Study and performance of selected repertoire. Available only to students enrolled in large ensemble, chamber music or applied music.
Prerequisite: consent of instructor.

Mus 394 - Chamber Music (1)
Instruction in the art of small ensemble performance; the established repertory of string, wind, keyboard, or vocal chamber music. Maximum: 6 credits.
Prerequisite: consent of instructor.

Mus 395 - Band (1)
Maximum: 6 credits. Audition may be requested.

Mus 396 - Orchestra (1)
Maximum: 6 credits. Audition may be requested.

Mus 397 - Chorus (1)
Maximum: 6 credits. Audition may be requested.

Mus 398 - Jazz Lab Band (1)
Performance of jazz literature in a big band setting. Maximum: 6 credits. Audition may be requested.

Mus 399 - Special Studies (1-6)
(Credit to be arranged.)

Mus 401 - Research (1-6)
(Credit to be arranged.) Consent of instructor.

Mus 402 - Independent Study (1-12)
(Credit to be arranged.)

Mus 404 - Cooperative Education/Internship (1-12)
(Credit to be arranged.)

Mus 405 - Reading and Conference (1-6)
(Credit to be arranged.) Consent of instructor.

Mus 406 - Special Projects (1-12)
(Credit to be arranged.)
Mus 407 - Seminar (1-6)
(Credit to be arranged.) Consent of instructor. Recent topics have included Style Analysis; Style Criticism; Music History; Music in the Elementary School; Seminar in Composition.

Mus 407U - Seminar (4)
(Credit to be arranged.) Consent of instructor. Recent topics have included Style Analysis; Style Criticism; Music History; Music in the Elementary School; Seminar in Composition.

Mus 408 - Workshop (0-6)
(Credit to be arranged.)

Mus 409 - Practicum (1-12)
(Credit to be arranged.)

Mus 410 - Selected Topics (1-6)
(Credit to be arranged.)

Mus 410U - Selected Topics (4)
(Credit to be arranged.)

Mus 411 - Topics in Music History (2)
Examines a selected theme in music history to be drawn from specific composers, performers, genres, styles, works, geographical locations, or time periods. Topics will be contextualized to address broader issues of race, ethnicity, gender, cultural significance, ownership, transmission, technology, and globalization. Specific topics vary by term. Course may be taken more than once with permission of instructor.
Prerequisite: Mus 306.

Mus 422 - Analytical Techniques (3)
Study of the formal structure of musical compositions of various styles with the purpose of discovering the sources of unity, variety, order, and expression present in them.
Prerequisite: Mus 311.

Mus 424 - Instrumental Jazz Arranging I (2)
In-depth study and application of the fundamentals of composing and arranging for small to large jazz ensembles. Subjects include history, transposition, instruments, forms, harmonic and melodic construction, rhythm section, voicing, moving harmonization, score and part preparation, vocal arranging techniques, rehearsal techniques, and MIDI applications. Instructor approval required. This is the first course in a sequence of three: Mus 424, Mus 425, and Mus 426.
Also offered for graduate-level credit as Mus 524 and may be taken only once for credit. Prerequisite: Upper-division standing.

Mus 425 - Instrumental Jazz Arranging II (2)
In-depth study and application of the fundamentals of composing and arranging for small to large jazz ensembles. Subjects include history, transposition, instruments, forms, harmonic and melodic construction, rhythm section, voicing, moving harmonization, score and part preparation, vocal arranging techniques, rehearsal techniques, and MIDI applications. Instructor approval required. This is the second course in a sequence of three: Mus 424, Mus 425, and Mus 426.
Also offered for graduate-level credit as Mus 525 and may be taken only once for credit. Cross-Listed as: Upper-division standing.

Mus 426 - Instrumental Jazz Arranging III (2)
In-depth study and application of the fundamentals of composing and arranging for small to large jazz ensembles. Subjects include history, transposition, instruments, forms, harmonic and melodic construction, rhythm section, voicing, moving harmonization, score and part preparation, vocal arranging techniques, rehearsal techniques, and MIDI applications. Instructor approval required. This is the third course in a sequence of three: Mus 424, Mus 425, and Mus 426.
Also offered for graduate-level credit as Mus 526 and may be taken only once for credit. Prerequisite: Upper-division standing.

Mus 427 - Opera Workshop (1)
A workshop in preparing and performing operatic literature for advanced singers.
Also offered for graduate-level credit as Mus 527 and may be taken only once for credit. Prerequisite: consent of instructor through audition.

**Mus 428 - Opera Production (2)**
Annual production of a major operatic work. Designed for singers, orchestral instrumentalists, and technical support staff in the areas of costuming, set design, and other areas. Casting for production is by audition during winter quarter.

Also offered for graduate-level credit as 528 and may be taken only once for credit. 

