrators of assisted living facilities and residential care facilities or nursing homes.

**REQUIREMENTS**

To earn a minor in aging services, students must complete at least 28 credits. At least 16 credits must be taken in residence at PSU, and 16 credits must be upper-division. The requirements for this minor include:

- **PHE 354U** Social Gerontology 4
- **PHE 456** Health Aspects of Aging 4

---

**Two of the following:**

- **PHE 328U** Health and Housing Across the Life Course 4
- **PHE 416** Families and Aging 4
- **PHE 423** Business and Aging 4

**12 Credits from the following courses:**

- **PHE 250** Our Community: Our Health 4
- **PHE 295** Health Promotion/Disease Prevention 4
- **PHE 325U** Nutrition for Health 4
- **PHE 328U** Health and Housing Across the Life Course 4
- **PHE 350** Health and Health Systems 4
- **PHE 363** Communicable Diseases and Chronic Health Problems 4
- **PHE 369** Public Health Law, Policy, and Ethics 4
- **PHE 370** Applied Kinesiology 4
- **PHE 416** Families and Aging 4
- **PHE 444U** Global Health 4
- **PHE 445** Men's Health 4
- **PHE 446U** Community Health Principles and Practices 4
- **PHE 450** Epidemiology 4
- **PHE 451** Women and Holistic Health 4
- **PHE 473** Physiology of Exercise 4
- **PHE 320U** Health Ethics: Contemporary Issues 4

Other electives may be taken with advisor approval. Subtotal: 28

---

**COMMUNITY HEALTH MINOR**

The minor in community health consists of coursework selected from the list of core coursework and provides students with a foundation of theory and content related to community health.

Students pursuing a Bachelors degree in any of the Public Health Studies concentrations are not eligible for a minor in Community Health.

**REQUIREMENTS**

To earn a minor in community health, students must complete at least 28 credits. At least 16 credits must be taken in residence at PSU, and 16 credits must be upper-division. The requirement for the minor includes:

**Courses**

- **PHE 250** Our Community: Our Health 4
- **PHE 350** Health and Health Systems 4
- **PHE 363** Communicable Diseases and Chronic Health Problems 4
- **PHE 450** Epidemiology 4
- **PHE 452U** Gender, Race, Class and Health 4
- **PHE or approved electives** 8
Other electives may be taken with advisor approval.
Subtotal: 28

HEALTH STUDIES SECONDARY EDUCATION PROGRAM

Students who wish to become licensed teachers in health education must complete a required list of courses or their equivalent before applying to the Graduate School of Education for admission into the Graduate Teacher Education Program (see requirements). These courses are required whether the applicant holds a degree in the field or holds a degree in another subject field. Courses in the School can be taken to complete the Oregon Continuing Teaching License in Health, and selected courses can be taken to complete the Oregon Continuing Teaching License in Physical Education.

All courses taken for the teaching field requirement must be passed with a C- or better grade and must average a 3.00 GPA. Prospective teachers should contact undergraduate advisors in the School of Public Health for specific requirements.

RESEARCH CENTERS AND INSTITUTES

Center for Public Health Studies

450 Urban Center

The Center for Public Health Studies (CPHS) seeks to enhance the public’s health by conducting interdisciplinary research exploring the interaction of health, society, and social policy. Our goals include:

• assessing the structural causes and consequences of health and disease;
• examining health behaviors in their social context;
• studying the effects of culture and the environment on our health and attitudes toward health care; and
• analyzing the political processes and social policies that affect the health status of populations.

- B.A., B.S. — Child, Youth, and Family Studies
- B.A., B.S. — Social Work
- M.S.W.
- Ph.D.

The School of Social Work was established at Portland State University in 1961 by a resolution of the Oregon Legislature. The school is committed to the enhancement of the individual and society. Further values and beliefs include a dedication to social change and to the attainment of social justice for all peoples, the eradication of poverty, the empowerment of oppressed peoples, the right of all individuals and groups to determine their own destinies, and the opportunity to live in harmony and cooperation. While the School maintains a special commitment to these values, it recognizes the need for joining with others in society who are working toward this same purpose.

Consistent with the goals of Portland State University, the three major functions of the School are teaching, research, and community service. Teaching is directed toward preparing effective and creative graduates who are ethical and culturally responsive. Students learn to serve individuals and families directly, evaluate practice, develop and administer programs, organize neighborhoods and communities, analyze social policies, conduct research, and initiate necessary reforms of existing practice, programs, and policies. Research and scholarship focus on understanding, preventing, and ameliorating social problems. Community service involves collaborative efforts with individuals and organizations to develop innovations in social welfare services and policies.

The School has an educational program involving eight structural components: the Child, Youth, and Family Studies (CYFS) program; the Baccalaureate Social Work (B.S.W.) program; the Master of Social Work (M.S.W.) program; the Distance M.S.W. Option; the Online M.S.W. Option; the Ph.D. in Social Work and Social Research program; the Center for Improvement of Child and Family Services; and the Regional Research Institute for Human Services.

Child and Family Studies

600 Academic and Student Recreation Center
1800 SW Sixth Avenue
503-725-8241
www.pdx.edu/social-work/cyfs-child-youth-and-family-studies

The Child and Family Studies Program is for students who have varied professional goals related to working with children, youth, and their families. Students who are interested in becoming elementary school teachers, social workers, counselors, early childhood educators, or special educators are advised to consider a degree in Child, Youth, and Family Studies (CYFS). The degree is also appropriate for students seeking career pathways such as parent educators, family advocates, youth workers, social service caseworkers, program directors/administrators, and classroom assistants. Students gain an interdisciplinary perspective on children, youth, and families, a broad understanding of family systems, and a working knowledge of the diverse socio-cultural contexts in which children and families develop.

The Child and Family Studies major program content integrates theory with practice. A liberal arts foundation, coursework in professional development and the application of content knowledge, practicum experiences in two diverse settings, and professional documentation prepare students for professional roles as well as graduate school. Students may choose focused elective courses in early childhood education, youth work, family life education, elementary education, human services, or child life.

The Child and Family Studies program also offers a minor, which can be completed in close alignment with the Families and Society Junior Cluster.

Both the Child, Youth, and Family Studies major and minor place strong emphasis is placed on preparing students to become change agents, creating a more just world for children, youth, and families.

Both the CYFS major and CYFS minor can be completed online, through careful planning with an advisor.

DEGREE MAPS AND LEARNING OUTCOMES

To view the Child, Youth, and Family Studies degree map and expected learning outcomes, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS
Students must be admitted into the major to earn a baccalaureate degree in Child, Youth, and Family Studies. Admittance requirements are the completion of 90 credits, Ed 420, and Psy 311U or Psy 460 or their equivalents. Once these prerequisites have been met, students submit their intention to pursue the major and are formally admitted. Information meetings are held for students who are considering admission into the program. Call 503-725-8241 or visit https://www.pdx.edu/social-work/information-sessions to schedule attendance at an informational meeting. Further information and admissions forms can be obtained by visiting: https://www.pdx.edu/social-work/cyfs-child-youth-and-family-studies.

Baccalaureate Social Work

Students must be admitted to the Baccalaureate Social Work (BSW) program in order to complete the requirements for the Bachelor of Arts or Bachelor of Science degree with a major in social work (B.A. or B.S.). Students are admitted as juniors (90 credits completed). Two cohorts will be admitted annually during spring term to start in the fall. One cohort will be admitted to our Portland campus program and one cohort to our BSW online program. Information on both options can be found on the website listed below. Additional information and an application form can be obtained by calling 503-725-4712, by writing Portland State University, School of Social Work, PO Box 751, Portland, OR 97207, or by visiting the School’s Web site, www.pdx.edu/social-work/bsw-bachelor-of-social-work.

Applicants to the BSW program must have completed at least one: A) a 4 credit 200 level course in psychology; B) a 4 credit 200 level course in sociology; C) a 4 credit 200 level course in human development. Applicants are also advised to take SW 301 Introduction to Social Work, since this course is designed, in part, to assist interested students in selecting social work as a profession. If applicants have not completed this requirement prior to admission, they must take it once they are enrolled in the major.

The application packet must include an application form, answers to essay questions, two reference forms, two reference letters, and an unofficial transcript from all colleges the student has attended. Students will be required to attend an on-campus orientation session prior to beginning their course of study. Orientation schedule information will be provided at the time of admission. Students must also read the BSW Program Handbook, which is available online at www.pdx.edu/social-work/bsw-bachelor-of-social-work.

Master of Social Work

Students are admitted once a year. Admission is selective; applications and all supporting materials must be submitted by the appropriate deadlines for consideration for admission in Summer or Fall terms. Early submission of application materials is encouraged. Further application information is available on-line through the school’s website at: http://www.pdx.edu/ssw/.

The M.S.W. program of the School of Social Work is open to qualified graduates from colleges and universities of recognized standing. Undergraduate preparation should include a broad background in liberal arts and sciences including natural sciences, social sciences, and humanities. Competence in written and spoken English is important for social work practice. Students whose native language is not English should include the scores of the Test of English as a Foreign Language (TOEFL). Graduates of bachelor of social work (B.S.W.) programs accredited by the Council on Social Work Education may apply for advanced standing. Students who have completed up to one year of study toward the M.S.W. degree at another graduate school of social work accredited by the Council on Social Work Education may apply for admission and transfer of credits.

Students admitted to the master’s program are required to be in continuous enrollment unless an approved leave of absence has been granted. A student who withdraws from the School must reapply.
For the M.S.W.-M.P.H. dual degree, students must submit separate applications to each program (the School of Social Work and either the School of Community Health or the Mark O. Hatfield School of Government, depending on the focus of study) and will need to meet the minimum requirements for each program. The MSW Program and the MPH Health Promotion track admit students in fall term, while the MPH Health Management and Policy track admits students every quarter. Additional guidelines for admissions for Public Health are at https://ohsu-psu-sph.org/

It is possible to add a second program after beginning one program, if the student completes an application and is accepted by the second program during her/his first year in the entry program. Students must take classes in both programs at the same time for at least one term.

**Doctor of Philosophy in Social Work and Social Research**

Applicants for admission must have a master’s degree in social work or a related field. Applicants must have writing ability and the capacity for creative and independent work. At least two years of practice experience in social work or a related field is recommended. Students must apply to and be accepted into the doctoral program and be admitted to the University as a graduate student. As part of the admission procedure, students must furnish:

- transcripts of undergraduate and graduate studies;
- scores for the Graduate Record Examination (GRE);
- an example of scholarly writing;
- names of three references, two of whom must be academic;
- a personal statement; and
- a resume

Students whose native language is not English should include the scores of the TOEFL, IELTS or PTE-Academic exam scores. Application materials for the Ph.D. program are available through the school’s Web site at: www.pdx.edu/ssw/.

Application must be made by January 15; admission to the programs is for the fall term only.

**Residence**

Three consecutive terms must be spent in full-time residence (9 credit hours or more) on campus. The minimum credit hour requirement for the Ph.D. is 90, of which at least 27 must be devoted to the dissertation. See the Portland State University general doctoral degree requirements (p. 54).

**SOCIAL WORK B.A./B.S.**

The Baccalaureate Social Work (BSW) Program is fully accredited by the Council on Social Work Education (CSWE). The BSW Program prepares students to become entry-level professional generalists social workers who will work in a variety of settings and communities.

The BSW Program Mission statement states: The BSW Program at Portland State University combines theory with practical, hands-on experience which prepares undergraduate students for careers in social work and related fields and for future graduate studies. Students in our BSW Program gain knowledge, values, and skills to work with individuals, families, groups, organizations, and communities. Our program is committed to centering critical self-reflection, racial equity, and social and economic justice, and we encourage our students to be active citizens and practitioners who embody these values.

Students enter the BSW Program as a “cohort” of learners. The cohort model provides a place for peer support, sharing of ideas, and resources. Students also have BSW advisors to support their academic and other educational needs. The curriculum prepares students with the social work knowledge, values, and skills to provide effective services to individuals, families, groups, and communities in diverse settings. The curriculum is based on a liberal arts foundation. In accordance with CSWE requirements, the BSW Program does not give credit for prior work experience and/or life experience. It is designed to promote mastery of competencies and practice behaviors mandated by the Council on Social Work Education (CSWE). The BSW major courses are taken within a two-year timeframe over six terms. The courses include social work history, social welfare policy, social work practice, research, human behavior and the social environment, social justice theory and practice, and diversity electives. Students complete three terms of field education supervised by a qualified social worker. Students complete a 500 hour field practicum in conjunction with their practice courses and field seminar. The field practicum provides students with the direct application of their knowledge, values, and skills in a variety of community agencies and settings. Students who graduate from the BSW Program are prepared to become active social justice change agents ready to provide professional generalists social work practice in the community.

**Requirements**

In addition to meeting the general University requirements for a Bachelor of Arts or Bachelor of Science degree, majors must complete the following program components:

**Field Placement (12 credits)**

Students are required to take SW 400 Field Placement and Seminar I-III over three academic terms for a total of 12 credits.
Required Upper Division Social Work Courses (39 credits)

Equity and Inclusion Electives (12 credits)

Students must choose three courses from the School of Gender, Race, and Nations. Subjects include: Black Studies; Indigenous Nations Studies; Chicano/Latino Studies; and Women, Gender, & Sexuality Studies. Prospective students may consult a complete list of approved courses at the School's Web site, www.pdx.edu/ssw/, where undergraduate program requirements are included in an on-line B.S.W. Student Map.

SOCIAL WORK M.S.W.

The Master of Social Work (M.S.W.) program at Portland State University is fully accredited by the Council on Social Work Education (CSWE).

MSW Program Mission

The mission of the Portland State University MSW program is to educate students for advanced leadership and practice that recognizes and dismantles systems of oppression; builds racial equity and social, political, and economic justice; and advances the well-being of diverse individuals, families, groups, organizations, communities, and tribal nations. We endeavor to deliver a social work education that is critically informed, theoretically driven, empirically supported, reflexive, ethical, vigilant and resistant to colonial, heteropatriarchal, classist, and white supremacist agendas.

MSW Program Goals:

The MSW Program mission is realized by providing a statewide program that prepares social workers for practice and leadership with diverse individuals, families, groups, communities, and organizations.

The goal is to prepare MSW social workers to:

- Provide advanced practice and leadership in healthcare and aging, clinical mental health, services to children, youth and families, communities, and/or organizations
- Practice effectively with individuals, groups, families, and communities to improve their well-being
- Demonstrate a professional use of self and a commitment to practice within social work values and ethics
- Engage in critically informed, non-discriminatory, collaborative practice that addresses/challenges oppression and reflects respect, knowledge, and skills related to race, color, ethnicity, culture, social and economic class, sex, gender identity, sexual orientation, marital status, family structure, language, national origin, age, disability, and religion
- Use knowledge of systemic oppression and privilege, community and organizational change processes, and practice skills to advance social and economic justice
- Analyze, formulate, and influence policies to improve practice and advance social and economic justice
- Use practice experience, empirical evidence, and theory to guide practice
- Develop a plan and motivation for continued professional development, learning, and growth to enhance their social work skills and to contribute to the social work profession's efforts to advance social justice after graduation.

The master's program offers students five courses of study: (1) a traditional full-time two-year course option; (2) a part-time three- or four-year option in Portland; (3) an advanced standing one-year option in Portland, Eugene, Central Oregon, and Online; (4) a part-time three-year distance options in Eugene and Central Oregon; and (5) a part-time three-year online option.
The curriculum combines concurrent on-campus coursework and field work in a range of human service organizations. Typical practice settings are mental health programs, public welfare and human service agencies, schools, hospitals and health care centers, courts, family service agencies, correctional services, community planning agencies, legislative offices, child and youth service agencies, neighborhood centers, multicultural service centers, and programs for older adults.

To ensure a common base for social work practice, the faculty has identified a required generalist foundation curriculum to be completed by all students in the MSW Program, except those admitted to advanced standing. This coursework focuses on the knowledge, values, skills and behaviors related to work with individuals, families, groups, communities and organizations. Three terms of concurrent generalist field internship are an integral part of this foundation.

The advanced curriculum includes advanced concentrations, advanced field internship and electives. Students in the Portland option have the choice of four concentration areas: Health Across the Lifespan; Children, Youth, and Families; Clinical Social Work Practice; and Practice and Leadership with Communities and Organizations. The electives provide opportunities for students to have a deeper learning experience with a specific population, problem or intervention.

The M.S.W. Distance Option (DO) program offers an advanced concentration in Clinical Social Work. In fall 2021, a new cohort of students will begin in Eugene and Central Oregon, and those sites will also each have a cohort in their final year. The Salem and Southern Oregon cohorts will begin their second year. While the first year of distance learning is course work only, second year and third year students have 16 hour per week field internships in or near their home communities. The Southern Oregon and Central Oregon programs offer all classes on site or online. First year classes in Eugene are held on the PSU campus in Portland, and second and third year classes occur on site or online. The Eugene site will recruit new students for fall 2022.

The M.S.W. Online program offers two advanced concentrations: Practice and Leadership with Communities and Organizations and Health Across the Lifespan. Course instruction is exclusively online using asynchronous and synchronous delivery methods, though students will be expected to come to campus for a two-day orientation at the beginning of each academic year. Required courses are offered during the academic year and electives are offered in the summer. The first year of the program is course work only, while the second year and third year students have 16 hour per week field internships in or near their home communities, in addition to taking their courses.

Students admitted to the Advanced Standing option have a BSW from a CSWE accredited school of social work, and complete the advanced year of the curriculum over the course of four-five terms.

Students in the MSW program have the ability to pursue a dual degree or certificate in specialized areas of practice.

Students may combine the M.S.W. with a Masters in Public Health (M.P.H.) by applying to both programs.

Students may obtain the M.S.W. with a certificate in gerontology through the Institute on Aging by completing specialized courses and field placement.

Students may also pursue licensure as a school social worker by completing a specialized set of courses and field placement.

Information about these dual degree and certificate programs is available on our website http://www.pdx.edu/social-work/msw-master-of-social-work.

REQUIREMENTS

The M.S.W. is a 78 credit program comprised of foundation and advanced coursework. Subtotal: 78

FOUNDATION COURSEWORK

The foundation coursework can be satisfied in one of two ways:

Option 1

Completion of a B.S.W. degree accredited by the Council on Social Work Education, plus 7 credits of bridge courses taken during the summer at PSU.

SW 517  Health Across the Lifespan I  3
SW 518  Health Across the Lifespan II  3
SW 519  Health Across the Lifespan III  3

**Advanced Field Placement**

12 credits SW 512 Advanced field placement (4 credits each of three terms)

**Electives**

18 credits of advanced electives in their area of interest

Students may not receive credit for life experience, previous work experience, nor have any field experience or professional foundation courses waived on this basis.

**SOCIAL WORK AND SOCIAL RESEARCH PH.D.**

The School of Social Work offers the Ph.D. in Social Work and Social Research to educate the next generation of scholars, researchers, teachers and leaders in social work and related fields. The program prepares students to contribute to scholarly knowledge, conduct ethical, rigorous, and community-engaged research, and teach passionately and effectively in various settings--all with special attention to equity and justice. The Regional Research Institute for Human Services and the Center for the Improvement of Child and Family Services are major resources for the program.

Coursework includes core social work courses, required research electives, and selected substantive area electives. The core social work classes are taught seminar style, providing students with experiences of engagement in discussions about complex ideas and diverse viewpoints. The elective courses can be taken in other academic units based on each student's individualized study plan. Following completion of required and elective courses the student must pass written and oral comprehensive examinations before defending a dissertation proposal, conducting independent research and a final dissertation defense.

**REQUIREMENTS**

Each doctoral student is required to select a social problem for study and become knowledgeable about relevant theories and proficient in the methodologies appropriate for scholarly inquiry of the problem.

Core requirements for the course of study are designed to ensure knowledge and skills in the history, theory, and organization of societal responses to social issues; quantitative and qualitative research methods and statistics; and expertise in a cognate area relevant to the social problem or method of inquiry through coursework outside of the School of Social Work. Students also are required to enroll in a research practicum under the direction of an approved qualified supervisor. A teaching practicum may be elected. Each student’s program of study will be individually planned and approved. Students in the first and second years of the program are required to attend the Ph.D. seminar each quarter.

**Core Courses (31 credits)**

       Professional
SW 660  Ph.D. Seminar – First Year  1
SW 661  Ph.D. Seminar – Second Year  1
SW 690  Teaching Practicum and Seminar  3

SW 660 and SW 661 must be taken 3 times each for a total of 6 credits.

**Required Elective Courses (16 credits)**

Appropriate interdisciplinary social science research methods courses  16

**Other Electives (16)**

Appropriate courses in student's substantive area of focus  16

**Dissertation (27 credits)**

Subtotal: 90

**Comprehensive examination**

A written comprehensive examination is taken after completion of required coursework.

**Dissertation**

After successful completion of the comprehensive examinations, the dissertation chairperson and committee are appointed. The student develops a dissertation proposal that is defended orally before the dissertation committee. When the proposal has been approved by the dissertation committee and by the University Human Subjects Research Review committee, the student is considered a candidate for the Ph.D. in Social Work and Social Research. A dissertation must be completed following the outlines of the approved proposal. Students must maintain continuous registration while engaged in dissertation research.

**Final examination**

At the conclusion of doctoral work, the student defends the completed dissertation before the dissertation committee and other interested faculty and doctoral students. The student is expected to demonstrate knowledge of the topic selected for study and to show that the dissertation is a contribution to knowledge in the social problem area.

**RESEARCH CENTERS AND INSTITUTES**

**Center for Improvement of Child and Family Services (CCF)**

1600 SW 4th Ave., 4th floor
503-725-5022
Katharine Cahn, Executive Director

Our vision is that all children, youth, and families are safe, connected, and thriving, supported by effective and equitable organizations, institutions, and community systems. We build the capacity of human service organizations and systems to improve the equity and effectiveness of services and community supports for children, youth, and families. We:

- Build the workforce through training, education, coaching, and mentoring
- Inform and advance systems change through convening, collaborating, and consultation
- Ground our work with research, knowledge partnerships, and program evaluation.

The Center was founded in 1994 as the Child Welfare Partnership (CWP). This partnership continues today, as a collaboration with the Oregon Department of Human Services (DHS) offering training, research and social work education to improve Oregon’s child welfare system. The CWP training program, located in Salem, prepares all new child welfare workers, supervisors, caregivers, and advanced staff using state of the art adult education approaches (including a simulation lab). All offerings are evaluated for quality assurance and measurement of impact. The Child Welfare Partnership’s Education Program (CWEP) provides financial support and customized professional education for bachelor and master's level social work students committed to careers in child welfare and includes an evaluation of program impact. This program includes the Culturally Responsive Leaders program, designed to prepare child welfare leaders to serve the growing diversity of child welfare clients.

The Center’s System of Care Institute (SOCI) offers training, technical assistance and consultation using a community based, culturally responsive and family and youth-driven care lens. Currently SOCI is supporting the full implementation of Wraparound and System of Care across the state of Oregon and focusing on cross-system collaboration. The System of Care Institute also works in other states and tribes as requested, to promote System of Care, improvement of child-serving systems, and sustainable workforce development.

The Center’s Early Childhood and Family Support Research Team works on a robust research agenda related to early childhood, child abuse prevention, family support and child welfare. This team provides program evaluation and community capacity building research across Oregon and nationally to promote family engagement, and advance best practices in early childhood support and education. The mission of this team is to engage in equity-driven research, evaluation, and consultation to promote social justice for children, youth, families and communities. A full menu of research projects is available on the CCF website.
For further information about all programs and projects, visit the Center website at http://www.pdx.edu/ccf/

Regional Research Institute for Human Services
1600 SW 4th Ave., Suite 900
503-725-4040
Mary Oschwald, Director

The Regional Research Institute for Human Services (RRI) was established in 1972 by the School of Social Work at Portland State University with a grant from the Social and Rehabilitation Service within the office of Health, Education, and Welfare (HEW). The aim of the RRI is to improve the manner in which social services and service delivery systems are designed, managed, and evaluated. To inform social change initiatives, the RRI is prepared to examine all aspects of the complex process by which human service policies and services are developed and implemented. By bringing a range of consumers, family members, and researchers into its activities, the RRI creates new approaches to old problems. It strives to set high standards for applied social research and to provide a research environment for graduate training.

The RRI has undertaken more than 250 projects, many of them national in scope, in fields of child and adult mental health, family and child welfare, child care, employment, juvenile justice, alcohol and drug services, disability, and interpersonal violence. RRI projects range from large, multi-site federally funded grants, to research contracts with state and local governments, to program evaluations in collaboration with local community partners. The RRI is particularly well known for its innovative approaches in consumer-driven and community-engaged research. Over the last five years, total research expenditures for RRI projects have exceeded $32 million.

The RRI is home to several centers with national scope and influence. Since 1984, when the Research and Training Center on Family Support and Children’s Mental Health was initiated, the RRI has been a leader in the field of mental health research and education. The RRI also hosts Trauma Informed Oregon (TIO), which serves as a centralized source of information and resources, and coordinates and provides training for healthcare and related systems. Since 2000, the national program office of Reclaiming Futures: Public Health, Justice, Equity, has been located in the RRI and promotes new standards of care in juvenile justice for young people with drug and alcohol problems, and its model for system change has been implemented in jurisdictions around the country.

For more information about RRI faculty, research projects, and publications, see www.pdx.edu/regional-research-institute.
College of Urban and Public Affairs

Sy Adler, Ph.D., Interim Dean
Laura J. Hickman, Ph.D., Interim Associate Dean
Gil Miller, Ph.D., Assistant Dean

750 Urban Center, 503-725-4043
www.pdx.edu/urban-public-affairs/

The College of Urban and Public Affairs joins the disciplines of urban studies, public administration, criminology & criminal justice, political science, economics, and international & global studies under one roof. Just outside the doors of the Urban Center—in one of the nation’s most innovative urban regions—our students and faculty fuse theory and practice into solutions for the common good. Our students and faculty collaborate with community organizations, imagine original solutions, and implement them in real-time. Upon graduation, our students are equipped to improve the livability of their communities.

In a state where land-use planning, transportation, environmental aspects of urban growth, community policing, low-income housing, solid waste recycling, and community engagement are a model for the nation, our urban location provides the perfect applied laboratory for the college's groundbreaking work.

Mark O. Hatfield School of Government

The Mark O. Hatfield School of Government is one of the largest public policy schools in the country. It includes the departments of Criminology and Criminal Justice, Political Science, and Public Administration. Our nationally-ranked programs in public administration, nonprofit management, political science, and criminology & criminal justice help prepare students to improve the way we govern and lead. Faculty and students of the Hatfield School are involved in an impressive range of community collaborations around public policy and administration, civic leadership, and criminal justice.

Nohad A. Toulan School of Urban Studies and Planning

The Toulan School of Urban Studies and Planning is the nation's oldest continuously operating instructional program in urban studies. Graduates can be found in public, private, and nonprofit planning offices throughout North America and around the globe. The mission of the school is to assist in the development of healthy communities through an interdisciplinary program of teaching, research, and public service.

Department of Criminology & Criminal Justice

The Criminology & Criminal Justice Department brings together students and faculty who are interested in a) studying the causes, prevention, and control of criminal behavior and b) promoting efficiency, effectiveness, and equity at all levels of the criminal justice system. The department offers a bachelor's degree, minor, postbaccalaureate certificate and master's degree. Each program is designed to equip students with career-relevant skills for lifelong professional success and the practical tools needed for helping to improve and reform the criminal justice system.

Department of Economics

The mission of the Department of Economics is to provide high-quality graduate and undergraduate education while generating top-notch applied and theoretical research that garners national recognition within a supportive academic community. The department offers a wide range of courses and a variety of academic degrees, including bachelor’s degrees, a masters degree, and a four-course Graduate Certificate in Environmental and Natural Resource Economics. The department also sponsors year-round seminars for students that address crucial policy-oriented and theoretical topics.

Department of International and Global Studies

The Department of International and Global Studies endeavors to foster a deep understanding of global issues, such as social justice and human rights, international development, environmental justice, health, international conflicts, gender and sexuality, and labor rights. We offer four B.A. concentrations: two thematic, interdisciplinary options, in Global Studies and International Development Studies, and two with regional specialization, in Asian Studies and Latin American Studies. The department also offers a minor and seven undergraduate certificates designed to add a global dimension to any degree. Our programs offer an excellent foundation for careers in which an understanding of global economic, political, social, historical, and cultural processes are important. Our students have also secured admission to top interdisciplinary and traditional graduate programs in the US and overseas.

Department of Political Science

The Political Science Department is dedicated to understanding the nature of power and governance, and to giving students the tools they need to make a meaningful difference in their communities. Students have the opportunity to focus on the four main fields of political science – American, Comparative, International Relations, and Political Theory - and may also specialize in several other subfields such as law, public service, international development, campaign management, and women’s
leadership. Career possibilities for graduates abound because students can customize their degree program around hands-on concentration options, multi-disciplinary opportunities, internships, and rigorous curricula. Graduate students enter a world of professional academic scholarship and analysis, preparing them for doctorate-level study or leadership careers at non-governmental organizations, think tanks, or political consulting.

Department of Public Administration

The Public Administration Department is home to ten multidisciplinary programs designed to equip current and future leaders in addressing contemporary social issues in the public sector, nonprofit sphere, health care administration, and beyond. Our faculty and community of instructors offer decades of wisdom gleaned from both studying and applying theory. This wisdom is continuously being practiced and refined, as faculty members and instructors remain actively engaged in scholarship, service, and practice. Our Department provides education and professional development, engages in applied research and consulting with public sector partners, and leverages the scope of these activities through publication.

Graduate Certificates
- Certificate in Applied Social Demography
- Graduate Certificate in Collaborative Governance
- Graduate Certificate in Econometrics and Data Analysis
- Graduate Certificate in Emergency Management and Community Resilience
- Graduate Certificate in Energy Policy and Management
- Graduate Certificate in Environmental and Resource Economics
- Graduate Certificate in Gerontology
- Graduate Certificate in Nonprofit and Public Management
- Graduate Certificate in Real Estate Development
- Graduate Certificate in Sustainable Food Systems
- Graduate Certificate in Transportation
- Graduate Certificate in Urban Design

Undergraduate Certificates
- Advanced Crime Analysis Certificate
- Criminal Behavior Certificate
- Leadership in Criminal Justice Certificate
- Post-Baccalaureate Certificate in Criminology & Criminal Justice
- Global Studies Certificate
- International Development Certificate
- African Studies Certificate
- Asian Studies Certificate
- European Studies Certificate
- Latin American Studies Certificate
- Middle East Studies Certificate
- Contemporary Turkish Studies Certificate (not accepting new admission to the certificate)
- Campaigning to Win a U.S. Political Campaign
- Women's Leadership

Non-Credit Certificates
- Professional Certificate in Nonprofit Fundraising
- Professional Certificate in Nonprofit Program Evaluation
- Certificate in Tribal Relations

Minors
- Minor in Civic Leadership
- Minor in Community Development
- Minor in Criminology and Criminal Justice
- Minor in Law and Legal Studies
- Minor in Political Science
- Minor in International & Global Studies
- Minor in Economics
- Minor in International Economics
- Minor in Political Economy

Bachelor Degrees
- B.A., B.S.—Criminology and Criminal Justice
- B.A., B.S.—Community Development
- B.A., B.S.—Political Science
- B.A., B.S.—Political Science: International Development
- B.A., B.S.—Political Science: Public Service
- B.A., B.S.—Urban and Public Affairs
- B.A., B.S.—Economics
- B.S.—Quantitative Economics
- B.A.—International & Global Studies: Africa (not accepting new admission to this concentration)
- B.A.—International & Global Studies—Asia
The Master of Science in Emergency Management and Community Resilience is designed to educate professionals in public, private, and nonprofit organizations whose jobs include responsibility for planning and organizing response to disasters, both natural and human-made. The curriculum of this graduate program is designed at the intersections of scientific research, applied public policy, and effective crisis leadership—as well as at the crossroads of multiple disciplines and approaches to disaster and resilience. This transdisciplinary approach to understanding emergency management and community resilience offers a rich intellectual and applied basis for graduate study.

**CORE COURSE REQUIREMENTS**

Each student must enroll in and successfully complete nine core courses as outlined below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EMCR 520</td>
<td>Anatomy and History of Disasters</td>
<td>4</td>

<td>Climate Resiliency Planning</td>
<td>3</td>
</tr>
<tr>
<td>or EMCR 567/Geog 567</td>
<td>Community Resilience in Coupled Socio-Ecological Systems</td>
<td>4</td>
</tr>
</tbody>
</table>

**SKILLS AND METHODS REQUIREMENTS**

Students must take a minimum of three courses (9 credits), with a minimum of one in each of the two Skills and Method Areas:

1. Research Design, Evaluation, Communication, and Assessment
2. Qualitative and Quantitative Methods
These courses focus on skills and methodologies that support varied careers within the emergency management profession. A list of approved electives is available from the Program Director.

FIELD SPECIALIZATION REQUIREMENTS
Students in this program must take a minimum of four courses (12 credits) within one of the four Field Specializations:

1. Natural Systems, Sustainability and Resilience
2. Public Health Response and Promotion
3. Organizational Strategies for Effective Emergency Management
4. Social Resilience, Culture and Community

A list of approved electives is available from the Program Director.

Total Credit Hours: 53-54

GRADUATE CERTIFICATE IN EMERGENCY MANAGEMENT AND COMMUNITY RESILIENCE

The Graduate Certificate in Emergency Management and Resilience is a five course program organized as follows:

Undergraduate programs

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for the College of Urban and Public Affairs undergraduate degree, go to www.pdx.edu/academic-programs/a-z.

DEGREE REQUIREMENTS

Requirements for majors

In addition to the general University degree requirements, students in urban and public affairs must complete the following degree requirements. Substitution of coursework is acceptable only by permission from the School.

URBAN AND PUBLIC AFFAIRS B.A./B.S.

PROGRAM REQUIREMENTS

Internship/field experience (4 credits)

Choose an approved course from any participating academic unit to complete in senior year.

Dean’s seminar (4 credits)

The Dean’s seminar is to be completed in senior year.

UPA 425 | CUPA Dean’s Seminar | 4

Research skills course (4 credits)

Complete a pre-identified and approved research methods, statistics, or data analysis course from any of the participating academic units.

CCJ 340 | Crime Analysis | 4
CCJ 380 | Criminal Justice Research | 4
PHE 450 | Epidemiology | 4
PS 495 | Topics in Specialized Research Methods for Political Science | 4
Stat 243 | Introduction to Probability and Statistics I | 4
USP 430 | Participatory Research Methods for Community Development | 4
USP 440 | Measuring People and Communities in the Urban Context | 4
Elective courses (20 credits)
Choose 5 courses with no more than 3 courses from CCJ, PA, PS, USP, PHE, Ec, Intl, or UPA. All of the 20 required credits must be from upper-division (300- or 400-level) courses.

Required courses (24 credits)
Students must complete 6 courses representing at least 3 of the 7 academic disciplines listed below:

CCJ 200 Criminology and Criminal Justice 4
CCJ 230 Policing in America 4
or
CCJ 240 Punishment and Corrections 4

CCJ 330U Crime Control Strategies 4
PA 311U Introduction to Civic Engagement 4

PA 312U Foundations of Community Leadership 4
PA 313U Fundamentals of Public Service 4

PS 101 United States Government 4
or
PS 102 United States Politics 4

PS 204 Comparative Politics 4
or
PS 205 International Politics 4

PS 431 State and Local Politics 4
USP 300U Introduction to Urban Studies 4
USP 301U Introduction to Community Development 4

USP 311U Introduction to Urban Planning 4
PHE 350 Health and Health Systems 4
PHE 446U Community Health Principles and Practices 4

PHE 250 Our Community: Our Health 4
Ec 201 Principles of Microeconomics 4
Ec 202 Principles of Macroeconomics 4
Ec 332U Economics of Environmental Issues 4

Intl 201 Introduction to International Studies 4
Intl 296 The United States and the World 4
Intl 397 Theory and Policy in International Development 4

Students will be expected to receive a "C" or better in all required coursework. At least 9 upper-division courses must be taken as part of the 56 credits; further, at least 24 of the required 56 credits must be taken at PSU. Subtotal: 56

Criminology and Criminal Justice
550 Urban Center
503-725-4014
https://www.pdx.edu/criminology-criminal-justice/
- B.A., B.S. (Fully Online Available)
- Minor (Fully Online Available)
- Postbaccalaureate Certificate (Fully Online Available)
- M.S.

The Department of Criminology & Criminal Justice emphasizes the generation and practical application of empirical evidence to crime and justice issues. We seek to promote effectiveness, efficiency, and equity in crime prevention and control efforts by (1) providing students with quality educational experiences that prepare them for lifelong professional success, (2) conducting and disseminating research on theoretical and policy-relevant topics, and (3) collaborating with justice-related organizations to assess, evaluate, and improve policy and practice. Our Department values empirical inquiry, access to higher education, diversity, social justice, and community engagement.

Undergraduate Program
The Department of Criminology & Criminal Justice offers both a campus-based and fully online pathway toward its bachelor degree. The undergraduate program seeks to educate students about the causes, consequences, prevention, and control of criminal and law-violating activity at multiple levels of analysis. Our undergraduate curriculum focuses on (1) criminology and criminal justice theories and empirical research addressing the role of individuals, families, communities, and society in the production and prevention of crime, (2) the justice system's function in controlling crime, and (3) a critical analysis of the effectiveness, efficiency, and equity of related policies and practices. Educational experiences facilitated inside and outside of class help promote students' long term professional success by developing their capacity for critical reasoning, problem-solving, and effective communication.

Criminology & Criminal Justice is an interdisciplinary major, a fact demonstrated by the diverse backgrounds of our full-time and part-time faculty. Students graduating from our program have a wide range of choices when they look for employment or post-graduate education. Recent graduates have found jobs in law enforcement (e.g., police officer, immigration, crime analyst), courts (e.g., victim
advocate, administration), corrections (e.g., parole officer, facility management), human services (e.g., offender counseling, child welfare), and crime prevention (e.g., neighborhood crime prevention specialist, private security). Other alumni from our program have gone on to pursue advanced degrees in such areas as law, criminal justice, psychology, social work, public administration, and urban planning.

DEGREE MAPS AND LEARNING OUTCOMES
To view the degree map and expected learning outcomes for Criminology & Criminal Justice's undergraduate degree, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS
Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

There is an auxiliary application for the fully online program. For more details, please visit www.pdx.edu/criminology-criminal-justice.

CRIMINOLOGY AND CRIMINAL JUSTICE, B.A./B.S.

REQUIREMENTS
In addition to meeting the general university degree requirements, students who major in Criminology & Criminal Justice (CCJ) must complete core and elective courses within the department. Some of these courses require senior status, and students should read course descriptions in the current PSU Bulletin before registration. All core and elective courses submitted to satisfy the requirements for the major, whether taken at PSU or elsewhere, must be passed with a grade of “C” (2.00 GPA) or above. A course grade of C- does not satisfy this requirement. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements. The CCJ degree requirements are:

Core Courses
Transfer equivalent courses may hold a different credit value than the ones listed here.

**Total Credit Hours: 40**

**Graduate Program**

**ADMISSION REQUIREMENTS**

In addition to the general University requirements for admission to graduate study, prospective students should arrange for the Department of Criminology and Criminal Justice to receive:

1. CCJ Graduate Program application submitted online. Please visit site: https://www.pdx.edu/admissions/apply-to-grad-school to apply.
2. Transcripts from each post-secondary institution attended, including PSU.
3. Two (or more) letters of recommendation from faculty members at colleges or universities previously attended, or from others in a position to comment on the student's academic and professional background and experience.
4. A 500-word statement of purpose describing academic and professional career goals, including subfields of primary interest. The statement may also be used to provide any other additional information pertinent to the applicant's qualifications.
5. Applicants required to submit TOEFL scores to the Office of Admissions should also submit them to the Department.
6. A resume or curriculum vita is optional.
7. Students interested in a Graduate Assistantship should indicate this on their application.

In order to be considered for regular admission to the program, applicants should have a total undergraduate GPA of 3.20 or higher or a graduate GPA of 3.20 or higher for a minimum of 9 credit hours.

**CRIMINOLOGY AND CRIMINAL JUSTICE M.S.**

The Department of Criminology and Criminal Justice offers a program of study designed to provide students a broad-based understanding of the criminal justice system and society's response to crime. A major goal of the program is to develop understanding of the applied and theoretical aspects of crime and criminal justice.

The program provides students with a high degree of flexibility and allows students to tailor the program to match their own career interests. Core coursework consists of classes in the theoretical foundations of criminology and criminal justice, methodology, and criminal justice policy analysis.