**Mus 430 - Song Literature (3)**
Study of the solo literature for voice through analysis of scores and recordings and live performances. Historical perspectives from Elizabethan song to 20th-century art songs. Also offered for graduate-level credit as Mus 530 and may be taken only once for credit.

Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 431 - Chamber Music Literature (3)**
Historical survey of the music associated with the chamber music repertoire from 1600-1950. Emphasis on analysis of scores and recordings.

Also offered for graduate-level credit as Mus 531 and may be taken only once for credit. Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 432 - Band Wind Literature (3)**
A study of literature for ensembles of wind and wind/percussion instruments from about 1600 to the present. Historical perspective will be gained through reading, style-analysis, and listening. Attention will be given to the practical application of band literature in elementary and secondary teaching situations.

Also offered for graduate-level credit as Mus 532 and may be taken only once for credit. Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 433 - Orchestral Literature (3)**
A historical survey of the music associated with the symphony orchestra from the development of each orchestral instrument to the present day. Intensive study of those works of great significance is achieved through score study and analysis of several interpretations through recordings. Attention will be given to the practical application of orchestral literature in elementary and secondary teaching situations.

Also offered for graduate-level credit as Mus 533 and may be taken only once for credit. Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 434 - Choral Literature (3)**
This course offers an investigation and analysis of literature for choir of all sizes, for secular and sacred use, particularly in relation to use in public school at the junior high and high school levels and in church choir situations. A survey of the development of choral literature from 1400 to the present, with examples via listening and study of scores, will be included.

Also offered for graduate-level credit as Mus 534 and may be taken only once for credit. Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 436 - Opera Literature (3)**
An intensive study of the development of opera in western music, from the works of Monteverdi in the early 17th century to the important operas of this century.

Also offered for graduate-level credit as Mus 536 and may be taken only once for credit. Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 437 - Keyboard Literature (3)**
A study of Baroque, Classical, Romantic, and Twentieth Century literature for keyboard instruments. In addition to providing an overview of the historical development of keyboard music, specific works from the repertoire of each period will be selected for intensive study and performance. Intended primarily for piano or harpsichord majors. This is the first course in a sequence of two: Mus 437 and Mus 438.

Also offered for graduate-level credit as Mus 537 and may be taken only once for credit. Prerequisite: by audition.

**Mus 438 - Keyboard Literature (3)**
A study of Baroque, Classical, Romantic, and Twentieth Century literature for keyboard instruments. In addition to providing an overview of the historical development of keyboard music, specific works from the repertoire of each period will be selected for intensive study and performance. Intended primarily for piano or harpsichord majors. This is the second course in a sequence of two: Mus 437 and Mus 438.

Also offered for graduate-level credit as Mus 538 and may be taken only once for credit. Prerequisite: by audition.

**Mus 439 - Instrumental Literature (3)**
An intensive study of the development of literature for various individual or groups of instruments (e.g., flute, clarinet, oboe, bassoon, saxophone, trumpet, horn, trombone, tuba, violin, viola, cello, bass,
percussion, brass, woodwinds, strings). The course may be listed with the specific instrument in the title.

Also offered for graduate-level credit as Mus 539 and may be taken only once for credit. Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 445 - Business of Music (3)**

Comprehensive examination of performance and production as professions for musicians of all genres. Areas of focus include employment strategies, professional affiliations, music career expectations, entertainment industry and management. Topics include branding, marketing, accounting, taxes, distribution and labels, rights and royalties, business relationships, and professional organizations.

Also offered for graduate-level credit as Mus 545 and may be taken only once for credit. Prerequisite: upper-division standing.

**Mus 450 - Collaborative Piano Literature Strings (3)**

Introduction to the instruments from the string family through in-depth study of the instruments themselves and standard duo repertoire.

Also offered for graduate-level credit as Mus 550 and may be taken only once for credit. Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 451 - Collaborative Piano Literature Winds and Brass (3)**

Introduction to the instruments from the woodwind and brass family through in-depth study of the instruments themselves and standard duo repertoire.

Also offered for graduate-level credit as Mus 551 and may be taken only once for credit. Prerequisite: Mus 304, Mus 305, and Mus 306.

**Mus 452 - Advanced Keyboard Techniques (3)**

This course is designed to provide pianists with skills needed to function successfully in many different professional environments. Many of these skills were previously common among pianists such as transposition, harmonization, and figured bass reading but fell out of favor over time. Other advanced skills were born out of today’s professional requirements such as playing from a chord chart, using electronic instruments, and extended keyboard techniques.

Also offered for graduate-level credit as Mus 552 and may be taken only once for credit.

**Mus 471 - Advanced Jazz Improvisation I (2)**

Advanced concepts of jazz improvisation. Principles of pentatonics, diminished harmonies, inside-outside playing, synthetic scales, and free improvisation. Instructor approval required. This is the first course in a sequence of three: Mus 471, Mus 472, and Mus 473.

Also offered for graduate-level credit as Mus 571 and may be taken only once for credit. Prerequisite: Mus 271, Mus 272, and Mus 273.

**Mus 472 - Advanced Jazz Improvisation II (2)**

Advanced concepts of jazz improvisation. Principles of pentatonics, diminished harmonies, inside-outside playing, synthetic scales, and free improvisation. Instructor approval required. This is the second course in a sequence of three: Mus 471, Mus 472, and Mus 473.

Also offered for graduate-level credit as Mus 572 and may be taken only once for credit. Prerequisite: Mus 271, Mus 272, and Mus 273.

**Mus 473 - Advanced Jazz Improvisation III (2)**

Advanced concepts of jazz improvisation. Principles of pentatonics, diminished harmonies, inside-outside playing, synthetic scales, and free improvisation. Instructor approval required. This is the third course in a sequence of three: Mus 471, Mus 472, and Mus 473.

Also offered for graduate-level credit as Mus 573 and may be taken only once for credit. Prerequisite: Mus 271, Mus 272, and Mus 273.

**Mus 474 - Midi Applications (2)**

Study of the fundamentals of MIDI and computer music programs. Includes work on synthesizers, sequencing, and notation software. This is the first course in a sequence of two: Mus 474 and Mus 475.

Also offered for graduate-level credit as Mus 574 and may be taken only once for credit. Prerequisite: consent of instructor.

**Mus 476 - Computer Music Composition (3)**

Introduces concepts, applications, and projects in sound synthesis, sampling, and digital signal processing. Students learn to create real time compositions using a graphical programming environment and studio pieces using various sound editing applications.

Prerequisite: Mus 242, Mus 247, or permission of instructor.

**Mus 481 - Pedagogy (3)**

Methods, materials, curriculum, and philosophical bases for teaching in a private studio and classroom with focus on individual and group instruction. This is the first course in a sequence of three: Mus 481, Mus 482, and Mus 483.
Mus 484 - Music with Children (3)
Methods and materials for teaching general music classes in the elementary school. Designed for the music specialist; required of all students who seek a basic teaching certificate in music. It is presupposed that all students have performing and theoretical skills and at least one year of music history. Concurrent enrollment in an appropriate practicum (Mus 409) required.

Also offered for graduate-level credit as Mus 584 and may be taken only once for credit. Prerequisite: Upper division standing in music.

Mus 485 - Diction for Singers: Italian (2)
Designed for singers and other musicians interested in classical vocal literature in Italian, this course presents the principles of lyric diction and provides practice in the skills needed to sing in Italian correctly, idiomatically, and expressively. This is the first course in a sequence of three: Mus 485, Mus 486, and Mus 487.

Also offered for graduate-level credit as Mus 585 and may be taken only once for credit. Prerequisite: Upper-division standing.

Mus 486 - Diction for Singers: German (2)
Designed for singers and other musicians interested in classical vocal literature in German, this course presents the principles of lyric diction and provides practice in the skills needed to sing in German correctly, idiomatically, and expressively. This is the second course in a sequence of three: Mus 485, Mus 486, and Mus 487.

Also offered for graduate-level credit as Mus 586 and may be taken only once for credit. Prerequisite: Upper-division standing.

Mus 487 - Diction for Singers: French (2)
Designed for singers and other musicians interested in classical vocal literature in French, this course presents the principles of lyric diction and provides practice in the skills needed to sing in French correctly, idiomatically, and expressively. This is the third course in a sequence of three: Mus 485, Mus 486, and Mus 487.

Also offered for graduate-level credit as Mus 587 and may be taken only once for credit. Prerequisite: Upper-division standing.

Mus 490 - Fundamentals of Acting for Singers (3)
Acting training tailored to singers pursuing careers in performance. Methods are Stanislavski-based, combined with Meisner techniques, and Reichean breath work. The class will involve some lecture, but will primarily focus on storytelling, character development, and other performance techniques taught in an experiential fashion.

Also offered for graduate-level credit as Mus 590 and may be taken only once for credit. Prerequisite: Mus 190 and Mus 290.

Mus 501 - Research (1-9)
(Credit to be arranged.) Consent of instructor.

Mus 502 - Independent Study (1-9)
(Credit to be arranged.)

Mus 503 - Thesis (1-9)
Thesis (Credit to be arranged.)

Mus 504 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

Mus 505 - Reading and Conference (1-6)
(Credit to be arranged.) Consent of instructor.

Mus 506 - Graduate Project or Recital (1-4)
Final conducting project or performance recital required for all Master of Music degrees.