Students are required to develop a specialization in a substantive area outside of the Department of Criminology and Criminal Justice. In consultation with an advisor, students identify and complete a minimum of three classes, thereby creating a specialty that is unique for each student. Potential specialization fields include social work, social justice, public management, public policy, political science, urban studies, geographic information systems, and crime analysis.

The Criminology & Criminal Justice Graduate program seeks to create a meaningful learning experience and foster professional development for its students based on the following principles:

1. Community of Learners: Graduate students and faculty are involved in a community based on collegial and collaborative relationships evidenced by co-learning and critical dialogue in the classroom and student-faculty partnerships outside of the classroom on writing, research, and community engagement projects.
2. Initiative and Original Thinking: Graduate students are encouraged and given opportunities to participate in the management of their own education experiences and develop new understandings of knowledge and professional practice.
3. Synthesis and Evaluation: Students practice the integration of theory and empirical literature on given criminology and criminal justice topics in order to develop sound theoretical and practical evaluations and to present findings through oral and written reports.
4. Methodological and Analytical Experiences: Graduate students are afforded opportunities to practice the development and implementation of research.
methodologies and execution of basic statistical analyses of empirical data.

5. Self-Assessment: Graduate students are expected to articulate their career goals and develop evidence of their professional growth related to theory, research, policy, communication, justice, diversity, and community engagement.

DEGREE REQUIREMENTS

All candidates for a master’s degree must complete a minimum of 51 graduate credits distributed as follows:

1. 24 credit hours must be taken in the substantive core.
2. 18-21 credits of elective courses, in which 9-12 credit hours may be used to fill a specialization field.
3. 9 credit hours of thesis or project work.
4. Successful submission and defense of a portfolio, field project or thesis.

Specialization Field

In consultation with an adviser, students will be required to develop and complete a specialization field as a part of their degree requirements. A minimum of three classes, totaling 9-12 credits must be completed in the specialization field. Students are encouraged to complete this requirement by taking courses in other academic units such as social work, public administration, computer science, political science, sociology, or geography. Courses may be selected from several academic units so long as they comprise a coherent field of study that will contribute to the academic development of the student.

Elective Courses

Students must satisfactorily complete 18-21 credit hours of elective courses, with at least 12 credits taken in the Department of Criminology and Criminal Justice.

Portfolio, Field Project, or Thesis

Candidates must complete one of three options as part of their culminating experience. The options include a portfolio, field project, or traditional thesis, all of which require a final oral examination. Successful completion of one of these three options is a graduation requirement.

- Thesis: A thesis is a scholarly work that demonstrates substantial capacity on the part of the student to engage in independent investigation. Students must submit a letter of interest and thesis prospectus to the CCJ Graduate Committee for approval before proceeding with the thesis option. To satisfy thesis requirements, students must pose an empirical research question and apply appropriate methods of scholarship to that question in order to generate new knowledge.

- Field Project: A field project involves the student contributing their accumulated program knowledge and technical skills to a report, presentation, or other product that directly benefits an external agency. The field project must have a strong applied focus and address a specific professional or organizational need. Students must submit a letter of interest and field project prospectus to the CCJ Graduate Committee for approval before proceeding with the field project option.

- Portfolio: All CCJ Masters students will complete a portfolio unless they opt for a thesis or field project. The purposes of the portfolio are to facilitate students' learning and intellectual development, document accomplishments, and assess students' specialized skills and professional knowledge. Portfolio students will create an electronic portfolio (e-portfolio) to document, evaluate, integrate, and reflect upon their learning experiences.

econ@pdx.edu

Undergraduate Programs

- B.A., B.S.
- B.S. in Quantitative Economics
- Departmental Honors
- Minor in Economics
- Minor in International Economics
- Minor in Political Economy
- Certificate in Institutional Economics

Graduate Programs

- M.A., M.S.
• Graduate Certificate in Environmental and Resource Economics
• Graduate Certificate in Econometric and Data Analysis

Combined Undergraduate/Graduate Program
• B.S.Q.E. + M.S.

Economics participates in the following programs:
• Ph.D. in Public Administration Policy
• Graduate Certificate in Energy Policy and Management
• Graduate Certificate in Sustainability
• Urban Honors
• Secondary Education Program—Social Science
• M.S.T. and M.A.T. (General Social Science)

Undergraduate programs
Economics majors are advised to contact the department undergraduate advisor for assistance with planning an individualized program of study. Economics majors who are considering graduate school will need to tailor their undergraduate program for this purpose and should seek advice prior to the start of their junior year. It is strongly recommended that students interested in graduate school pursue a B.S. in Quantitative Economics.

DEGREE MAPS AND LEARNING OUTCOMES
To view the degree maps and expected learning outcomes for Economics’ undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS
Admission to the department is based on general admission to the University.

ECONOMICS B.A./B.S.

REQUIREMENTS
The BA and BS in Economics serve as the core of a liberal arts program and provide the fundamentals of economic analysis for students seeking a professional career in business, government and non-profit sectors.

In addition to meeting general university degree requirements, students must satisfy the following departmental requirements:

Economics Core
Ec 201 Principles of Microeconomics 4
Ec 202 Principles of Macroeconomics 4

Ec 311 Microeconomic Theory 4
or
Ec 415 Microeconomic Theory with Calculus 4
Ec 312 Macroeconomic Theory 4

Subtotal: 16

One of the following
Ec 456 American Economic History: the First Century 4
Ec 457 American Economic History: the 20th Century 4
Ec 460 History of Economic Thought 4
Ec 469 Introduction to Econometrics 4

Subtotal: 4

Economics Electives (28 credits)
Up to 12 credits may be below EC 410; 16-28 credits must be numbered EC 410 and above.
Ec 380 may be used to satisfy the requirement for courses numbered EC 410 and above.

Students may not use EC 415 as an economics elective.

Subtotal: 28

Mathematics and Statistics
Mth 251 Calculus I 4
Stat 243 Introduction to Probability and Statistics I 4
Stat 244 Introduction to Probability and Statistics II 4

Subtotal: 12

Majors must take a minimum of 24 credits of upper division (300 and above) coursework in residence from this department and maintain at least a 2.00 grade point average in work completed in this department.

All courses used to satisfy the departmental major requirements, whether taken in the department or elsewhere, must be taken for a letter grade and must be graded C- or above. Ec 403 Honors Thesis cannot be used to satisfy the requirements for the major in Economics. Up to 4 credits of Ec 418 may be counted as upper division credit in the major.

Subtotal: 60

B.S. QUANTITATIVE ECONOMICS

REQUIREMENTS
The B.S. in Quantitative Economics requires a total of 79 credit hours, 28 for core courses, 28 for economics electives, and 23 for math/statistics courses. The curriculum is designed to prepare students for entry into a Masters of Economics program, but it is also an excellent choice for those wishing to go directly into employment or a graduate program in another field.

### Economics Electives

A minimum of 28 credits of 300- and 400-level coursework in economics in addition to the required core courses. At least 16 of these credits must be in courses numbered 410 and above. Mth 311 may be counted as upper-division credit in the major. Up to 4 credits of Ec 418 may be counted as upper-division credit in the major. Ec 311 cannot be used as an economics elective.

Quantitative Economics majors must take a minimum of 24 credits of upper-division coursework (courses numbered 300 and above) in this department and must maintain at least a 3.0 grade point average in work completed in this department. All courses used to satisfy the departmental major requirements, whether economics, mathematics or statistics, must be taken for a letter grade and must be graded C- or better. Ec 403 (Honors Thesis) cannot be used to satisfy the requirements for the BS in Quantitative Economics. Up to 4 credits of Ec 418 Economics Seminar may be counted as upper division credit in the major.

**Total Credit Hours:** 79

### ECONOMICS DEPARTMENTAL HONORS PROGRAM

Departmental Honors is separate from Urban Honors and is administered within the Economics Department.

The Departmental Honors Program allows outstanding majors in the Department of Economics to conduct research with a faculty member and to receive recognition for their exceptional performance. Honors students participate in faculty research projects or pursue an independent honors thesis under faculty guidance. Applicants are required to have earned a minimum GPA of 3.50 in economics courses at the time of application.

To earn Departmental Honors, interested students should apply to the undergraduate advisor after completing Ec 201, Ec 202, Ec 311 or Ec 415, and Ec 312. It is recommended that students either complete Mth 251, Stat 243, Stat 244 and one of the following: Ec 456, Ec 457, Ec 460, Ec 469 OR that they enroll concurrently in these courses while working on the Departmental Honors program. Students admitted to the Departmental Honors complete the following requirements:

- 8 credits of Ec 403 which cannot be used to satisfy the requirements for the BA/BS in economics.
- A written thesis to be completed during the final term of enrollment in Ec 403.
- Presentation of the thesis during the final term of enrollment in Ec 403 fulfills the requirements for Departmental Honors.

### ECONOMICS MINOR

Minors in Economics are only available to students majoring outside the department.

**REQUIREMENTS**

Students complete 28 credits in economics (12 credits of which must be taken in residence at PSU), to include the following:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

INSTITUTIONAL ECONOMICS

UNDERGRADUATE CERTIFICATE

Institutional Economics focuses on the relationship between economic outcomes and the evolving structure and organization of society. Students completing the Certificate in Institutional Economics will deepen their understanding of how institutions within the economy contribute to economic outcomes. The Certificate in Institutional Economics program welcomes the wisdom that (i) currently enrolled undergraduate students, (ii) postgraduate students, and (iii) members of the broader community bring to the classroom. For students who are majoring in Economics or Quantitative Economics, the certificate requires the completion of an additional 16 credits of approved elective courses (i.e. electives included in the Certificate in Institutional Economics do not count towards the Economics major.)

Required Courses

<table>
<thead>
<tr>

Subtotal: 16

Total Credit Hours: 28

Other Requirements:

- 16 of the required 28 credits must be taken in residency with the Department of Economics at Portland State University.
- All courses must be taken for a grade (not P/NP), with a grade of C- or better.
• Award of the Certificate in Institutional Economics requires a GPA in included courses of 2.00 or above.

**Graduate programs**

The Department of Economics offers graduate work leading to the Master of Science and Master of Arts degrees, as well as two graduate certificates, the Graduate Certificate in Econometrics and Data Analysis and the Graduate Certificate in Environmental and Resource Economics.

**ADMISSION REQUIREMENTS**

**Master of Science or Master of Arts**

Admission to the Master’s program in the Department of Economics is online at www.pdx.edu/admissions/apply-to-grad-school. In addition to the University admissions requirements, department requirements are:

1. **GPA Requirements**: Admission to the Economics program is highly competitive and requires a minimum of a 3.00 GPA in overall undergraduate coursework.

2. **Coursework**: Undergraduate courses in Intermediate Microeconomics, Intermediate Macroeconomics, Statistics, Econometrics and Multivariate Calculus, as well as Linear Algebra, are required for admission.

3. **Testing**: The GRE is no longer required for admission. If an applicant has taken it, they have the option to include the report in the application. However, the TOEFL or IELTS is required for University admission for international students, unless they have a degree from a university in Australia, English-speaking Canada, Great Britain, Ireland, New Zealand or the U.S. See University minimum TOEFL or IELTS requirements at www.pdx.edu/admissions/international/english-language-proficiency.

4. **Recommendations**: Three (3) letters of recommendation, at least two of which must be from economics professors.

5. **Statement of Purpose**: Approximately 500-word essay on goals and aspirations for entering and completing the graduate program.

6. **Application/Transcripts**: Transcripts from ALL other institutions (other than PSU) you have attended. If you are admitted to the program, you will need an official transcript sent directly from your other institutions to the Graduate School.

**ECONOMICS M.S./M.A.**

The Master of Arts has the same requirements as a Master of Science, but Master of Arts has an additional requirement of a foreign language. Students must complete an eleven-course core requirement (44 credits), with 48 credits in total. Credit requirements beyond the core courses may be satisfied entirely with an economics elective course or with a combination of economics seminar for a maximum of 4 credits and economics research for a maximum of 4 credits. Students have four options for completing the economics electives and/or research requirement:

1. **Select 4 credits of economics electives**
2. **Select economics research to be completed in Ec 501 for a maximum of 4 credits**
3. **Select 1 credit of economics seminar in Ec 518 for a maximum of 4 times (maximum 4 credits)**
4. **Select a combination of economics research and economics seminar, for a total of 4 credits**

Economics elective courses may be substituted by graduate courses from other departments with prior Department of Economics approval.

**REQUIREMENTS**

**Core economics courses (44 credits)**

**Economics electives and/or Economics Research (4 credits)**

Option I: Economics Electives

Option II: Economics Research (Ec 501)

Option III: Economics Seminar (Ec 518)

Option III: A combination of Economics Research (Ec 501) and Economics Seminar (Ec 518)

Students with questions concerning transferred credits should contact the Graduate adviser.

**ECONOMETRIC AND DATA ANALYSIS GRADUATE CERTIFICATE**

The Graduate Certificate in Econometric and Data Analysis consists of four 4-credit courses for a total of 16 credits.
credits. There are three required courses and one elective course. The curriculum is designed to allow students to complete the certificate in one academic year.

**REQUIREMENTS**

**Econometrics Core Sequence**
- Ec 570: Econometrics 4
- Ec 571: Advanced Econometrics 4
- Ec 576: Implementing Econometrics using Stata and R 4

Note: Ec 570 is a prerequisite for Ec 571. However, Ec 576 can be taken out of sequence.

**Elective Course**
Any graduate course numbered Ec 511 and above may satisfy the elective requirement. Elective courses should be selected in consultation with the Graduate Program Director as advance approval may be required.

**GRADUATE CERTIFICATE IN ENVIRONMENTAL AND RESOURCE ECONOMICS (G.C.E.R.E.)**

The Graduate Certificate in Environmental and Resource Economics requires 16 credits of graduate coursework. The certificate provides students with an understanding of the critical linkages between economics and key environmental issues. It also offers an introduction to the most important analytical tools, including cost-benefit analysis. Students will develop a solid understanding of the major local, national and global environmental challenges, provide insights into how markets allocate natural resources and the market and government "failures" associated with the environment and will be introduced to some of the tools used to analyze the effects of alternative resource and environmental regulations and policies.

**REQUIREMENTS**

**Prerequisite economics course (4 credits)**
- Ec 201: Principles of Microeconomics 4

**Core economics courses (12 credits)**
- Ec 522: Economics of Sustainability: Theory and Practice 4
- Ec 527: Cost-Benefit Analysis 4
- Ec 530: Resource and Environmental Economics 4

Subtotal: 12

**Graduate Elective course (4 credits)**
Any graduate Economics course numbered 511/611 or above is automatically approved as an elective. Appropriate courses from other departments can be applied to the electives requirement with advance approval of the Graduate Program Director.

**Economics Courses**
- Ec graduate level elective 4

Though any Economics course fulfills the elective requirement, the following environmental and resource economics courses may be offered:
- Ec 532: Advanced Environmental Economics
- Ec 533: Resource Economics
- Ec 534: Business Environmental Management
- Ec 537: Public Utility Economics
- Ec 543: Global Environmental Economics

**Other Courses**
- Other graduate level elective 4

Courses from other departments can be applied to the electives requirements with prior approval of the Graduate Program Director.

Subtotal: 16

**Total Credit Hours: 16**

**SUSTAINABILITY GRADUATE CERTIFICATE**

The Graduate Certificate in Sustainability provides students with an in-depth understanding of sustainability and the connections between social, environmental, and economic systems, and equips them with the knowledge to apply sustainable, integrated problem solving approaches in their lives and careers. The certificate is a 22-credit program that consists of four core courses and two electives. The certificate is open to students from all areas of study and professional backgrounds and can be taken either by students admitted solely to the certificate program or concurrently enrolled in masters and doctoral programs at PSU. More information about the certificate and application process can be found at https://www.pdx.edu/economics/academics/programs/graduate/sustainability-graduate-certificate.

**Electives**

The Graduate Certificate in Sustainability requires a minimum of 7 credits of elective courses. Most graduate courses with a focus on sustainability or environmental issues will count as electives. For a list of pre approved electives see the Graduate Certificate in Sustainability website. Classes not on that list should be selected in consultation with the Graduate Program Director as advance approval may be required.

**Core**
- Ec 522: Economics of Sustainability: Theory and Practice 4
- ESM 588: Environmental Sustainability 4
Soc 588  Social Sustainability Theory and Practice  4
USP 588  Sustainable Development Practices  3

Subtotal: 15

Note: The core classes can be taken in any sequence and can also be taken after the elective courses.

Total Credit Hours: 22

Combined Undergraduate and Graduate Degree

B.S. IN QUANTITATIVE ECONOMICS+MASTER OF SCIENCE (B.S.Q.E.+M.S.)

Students in the B.S. in Quantitative Economics program may be admitted directly into the M.S. in Economics program and “share” 16 credits of graduate level credit with the B.S.Q.E. and M.S. in Economics.

CONTINUATION CRITERIA

Students must maintain GPAs of:

3.3 in courses numbered 500 and above, with a minimum grade of B
3.5 in economics courses numbered 499 and below, with a minimum grade of C-
3.3 overall at PSU.

ADMISSIONS CRITERIA

- BSQE majors may apply for the BSQE+MS program upon earning junior status if on track to complete at least 165 undergraduate credits before starting the Master’s theory sequence in Fall Term. Please see the BSQE+MS section of our website, pdx.edu/economics
- Candidates for the BS+MS program should apply online using the BSQE+MS program, not the MS program, by submitting a graduate application through the Graduate School. Prior to the beginning of the application process, students are strongly encouraged to contact the graduate advisor.
- If the application is successful, the student will be notified via e-mail.
- Applicants will not be required to submit GRE scores provided they satisfy the following requirements:
  - A GPA of 3.5 or above for all economics classes
  - A PSU institutional GPA of 3.3.
  - 500-level courses must be graded B or better.
  - All undergraduate economics courses must be graded C- or better.
- No P/NP credit in required economics, mathematics and statistics classes except as exempted by COVID-19 policy.
- Department residency requirement of 24 undergraduate economics credits taken at PSU satisfied.
- PSU residency requirement for 45 of last 60 credits taken at PSU satisfied

Please Note:
The Department of Economics awards Graduate Assistantships (GAs) on a competitive basis each year. BS + MS students who meet the admission criteria and who wish to apply for a GA-ship must submit their application by February 1st of the year they graduate with a BSQE.

RESEARCH CENTER

Northwest Economic Research Center
450 Urban Center Building (URBN)  
503-725-8167  
https://www.pdx.edu/economics/northwest-economic-research-center

The Northwest Economic Research Center (NERC) has dual functions. First, the Center conducts applied economic research and presents it in a form that is useful and understandable to a wide variety of interested parties and stakeholders. NERC is able to fulfill a need for quality, unbiased analysis on policies and phenomena with economic implications for Oregon, and is the only economic research center partnered with a university in the Portland area.

Secondly, by using connections to other centers and departments within the University, NERC offers a wider breadth in approach in comparison to similar non-academic centers and can engage in collaborative work outside of the discipline. In the process, NERC provides valuable experience and training from experts in the field to recently-graduated researchers, as well as training for graduate students currently in the M.S. program that will be highly applicable in their future careers.

NERC offers superior value to its clients by combining the latest in analytic techniques from the academic world with practical, implementable recommendations, and to the community by providing vital and unbiased research. Additionally, NERC provides value to the university through opportunities for real-world experience and networking to graduate students, as well as raising awareness of the University in the popular press and other circles.
International and Global Studies

470 Urban Center (URBN)

• Certificate in Contemporary Turkish Studies (Admission to the program is currently suspended)

The Department of International and Global Studies endeavors to foster a deep understanding of global issues, such as social justice and human rights, international development, environmental justice, health, international conflicts, gender and sexuality, and labor rights. We offer four B.A. concentrations: two thematic, interdisciplinary options, in Global Studies and International Development Studies, and two with regional specialization, in Asian Studies and Latin American Studies.

GLOBAL STUDIES TRACK

The Global Studies major provides both a global perspective and a deep understanding of major themes and events in global affairs. Under the guidance of expert faculty and advisors, students develop an understanding of world cultures, societies, media, and politics within the framework of globalization.

REQUIREMENTS FOR GLOBAL STUDIES

Global Studies majors must complete a core curriculum of international studies courses (24 credits); five electives from the Global Studies course list (20 credits); and two elective courses from the International Development Studies course list (8 credits).

Core Courses (24 credits)

Intl 201 Introduction to International Studies 4
Intl 296 The United States and the World 4
Intl 397 Theory and Policy in International Development 4
Intl 407 Seminar 4
Intl 415 Global Studies Theories 4
Intl 471/Ling 471 Understanding the International Experience 4

Intl 470 Intercultural Leadership and Change can substitute for Intl 471 Understanding the International Experience.

Pre-requisite requirements:
- Prerequisites for Intl 397 are Intl 201 and Intl 296
- Prerequisites for Intl 407 are either Intl 397 or Intl 415
- Prerequisites for Intl 415 are Intl 201 and Intl 296

Global Studies Electives (20 credits)
Students must take 20 credits from the Global Studies course list (see table below).

- Intl 317U Topics in Asian Thought 4
- Intl 321U Asia: Globalization and Identity 4
- Intl 323U Asia: Tradition and Innovation 4
- Intl 331U/Ws 331U Women in the Middle East 4
- Intl 332U Islamic Social Movements 4
- Intl 334U Globalization and Conflict in Latin America 4
- Intl 350U The City in Europe 4
- Intl 360U Bollywood: Communicating Contemporary South Asia through Cinema 4
- Intl 365U Digital Globalization 4
- Intl 366U Cyberwar & Espionage 4
- Intl 367U The Global Drug Trade 4
- Intl 380U Globalization, Representation and Difference in Media and Film 4
- Intl 391U Media and International Relations 4
- Intl 452/PS 452 The European Union 4
- Intl 470 Intercultural Leadership and Change 4

Consult with an Advisor for Intl 399 and Intl 410 courses that count for International Development Studies courses.

Study Abroad courses can count towards International Development Studies courses when approved through the Course Substitution process. See an Advisor for more details.

Additional Electives (8 credits)
Majors must take eight credits of elective courses from the International Development Studies course list (see table below).

- Intl 341U Environment and Development in Latin America 4
- Intl 343U Commodity Chains in Latin America: From Silver to Cocaine 4
- Intl 349U/WS 349U Gender and International Development 4
- Intl 362U/Hst 362U Amazon Rain Forest 4
- Intl 364U Modern Brazil 4
- Intl 372U/BS 372U Post-colonial Studies of Africa 4
- Intl 375U Global Migration 4
- Intl 445/USP 445 Cities and Third World Development 3
- Intl 460/PS 460 Political Development in Modern Turkey 4
- Intl 461/PS 461 Politics of Economic Reform in Modern Turkey 4
- Intl 490 Global Sustainable Development 4

Consult with an Advisor for Intl 399 and Intl 410 courses that count for International Development Studies courses.

Study Abroad courses can count towards International Development Studies courses when approved through the Course Substitution process. See an Advisor for more details.

Language (0-27 credits)
Two years, or equivalent proficiency, of foreign language study. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

Total Credit Hours: 52
Students are required to take at least 36 credits with the Intl prefix.
A minimum of 12 credit hours must be Intl courses at the 400-level.
All courses used to satisfy the departmental major requirements (and minor or certificate requirements), whether taken in the department or elsewhere, must be graded C or above.
Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements.

INTERNATIONAL DEVELOPMENT STUDIES TRACK

A major in International Development Studies prepares students to understand the challenges that developing nations face to achieve improved living conditions for their inhabitants. In our courses, we emphasize how development is shaped by the intersections of politics, economy, social and political power, and culture at global, national, and regional levels. Our majors acquire a critical understanding of environmental vulnerabilities and socio-economic inequalities in the developing world, grounded in an appreciation of global history.

REQUIREMENTS FOR B.A. IN INTERNATIONAL DEVELOPMENT STUDIES

International Development Studies majors must complete a core curriculum of international studies courses (24 credits); five electives from the International Development Studies course list (20 credits); and two elective courses from the Global Studies course list (8 credits).

Consult with an Advisor for Intl399 and Intl410 courses that count for Global Studies courses.
Study Abroad courses can count towards Global Studies courses when approved through the Course Substitution process. See an Advisor for more details.

Language (0-27 credits)
Two years, or equivalent proficiency, of foreign language study. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

Total Credit Hours: 52
Students are required to take at least 36 credits with the INTL prefix.
A minimum of 12 credit hours must be Intl courses at the 400-level.
All courses used to satisfy the departmental major requirements (and minor or certificate requirements), whether taken in the department or elsewhere, must be graded C or above.
Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements.

ASIAN STUDIES TRACK
The Asian Studies major dives into the continent’s past, present, and future through the interdisciplinary study of political-economy, cultures and religions, communication and media, gender and sexuality, migration, development, and environmental change grounded in South, Southeast, and East Asia.

REQUIREMENTS FOR ASIAN STUDIES
Students doing the Asian Studies major must complete a core curriculum of international studies courses; an individualized curriculum of connected learning courses; and courses in their area of geographic concentration, to include:

Core Courses (24 credits)
- Intl 201 Introduction to International Studies 4
- Intl 216 Introduction to Asian Studies 0-4
- Intl 296 The United States and the World 4

Intl 407 Seminar 4
Intl 415 Global Studies Theories 4
Intl 445 Cities and Third World Development 3
Intl 470 Intercultural Leadership and Change 4
Intl 471/Ling Understanding the International Experience 4
Intl 490 Global Sustainable Development 4

Students may double count Intl 216 for the major and University Studies Sophomore Inquiry; a Mentored Inquiry section is required.
Intl 470 Intercultural Leadership and Change can substitute for Intl 471 Understanding the International Experience.

Pre-requisite requirements:
- Prerequisites for Intl 397 are Intl 201 and Intl 296
- Prerequisites for Intl 407 are either Intl 397 or Intl 415
- Prerequisites for Intl 415 are Intl 201 and Intl 296

Connected Learning (20 credits)
At least 20 upper-division credits from advisor-approved courses. Connected Learning courses must have global/international content and must not focus on a specific region. (Exception: one course may focus on a region other than Asia.)
- Intl 332U Islamic Social Movements 4
- Intl 349U/WS Gender and International Development 4
- Intl 349U Digital Globalization 4
- Intl 365U Cyberwar & Espionage 4
- Intl 366U The Global Drug Trade 4
- Intl 367U Global Migration 4
- Intl 380U Globalization, Representation and Difference in Media and Film 4
- Intl 391U Media and International Relations 4
- Intl 397 Theory and Policy in International Development 4
- Intl 445/USP Cities and Third World Development 3
- Intl 490 Global Sustainable Development 4

Special Topics courses (399, 410), Seminars (407), and non-Intl classes, as well as individualized Reading and Conference courses arranged with instructors may be substituted for specific courses listed above as long as the scope of the course is global/international. All such courses must be approved by your Advisor before you register for the course.
Regional Focus (20 credits)
At least 20 upper-division credits from PSU courses focused on Asia. Students must consult with the faculty advisor for Asian Studies when choosing courses.
Special Topics courses (399, 410), Seminars (407), and other area-related classes, as well as individualized Reading and Conference courses arranged with instructors may be substituted for specific area courses listed above. All such courses must be approved by your advisor before you register for the course.

Language (0-27 credits)
Two years, or equivalent proficiency, of language study in one world language. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

Total Credit Hours: 64
For graduation, a minimum of 36 credit hours are required to be in Intl courses, of which at least 12 credit hours must be at the 400-level.

All courses used to satisfy the departmental major requirements (and minor or certificate requirements), whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements.

LATIN AMERICAN STUDIES TRACK
The Latin American Studies major dives into the continent’s past, present, and future through the interdisciplinary study of political-economy, cultures and religions, communication and media, gender and sexuality, migration, development, and environmental change.

REQUIREMENTS FOR LATIN AMERICAN STUDIES
Students doing the Latin American Studies major must complete a core curriculum of international studies courses; an individualized curriculum of connected learning courses; and courses in their area of geographic concentration, to include:

Language (0-27 credits)
Two years, or equivalent proficiency, of language study in a language appropriate to the student's regional focus. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

Total Credit Hours: 64
For graduation, a minimum of 36 credit hours are required to be in Intl courses, of which at least 12 credit hours must be at the 400-level.

All courses used to satisfy the departmental major requirements (and minor or certificate requirements), whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling department major requirements.

ACADEMIC ADVISORS
Information on courses and major requirements is available from CUPA and faculty advisors. Students should see an advisor as soon as they declare their major and meet regularly with advisors as they pursue their degree.

CUPA Advisors:
CUPA Advising website; 503-725-9210

Faculty Advisors:
Kimberley Brown, brownk@pdx.edu, 503-725-8194; Evguenia Davidova, evguenia@pdx.edu, 503-725-8992; Priya Kapoor, cgpk@pdx.edu, 503-725-3543; Pronoy Rai, rai@pdx.edu, 503-725-3451; Leopoldo Rodriguez, leopoldo@pdx.edu, 503-725-8245; Shawn Smallman, smallmans@pdx.edu, 503-725-9978; Gerald Sussman, sussmang@pdx.edu, 503-725-5176.

MINOR IN INTERNATIONAL AND GLOBAL STUDIES
Add a global dimension to any degree with a minor in International & Global Studies.

REQUIREMENTS
The minor must be earned simultaneously with a B.A. or B.S. degree. Requirements for the Minor in International & Global Studies include 28 credits of core and elective courses, plus two years of language study (or equivalent) in a world language.

International Studies Core Courses (12 credits)
- Intl 201 Introduction to International Studies 4
- Intl 296 The United States and the World 4
- Intl 415 Global Studies Theories 4

Intl 201 and Intl 296 are required prerequisites for Intl 415.

Elective Courses (16 credits)
Students must take 16 upper-division credits from the following tables of courses:

Global Studies Course List (Social Justice, Human Rights & Global Media)
- Intl 317U Topics in Asian Thought 4
- Intl 321U Asia: Globalization and Identity 4
- Intl 323U Asia: Tradition and Innovation 4
- Intl 331U/Ws Intl 331U Women in the Middle East 4
- Intl 332U Islamic Social Movements 4
- Intl 342U Globalization and Conflict in Latin America 4
- Intl 350U The City in Europe 4
- Intl 360U Bollywood: Communicating Contemporary South Asia through Cinema 4
- Intl 365U Digital Globalization 4
- Intl 366U Cyberwar & Espionage 4
- Intl 367U The Global Drug Trade 4
- Intl 375U Global Migration 4
- Intl 380U Globalization, Representation and Difference in Media and Film 4
- Intl 391U Media and International Relations 4
- Intl 470 Intercultural Leadership and Change 4

International Development Studies Course List (Development, Health & Environment)
- Intl 341U Environment and Development in Latin America 4
- Intl 343U Commodity Chains in Latin America: From Silver to Cocaine 4
- Intl Gender and International Development 4
- Intl 349U/WS Intl 349U Amazon Rain Forest 4
- Intl 362U/Hst Intl 362U Modern Brazil 4
Consult with a faculty or CUPA advisor for INTL 399 and INTL 410 courses that count for minor electives. Study Abroad courses can count towards elective courses when approved through the Course Substitution process. See a faculty or CUPA advisor for more details.

**Language (0-27 credits)**

Two years, or equivalent proficiency, of foreign language study. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

**Total Credit Hours: 28**

All courses used to satisfy the departmental minor requirements, whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling departmental minor requirements.

**ACADEMIC ADVISORS**

Information on courses and requirements is available from CUPA and faculty advisors. Students should see an advisor as soon as they declare their minor and meet regularly with advisors as they pursue their degree.

---

**CERTIFICATE IN GLOBAL STUDIES (24 CREDITS)**

A Certificate in Global Studies may be earned simultaneously with a B.A. or B.S. degree, or post baccalaureate in any non-Intl major. The certificate offers students an opportunity to be recognized for their interest in and awareness of globalization and global studies in all of its aspects -- economic, cultural, political, environmental and social.

The Certificate in Global Studies consists of 24 credits of global studies or globalization-focused work. The 24 credits include two 4-credit Intl foundational courses and 16 credits of elective coursework.
Students completing an International and Global Studies major or minor are not eligible to receive a global studies certificate.

All courses used to satisfy the departmental certificate requirements, whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling departmental certificate requirements.

CERTIFICATE IN INTERNATIONAL DEVELOPMENT STUDIES (24 CREDITS)

A Certificate in International Development Studies may be earned simultaneously with a B.A. or B.S. degree, or post baccalaureate in any non-Intl major. The certificate offers students an opportunity to enhance their knowledge of international development and prepare for careers and graduate studies in this field.

The Certificate in International Development Studies consists of 24 credits including three core courses (12 credits) and three courses (12 credits) of elective coursework focused on international development.

Students completing an International and Global Studies major or minor are not eligible to receive an International Development Studies certificate.

All courses used to satisfy the departmental certificate requirements, whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling departmental certificate requirements.

CERTIFICATE IN AFRICAN STUDIES (28 CREDITS)

The African Studies certificate allows students to explore themes related to the continent’s history, politics, people, economy, and culture from a multidisciplinary perspective.

For the African Studies certificate students must take:

- 28 credits of advisor-approved courses: discuss the options with an International & Global Studies faculty advisor.
- Two years, or equivalent proficiency, of a foreign language. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

All courses used to satisfy the departmental certificate requirements, whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling departmental certificate requirements.

CERTIFICATE IN ASIAN STUDIES (28 CREDITS)

The Asian Studies certificate focuses on the interdisciplinary study of political-economy, cultures and religions, communication and media, gender and sexuality, migration, development, and environmental change in South, Southeast, and East Asia.

For the Asian Studies certificate students must take:

- 28 credits of advisor-approved courses: discuss the options with an International & Global Studies faculty advisor.
- Two years, or equivalent proficiency, of a foreign language. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

All courses used to satisfy the departmental certificate requirements, whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling departmental certificate requirements.

CERTIFICATE IN EUROPEAN STUDIES (28 CREDITS)

The European Studies certificate allows students to explore themes related to the continent’s history, politics, people, economy, and culture from a multidisciplinary perspective.

For the European Studies certificate students must take:

- 28 credits of advisor-approved courses: discuss the options with an International & Global Studies advisor.
- Two years, or equivalent proficiency, of a foreign language appropriate to the regional focus. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

All courses used to satisfy the departmental certificate requirements, whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling departmental certificate requirements.
CERTIFICATE IN LATIN AMERICAN STUDIES (28 CREDITS)

The Latin American Studies certificate allows students to explore themes related to the continent’s history, politics, people, economy, and culture from a multidisciplinary perspective.

For the Latin American Studies certificate students must take:

- 28 credits of advisor-approved courses: discuss the options with an International & Global Studies advisor.
- Two years, or equivalent proficiency, of a foreign language appropriate to the regional focus. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

All courses used to satisfy the departmental certificate requirements, whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling departmental certificate requirements.

CERTIFICATE IN MIDDLE EAST STUDIES (28 CREDITS)

The Middle East Studies certificate allows students to explore themes related to the continent’s history, politics, people, economy, and culture from a multidisciplinary perspective.

For the Middle East Studies certificate students must take:

- 28 credits of advisor-approved courses: discuss the options with an International & Global Studies advisor.
- Two years, or equivalent proficiency, of a foreign language appropriate to the regional focus. For students taking courses at PSU, second-year proficiency is defined by successful completion of the terminal course in the second-year language sequence, or demonstrating proficiency through the Department of World Languages and Literature.

All courses used to satisfy the departmental certificate requirements, whether taken in the department or elsewhere, must be graded C or above. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling departmental certificate requirements.

CERTIFICATE IN CONTEMPORARY TURKISH STUDIES (NOT ACCEPTING APPLICATIONS)

Admission to the program is currently suspended.

EDUCATION ABROAD

Students in International and Global Studies programs are encouraged to consider overseas study opportunities available through the Office of Education Abroad (p. 74), Karl Miller Center, Room 660. However, a study abroad experience is not required.

Mark O. Hatfield School of Government
Birol Yesilada, Director
650 Urban Center
503-725-3257
www.pdx.edu/hatfield-school/

The Mark O. Hatfield School of Government is dedicated to improving governance through the integration of theory and practice. Scholarly inquiry is the foundation of the school’s global programs that focus on public service, social justice, and governance.

Locally renowned, the Hatfield School has also gained national prestige as one of the top 50 Public Affairs graduate programs in the nation, according to the 2016 U.S. News and World Report rankings. Whether starting or advancing a career in public service, the Hatfield School has undergraduate, graduate, PhD, certificate and continuing education programs that allow students the flexibility to tailor their education to pursue their passion.

The Hatfield School is home to PSU’s Criminology & Criminal Justice, Political Science and Public Administration departments. Although each program is distinct, their location under one roof affords students the unique opportunity for collaborative multi-disciplinary study.

The Hatfield School offers both a Ph.D. program and a Master's degree with an interdisciplinary focus:

- The Public Affairs and Policy Ph.D. program (p. 394)
- The Master’s in Public Policy (p. 397)

The School consists of three academic departments:

- Department of Criminology and Criminal Justice (p. 375)
- Department of Political Science (p. 413)
- Department of Public Administration (p. 421)
and seven institutes and centers:
  • Criminal Justice Policy Research Institute (p. 399)
  • Center for Public Service (p. 399)
  • The National Policy Consensus Center (p. 412)
  • The Institute for Tribal Government (p. 399)
  • The Nonprofit Institute (p. 428)
  • Center for Turkish Studies (p. 399)
  • Center for Women's Leadership (p. 399)

**Doctoral Program**

**PUBLIC AFFAIRS AND POLICY PH.D.**

The Ph.D. in Public Affairs and Policy is an interdisciplinary program designed to prepare individuals to pursue research, teaching, advocacy, public service, and/or consulting in a variety of settings ranging from universities to policy research organizations, public agencies, and private consulting firms. The degree may be pursued on a full- or part-time basis.

The degree program is administered by the Hatfield School of Government, but draws on faculty from the entire College of Urban and Public Affairs. Faculty members are drawn from public administration, political science, economics, policy sciences, and urban studies.

The curriculum focus is governance, the integrated study of political, administrative, and policy processes. This curriculum is taught against the backdrop of globalizing economies and political systems seeking to recognize governance in a modern world characterized by both cooperation and conflict among the public, private, and non-profit organizations.

The doctoral program in Public Affairs and Policy is designed to enable students to approach governance as an applied area of knowledge in which theory informs and is informed by real-world practice.

**DEGREE REQUIREMENTS**

Award of the Ph.D. is the culmination of a sequential process of coursework, comprehensive examinations, and the research, writing, and defense of a doctoral dissertation. In addition to the department core coursework, each field has additional specialization requirements. The total number or credit hours required for the degree is 107, distributed as follows:

- Core Coursework--18 credits
- Research Methods--24 credits
- Field Coursework--38 credits
- Dissertation--27 credits

As a cohort, first-year students take a series of six courses commonly referred to as “the core” and are examined on this material upon completion. During their second and third years, students complete their field and research methods coursework. The comprehensive examination that follows the satisfaction of all course requirements typically asks students to think prospectively about the application of this material to their dissertation work. After the completion and defense of a dissertation proposal, students advance to Ph.D. candidacy. The last remaining hurdle is the dissertation.

**Prerequisites**

All students entering the doctoral program must have completed a basic course in statistics either upon entering or within the first year of study. No degree credit will be awarded for this coursework.

**Credit requirements**

The Ph.D. in public affairs and policy requires 80 credit hours of required and elective coursework. In addition, the student enrolls in 27 credits for dissertation research and writing.

The credits are distributed as follows:

<table>
<thead>
<tr>
<th>Course Type</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Coursework</td>
<td>18</td>
</tr>
<tr>
<td>Field of Specialization (Tracks 1-3)</td>
<td>38</td>
</tr>
<tr>
<td>Research Methods</td>
<td>24</td>
</tr>
<tr>
<td>Dissertation credits</td>
<td>27</td>
</tr>
</tbody>
</table>

**Subtotal: 107**

To meet these credit requirements, relevant past academic coursework is recognized in these ways:

Up to 40 credits of coursework related to governance or research methods completed at the master’s level may be counted toward the Ph.D. degree.

In addition, students with extensive academic background and/or experience in using quantitative or qualitative research methods may substitute one or more required research methods courses with other coursework with permission of their academic adviser.

Specialization fields (Tracks 1-3)

Students must choose one of the following three tracks as their primary domain of study.