Mus 507 - Seminar (1-6)
(Credit to be arranged.) Consent of instructor. Recent topics have included Style Analysis; Style Criticism; Music History; Music in the Elementary School; Seminar in Composition.

Mus 508 - Workshop (1-6)
(Credit to be arranged.)

Mus 509 - Practicum (1-9)
(Credit to be arranged.)

Mus 510 - Selected Topics (1-6)
(Credit to be arranged.)
Mus 511 - Music Research Methods (3)
A systematic study of research techniques and materials in music history, literature, and music education. Emphasis on the use of library resources and practical applications of research techniques.
Prerequisite: graduate standing in music.

Mus 512 - Graduate Theory Review (3)
A course designed for graduate students who need to review their knowledge of basic theoretical concepts. Can be taken for credit but will not be applied toward completion of degree requirements.

Mus 513 - Score Reading (3)
Techniques for reading and studying scores with a goal of performance.

Mus 514 - Graduate Aural Skills Review I (1)
Designed for graduate students who need to review basic aural skills. Sight singing, melodic and harmonic dictation, aural identification, and improvisation are integral elements of this study.
Note: Graduate review class credits cannot be applied towards completion of degree requirements.
Prerequisite: Mus 514.

Mus 515 - Graduate Aural Skills Review II (1)
Designed for graduate students who need to review basic aural skills. Sight singing, melodic and harmonic dictation, aural identification, and improvisation are integral elements of this study.
Note: Graduate review class credits cannot be applied towards completion of degree requirements.
Prerequisite: Mus 515.

Mus 516 - Graduate Aural Skills Review III (1)
Designed for graduate students who need to review basic aural skills. Sight singing, melodic and harmonic dictation, aural identification, and improvisation are integral elements of this study.
Note: Graduate review class credits cannot be applied towards completion of degree requirements.
Prerequisite: Mus 516.

Mus 520 - Analytical Techniques (3)
Study of analytical techniques applied to musical compositions of various styles to discover sources of unity, variety, order, and expression present in them. The application of a variety of analytical approaches will guide discovery of musical materials, harmonic and rhythmic relationships, compositional procedures, and formal structures in music. This course may be repeated for credit.
Prerequisite: Pass Mus 057 or Mus 512.

Mus 521 - Analysis of Contemporary Music (3)
Thorough study of compositional techniques and structural devices used in contemporary art music. Topics include formal, harmonic, and rhythmic aspects of the music. Impressionism, serialism, set theory, indeterminacy and minimalism are addressed. The focus is on post-tonal music. Also offered for undergraduate-level credit as Mus 421 and may be taken only once for credit.
Prerequisite: Mus 057 or Mus 512.

Mus 522 - Advanced Orchestral Arranging (3)
Instruction in writing for instruments used in large orchestras, showing basic techniques of scoring for string quartet, woodwind and brass quintet, and percussion ensemble. Practical application through scoring of piano music for various orchestral groups of the nature and capability found in the public schools.
Prerequisite: successful completion of the department's graduate entrance examination.

Mus 523 - Advanced Choral Arranging (3)
Study of voice types, text setting, and techniques of writing for various combinations of voices. Practice in arranging melodies for two-, three, and four-part choruses, mixed and unmixed, such as those encountered in the public schools.
Prerequisite: successful completion of the department's graduate entrance examination.

Mus 524 - Instrumental Jazz Arranging I (2)
In-depth study and application of the fundamentals of composing and arranging for small to large jazz ensembles. Subjects included are history, transposition, instruments, forms, harmonic and melodic construction, rhythm section, voicing, moving harmonization, score and part preparation, vocal arranging techniques, rehearsal techniques, and MIDI applications. Instructor approval required. This is the first course in a sequence of three: Mus 524, Mus 525, and Mus 526.
Also offered for undergraduate-level credit as Mus 424 and may be taken only once for credit.

Mus 525 - Instrumental Jazz Arranging II (2)
In-depth study and application of the fundamentals of composing and arranging for small to large jazz ensembles. Subjects included are history, transposition, instruments, forms, harmonic and melodic construction, rhythm section, voicing,
Mus 526 - Instrumental Jazz Arranging III (2)
In-depth study and application of the fundamentals of composing and arranging for small to large jazz ensembles. Subjects included are history, transposition, instruments, forms, harmonic and melodic construction, rhythm section, voicing, moving harmonization, score and part preparation, vocal arranging techniques, rehearsal techniques, and MIDI applications. Instructor approval required. This is the third course in a sequence of three: Mus 524, Mus 525, and Mus 526.

Also offered for undergraduate-level credit as Mus 426 and may be taken only once for credit.

Mus 527 - Opera Workshop (1)
A workshop in preparing and performing operatic literature for advanced singers.

Also offered for undergraduate-level credit as Mus 427 and may be taken only once for credit.
Prerequisite: consent of instructor through audition.

Mus 528 - Opera Production (2)
Annual production of a major operatic work. Designed for singers, orchestral instrumentalists, and technical support staff in the areas of costuming, set design, and other areas. Casting for production is by audition during winter quarter.

Also offered for undergraduate-level credit as Mus 428 and may be taken only once for credit.

Mus 529 - Grad History Review (3)
A course designed for graduate students who need to review their knowledge of basic historical concepts of music. Can be taken for credit but will not be applied toward completion of degree requirements.

Mus 530 - Song Literature (3)
Study of the solo literature for voice through analysis of scores and recordings and live performances. Historical perspectives from Elizabethan song to 20th-century art songs. Also offered for undergraduate-level credit as Mus 430 and may be taken only once for credit.
Prerequisite: Mus 304, Mus 305, Mus 306.

Mus 531 - Chamber Music Literature (3)
Historical survey of the music associated with the chamber music repertoire from 1600-1950. Emphasis on analysis of scores and recordings.

Also offered for undergraduate-level credit as Mus 431 and may be taken only once for credit.
Prerequisite: Mus 304, Mus 305, Mus 306.

Mus 532 - Band Wind Literature (3)
A study of literature for ensembles of wind and wind/percussion instruments from about 1600 to the present. Historical perspective will be gained through reading, style-analysis, and listening. Attention will be given to the practical application of band literature in elementary and secondary teaching situations.

Also offered for undergraduate-level credit as Mus 432 and may be taken only once for credit.
Prerequisite: Mus 304, Mus 305, Mus 306.

Mus 533 - Orchestral Literature (3)
A historical survey of the music associated with each orchestral instrument to the present day. Intensive study of those works of great significance is achieved through score study and analysis of several interpretations through recordings. Attention will be given to the practical application of orchestral literature in elementary and secondary teaching situations.

Also offered for undergraduate-level credit as Mus 433 and may be taken only once for credit.
Prerequisite: Mus 304, Mus 305, Mus 306.

Mus 534 - Choral Literature (3)
This course offers an investigation and analysis of literature for choirs of all sizes, for secular and sacred use, particularly in relation to use in public school at the junior high and high school levels and in church choir situations. A survey of the development of choral literature from c. 1400 to the present, with examples via listening and study of scores, will be included.

Also offered for undergraduate-level credit as Mus 434 and may be taken only once for credit.
Prerequisite: Mus 304, Mus 305, Mus 306.

Mus 536 - Opera Literature (3)
An intensive study of the development of opera in western music, from the works of Monteverdi in the early 17th century to the important operas of this century.

Also offered for undergraduate-level credit as Mus 436 and may be taken only once for credit.
Prerequisite: Mus 304, Mus 305, Mus 306.
**Mus 537 - Keyboard Literature (3)**

A study of Baroque, Classical, Romantic, and Twentieth Century literature for keyboard instruments. In addition to providing an overview of the historical development of keyboard music, specific works from the repertoire of each period will be selected for intensive study and performance. Intended primarily for piano or harpsichord majors. This is the first course in a sequence of two: Mus 537 and Mus 538.

Also offered for undergraduate-level credit as Mus 437 and may be taken only once for credit.

Prerequisite: by audition.

**Mus 538 - Keyboard Literature (3)**

A study of Baroque, Classical, Romantic, and Twentieth Century literature for keyboard instruments. In addition to providing an overview of the historical development of keyboard music, specific works from the repertoire of each period will be selected for intensive study and performance. Intended primarily for piano or harpsichord majors. This is the second course in a sequence of two: Mus 537 and Mus 538.

Also offered for undergraduate-level credit as Mus 438 and may be taken only once for credit.

Prerequisite: by audition.

**Mus 539 - Instrumental Literature (3)**

An intensive study of the development of literature for various individual or groups of instruments (e.g., flute, clarinet, oboe, bassoon, saxophone, trumpet, horn, trombone, tuba, violin, viola, cello, bass, percussion, brass, woodwinds, strings). The course may be listed with the specific instrument in the title.

Also offered for undergraduate-level credit as Mus 439 and may be taken only once for credit.

Prerequisite: Mus 304, Mus 305, Mus 306.

**Mus 540 - Jazz Literature (3)**

Study and analysis of the classic Jazz compositions and recordings.

Prerequisite: Mus 355U.

**Mus 541 - Advanced Conducting Methods (3)**

Study of the concepts of conducting applied to a wide range of music literature. Music of different eras will be used to analyze and practice the conductor’s process. Incorporated into the study of conducting will be rehearsal techniques and relevant historical and theoretical concepts, providing an integrated study of the conductor's art. This course is intended for MA/MS in Music graduate students, MM in Conducting graduate students, or senior-level undergraduate students with instructor permission.