1. Public Administration and Policy (38 credit hours)

Students focus on the functioning, management, and leadership of organizations in the public sector as well as the analysis of public policy. Required courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA 534</td>
<td>Administrative Law</td>
<td>3</td>
</tr>

<td>Advanced Macroeconomics</td>
<td>4</td>
</tr>
<tr>
<td>Ec 592</td>
<td>Applications of Advanced Macroeconomic Theory</td>
<td>4</td>
</tr>
</tbody>
</table>

Ec 571, Ec 575 and Ec 580 may be waived as Track courses if used as Research Methods elective. Students must still complete 38 total field credits.

Research Methods

Coursework in research methods is normally completed concurrently with field specialization coursework. Approved substitutes for methods coursework will be listed in the PAP Course Planner each year.

Subtotal: 24

Dissertation Research

Students must register for a minimum of 27 credits of PAP 603 Dissertation to represent the work of researching and writing the doctoral dissertation.

Comprehensive examinations

In order to evaluate one’s ability to integrate, analyze, and critique the diverse materials and ideas presented in the PAP curriculum, students are required to complete a two-part comprehensive examination. Part A of the examination (core exam) covers the 18 credit hours of foundational core courses. Part B (field exam) covers all coursework done in the student’s specialization field (Tracks 1-3).

Dissertation requirements

The dissertation process is designed to evaluate the student’s ability to successfully conduct a significant, independent applied research project. The dissertation thesis represents the culmination of a student’s doctoral studies.

ADMISSION REQUIREMENTS

More information about the public affairs and policy Ph.D. program and all application forms are available at www.pdx.edu/hartfieldschool and https://cupa.pdx.edu/apply-now. Applications are accepted for fall admission only; the application deadline is 31 December and there is a late application deadline of 30 April. An early admission deadline for December 1 is offered for outstanding candidates seeking early admission.

Only one application will need to be submitted to apply to the PAP Program. The following materials should be submitted through the application link found on the Graduate School’s website.

- Non-refundable $65 application fee (no cash)
- One transcript from each post-secondary institution attended (both sides need to be uploaded)
- Statement of Financial Support and Declaration of Finances (if International)
- International Applicants who currently reside in the United States with an F-1 or J-1 visa must fill out the SEVIS form
• Official TOEFL scores if the applicant does not speak English as a native language and has not received a graduate or undergraduate degree in an English-speaking territory
• A statement of intent up to 1,000 words. The statement should address the following: 1) Professional goals; 2) Planned area of study (policy specialization); 3) Desired employment sector; 4) How the degree furthers achievement of your professional goals
• A policy-oriented or academic writing sample.
• Three recommendation letters from individuals familiar with the applicant’s academic and/or professional capabilities. Preferably, two of the three letters should be from former instructors or from individuals with knowledge of your professional performance and potential.
• A current resume
• The scores of the Graduate Record Examination (GRE). Please note that you should make arrangements to take the GRE well in advance of the application deadline.

INTERNATIONAL AGREEMENTS
The Hatfield School of Government is under a university-level memorandum of understanding with Khon Kaen University in Thailand and Cukurova University in Adana, Turkey. The Hatfield School maintains an active relationship with the College of Local Administration at Khon Kaen University (COLA) and the Department of International Relations at Cukurova University and welcomes HSOG graduate students as part of these partnerships. Graduate students seeking opportunities for coursework, research, and professional development in the context of developing areas and emerging Asia and Turkey are encouraged to contact the Director of the Hatfield School for more information.

PROGRAM RULES
A more comprehensive set of rules governing satisfactory completion of field area examinations, presentation of dissertation, and timely completion of doctoral program requirements appear in the General Handbook for the Public Affairs and Policy Doctoral Program issued to incoming students and available online.

Limitation on graduate/undergraduate courses
Students in the PAP program are strongly advised to use no more than 12 credits of courses offered simultaneously at the 400- and 500-level in support of their degree programs. These courses must be an integral part of the student’s program, and courses with the same content must not be available on a purely graduate basis.

Limitation on by-arrangement courses
Admitted Ph.D. students may utilize no more than 12 credits of Research and/or Reading and Conference credits (501/601 and 505/605). In cases where more than 12 credits are needed because of the lack of regularly scheduled classes, the student must submit a written request waiver to their adviser for approval.

Continuous enrollment and leave of absence
All students admitted to the Ph.D. program in public affairs and policy must be continuously enrolled until graduation, except for periods in which they are absent for an approved leave. Taking a minimum 3 credits per term during the regular academic year will constitute continuous enrollment. Failure to register without an approved leave may result in termination of a student’s admission. Students may have no more than six terms of approved leave.

Grade requirement
A student who receives more than 9 credits of C+ or below in all coursework attempted after admission to the Ph.D. program will be dropped from the program.

Performance in core courses
A grade of C+ or below received for work performed in a core course is not considered passing. A PAP doctoral student who receives a grade of C+ or below in one of the core course offerings during fall or winter terms may not proceed to take the core course offerings in the subsequent term until the course in which a failing grade was received has been repeated, and the failing grade is replaced with a passing grade of B- or better.

RESEARCH AND TEACHING OPPORTUNITIES
The doctoral degree in public affairs and policy offers a number of research and teaching opportunities.

Hatfield Residency Program
This program, conducted in cooperation with the Hatfield School’s Executive Leadership Institute, places qualified doctoral students in public and not-for-profit agencies as paid residents. Agency placements provide students opportunities to conduct dissertation research, gain advanced research experience, and receive assistance in financing their educational objectives.

Graduate research assistantships
Dependent on available funds, a number of graduate research assistantships are available each year. Students must apply for these by February 1 of the academic year in which the assistantships are desired. Assistantships pay tuition and a small additional stipend.
Teaching opportunities

All doctoral students in the program are strongly encouraged to teach prior to completing their Ph.D. programs. There are a number of opportunities available in this regard.

Teaching apprenticeships with a university faculty member

These duties can include teaching one or more class sessions, assistance in preparing courses, and correction of examinations.

Teaching in the University Studies Program

Advanced doctoral students may also teach in sophomore inquiry coursework sponsored by the Hatfield School of Government. This coursework deals largely with citizen participation and leadership. Advanced doctoral students may also propose and teach a senior Capstone course at the undergraduate level. These are interdisciplinary community-based courses required of all PSU seniors. These students will develop and implement strategies to deal with a community issue in cooperation with one or more community organizations.

Masters Programs

MASTER OF PUBLIC POLICY

The Master of Public Policy is an interdisciplinary professional program designed to prepare individuals to be public policy professionals in the public, non-profit, and private sectors. The degree is built upon the disciplinary foundations of public policy, public administration, political science, economics, and public affairs. The degree is jointly administered by the Departments of Public Administration and Political Science.

The curriculum focuses on acts of public policy, meaning the allocation of public values by authoritative institutions. The curriculum is designed to respond to the need for advanced training in public policy analysis and leadership/advocacy to succeed in today’s complex policy environments. The degree may be pursued on a full-time (2 years) or part-time basis. Graduates of MPP programs typically find employment in policy analysis and leadership/advocacy positions, especially in high-level public agencies, the private sector, and the non-profit sector.

DEGREE REQUIREMENTS

Courses and Credits

Cohort Course

Students take the following course as part of the incoming cohort each fall quarter:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PAP 511</td>
<td>Introduction to Public Policy</td>
<td>3</td>
</tr>
</tbody>
</table>

or

PA 533     Public Policy: Origins and Process     3

Policy Process and Leadership Core Courses

Students take the following four courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PAP 512</td>
<td>Introduction to Policy Advocacy</td>
<td>3</td>
</tr>

<tr>
<td>PAP 514</td>
<td>Institutional Dynamics of Public Policy</td>
<td>3</td>
</tr>
<tr>
<td>PA 579</td>
<td>Policy Tools in Policy Design</td>
<td>3</td>
</tr>
</tbody>
</table>

Policy Analysis Core Courses

Students take the following three courses and a 4-credit data analysis course of their own choosing:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PAP 653</td>
<td>Policy Analysis</td>
<td>3</td>
</tr>
<tr>
<td>PAP 513</td>
<td>Ethics and Public Policy</td>
<td>4</td>
</tr>
<tr>
<td>PAP 654</td>
<td>Policy Analysis Research</td>
<td>3</td>
</tr>
<tr>
<td>PA 554</td>
<td>Policy Analysis Research</td>
<td>3</td>
</tr>
</tbody>
</table>

Track Courses

Students choose one of the following two tracks as part of their course specialization work:

1. Policy Leadership/Advocacy Track: Students take 12 credits of courses relating to policy leadership and advocacy, including policy process, communication, legal reasoning, network-building, policy arguments, problem solving, political feasibility, advocacy, and management.

2. Policy Analysis Track: Students take 12 credits of courses relating to policy analysis including research design and methods, cost-benefit analysis, forecasting, program evaluation, impact assessment, decision-making, systems modelling, and other subjects.

Specializations

Students identify a policy issue-area or sector and take 12 credits of courses relating to that sector in order to develop policy-domain specific knowledge as well as professional networking and experiential application opportunities.

Professional Development Plan

Students work with their faculty advisor to prepare a career-oriented plan that outlines a pathway to professional development for the student based on a set of career goals and links that plan to their MPP course of study. The plan is intended to provide an opportunity for students to build individual networks, establish job search plans, and prepare a professional portfolio. The plan is the basis of an exit interview with MPP faculty and Professional Advisory Board members.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PAP 508</td>
<td>Professional Development Plan</td>
<td>1-3</td>
</tr>
</tbody>
</table>
Summative Policy Project

Students work with a single faculty member to complete a summative project, which can take one of several forms depending on the needs and interests of the student. In all cases, the project is intended as an integrative experience in which the student links their MPP work to their professional goals. The summative project could be, for instance: (1) a research-oriented report that tackles a question of policy analysis or public policy theory; or (2) a client report prepared upon completion of a short internship.

PAP 509  Public Policy Project  1-3

Prerequisites

All students entering the Master of Public Policy program must have completed a basic course in calculus and an introductory course in statistics. Students whose undergraduate degree is not in a related discipline may be asked also to complete an introductory course in public policy, public administration, or political science.

Credit requirements

The Master of Public Policy program requires 60 credit hours of required, elective, and professional development coursework.

The credits are distributed as follows:

<table>
<thead>
<tr>

Subtotal: 60

PROGRAM RULES

A more comprehensive set of rules governing satisfactory performance in the MPP can be found in the Handbook for the Master of Public Policy Program issued to incoming students and available online.

Limitation on graduate/undergraduate courses

Students in the MPP program are strongly advised to use no more than 12 credits of courses offered simultaneously at the 400- and 500-level in support of their degree programs. These courses must be an integral part of the student’s program, and courses with the same content must not be available on a purely graduate basis.

Limitation on by-arrangement courses

Admitted Ph.D. students may utilize no more than 12 credits of Research and/or Reading and Conference credits (501/601 and 505/605). In cases where more than 12 credits are needed because of the lack of regularly scheduled classes, the student must submit a written request waiver to their adviser for approval.

Continuous enrollment and leave of absence

All students admitted to the MPP program must be continuously enrolled until graduation, except for periods in which they are absent for an approved leave. Taking a minimum of 3 credits per term during the regular academic year will constitute continuous enrollment. Failure to register without an approved leave may result in termination of a student’s admission. Students may have no more than six terms of approved leave.

PROFESSIONAL DEVELOPMENT OPPORTUNITIES

The MPP program offers a number of professional development opportunities outside of the curricular requirements of the program.

Professional Advisory Board

The MPP Professional Advisory Board is composed of policy professionals from the government, non-profit, and private sectors. They serve as invited members with a role of serving as an ongoing line of communication between the program and those in service. The PAB helps MPP students to shape their professional goals, to identify networking opportunities, to find summative project clients and experiences, and to maintain constant contact with the shifting demands of public policy education. Students will have both formal and informal opportunities to work with PAB members.

Policy Competitions

Participation in national and international policy competitions is a common aspect of professional education in public policy. Each year, MPP students, under the direction of an MPP faculty member, will be able to participate in policy competitions.

Oregon Public Policy Research Network

Through the Center for Public Service, the Hatfield School of Government is a founding member of the Oregon Public Policy Research Network. The Center and the Network engage in contract-based public policy research. Advanced MPP students will have the opportunity to work with the CPS to expand its public policy research.

ADMISSION REQUIREMENTS

The MPP program admits students once a year starting in the Fall Term. Only one application is required in order to apply to the Master of Public Policy program. Faculty begin reviewing applications on January 31 and continue through early July, although applicants are encouraged to apply early in the application cycle.

The following materials should be submitted through the application link found on the Graduate School’s website.
• Non-refundable $65 application fee (no cash)
• One transcript from each post-secondary institution attended (both sides need to be uploaded)
• Statement of Financial Support and Declaration of Finances (if International)
• Official TOEFL scores if the applicant does not speak English as a native language and has not received a graduate or undergraduate degree in an English-speaking territory
• A 500 word statement of intent. The statement should address the following: 1) Professional goals; 2) Planned area of study (policy specialization); 3) Desired employment sector; 4) How the degree furthers achievement of your professional goals
• Three recommendation letters from individuals familiar with the applicant's academic and/or professional capabilities. Preferably, two of the three letters should be from former instructors or from individuals with knowledge of your professional performance and potential.
• A current resume
• The scores of the Graduate Record Examination (GRE). Please note that you should make arrangements to take the GRE well in advance of the application deadline.

Projects currently underway, or recently completed by faculty associated with the institute, include:
• National Evaluation of Safe Start Promising Approaches,
• Project Safe Neighborhoods Gun Violence Reduction,
• Portland and Gresham Weed & Seed Efforts,
• Evaluation of Oregon Law Enforcement Traffic Stops,
• Public Perceptions of Oregon Law Enforcement,
• Risk Assessment in Portland Police Bureau’s Domestic Violence Reduction Unit,
• Tactical Ethics – Perspectives on Profiling Training, and the Oregon Law Enforcement Contacts Policy & Data Review Committee
• Portland Police Bureau Neighborhood Involvement Locations (NI-Loc) Project.

Center for Public Service
570 Urban Center
503-725-8261
www.pdx.edu/cps

The Center for Public Service draws on the extensive expertise of faculty and students within the Public Administration, Political Science, and Criminology and Criminal Justice departments of PSU’s Mark O. Hatfield School of Government, with a broad mandate to connect PSU’s research capabilities and public service mission with real-world challenges in the public and nonprofit sectors. As part of its effort to forge productive and sustainable relationships with leaders at the local, state, federal, and international levels, the Center offers a wide range of leadership training and applied research capabilities. Located within CPS are the Nonprofit Institute (NPI) and the Institute for Tribal Government (ITG), along with a number of discrete programs such as First Stop Portland (FSP), the Executive Seminar Program (ESP), and the Initiative for Community and Disaster Resilience (ICDR).

In the specific area of leadership development, CPS offers a wide range of education, specialized training, and research programs that serve elected officials and public and nonprofit sector leaders throughout the Oregon/SW Washington area, as well as in international venues such as Vietnam, Japan, China, Korea and Thailand. These offerings include an Executive MPA degree for experienced practitioners; custom-designed leadership development programs; and applied research and technical assistance across a wide range of fields including diversity and inclusion, change management, and organizational performance.

Nonprofit Institute
570 Urban Center
503-725-8261
The Nonprofit Institute (NPI) operates out of the Center for Public Service in the Mark O. Hatfield School of Government. Its mission is to support the Oregon nonprofit sector so that it can fulfill its promise to bring people together to build a more just, inclusive and sustainable society. To support this mission, NPI:

- Builds the sector’s capacity to organize, learn and lead;
- Strengthens and grows its networks;
- Tells the sector’s story and articulates its promise;
- Advances vanguard issues collectively and across sectors.

These goals are accomplished through a set of integrated strategies:

- Conducts primary research and collates scholarship generated by others to create a knowledge-bank that can be used to advance the organizational design, governance, and practice of nonprofit organizations. Emphasis is placed on applied research that generates knowledge of immediate relevance to address the needs and missions of nonprofits.
- Strengthens the capacity of nonprofit organizations in Oregon to engage in culturally appropriate evidence-based evaluation and assessment practices to enhance organizational performance and increase impact.
- Advances professional development for members of nonprofit and community-based organizations.
- Offers high quality academic programs and learning opportunities that address a changing nonprofit landscape and shift in focus to community-building for both today’s leaders and the next generation leaders in the nonprofit sector.
- Facilitates discussions and collaborations that build networks and bring people together to share knowledge, reflect on practice, and generate new ideas to engender greater collective impact. We believe that these goals strengthen civic life and participation, and collectively impact the pressing issues of society.

Institute for Tribal Government
570-T Urban Center
503-725-9000
http://www.pdx.edu/tribal-gov/

The Institute for Tribal Government, housed within the Center for Public Service, is a national leader in its field, providing elected tribal leaders with the information and leadership skills to work with tribal, state, local, and federal governments within a wide range of related policy issues. Tribal leaders are offered programs to meet their own unique needs either with sessions at the Hatfield School or at tribal sites. Programs are available for addressing federal Indian law, tribal government duties and responsibilities, tribal and state relations, the federal legislative process, federal judicial and administrative procedures, and effective tribal leadership strategies.

Certificate in Tribal Relations (CTR) Program:
In addition to organization-specific training, the Institute also offers a 10-month Certificate in Tribal Relations program. The cohort runs October-August and applications are due September 15th. This program is designed for mid-career professionals employed by local, state, federal, and regional government agencies, nonprofit and for-profit organizations, and trade associations who work regularly with tribal nations and native communities, members of a tribal government, and other native communities interested in collaborative governance. Cohort members attend three out-of-class learning experiences such as trips to Washington, DC, Salem, OR, and tribal communities in order to better understand tribal policy making at multiple levels of governance.

Center for Turkish Studies
570-L Urban Center
503-725-8309
www.pdx.edu/turkish_studies_center/

The Center for Turkish Studies (CTS) is located in the Mark O. Hatfield School of Government in the College of Urban and Public Affairs. The Center’s faculty covers diverse academic disciplines and comes from departments across Portland State University and other universities in the US, Europe, Turkey, and North Cyprus. Our mission is to foster collaboration between PSU and universities in Turkey, engage in academic research in social sciences and its application to policy making, organize conferences, panel discussions and cultural activities for academic and public engagement. We are committed to providing decision-makers, academics, and general public with innovative and objective analyses in key policy issues pertaining to Turkey-US and EU-Turkey relations. The CTS has expertise in a wide range of areas, including, but not limited to, Turkey-EU-U.S. relations, conducting the World Values Survey in Cyprus and current developments in Turkey. In these venues, the Center for Turkish Studies enriches Portland State University’s scholarly works and contributes to Portland State University’s internationalization initiative.

National Policy Consensus Center
720 Urban Center
503-725-9077
www.pdx.edu/npcc
The National Policy Consensus Center advances the use of innovative collaborative governance methods in Oregon and nationally by providing collaboration services, university courses, professional training, and research. We help people work together collaboratively to develop public policy and implement community-based solutions. NPCC provides the following services:

**Collaboration and Community Engagement Services:**
We help government, nonprofits, the private sector, and communities collaborate to:

- Resolve public disputes
- Seek agreement on new public policies
- Implement community solutions collaboratively to improve local economies and quality of life
- Increase public participation that has a collective impact on public issues

**Education and Professional Training:** We offer academic programs and customized professional training to prepare students and professionals to:

- Use consensus-seeking to resolve policy disputes
- Apply collaborative approaches in their current professions
- Work in the fields of conflict resolution and public engagement

**Applied Research and Development:** We have several state and national programs that work on the ground to:

- Pilot special projects to test innovative practices in collaborative governance and public engagement
- Work with other states to advance the use of collaborative governance approaches nationwide
- Publish collaboration resource materials

---

**Nohad A. Toulan School of Urban Studies and Planning**

350 Urban Center

- M.U.R.P. – Master of Urban and Regional Planning  
- M.U.S. – Master of Urban Studies  
- Ph.D. – Urban Studies, Urban Studies: Regional Science

The Toulan School of Urban Studies and Planning provides an interdisciplinary approach to understanding urban places. The school’s programs are structured to allow students living or working in the Portland metropolitan area to take advantage of the broad range of resources available at Portland State University and in the community.

Undergraduates can major in community development or complement their bachelor’s degree in another field by concurrently meeting the curricular requirements for a minor in community development, real estate development or sustainable urban development. Students interested in developing professional planning skills may pursue a
Master of Urban and Regional Planning. The M.U.R.P. degree is fully accredited by the Planning Accreditation Board. Interest in developing urban research capabilities may be pursued through a Master of Urban Studies. Individuals desiring higher levels of research skills and/or academic employment may choose the Ph.D. in urban studies.

**Undergraduate programs**

The Toulan School of Urban Studies and Planning offers distinctive opportunities to study community issues with a diverse faculty and student body in a nationally renowned planning school. Our programs are grounded in the theory and values of community development: the process of collective mobilization for social, economic, and racial justice—often at the neighborhood level. Graduates of our programs are knowledgeable about housing, community organizing, transportation, economic development, and environmental issues. The programs provide excellent preparation for working in non-profit organizations, consulting firms, and public agencies. Common graduate school pathways include urban planning, public policy, public administration, public health, social work, and social sciences.

The front desk of the School of Urban Studies and Planning can be reached at askUSP@pdx.edu.

**DEGREE MAPS AND LEARNING OUTCOMES**

To view the degree maps and student learning outcomes for School of Urban Studies and Planning's undergraduate degree programs, go to www.pdx.edu/academic-programs/a-z.

**ADMISSION REQUIREMENTS**

Admission to the undergraduate programs in the School of Urban Studies and Planning is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

**COMMUNITY DEVELOPMENT B.A./B.S.**

The Community Development major is one of just 16 such programs nationwide, and the only one of these whose campus is located in a city’s Central Business District. According to the International Association for Community Development, CD is a “practice-based profession and an academic discipline that promotes participative democracy, sustainable development, rights, economic opportunity, equality and social justice, through the organization, education and empowerment of people within their communities, whether these be of locality, identity or interest, in urban and rural settings.” PSU’s curriculum is grounded in applied social science and incorporates a great deal of community-based learning.

The program takes advantage of the wealth of resources available in the Portland metropolitan area and draws from a variety of academic disciplines.

We aim to equip our students as community activists, applying their analytical and interpersonal skills to catalyze transformative social change. Our alumni are found in community-based organizations, think tanks, City of Portland, Portland Housing Bureau, Metro (regional government), state and local transportation agencies, and community-oriented financial institutions, and beyond. For more information about careers, see the Career Center’s “What can I do with a degree in Community Development?” at https://www.pdx.edu/careers/what-can-i-do-degree-community-development.

To reach the CD major coordinator, contact CDmajor@pdx.edu.

**DEGREE REQUIREMENTS**

In addition to the general university degree requirements, students in the Community Development major must complete 58 credits of coursework comprising 46 credits of required courses and 12 credits of electives.

Some of these courses have prerequisites and some are only offered once a year, so students should plan their program carefully in collaboration with their academic advisor. In particular, the field experience requires independent advance planning.

Substitution of coursework is acceptable only by permission from the CD major coordinator; consult with your academic advisor before pursuing a course substitution.

**MAJOR REQUIREMENTS**

**Core courses (12 credits)**

The core introduces students to the social, political, cultural, and economic aspects of urban life as well as the practice of community development.

<table>
<thead>
<tr>

<td>4</td>
</tr>
<tr>
<td>USP 316</td>
<td>Community Organizing and Social Change</td>
<td>4</td>
</tr>
</tbody>
</table>
Methods (16 credits)
Methods courses teach practical skills for doing community development work in the real world. They address technical skills—such as mapping and data analysis, interpersonal skills, and ethical community practice.

- USP 350U Inclusive Engagement 4
- USP 430 Participatory Research Methods for Community Development 4
- USP 440 Measuring People and Communities in the Urban Context 4
- USP 452 GIS for Community Development 4

Field Experience (6 credits)
An essential part of the major is pursuing personal interests and gaining experience in the practice of community development. Students identify a professional development opportunity—generally in partnership with community organization—where they can apply the skills they have learned in the major by participating in community capacity-building efforts. This experience should be completed near the end of a student’s academic program and the placement must be approved in advance.

While completing 120+ hours of “field” work, students enroll in USP 460 Community Development Field Seminar. This course serves as a community of practice for emerging CD professionals. The seminar is a variable-credit course because students may complete their field experience in one term (6 credits of seminar) or spread it across multiple consecutive terms in one academic year (for example, take the seminar for two credits in fall, winter, and spring).

See the field experience resource site for more information about the process: https://sites.google.com/pdx.edu/cdfieldexperience/home. USP 460 Community Development Field Seminar 2-6

Electives (12 credits)
Students must take 12 credits of electives, with at least 8 of these credits from courses in the School of Urban Studies and Planning (USP prefix).

Any regularly offered USP course that is 300-level or higher can be used as an elective. Using by-arrangement and additional field experience credits would need to be approved in advance by the CD major coordinator; consult with your academic advisor.

The department also maintains a list of courses from around the university that can be used as electives. Consult with your academic advisor or the CD major coordinator about this list, or if you are interested in another non-USP course that aligns with the major’s student learning outcomes. The CD program encourages students to participate in study abroad and other intercultural experiences.

Advising
The academic advisors in the Urban, Public, and Global Affairs Pathway work with CD majors and students in other programs in the College of Urban and Public Affairs to plan their overall academic program; students should meet with their advisor regularly to make sure they understand all their degree requirements. Students who have already completed coursework in the major before Fall 2013 should be aware that the curriculum has changed. The academic advisor and CD major coordinator and the academic advisor can assist with aligning the old and new courses.

The CD major coordinator oversees the CD major and has expertise in community development and related fields, including the course offerings within the School of Urban Studies and Planning (USP); contact the coordinator at CDmajor@pdx.edu. Building relationships with the major coordinator and other USP faculty members is a valuable way to get advising and mentoring in the areas of community development, urban planning, and allied fields from nationally recognized experts. Attending USP events and introducing yourself to faculty members during office hours are great ways to get started.

COMMUNITY DEVELOPMENT MINOR

REQUIREMENTS

The minor in community development included 27 credits of coursework. Courses taken under the undifferentiated grading option (Pass/No Pass) cannot be used to fulfill CD minor requirements. All courses used to satisfy the minor requirements (and minor or certificate requirements), whether taken in the department or elsewhere, must be graded C or above.

To reach the CD major coordinator, contact CDmajor@pdx.edu.

Required Courses
- USP 300U Introduction to Urban Studies 4
- USP 301U Introduction to Community Development 4
- USP 302 Theory and Philosophy of Community Development 4
A minimum of 15 credits of additional USP coursework must be taken. Using a study abroad experience to meet some of these electives requirement may be possible; consult with an Ed Abroad advisor, the CD major coordinator, or your academic advisor.

REAL ESTATE DEVELOPMENT MINOR

The development and management of real estate is a vital component of the urban economy. The Real Estate Development minor (RE) will provide education to students wanting to enter the industry. Minors develop skills to evaluate real estate development proposals and understand how real estate development fits into regional planning and economic processes. To reach the RE minor coordinator, contact REminor@pdx.edu.

REQUIREMENTS

The Real Estate Development minor includes 19 credits of required courses and 6 credits of electives. All courses used to satisfy the minor requirements (and minor or certificate requirements), whether taken in the department or elsewhere, must be graded C- or above. The GPA for courses used to fulfill the minor requirements must be 3.0 or higher. Courses taken under the undifferentiated grading option (pass/no pass) will not be accepted toward fulfilling minor requirements.

Total Credit Hours: 25

SUSTAINABLE URBAN DEVELOPMENT MINOR

As population worldwide becomes concentrated in cities and metropolitan regions, it has become imperative that urban development occur in a sustainable and resilient manner. The minor in Sustainable Urban Development will provide students with an opportunity to further their understanding of what it will take to make cities sustainable. Students who complete the minor will understand environmental, economic, and social sustainability as they relate to issues and challenges of making places sustainable. To reach the SUD minor coordinator, contact SUDminor@pdx.edu.

REQUIREMENTS

The minor requires a total of 24-27 credits. The GPA for courses used to fulfill the minor requirements must be 2.0 or higher. Courses taken under the undifferentiated grading option (Pass/No Pass) will not be accepted toward fulfilling minor requirements.

An essay of intent, two recommendations, a resume, a standardized GRE or GMAT exam. MRED students are admitted for fall term only, with three application deadlines: November 1 (early admission), February 1 (scholarship eligibility), and April 1 (priority admission). Admission is handled jointly between the School of Urban Studies and Planning and the School of Business Administration. Applicants should consult: www.pdx.edu/business/grad-mred-apply.

**Master of Urban and Regional Planning**

A personal essay and three recommendations, on the forms provided, are required from individuals familiar with the student's academic or professional background. Graduate Record Examination scores are not required, but highly recommended. For the M.U.R.P. program, students are admitted for the fall term only. The deadline for fall term applications for the M.U.R.P. program is January 15.

**Master of Urban Studies**

A letter of intent and three recommendations, on the forms provided, are required from individuals familiar with the student's academic or professional background. Graduate Record Examination scores are required. For the M.U.S. program, students are admitted fall, and winter terms. The deadline for fall term applications for the M.U.S. program is January 15.

**Doctor of Philosophy in Urban Studies**

A personal essay and three recommendations, on the forms provided, are required from individuals familiar with the student's academic or professional background. Graduate Record Examination scores are required. Ph.D. applicants are strongly urged to complete successfully an introductory statistics course before entering the program. Instructions for the doctoral applicant's personal essay can be found on the School website. For the doctoral program, students are admitted fall term only. The deadline for fall term applications for the Ph.D. program is January 15.

**MASTER OF REAL ESTATE DEVELOPMENT (M.R.E.D.)**

The Master of Real Estate Development (MRED) is a professional degree, training students in the areas of real estate development within the context provided by principles of sustainability, social equity, and community-based development. By its nature, real estate education is multi-disciplinary, involving finance, urban planning, architecture, law, engineering, design, appraisal, and other disciplines. To deliver this education, the MRED degree is a joint degree of the School of Business Administration and the Toulan School of Urban Studies and Planning.

The objective for this program is to provide a unique and exceptional graduate degree that will enable students to assist in the development and management of property...
with an understanding of the role that such development plays in the context of broader community concerns and history, and in the context of the surrounding neighborhood and city. Students will work closely with high-level industry professionals in their classes and workshops.

The MRED degree is designed to accommodate students with a wide variety of undergraduate degrees and is best suited for students who have gained at least two years of industry experience prior to their admission date. The program is designed to be completed in two years on a part-time basis or one year on a full-time basis. Full-time students are admitted for fall term only. Students will develop their skills in three areas: sustainable urban development, finance and policy, and project development, leading to the Real Estate Development Workshop culminating experience. The degree requirements (p. 126) are listed in the School of Business Administration.

MASTER OF URBAN STUDIES (M.U.S.)

The Master of Urban Studies provides training for students seeking employment in public and private urban research organizations.

The M.U.S. degree requires a total of 52 credits. M.U.S. students pursue a common core of courses dealing with the analysis of urban phenomena (21 credits). Each student also defines a field area which is pursued through coursework (25 credits) and individual research leading to a thesis (6 credits). In addition, the degree provides for a specialized option in social and policy research.

CORE-AREA REQUIREMENTS

The urban core-area requirements for the M.U.S. degree include the following courses:

Courses

FIELD-AREA REQUIREMENTS

The student selects a pattern of coursework that equips him or her for research in areas of applied interest. Field areas may focus on urban aspects of social science theory in one of the fields emphasized in the urban studies Ph.D. program or on a substantive issue of particular concern to the student. Relevant courses are available within the School of Urban Studies and Planning and in many other departments within the University. Twenty-five credits of field-area coursework are required.

RESEARCH REQUIREMENTS

The M.U.S. degree requires registration for 6 credits of USP 503 Thesis and completion of a formal thesis.

MASTER OF URBAN AND REGIONAL PLANNING (M.U.R.P.)

The Master of Urban and Regional Planning program prepares students for careers that help communities to become more equitable, prosperous, sustainable and resilient. Graduates of the program acquire skills suited for them for employment in public agencies, private firms and non-profit organizations involved in planning and urban development processes at a variety of scales. Beyond the core curriculum, the program offers students opportunities to customize their education by designing a pathway, with their 29 elective credits, to reflect their academic and professional interests within planning, in areas such as: transportation, land use, community development, food systems, environment, or economic development. This degree is fully accredited by the Planning Accreditation Board.

PLANNING WORKSHOP

Planning Workshop is the culminating experience of the MURP program, and required for all students. Students work in teams with clients from around the region on
projects that those clients have proposed, and complete all facets of the plan-making process: scoping, research and analysis, community and stakeholder engagement, and plan development. Workshop projects are often implemented by clients to the benefit of their communities.

FIELD PAPER/PROJECT

Students may choose to prepare an original research paper or project in their field of specialization. The research paper or project is meant to demonstrate a student’s ability to integrate and apply material from his or her coursework and is designed in consultation with faculty.

INTERNSHIP REQUIREMENT

MURP students are required to complete 400 hours of planning-related internships during their time in the program. Students with significant professional experience in planning or planning-related fields may obtain a waiver from this requirement, but are nonetheless required to complete USP 559 Internship Seminar.

URBAN STUDIES PH.D.

Dynamic metropolitan regions are increasingly seen as central to economic, social, and political development throughout the world. Composed of one or more central cities, suburbs, and adjacent agricultural and natural areas, they are the essential building blocks of the global economy and the sources of social and political innovation. Understanding metropolitan regions and their problems and analyzing policies to shape their evolution are major concerns of the Urban Studies doctoral program. The program explores these issues from multi-disciplinary and interdisciplinary points of view. Through participation in classes and seminars and supervised research and teaching activities, Ph.D. students prepare for careers in institutions of higher education and in research organizations.

CORE REQUIREMENTS

Entering students in the Ph.D. in urban studies take the following common courses:

Courses
USP 613 Urban Economic and Spatial Structure 3
USP 614 History and Theory of Urban Studies 3
USP 617 The Sociology and Politics of Urban Life 3
USP 630 Research Design 4
USP 634 Data Analysis I 4
USP 683 Qualitative Analysis 4
USP 697 Research Design 2 4

The first six are normally taken in the first year, with USP 697 taken at the beginning of the second year. Students in

USP 697 produce a fully developed research paper as a requirement for continuation in the program.

FIELD AREA REQUIREMENTS

Doctoral specializations are available in the following areas of advanced interdisciplinary study: planning, community development, policy analysis, gerontology, social demography, economic development, environment and transportation.

Planning

focuses on the development and implementation of mechanisms for organizing social, economic, political, and environmental change at the local, state, and regional levels. The field includes study of the relationships and interactions among public and private institutions, organizations, citizens, and landscapes; the design of processes for facilitating dialogue among public actors; and the tools for planning analysis and evaluation. As a pioneer in state land use law and a place in which planning discourse is highly visible, Oregon provides a rare vantage point for the study of planning history, planning processes and strategies, and professional practice.

Environment

focuses on urban socio-ecological conditions and interactions in areas such as natural resource management, environmental protection and quality, ecosystem services, food systems, and energy and climate. This includes a foundation in theory and methods that enable: examination of the roles of institutions (both government and non-government), groups and individuals, law and regulation, ethics and values, the market (or lack of a market); the handling of usable knowledge and scientific uncertainty; and the analysis of change in complex socio-technical-biophysical systems.

Community development

deals with the dynamics of neighborhood and community formation and change and with public policies that address the needs of groups and places within contemporary society. The rich civic culture of Portland and the Pacific Northwest and the region’s connections to the Pacific Rim provide numerous examples for study and analysis. Within the broad field of community development, students can address such topics as ethnic and neighborhood history, housing and economic development, the roles of public and nonprofit institutions in community building, mediation and conflict resolution, changing patterns and systems of communication, and the changing meanings of place.

Social demography

provides training in the tools of demographic analysis, with particular attention to the methods of data collection, techniques of demographic analysis, and the interpretation of research findings. Social demography involves the use
of the principles and methods of demography in decision-making and planning problems in both public and private settings. Graduates in the field of social demography use demographic data to identify and analyze important population trends and their consequences for work in government agencies, research organizations, and corporations. Faculty in the area of social demography have training in demography, sociology, geography, and statistics. Faculty research includes population distribution and migration, international migration, fertility and family planning, marriage and divorce, public policy uses of demographic data and estimates, and demographic methods.

**Gerontology**

addresses the social issues, problems, policies, and programs that affect the quality of life for our rapidly aging population. Students have the opportunity to work directly with faculty on publicly- and privately-funded research at the College’s highly regarded Institute on Aging. Adult development and aging is approached from a multidisciplinary and collaborative perspective. Faculty research interests include: family caregiving and work-family balance, social networks and widowhood, diversity in aging, long-term care policy and programs, housing environments, development and evaluation of training for health professionals, and planning for the aging of the baby-boom generation and beyond. As a state with a national reputation as a leader in the development of community-based, long-term care, Oregon provides a unique environment for the study of aging processes, policies, and services.

**Economic development**

is concerned with the factors that lead to differential rates of economic development at various spatial scales: within and between nations, states, regions, cities, and neighborhoods. In analyzing these differences, issues such as the meaning of economic development, who gains and who loses from various changes, as well as analysis of policies to promote economic development, are addressed. The Center for Urban Studies and Institute for Portland Metropolitan Studies offer research opportunities in this field.

**Transportation**

includes planning, policy, forecasting, measurement, and evaluation of multimodal transportation infrastructure and systems. The multidisciplinary field covers all modes of passenger and freight transport and includes the holistic study of relationships and interactions of the transportation systems with land use, the region, the economy, the environment, institutions, the community, and people. Students can address topics such as impacts of transportation on land use and land values, the relationships between urban form and travel behavior, the costs and benefits of transport facilities, the operation of transportation facilities, equity impacts of transport and the effects of transportation plans and policies. There are opportunities to work on research through the Center for Urban Studies and the Center for Transportation Studies.

Each student pursues two fields of specialization, at least one of which should be chosen from among those listed above. A student-nominated field, developed in conjunction with School faculty, may be offered as a second specialization. Faculty groups specify field-specific course requirements, including methodology courses and courses essential to a multidisciplinary approach. These groups work closely with students to develop coherent specializations that prepare each individual to do doctoral-level research in that field.

**URBAN STUDIES—REGIONAL SCIENCE PH.D.**

Regional science brings a variety of social science perspectives to bear in analyzing the growth and development of metropolitan areas, states, and regions. The regional science program shares the same core requirements as the Urban Studies Ph.D. Beyond these, students in regional science design a program of study around two field areas.

The only required course in the second field is USP 691 Current Research in Regional Science. Subject to prior faculty group approval, students may organize second field areas around a topic other than the four identified above. It is recommended that the second field include additional methods courses that support the field’s topical focus. For example, in the transportation field area the supporting methods courses might include coverage of demand modeling, cost-benefit analysis, GIS, and spatial analysis.

Students in the regional science program must pass a comprehensive examination in their two field areas. This is a single examination, developed in consultation with two members of the regional science faculty group.

**PROGRAM RULES**

**Advanced standing in Urban Studies and Planning graduate program**

A total of 72 credits in nondissertation graduate training is required of all Ph.D. students. Ph.D. students are also required to take a minimum of 27 dissertation credits. For students with a master’s degree in a related discipline, a maximum of 24 advanced standing credits may be requested. All such requests must be accompanied by a listing of previous graduate work for which advanced standing is sought.

The Master of Urban Studies program requires a minimum of 52 credits in graduate courses, of which at least 36 must be taken at Portland State University. A maximum of 17 credits of advanced standing credit may be requested. The
Master of Urban and Regional Planning program requires a minimum of 72 credits in graduate courses of which at least 48 must be taken at Portland State University. A maximum of 24 credits of advanced standing credit may be requested.

A M.U.R.P. student may request advanced standing for the 1-credit USP 559 Planning Practice Workshop. If advanced standing credit is approved, the student is considered to have fulfilled the internship requirement. Such advanced standing credit will be included in the 24-credit maximum for all advanced standing; only professional work completed within seven years of the date the degree is granted can be included.

Requirements with regard to both the pattern of coursework and total credits must be satisfied prior to either advancement to candidacy in the Ph.D. program or graduation in the M.U.S. and M.U.R.P. programs. A student is not obligated to enroll in a required course if that student has already acquired knowledge of the subject matter through earlier graduate coursework. In such cases, the student may request exemption from the course. Permission is granted only after obtaining written verification from the instructor that the student has met the requirements of the required course. All such requests should be made within one year after entrance to the program.

Limitation on graduate/undergraduate courses

Students in the M.U.R.P., M.U.S., and Ph.D. programs are strongly advised to use no more than 12 credits of courses offered simultaneously at the 400- and 500-level in support of their degree programs. Courses must be an integral part of the student’s program and courses with the same content must not be available on a purely graduate basis.

Limitation on by-arrangement courses

Admitted Ph.D. and master’s students may utilize no more than 12 credits of by-arrangement classes (501/601 and 505/605). In cases where more than 12 credits are needed because of the lack of regularly scheduled classes, a waiver must be submitted for approval by the school Curriculum Committee and by the school director.

Continuous enrollment

All students admitted to the M.U.R.P., M.U.S., and Ph.D. programs in urban studies must be continuously enrolled until graduation, except for periods in which they are absent by approved leave. Taking 1 credit per term during the regular academic year will constitute continuous enrollment. Failure to register without an approved leave may result in termination of student admission.

Grade requirement

A student who receives 9 credits of grades below B- in all coursework attempted after admission to an urban studies graduate degree program will be dropped from that program. A student attempting both a master’s and a Ph.D. degree in urban studies may receive no more than 9 credits below B- in both programs. MURP students must receive grades of at least B- in all core courses.

Graduate Certificates

Graduate certificates in applied social demography, energy policy and management, real estate development, transportation, and urban design are offered by the Toulan School of Urban Studies and Planning. Admission to these programs require an undergraduate degree at an accredited university and a GPA that meets university graduate admission requirements.

**GERONTOLOGY GRADUATE CERTIFICATE**

The Graduate Certificate in Gerontology provides multidisciplinary specialized training for postbaccalaureate and graduate students interested in acquiring or upgrading skills appropriate to working with or on behalf of older adults in a variety of settings. Students need not be enrolled in a degree program to receive the Graduate Certificate in Gerontology.

Website: www.pdx.edu/ioa/graduate-certificate-in-gerontology

The certificate program consists of a six-course format (18 credits minimum) made up of a three-course...
multidisciplinary core, two elective courses, and an internship or independent research project. The coursework will provide students with a general multidisciplinary overview of the field of aging, while the internship or independent project will allow a student to acquire experiential learning in a community-based aging services organization.

**COURSE REQUIREMENTS FOR THE GRADUATE CERTIFICATE PROGRAM:**

<table>
<thead>
<tr>
<th>Three required classes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Age 556</td>
</tr>
<tr>
<td>Age 558</td>
</tr>
<tr>
<td>Psy 562</td>
</tr>
<tr>
<td>Soc 569</td>
</tr>
</tbody>
</table>

For MSW students the three (3) required courses are:

| Age 558 | Perspectives on Aging | 3 |
| SW 544 | Mid-Life and Beyond | 3 |
| SW 574 | Social Work with Older Adults | 3 |

**Internship Requirements**

In addition, students are expected to undertake either an internship in an aging-services program or an independent research project; this typically takes place during the last term of certificate work.

| Age 501 | Research | 1-3 |
| Age 504 | Cooperative Education/Internship | 1-3 |

**Electives**

Two electives are required for ALL students from the following, or other aging-specific courses, as available.

A good rule of thumb in determining if a course is aging-specific, is if aging, elderly, life course or older adult are in the title.

| Age 516 | Families and Aging | 4 |
| Age 523 | Business and Aging | 4 |
| Age 557 | National Long-term Care Policy | 3 |
| Age 556 | Health Aspects of Aging | 4 |
| Age 559 | Economics of Aging | 3 |
| Age 560 | Mental Health and Aging | 3 |
| PHE 561 | Cultural Variations in Aging | 3 |
| Age 562 | Global Aging | 3 |
| Age 563 | Service Learning in Nicaragua: Enhancing Communities for an Aging Society | 3 |
| Soc 566 | Sociology of Dying and Death | 4 |
| SW 544 | Mid-Life and Beyond | 3 |
| SW 569 | Social Work in End-of-Life and Palliative Care | 3 |
| SW 574 | Social Work with Older Adults | 3 |

| USP 564 | Political and Administrative Issues in Aging | 3 |
| USP 585 | Housing Environments for Older Adults | 3 |

Note: Age 556 is an elective option for MSW students only.

There may be other approved classes – they will be listed on the web each quarter at www.pdx.edu/ioa/class-schedule

Students may select only one 510 course per certificate program. 510 courses may be used only as electives.

**Total Credit Hours: 18**

Graduate students in other programs, such as Urban Studies, Urban & Regional Planning, Public Administration: Health Administration, and Public Policy, can also specialize in gerontology with the right plan and academic advising.

### REAL ESTATE DEVELOPMENT GRADUATE CERTIFICATE

Dramatic changes in the real estate industry over the past decade require an advanced set of interdisciplinary skills for commercial and residential real estate practitioners in the private, public, and non-profit sectors. The Graduate Certificate in Real Estate Development has been designed to build the technical and analytical knowledge of those who wish to enter the industry or to further develop the skills of industry professionals.

Courses within the Certificate program are taught by faculty from the Toulan School of Urban Studies and Planning, and The School of Business. Classes combine theoretical, empirical, and case studies methods, and involve assistance from Portland metropolitan area real estate industry professionals. All required classes are taught during evening hours to accommodate the needs of working professionals, as well as full-time students.

The Graduate Certificate in Real Estate Development is a 24-credit program, 15 of which are Core Courses and 9 of which are Electives.

**CORE COURSES**

| RE 521 | Real Estate Finance I | 4 |
| USP 523 | Real Estate Development I | 4 |
| USP 546 | Real Estate Development II | 3 |
| USP 612 | Community, Planning, and Ethics | 4 |

Subtotal: 15

*Students co-enrolled in the Master of Urban and Regional Planning (MURP) program may substitute USP 540*

## Research Centers and Institutes

### Center for Urban Studies

320 Urban Center  
503-725-4045  
https://pdxscholar.library.pdx.edu/cus/
The Center for Urban Studies, established in 1966, is a multidisciplinary research unit that promotes and facilitates research and community service for faculty and students on urban and metropolitan issues. CUS research on urban and regional systems and policy includes issues such as planning and growth management, sustainability, energy, transportation, economic development, and housing and equity. Center for Urban Studies faculty are frequently engaged with policy-making institutions at the metropolitan, regional, and national levels, and CUS provides an infrastructure for the community to access the expertise and resources of the university. Faculty scholarship is presented at public forums and in academic journals and conferences. Private, public, and nonprofit organizations, as well as the community, can access expertise and services through CUS.

The center houses the PSU-China Innovations in Urbanization Program, promoting dialogue and exchanges among professionals, students, and scholars in the U.S. and China.

**Center for Real Estate**

631 SW Harrison, Room 270  
503-725-5175  
https://www.pdx.edu/realestate

In 2004, the Center for Real Estate was formed as a partnership between PSU’s acclaimed Schools of Urban Studies and Planning and Business Administration to manage the real estate programs at Portland State and serve as the vital link between the University and the real estate community. Consisting of an Executive Director, an Academic Director, and a Program Manager, the Center staff work with employers to not only meet their internship and employment needs, but also provide them with valuable updates on the real estate industry through the Center’s annual real estate conference.

The Center’s PSU Real Estate Quarterly publication showcases articles on innovation in the real estate industry and trends affecting the real estate market, regional planning and the regional economy.

The Center supports four real estate degree programs at Portland State University: a Master of Real Estate Development, a Graduate Certificate in Real Estate Development, and an Undergraduate Minor in Real Estate Development. Faculty from both the Nohad A. Toulan School of Urban Studies and Planning and the School of Business Administration teach the courses within each program.

Center address: School of Business Administration, 631 SW Harrison Street, Room 270.

**Institute of Portland Metropolitan Studies**

320 Urban Center  
503-725-4045  
https://www.pdx.edu/metropolitan-studies

The Institute of Portland Metropolitan Studies (IMS) is a neutral source of information and analysis about the issues facing the metropolitan region. A service and resource center in the College of Urban and Public Affairs at Portland State University, the Institute’s mission is to advance the economic, environmental, and social goals of the Portland metropolitan region by gathering and disseminating credible information, convening regional partners, and simulating dialogue and action about critical regional issues. IMS also serves as a portal to other resources of higher education for the region’s communities.

The IMS sponsors research, holds forums and seminars, and gathers and disseminates data about the outcomes most important to the leaders and citizens of the Portland metropolitan area. By engaging students in its work, IMS offers opportunities to learn about regional issues and contribute to creative approaches to our most important challenges.

The IMS has an external governing board that ensures that its activities are aligned with the priorities of the leaders and residents of the region. Drawn from throughout the metropolitan region and from among private, public, and nonprofit sectors, the IMS fosters regional collaboration and dialogue among the region’s key community leaders. It is a resource for all departments at PSU and collaborates with higher education institutions across the state.

**Political Science**

650 Urban Center  
503-725-3920  
www.pdx.edu/political-science/  
- B.A., B.S.  
- Minor  
- Minor in Law and Legal Studies  
- Secondary Education Program—Social Science  
- Undergraduate Certificate in Campaigning to Win a U.S. Political Campaign  
- Undergraduate Certificate in Women's Leadership  
- M.S.  
- Ph.D.—Participating department in Public Affairs and Policy Doctoral Program

**Undergraduate programs**

The program in political science leading to the B.A. or B.S. degree is designed to meet the needs of the liberal arts major who wishes to learn more about public and international affairs, government, and the demands of
citizenship. It is appropriate for professionally motivated students who wish to pursue careers in political science, public administration, international organizations, domestic government, communications, education, or law. It is also appropriate for inquiring students desiring to learn more about the way human beings live together and the structures and institutions they have developed (or might develop) to facilitate social cooperation and conflict management.

The most current information about undergraduate degree programs, internships, and other opportunities is available on the program website.

DEGREE MAPS AND LEARNING OUTCOMES

To view the degree maps and expected learning outcomes for Political Science's undergraduate degrees, go to www.pdx.edu/academic-programs/a-z.

ADMISSION REQUIREMENTS

Admission to the department is based on general admission to the University. See Admissions Requirements (p. 8) for more information.

DEGREE REQUIREMENTS

Once a student has been admitted to Portland State University, upper-division courses used to meet political science major requirements must be taken at the University. Courses taken at another college or university must have received prior approval from the Department of Political Science. All courses used to satisfy political science major requirements, whether taken at PSU or elsewhere, must be graded C or above. Students must complete a minimum of 20 credits of political science coursework at PSU.

There are four different options for students completing a degree in political science: the standard major, the public service option, the international development option, and the honors program.

POLITICAL SCIENCE B.A./B.S.

The standard major offers a traditional course of study in political science that involves some exposure to three basic areas of the discipline. In addition to meeting the University’s general education requirements, a student wishing to pursue a basic major in political science must take a minimum of 48 credits in political science distributed as follows.

A minimum of 20 credits must be taken in residence at PSU.

REQUIREMENTS

<table>
<thead>
<tr>
<th>Lower Division Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Three courses from the following four options (12 credits)</td>
</tr>
<tr>
<td>PS 101 United States Government 4</td>

<tr>
<td>PS 208 Introduction to Political Theory 4</td>
</tr>
</tbody>
</table>

Upper Division Core Requirements

Take two from the following four options (8 credits):

- PS 331 Oregon Politics 4
- PS 335U Race and Politics in the United States 4
- PS 419 Political Reform 4
- PS 431 State and Local Politics 4

Additional electives (20 credits, minimum of 12 in Political Science)

Political Science options:

- PS 310 How to Win a U.S. Political Campaign 4
- PS 312 Legislative Process 4
- PS 313U The Power Game: A Simulation of Washington Politics 4

Subtotal: 48

PUBLIC SERVICE OPTION

The Public Service option in Political Science is designed for students who want a more hands-on experience in the major or are interested in practical politics. The curriculum provides students with a strong foundation in American government, while instilling in them an understanding of public service. Students in this track are required to serve an internship in a governmental or political office.

Lower Division Requirements

Three courses from the following four options (12 credits)

- PS 101 United States Government 4
- or
- PS 102 United States Politics 4
- PS 204 Comparative Politics 4
- PS 205 International Politics 4

Research Project (4 credits)

Students participating in the PS International Development track option are required to execute a substantial research paper (20 – 25 pages) on a development-related topic of their choosing. Students should identify a Political Science faculty member from the list below who agrees to oversee the PS 405 project, offer educational guidance and support and enroll the student using the “By Arrangement” form. The minimum credit requirement for the Final Project is 4 student credit hours (SCH), with a maximum of 6 SCH possible for larger projects. For students completing projects worth more than 4 SCH, the additional credits may not substitute for other requirements in the ID track option. In certain cases, students seeking Political Science Honors credit may use their PS Honors paper to fulfill the requirements for the ID track option with the approval of the faculty member(s) overseeing these projects.

As an alternative to the research project, students may participate in a professional internship that supports the ID Track option’s basic educational goals. Students must independently locate an internship opportunity, identify a faculty member from the list below who will oversee the internship, sign off on the PS 404 internship contract, and enroll in the internship using the “By Arrangement” form. A written report (6-8 pgs.) specifying how the internship experience fits with the student’s educational goals and how it relates to and advances the educational content of the degree track option is to be submitted to the student’s faculty advisor by the end of finals week during the quarter in which the internship is completed. The number of SCH gained through an internship is proportional to the number of work hours the internship requires, with each SCH worth 30 hours of work during a quarter. Students must complete an internship worth 4 SCH to satisfy the track option requirements, with a maximum of 12 SCH possible. For students completing internships worth more than 4 SCH, the additional credits may not substitute for other requirements in the ID track option.

POLITICAL SCIENCE HONORS PROGRAM

The honors program is designed for our top students who seek out additional intellectual challenges, including research and writing an honors thesis during their senior year. It is distinct from the University Honors Program, but political science majors may be admitted to both programs.

Students apply for admission to the program during the winter or spring quarter of their junior year. To be eligible for the honors program, a student must be a political science major and have earned at least a 3.2 grade point average overall and a 3.5 GPA in their political science coursework. Applicants submit the following information to the Honors Program advisor: PSU and other college transcripts, letters of recommendation from two political science faculty, and a statement of purpose (500 words or less) indicating interest in the program, area of research for
the honors thesis, and the faculty member willing to supervise the research.

**REQUIREMENTS**

Political science honors students complete all of the coursework required for the standard major, but honors coursework must include the following:

**Required Courses**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PS 411</td>

<td>4</td>
</tr>
<tr>
<td>PS 403</td>
<td>Honors Thesis</td>
<td>12</td>
</tr>
</tbody>
</table>

Thesis credits are awarded in conjunction with thesis research and writing during the senior year, and students submit and defend their honors theses at the end of their senior year. For political science students who are also enrolled in the University Honors Program, the process is designed to satisfy the thesis requirements of both programs, although these students have the option of enrolling in up to 4 credits of HON 403 rather than PS 403.

**POLITICAL SCIENCE MINOR**

The minor in political science requires fewer credits than the standard major and may be combined with other majors offered at PSU. Of the 28 required course credits, students must complete at least 16 at PSU.

The minor in law and legal studies offers an interdisciplinary, liberal arts approach to the study of law. This is an academic program, not a professional training program, emphasizing the political, social, cultural, and philosophical foundations and impacts of law and legal systems. It is designed for pre-law students and also for a broad array of students from across the PSU campus who are interested in the relationship of law to politics, society, and culture. While the core courses concentrate on American law and the American legal system, the electives allow students to focus on aspects of law related to areas such as international law, comparative law, and philosophy.

Soc 417  Law & Society: The Sociology of Law  4
USP 455  Land Use: Legal Aspects  3
USP 468  Oregon Land Use Law  3
Electives approved by Law and Legal Studies advisor (maximum 8 credits)

Total Credit Hours: 28

For law and legal studies minors who are also majoring or minoring in political science, at least three electives (12 credits) must be applied solely to the law and legal studies minor. In order to count toward fulfillment of the minor, courses must be passed with a grade of C or above.

CAMPAIGNING TO WIN A U.S. POLITICAL CAMPAIGN UNDERGRADUATE CERTIFICATE

About This Program
Political campaigns are a fast-paced, high-stakes endeavor. Campaign workers operate in a highly competitive environment where both collaboration and individual skill and initiative are required for team success. Campaigns can be stressful and chaotic, and campaign workers need to have a broad-based skill set in communication, organization, leadership, data analysis, and strategic thinking to thrive in the dynamic landscape of a modern campaign. While these skills can be, and often are, acquired on the go, campaigns benefit greatly from workers who enter with the necessary skills and experience.

Building on the foundation of academic training provided by a Political Science or related major, this certificate takes participants into the real world of political campaigns, showing them what it takes to win and giving them an opportunity to develop the skills needed to contribute to a winning effort. Students completing the certificate will acquire marketable skills at the same time that they are developing a well-grounded understanding of the mechanics and dynamics of the campaign process and its linkages with the party system and the broader political system.

Who Should Attend
This certificate program is intended for undergraduate students studying Political Science or a related field who want to obtain high-level, meaningful work on a political campaign at the entry-point of their career in politics.

What You’ll Learn
Upon completion of this program, students will be able to:

• describe in detail how election campaigns are organized and run at the local, state, and national level;

• explain how campaigns function within the political culture, party system, and electoral environment of the United States;

• demonstrate essential skills utilized by campaigns, such as fundraising, networking, field organizing, speechwriting, polling and poll;

• interpretation, candidate management, media relations, etc.;

• function as a productive team member in the high-intensity, high-stakes, and highly competitive environment of a present-day political campaign.

3 Required Classes
PS 310 How to Win a U.S. Political Campaign  4
PS 416 Political Parties and Elections  4
PS 318U Media, Opinion, and Voting  4
or
PS 427 The Politics of Public Opinion  4

Subtotal: 12

PS 318U and PS 427: The course not taken as a requirement may be taken as an elective.

3 Electives
Choose from the following list:
PS 318U Media, Opinion, and Voting  4
or
PS 427 The Politics of Public Opinion  4
Comm 314U Persuasion  4
Comm 420 Political Communication  4
PS 331 Oregon Politics  4
PS 413 Congress  4
PS 417 Interest Groups  4
PS 475 Comparative Political Parties and Elections  4

Subtotal: 12

PS 318U and PS 427: The course not taken as a requirement may be taken as an elective.

Internship
Students will be placed with a candidate or ballot-measure campaign. Students who have previously worked on a campaign can apply for a waiver of this requirement by obtaining a letter of performance from the campaign manager and writing a report for the instructor of PS 399/PS 310 outlining duties and examining lessons learned and skills acquired. Internship will be supervised by the program director or assigned to another full-time PS faculty member.
WOMEN'S LEADERSHIP UNDERGRADUATE CERTIFICATE

The Undergraduate Certificate in Women’s Leadership provides undergraduate students with a focused course of study on women leaders across disciplines, with an emphasis on the challenges that they face and techniques for overcoming those challenges. Certificate requirements include both political science and women’s studies courses, in addition to electives drawn from departments across campus. This certificate offers an interdisciplinary understanding of the current issues facing women leaders today, and also requires participation in a skill-building seminar (PS 381) designed to foster students’ confidence and leadership ability. This certificate is open to any undergraduate with interest in women’s leadership.

Students are required to complete degree requirements specified in their major in order to be awarded the Women’s Leadership Certificate. In addition, students must complete all certificate requirements.

Graduate Program

The Department of Political Science offers a program of study leading to a master of science (M.S.) degree. There are two alternative tracks. The Ph.D.-preparation track is designed for students who are seriously contemplating the pursuit of a doctoral degree in political science after finishing their master’s degree at PSU. The professional track is designed for other students—e.g., those interested in careers in law, legislative affairs, or the foreign service. The Department also participates in the Public Affairs and Policy Ph.D. Program.

ADMISSION REQUIREMENTS

The master’s program generally attracts students with undergraduate degrees in political science, but is open to students with a wide variety of disciplinary backgrounds. The program admits graduate students during the fall term. Procedures and deadlines for applications are provided on the program website.

The following materials should be submitted through the application link found on the Graduate School’s website.

- Non-refundable $65 application fee (no cash)
- One transcript from each post-secondary institution attended (both sides need to be uploaded)
- A 500 word statement of intent. The statement should address the following: 1) Professional goals; 2) Planned area of study; 3) Desired employment sector; 4) How the degree furthers achievement of your professional goals
- Two recommendation letters from individuals familiar with the applicant’s academic and/or professional capabilities. Preferably, the letters should be from former instructors or from individuals with knowledge of your professional performance and potential.
- The scores of the Graduate Record Examination (GRE). Please note that you should make arrangements to take the GRE well in advance of the application deadline.
- Measles Vaccine Form
- Official TOEFL scores if the applicant does not speak English as a native language and has not received a graduate or undergraduate degree in an English-speaking territory.
- Required financial documentation (if International)
- International Applicants who currently reside in the United States with an F-1 or J-1 visa must fill out the SEVIS Form

POLITICAL SCIENCE M.S.

The M.S. in Political Science is a two-year program that provides students with the theories, research skills, and practical understanding of government and politics necessary to pursue both professional and academic careers. It is unique among masters programs in political science in offering a course of study especially designed to
prepare students to succeed as doctoral students in the discipline's most competitive Ph.D. programs. For students less interested in academic careers, the program offers a course of study well suited to professions in such fields as law, public policy, legislative affairs, and the foreign service. Learning outcomes include:

- Knowledge of the main theories and methodological approaches defining two of the subfields of political science, with a more advanced mastery of one of them.

- Ability to independently evaluate conflicting arguments, interpret evidence from alternative analyses, and make reasoned conclusions from the evidence available.

- Analytic skills to formulate an original research question, design and carry out an appropriate study for answering the question, and communicate the findings to a scholarly community.

**REQUIREMENTS**

Master's degree students in both the Ph.D.-preparation and the professional tracks follow a similar course of study during the first year in the program, which includes three required courses on theory and research in political science, a choice of two seminars on the primary subfields in political science, and two additional political science electives. During the second year, professional track students may substitute up to 8 credits of Internship for required or elective courses taken by students in the Ph.D.-preparation track. Coursework, including credit for work on the master's thesis (see below), is distributed as follows:

### First Year Coursework

**Fall**
- PS 511: Advanced Overview of Political Science 4
- PS 590: Introduction to Graduate School: Skills for Scholarly Success 1
- PS 5XX: Field Seminar 4
- PS 5XX: Political Science Elective 4

**Winter**
- PS 594/PAP 690: Research Design for Politics and Policy 4
- PS 5XX: Political Science Elective 4
- PS 5XX: Field Seminar 4
- PS 5XX: Political Science Elective 4

**Spring**
- PS 591: Testing Theories in Political Science 4
- PS 503: Thesis 1

### Second Year Coursework

**Fall**
- PS 503: Thesis 3
- PS 5XX: Political Science Elective 4
- PS 588: Political Scientist Professionalization 2
- PS 504: Internship 2

**Winter**
- PS 5XX: Political Science Elective 4
- PS 503: Thesis 3
- PS 589: How to Teach and Present Social Science Research 2
- PS 504: Internship 2

**Spring**
- PS 5XX: Political Science Elective 4
- PS 503: Thesis 2

The following courses qualify as Field Seminars:
- PS 520: Seminar on American Political Institutions 4
- PS 530: Proseminar in International Relations 4
- PS 569: Comparative Political Institutions 4
- PS 507: Normative Foundations of Governance 4

### Thesis

The final requirement for the degree is the master's thesis—an original investigation that demonstrates mastery of a topic in political science and the ability to communicate this understanding to an audience of one's peers. The thesis topic is chosen during Spring term of the first year in consultation with the student's thesis advisor, who supervises the drafting of a thesis prospectus. The thesis prospectus is defended by the end of the term, at which time the student either receives approval to move forward with thesis research or is directed to revise the prospectus for a second defense in Fall term of the second year.

The completed thesis is defended during Spring term of the second year in an oral presentation laying out the purpose, implementation, and findings of the project, and making a case for its contribution to political science scholarship. In order to count toward fulfillment of master's degree requirements, courses must be passed with a grade of B- or
The Department of Public Administration offers a variety of programs to meet the educational needs of public service professionals. Mid-career managers and those intending such careers in federal, state, and local government; nonprofit agencies; and hospitals and other health care organizations are attracted to the programs offered by the department because of the quality of the faculty, the reputation of the programs, and the convenience of course scheduling. In addition to its own faculty and course offerings, the Department of Public Administration draws upon faculty and courses from other departments and schools, such as political science, economics, criminology and criminal justice, urban studies and planning, gerontology, and public health. Adjunct faculty with appropriate academic credentials and significant professional experience in government, nonprofit, and health organizations also contribute to the department.

The graduate programs offered under the Department of Public Administration admit students with undergraduate degrees in a variety of social sciences, as well as in business, the humanities, and sciences. It accepts both full- and part-time students, who have had substantial governmental and nonprofit experience, and who have little or no professional experience. To accommodate graduate students who are currently working, the department offers sections of all required courses in the evenings or late afternoons or in intensive weekend formats.

**Accreditation**

The Master of Public Administration, the Master of Public Administration: Health Administration and the Executive Master of Public Administration degrees are accredited by NASPAA (the Network of Schools of Public Policy, Affairs and Administration).

**Doctoral students**

See the graduate program within the Hatfield School of Government for details under the Doctor of Philosophy in Public Affairs and Policy (p. 394).

**Undergraduate Programs**

### DEGREE MAPS AND LEARNING OUTCOMES

To view the degree map and expected learning outcomes for Public Administration's undergraduate minor, go to [https://www.pdx.edu/academics/programs/undergraduate/civic-leadership](https://www.pdx.edu/academics/programs/undergraduate/civic-leadership)

### CIVIC LEADERSHIP MINOR

The interdisciplinary Civic Leadership minor provides students with theoretical and practical understanding about civic leadership, and prepares students to be responsibly engaged citizens and community leaders. Students who minor in civic leadership must complete core and elective courses for a total of 34 credits (at least 20 of which must be taken in residence at PSU). Some of these courses have prerequisites, and students should read course descriptions in the current PSU Bulletin before registration. A pre-approved 6-credit community-based civic leadership practicum is required as part of the minor. The practicum requirement may be fulfilled by any UNST Senior Capstone course or by an independently developed and approved community-based learning experience.

- PS 417 Interest Groups 4
- PS 431 State and Local Politics 4
- USP 350U Inclusive Engagement 4

Community-based practicum (6 credits total)

Graduate Programs

ADMISSION REQUIREMENTS

In determining admission to the Department of Public Administration, the faculty assesses the applicant’s preparation for and commitment to the unique demands of a public service career. It considers the following combination of evidence, all of which must be submitted to PSU’s on-line application system:

1. The appropriateness and quality of academic preparation demonstrated by the breadth and content of prior academic coursework. A minimum GPA of 3.00 in undergraduate coursework is generally expected of students seeking regular admission status. Exceptions are occasionally made to this requirement when supported by other compelling evidence.

2. Three independent assessments of the applicant’s ability to perform adequately in graduate studies and potential for high-level performance in public service. The three letters of assessment, on forms provided by the Department of Public Administration, and supplemented by personal letters, should be provided by faculty members from colleges or universities previously attended or by other persons in a position to comment on the applicant’s academic background and professional experience. One letter should be from the applicant’s current employer, if any.

3. A résumé.

4. A TOEFL score of 550 on paper, 213 on computer or 80 on internet is required of every applicant whose first language is not English. This is a requirement even if the applicant has earned an undergraduate degree in the United States.

5. All degrees offered by the Department of Public Administration require the submission of a Statement of Purpose from the applicant. Specific format and content for the Statement of Purpose differ from degree to degree:
   a. The MPA, MPA:HA, and MNL requirements may be found at www.pdx.edu/public-administration/public-administration-graduate-programs-and-admissions-criteria.
   b. The EMPA admission requirements may be found at www.pdx.edu/public-administration/executive-master-public-administration.
   c. The admission requirements for Certificates in Nonprofit and Public Management, Collaborative Governance, Food Systems and Energy Policy & Management may be found at www.pdx.edu/public-administration/graduate-certificates.

Students may apply for admission any time throughout the calendar year. The Department of Public Administration maintains the same application deadlines published for the University for official admission in fall, winter, and spring terms.

Limitation on by-arrangement courses

Admitted master’s students may utilize up to 12 credits of by-arrangement classes (501 and 505). In cases where more than 12 credits are needed because of the lack of regularly scheduled classes, a waiver must be submitted for approval to the department curriculum committee and the department chair.

Limitation on acceptance of C grades
No student may use more than two C grades toward graduation for a graduate degree from the Department of Public Administration.

DEGREE REQUIREMENTS

The Department of Public Administration offers four Masters Degrees: Master of Public Administration (MPA), Master of Public Administration in Health Administration (MPA-HA), Master of Nonprofit Leadership (MNL), and an Executive Master of Public Administration (EMPA) degree. Please see below for the Requirements of each degree.

Field of Specialization (15)

The MPA program offers the following formal fields of specialization: nonprofit management, natural resources policy and administration, local government, global leadership and management, and human resource management. Students may also work with their advisor to design their own specially designed field of specialization. Students declare an intended field of specialization by the time they complete 30 credits of the MPA program by filing a “field of specialization” form with a proposed program of study. The specialization and program of study may be changed based upon consultation with the faculty advisor.

Requirements for the formal fields of specialization are:

Nonprofit Management: Four required courses and one elective course. One of the four required courses in this specialization substitutes for the required budgeting course in the core of the program, allowing students to take an additional elective course.

Natural Resources Policy and Administration: Two required and three elective courses.

Local Government: Two required and three elective courses.

Global Leadership and Management: Two required and three elective courses.

Human Resource Management: Two required and three elective courses.

Students are encouraged to work with their advisors to take advantage of course offerings in other academic units, as well as other professional experiences that may be recommended by faculty advisors. Detailed information on
specializations can be found at www.pdx.edu/public-administration/mpa-specializations.

Diversity

At some point within their program of study students must satisfactorily complete one course the primary focus of which is diversity. This does not require additional credit hours or coursework beyond the 60 credit requirement and can include courses taken as skill development or specialization classes. Course options include, but are not limited to the following.

- **PA 514** Global Leadership and Management 3
- **PA 523** Nonprofit Organizations: Nonprofits on the World Stage 3
- **PA 529** Nonprofit Field Study in Oaxaca, Mexico 3-6
- **PA 544** International Field Experience 3
- **PA 547** Culture, Values and Leadership in the Public Sector 3
- **PA 549** Cross-cultural Communication in the Public Sector 3
- **PA 593** Civil Rights for Public Managers 3
- **PA 594** Enhancing Diversity in the Workplace 3

Other courses can be approved by the adviser.

**HEALTH ADMINISTRATION M.P.A.**

The Department of Public Administration offers a Master of Public Administration: Health Administration degree. Students admitted to this degree are required to complete 60 credits of coursework. For students interested in geriatrics, gerontology, and the administration of aging programs, the Institute of Aging offers a Graduate Certificate in Gerontology, which may be earned in conjunction with the MPA:HA degree.

**REQUIREMENTS**

**Required Courses (39)**

- **PA 511** Public Administration 3
- **PA 513** Administrative Ethics and Values 3
- **HSMP 573** Values and Ethics in Health 3
- **PA 533** Public Policy: Origins and Process 3
- **PA 534** Administrative Law 3
- **HSMP 577** Health Care Law and Regulation 3
- **PA 540** Administrative Theory and Behavior 3

**Elective Courses (15)**

Elective courses must be approved by your faculty advisor. For each elective course you are considering, write a paragraph on how that course will help you with your career/professional development. For students with little or no experience in the health care sector, it is advised that you take PA 504 Cooperative Education within your first twelve months of the program.

**Field of specialization**

MPA:HA students must complete at least 30 credits that are health care specific by graduation. Consult with your advisor to verify acceptability of any courses counted towards the specialization that do not have a PAH prefix.

**Integrative Experience (6)**

The integrative experience is offered under two options and is available to students only after they have completed at least 42 credits in their master’s program.

**Option 1**

Intended for students who have had limited or no administrative experience, or those who wish to complete an applied field experience.

- **PAH 509/HSMP 570** Practicum 1-6

**Option 2**

For those students who have had at least three years of full-time administrative or management experience in public,
nonprofit, and/or health care organizations. Advisor approval required.

**Diversity**

At some point within their program of study students must satisfactorily complete one course the primary focus of which is diversity. This does not require additional credit hours or coursework beyond the 60 credit requirement and can include courses taken as skill development or specialization classes. Courses options include, but are not limited to the following.

**PA 512** Case Analysis 3-6

**PA 514** Global Leadership and Management 3

**PA 523** Nongovernmental Organizations: Nonprofits on the World Stage 3

**PA 529** Nonprofit Field Study in Oaxaca, Mexico 3-6

**PA 544** International Field Experience 3

**PA 547** Culture, Values and Leadership 3

**PA 549** Cross-cultural Communication in the Public Sector 3

**PA 593** Civil Rights for Public Managers 3

**PA 594** Enhancing Diversity in the Workplace 3

Other courses can be approved by the adviser.

Subtotal: 60

**COLLABORATIVE GOVERNANCE GRADUATE CERTIFICATE**

The courses in this graduate certificate program provide current and future public service leaders with the advanced collaborative skills necessary for success in today's interconnected world.

To receive the Graduate Certificate in Collaborative Governance students must complete a minimum of 15 credit hours.

**REQUIREMENTS**

**ENERGY POLICY AND MANAGEMENT GRADUATE CERTIFICATE**

A total of five courses are required for the Graduate Certificate in Energy Policy and Management, with a minimum of 15 total credits.

The courses are listed below and offered across the programs collaborating on this interdisciplinary certificate. They are Public Administration (PA); Urban Studies and Planning (USP); Economics (EC); Engineering Technology and Management (ETM); and Systems Science (SYSC).

Students will select one of the core courses, two of the focal area courses, and two of the professional skills courses, depending on interest and course availability. Courses need not be taken in any particular order, but the core course is recommended early in the program.

EXECUTIVE M.P.A.

The Executive M.P.A. offers a work-centered curriculum with a focus on taking leadership initiative. Students are required to have 10 years of significant work experience. The program is offered in a cohort model which facilitates course sequencing that maximizes learning that carries over from one course to another. Students are required to complete the following 45 credits of coursework.

**Master of Nonprofit Leadership**

The Master of Nonprofit Leadership is designed to meet the needs of working professionals in the nonprofit sector and is thus offered in an accommodating format (mirroring the MPA program)—allowing students to apply and matriculate in fall, winter, and spring quarters, and proceed through the program in either full-time or part-time status.

The program is comprised of 54 credits.

Coursework will include a core area of knowledge (33 credits) which includes the following: Foundational Knowledge (12 credits); Fundamentals of Nonprofit Management (12 credits); and, Analytic Skills (9 credits).

**Nonprofit and Public Management Graduate Certificate**

The Graduate Certificate in Nonprofit and Public Management consists of 21 credit hours of graduate coursework in Public Administration with an emphasis in either public or nonprofit management. The certificate is intended to provide existing and aspiring middle managers in nonprofit and public organizations with the knowledge and
skills necessary to be successful in carrying out their administrative responsibilities.

**REQUIREMENTS**

### Required courses (6)

<table>

### DOCTORAL DEGREES

The Department of Public Administration cooperates with other units within the Hatfield School of Government to offer a doctoral degree in public affairs and policy. For details, see the program descriptions.

### Doctoral Degrees

The Department of Public Administration cooperates with other units within the Hatfield School of Government to offer a doctoral degree in public affairs and policy (p. 394). For details, see the program descriptions.

### RESEARCH CENTERS AND INSTITUTES

#### Institute on Aging

470 Urban Center  
503-725-3952  
www.pdx.edu/ioa

The Institute on Aging (IOA), in the College of Urban and Public Affairs, is a multidisciplinary research and educational organization. Established in 1969, the IOA was one of the first centers in the United States to focus on the social, psychological, and economic issues related to
Our Mission
Institute on Aging faculty, staff, and students are dedicated to enhancing understanding of aging and facilitating opportunities for elders, families, and communities to thrive.

Research
Institute on Aging faculty specialize in research on a variety of topics, including:
- person-directed long-term care;
- community-based care, such as assisted living and adult foster home;
- global aging in developing countries;
- planning for age-friendly communities;
- aging services and policies;
- applied demography;
- changing family structures;
- research methods.

Degree and Training Programs
The Institute on Aging offers courses and areas of specialization in gerontology for undergraduate, postbaccalaureate, master’s, and doctoral students, as well as research and teaching opportunities. Each of the educational programs offered provides a multi-disciplinary core curriculum in gerontology and is designed for students seeking instruction in aging services, research, and/or policy. The IOA is a member of the Association for Gerontology in Higher Education and the Oregon Gerontological Association.

Graduate Programs
Students from a wide range of disciplines can complement their degree by completing the graduate certificate in gerontology, a post baccalaureate program for those seeking additional education in aging studies. Examples of degree programs that might be able to add aging as an area of emphasis include Urban Studies, Public Policy, Public Health, Social Work, Speech and Hearing Science, and Business.

The Graduate Certificate in Gerontology may be completed as a stand-alone program for students who have completed an undergraduate degree.

Undergraduate Programs
The OHSU-PSU School of Public Health offers a B.A. in Health Studies with a concentration in Aging Services. Students from other undergraduate programs may take gerontology courses offered through this program.

Lifelong Learning
The Senior Adult Learning Center (SALC) provides opportunities for continuous intellectual enrichment and personal growth of older adults. Oregon residents aged 65 and older can register through the SALC to audit Portland State University courses on any topic with no tuition costs on a space-available basis.

The Retired Associates of Portland State University is an affiliated membership organization open to anyone aged 50 or older and sponsored by the Institute on Aging. It provides fellowship for those interested in lifelong learning and leadership opportunities.

Community Service and Partnerships
Through partnerships with a wide variety of organizations that serve older adults locally, regionally, nationally, and internationally, faculty and students at the Institute on Aging seek to build capacity for organizations and communities to address the needs and strengths of older people living near and far. Programs are aimed at enhancing the lives of older persons who lack adequate resources in the United States and in less developed regions of the world. The goal is to test service learning methods and to assess some of the needs of and opportunities for elders in the United States and abroad. Otherservice initiatives focus on creating age-friendly communities and enhancing the quality of long-term care.

Population Research Center
780 Urban Center
503-725-3922
www.pdx.edu/prc

Through demographic research and teaching, the Population Research Center (PRC) serves the people of Oregon by addressing the causes and implications of demographic change for communities across the state. PRC is a center of training and knowledge for solutions to problems in applied demography, including population estimates, projections, geospatial analysis, and census-taking.
Activities
PRC annually publishes certified population estimates of Oregon’s cities and counties, and regular long run population projections for counties and urban growth boundary (UGB) areas. Center faculty collaboratively produce data and research for implementation of policies tied to population or housing to ensure equitable distribution of tax revenue; better land use planning; appropriations for various state and federal program funds, and for other public policy priorities including education, public health, and redistricting. PRC faculty additionally engage in activities including special estimates or local area censuses, and projections for school, library, utility, and other service districts, and technical assistance with redistricting.

The center also operates as the Oregon State Data Center (SDC), a cooperative program with the U.S. Census Bureau that makes demographic and socio-economic data and information accessible to state, regional, local, and tribal governments and the public through a network of local experts. SDC collaborates with the Census Bureau to improve the quality of Oregon’s data by supporting the decennial census, geographic updates, and other programs through outreach and engagement.

As a member of the Federal-State Cooperative Program for Population Estimates (FSCPE), the PRC is a state liaison with the U.S. Census Bureau for issues related to population estimates, projections, and the decennial census of housing and population. The center houses historical and current data and maps which are available to faculty, students, and the general public.

Graduate Programs
Graduate Certificate in Applied Demography is a postbaccalaureate program for students seeking to specialize in population studies. The certificate can be completed as a standalone program or integrated into a course of study in any graduate program at PSU.
Directories

Portland State University Board of Trustees

The Portland State University Board of Trustees is a 15-member volunteer board appointed by the Governor of Oregon. The Board is responsible for the governance of the University as provided in state laws that establish the University. The Board meets at least four times a year. Most of the work of the Board is done through the Board’s committees, which meet regularly throughout the year. The members of the Board elect their Chair and Vice Chair, are responsible for the employment and evaluation of the University President, establish the mission and strategic plan of the University, establish tuition and fee rates, approve the University budget and the incurrence of debt, and perform other tasks as necessary. All actions of the Board are for the benefit of the University, its current and future students, faculty and staff, the Portland metropolitan area, and the State of Oregon.

The President of the University is an ex officio, non-voting member of the Board. In addition, the Board must include one faculty member, one staff member, and one student from the University. The faculty, staff and student members of the Board are appointed for two-year terms; all other trustees are appointed for four-year terms. Trustees are limited to two full consecutive terms. All trustees, except for the President, are appointed by the Governor of Oregon, subject to confirmation by the Oregon Senate. A list of the current trustees’ terms of office is here.

Current Members of the PSU Board of Trustees

Portland State University

Faculty members are listed with their programs. The dates in parentheses indicate the beginning of academic service at Portland State University. The earliest date shown is 1955, the year in which Portland State became a degree-granting institution.