**Mus 542 - Advanced Choral Conducting (3)**

Study of the concepts of conducting applied to a wide range of choral music. Music of different eras will be used to analyze and practice the conductor’s process. Incorporated into the study of conducting will be rehearsal techniques and relevant historical and theoretical concepts, providing an integrated study of the conductor's art. Particular attention given to the creative role of the University, Church, Community, and Public School Choir Director. This course is intended for MM in Conducting graduate students.

Prerequisite: graduate standing in music.

**Mus 543 - Advanced Instrumental Conducting (3)**

Study of the concepts of conducting applied to a wide range of instrumental music. Music of different eras will be used to analyze and practice the conductor’s process. Incorporated into the study of conducting will be rehearsal techniques and relevant historical and theoretical concepts, providing an integrated study of the conductor's art. Particular attention given to the creative role of the University, Community, Professional, and Public School Band or Orchestra Conductor. This course is intended for MM in Conducting graduate students.

Prerequisite: graduate standing in music.

**Mus 544 - Business of Music (3)**

Comprehensive examination of performance and production as professions for musicians of all genres. Areas of focus include employment strategies, professional affiliations, music career expectations, entertainment industry and management. Topics include branding, marketing, accounting, taxes, distribution and labels, rights and royalties, business relationships, and professional organizations.

Also offered for undergraduate-level credit as Mus 445 and may be taken only once for credit.

Prerequisite: upper-division standing.

**Mus 550 - Collaborative Piano Literature Strings (3)**

Introduction to the instruments from the string family through in-depth study of the instruments themselves and standard duo repertoire.

Also offered for undergraduate-level credit as Mus 450 and may be taken only once for credit.
**Mus 551 - Collaborative Piano Literature Winds and Brass (3)**

Introduction to the instruments from the woodwind and brass family through in-depth study of the instruments themselves and standard duo repertoire.

Also offered for undergraduate-level credit as Mus 451 and may be taken only once for credit.

**Mus 552 - Advanced Keyboard Techniques (3)**

This course is designed to provide pianists with skills needed to function successfully in many different professional environments. Many of these skills were previously common among pianists such as transposition, harmonization, and figured bass reading but fell out of favor over time. Other advanced skills were born out of today’s professional requirements such as playing from a chord chart, using electronic instruments, and extended keyboard techniques.

Also offered for undergraduate-level credit as Mus 452 and may be taken only once for credit.

**Mus 560 - Music History: The Medieval Period (2)**

Intensive, analytical study of the history of music of the Middle Ages and its relationship to contemporary historical events. This course may be repeated for credit.

Prerequisite: Pass Mus 056 or Mus 529.

**Mus 561 - Music History: The Renaissance Period (2)**

Intensive, analytical study of the history of music from 1400 to 1600 and its relationship to contemporary historical events. This course may be repeated for credit.

Prerequisite: Pass Mus 056 or Mus 529.

**Mus 562 - Music History: The Baroque Period (2)**

Intensive, analytical study of the history of music from 1600 to 1750 and its relationship to contemporary historical events. This course may be repeated for credit.

Prerequisite: Pass Mus 056 or Mus 529.

**Mus 563 - Music History: The Classical Period (2)**

Intensive, analytical study of the history of music from 1750 to 1825 and its relationship to contemporary historical events.

Prerequisite: Pass Mus 056 or Mus 529.

**Mus 564 - Music History: The Romantic Period (2)**

Intensive, analytical study of the history of music from 1825 to 1900 and its relationship to contemporary historical events. This course may be repeated for credit.

Prerequisite: Pass Mus 056 or Mus 529.

**Mus 565 - Music History: Early 20th Century (2)**

Intensive, analytical study of the history of music from 1900 to 1950 and its relationship to contemporary historical events. This course may be repeated for credit.

Prerequisite: Pass Mus 056 or Mus 529.

**Mus 566 - Music History: Music Since 1950 (2)**

Intensive, analytical study of the history of music since 1950 and its relationship to contemporary historical events. This course may be repeated for credit.

Prerequisite: Pass Mus 056 or Mus 529.

**Mus 567 - Jazz History (2)**

Advanced studies in Jazz History. Course involves individual research projects culminating in student class presentations. This course may be repeated for credit.

Prerequisite: Pass Mus 056 or Mus 529.

**Mus 571 - Advanced Jazz Improvisation I (2)**

Advanced concepts of jazz improvisation. Principles of pentatonics, diminished harmonies, inside-outside playing, synthetic scales, and free improvisation. Instructor approval required. This is the first course in a sequence of three: Mus 571, Mus 572, and Mus 573.