Housing Occupancy Manager.

Allison Gammons (2014) M.A.
Housing Services Coordinator. M.A. 2013 Bangor
Theological Seminary.

Lindsey Gibson (2020) M.A.
Associate Director for Housing Operations. M.A. 2016
Portland State University.

Morgan Hynson (2020) B.S.
Information Technology Consultant. B.S. 2015 Portland
State University.

Russell Jones (2011) M.S.
Interim Associate Director for Residence Life. M.S. 2014
Portland State University.

Joey Koehn (2018) M.S.
Residence Director. M.S. 2020 Portland State University.

Nikki Ludd (2018) M.Ed.
Assistant Director for Summer Housing and Conferences.
M.Ed. 2015 University of North Florida.

Angelica Padilla (2021) M.S.
Residence Director. M.S. 2020 University of North
Florida.

Quinn Peoples (2021) M.A.
Residence Director. M.A. 2020 Saint Louis University.

Kade Peden (2017) M.S.
Residence Director. M.S. 2019 Portland State University.

Savannah Swartz (2014) M.S.
Residence Director. M.S. 2020 Portland State University.

Roberto Valentin (2019) M.A.
Assistant Director of Housing and Residence Life. M.A.
2016 University of Connecticut.

Karyn Warner (2018) A.A.
Accounts Coordinator, Housing and Residence Life. A.A.
2017 Linfield College.

Queer Resource Center

K Keith (2013) M.A., M.S.W.
Director, Queer Resource Center. M.A. 2016 Portland
State University; M.S.W. 2020 Portland State University.

Hollis Kinner (2018) M.S.W.
Coordinator, Queer Students of Color Resources and Retention. M.S.W. 2020 Portland State University.

Jessica Mena (2019) B.S.
Assistant Director, Queer Resource Center. B.S. 2009 University of Arizona.

Grace Piper (2013) B.A.
Office Manager, Queer Resource Center. B.A. 2017 Portland State University.

Services for Students with Children

Ida Lombardozzi (2020) M.S.W.
Director, Services for Students with Children. M.S.W. 2012 Portland State University.

Marisol Barce (2014) M.Ed.
Director, Little Vikings. M.Ed. 2020 Portland State University.

Pamela Bock (2015) B.A.
Assistant Director, Services for Students with Children. B.A. 1996 Connecticut College.

Melissa Gorgon Clark (2018) B.A.
Office Manager, Services for Students with Children. B.A. 2018 Portland State University.

Kacy Gardner (2019) A.S.
Director, Baby Vikings. A.S. 2017 Portland Community College.

H. Thomas Johnson (1988) Ph.D.
Professor Emeritus of Business Administration. Ph.D. 1969 University of Wisconsin.
Raymond N. Johnson (1980) Ph.D.
Professor Emerita of Business Administration. Ph.D. 1984 Cornell University.
Richard Sapp (1978) Ph.D., C.P.A.
Professor Emeritus of Business Administration. Ph.D. 1978 University of Houston.
Professor Emeritus of Business Administration. Ph.D. 1974 Arizona State University; C.P.A.

Finance
Faculty
Michael Dimond (2012) M.S.
Senior Instructor I of Business Administration. M.S. 2007 Portland State University.
Julia Freybote (2019) Ph.D.
Assistant Professor of Business Administration. Ph.D. 2012 Georgia State University.

Janet Hamilton (1986) Ph.D.
Associate Professor of Business Administration. Ph.D. 1986 Michigan State University.
Qin Lian (2015) Ph.D.
Cameron Professor in Finance; Associate Professor of Business Administration. Ph.D. 2007 University of Alabama.
Pimnan Limpaphayon (2011) Ph.D.
Associate Professor of Business Administration. Ph.D. 1998 University of Rhode Island.
Gerard C.S. Mildner (1991) Ph.D.
Associate Professor of Business Administration. Ph.D. 1991 New York University.
Daniel A. Rogers (2001) Ph.D.
Associate Professor of Business Administration. Ph.D. 1998 University of Utah.
Jing Zhao (2016) Ph.D.
Associate Professor of Business Administration. Ph.D. 2007 Pennsylvania State University

Emeriti Faculty
Chi-Cheng Hsia (1987) Ph.D.
Professor Emeritus of Business Administration. Ph.D. 1974 University of California.
James H. Hugon (1962) Ph.D.
Shafiqur Rahman (1986) Ph.D.
Professor Emeritus of Business Administration. Ph.D. 1986 University of Illinois.
John W. Settle (1984) Ph.D.
Associate Professor Emeritus of Business Administration. Ph.D. 1978 University of Washington.

Management
Faculty
Melissa Appleyard (2003) Ph.D.
Ames Professor in Management of Innovation and Technology; Professor of Business Administration. Ph.D. 1997 University of California, Berkeley.
Talya N. Bauer (1994) Ph.D.
Cameron Professor in Management; Professor of Business Administration. Ph.D. 1994 Purdue University.
David Cadiz (2015) Ph.D.
Sr. Instructor I of Business Administration. Ph.D. 2015 Portland State University.

Emeriti Faculty
Chi-Cheng Hsia (1987) Ph.D.
Professor Emeritus of Business Administration. Ph.D. 1974 University of California.
James H. Hugon (1962) Ph.D.
Shafiqur Rahman (1986) Ph.D.
Professor Emeritus of Business Administration. Ph.D. 1986 University of Illinois.
John W. Settle (1984) Ph.D.
Associate Professor Emeritus of Business Administration. Ph.D. 1978 University of Washington.

Management
Faculty
Melissa Appleyard (2003) Ph.D.
Ames Professor in Management of Innovation and Technology; Professor of Business Administration. Ph.D. 1997 University of California, Berkeley.
Talya N. Bauer (1994) Ph.D.
Cameron Professor in Management; Professor of Business Administration. Ph.D. 1994 Purdue University.
David Cadiz (2015) Ph.D.
Sr. Instructor I of Business Administration. Ph.D. 2015 Portland State University.

Emeriti Faculty
Chi-Cheng Hsia (1987) Ph.D.
Professor Emeritus of Business Administration. Ph.D. 1974 University of California.
James H. Hugon (1962) Ph.D.
Shafiqur Rahman (1986) Ph.D.
Professor Emeritus of Business Administration. Ph.D. 1986 University of Illinois.
John W. Settle (1984) Ph.D.
Associate Professor Emeritus of Business Administration. Ph.D. 1978 University of Washington.
Jeanne Enders (2000) Ph.D.
Assistant Professor of Business Administration. Ph.D. 1997 University of Chicago.

Berrin Erdogan (2002) Ph.D.
Professor of Business Administration. Ph.D. 2002 University of Illinois, Chicago.

Brady Firth (2018) Ph.D.
Assistant Professor of Business Administration. Ph.D. 2014 University of Maryland.

Senior Instructor II in Business Administration. M.B.A. 1997 Portland State University.

Stanton Heister (2018) DBA.
Instructor of Business Administration. DBA 2015 Argosy University.

Assistant Professor of Business Administration. M.B.A. 1997 William Woods University.

Bill Jones (2009) Ph.D.

Sejin Keem (2017) Ph.D.
Assistant Professor of Business Administration. Ph.D. 2017 Georgia Institute of Technology.

Ted Khoury (2011) Ph.D.
Associate Professor of Business Administration. Ph.D. 2008 University of Texas, Dallas.

Brian McCarthy (2001) M.B.A.
Senior Instructor I of Business Administration. M.B.A. University of Washington.

Lihong Qian (2011) Ph.D.
Associate Professor of Business Administration. Ph.D. 2011 University of Illinois, Urbana Champaign.

Zafrin Rahman (2018) Ph.D.

Shung Jae Shin (2011) Ph.D.
Associate Professor of Business Administration. Ph.D. 2003 Texas A&M.

Pamela Tierney (1992) Ph.D.
Associate Dean for Faculty and Research; Ames Professor in Management of Innovation and Technology; Professor of Business Administration. Ph.D. 1992 University of Cincinnati.

Erica Wagner (2009) Ph.D.
Associate Dean of Undergraduate Programs; Roger Ahlbrandt Professor in Management; Professor of Business Administration. Ph.D. 2002 London School of Economics.

Emeriti Faculty

Steven N. Brenner (1971) D.B.A.

Alan M. Cabelly (1980) Ph.D.

Lewis N. Goslin (1968) Ph.D.
Assistant Professor Emerita of Business Administration. Ph.D. 1964 University of Washington.

Meiru Liu (1999) Ph.D.
Assistant Professor Emerita of Business Administration. Ph.D. 1996 Portland State University.

Earl A. Molander (1975) Ph.D.
Professor Emeritus of Business Administration. Ph.D. 1972 University of California, Berkeley.

Roger L. Moseley (1967) Ph.D.

Neil Ramiller (1999) Ph.D.
Professor of Business Administration. Ph.D. 1996 University of California, Los Angeles.

Grover W. Rodich (1966) Ph.D.

Mary S. Taylor (1989) Ph.D.

Ellen L. West (1982) Ph.D.
Associate Professor Emerita of Business Administration. Ph.D. 1981 Oregon State University.

Marketing

Faculty

David Gerbing (1987) Ph.D.
Professor of Business Administration. Ph.D. 1979 Michigan State University.

Juan Young Professor in Marketing & Food Management; Professor of Business Administration. Ph.D. 1985 University of Oregon.

Nicholas Light (2021) Ph.D. Assistant Professor of Business Administration. Ph.D. 2021 University of Colorado - Boulder.

Amaradri Mukherjee (2017) Ph.D. Assistant Professor of Business Administration, Ph.D. 2017 University of Arkansas.

Jacob Suher (2016) Ph.D. Assistant Professor of Business Administration. Ph.D. 2016 University of Texas -Austin.

Emeriti Faculty

Bruce L. Stern (1975) Ph.D.

Real Estate Faculty

Supply and Logistics Management Faculty

Madeleine Pullman (2005) Ph.D. Willamette Industries Professor in SLM; Professor of Business Administration. Ph.D. 1997 University of Utah.

Emeriti Faculty

Center for Executive and Professional Education

College of Education

Jose Coll (2021) Ph.D.
Interim Dean, College of Education.
Professor of Education

Tina Anctil (2008) Ph.D.
Associate Dean for Academic Affairs, College of Education;
Professor of Education.

Faculty

Jan Abramovitz (2013) Ph.D.
Associate Professor of Education. Ph.D. 2009 Oregon State University.

Associate Professor of Practice. Ed.D. 2014 Portland State University.

Christopher J. Borgmeier (2003) Ph.D.
Associate Professor of Education. Ph.D. 2003 University of Oregon.

Anita Bright (2011) Ph.D.
Professor of Education. Ph.D. 2009 George Mason University.

Professor of Education. Ed.D. 2007 Portland State University.

Heather Burns (2009) Ed.D.
Associate Professor of Education. Ed.D. 2009 Portland State University.

Susan Carlile (2010) M.A.
Professor of Practice. M.A. 1984 University of Oregon.

Javier Casado-Perez (2017) Ph.D.
Assistant Professor of Education. Ph.D. 2017 Pennsylvania State University.

Deanna Cor (2016) Ph.D.
Assistant Professor of Education. Ph.D. 2016 George Washington University.

Christine Cress (1999) Ph.D.
Professor of Education. Ph.D. 1999 University of California, Los Angeles.

Esperanza De La Vega (2010) Ph.D.
Associate Professor of Education. Ph.D. 2005 University of California, Berkeley.

Randall De Pry (2011) Ph.D.
Professor of Education. Ph.D. 1997 University of Oregon.

Ramin Farahmandpur (2002) Ph.D.
Professor of Education. Ph.D. 2002 University of California, Los Angeles.

Bernd Ferner (2013) Ed.D.
Associate Professor of Education. Ed.D. 2013 Portland State University.

Motoaki Hara (2010) Ph.D.
Associate Professor of Education. Ph.D. 2010 University of California, Los Angeles.

Hollie Hix-Small (2014) Ph.D.
Associate Professor of Education. Ph.D. 2007 University of Oregon.

Rana Houshmand (2016) Ed.D.
Assistant Professor of Education. Ed.D. 2015 Portland State University.

Kimberly Jayne (2015) Ph.D.
Associate Professor of Education. Ph.D. 2013 University of North Texas.

Andrew Job (2007) Ed.D.
Associate Professor of Practice. Ed.D. 2004 Portland State University.

Patrick F. Johnson (2005) Ph.D.
Professor of Education. Ph.D. 1996 New Mexico State University.

Tiffany Jones (2007) M.S.
Instructor. M.S. 2006 Portland State University.

Sybil Kelley (2011) Ph.D.
Associate Professor of Education. Ph.D. 2009 Portland State University.

Karen Kennedy (2016) Ed.D.
Assistant Professor of Practice. Ed.D. 2004 University of Southern California, Los Angeles.

Torrey Kulow (2017) Ph.D.
Assistant Professor of Education. Ph.D. 2015 University of Wisconsin-Madison.

Joel A. Lane (2013) Ph.D.
Associate Professor of Education. Ph.D. 2013 Oakland University.

Holly Lawson (2014) Ph.D.
Associate Professor of Education. Ph.D. 2010 University of Arizona.

Sheldon Loman (2010) Ph.D.
Assistant Professor of Education. Ph.D. 2010 University of Oregon.

Dorothy McElhone (2009) Ph.D.
Associate Professor of Education. Ph.D. 2009 Stanford University.

Marie Mellberg, (2019) MS
Asst Professor of Practice (2015) Portland State University.
Assistant Professor of Education. Ed.D. 2018 University of Portland.

Mary Morningstar (1995) Ph.D.
Professor of Education. Ph.D. University of Kansas.

Shaheen Munir-McHill (2016) Ph.D.
Assistant Professor of Education. Ph.D. 2013 University of Oregon.

Professor of Practice. Ed.D. 2011 Portland State University.

John Nimmo (2016) Ed.D.
Associate Professor of Education. Ed.D. 1992 University of Massachusetts, Amherst.

Amy Parker (2017) Ed.D.
Assistant Professor of Practice. Ed.D. 2009 Texas Tech University.

Professor of Education. Ed.D. 2005 Portland State University.

Melissa Pebly (2016) M.Ed.
Instructor. M.Ed. 1986 Florida Atlantic University.

Christopher Pinkney (2013) Ph.D.
Associate Professor of Education. Ph.D. 2012 University of Oregon.

Jason P. Ranker (2007) Ph.D.
Professor of Education. Ph.D. 2004 University of Iowa.

Candyce Reynolds (2008) Ph.D.
Professor of Education. Ph.D. 1985 University of Oregon.

Nicole Rigelman (2008) Ed.D.
Professor of Education. Ed.D. 2002 Portland State University.

Amanda K. Sanford (2007) Ph.D.
Associate Professor of Education. Ph.D. 2006 University of Oregon.

Samuel Sennott (2013) Ph.D.
Associate Professor of Education. Ph.D. 2013 Pennsylvania State University.

Molly Siuty (2017) Ph.D.
Assistant Professor of Education. Ph.D. 2017 University of Kansas.

Michael J. Smith (2005) Ph.D.
Associate Professor of Education. Ph.D. 2002 University of California, Los Angeles.

Shanté Stuart-McQueen (2020) Ph.D.
Assistant Professor of Education. Ph.D. 2018 University of California Los Angeles.

Yi-Wen Su (2020) Ph.D.
Assistant Professor of Education. Ph.D. 2018 University of Florida, Gainesville.

Amanda Sugimoto (2016) Ph.D.
Assistant Professor of Education. Ph.D. 2016 University of Arizona.

Yer J. Thao (2002) Ph.D.
Professor of Education. Ph.D. 2002 Claremont Graduate University.

Associate Professor of Education. Ed.D. 2000 Portland State University.

Yasin Tunç (2019) Ph.D.
Assistant Professor of Practice. 2016 University of Wisconsin-Madison.

Dilafruz R. Williams (1990) Ph.D.
Professor of Education. Ph.D. 1987 Syracuse University.

Brenna Wood (2019) Ph.D.
Assistant Professor of Practice. Ph.D. 2009 University of Arizona.

Rana Yaghmaian (2016) Ph.D.
Associate Professor of Education. 2016 University of Wisconsin Madison.

Maika Yeigh (2014) Ed.D.
Associate Professor of Education. Ed.D. 2014 Portland State University.

Emeriti Faculty

Chester Bowers (1992) Ph.D.
Professor Emeritus of Education. Ph.D. 1962 University of California.

Steve A. Brannan (1966) Ed.D.

Carol Burden (1977) Ed.D.
Associate Professor Emerita of Education. Ed.D. 1970 University of Illinois.

Patrick Burk (2009) Ph.D.
Associate Professor Emeritus of Education. Ph.D. 1978 University of Chicago.
Thomas D. Capuzzi (1978) Ph.D.  
Professor Emeritus of Education. Ph.D. 1968 Florida State University.

Micki M. Caskey (1998) Ph.D.  
Professor Emerita of Education. Ph.D. 1997 University of South Florida.

Christine Chaillé (1991) Ph.D.  
Professor Emerita of Education. Ph.D. 1977 University of California, Los Angeles.

Thomas Goodman Chenoweth (1988) Ph.D.  

David C. Cox (1984) Ph.D.  
Associate Professor Emeritus of Education. Ph.D. 1982 Ohio State University.

Colin George Dunkeld (1970) Ph.D.  

Jean P. Edwards (1968) M.S.  
Professor Emerita of Education. M.S. 1967 University of Oregon.

Robert B. Everhart (1986) Ph.D.  

Ruth A. Falco (1986) Ph.D.  
Associate Emerita Professor of Education. Ph.D. 1983 University of Oregon.

Michael A. Fiasca (1961) Ph.D.  

Ann Fullerton (1990) Ph.D.  
Professor Emerita of Education. Ph.D. 1990 Vanderbilt University.

Professor Emeritus of Education. Ph.D. 1973 University of New Mexico.

Loyde Hales (1978) Ed.D.  

Susan E. Halverson-Westerberg (1999) Ph.D.  
Associate Professor Emerita of Education. Ph.D. 1999 College of William & Mary.

Samuel Henry (1992) Ed.D.  

Randi Hitz (2006) Ph.D.  
Professor Emeritus of Education. Ph.D. 1980 Indiana State University, Terre Haute.

Eric A. Kimmel (1978) Ph.D.  

Mary Kinnick (1981) Ph.D.  
Professor Emerita of Education. Ph.D. 1975 University of Colorado, Boulder.

David A. Krug (1972) Ph.D.  

Hanoch Livneh (1988) Ph.D.  

Carol L. Mack (1986) Ph.D.  

David H. Martinez (1975) D.Ed.  
Associate Professor Emeritus of Education. D.Ed. 1973 University of Oregon.

Swapna Mukhopadhyay (2002) Ph.D.  
Professor Emerita of Education. Ph.D. 1989 Syracuse University.

Leslie J. Munson (1998) Ph.D.  
Professor Emerita of Education. Ph.D. 1996 Vanderbilt University.

Gary R. Nave (1988) Ph.D.  
Associate Professor Emeritus of Education. Ph.D. 1987 University of Oregon.

Sorca M. O’Connor (1990) Ph.D.
Associate Professor Emerita of Education. Ph.D. 1986
Stanford University.

Deborah Peterson (2011) Ed.D.
Associate Professor of Education. Ed.D. 2011 Lewis and
Clark College.

Kenneth D. Peterson (1987) Ph.D.
Professor Emeritus of Education. Ph.D. 1976 University of
California, Berkeley.

Ronald G. Petrie (1975) Ed.D.
University.

Associate Professor Emerita of Practice. Ed.D. 2004
Portland State University.

Douglas F. Sherman (1990) Ph.D.
Associate Professor Emeritus of Education. Ph.D. 1983
University of Oregon.

Donna Shrier (1994) M.A.
Professor Emerita of Education. 1979 University of
Northern Colorado.

Professor Emerita of Education. Ph.D. 1994 University of
Toronto.

Dannelle D. Stevens (1994) Ph.D.
Professor Emerita of Education. Ph.D. 1993 Michigan
State University.

Joan H. Strouse (1985) Ph.D.
Professor Emeritus of Education. Ph.D. 1985 University of
Wisconsin, Madison.

M. Carrol Tama (1984) Ph.D.
Professor Emerita of Education. Ph.D. 1982 Syracuse
University.

Helen Gordon Child Development Center
Mary Schumacher-Hoerner
Director, Helen Gordon Child Development Center.

Will Parnell (1997) Ed.D.
Professor, Curriculum and Instruction; Pedagogical
Portland State University.

Maseeh College of Engineering and Computer Science
Richard Corsi (2018) Ph.D.
Dean, Maseeh College of Engineering and Computer
Science; Professor of Civil and Electrical Engineering.
Ph.D. 1989 University of California, Davis.

Associate Dean, Maseeh College of Engineering and
Computer Science; Professor of Computer Science. Ph.D.
1988 Cornell University.

Kelly Clifton (2010) Ph.D.
Associate Dean of Research, Maseeh College of
Engineering and Computer Science; Professor of Civil and
Environmental Engineering. Ph.D. 2001 University of
Texas, Austin.

Department of Civil and Environmental Engineering
Faculty
Christopher Berger (1998) Ph.D., P.E.
Senior Research Associate in Civil and Environmental

Kelly Clifton (2010) Ph.D.
Professor of Civil and Environmental Engineering. Ph.D.
2001 University of Texas, Austin.

Richard Corsi (2018) Ph.D.
Dean, Maseeh College of Engineering and Computer
Science; Professor of Civil and Electrical Engineering.
Ph.D. 1989 University of California, Davis.

Annette Dietz (2015) Ph.D.
Instructor in Civil and Environmental Engineering. Ph.D.
2000 University of Iowa

Professor of Civil Engineering. Ph.D. 2004 University of
Nevada, Reno.

Miguel A. Figliozzi (2007) Ph.D.
Professor of Civil and Environmental Engineering. Ph.D.
2004 University of Maryland College Park.

William Fish (1998) Ph.D.
Associate Professor of Civil Engineering and
Environmental Sciences and Resources. Ph.D. 1984
Massachusetts Institute of Technology.

David A. Jay (2005) Ph.D.
Professor of Civil and Environmental Engineering. Ph.D.
1987 University of Washington.

Gwynn R. Johnson (2002) Ph.D.
Associate Professor of Civil and Environmental

Arash Khosravifar (2015) Ph.D.
Assistant Professor of Civil and Environmental
Engineering. Ph.D. 2012 University of California, Davis.

Sirisha Kothuri (2014) Ph.D.
Senior Research Associate. Ph.D. 2014 Portland State
University

Evan Kristof (2012) J.D., P.E.
Senior Instructor in Civil and Environmental Engineering.
J.D. 2010 University of San Diego School of Law.
Wentai Luo (2009) Ph.D.
Senior Research Associate in Civil and Environmental Engineering. Ph.D. 1996 Oregon Graduate Institute of Science and Engineering.

Patrick McLaughlin (2015) M.C.E., P.E., S.E.
Instructor in Civil and Environmental Engineering, M.C.E. 2013 North Carolina State University.

Chair and Professor in Civil and Environmental Engineering. Ph.D. 2001 Iowa State University.

Diane Moug (2017) Ph.D.
Assistant Professor in Civil and Environmental Engineering. Ph.D. 2017 University of California, Davis.

James Pankow (2009) Ph.D.
Professor of Civil and Environmental Engineering. Ph.D. 1979 California Institute of Technology.

Franz N. Rad (1971) Ph.D., P.E.
Professor of Civil Engineering. Ph.D. 1973 University of Texas, Austin.

Associate Professor of Civil Engineering. Ph.D. 2010 Oregon State University

Stefan Talke (2011) Ph.D.
Associate Professor in Civil and Environmental Engineering. Ph.D. 2005 University of California, Berkeley.

Mary Ann Triska (2018) M.S., P.E.
Instructor in Civil and Environmental Engineering. M.S. 2010 Oregon State University.

Avinash Unnikrishnan (2015) Ph.D.
Associate Professor of Civil and Environmental Engineering. Ph.D. 2008 University of Texas, Austin.

Scott A. Wells (1987) Ph.D., P.E.
Professor of Civil and Environmental Engineering. Ph.D. 1990 Cornell University.

Edward D. Zaron (2006) Ph.D.
Research Associate Professor in Civil and Environmental Engineering. Ph.D. 1995 Oregon State University.

Zhonglong Zhang (2018)
Research Professor in Civil and Environmental Engineering. Ph.D. 1998 Clemson University

Emeriti Faculty

H. Chik M. Erzurumlu (1962) Ph.D., P.E.
Dean Emeritus, Maseeh College of Engineering and Computer Science; Professor Emeritus of Civil Engineering. Ph.D. 1970 University of Texas, Austin.

B. Kent Lall (1977) Ph.D., P.E.

Roy Koch (1982) Ph.D.

Trevor D. Smith (1983) Ph.D., P.E.

Department of Computer Science

Faculty

Ameeta Agrawal (2020) Ph.D.
Assistant Professor of Computer Science. Ph.D. 2018 York University.

Sergio Antoy (1990) Ph.D.
Professor of Computer Science. Ph.D. 1987 University of Maryland.

Ehsan Aryafar (2017) Ph.D.
Assistant Professor of Computer Science. Ph.D. 2011 Rice University.

Professor of Computer Science. Ph.D. 2002 University of California, Los Angeles.

Katie Casamento (2019) M.S.
Senior Instructor of Computer Science. M.S. 2019 Portland State University.

David Ely (2017) Ph.D.
Senior Instructor of Computer Science. Ph.D. 2016 Ohio State University.

Karla Steinbrugge Fant (1990) M.A.

Wu-chang Feng (2004) Ph.D.
Professor of Computer Science. Ph.D. 1999 University of Michigan.

Ellie Hamon (2017) Ph.D.

Professor of Computer Science. Ph.D. 1985 Oregon State University.

Atul Ingle (2022) Ph.D.
Assistant Professor of Computer Science. Ph.D. 2015 University of Wisconsin, Madison.
Bruce Irvin (2019) Ph.D.
Senior Instructor of Computer Science. Ph.D. 1995
University of Wisconsin, Madison.

Mark Jones (2005) D.Phil.
Chair, Department of Computer Science; Professor of

Karen Karavanic (2000) Ph.D.
Professor of Computer Science. Ph.D. 2000 University of
Wisconsin, Madison.

Jingke Li (1990) Ph.D.
Associate Professor of Computer Science. Ph.D. 1990 Yale
University.

Feng Liu (2010) Ph.D.
Associate Professor of Computer Science. Ph.D. 2010
University of Wisconsin, Madison.

David Lu (2015) M.Phil.
Instructor of Computer Science. M.Phil. 2013 Syracuse
University.

David Maier (2004) Ph.D.
Maseeh Professor of Computer Science. Ph.D. 1978
Princeton University.

Bart Massey (1998) Ph.D.
Associate Professor of Computer Science. Ph.D. 1999
University of Oregon.

Professor of Computer Science. Ph.D. 1990 University of
Michigan.

Sarah Mocas (2018) Ph.D.
Senior Instructor of Computer Science. Ph.D. 1993
Northeastern University.

Mark Morrissey (2011) M.S.
Senior Instructor of Computer Science. M.S. 1997 Oregon
Graduate Institute.

Caterina Paun (2019) M.S.
Instructor of Computer Science. M.S. 2019 Portland State
University.

Banafsheh Rekabdar (2021) Ph.D.
Assistant Professor of Computer Science. Ph.D. 2017
University of Nevada, Reno.

Anthony Rhodes (2018) Ph.D.
Instructor of Computer Science. Ph.D. 2018 Portland State
University.

Suresh Singh (2000) Ph.D.
Professor of Computer Science. Ph.D. 1990 University of
Massachusetts.

Fang Song (2016) Ph.D.
Assistant Professor of Computer Science. Ph.D. 2013
Pennsylvania State University.

Andrew Tolmach (1992) Ph.D.
Professor of Computer Science. Ph.D. 1992 Princeton
University.

Kristin Tufte (2004) Ph.D.
Assistant Research Professor. Ph.D. 2005 University of
Wisconsin, Madison.

Charles Wright (2012) Ph.D.
Associate Professor of Computer Science. Ph.D. 2008
Johns Hopkins University.

Fei Xie (2004) Ph.D.
Professor of Computer Science. Ph.D. 2004 University of
Texas at Austin.

Emeriti Faculty

Maria Edith Balogh (1964) Ph.D.
Professor Emerita of Computer Science. Ph.D. 1965
Oregon State University.

Professor Emeritus of Computer Science. D.Phil. 1984
University of Oxford.

Cynthia Brown (1998) Ph.D.
Professor Emerita of Computer Science. Ph.D. 1977
University of Michigan.

Professor Emerita of Computer Science. Ph.D. 1982
University of Louisiana at Lafayette.

Professor Emeritus of Computer Science. Ph.D. 1971
University of Washington.

James L. Hein (1976) Ph.D.
Professor Emeritus of Computer Science. Ph.D. 1973
Northwestern University.

Leonard Shapiro (1987) Ph.D.
Professor Emeritus of Computer Science. Ph.D. 1969 Yale
University.

Professor Emeritus of Computer Science. Ph.D. 1985
University of Massachusetts at Amherst.

Bryant York (2001) Ph.D.
University of Massachusetts at Amherst.

Department of Electrical and Computer Engineering
Faculty

John Acken (2015) Ph.D.
Adjunct Research Associate Professor of Electrical and
Robert Bass, III (2017) Ph.D.
Associate Professor of Electrical and Computer Engineering. Ph.D. 2004 University of Virginia.

Associate Professor of Electrical and Computer Engineering. Ph.D. 2007 University of Wisconsin, Madison.

Richard Campbell (2019) Ph.D.
Professor of Electrical and Computer Engineering. Ph.D. 1984 University of Washington, Seattle.

Malgorzata Chrzanowska-Jeske (1989) Ph.D.

Donald Duncan (2010) Ph.D.
Research Professor of Electrical and Computer Engineering. Ph.D. 1977 Ohio State University.

Mark Faust (2004) MSEE

Garrison Greenwood (2000) Ph.D.
Associate Professor of Electrical and Computer Engineering. Ph.D. 1992 University of Washington.

Douglas V. Hall (1990) Ph.D.
Associate Professor of Electrical and Computer Engineering; Emeritus. Ph.D. 1995 Portland State University.

Melinda Holtzman (2017) Ph.D.

Roy Kravitz (2017) M.S.
Westside Program Director for Electrical and Computer Engineering. M.S. 1977 University of Illinois, Urbana.

Hong Lei (2018) Ph.D.
Assistant Professor of Electrical and Computer Engineering Ph.D. 2015 Michigan State University, East Lansing

Fu Li (1990) Ph.D., P.E.
Professor of Electrical and Computer Engineering. Ph.D. 1990 University of Rhode Island.

John Lipor (2018) Ph.D.
Assistant Professor of Electrical and Computer Engineering. Ph.D. 2017 University of Michigan.

Herb Mayer (2014) Ph.D.
Instructor of Electrical and Computer Engineering. Ph.D. 1996 Technical University of Berlin, Germany.

James McNames (1999) Ph.D.
Chair, Department of Electrical and Computer Engineering; Professor of Electrical and Computer Engineering. Ph.D. 1999 Stanford University.

Branimir Pejcinovic (1992) Ph.D.
Professor of Electrical and Computer Engineering. Ph.D. 1990 University of Massachusetts.

Marek A. Perkowski (1983) Ph.D.
Professor of Electrical and Computer Engineering. Ph.D. 1980 Technical University of Warsaw (Poland).

Daniel Rouseff (2012) Ph.D.

Tom Schubert (2014) Ph.D.

Glenn Shirley (2009) Ph.D.

Martin Siderius (2016) Ph.D.

Xiaoyu Song (1998) Ph.D.
Professor of Electrical and Computer Engineering. Ph.D. 1991 University of Pisa (Italy).

Professor of Electrical and Computer Engineering. D.Sc. 1980 Washington University, St. Louis.

Ivan Sutherland (2009) Ph.D.

Christof Teuscher (2018) Ph.D.
Professor of Electrical & Computer Engineering Ph.D. 2004 Swiss Federal Institute of Technology, Switzerland.

Associate Professor of Electrical and Computer Engineering. Ph.D. 1988 Virginia Polytechnic Institute and State University.

Eric Wan (2012) Ph.D.
Research Associate Professor of Electrical and Computer Engineering. Ph.D. 1994 Stanford University.

Emeriti Faculty

Lee W. Casperson (1983) Ph.D.

W. Robert Daesch (2017) Ph.D.
Dan Hammerstrom (2019) Ph.D.
Professor Emeritus of Electrical and Computer Engineering. Ph.D. 1977 University of Illinois at Urbana-Champaign.

George G. Lendaris (1970) Ph.D.
Professor of Systems Science. Professor of Electrical and Computer Engineering. Ph.D. 1961 University of California, Berkeley.

James E. Morris (2016) Ph.D.
Professor Emeritus of Electrical and Computer Engineering. Ph.D. 1971 University of Saskatchewan, Canada.

Jack C. Riley (1962) M.S., P.E.
Associate Professor Emeritus of Electrical and Computer Engineering. M.S. 1950 Oregon State University; Post Graduate 1951 Harvard University.

Rolf Schaumann (1988) Ph.D.

Lisa M. Zurk (2018) Ph.D.

Department of Engineering and Technology Management

Faculty

Chair, Department of Engineering and Technology Management; Associate Professor of Engineering and Technology Management. Ph.D. 1995 Georgia Institute of Technology.

Tugrul Daim (1997) Ph.D.
Professor of Engineering and Technology Management. Ph.D. 1997 Portland State University.

Antonie Jetter (2005) Ph.D.
Professor of Engineering and Technology Management. Ph.D. 2004 Aachen University.

Dundar F. Kocaoglu (1987) Ph.D.

Associate Professor of Engineering and Technology Management. Ph.D. 2003 Massachusetts Institute of Technology.

Department of Mechanical and Materials Engineering Faculty

Raul Cal (2009) Ph.D.
Associate Professor of Mechanical Engineering. Ph.D. 2006 Rensselaer Polytechnic Institute.

Zhiqiang (Tony) Chen (2009) Ph.D.
Research Associate Professor of Mechanical Engineering; Manager of CEMN. Ph.D. 2001 University of Birmingham, UK.

Faryar Etesami (1987) Ph.D., P.E.
Associate Professor of Mechanical Engineering. Ph.D. 1984 University of Wisconsin.

Elliott Gall (2016) Ph.D.
Assistant Professor of Mechanical Engineering. Ph.D. 2013 The University of Texas at Austin.

Alex Hunt (2016) Ph.D.
Assistant Professor of Mechanical Engineering. Ph.D. 2016 Case Western Reserve University.

Evan Thomas (2010) Ph.D., PE
Associate Professor of Mechanical Engineering. Ph.D. 2009 University of Colorado, Boulder.

Derek Treheway (2004) Ph.D.
Associate Professor of Mechanical Engineering. Ph.D. 2000 University of California, Santa Barbara.

David A. Turcic (1997) Ph.D.
Associate Professor of Mechanical Engineering. Ph.D. 1982 Pennsylvania State University.

Mark Weislogel (2001) Ph.D.
Professor of Mechanical Engineering. Ph.D. 1996 Northwestern University.

Sung Yi (2001) Ph.D.
Chair, Department of Mechanical & Materials
Engineering; Professor of Mechanical Engineering. Ph.D. 1992 University of Illinois, Urbana-Champaign.

Emeriti Faculty

David A. Jannsen (1956) B.S. Associate Professor Emeritus of Mechanical Engineering. B.S. 1950 Oregon State University.

Associated Faculty

College of Liberal Arts and Sciences

Todd Rosenstiel (2004) Ph.D. Dean, College of Liberal Arts and Sciences; Professor of Biology. Ph.D. 2004 University of Colorado.

DeLys Ostlund (1991) Ph.D. Associate Dean for Faculty, College of Liberal Arts and Sciences; Professor of Spanish. Ph.D. 1993 University of Maryland, College Park.

Matthew J. Carlson (1996) Ph.D. Associate Dean for Undergraduate Programs, College of Liberal Arts and Sciences; Professor of Sociology. Ph.D. 1996 University of Texas-Austin.

Suzanne Estes (2005) Ph.D. Interim Associate Dean for Undergraduate Engagement; Associate Professor of Biology. Ph.D. 2002 University of Oregon.

Heejun Chang (2001) Ph.D. Interim Associate Dean for Research & Graduate Programs; Professor of Geography. Ph.D. 2001 Pennsylvania State University.

Department of Anthropology

Faculty

Charles H. Klein (2012) Ph.D. Chair, Department of Anthropology; Associate Professor of Anthropology. Ph.D. 1996 University of Michigan.

Emeriti Faculty

Marc R. Feldesman (1971) Ph.D.
Chair Emeritus, Department of Anthropology; Professor Emeritus of Anthropology. Ph.D. 1974 University of Oregon.

Jacob Fried (1965) Ph.D.
Professor Emeritus of Anthropology. Ph.D. 1952 Yale University.

Associated Faculty

Jennifer Aengst (2008) Ph.D.
Adjunct Assistant Professor. Ph.D. 2011 University of California - Davis.

Kate Barcalow (2020) M.A., J.D.

Thomas Jay Brown (2020) M.A.
Adjunct Instructor. M.A. 2016 Portland State University.

Melanie Chang (2014) Ph.D.
Adjunct Assistant Professor. Ph.D. 2005 University of Pennsylvania.

Robert David (2020) Ph.D.
Adjunct Assistant Professor. Ph.D. 2012 University of California - Berkeley.

Research Associate Professor of Anthropology. Ph.D. 2000 Louisiana State University.

Zbigniew Grabowski (2020) Ph.D.
Adjunct Instructor. Ph.D. 2018 Portland State University.

Michael Kilman (2020) M.S.
Adjunct Instructor. M.S. 2014 Portland State University.

David Lewis (2019) Ph.D.
Adjunct Assistant Professor. Ph.D. 2009 University of Oregon.

David Moore (2000) M.A.
Adjunct Instructor. M.A. 1994 Portland State University.

Reno Nims (2020) M.S.
Adjunct Instructor. M.S. 2016 Portland State University.

Aimee Potter (2012) Ph.D.
Adjunct Assistant Professor. Ph.D. 2004 University of Oregon.

Cameron McPherson Smith (2004) Ph.D.
Adjunct Assistant Professor. Ph.D. 2004 Simon Fraser University.

Sarah Sterling (2005) Ph.D.
Adjunct Professor. Ph.D. 2004 University of Washington.

Steven Thomson (2020) Ph.D.
Adjunct Assistant Professor. Ph.D. 2005 Boston University.

Xia Zhang (2017) Ph.D.
Adjunct Assistant Professor. Ph.D. 2011 University of Pittsburgh.

Department of Applied Linguistics

Faculty

Nike Arnold (2008) Ph.D.
Professor of Applied Linguistics. Ph.D. 2002 University of Texas at Austin.

Kimberley A. Brown (1989) Ph.D.

Susan M. Conrad (2001) Ph.D.

Janet Cowal (1994) M.A.

Alissa Hartig (2014), Ph.D.
Associate Professor of Applied Linguistics, Ph.D. 2014 Pennsylvania State University.

Kathryn Harris (1994) Ph.D.
Assistant Professor of Applied Linguistics. Ph.D. 1995 Northwestern University.

Jenny Mittelstaedt (2006) Ph.D.

Lynn Santelmann (1998) Ph.D.
Chair and Associate Professor of Applied Linguistics. Ph.D. 1995 Cornell University.

Tanya Sydorenko (2011) Ph.D.
Associate Professor of Applied Linguistics. Ph.D. 2011 Michigan State University.

Emeriti Faculty

G. Tucker Childs (1996) Ph.D.

Jeanette S. DeCarrico (1977) Ph.D

Thomas G. Dieterich (1979) Ph.D.

Brian K. Lynch (2001) Ph.D.
Beatrice Oshika (1989) Ph.D.
Professor Emerita of Applied Linguistics. Ph.D. 1973
University of Michigan.

Stephen Reder (1995) Ph.D.
University Professor Emeritus. Ph.D. 1977 Rockefeller
University.

Marjorie Terdal (1977) Ph.D.
Professor Emerita of Applied Linguistics. Ph.D. 1985
University of Oregon.

Keith Walters (2006) Ph.D.
University of Texas at Austin.

Department of Biology

Faculty

Daniel J. Ballhorn (2011) Ph.D.
Professor of Biology. Ph.D. 2006 University of Hamburg.

Michael S. Bartlett (2002) Ph.D.
Associate Professor of Biology. Ph.D. 1997 University of
Wisconsin, Madison.

Associate Professor of Biology. Ph.D. 2004 Washington
State University.