Also offered for undergraduate-level credit as Mus 471 and may be taken only once for credit.

Prerequisite: Mus 271, Mus 272, and Mus 273.

**Mus 572 - Advanced Jazz Improvisation II (2)**

Advanced concepts of jazz improvisation. Principles of pentatonics, diminished harmonies, inside-outside playing, synthetic scales, and free improvisation. Instructor approval required. This is the second course in a sequence of three: Mus 571, Mus 572, and Mus 573.

Also offered for undergraduate-level credit as Mus 472 and may be taken only once for credit.

Prerequisite: Mus 271, Mus 272, and Mus 273.

**Mus 573 - Advanced Jazz Improvisation III (2)**

Advanced concepts of jazz improvisation. Principles of pentatonics, diminished harmonies, inside-outside playing, synthetic scales, and free improvisation. Instructor approval required. This is the third course in a sequence of three: Mus 571, Mus 572, and Mus 573.
Also offered for undergraduate-level credit as Mus 473 and may be taken only once for credit.

**Mus 574 - Midi Applications (2)**
Study of the fundamentals of MIDI and computer music programs. Includes work on synthesizers, sequencing, and notation software. This is the first course in a sequence of two: Mus 574 and Mus 575.

Also offered for undergraduate-level credit as Mus 474 and may be taken only once for credit.
Prerequisite: consent of instructor.

**Mus 580 - Body Mapping for Musicians: Anatomy, Physiology, Movement and Sensory Awareness (2)**
Provides musicians with anatomical information about the body in movement, which will assist the performer sing and sound a musical instrument without pain, tension, or injury. The curriculum will improve facility and expressiveness and once acquired, assist the student to incorporate Body Mapping techniques into their teaching.

**Mus 581 - Pedagogy (3)**
Methods, materials, curriculum, and philosophical bases for teaching in a private studio and classroom with focus on individual and group instruction. This is the first course in a sequence of three: Mus 581, Mus 582, and Mus 583.

Also offered as undergraduate-level credit as Mus 481 and may be taken only once for credit.
Prerequisite: Mus 213, Mus 216, Mus 304, Mus 305, Mus 306.

**Mus 584 - Music with Children (3)**
Methods and materials for teaching general music classes in the elementary school. Designed for the music specialist; required of all students who seek a basic teaching certificate in music. It is presupposed that all students have performing and theoretical skills and at least one year of music history. Concurrent enrollment in an appropriate practicum (Mus 409) required.

Also offered for undergraduate-level credit as Mus 484 and may be taken only once for credit.
Prerequisite: upper division standing in music.

**Mus 585 - Diction for Singers: Italian (2)**
Designed for singers and other musicians interested in classical vocal literature in Italian, this course presents the principles of lyric diction and provides practice in the skills needed to sing in Italian correctly, idiomatically, and expressively. This is the first course in a sequence of three: Mus 585, Mus 586, and Mus 587.

Also offered for undergraduate-level credit as Mus 485 and may be taken only once for credit.

**Mus 586 - Diction for Singers: German (2)**
Designed for singers and other musicians interested in classical vocal literature in German, this course presents the principles of lyric diction and provides practice in the skills needed to sing in German correctly, idiomatically, and expressively. This is the second course in a sequence of three: Mus 585, Mus 586, and Mus 587.

Also offered for undergraduate-level credit as Mus 486 and may be taken only once for credit.

**Mus 587 - Diction for Singers: French (2)**
Designed for singers and other musicians interested in classical vocal literature in French, this course presents the principles of lyric diction and provides practice in the skills needed to sing in French correctly, idiomatically, and expressively. This is the third course in a sequence of three: Mus 585, Mus 586, and Mus 587.

Also offered for undergraduate-level credit as Mus 487 and may be taken only once for credit.

**Mus 588 - Advanced Choral Methods (3)**
Designed for the experienced teacher. In addition to studies of current methods and trends in choral music teaching, the course also provides a forum for problem solving and dealing with special issues and problems in current choral music education.

**Mus 590 - Fundamentals of Acting for Singers (3)**
Acting training tailored to singers pursuing careers in performance. Methods are Stanislavski-based, combined with Meisner techniques, and Reichian breath work. The class will involve some lecture, but will primarily focus on storytelling, character development, and other performance techniques taught in an experiential fashion.

Also offered for undergraduate-level credit as Mus 490 and may be taken only once for credit.
Prerequisite: Mup 190 and Mup 290.

**Mus 594 - Chamber Music (1)**
Instruction in the art of small ensemble performance; the established repertory of string, wind, keyboard, or vocal chamber music. Maximum: 6 credits.
Prerequisite: graduate standing in music.
Mus 595 - Band (1)
Maximum: 6 credits.
Prerequisite: graduate standing in music.