Bradley A. Buckley (2006) Ph.D.
Associate Professor of Biology. Ph.D. 2003 Arizona State
University.

Justin Courcelle (2005) Ph.D.
Professor of Biology. Ph.D. 1999 Stanford University.

Professor of Biology. Ph.D. 1989 State University of New
York at Stony Brook.

Deborah A. Duffield (1978) Ph.D.
Professor of Biology. Ph.D. 1976 University of California,
Los Angeles.

Sarah Eppley (2005) Ph.D.
Professor of Biology. Ph.D. 2000 University of California,
Davis.

Suzanne Estes (2005) Ph.D.
Associate Professor of Biology. Ph.D. 2002 University of
Oregon.

Deborah I. Lutterschmidt (2010) Ph.D.
Associate Professor of Biology. Ph.D. 2006 Oregon State
University.

Susan Masta (2002) Ph.D.
Associate Professor of Biology. Ph.D. 1999 University of
Arizona.

Michael T. Murphy (2000) Ph.D.
Professor of Biology. Ph.D. University of Kansas.

Brooke A. Napier (2017) Ph.D.
Assistant Professor of Biology. Ph.D. 2013 Emory
University.

Jason Podrabsky (2003) Ph.D.
Professor of Biology. Ph.D. 1999 University of Colorado,
Boulder.

Rahul Raghavan (2012) Ph.D.
Associate Professor of Biology. Ph.D. 2008 University of
Montana.

Anna-Louise Reysenbach (1999) Ph.D.
Professor of Biology. Ph.D. 1987 University of Cape
Town.

Todd Rosenstiel (2006) Ph.D.
Professor of Biology. Ph.D. 2004 University of Colorado.

Luis A. Ruedas (2001) Ph.D.
Professor of Biology. Ph.D. 1992 Texas A&M University.

Erin E. Shortlidge (2015) Ph.D.
Associate Professor of Biology. Ph.D. 2014 Portland State
University

Jeffrey D. Singer (2011) Ph.D.
Professor of Biology. Ph.D. 1995 University of Utah
School of Medicine.

Kenneth M. Stedman (2001) Ph.D.
Professor of Biology. Ph.D. 1996 University of California,
Berkeley.

Emeriti Faculty

Clyde L. Calvin (1968) Ph.D.
Professor Emeritus of Biology. Ph.D. 1966 University of
California, Davis.

Larry I. Crawshaw (1976) Ph.D.
Professor Emeritus of Biology. Ph.D. 1970 University of
California, Santa Barbara.

Stanley S. Hillman (1977) Ph.D.
Professor Emeritus of Biology. Ph.D. 1976 University of
California, Los Angeles.

Malcom S. Lea (1965) Ph.D.
Professor Emeritus of Biology. Ph.D. 1964 Northwestern
University.

Byron E. Lippert (1960) Ph.D.
Professor Emeritus of Biology. Ph.D. 1966 Indiana
University.

Professor Emeritus of Biology. Ph.D. 1964 California
Institute of Technology.

Lester J. Newman (1964) Ph.D.
Professor Emeritus of Biology. Ph.D. 1963 Washington
University.

Leonard Simpson (1968) Ph.D.
Professor Emeritus of Biology. Ph.D. 1968 University of California, Berkeley.

Mary L. Taylor (1962) Ph.D.
Professor Emerita of Biology. Ph.D. 1959 University of Illinois.

W. Herman Taylor Jr. (1961) Ph.D.
Professor Emeritus of Biology. Ph.D. 1959 University of Illinois.

Robert Owen Tinnin (1969) Ph.D.
Professor Emeritus of Biology. Ph.D. 1959 University of California, Santa Barbara.

Randy D. Zelick (1986) Ph.D.

Department of Black Studies

Faculty
Pedro Ferbel-Azcarate (1998) Ph.D.
Assistant Professor of Black Studies. Ph.D. 1995 University of Minnesota.

Ethan Johnson (2005) Ph.D.
Professor of Black Studies. Ph.D. 2005 University of California, Berkeley.

Walidah Imarisha (2009) MFA.
Assistant Professor of Black Studies; Director of the Center for Black Studies. MFA. 2009 Goddard College.

Emeriti Faculty
Kofi Agorsah (1992) Ph.D.

Department of Chemistry

Faculty
Dean B. Atkinson (1997) Ph.D.
Associate Professor of Chemistry. Ph.D. 1995 University of Arizona.

Professor of Chemistry. Ph.D. 2007 University of Colorado, Boulder.

Albert S. Benight (2003) Ph.D.
Professor of Chemistry and Physics. Ph.D. 1983 Georgia Institute of Technology.

Tami Lasseter Clare (2008) Ph.D.
Associate Professor of Chemistry. Ph.D. 2005 University of Wisconsin.

Andrea Goforth (2008) Ph.D
Associate Professor of Chemistry. Ph.D. 2005 University of South Carolina.

Dirk Iwata-Reuyl (1994) Ph.D.

Theresa McCormick (2013) Ph.D.
Associate Professor of Chemistry. Ph.D. 2008 Queen's University, Kingston, Ontario, Canada.

John Perona (2011) Ph.D.
Professor of Chemistry. Ph.D. 1989 Yale University.

David H. Peyton (1987) Ph.D.
Professor of Chemistry. Ph.D. 1983 University of California, Santa Barbara.

Shankar B. Rananavare (1996) Ph.D.
Research Associate Professor of Chemistry. Ph.D. 1983 University of Missouri, St. Louis.

Steve Reichow (2014) Ph.D.
Associate Professor of Chemistry. Ph.D. 2006 University of Washington.

Kevin A. Reynolds (2005) Ph.D.

Gwendolyn P. Shusterman (1989) Ph.D.
Professor of Chemistry. Ph.D. 1983 University of California, Berkeley.

Professor of Chemistry. Ph.D. 1995 University of Pennsylvania.

David Stuart (2012) Ph.D.
Associate Professor of Chemistry. Ph.D. 2010 University of Ottawa, Canada.

Mark Woods (2008) Ph.D.

Emeriti Faculty
Gary L. Gard (1966) Ph.D.

Thomas M. Hard (1977) Ph.D.
Fellow in Chemistry. Ph.D. 1965 University of Wisconsin.

Gordon L. Kilgour (1968) Ph.D.

David W. McClure (1966) Ph.D.

Robert J. O’Brien (1973) Ph.D.

Carl C. Wamser (1983) Ph.D.

**Chicano/Latino Studies**

**Emeriti Faculty**

Roberto M. de Anda (2002) Ph.D.

**Faculty**

Cristina Herrera (2021) Ph.D.
Director, Chicano/Latino Studies and Professor of Chicano/Latino Studies. Ph.D. 2008 Claremont Graduate University.

Melissa Patino-Vega (2019) Ph.D.
Assistant Professor of Chicano/Latino Studies & World Languages and Literatures. 2019 University of California, Davis.

**Department of Communication**

**Faculty**

Kenneth Bagley (2005) Ph.D.
Assistant Professor. Ph.D. 1991 University of Oregon.

Cynthia Lou Coleman (2001) Ph.D.
Professor of Communication. Ph.D. 1994 University of Wisconsin, Madison.

Tanner Cooke (2020) Ph.D.

Lauren Frank (2011) Ph.D.
Associate Professor of Communication. Ph.D. 2011 University of Southern California.

L. David Ritchie (1990) Ph.D.

Jeffrey Robinson (2009) Ph.D.
Professor of Communication. Ph.D. 1999 University of California, Los Angeles.

Scott Selberg (2020) Ph.D.

Lee Shaker (2011) Ph.D.
Associate Professor of Communication. Ph.D. 2008 University of Pennsylvania.

Brianne Sullovsky (2017) Ph.D.
Assistant Professor of Communication. Ph.D. 2016 University of Maine.

Gisele Tierney (1991) M.S.
Senior Instructor in Communication. M.S. 1986 Portland State University.

**Emeriti Faculty**

Leslie T. Good (1989) Ph.D.
Associate Professor Emerita of Communication. Ph.D. 1986 Stanford University.

Theodore G. Grove (1970) Ph.D.

Stephen A. Kosokoff (1966) Ph.D.

Susan B. Poulsen (1990) Ph.D.

Larry Steward (1967) Ph.D.

**Conflict Resolution Program**

**Faculty**

Harry Anastasiou (2002) Ph.D.
Professor, Ph.D. 2001 The Union Institute and University.

Associate Professor, Conflict Resolution Program. Ed.D. 2011 Portland State University.

Rachel Halfrida Cunliffe (2008) Ph.D.
Assistant Professor, Conflict Resolution Program. Ph.D. 2001 University of Arizona.

Robert J. Gould (1992) Ph.D.
Assistant Professor, Conflict Resolution Program. Ph.D. 1993 University of Oregon.

Associate Professor, Conflict Resolution Program. Ed.D. 2011 Portland State University.

Vandy Kanyako (2013) Ph.D.
Associate Professor, Conflict Resolution Program. Ph.D. 2010 George Mason University.

Barbara Tint (1999) Ph.D.
Professor, Conflict Resolution Program. Ph.D. 2003 University of Melbourne.

**Department of English**

**Faculty**

Diana Abu-Jaber (1996) Ph.D.
Professor of English. Ph.D. 1986 State University of New York, Binghamton.

John Beer (2011) M.F.A.
Associate Professor of English. M.F.A. 1996 University of Iowa.

Keri Sanburn Behre (2018) Ph.D.

Kathi Inman Berens (2015) Ph.D.
Associate Professor of English. Ph.D. 1999 University of California at Berkeley.

Joel Bettridge (2006) Ph.D.
Professor of English. Ph.D. 2002 State University of New York, Buffalo.

Elisabeth A. Ceppi (2000) Ph.D.
Professor of English. Ph.D. 2000 University of Chicago.

Michael Clark (1999) Ph.D., J.D.

Paul Collins (2006) Ph.D.
Professor of English. Ph.D. 2016 City University of New York Graduate Center.

Kathryn Comer (2017) Ph.D.
Director of Composition, Associate Professor of English. Ph.D. 2011 Ohio State University.

Robyn Crummer-Olson (2020) M.A.
Publisher, Ooligan Press. M.A. 2011 Portland State University.

Dan DeWeese (2003) M.A.
Instructor of English, Director of the Writing Center. M.A. 2003 Portland State University.

W. Tracy Dillon (1993) Ph.D.
Professor of English. Ph.D. 1988 University of California, Riverside.

Joshua Epstein (2014) Ph.D.
Associate Professor of English, Ph.D. 2008 Vanderbilt University.

Thomas Fisher (2002) Ph.D.
Professor of English. Ph.D. 2000 State University of New York, Buffalo.

Michele Glazer (2003) M.F.A.
Professor of English. Writing. M.F.A. 1986 University of Iowa.

Maude Hines (2000) Ph.D.

Alistair Hunt (2009) Ph.D.
Associate Professor of English. Ph.D. 2009 University of Wisconsin-Madison.

Susan Kirtley (2011) Ph.D.
Professor of English. Ph.D. 2002 University of Massachusetts, Amherst.

William Knight (2011) Ph.D.
Associate Professor of English. Ph.D. 2009 Duke University.

Janice Lee (2017) M.F.A.
Assistant Professor of English. M.F.A. 2008 California Institute of the Arts.

Bishupal Limbu (2010) Ph.D.
Associate Chair, Associate Professor of English. Ph.D. 2010 Northwestern University.

Sarah Lincoln (2010) Ph.D.
Director of Literary Studies, Associate Professor of English. Ph.D. 2008 Duke University.

Marie Lo (2001) Ph.D.
Chair, Professor of English. Ph.D. 2001 University of California, Berkeley.

Hildy Miller (2000) Ph.D.
Professor of English. Ph.D. 1990 University of Minnesota.

Anoop Mirpuri (2012) Ph.D.
Associate Professor of English. Ph.D. 2010 University of Washington.

Rachel Noorda (2017) Ph.D.
Director of Publishing, Assistant Professor of English. Ph.D. 2016 University of Stirling.

Sarah Read (2017) Ph.D.
Director of Professional & Technical Writing, Associate Professor of English. Ph.D. 2011 University of Washington.

Susan Reese (1991) M.F.A.
Assistant Professor of English. M.F.A. 2006 Pacific University.

John V. Smyth (1998) Ph.D.

Gabriel Urza (2016) M.F.A., J.D.
Assistant Professor of English. J.D. 2004 University of Notre Dame, M.F.A 2012 Ohio State University.

Professor of English. Ph.D. 2004 University of Illinois, Chicago.

Anthony W. Wolk (1965) Ph.D.
Professor of English. Ph.D. 1965 University of Nebraska.

Helen Zumas (2011) M.F.A.
Director of Creative Writing, Professor of English. M.F.A. 2004 University of Massachusetts, Amherst.

Emeriti Faculty
Jacqueline Arante (1981) M.A.
Thomas C. Buell (1965) Ph.D.

Marjorie J. Burns (1972) Ph.D.

Peter Carafiol (1984) Ph.D.

Henry Carlile (1967) M.A.

Nathan Cogan (1976) Ph.D.

John R. Cooper (1970) Ph.D.

Georgia R. Crampton (1972) Ph.D.

Susan Danielson (1974) Ph.D.

Maria Depriest (1996) Ph.D.
Associate Professor of English/Native American Studies. Ph.D. 1991 University of Oregon.

Thomas Doulis (1972) M.A.

Carol J. Fokine (1984) M.A.
Senior Instructor Emerita in English. M.A. 1983 Portland State University.

Gregory F. Goekjian (1970) Ph.D.

Michael A. Hollister (1966) Ph.D.

David Arthur Holloway (1969) Ph.D.
Associate Professor Emeritus of English. Ph.D. 1975 University of Chicago.

Greg Jacob (1994) Ph.D.

Elaine E. Limbaugh (1970) M.A.
Professor of English. M.A. 1969 University of Nebraska.

Ray P. Mariels (1967) Ph.D.

Michael McGregor (2001) M.F.A.

Associate Professor Emerita of English. Ph.D. 1996 University of Oregon.

Shelley C. Reece (1969) Ph.D.
Professor Emeritus of English. Ph.D. 167 University of Nebraska.

Christine M. Rose (1989) Ph.D.

Mary Seitz (1981) M.A.

Professor Emeritus of English.

Dennis Stovall (2000).
Assistant Professor Emeritus of English B.A. 1968 University of Oregon.

Christine Thompson (1964) Ph.D.

**Department of Environmental Science and Management**

**Faculty**

Sarah Carvill (2019) Ph.D.
Instructor. Ph.D. 2015 University of California, Santa Cruz.

Catherine de Rivera (2005) Ph.D.
Professor of Environmental Science. Ph.D. 1999 University of California, San Diego.

Senior Instructor I, Ph.D. 2014 Portland State University.

William Fish (1998) Ph.D.
Associate Professor of Civil Engineering and Environmental Science. Ph.D. 1984 Massachusetts Institute of Technology.

Linda George (2002) Ph.D.
Professor of Environmental Science. Ph.D. 1991 Portland State University.

Jeffrey Gerwing (2002) Ph.D.
Associate Professor of Environmental Science. Ph.D. 2001 Pennsylvania State University.
Kelly Gleason (2018) Ph.D.
Assistant Professor of Environmental Science. Ph.D. 2015 Oregon State University.

Elise Granek (2006) Ph.D.
Professor of Environmental Science. Ph.D. 2006 Oregon State University.

Melissa Haefner (2017) Ph.D.
Assistant Professor of Environmental Science. Ph.D. 2015 Colorado State University.

Amy Larson (2008) Ph.D.
Senior Instructor II, Ph.D. 2007. University of California at Davis & San Diego State University.

Jennifer Morse (2013) Ph.D.
Associate Professor of Environmental Science. Ph.D. 2010 Duke University.

Max Nielsen-Pincus (2013) Ph.D.
Associate Professor of Environmental Science. Ph.D. 2007 University of Idaho.

Yangdong Pan (1996) Ph.D.
Professor of Environmental Science. Ph.D. 1993 Bowling Green State University.

Arick Rouhe (2018) Ph.D.
Instructor. Ph.D. 2018 Portland State University.

Brian Turner (2020) Ph.D.
Instructor. Ph.D. 2017 Portland State University.

Associated Faculty

Eugene Foster (1996) Ph.D.
Adjunct Assistant Professor Environmental Science. Ph.D. 1996 Oregon State University.

Gregory M. Ruiz (2005) Ph.D.

Emeriti Faculty

Marion Dresner (1995) Ph.D.

David E. Ervin (1999) Ph.D.
Professor Emeritus of Environmental Management; Ph.D. 1974 Oregon State University.

Richard R. Petersen (1970) Ph.D.

John G. Ruetter, Jr. (1979) Ph.D.
Professor of Environmental Science. Ph.D. 1979 Massachusetts Institute of Technology.

Mark D. Sytsma (1998) Ph.D.
Professor of Environmental Science. Ph.D. 1992 University of California, Davis.

Department of Geography

Associated Faculty

Michael C. Houck
M.S.T. Biology, Portland State University, 1972.

Nathan McClintock
Ph.D. Geography, University of California, Berkeley, 2011.

Rebecca McLain

Scott Nowicki

Tim Palmer

Pronoy Rai
Ph.D. Geography, University of Illinois at Urbana-Champaign, 2018.

Colin Thorne

Faculty

Idowu (Jola) Ajibade (2017) Ph.D.
Assistant Professor of Geography. Ph.D. 2013 Western University - Canada.

Sona Andrews (2010) PhD.
Professor of Geography. Ph.D. 1981 Arizona State University.

David Banis (2004) M.S.
GIS Lab Manager and Instructor. M.S. 2004 Portland State University.

Alida Cantor (2017) Ph.D.
Assistant Professor of Geography. Ph.D. 2016 Clark University.

Heejun Chang (2001) Ph.D.
Professor of Geography. Ph.D. 2001 Pennsylvania State University.

Jiunn-Der (Geoffrey) Duh (2004) Ph.D.
Associate Professor of Geography. Ph.D. 2004 University of Michigan.

Chris Grant (2018) Ph.D.
Senior Instructor I. Ph.D. 1995 University of Oregon.
Andrés Holz (2013) Ph.D.
Associate Professor of Geography. Ph.D. 2009 University of Colorado, Boulder.

Nancy Hunter (2016) Ph.D.
Research Assistant Professor and Director of the Center for Geography Education in Oregon. Ph.D. 2016 Portland State University.

Martin Lafrenz (2005) Ph.D.
Chair, Department of Geography
Associate Professor of Geography. Ph.D. 2005 University of Tennessee.

Paul Loikith (2012) Ph.D.
Associate Professor of Geography. Ph.D. 2012 Rutgers University, New Brunswick, New Jersey.

Melissa Lucash (2005) Ph.D.
Research Assistant Professor of Geography. Ph.D. 2005 The State University of New York.

Andrew Martin (2019) Ph.D.
Research Assistant Professor of Geography. Ph.D. 2012 Florida State University.

Hunter Shobe (2005) Ph.D.
Associate Professor of Geography. Ph.D. 2005 University of Oregon.

Martin Swobodzinski (2014) Ph.D.
Assistant Professor of Geography. Ph.D. 2012 San Diego State University and University of California, Santa Barbara.

Emeriti Faculty

Barbara Brower (1994) Ph.D.

Teresa L. Bulman (1990) Ph.D.
Professor Emeritus of Geography. Ph.D. 1990 University of California, Davis.

Andrew G. Fountain (1998) Ph.D.

Daniel M. Johnson (1977) Ph.D.

D. Richard Lycan (1970) Ph.D.

Joseph Poracsky (1982) Ph.D.
Professor Emeritus of Geography. Ph.D. 1984 University of Kansas.

Larry W. Price (1968) Ph.D.

Martha A. Works (1985) Ph.D.

Department of Geology

Faculty

John Bershaw (2014) Ph.D.
Associate Professor of Geology. Ph.D. 2011 University of Rochester.

Adam M. Booth (2013) Ph.D.
Associate Professor of Geology. Ph.D. 2012 University of Oregon.

Richard C. Hugo (2001) Ph.D.
Research Assistant Professor of Geology. Ph.D. 1999 Washington State University.

David Percy (1998) B.S.
Research Assistant. B.S. 1999 Portland State University.

Assistant Professor of Geology. Ph.D. 2000 Portland State University.

Alex Ruzicka (2000) Ph.D.
Associate Professor of Geology. Ph.D. 1996 University of Arizona.

Martin J. Streck (1999) Ph.D.
Chair, Professor of Geology. Ph.D. 1994 Oregon State University.

Ashley Streig (2015) Ph.D.
Assistant Professor of Geology. Ph.D. 2014 University of Oregon.

Emeriti Faculty

Scott F. Burns (1990) Ph.D.

Sherry L. Cady (1998) Ph.D.
Professor Emerita of Geology. Ph.D. 1994 University of California, Berkeley.

Kenneth M. Cruikshank (1994) Ph.D.
Professor Emeritus of Geology. Ph.D. 1991 Purdue University.

Michael L. Cummings (1978) Ph.D.

Andrew G. Fountain (1998) Ph.D.

Paul E. Hammond (1963) Ph.D.
Ansel G. Johnson (1973) Ph.D. 

Curt D. Peterson (1989) Ph.D. 

Richard E. Thoms (1964) Ph.D. 
Professor Emeritus of Geology. Ph.D. 1965 University of California, Berkeley.

Associated Faculty
Adjunct Professor of Geology, M.A.T. Western Oregon University.

Adjunct Professor of Geology, Ph.D. 2012 Portland State University.

Jonathan Fink (2010) Ph.D. 
Adjunct Professor of Geology, Ph.D. 1979 Stanford University.

Frank Granshaw (2004) Ph.D. 
Adjunct Professor of Geology, Ph.D. 2011 Portland State University.

Melinda Hutson (2000) Ph.D. 
Adjunct Professor of Geology, Ph.D. 1996 University of Arizona.

Megan Faust (2013) M.S. 
Adjunct Professor of Geology. M.S. University of Vermont.

William Orr (1968) Ph.D. 
Adjunct Professor of Geology. Ph.D. 1968 Michigan State University.

Adjunct Research Professor in Geology. M.S.T. 1970 Portland State University.

Erik Shafer (2017) M.S. 
Adjunct Professor of Geology. M.S. Portland State University.

Barry Walker (2014) Ph.D. 
Adjunct Professor of Geology. Ph.D. 2011 Oregon State University.

Richard Beyler (1998) Ph.D. 
Professor of History. Ph.D. 1994 Harvard University.

Joseph E. Bohling (2014) Ph.D. 
Associate Professor of History. Ph.D. 2012 University of California at Berkeley.

David P. Del Mar (2002) Ph.D. 
Professor of History. Ph.D. 1993 University of Oregon.

Tim Alan Garrison (1997) Ph.D., J.D. 
Professor of History. Ph.D. 1997 University of Kentucky; J.D. 1986 University of Georgia.

James P. Grehan (2005) Ph.D. 
Professor of History. Ph.D. 1999 University of Texas at Austin.

David A. Horowitz (1968) Ph.D. 
Professor of History. Ph.D. 1971 University of Minnesota.

Chia Yin Hsu (2008) Ph.D. 
Associate Professor of History. Ph.D. 2006 New York University.

Assistant Professor of History. Ph.D. 2002 University of Arizona.

Rodney B. Koeneke (1997) Ph.D. 
Assistant Professor of History. Ph.D. 1997 Stanford University.

Thomas M. Luckett (1992) Ph.D. 

Catherine McNeur (2013) Ph.D. 
Associate Professor of History. Ph.D. 2012 Yale University.

John S. Ott (1999) Ph.D. 
Chair and Professor of History. Ph.D. 1999 Stanford University.

Marc S. Rodriguez (2014) Ph.D. 
Managing Editor, Pacific Historical Review; Professor of History. Ph.D. 2000 Northwestern University.

Kenneth Ruoff (1999) Ph.D. 

Patricia Schechter (1995) Ph.D. 

Friedrich Schuler (1990) Ph.D. 
Professor of History. Ph.D. 1990 University of Chicago.

Jennifer Selwyn (2008) Ph.D. 
Adjunct Associate Professor of History. Ph.D. 1997 University of California at Davis.

Jennifer Tappan (2009) Ph.D. 
Associate Professor of History. Ph.D. 2010 Columbia University.

Department of History

Faculty

George L. Armatrout (2003) Ph.D. 
Assistant Professor of History. Ph.D. 1990 University of Michigan.

Katrine Barber (2001) Ph.D. 
Professor of History. Ph.D. 1999 Washington State University.
Brian Turner (2011) Ph.D.
Associate Professor of History. Ph.D. 2010 University of North Carolina at Chapel Hill.

**Emeriti Faculty**

Associate Professor Emerita of History. Ph.D. 2001 University of California at Berkeley.

Elliot Benowitz (1966) Ph.D.
Associate Professor Emeritus of History. Ph.D. 1966 University of Wisconsin.

Karen Carr (1992) Ph.D.

Victor C. Dahl (1958) Ph.D.
Professor Emeritus of History. Ph.D. 1959 University of California, Berkeley.

David A. Johnson (1979) Ph.D.

Susan C. Karant-Nunn (1970) Ph.D.

Charles A. Le Guin (1959) Ph.D.
Professor Emeritus of History. Ph.D. 1956 Emory University.

Caroline Litzenberger (1999) Ph.D.
Associate Professor Emerita of History. Ph.D. 1993 University of Cambridge.

Thomas D. Morris (1967) Ph.D.

Frederick M. Nunn (1965) Ph.D.
Professor Emeritus of History and International Studies. Ph.D. 1963 University of New Mexico.

Michael F. Reardon (1964) Ph.D.
Professor Emeritus of History and Humanities. Ph.D. 1965 Indiana University.

Linda A. Walton (1980) Ph.D.

Charles M. White (1955) Ph.D.
Professor Emeritus of History. Ph.D. 1959 University of Southern California.

**Associated Faculty**

Carl Abbott Ph.D.

Evgenia N. Davidova (2002) Ph.D.

Brenda D. Frink Ph.D.
Coordinating Editor, Pacific Historical Review. Ph.D. 2010 Stanford University.

Natan M. Meir (2008) Ph.D.

Kathleen Merrow Ph.D.
Associate Professor, University Honors Program. Ph.D. 1998 Cornell University.

Shawn Smallman (1995) Ph.D.
Professor. Ph.D. 1995 Yale University.

Nina Spiegel (2012) Ph.D.
Associate Professor. Ph.D. 2001 Stanford University.

Loren R. Spielman (2010) Ph.D.
Associate Professor. Ph.D. 2010 Jewish Theological Seminary of America.

**Department of Indigenous Nations Studies**

**Faculty**

Judy Bluehorse-Skelton (2013) M.A.
Assistant Professor of Indigenous Nations Studies. M.A 2008 Portland State University.

Grace Dillon (1997) Ph.D.

Kali Simmons (2021) Ph.D.
Assistant Professor of Indigenous Nations Studies. Ph.D. 2021 University of California, Riverside.

**Emeritus Faculty**

**Judaic Studies**

**Faculty**

Natan M. Meir (2008) Ph.D.
Academic Director, The Harold Schnitzer Family Program in Judaic Studies; The Lorry I. Lokey Chair in Judaic
Studies; Professor of Judaic Studies. Ph.D. 2004 Columbia University.

Nina S. Spiegel (2012) Ph.D.
The Rabbi Joshua Stampfer Chair in Israel Studies; Associate Professor of Judaic Studies. Ph.D. 2001 Stanford University.

Loren R. Spielman (2010) Ph.D.
Associate Professor of Judaic Studies. Ph.D. 2011 Jewish Theological Seminary of America.

Fariborz Maseeh Department of Mathematics and Statistics

Faculty

Steven A. Bleiler (1988) Ph.D.

Steven J. Boyce (2014) Ph.D.
Associate Professor of Mathematics and Statistics. Ph.D. 2014 Virginia Tech.

Julie Bracken (2017) Ph.D.

John S. Caughman, IV (2000) Ph.D.

Liubomir Chiriac (2019) Ph.D.
Assistant Professor of Mathematics and Statistics. Ph.D. 2015 California Institute of Technology.

Dacian Daescu (2003) Ph.D.
Professor of Mathematics and Statistics. Ph.D. 2001 University of Iowa.

Naghmeh Daneshi (2019) Ph.D.

Andrew Flight (2002) M.S.

Robert L. Fountain (1992) Ph.D.
Professor of Mathematics and Statistics. Ph.D. 1985 University of New Mexico.

Derek Garton (2013) Ph.D.
Associate Professor of Mathematics and Statistics. Ph.D. 2012 University of Wisconsin.

Sylvia Giroux (2005) M.S.
Senior Instructor II in Mathematics and Statistics. M.S. 2006 Portland State University.

Jay Gopalakrishnan (2011) Ph.D.

Nadeeshani Jayasena (2016) Ph.D.
Senior Instructor I in Mathematics and Statistics. Ph.D. 2016 University of Nebraska-Lincoln.

Bruno Jedynak (2015) Ph.D.

Professor of Mathematics and Statistics. Ph.D. 1999 University of California, Santa Barbara.

Jong Sung Kim (1999) Ph.D.
Professor of Mathematics and Statistics. Ph.D. 1999 University of Iowa.

Subhash C. Kochar (2005) Ph.D.
Professor of Mathematics and Statistics. Ph.D. 1979 Panjab University.

Beatriz M. Lafferriere (1993) Ph.D.
Assistant Professor of Mathematics and Statistics. Ph.D. 1987 Rutgers, The State University of New Jersey.

Gerardo A. Lafferriere (1990) Ph.D.

Sean P. Larsen (2004) Ph.D.

Karen A. Marrongelle (2001) Ph.D.

Mau Nam Nguyen (2012) Ph.D.

Dorcas Ofori-Boateng (2020) Ph.D.
Assistant Professor of Mathematics and Statistics. Ph.D. 2020 University of Texas, Dallas.

Jeffrey Ovall (2013) Ph.D.

Daniel Taylor-Rodriguez (2017) Ph.D.

Eva Thanheiser (2008) Ph.D.

Rachel Vale (2019) Ph.D.
Panayot Vassilevski (2014) Ph.D.
Professor of Mathematics and Statistics. Ph.D. 1984 St.
Kliment Ohridski, University of Sofia (Bulgaria).

J.J.P. Veerman (2001) Ph.D.
Professor of Mathematics and Statistics. Ph.D. 1986
Cornell University.

Rachel Webb (2003) M.S.
Senior Instructor II in Mathematics and Statistics. M.S.
2003 Portland State University.

Ge Zhao (2019) Ph.D.
Assistant Professor of Mathematics and Statistics. Ph.D.
2019 Pennsylvania State University.

Emeriti Faculty

Charles B. Balogh (1964) Ph.D.
Professor Emeritus of Mathematical Sciences. Ph.D. 1965
Oregon State University.

F. Rudolf Beyl (1983) Ph.D.
Professor Emeritus of Mathematics and Statistics. Ph.D.
1972 Cornell University.

Gavin Bjork (1966) Ph.D.
Professor Emeritus of Mathematical Sciences. Ph.D. 1966
Washington State University.

John B. Butler (1961) Ph.D.
Professor Emeritus of Mathematical Sciences. Ph.D. 1954
University of California, Berkeley.

Frank S. Cater (1965) Ph.D.
Professor Emeritus of Mathematical Sciences. Ph.D. 1960
University of Southern California.

Branford R. Crain (1978) Ph.D.
Professor Emeritus of Mathematics and Statistics. Ph.D.
1972 Oregon State University.

Mary Lou Daily (1963) Ph.D.
Associate Professor Emerita of Mathematical Sciences.
Ph.D. 1972 Oregon State University.

Joseph R. Ediger (1993) M.S.
Senior Instructor Emeritus in Mathematics and Statistics.
M.S. 1994 Portland State University.

Marek Elzanowski (1988) Ph.D.
Professor Emeritus of Mathematics and Statistics. Ph.D.
1975 Institute of Fundamental Technological Research,
Polish Academy of Science (Poland).

Eugene A. Enneking (1968) Ph.D.
Professor Emeritus of Mathematics and Statistics. Ph.D.
1966 Washington State University.

John M. Erdman (1966) B.A.
Associate Professor Emeritus of Mathematics and
Statistics. B.A. 1957 Lehigh University.

Phillip J. Gold (1964) Ph.D.
Professor Emeritus of Mathematical Sciences. Ph.D. 1961
New York University.

Bruce A. Jensen (1966) Ph.D.
Professor Emeritus of Mathematical Sciences. Ph.D. 1966
University of Nebraska.

M. Paul Latiolais (1989) Ph.D.
Professor Emeritus of Mathematics and Statistics. Ph.D.
1984 Tulane University.

Leonard T. Nelson (1977) Ph.D.
Professor Emeritus of Mathematical Sciences and

Joyce O'Halloran (1987) Ph.D.
Professor Emeritus of Mathematics and Statistics. Ph.D.
1979 University of Washington.

Jeanette Palmeter (1990) Ph.D.
Professor Emerita of Mathematics and Statistics. Ph.D.
1986 Ohio State University, Columbus.

Michael Shaughnessy (1993) Ph.D.
Professor Emeritus of Mathematics and Statistics. Ph.D.
1976 Michigan State University.

Leonard G. Swanson (1964) Ph.D.
Professor Emeritus of Mathematical Sciences. Ph.D. 1970
Oregon State University.

Mara Tableman (1990) Ph.D.
Professor Emeritus of Mathematics and Statistics. Ph.D.
1984 Pennsylvania State University.

Department of Philosophy

Faculty

Brad Berman (2012) Ph.D.
Associate Professor of Philosophy. Ph.D. 2011 University
of Pennsylvania.

Peter Boghossian (2010) Ed.D.
Assistant Professor of Philosophy. Ed.D. 2004 Portland
State University.

Angela Coventry (2004) Ph.D.
Professor of Philosophy. Ph.D. 2004 University of North
Carolina, Chapel Hill.

Bryan Cwik (2013) Ph.D.
Assistant Professor of Philosophy. Ph.D. 2013 University
of Virginia.

Brian Elliott (2011) Ph.D.
Associate Professor of Philosophy. Ph.D. 1998 Albert-
Ludwigs-Universität Freiburg.

Robert C. Gillis (1993) Ph.D.
Senior Instructor II of Philosophy. Ph.D. 2018 University
of California, San Diego.
Professor of Philosophy. Ph.D. 1992 University of Illinois, Urbana-Champaign.

Avram Hiller (2008), Ph.D.
Associate Professor of Philosophy. Ph.D. 2005 Duke University.

Aleksandar Jokic (1999) Ph.D.
Professor of Philosophy. Ph.D. 1991 University of California, Santa Barbara.

Monica Mueller (2009) Ph.D.
Senior Instructor I of Philosophy. Ph.D. 2009 Binghamton University

Alexander Sager (2009) Ph.D.
Professor of Philosophy. Ph.D. 2009 University of Calgary.

Tom Seppalainen (1999) Ph.D.
Associate Professor of Philosophy. Ph.D. 1999 University of Pittsburgh.

Albert R. Spencer (2009) Ph.D.
Assistant Professor of Philosophy. Ph.D. 2007 Baylor University.

David Weber (2001) M.A.
Senior Instructor II of Philosophy. M.A. 1990 University of North Carolina, Chapel Hill.

Emeriti Faculty

Larry S. Bowlden (1968) Ph.D.

Department of Physics

Adjunct Faculty

Gary Goncher (2012) Ph.D.
Adjunct Assistant Professor of Physics. Ph.D. 1984 University of California, Berkeley.

Yongwen G. Lampert (2014) Ph.D.
Adjunct Assistant Professor of Physics. Ph.D. 2014 Portland State University.

Andy Martwick (2008) Ph.D.
Adjunct Assistant Professor of Physics. Ph.D. 2018 Portland State University.

Drew Osterhout (2019) B.S.
Adjunct Instructor of Physics. B.S. 2009 Western Washington University

Benedette Rogers (2016) Ph.D.
Adjunct Assistant Professor of Physics. Ph.D. 2001 University of Washington

Joshua Solomon (2018) M.S.
Adjunct Assistant Professor of Physics. M.S. 2011 University of California, Santa Cruz.

Arwen Spicer (2019) Ph.D.
Adjunct Assistant Professor of Physics. Ph.D. 2005 University of Oregon

Jennifer Stone-Sundberg (2016) Ph.D.
Adjunct Assistant Professor of Physics. Ph.D. 2002 Oregon State University

Doaa Teama (2013) Ph.D.
Adjunct Assistant Professor of Physics. Ph.D. 2013 Portland State University.

Faculty

Albert S. Benight (2003) Ph.D.
Professor of Chemistry and Physics. Ph.D. 1983 Georgia Institute of Technology.

Priya Jamkhedkar (2016) Ph.D.

Mohammad Aslam Khan Khalil (1995) Ph.D.
Professor of Physics. Ph.D. 1976 University of Texas; Ph.D. 1979 Oregon Graduate Center, Beaverton.

Rolf Koenenkamp (2002) Ph.D.

Andrés H. LaRosa (1999) Ph.D.
Professor of Physics. Ph.D. 1996 North Carolina State University.

Pui-Tak Leung (1988) Ph.D.
Professor of Physics. Ph.D. 1982 State University of New York, Buffalo.

Drake C. Mitchell (2008) Ph.D.
Chair, Professor of Physics. Ph.D. 1987 University of Oregon.

Peter Meeck (2002) Ph.D.
Professor of Physics. Diploma 1983 Leipzig University; Dr.rer.nat. 1991 Humboldt University of Berlin.

Jay Nadeau (2017) Ph.D.
Associate Professor of Physics. Ph.D. 1996 University of Minnesota.

Andrew Rice (2007) Ph.D.
Associate Professor of Physics. Ph.D. 2002 University of California, Irvine.

Erik J. Sánchez (2002) Ph.D.
Director, Applied Physics Ph.D. Program; Associate Professor of Physics. Ph.D. 1999 Portland State University.

Rajendra Solanki (2005) Ph.D.
Professor of Physics. Ph.D. 1982 Colorado State University.

Jack C. Stratton (1994) Ph.D.
Associate Professor of Physics. Ph.D. 1986 University of Oregon.
Ralf Widenhorn (2005) Ph.D.
Professor of Physics. Ph.D. 2005 Portland State University.

Emeriti Faculty

Jonathan J. Abramson (1979) Ph.D.
Professor Emeritus of Physics. Ph.D. 1975 University of Rochester.

Carl Bachhuber (1963) Ph.D.
Associate Professor Emeritus of Physics. Ph.D. 1965 University of Washington.

Erik Bodegom (1984) Ph.D.

Donald G. Howard (1965) Ph.D.

Arnold D. Pickar (1963) Ph.D.

Pieter K. Rol (1992) Ph.D.
Professor Emeritus of Physics. Ph.D. 1990 University of Amsterdam (The Netherlands).

Jack S. Semura (1973) Ph.D.

Pavel K. Smejtek (1972) Ph.D.

Department of Psychology

Faculty

Karlyn Adams-Wiggins (2017) Ph.D.
Assistant Professor of Psychology. Ph.D. 2015 Rutgers University.

Todd Bodner (2002) Ph.D.
Professor of Psychology. Ph.D. 2000 Harvard University.

Tori Crain (2020) Ph.D.
Assistant Professor of Psychology. Ph.D. 2015 Portland State University

Jennifer K. Dimoff (2016) Ph.D.
Assistant Professor of Psychology. Ph.D. 2016 Saint Mary's University (Canada).

Tessa Dover (2017) Ph.D.
Assistant Professor of Psychology. Ph.D. 2016 University of California, Santa Barbara.

Charlotte Fritz (2009) Ph.D.
Associate Professor of Psychology. Ph.D. 2005 Technical University of Braunschweig.

Bill Griesar (2016) Ph.D.
Senior Instructor II. Ph.D. 2001 Oregon Health & Science University.

Leslie B. Hammer (1990) Ph.D.
Professor of Psychology. Ph.D. 1991 Bowling Green State University.

Kimberly B. Kahn (2011) Ph.D.
Associate Professor of Psychology. Ph.D. 2010 University of California, Los Angeles.

Keith L. Kaufman (1998) Ph.D.
Professor of Psychology. Ph.D. 1985 University of South Florida.

Thomas A. Kindermann (1989) Ph.D.
Professor of Psychology. Ph.D. 1986 Free University of Berlin (Germany).

Eric S. Mankowski (1998) Ph.D.
Professor of Psychology. Ph.D. 1997 University of Illinois at Urbana-Champaign.

Larry R. Martinez (2016) Ph.D.
Associate Chair, Associate Professor of Psychology. Ph.D. 2012 Rice University.

Andrew J. Mashburn (2011) Ph.D.
Chair, Department of Psychology; Professor of Psychology. Ph.D. 2004 Georgia State University.

Cynthia Mohr (2001) Ph.D.
Professor of Psychology. Ph.D. 1999 University of Connecticut.

Jason Newsom (1996) Ph.D.
Professor of Psychology. Ph.D. 1993 Arizona State University.

Associate Professor of Psychology. Ph.D. 1987 University of Michigan.

Marcus Sharpe (2020) Psy.D.
Senior Instructor I. Psy.D. 2003 California School of Professional Psychology.

Ellen A. Skinner (1992) Ph.D.

Joel S. Steele (2011) Ph.D.
Associate Professor of Psychology. Ph.D. 2011 University of California, Davis.

Greg Townley (2012) Ph.D.
Associate Professor of Psychology. Ph.D. 2012 University of South Carolina.

Professor of Psychology. Ph.D. 2009 University of South Florida.

Emeriti Faculty
Sherwin Davidson (1989) Ph.D.

Gerald Guthrie (1970) Ph.D.
Professor Emeritus of Psychology. Ph.D. 1966 Clark University.

Janice K. Haaken (1979) Ph.D.
Professor Emerita of Psychology. Ph.D. 1979 Wright Institute, Los Angeles.

Roger D. Jennings (1969) Ph.D.
Professor Emeritus of Psychology. Ph.D. 1963 University of Colorado.

Dalton Miller-Jones (1992) Ph.D.

Cord B. Sengstake (1964) Ph.D.

Cathleen L. Smith (1975) Ph.D.
Professor Emerita of Psychology. Ph.D. 1976 University of Utah.

Ronald E. Smith (1955) Ph.D.
Professor Emeritus of Psychology. Ph.D. 1954 University of Utah.

Donald Truxillo (1994) Ph.D.
Professor Emeritus of Psychology. Ph.D. 1987 Louisiana State University.

David F. Wrench (1966) Ph.D.

Department of Sociology
Faculty
Tina Burdsall (2015) Ph.D.
Senior Instructor I. Ph.D. 2013 Portland State University.

Matthew Carlson (2003) Ph.D.
Associate Dean, Professor of Sociology. Ph.D. 1996 University of Texas.

Veronica Dujon (1995) Ph.D.
Professor of Sociology. Ph.D. 1995 University of Wisconsin.

Carol Holdt (1999) M.S.
Senior Instructor II. M.S. 1999 Portland State University.

Shirley Jackson (2016) Ph.D.
Professor of Sociology. Ph.D. 2000 University of California, Santa Barbara.

Daniel Jaffe (2013) Ph.D.
Associate Professor of Sociology. Ph.D. 2006 University of Wisconsin-Madison.

Maura Kelly (2010) Ph.D.
Associate Professor of Sociology. Ph.D. 2010 University of Connecticut.

Amy Lubitow (2011) Ph.D.
Associate Professor of Sociology. Ph.D. 2011 Northeastern University.

José Antonio Padin (1995) Ph.D.
Associate Professor of Sociology. Ph.D. 1998 University of Wisconsin.

Aaron Roussell (2016) Ph.D.
Associate Professor of Sociology. Ph.D. 2013 University of California, Irvine.

Emily F. Shafer (2013) Ph.D.
Associate Professor of Sociology. Ph.D. 2010 Stanford University.

Dara Shifrer (2015) Ph.D.
Associate Professor of Sociology. Ph.D. 2012 University of Texas, Austin.

Alex Stepick (2008) Ph.D.
Professor of Sociology. Ph.D. 1974 University of California at Irvine.

Melissa Thompson (2003) Ph.D.
Professor of Sociology. Ph.D. 2003 University of Minnesota.

Lindsey Wilkinson (2008) Ph.D.
Associate Professor of University Studies and Sociology. Ph.D. 2008 University of Texas, Austin.

Hyeyoung Woo (2009) Ph.D.
Professor of Sociology. Ph.D. 2008 University of Texas, Austin.

Emeriti Faculty
Martha Balshem (1997) Ph.D.
Professor Emerita of Sociology. Ph.D. 1985 Indiana University.

Professor Emerita of Sociology and Women’s Studies. Ph.D. 1979 University of California, Los Angeles.

Leonard D Cain, Jr. (1969) Ph.D.
Professor Emeritus of Sociology and Urban Studies and Planning. Ph.D. 1955 University of Texas, Austin.

Peter J. Collier (1997) Ph.D.
Professor of Sociology. Ph.D. 1997 Portland State University.

Dara Shifrer (2015) Ph.D.
Grant M. Farr (1975) Ph.D.

Kathryn A. Farr (1977) Ph.D.
Professor Emerita of Sociology. Ph.D. 1979 Portland State University.

Nona Y. Glazer (1964) Ph.D.
Professor Emerita of Sociology. Ph.D. 1965 Cornell University.

Lee J. Haggerty (1971) Ph.D.
Professor Emeritus of Sociology. Ph.D. 1972 University of Wisconsin.

Marvin A. Kaiser (1993) Ph.D.
Professor Emeritus of Sociology. Ph.D. 1979 University of Nebraska.

Robert C. Liebm an (1987) Ph.D.

Professor Emeritus of Sociology. Ph.D. 1969 University of Wisconsin.

Michael A. Toth (1990) Ph.D.
Professor Emeritus of Sociology. Ph.D. 1973 University of Utah.

Department of Speech and Hearing Sciences

Faculty

Deanna Britton (2015) Ph.D.
Assistant Professor of Speech and Hearing Sciences. Ph.D. 2012 University of Washington.

Shelly S. Chabon (2008) Ph.D.
Vice Provost for Academic Personnel and Leadership Development; Professor of Speech and Hearing Sciences. Ph.D. 1980 University of Pittsburgh.

Jeff Conn (2013) Ph.D.
Associate Clinical Professor of Speech and Hearing Sciences. Ph.D. 2005 University of Pennsylvania.

Amy L. Donaldson (2008) Ph.D.
Associate Professor of Speech and Hearing Sciences. Ph.D. 2005 University of Washington.

Brandon Eddy (2019) M.A.
Assistant Clinical Professor of Speech and Hearing Sciences. M.A. 2015 University of Iowa.

Gerasimos Fergadiotis (2012) Ph.D.
Professor of Speech and Hearing Sciences. Ph.D. 2011 Arizona State University.

Mikala Fleegle (2020) M.S.
Research Associate. Speech and Hearing Sciences. M.S. 2018 University of Nevada.

Molly Franz (2017) M.S.
Senior Research Assistant, Speech and Hearing Sciences. M.S. 2013 Portland State University.

Christina Gildersleeve-Neumann (2002) Ph.D.
Chair and Professor of Speech and Hearing Sciences. Ph.D. 2001 University of Texas at Austin.

Susan Ginley (2001) M.A.
Clinical Professor of Speech and Hearing Sciences. M.A. 1985 University of Oregon.

Assistant Clinical Professor of Speech and Hearing Sciences. Au.D. 2014 University of Iowa.

Maria Kapantzoglou (2012) Ph.D.
Associate Professor of Speech and Hearing Sciences. Ph.D. 2012 Arizona State University.

Sarah Key-Delyria (2012) Ph.D.
Associate Professor of Speech and Hearing Sciences. Ph.D. 2011 The University of Florida.

Megann McGill (2016) Ph.D.
Assistant Professor of Speech and Hearing Sciences, Ph.D. 2016 The University of Texas at Austin.

Andrew McMillin (2011) M.A.
Clinical Professor of Speech and Hearing Sciences. M.A. 2000 University of Pittsburgh.

Claudia Meyer (2006) M.S.
Clinical Professor of Speech and Hearing Sciences. M.S. 2002 Portland State University.

Carolyn Quam (2016) Ph.D.
Assistant Professor of Speech and Hearing Sciences. Ph.D. 2010 University of Pennsylvania.

Cassie Quinn (2013) M.A.
Clinical Professor of Speech and Hearing Sciences. M.A. 1995 California State University, Chico.

Teresa Roberts (2018) M.S.
Assistant Clinical Professor of Speech and Hearing Sciences. M.A. 1999 Portland State University.

Emeriti Faculty

Thomas L. Dolan (1966) Ph.D.
Professor Emeritus of Speech and Hearing Sciences. Ph.D. 1983 University of Iowa.

Lynn Fox (1998) Ph.D.

Systems Science Graduate Program

Faculty

Wayne W. Wakeland (1976) Ph.D.
Associate Professor of Systems Science. Ph.D. 1977 Portland State University.
Martin Zwick (1976) Ph.D.
Professor of Systems Science. Ph.D. 1968 Massachusetts Institute of Technology.

Associated Faculty
Mohammad Aslam Khan Khalil (1995) Ph.D.
Professor of Physics. Ph.D. 1976 University of Texas; Ph.D. 1979 Oregon Graduate Center.

James McNames (1999) Ph.D.
Associate Professor of Electrical and Computer Engineering. Ph.D. 1999 Stanford University.

Professor of Computer Science. Ph.D. 1990 University of Michigan.

Dean Maseeh College of Engineering and Computer Science. D.Sc. 1980 Washington University, St. Louis.

Christof Teuscher (2008) Ph.D.
Assistant Professor of Engineering & Computer Science. Ph.D. 2004 Swiss Federal Institute of Technology, Lausanne.

Lisa Zurk (2005) Ph.D.

Adjunct Faculty
Mark Bedau (1993) Ph.D.
Professor of Philosophy and Humanities, Reed College. Ph.D. 1985 University of California, Berkeley.

John Fitzgerald (2007) Ph.D.
Field Researcher, Purdue Pharma L.P. Ph.D. 2007 Portland State University.

Jeffrey A. Fletcher (2007) Ph.D.
Adjunct Assistant Professor of Systems Science and University Studies. Ph.D. 2004 Portland State University.

David E. Hall (2009) Ph.D.
Adjunct Assistant Professor of Systems Science. Ph.D. 2008 Portland State University.

Director, Care Data Analysis, Kaiser Permanente. Ph.D. 2006 Portland State University.

Nancy Perrin (1995) Ph.D.
Senior Investigator, Kaiser Permanente, Center for Health Research. Ph.D. 1986 Ohio State University.

Computational Intelligence Manager, Toyota. Ph.D. 1997 Texas Tech.

Patrick Roberts (2005) Ph.D.
Biomedical Engineering, OHSU; Computational Neuroscientist, in Silico Biosciences, Inc. Ph.D. 1993 University of Gothenburg.

Assistant Professor of Lighting Design, Department of Theatre-Dance, Western Oregon University. Ph.D. 2007 Portland State University.

Emeriti Faculty
George G. Lendaris (1970) Ph.D.

Harold A. Linstone (1970) Ph.D.

Beatrice T. Oshika (1989) Ph.D.

Department of Women, Gender, and Sexuality Studies
Faculty
Lisa Weasel (2000) Ph.D.
Chair, Department of Women, Gender, and Sexuality Studies; Professor of Women, Gender, and Sexuality Studies. Ph.D. 1993 University of Cambridge.

Miriam Abelson (2014) Ph.D.
Associate Professor of Women, Gender, and Sexuality Studies. PhD. 2014 University of Oregon.

Sri Craven (2011) Ph.D.
Associate Professor of Women, Gender, and Sexuality Studies. Ph.D. 2009 University of Michigan, Ann Arbor.

Sally McWilliams (2009) Ph.D.
Professor of Women, Gender, and Sexuality Studies. Ph.D. 1992 University of Washington, Seattle.

Kai Hang Cheang (2019) Ph.D.
Senior Instructor II/Visiting Scholar in Women, Gender, and Sexuality Studies. Ph.D. 2018 University of California, Riverside.

Sally Eck (2001) M.S.Ed
Assistant Professor in Women, Gender, and Sexuality Studies. M.S.Ed. 2001 Portland State University.

Marlene Howell (2001) M.S.
Senior Instructor II in Women, Gender, and Sexuality Studies. M.S. 1996 Mankato State University.

Vicki Reitenauer (2000) B.A.
Associate Professor in Women, Gender, and Sexuality Studies. B.A. 1986 Albright College.

Department of World Languages and Literatures
Faculty
Suwako Watanabe (1990) Ph.D.
Chair, Department of World Languages and Literatures; Professor of Japanese. Ph.D. 1990 Georgetown University.
Daria Aleeva, (2016) M.A.
Senior Instructor II of Russian. M.A. 2012 Portland State University.

Anna Alsufieva (2009) Ph.D.
Assistant Professor of Russian. Ph.D. 2001 Herzen State Pedagogical University, St. Petersburg (Russia).

Clifford Bredlwave (1998) M.A.

Jenny Ceciliano (2009) M.A.

Justin Coleman (2008) M.A.

William Comer (2014) Ph.D.
Director Russian Flagship Center; Professor of Russian. Ph.D. 1992 University of California, Berkeley.

Carrie Collenberg-Gonzalez (2015) Ph.D.
Assistant Professor of German. Ph.D. 2011 University of Minnesota.

Enrique Cortez (2011) Ph.D.
Professor of Spanish. Ph.D. 2011 Georgetown University.

Karen Curtin (2016) Ph.D.
Assistant Professor of Japanese. Ph.D. 2016 Ohio State University.

Cassio de Oliveira (2016) Ph.D.
Assistant Professor of Russian. Ph.D. 2014 Yale University.

Annabelle Dolidon (2008) Ph.D.
Associate Professor of French. Ph.D. 2008 University of California, Davis.

Jonah Eleweke (2013) Ph.D.
Associate Professor of American Sign Language. Ph.D. 1997 University of Manchester (U.K.), and Ph.D. 2004 University of Alberta (Canada).

Craig Epplin (2012) Ph.D.
Associate Professor of Spanish. Ph.D. 2009 University of Pennsylvania.

Nila Friedberg (2004) Ph.D.
Associate Professor of Russian. Ph.D. 2002 University of Toronto (Canada).

Steven Fuller (1990) Ph.D.
Associate Professor of German. Ph.D. 1990 Stanford University.

Assistant Professor of German. Ed.D. 2013 Portland State University.

Gina Greco (1992) Ph.D.

Young Joo Han (2019) M.A.

Yasmeen Hanoosh (2010) Ph.D.
Professor of Arabic. Ph.D. 2008 University of Michigan.

Jon Holt (2010) Ph.D.

Isabel Jaen-Portillo (2010) Ph.D.
Professor of Spanish. Ph.D. 2006 Purdue University and Ph.D. 2016 Universidad Complutense de Madrid (Spain).

Laurence R. Kominz (1983) Ph.D.

Timothy Nidever (2009) M.A.

Eva Núñez-Méndez (2002) Ph.D.
Professor of Spanish. Ph.D. 1998 University of Salamanca (Spain).

DeLys Ostlund (1991) Ph.D.
Associate Dean of Faculty, Professor of Spanish. Ph.D. 1993 University of Maryland.

Melissa A. Pátiño-Vega (2019) Ph.D.
Assistant Professor of Spanish. Ph.D. 2019 University of California, Davis.

Jonathan O. Pease (1986) Ph.D.

Jennifer Perlmutter (2002) Ph.D.

Moshe Rachmuth (2012) Ph.D.
Assistant Professor of Hebrew. Ph.D. 2010 University of Oregon.

Stephanie Roulon (2011) M.A.

Robert Sanders (2001) Ph.D.
Associate Professor of Spanish. Ph.D. 2001 University of Arizona.

Anousha Sedighi (2005) Ph.D.
Professor of Persian. Ph.D. 2005 University of Ottawa (Canada).

Cynthia Sloan (1992) Ph.D.
Associate Professor of Spanish and Portuguese. Ph.D. 1995 Vanderbilt University.

Steven L. Thorne (2010) Ph.D.
Professor of Second Language Acquisition. Ph.D. 1999 University of California, Berkeley.
Stephen Wadley (1991) Ph.D.

Assistant Professor of French. Ph.D. 1992 University of Wisconsin-Madison.

Inés Warnock (2001) M.A.
Senior Instructor II of Spanish. M.A. 2000 Portland State University.

Angela Zagarella (1993) M.A.
Senior Instructor II of Italian. M.A. 1984 University of Catania (Italy).

Emeriti Faculty

Jeanne Marie Bernard (1966) B.A.
Associate Professor Emerita of French. B.A. 1966 Portland State University.

George T. Cabello (1975) Ph.D.

Roderic C. Diman (1960) Ph.D.

William B. Fischer (1978) Ph.D.
Professor Emeritus of German. Ph.D. 1979 Yale University.

Claudine G. Fisher (1972) D-es-L

Sandra Freels (1981) Ph.D.

Martha Hickey (1992) Ph.D.
Professor Emerita of Russian. Ph.D. 1985 Harvard University.

Galina Kogan (1996) M.A.
Emerita Senior Instructor II of Russian. M.A. 1972 Kiev State Pedagogical Institute of Foreign Languages (Ukraine).

Laureen K. Nussbaum (1973) Ph.D.

Linda Parshall (1986) Ph.D.
Professor Emerita of German. Ph.D. 1974 University of London.

Earl L. Rees (1970) Ph.D.
Professor Emeritus of Spanish. Ph.D. 1977 University of Southern California.

Dirgham H. Shait (1985) Ph.D.

Kazem Tehrani (1975) Ph.D.

Patricia J. Wetzel (1984) Ph.D.

Rita Rose Vistica (1975) Ph.D.
Associate Professor Emerita of French. Ph.D. 1965 Fordham University.

OHSU-PSU School of Public Health

David Bangsberg (2016) M.D., M.P.H.

Karen Camp (2018), M.P.A.
Associate Dean for Finance & Administration. M.P.A .2020 Arkansas State University.

Richard Johnson, (2018), Ph.D.
Associate Dean for Academic Affairs, Professor of Public Health, Ph.D. 1985 Oregon Graduate Institute.

Marguerita Lightfoot, (2021), Ph.D.
Associate Dean for Research, Ph.D. 1997 University of California, Los Angeles.

Lynne Messer, (2012), Ph.D.
Assistant Dean for Graduate Academic Affairs, Associate Professor of Public Health, Ph.D. 2005 University of North Carolina, Chapel Hill, NC.

Dawn Richardson (2012), Dr.P.H.
Associate Dean for Social Justice, Associate Professor of Public Health, Dr.P.H. 2010 University of California, Berkeley.

Liana Winett (2000) Dr.P.H.
Associate Dean for Student Affairs and Community Engagement, Associate Professor of Public Health. Dr.P.H. 1997 University of California, Berkeley.

Belinda Zeidler (1985) M.S.T.
Assistant Dean for Undergraduate Academic Affairs,
Undergraduate Public Health Studies Academic Advisor,
Undergraduate Internship Coordinator, Assistant Professor of Public Health. M.S.T. 1996 Portland State University.

**PSU Faculty**

The faculty listed here are the PSU-employed faculty of the OHSU-PSU School of Public Health. The OHSU-employed faculty of the OHSU-PSU School of Public Health can be located on the OHSU-PSU School of Public Health website.

Ashley-Nicole Browning, (2012) MPH
Senior Instructor II, MPH. 2009 Portland State University

Leslie Bienen, (2019) D.V.M.
Instructor, D.V.M. 2001 Tufts University

Paula Carder (2007) Ph.D.
Director, Institute on Aging, Professor of Public Health. Ph.D. 1999 Portland State University.

Carlos Crespo (2005), Dr.Ph.
Professor of Public Health, Dr.Ph.,1989 Loma Linda University

Aless Dinno (2009) Sc.D.
Associate Professor of Public Health. Sc.D. 2006 Harvard University.

Assistant Professor of Public Health, Ph.D. 2008 Portland State University

Cara Eckhardt (2009) Ph.D.
Associate Professor of Public Health. Ph.D. 2004 University of North Carolina, Chapel Hill.

Sherril B. Gelmon (1994) Dr. P.H.
Professor of Public Health. Dr. P.H. 1990 University of Michigan.

Kelly L. Gonzales (2011) Ph.D.
Associate Professor of Public Health. Ph.D. 2010 Oregon State University.

Julia Goodman (2015) Ph.D.
Associate Professor of Public Health. Ph.D. 2015 University of California, Berkeley.

Betty Izumi (2009) Ph.D.
Associate Professor of Public Health. Ph.D. 2008 Michigan State University.

Senior Instructor I, M.A. 1996 Portland State University

Yves Labissiere (1996) Ph.D.
Associate Professor, Public Health/University Studies. Ph.D. 1995 University of California, Santa Cruz.

Sunny Lin (2019), Ph.D.
Assistant Professor of Public Health, Ph.D. 2019, University of Michigan

Jane Mercer (1986) M.S.
Senior Instructor II; Undergraduate Adviser. M.S. 1986 Portland State University.

Lynne Messer (2012) Ph.D.
Assistant Professor of Public Health. Ph.D. 2005 University of North Carolina, Chapel Hill, NC.

Randy Miller (1998) M.S.T.
Senior Instructor II. M.S.T. 1992 Portland State University.

Ryan Petteway (2016) Ph.D.
Assistant Professor of Public Health, Ph.D. 2015 University of California, Berkley

Dawn Richardson (2012) Dr.P.H.
Associate Professor of Public Health. Dr.P.H. 2010 University of California, Berkeley.

Jill Risser (2009) Ph.D.
Associate Professor of Public Health. Ph.D. 2008 Arizona State University.

Christina Sun (2014) Ph.D.
Associate Professor of Public Health. Ph.D. 2014 Johns Hopkins University.

Neal Wallace (2000) Ph.D.
Associate Professor of Public Health. Ph.D. 1999 University of California, Berkeley.

Claire Wheeler, (2007) M.D.
Assistant Professor of Public Health, M.D. 1999 Loyola University

Liana Winett (2000) Dr.P.H
Associate Professor of Public Health. Dr.P.H. 1997 University of California, Berkeley.

Bradley Wiptli (2016) Ph.D.
Assistant Professor of Public Health. Ph.D. 2008 Arizona State University

Belinda Zeidler (1985) M.S.T.
Assistant Professor of Public Health, Undergraduate Public Health Studies Advisor, Undergraduate Internship Coordinator. M.S.T. 1996 Portland State University.
Emeriti Faculty
Gary R. Brodowicz (1986) Ph.D.

Deb Harris (1998) Ph.D.
Senior Instructor II Emeritus of Public Health, Ph.D. 1998 University of New Mexico.

Mark Kaplan (1997) Dr. P.H.
Professor Emeritus of Public Health. Dr.P.H. 1984 University of California, Berkeley.

Leslie McBride (1985) Ph.D.

Judith L. Sobel (1985) Ph.D.

Lawrence Wallack (1999) Dr.P.H.
Professor Emeritus of Public Health; Dr.P.H. 1982 University of California, Berkeley.

School of Social Work
Faculty
Antonia Alvarez (2019) Ph.D.

Marina Barcelo (2015) M.S.W.
Student Inclusion Coordinator. M.S.W. 2012 Loyola University, Chicago.

Sarah S. Bradley (1998) M.S.S.W.
Program Director of MSW Program; Associate Professor of Practice in Social Work. M.S.W. 1979 Columbia University.

Leah Brookner (2007) Ph.D.
Assistant Professor of Practice in Social Work. Ph.D. 2017 Portland State University.

Stephanie Bryson (2016) Ph.D.
Associate Dean of Academic Affairs; Associate Professor in Social Work. Ph.D. 2009 Brandeis University.

Assistant Professor of Practice in Child, Youth, and Family Studies. Ph.D. University of Texas.

Matthew Chorpenning (2015) M.S.W.
Assistant Professor of Practice in Social Work. M.S.W. 2013 Portland State University.

Jose Coll (2020) Ph.D.
Dean; Professor in Social Work. Ph.D. 2007 University of South Florida.

Kate Constable (2010) M.S.W.
Undergraduate Adviser. M.S.W. 2003 Portland State University.

Lisa Cordova (2013) M.S.W.

Erin Flynn (2014) Ph.D.
Associate Professor in Child, Youth, and Family Studies. Ph.D. 2013 University of Michigan.

Samuel W. Gioia (2000) M.S.W.
Assistant Professor of Practice in Social Work. M.S.W. 1987 Portland State University.

Adrienne Graf (2017) M.S.W.
Field Placement Development Specialist. M.S.W. 2010 Portland State University.

Denise Grant (2009) M.S.W.
Field Specialist; Assistant Professor of Practice in Social Work. M.S.W. 1996 Portland State University.

Valerie Hamby (2011) M.S.W.
Eugene Site Coordinator, M.S.W. Distance Option; Assistant Professor of Practice in Social Work. M.S.W. 2005 Portland State University.

Lisa Hawash (2011) M.S.W.
M.S.W. Online Option Coordinator; Associate Professor of Practice in Social Work. M.S.W. 2005 Portland State University.

Jill Hoffman (2016) Ph.D.
Assistant Professor in Social Work. Ph.D. 2016 Ohio State University.

Roberta Hunte (2017) Ph.D.
Assistant Professor in Child, Youth, and Family Studies. Ph.D. 2012 University of Manitoba, Winnipeg, Canada.

Hillary Hyde (2015) M.S.W.
Program Director of Child, Youth, and Family Studies; Assistant Professor of Practice in Child, Youth, and Family Studies. M.S.W. 1996 Portland State University.

Mollie Janssen (2016) M.S.W.
BSW Hybrid Program Coordinator; Associate Professor of Practice in Social Work. M.S.W. 1998 Portland State University.

Julie Kates (2007) M.S.W.
Program Director of Field Education, M.S.W. Program; Associate Professor of Practice. M.S.W. 1995 Portland State University.

Ericka Kimball (2014) Ph.D.
Associate Professor in Social Work. Ph.D. 2012 University of Minnesota.

Rebecca Love (2017) M.S.W. Assistant Professor of Practice in Social Work. M.S.W. 2007 University of Maryland, Baltimore.

Michele Martinez Thompson (2011) M.S.W. Assistant Professor of Practice in Social Work. M.S.W. 2004 Arizona State University.

Joshua Morgan-Griggs (2020) M.S.W. Field Specialist; Assistant Professor of Practice in Social Work. M.S.W. 2011 University of Washington.

Cimone Schwoefflmann (2011) M.S.W. Assistant Professor of Practice in Social Work. M.S.W. 2010 Portland State University.

Gary Smith (2009) M.S.W. Bend Site Coordinator, M.S.W. Distance Option; Assistant Professor of Practice in Social Work. M.S.W. 1974 Portland State University.

Emeriti Faculty

Nancy M. Koroloff (1973) Ph.D.

Carol A. Morgaine (1995) Ph.D.

James K. Nash (1999) Ph.D.
Associate Professor in Social Work. Ph.D. 1999 University of North Carolina, Chapel Hill.

Guido Pinamonti (1969) D.S.W.

Julie M. Rosenberg (1985) Ph.D.

Joan F. Shireman (1985) Ph.D.

Susan Snyder (1993) M.S.W.
Assistant Professor of Practice in Social Work. M.S.W. 1984 Portland State University.

Maria M. Talbott (1984) D.S.W.

Lynn Thompson (1968) M.S.W.
Associate Professor Emeritus in Social Work. M.S.W. 1964 University of California, Berkeley.

James H. Ward (1988) Ph.D.

Norman L. Wyers (1974) D.S.W.

Associated Faculty
Susan Barrios (2008) M.S.W.

Jennifer Blakeslee (2017) Ph.D.

Traci Boyle-Calestiantz (2015) M.S.W.
Adjunct Instructor in Child, Youth, and Family Studies. M.S.W. 2005 Portland State University.

Danica Brown (2011) Ph.D.

Angela Donley (2018) M.S.W.
Adjunct Instructor in Social Work. M.S.W. 2014

Malika Edden (2015) M.S.W.
Adjunct Instructor in Social Work. M.S.W. 2013 Portland State University.

Denise Ernst (2015) Ph.D.
Adjunct Professor in Social Work. Ph.D. 2007 University of New Mexico.

Lynn Green (2003) M.S.

Daniel Harold (2015) M.S.W.
Adjunct Instructor in Social Work. M.S.W. 2010 Portland State University.

Susan C. Hedlund (1986) M.S.W.

Kathryn Kelley (2017) M.S.W.

Melissa Kroos (2016) M.S.W.

Katherine Kneuppper (2014) M.S.W.

Jean Lasater (2000) M.A.

Jennifer Levi (2017) M.S.W.
Adjunct Instructor in Social Work. M.S.W. 2004 University of South Florida.

Michelle Lewis (2017) M.S.W.
Adjunct Instructor in Social Work. M.S.W. 2013 Portland State University.

Marjorie McGee (2016) Ph.D.

Emily Nelson (2016) M.S.W.

Melissa NewMyer (2015) M.S.

Beth Okantey (2011) M.S.W.
Adjunct Instructor in Child, Youth, and Family Studies. M.S.W. 2001 Walla Walla University.

Monica Parmley (2012) M.S.W.

Julie Prindle (2009) Ph.D.
Peg Sandeen (2007) Ph.D.
Allison Schisler (2015) M.S.W.
Lucrecia Suarez (2016) M.S.W.

Juliana Wallace (2017) M.S.W.
Adjunct Instructor in Social Work. M.S.W. 2003 University of Central Florida Orlando.

Dawn J. Williamson (2008) M.S.W.

Regional Research Institute for Human Services
Associated Faculty
Jennifer Blakeslee (2012) Ph.D.
Eileen Muench Brennan (1986) Ph.D.
Jim Carlton (1998) B.A.
Mandy Davis (2002) M.S.W.
Research Associate, Regional Research Institute for Human Services. M.S.W. University of South Carolina, Columbia.
Eval Elkin (2015) M.A.
Debra J. Elliott (1992) Ph.D.
Senior Research Associate, Regional Research Institute for Human Services. Ph.D. 1994 Ohio State University.
Barbara J. Friesen (1983) Ph.D.
Elliott Hinkle (2018) B.S.

Research Assistant, Regional Research Institute for Human Services. B.S. 2016 Portland State University.
Anna Hristic (2016) M.S.W.
Assistant Professor of Practice, Regional Research Institute for Human Services. M.S.W. 2013 Portland State University.
Kelly Hunter (2014) B.S.
Senior Research Assistant II, Regional Research Institute for Human Services. B.S. 2014 Portland State University.

Nancy M. Koroloff (1973) Ph.D.

Emilie Lamson-Siu (2018) M.S.W.
Senior Research Associate, Regional Research Institute for Human Services. M.S.W. 2008 Portland State University.
Lauren Lipira (2018) M.S.W.
Senior Research Associate, Regional Research Institute for Human Services. M.S.W. 2008 Washington University in St. Louis.
Charlie McNeely (2018) B.S.
Research Assistant, Regional Research Institute for Human Services. B.S. 2013 Portland State University.

Rebecca Miller (2018) M.S.W.
Senior Research Assistant, Regional Research Institute for Human Services. M.S.W. 2008 Washington University in St. Louis.
Christina Nicolaidis (2012) M.D.
Associate Professor, Regional Research Institute for Human Services. M.D. 1993 Columbia University.
Peggy Nygren (2017) Ph.D.
Senior Research Associate 2, Regional Research Institute for Human Services. Ph.D. 2013 Portland State University.

Roberto Orellana (2008) Ph.D.
Mary Oschwald (2004) Ph.D.
Director of Regional Research Institute for Human Services; Research Associate Professor in Social Work. Ph.D. 2002 Portland State University.
Dora Raymaker (2009) M.S.
Research Associate, Regional Research Institute for Human Services. M.S. 2009 Portland State University.
Megan Redfield (2019) M.E.D
Anna Rockhill (1989) M.P.P.
Senior Research Associate, Regional Research Institute for Human Services. M.P.P. University of Michigan.

Mirah Scharer (2019) B.S.
Research Assistant, Regional Research Institute for Human Services. B.S. 2018 Portland State University.

Stephanie Sundborg (2016) Ph.D.
Senior Research Associate, Regional Research Institute for Human Services. Ph.D. 2017 Portland State University.

Torey Sisson (2018) B.S.

Janet S. Walker (1998) Ph.D.

Juan Watkins (2021) M.P.H.
Program Administrator, Regional Research Institute for Human Services. M.P.H. 2020 University of Miami Miller School of Medicine.

Christine Whitaker (2021) M.S.W.
Program Administrator, Regional Research Institute for Human Services. M.S.W. 2020 Portland State University.

De'Sha Wolf (2021) Ph.D.

**Center for Improvement of Child and Family Services**

**Faculty**

Katharine Cahn (2004) Ph.D.
Professor of Practice. Executive Director. Ph.D. 2003 Portland State University.

Cassandra Anderson (2019) B.A.

Angela Ang (2015) B.A.
Multimedia Specialist. B.A. 1997 California State University, Northridge.

Jeffrey Asprocolas (2016) M.S.W.

Andrea Bellows (2013) M.S.W.

Tim Boettcher (2016) M.A., M.S.Ed.

Christopher Bowling (2019) Ph.D.

Mackenzie Burton (2011) M.S.W.
Research Assistant. M.S.W. 2014 Portland State University.

Vania Coates (2019) B.S.

Christine Cooper (2010) B.S.
Senior Research Assistant 1. B.S. 2010 Portland State University.

Joanna Crawford (2015) M.C.

Research Associate. M.A. 2009 Portland State University.

Crystal Deffenbaugh (2020) B.A.

Kristin Everhart (2019) B.A.

Shelley Field (2013) M.S.W.

Carrie Furrer (2011) Ph.D.
Associate Research Professor. Ph.D. 2005 Portland State University.

Jon Garcia (2019) M.B.A.
Logistics Manager, CWP Training Program. M.B.A. 2019 Southern Oregon University.

Daniel Garris (2006) M.A.

Beth Green (2010) Ph.D.

Shantika Green (2014) M.S.W.

Anna Howell (2017) M.Ed.
Field Based Training Manager. M.Ed. 2016 Portland State University.

Callie Lambarth (2011) M.S.W. Senior Research Associate I. M.S.W. 2005 Portland State University.

Marthe Lowrey (2003) M.S.W. Director, Assistant Professor of Practice, CWP Workforce Development. M.S.W. 1990 California State University, Sacramento.

Karen Moorhead (2012) M.S.W. Associate Professor of Practice, Campus Program Advisor. M.S.W. 1987 Portland State University.

Mollie Oberweiser Kennedy (2016) M.S.W. Assistant Professor of Practice, System of Care Institute. M.S.W. Portland State University (2016).

Celeste Seibel (2017) M.S. Assistant Professor of Practice, System of Care Institute. M.S. Communications 2010 Portland State University.

**Undergraduate Studies**

**Intensive English Language Program**

Phoebe Dauro (2011) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2010 Portland State University.

Eowyn Ferey (2007) M.A.
Senior Instructor 2 in English as a Second Language. M.A.

Amanda Franzoni (2000) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2001 Portland State University.

Senior Instructor 2 in English as a Second Language. M.A.
2006 Monterey Institute of International Studies, California.

Anne Greenhoe (2015) M.A.
Instructor in English as a Second Language. M.A.
University of Wisconsin, Milwaukee.

Wayne Gregory (2012) Ph.D.
Academic Director, Intensive English Language Program; Instructor in English as a Second Language. Ph.D. 1992
Louisiana State University.

Shannon Guinny-Collins (2012) M.A.
Instructor in English as a Second Language. M.A. 2011
Portland State University.

Julie Haun (1995) M.A.
Director, Intensive English Language Program; Instructor in English as a Second Language. M.A. 1995 Portland State University.

Susan Lindsay M.A.
Senior Instructor 2 in English as a Second Language. M.A.
1996 Portland State University.

Julia Youst MacRae (2003) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2005 Portland State University.

Katherine McCurdie (2012) M.A.
Instructor in English as a Second Language. M.A. 2009
Portland State University.

Senior Instructor 2 in English as a Second Language. M.A.
2005 Portland State University.

Monika Mulder (2009) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2007 Portland State University.

Miranda Novash (2012) M.A.
Senior Instructor 1 in English as a Second Language. M.A.
2003 Portland State University.

Barbara Pijan (2012) M.A.
Senior Instructor 1 in English as a Second Language. M.A.
2007 Portland State University.

Talisman Saunders (1999) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
1998 Portland State University.

Leslie Siebert (2001) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2000 Portland State University.

Darbra Smith (2006) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2005 Portland State University.

Linnea Spitzer (2010) M.A.
Senior Instructor 1 in English as a Second Language. M.A.
2008 Portland State University.

Jennifer Stenseth (2009) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2008 Portland State University.

Gwen Heller Tuason (2005) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2005 Portland State University.

Hilary Wang (2001) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
2000 Portland State University.

Regina Weaver (1998) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
1997 University of British Columbia.

Shannon West (2015) M.A.
Instructor in English as a Second Language. M.A. TESOL, Portland State University.

Margaret Young (1993) M.A.
Senior Instructor 2 in English as a Second Language. M.A.
1981 Portland State University.

Military Science

Faculty

Nicholas Taylor (2021) B.S.
Captain, U.S. Army, Assistant Professor of Military Science. B.S. 2015 West Virginia University.

Maribel Ortega de Pacheco (2021) M.B.A.
Major, Army ROTC, Assistant Professor of Military Science. M.B.A. 2009 Willamette University.

University Studies

Faculty

Linda George (2019) Ph.D.
Interim Executive Director of University Studies, Professor of Environmental Sustainability & Management, Ph.D. 1991 Portland State University.

Deborah Arthur (2003) J.D., M.A.
Associate Professor of University Studies, M.A. 1990 Ohio University.
State University; J.D. 1993 University of Connecticut School of Law.

Leslie Batchelder (2000) Ph.D.
Assistant Professor of University Studies. Ph.D. 2000 University of California, Davis.

Daneen Bergland (2010) M.A.
Senior Instructor I of University Studies. M.A. 2006 Portland State University.

Robert Bremmer (2013) M.A.

Rowanna Carpenter (2007) Ph.D.
Director of Assessment and Research, University Studies. Ph.D. 2009 Portland State University.

Sarah Dougher (2018) Ph.D.
Senior Instructor I of University Studies Ph.D. 1997 University of Texas, Austin.

J.R. Estes (2005), Ph.D.
Associate Professor of University Studies. Ph.D. 2005 Portland State University.

Óscar Fernández (2016) Ph.D.

Celine Fitzmaurice (2007) M.A.
Senior Instructor II of University Studies. M.A. 1995 University of Minnesota.

Michael J. Flower (1992) Ph.D.

Molly Gray (2006) M.S.W.
Senior Instructor II of University Studies. M.S.W. 2004 Portland State University.

Veronica Hotton (2018) Ph.D.
Senior Instructor I of University Studies. Ph.D. 2015 Simon Fraser University.

Director, Senior Capstone Program Ed.D. 2004 Portland State University.

Annie Knepler (2009) Ph.D.
Associate Professor of University Studies. Ph.D. 2010 University of Illinois at Chicago.

Dana Lundell (2010) Ph.D.
Director of Mentor Program, University Studies. Ph.D. 1999 University of Minnesota.

Michael Lupro (2010) Ph.D.
Associate Professor of University Studies. Ph.D. 2009 Bowling Green State University.

Alan MacCormack (1999) Ph.D.
Professor Emeritus of University Studies. Ph.D. 1982 University of North Carolina, Chapel Hill.

Neera Malhotra (2016) Ed.D.

Lea Millay (2012) Ph.D.
Assistant Professor. Ph.D. 2000 University of Oregon.

Associate Professor of University Studies. M.F.A. 2003 Portland State University.

Zapouna Newton-Calvert (2009) M.A.
Senior Instructor II of University Studies. M.A. 2004 Portland State University.

Heather Petzold (2006) M.S.
Senior Instructor II of University Studies. M.S. 1998 Portland State University.

Leanne Serbulo (2008) Ph.D.
Assistant Professor of University Studies. Ph.D. 2008 Portland State University.

Sonja Taylor (2009) M.S.
Senior Instructor I of University Studies. M.S. 2006 Portland State University.

Anmarie Trimble (2000) M.A.
Assistant Professor of University Studies. M.A. 1998 Portland State University.

Rakeem Washington (2017) J.D.
Instructor of University Studies. J.D. 2008 Lewis & Clark Northwestern School of Law.

Associated Faculty

Joel Bettridge (2006) Ph.D.
Associate Professor, English/University Studies. Ph.D. 2002 State University of New York, Buffalo.

Christopher Butenhoff (2007) Ph.D.
Associate Professor, Physics/University Studies. Ph.D. 2009 Portland State University.

Christopher Carey (2005) Ph.D.
Associate Professor of University Studies. Ph.D. 2008 The Arizona State University.

Bryan Cwik (2016) Ph.D.
Assistant Professor, Philosophy/University Studies. Ph.D. 2013 University of Virginia.

Evgenia Davidova (2002) Ph.D.
Grace Dillon (1997) Ph.D.  
Professor, Native American Studies/University Studies.  
Ph.D. 1997 University of California, Riverside.

Thomas Fisher (2002) Ph.D.  
Professor, English/University Studies. Ph.D. 2002 State University of New York at Buffalo.

Jeffrey Gerwing (2001) Ph.D.  
Associate Professor, Environmental Sciences and Management/University Studies. Ph.D. 2001 Pennsylvania State University.

Roberta Hunte (2017) Ph.D.  
Assistant Professor, Child and Family Studies/University Studies. Ph.D. Portland State University.

Yves Labissiere Ph.D.  
Associate Professor, OHSU-PSU School of Public Health/University Studies. Ph.D. 1996 University of California.

Jesse Locker (2009) Ph.D.  

Ben Perkins (2003) Ph.D.  
Associate Professor, Geology/University Studies. Ph.D. 2000 Portland State University.

David Peterson del Mar (2017), Ph.D.  

Alexander Sager (2009) Ph.D.  
Associate Professor, Philosophy/University Studies. Ph.D. 2009 University of California.

Jack Stratton (1994) Ph.D.  
Associate Professor, Physics/University Studies. Ph.D. 1986 University of Oregon.

Christof Teuscher (2008) Ph.D.  

Lindsey Wilkinson (2008) Ph.D  
Associate Professor, Sociology/University Studies. Ph.D. 2008 University of Texas, Austin.

**University Honors College**

Brenda Glascott (2016) Ph.D.  
Director, University Honors College; Associate Professor of Humanities. Ph.D. 2007 University of Pittsburgh.

Corinna Coleman (2008) M.F.A.  
Program Administrator, University Honors College. M.F.A. 2011 Portland State University.

Brianna Avery (2014) M.Phil.  
Honors Academic Advisor. M.Phil. 2003 Columbia University.

**Emeriti Faculty**

Michael F. Reardon (1964) Ph.D.  
Professor Emeritus of History and Humanities. Ph.D. 1965 Indiana University.

Michael J. Flower (1992) Ph.D.  

**Faculty**

Tina Burdsall (2013) Ph.D.  
Instructor, Sociology/University Honors College. Ph.D. 2013 Portland State University.

Brenda Glascott (2016) Ph.D.  
Director, University Honors College; Associate Professor of Humanities. Ph.D. 2007 University of Pittsburgh.

Kathleen Merrow (1997) Ph.D.  
Associate Professor of Interdisciplinary Studies, Social Sciences. Ph.D. 1998 Cornell University.

Federico Pérez (2015) Ph.D.  
Assistant Professor of Urban Anthropology. Ph.D. 2014 Harvard University.

Olyssa Starry (2013) Ph.D.  
Assistant Professor of Urban Ecology. Ph.D. 2013 University of Maryland, College Park.

Rebecca Summer (2019) Ph.D.  
Assistant Professor of Urban Geography. Ph.D. 2019 University of Wisconsin-Madison.

Lawrence P. Wheeler (1976) Ph.D.  

**College of Urban and Public Affairs**

Sy Adler (1982) Ph.D.  
Interim Dean, College of Urban and Public Affairs; Professor of Urban Studies and Planning. Ph.D. 1980 University of California, Berkeley.

Laura Hickman (2007) Ph.D.  
Interim Associate Dean, College of Urban and Public Affairs, Director of Criminology & Criminal Justice Online. Ph.D. 2000 University of Maryland, College Park, MD.
Department of Criminology and Criminal Justice

Faculty

Christopher Campbell (2015) Ph.D.
Associate Professor of Criminology & Criminal Justice.
Ph.D. 2015 Washington State University.

Christopher Carey (2005) J.D.; Ph.D.
Associate Professor of Criminology & Criminal Justice.
J.D. 1995 Southern Illinois University; Ph.D. 2008 Arizona State University.

Kelsey Henderson (2016) Ph.D.
Assistant Professor of Criminology & Criminal Justice.
Ph.D. 2016 University of Florida.

Kris Henning (2001) Ph.D.
Professor of Criminology & Criminal Justice. Ph.D. 1995 University of Vermont.

Laura Hickman (2007) Ph.D.
Professor of Criminology & Criminal Justice; Director, Criminology & Criminal Justice Online. Ph.D. 2000 University of Maryland.

Arynn Infante (2020) Ph.D.
Assistant Professor of Criminology & Criminal Justice. Ph.D. 2020 Arizona State University.

Mark Leymon (2012) Ph.D.
Associate Professor of Criminology & Criminal Justice. Ph.D. 2010 University of Oregon.

Assistant Professor of Criminology & Criminal Justice. Ph.D. 1996 Portland State University.

Mauri Matsuda (2016) Ph.D.
Assistant Professor of Criminology & Criminal Justice. Ph.D. 2014 University of Maryland.

Danielle McGurrin (2007) Ph.D.
Associate Professor of Criminology & Criminal Justice. Ph.D. 2007 University of South Florida.

Brian C. Renauer (2000) Ph.D.
Professor of Criminology & Criminal Justice; Chair, Criminology & Criminal Justice; Director, Criminal Justice Policy Research Institute. Ph.D. 2000 State University of New York at Albany.

Curt Sobolewski (2011) Ph.D.
Associate Professor of Criminology & Criminal Justice. Ph.D. 1999 Arizona State University.

Kathryn Wuschke (2016) Ph.D.
Assistant Professor of Criminology & Criminal Justice. Ph.D. 2016 Simon Fraser University.

Emeriti Faculty

William H. Feyerherm (1990) Ph.D.
Professor Emeritus of Criminology and Criminal Justice, Ph.D. 1977 State University of New York, Albany.

Annette I. Jolin (1990) Ph.D.
Professor Emerita of Criminology and Criminal Justice, Ph.D. 1985 Portland State University.

Robert W. Lockwood (1975) J.D.
Professor Emeritus of Criminology and Criminal Justice, J.D. 1974 University of Oregon.

Department of Economics

Faculty

Grace Arnold (2018) Ph.D.
Assistant Professor of Economics. Ph.D. 2018 Louisiana State University.

Randall A. Bluffstone (2003) Ph.D.
Professor of Economics. Ph.D. 1993 Boston University.

Sahan T. Dissanayake (2017) Ph.D.
Associate Professor of Economics. Ph.D. 2011 University of Illinois.

Associate Professor of Economics. Ph.D. 1994 University of California, Berkeley.

John B. Hall (1985) Ph.D.
Professor of Economics. Ph.D. 1984 The Graduate Faculty, New School for Social Research.

Hiroyuki Ito (2004) Ph.D.
Department Chair and Professor of Economics. Ph.D. 2004 University of California, Santa Cruz.

Riju Joshi, (2018) Ph.D.
Assistant Professor of Economics, Ph.D. 2018 Michigan State University.

Arnab Mitra (2013) Ph.D.
Associate Professor of Economics. Ph.D. 2010 University of Arizona.

Cesar M. Rodriguez (2013) Ph.D.
Associate Professor of Economics. Ph.D. 2009 University of Pittsburgh.

Rajiv Sharma (1998) Ph.D.

Sarah Tinkler (2005) Ph.D.
Professor of Economics. Ph.D. 1989 University of Oregon.

Jacob F. Williams (2014) Ph.D.
Assistant Professor of Economics. Ph.D. 2014 Texas A&M University.

Assistant Professor of Economics. Ph.D. 2003 University of California, Davis.

Emeriti Faculty

Giles H. Burgess (1969) Ph.D.
WELCOME TO PORTLAND STATE UNIVERSITY

Nelson B. Crick (1967) Ph.D.

David E. Ervin (1999) Ph.D.
Professor of Environmental Management; Professor of Economics. Fellow in the Institute for Sustainable Solutions. Ph.D. 1974 Oregon State University.

Mary C. King (1992) Ph.D.

Kuan-Pin Lin (1979) Ph.D.

Thomas Potiowsky (1983) Ph.D.

John F. Walker (1966) Ph.D.

**Affiliate Faculty**

Eric Mogren (2011) Ph.D. Affiliate Associate Professor of Public Administration and Senior Fellow in the Center for Public Service. Ph.D. 2011 Portland State University.

Courses

Course numbering system.

Courses are numbered as follows:
- 0 – 99 Noncredit courses or credit courses of a remedial, terminal, or semiprofessional nature not applicable toward degree requirements.
- 100 – 299 Courses on the lower-division level.
- 300 – 499 Courses on the upper-division level.
- 4xx/5xx Master's level graduate courses which are also offered as courses for undergraduates.
- 5xx Graduate courses offered in support of master's degree level instructional programs. Ordinarily employed for units whose majors have access to master's programs or for courses populated by master's students.
- 5xx/6xx Graduate courses offered in support of doctoral degree level instructional programs which are also offered as courses for master's level students.
- 6xx Graduate courses offered in support of doctoral degree level instructional programs. Ordinarily employed for units whose majors have access to doctorate programs or for courses populated by doctorate students.
- 7xx Postbaccalaureate courses which may not be applied toward an academic degree.
- 8xx In-service courses with limited application toward advanced degrees and no application toward undergraduate degrees.

In addition, the following number system is generally in effect in all Oregon public institutions: 100 to 110 and 200 to 210 courses are survey or foundation courses in the liberal arts and sciences in the disciplines covered.

The following numbered courses are repeating courses (they may be taken for more than one term under the same number), with credit being granted according to the amount of work done:
- 199, 299, 399, Special Studies;
- 401, 501, 601, 801, Research;
- 402, 502, 602, 802, Independent Study;
- 403 Thesis/Honors Thesis; 503 Thesis/603 Dissertation;
- 404, 504, 604, 804, Cooperative Education/Internship;
- 405, 505, 605, 805, Reading and Conference;
- 406, 506, 606, 806, Problems/Projects;
- 407, 507, 607, 807, Seminar;
- 408, 508, 608, 808, Workshop;
- 409, 509, 609, 809, Practicum;
- 410, 510, 610, 810, Selected Topics.

Other repeating numbers are assigned to activity courses, such as art, music, and physical education.

Certain senior level courses are taught concurrently with their graduate-level counterparts. Hence this course may be offered for either graduate or undergraduate credit. (See quarterly Schedule of Classes for specific offering.) In the graduate credit course, additional work appropriate to the graduate level of study will be assigned.

Actg - Accounting

Actg 199 - Special Studies (1-3)
(Credit to be arranged.) Often offered as Debits and Credits, recommended for accounting majors.

Actg 281 - Accounting Mechanics: Debits and Credit (1)
Focus on the mechanics of the accounting cycle using an interactive, online, problem-oriented learning system. Specific topics include use of T-accounts, rules of Debits/Credits, journal entries, adjusting and closing entries, and subsequent preparation of financial statements. Prerequisite: BA 211.

Actg 310 - Professional Accounting Seminar (2)
This course is designed to introduce students to a wide range of accounting careers. Guest speakers from public accounting firms, private industry and governmental agencies will provide information and discuss various career paths within their organizations. Students will be required to develop a business portfolio that includes a professional career plan, resume and cover letter that will lead them to successful careers. In addition, students will also learn to cultivate the communication and soft skills demanded in a competitive market

Prerequisite: B or better in both BA 211 or consent of instructor.
Actg 335 - Accounting Information Systems and Analytic Fundamentals (4)

Methodology used in information systems to: 1) collect, store, and extract accounting data; and 2) analyze, visualize, and communicate accounting information. Development of the accounting techniques used in the handling of large amounts of information, special journals and controlling accounts, computerized processing of data, and computerized tools for analysis and visualization. Discussion of the challenges to effective accounting information system design in a variety of organizational settings.

Prerequisite: BA 213, BA 325, Ec 202, Stat 241 or Stat 243.

Actg 360 - Management Accounting (4)

Emphasis on the development, analysis, and communication of cost information relevant to the following functions: planning, decision making, cost control and management, pricing, and performance evaluation.

Prerequisite: BA 213, Ec 202, Stat 241 or Stat 243.

Actg 381 - Financial Accounting and Reporting I (4)

Comprehensive study of the principles, conventions and postulates of financial accounting. Appropriate preparation of GAAP financial statements and financial disclosures, including exposure to the judgment inherent in financial reporting. Considers information requirements and expectations of users of financial statements. International financial accounting standards will be considered where appropriate. Specific focus on the responsibility of accountants for maintaining professional accountability to the public interest in the face of institutional pressures. This is the first course in a sequence of three: Actg 381, Actg 382, and Actg 383 which must be taken in sequence.

Prerequisite: BA 213, Ec 202, Stat 241 or Stat 243.

Actg 382 - Financial Accounting and Reporting II (4)

Comprehensive study of the principles, conventions and postulates of financial accounting. Appropriate preparation of GAAP financial statements and financial disclosures, including exposure to the judgment inherent in financial reporting. Considers information requirements and expectations of users of financial statements. International financial accounting standards will be considered where appropriate. Specific focus on the responsibility of accountants for maintaining professional accountability to the public interest in the face of institutional pressures. This is the second course in a sequence of three: Actg 381, Actg 382, and Actg 383 which must be taken in sequence.

Prerequisite: Actg 381.

Actg 383 - Financial Accounting and Reporting III (4)

Comprehensive study of the principles, conventions and postulates of financial accounting. Appropriate preparation of GAAP financial statements and financial disclosures, including exposure to the judgment inherent in financial reporting. Considers information requirements and expectations of users of financial statements. International financial accounting standards will be considered where appropriate. Specific focus on the responsibility of accountants for maintaining professional accountability to the public interest in the face of institutional pressures. This is the third course in a sequence of three: Actg 381, Actg 382, and Actg 383 which must be taken in sequence.

Prerequisite: Actg 382.

Actg 399 - Special Studies (1-6)

(Credit to be arranged.)

Actg 401 - Research (1-6)

(Credit to be arranged.)

Actg 404 - Internship (1-6)

(Credit to be arranged.)

Actg 405 - Reading and Conference (1-6)

(Credit to be arranged.) Consent of instructor.

Actg 406 - Special Projects (1-12)

Credit to be arranged.

Actg 407 - Seminar (1-6)

(Credit to be arranged.) Student-selected problems in business operation and business management to be studied by the individual and discussed in group meeting under direction of academic staff.

Actg 409 - Practicum (1-8)

(Credit to be arranged.)
Actg 410 - Selected Topics (1-6)
(Credit to be arranged.)

Actg 421 - Taxation (4)
Provides students with a broad range of tax concepts, tax policies, and different types of taxpayers. Students should develop an understanding of how tax laws affect most business and personal financial decisions. Tax reporting, tax planning, and basic tax research skills will be emphasized.
Prerequisite: Actg 381.

Actg 422 - Advanced Taxation (4)
Expands students' knowledge of how tax laws affect sole proprietors, partnerships, corporations, and other business entities. In addition, the tax laws applicable to estates, gifts, trusts, tax-exempt organizations, and foreign persons are explored.
Also offered for graduate-level credit as Actg 522 and Actg 522S and may be taken only once for credit. Prerequisite: Actg 421.

Actg 430 - Governmental Accounting (2)
An introduction to state and local governmental and "fund" accounting. Topics will include both the mechanics of fund accounting and presentation of financial statements by governmental entities in a Comprehensive Annual Financial Report (CAFR).
Prerequisite: Actg 382.

Actg 431 - Not-For-Profit Accounting (2)
Introduction to Not-for-Profit entities, how their legal and operational environments are different from businesses, and how accounting and financial reporting standards differ as a result.
Prerequisite: Actg 382.

Actg 445 - Forensic Accounting (4)
Introduces forensic and investigative accounting. Develops working knowledge of the fraud environment, fraud schemes, fraud prevention and detection controls, fraudster characteristics, interview and evidence techniques, the legal system and process for litigation and mediation, how to testify in various trials, and how to conduct and write up a fraud investigation.
Also offered for graduate-level credit as Actg 545 and Actg 545S and may be taken only once for credit. Prerequisite: Actg 381.

Actg 460 - Advanced Managerial Accounting (4)
Advanced development, analysis, and communication of cost information, focusing on the use of financial and non-financial information in decision making and strategic management. Cases and/or simulations will be used extensively.
Prerequisite: Actg 360.

Actg 485 - Business Law (4)
Laws of contracts, negotiable checks, notes, and drafts, insurance, documents of title, sales of goods, letters of credit, employees and independent contractors, agency, partnership, corporations, securities, bankruptcy, security interests, mortgages, suretyship and bulk sales. Covers law part of CPA exam.
Also offered for graduate-level credit as Actg 585 and Actg 585S and may be taken only once for credit. Prerequisite: BA 213, Ec 202, Stat 241 or Stat 243.

Actg 490 - Advanced Financial Accounting (2)
Emphasizes accounting for business combinations, stock ownership investments and financial consolidations.
Prerequisite: Actg 382.

Actg 492 - Auditing Concepts and Practices (4)
Auditing standards and procedures observed by Certified Public Accountants in the examination of the financial statements of business and other organizations. Audit standards and objectives and conceptual framework for collection of evidence and assessment of control risk. Shortform audit report and operational auditing.
Also offered for graduate-level credit as Actg 592 and Actg 592S and may be taken only once for credit. Prerequisite: Actg 335 and Actg 382.

Actg 493 - Advanced Auditing (4)
Audit objectives and procedures for the collection of evidence and the assessment of control risk are explored. The effects of attribute and variables sampling as well as the effects of computers and computer-control procedures on the audit process are examined. In addition, audit, compilation, and review reports are important elements of this course.
Also offered for graduate-level credit as Actg 593 and Actg 593S and may be taken only once for credit. Prerequisite: Actg 492.

Actg 495 - Integrated Accounting Issues (4)
Integrates topics from various accounting areas. Provides students with opportunities to see the accounting interactions and tradeoffs that result from realistic business situations. Course will enhance students' understanding of accounting and its influence on business, as well as the understanding of
how business processes affect accounting results, through a set of comprehensive case studies.
Prerequisite: Actg 360, Actg 421, and Actg 492.

Actg 501 - Research (1-9)
(Credit to be arranged.)

Actg 502 - Independent Study (1-4)
(Credit to be determined.)

Actg 503 - Thesis (1-9)
(Credit to be arranged.)

Actg 504 - Internship (1-9)
(Credit to be arranged.)

Actg 505 - Reading and Conference (1-6)
(Credit to be arranged.) Consent of instructor.

Actg 507 - Seminar (1-6)
(Credit to be arranged.) Student-selected problems in business operation and business management to be studied by the individual and discussed in group meeting under direction of academic staff.

Actg 507S - Seminar (1-8)
(Credit to be arranged.) Student-selected problems in business operation and business management to be studied by the individual and discussed in group meeting under direction of academic staff.

Actg 509 - Practicum (1-9)
(Credit to be arranged.)

Actg 510 - Selected Topics (1-6)
(Credit to be arranged.)

Actg 511 - Financial Reporting (4)
An introduction to the reporting system used by businesses to convey financial information to parties external to the enterprise. Primary emphasis is placed on understanding the financial reports that are the end product of this system—what they do and do not tell the user about a business enterprise. The accounting principles, conventions, and concepts underlying financial reporting are examined with the objective of developing the ability to read, comprehend, and perform basic analysis of financial statements. An introduction to environment performance reporting also will be provided. Ethics are essential in accounting and provide guidance on all aspects of financial reporting topics covered in this course.

Actg 513 - Managerial Accounting and Control (4)
The course covers managerial accounting and control issues, and focuses on the identification and use of accounting information as well as other information from within the organization.
Prerequisite: Actg 511.

Actg 522 - Advanced Taxation (4)
Expands students' knowledge of how tax laws affect sole proprietors, partnerships, corporations, and other business entities. In addition, the tax laws applicable to estates, gifts, trusts, tax exempt organizations, and foreign persons are explored.
Also offered for undergraduate-level credit as Actg 422 and may be taken only once for credit.
Prerequisite: Actg 421. Cross-Listed as: This is the same course as Actg 522S and may be taken only once for credit.

Actg 522S - Advanced Taxation (4)
Expands students' knowledge of how tax laws affect sole proprietors, partnerships, corporations, and other business entities. In addition, the tax laws applicable to estates, gifts, trusts, tax exempt organizations, and foreign persons are explored.
Also offered for undergraduate-level credit as Actg 422 and may be taken only once for credit.
Prerequisite: Actg 421. Cross-Listed as: This is the same course as Actg 522 and may be taken only once for credit.

Actg 525 - Tax Research Documentation and Procedure (4)
Methods of researching tax rulings and laws in tax accounting; study of the administration and responsibilities of tax practice.

Actg 526 - Accounting Methods and Periods (4)
Deals with federal income tax issues that arise with respect to the determination of the proper periods for reporting income and deductions, overall methods of tax accounting and all of the choices and options available to taxpayers.
Actg 527 - Corporate Taxation I (4)
Introduction to the tax laws relating to corporations and their owners. The purpose of the course is to develop an understanding of the federal income tax rules of the United States as they apply to the formation, operation, distribution, and liquidation of corporations.
Prerequisite: Actg 525, Actg 526, Actg 530.

Actg 528 - Corporate Taxation II (4)
Continuation of Corporate Taxation I with emphasis on corporate reorganizations, operation, liquidation of subsidiary corporations and corporate division, and carryover of tax attributes.
Prerequisite: Actg 527.

Actg 530 - Taxation of Property Transactions (2)
Students are provided with the federal income tax consequences resulting from sales, exchanges, and other dispositions of property, determining the taxable event; ascertaining basis and amount realized; depreciation deductions; ascertaining gain or loss; limitations regarding the use of losses, including the at-risk and passive activity loss provisions.

Actg 531 - Partnership Taxation (4)
Tax treatment of partnership income; problems associated with the formation, operation, and dissolution of partnerships. Sale, withdrawal, retirement of partners; basic adjustments, unrealized receivables, and substantially appreciated inventory; Subchapter S Corporation compared to partnerships.
Prerequisite: Actg 525.

Actg 532 - S Corporations Taxation (2)
Examination of tax treatment, tax problems, and tax planning techniques involving S corporations; eligibility rules; election, revocation, and termination; treatment of income, deductions, and credits; determining the shareholder's taxable income; pass-through of corporate net operating loss; distributions of previously taxed income; and special taxes applicable to S corporations.
Prerequisite: Actg 527 and Actg 531.

Actg 533 - Financial Accounting for Income Taxes (4)
Students are exposed to the federal income tax consequences resulting from sales, exchanges, and other dispositions of property, determining the taxable event; ascertaining basis and amount realized; depreciation deductions; ascertaining gain or loss; limitations regarding the use of losses, including the at-risk and passive activity loss provisions.
Prerequisite: Actg 528.

Actg 535 - State and Local Taxation (4)
Examination of issues and taxation other than federal income tax, including property tax processes, sales and use taxes, multistate transactions, manufacturers excise tax, and sumptuary and regulatory excise taxes.
Prerequisite: Actg 525.

Actg 536 - International Taxation (4)
Introduction to U.S. taxation of U.S. firms, citizens, and residents with foreign source income, and U.S. taxation of foreign firms and individuals doing business within the United States.
Prerequisite: Actg 527.

Actg 537 - Tax Accounting Capstone Consulting Project (4)
This capstone course provides students with an opportunity to work on real business problems for companies. MTax students work as a 3-4 person consulting team with a client and Faculty Advisor to develop solutions that will be put to use by the client.
Prerequisite: Final term of program.

Actg 539 - Trust, Estate & Gift Taxation (4)
This course consists of a detailed review of the federal estate tax, gift tax and generation-skipping tax laws. In the area of estate taxation, assets included, credits permitted and deductions allowed are reviewed in detail by reference to law, regulations and cases.

Actg 540 - Practicum / Internship (4)
The Accounting Practicum is an internship with an accounting firm or corporate finance group. This provides opportunities to apply program content to real-world environments, gain appreciation of work expectations and demands, and relate field experience to remaining taxation program curriculum.
Prerequisite: Final term of program.

Actg 542 - Tax Factors in Business Decisions (4)
Tax implications of common business questions and transactions, including choices of business entity, acquisition and sale of business assets, compensation and benefits planning, and U.S. taxation of international trade. Students will be exposed to the common income and estate tax planning strategies of individuals and families engaged in business.
Prerequisite: Actg 512 or admission to the Master of Science in financial analysis program.

**Actg 544 - Professional Practices Seminar (1)**

In this course you will further your leadership agenda through interactive discussion with regional leaders in the financial, taxation, and accountancy industries.

**Actg 545 - Forensic Accounting (4)**

Introduces forensic and investigative accounting. Develops working knowledge of the fraud environment, fraud schemes, fraud prevention and detection controls, fraudster characteristics, interview and evidence techniques, the legal system and process for litigation and mediation, how to testify in various trials, and how to conduct and write up a fraud investigation.

Also offered for undergraduate-level credit as Actg 445 and may be taken only once for credit. Cross-Listed as: This is the same course as Actg 545S and may be taken only once for credit.

**Actg 545S - Forensic Accounting (4)**

Introduces forensic and investigative accounting. Develops working knowledge of the fraud environment, fraud schemes, fraud prevention and detection controls, fraudster characteristics, interview and evidence techniques, the legal system and process for litigation and mediation, how to testify in various trials, and how to conduct and write up a fraud investigation.

Also offered for undergraduate-level credit as Actg 445 and may be taken only once for credit. Cross-Listed as: This is the same course as Actg 545 and may be taken only once for credit.

**Actg 550 - Advanced Financial Reporting (4)**

Financial reporting for analysts. Studies how financial statements communicate the outcome of a company’s operating, financing and investing transactions. Contemporary issues are examined in the context of factors that shape accounting standards and current trends in financial reporting.

Prerequisite: Admission to the Master of Science in Finance program.

**Actg 551 - Accounting Information Systems (4)**

Study of accounting information systems for operations with an emphasis on accounting issues. Addresses the information systems issues encountered by internal financial analysts. Topics may include database and accounting information system design, model building, the use of accounting information for forecasting, and other topics associated with the development of information systems to support financial analysis.

**Actg 552 - Strategic Cost Management (4)**

Course takes the perspective that managers should not use information from accounting systems designed to prepare external financial reports in order to make internal management decisions. Provides alternative approaches to developing and using accounting information. Special emphasis will be placed on understanding traditional cost systems, activity-based costing systems, and determining the cost of quality. Course will rely heavily on the examination of actual company situations.

Prerequisite: Actg 512 or admission to the Master of Science in financial analysis program.

**Actg 553 - Financial Statement Analysis (4)**

Sound financial information for making business decisions is obtained by an understanding of accounting data from which the information is derived as well as by the application of tools of analysis. Students will gain an increased understanding of the properties and use of accounting numbers in the determination and forecasting of financial positions, results of operations, cash flows, the financial disclosure process, and its use in comparing business performance.

Prerequisite: Fin 551 or concurrent enrollment or Fin 561.

**Actg 560 - Professional Ethics and the Public Interest (2)**

Introduces students to ethical perspectives that provide the philosophical context for the study of applied business ethics. Students use practical frameworks to address complex ethical and social issues and explore organizational processes and structures that can shape social performances. The context for this course is financial and accounting situations.

**Actg 565 - Current Topics in Global Financial Accounting (4)**

Covers current complex financial accounting issues faced by corporations operating within a global context. Because of today’s rapidly changing financial accounting environment, this course will take an adaptable view of topics covered, monitoring recent regulatory issues to include timely complex issues that must be understood by today’s financial accounting professional.

Prerequisite: admission to the MSFA program.
Actg 585 - Business Law (4)
Laws of contracts, negotiable checks, notes, and drafts, insurance, documents of title, sales of goods, letters of credit, employees and independent contractors, agency, partnership, corporations, securities, bankruptcy, security interests, mortgages, suretyship and bulk sales. Covers law part of CPA exam.
Also offered for undergraduate-level credit as Actg 485 and may be taken only once for credit. Cross-Listed as: This is the same course as Actg 585S and may be taken only once for credit.

Actg 585S - Business Law (4)
Laws of contracts, negotiable checks, notes, and drafts, insurance, documents of title, sales of goods, letters of credit, employees and independent contractors, agency, partnership, corporations, securities, bankruptcy, security interests, mortgages, suretyship and bulk sales. Covers law part of CPA exam.
Also offered for undergraduate-level credit as Actg 485 and may be taken only once for credit. Prerequisite: Fin 226 or BA 385 (Fin 226 or BA 385 not required for students in postbaccalaureate certificate in accounting program). Cross-Listed as: This is the same course as Actg 585 and may be taken only once for credit.

Actg 592 - Auditing Concepts and Practices (4)
Auditing standards and procedures observed by Certified Public Accountants in the examination of the financial statements of business and other organizations. Audit standards and objectives and conceptual framework for collection of evidence and assessment of control risk. Short form audit report and operational auditing.
Also offered for undergraduate-level credit as Actg 492 and may be taken only once for credit. Cross-Listed as: This is the same course as Actg 592S and may be taken only once for credit.

Actg 592S - Auditing Concepts and Practices (4)
Auditing standards and procedures observed by Certified Public Accountants in the examination of the financial statements of business and other organizations. Audit standards and objectives and conceptual framework for collection of evidence and assessment of control risk. Short form audit report and operational auditing.
Also offered for undergraduate-level credit as Actg 492 and may be taken only once for credit. Prerequisite: Actg 335 and 382. Cross-Listed as: This is the same course as Actg 592 and may be taken only once for credit.

Actg 593 - Advanced Auditing (4)
Audit objectives and procedures for the collection of evidence and the assessment of control risk are explored. The effects of attribute and variables sampling as well as the effects of computers and computer-control procedures on the audit process are examined. In addition, audit, compilation, and review reports are important elements of this course.
Also offered for undergraduate-level credit as Actg 493 and may be taken only once for credit. Prerequisite: Actg 492. Cross-Listed as: This is the same course as Actg 593S and may be taken only once for credit.

Actg 593S - Advanced Auditing (4)
Audit objectives and procedures for the collection of evidence and the assessment of control risk are explored. The effects of attribute and variables sampling as well as the effects of computers and computer-control procedures on the audit process are examined. In addition, audit, compilation, and review reports are important elements of this course.
Also offered for undergraduate-level credit as Actg 493 and may be taken only once for credit. Prerequisite: Actg 492. Cross-Listed as: This is the same course as Actg 593 and may be taken only once for credit.

Actg 601 - Research (1-9)
(Credit to be arranged.)

Actg 607 - Seminar (1-9)
(Credit to be arranged.)

Age - Aging/Gerontology
Age 501 - Research (1-6)
(Credit to be arranged.) Consent of Instructor.

Age 502 - Independent Study (1-12)
(Credit to be arranged.)

Age 504 - Cooperative Education/Internship (1-15)
(Credit to be arranged.)

Age 505 - Reading and Conference (1-8)
(Credit to be arranged.)
Age 510 - Selected Topics (1-8)
(Credit to be arranged.)

Age 516 - Families and Aging (4)
Family ties of middle aged and older adults are explored using a life course perspective. The diversity of family structure and experience is emphasized with attention to gender, race, class, and ethnicity. Life transitions are highlighted as are informal and formal services available to support older adults and their families.
Prerequisite: junior standing..

Age 523 - Business and Aging (4)
Economic and business implications of population aging, including an exploration of demographic changes, the economic reality faced by today's older adults in work and retirement, and older adults as consumers.

Age 556 - Health Aspects of Aging (4)
Examination of health-related changes that occur with aging. Review of current scientific literature with an investigation of physiological mechanisms responsible for changes in functional capacity throughout life. Explores the role of physical activity and nutrition in healthy aging.

Age 557 - National Long-term Care Policy (3)
This course examines the need for long-term care services and the risk factors associated with utilization of them as well as familiarizing students with the financing and delivery mechanisms in long-term care, both public and private. The policy issues in current long-term care initiatives are explored.
Also offered as Age 657 and may be taken only once for credit..

Age 558 - Perspectives on Aging (3)
An introduction to the field of gerontology is presented from the perspectives offered by multiple disciplines, including sociology, psychology, biology, economics, political science, and demography. Stereotypes of aging and theoretical frameworks for understanding aging are examined, as are normal age-related changes, the impact of social, political, and economic conditions on the process of aging, and the myriad consequences of a growing population of elders.
Also offered as Age 658 and may be taken only once for credit..

Age 559 - Economics of Aging (3)
Objectives are (1) understand the roots of income inequality between the aged and non-aged; (2) review the economic and policy factors that influence the decision to retire; (3) understand the political economy of old age income support in the U.S. and abroad; (4) explore the history, operation, and policy questions of our major public pension system, social security; and (5) discuss private pensions in relationship to U.S. income maintenance policy.
Also offered as Age 659 and may be taken only once for credit..

Age 560 - Mental Health and Aging (3)
Focus on a psychological approach to mental health and aging. The physical and social environments of older people, as well as the individual's physical and psychological condition, strongly affect the mental health and quality of life of older people. It is the goal of the course to be useful to people who work with older adults and their families, or to people who want to understand the changes that may be happening for older members of their own families. Guest speakers from the field of geriatric mental health will supplement the readings and course assignments.
Also offered as Age 660 and may be taken only once for credit..

Age 562 - Global Aging (3)
The rapid, unprecedented aging of the world's populations is resulting in myriad changes that will affect societies, cultures, economies, families, and individuals and their daily lives. Students will learn about broad global trends related to the aging of the world as well as aging in particular countries and regions.

Age 563 - Service Learning in Nicaragua: Enhancing Communities for an Aging Society (3)
Rapid aging in Nicaragua's population will cause changes affecting individuals, families, communities, culture and economies. Students will attend class at PSU and travel to Nicaragua to learn about living conditions and support structures in place for older Nicaraguans and participate in service-learning projects to improve the lives of Nicaraguan elders.
Prerequisite: Age 562.
Age 657 - National Long-term Care Policy (3)
This course examines the need for long-term care services and the risk factors associated with utilization of them as well as familiarizing students with the financing and delivery mechanisms in long-term care, both public and private. The policy issues in current long-term care initiatives are explored.
Also offered as Age 657 and may be taken only once for credit.

Age 658 - Perspectives on Aging (3)
An introduction to the field of gerontology is presented from the perspectives offered by multiple disciplines, including sociology, psychology, biology, economics, political science, and demography. Stereotypes of aging and theoretical frameworks for understanding aging are examined, as are normal age-related changes, the impact of social, political, and economic conditions on the process of aging, and the myriad consequences of a growing population of elders.
Also offered as Age 558 and may be taken only once for credit.

Age 659 - Economics of Aging (3)
Objectives are (1) understand the roots of income inequality between the aged and non-aged; (2) review the economic and policy factors that influence the decision to retire; (3) understand the political economy of old age income support in the U.S. and abroad; (4) explore the history, operation, and policy questions of our major public pension system, social security; and (5) discuss private pensions in relationship to U.S. income maintenance policy.
Also offered as Age 559 and may be taken only once for credit.

Age 660 - Mental Health and Aging (3)
Focus on a psychological approach to mental health and aging. The physical and social environments of older people, as well as the individual's physical and psychological condition, strongly affect the mental health and quality of life of older people. It is the goal of the course to be useful to people who work with older adults and their families, or to people who want to understand the changes that may be happening for older members of their own families. Guest speakers from the field of geriatric mental health will supplement the readings and course assignments.
Also offered as Age 560 and may be taken only once for credit.

Anth - Anthropology

Anth 101 - Introduction to Biological Anthropology (4)
The biological side of anthropology: human biology, primatology, and paleoanthropology. Micro- and macro evolution and their contribution to modern human variation; adaptation and evolutionary relationships among humans, primates, and our fossil ancestors; the fallacy of the race concept. Bio-cultural evolution among humans.

Anth 102 - Introduction to Archaeology (4)
The study of ancient cultures of the world. Introduction to the theories and techniques of archaeological investigation.

Anth 103 - Introduction to Social/Cultural Anthropology (4)
Study of modern and recent societies in cross cultural perspective. Focus on methods for understanding social and cultural differences and similarities.

Anth 299 - Special Studies (1-6)
(Credit to be arranged.)

Anth 300U - The Modern World in Anthropological Perspective (4)
Examination of anthropological approaches to cultural diversity in a global context. Include cultural contact between the Fourth World and the industrialized world; health, nutrition, and poverty in different world areas; ecocide and ethnocide; political movements in the Fourth World; racism; and sexism.

Anth 301 - The Politics of Ethnographic Writing (4)
How do anthropologists write about 'the other'? Critical reading of ethnographic writing explores the power dynamics at play in research methodology and anthropological writing. Topics may include, but will not be limited to, decolonizing anthropology, the politics of ethnographic representation, identity formation, gender, sexuality, race, political economy, and transnational culture flows.
Anth 304 - Social Theory (4)
Examines power relations in social organization from the family to the global economy. Topics include political processes, exploitation, identity, agency, social change, and globalization, with an emphasis on understanding contemporary social issues in cross-cultural perspective through critical, feminist, interpretative and political economic theoretical frameworks. Designed for anthropology majors and minors. Expected preparation: Anth 103.

Anth 305 - Culture and Power (4)
Explores the historical development of the concept of culture within anthropology. Examines how the culture concept and the theories based on it both challenge and reproduce existing power relations. Topics include: structural racism, violence and policing, globalization, inequality, religion, technology. Designed for anthropology majors and minors. Note: This course is not approved for distribution credits. Expected preparation: Anth 103.

Anth 310U - Chinese Culture and Society (4)
Recent issues in contemporary Chinese culture and society including rural and urban transformations, minority representations, gender shifts, religious and resistance movements and other trends. Most years will focus on PRC but may also include Hong Kong and Taiwan.

Anth 311U - Peoples and Cultures of Latin America (4)
Introduction to the peoples and cultures of Latin America, including Mexico, Central and South America, and the Caribbean. Course topics include religion, ecology, race and ethnicity, gender, urbanization, conflict, and social change.

Anth 312U - Southeast Asian Societies and Cultures (4)
Introduction to the societies and cultures of Southeast Asia, the area encompassed today by the nations of Burma (Myanmar), Thailand, Laos, Cambodia, Vietnam, Malaysia, Singapore, Brunei, Indonesia, and the Philippines. Course topics explore the religious and cultural diversity of the area, as well as historical and cultural themes that traverse this region.

Anth 313U - Native American-Settler Relations (4)
Consideration of the contacts, entanglements, exchanges and frictions between Native Americans and colonialist settler populations, including issues of decolonization, social and cultural change and persistence, and shifting governmental policies.

Anth 314U - Native Americans (4)
Ethnographic survey of past and present North American Indigenous peoples, covering sense of place, negotiations and adjustments to colonialism, historical trajectories, and contemporary ways of life.

Anth 315U - American Culture (4)
Central beliefs and core values of modern American society are examined from an anthropological perspective. Considers: value of constructs such as individualism and conformity; creation of public images; kinship and friendship; privacy; schools and neighborhoods; and conflicts involving ethnicity, social class, and gender. Questions the role of culture in our own lives, thereby gaining a greater understanding of social experience and of the concept of culture.

Anth 317U - South Asia (4)
Introduction to the ethnography of South Asia, the area encompassed by India, Pakistan, Sri Lanka, Nepal, Bangladesh, Butan and the Maldives Islands. Topics include colonial history; class, caste, and gender hierarchies; cultural and linguistic diversity; religious conflict; and social change.

Anth 318U - Asian American Experience (4)
Explores the contemporary experiences of Asian immigrants to the United States, focusing on issues of migration, family adjustments, community formations, and identity constructions among diverse groups of Asians including Chinese, Japanese, Korean, Filipino, Vietnamese, South Asians, and others.

Anth 319U - Traditional Cultures of Africa (4)
A survey of the culture history and characteristics of the traditional (before Western influence) cultures of African peoples. This is the same course as BSt 319U and may be taken only once for credit. Cross-Listed as: BSt 319U.
Anth 320 - Indigenous Peoples of the Pacific Northwest Coast (4)

Indigenous peoples of the Pacific Northwest coast of North America include some of the most affluent, diverse, and complex peoples in the world. This course examines the unity and diversity of these cultures from Alaska to the Oregon-California border by tracing their historical evolution and responses to contemporary problems. Topics include: subsistence economies and resource tenure, social and political identity, art, ceremonial and spiritual life, culture change, persistence, and revitalization, and modern Indigenous-state relations.

Anth 325U - Culture, Health, and Healing (4)

Introduction to the field of medical anthropology. Biocultural aspects of disease and healing. Comparison of healers and healing professions in Western and non-Western societies. Interactions among culture, social relations, environment, and health. Topics include healers and healing roles, ethnomedicine and medical pluralism, clinical medical anthropology, and nutritional anthropology.

Anth 330U - Anthropology of Folklore (4)

Review of folklore, including legend, folktales, music, and dance, and its role in society. Emphasis will be on the study of folklore by anthropologists in both western and non-western contexts. Explores how folklore can reveal social relations, conflict and resistance, social change and gender relations.

Anth 333U - Anthropology of Food (4)