Mus 596 - Orchestra (1)
Maximum: 6 credits.
Prerequisite: graduate standing in music.

Mus 597 - Chorus (1)
Maximum: 6 credits.
Prerequisite: graduate standing in music.

Mus 598 - Jazz Lab Band (1)
Performance of jazz literature in a big band setting.
Maximum: 6 credits.
Prerequisite: graduate standing in music.

NAS - Indigenous Nations Studies

NAS 201 - Introduction to Native American Studies (4)
Introduction to the principal subject matter and interdisciplinary methods of Native American studies. Topics include understanding traditional cultures and languages and their significance for contemporary Native peoples; the political and legal status of Native Americans in the United States and at the U.N.; contemporary Native communities and tribal governments; Native American literature, art, music, dance, both contemporary and traditional.

NAS 299 - Special Studies (1-4)
(Credit to be arranged.)

NAS 301 - Introduction to Native American Languages (4)
General introduction to the linguistic and cultural background of endangered native languages of North America. Topics include structure of native languages; relationship of language to other aspects of culture such as worldview, social organization, and story telling; history of language change and current tribal projects to revitalize native languages.

NAS 306 - Red Power (4)
The Red Power movement arose in reaction to centuries of oppressive federal oversight of American Indian peoples. It comprised an assortment of grassroots organizations that fought for treaty rights, tribal sovereignty, self-determination, cultural preservation, and cultural relevancy in education. This course will examine the Alcatraz occupation and the government response.

NAS 334U - Topics in Film Genres and Movements (4)
Study of major aesthetic, cultural, and social movements in film.

NAS 335U - Topics in Literature and Film (4)
Study of the interplay between the textual and cinematic presentation: how these media have treated specific historical, social, and cultural phenomena, as well as the ways literature and film have inspired and influenced each other in terms of content, form, and audience. This is the same course as Eng 335U and may be repeated for credit with different topics.
Cross-Listed as: Eng 335U.

NAS 342 - Indigenous Gardens and Food Justice (4)
This course examines impacts of colonization on local/traditional foods and health; ethnobotany; and revitalization practices of Indigenous land, water and food sovereignty. Students partner with Native American communities on site design and implementation of edible/medicinal gardens and participate in restoration and creative place-based projects on public lands.

NAS 344 - Indigenous Women Leadership (4)
From Sacajawea to Winona LaDuke, this course identifies the contributions of Indigenous women as keepers of tradition, leaders, teachers, healers, activists and visionaries, drawing upon their voices to understand leadership principles fundamental to Native American and global communities. Social justice, particularly in areas of land and the environment, is emphasized.

NAS 346 - Contemporary Issues in Indian Country (4)
This course examines issues and challenges in Indian Country today, including economic development, natural resource management, health, education, identity and assimilation, social and environmental justice, tribal sovereignty and treaty rights, and the revitalization of Native cultures in the 21st Century. Students will develop a deeper awareness of those issues and how tribes and urban Native communities and organizations are planning, advocating, and
taking action locally, nationally, and globally. This course may be repeated for up to 8 credits.

**NAS 346 - Contemporary Issues in Indian Country (4)**
This course examines issues and challenges in Indian Country today, including economic development, natural resource management, health, education, identity and assimilation, social and environmental justice, tribal sovereignty and treaty rights, and the revitalization of Native cultures in the 21st Century. Students will develop a deeper awareness of those issues and how tribes and urban Native communities and organizations are planning, advocating, and taking action locally, nationally, and globally. This course may be repeated for up to 8 credits.

**NAS 348 - Indigenous Practices for Environmental Sustainability (4)**
This course examines Traditional Ecological Knowledge and Indigenous methodologies and how they affect/inform environmental sustainability, education and land/water management practices and policies. Students spend time in natural areas exploring relationship-building, creative place-based projects, and analysis of current issues facing social/environmental justice in Native American communities.

**NAS 351 - Indigenous Philosophy (4)**
Surveys historical and contemporary indigenous philosophical writings on decolonization, epistemology, metaphysics, and ethics. The majority of the texts will be from authors such as Black Elk, Vine Deloria, Jr, and Leslie Marmon Silko, but sources from indigenous peoples across the globe should also be considered. Possible topics may include indigenous perspectives on sovereignty, proper human relationships with the land, waters, and animals, communication through storytelling, language, and dance, and gender-sexual identity.

**NAS 392 - Indigenous Ways of Knowing (4)**
This course presents a basic world view of Indigenous peoples identifying useful concepts, terms, intellectual frameworks and strategies in their struggles toward liberation and self-determination. Combining feminist, anti-racist theory and tribal critical race theory, this course explores Indigenous philosophy as a means to transform Eurocentric consciousness.

**NAS 399 - Special Studies (1-6)**
(Credit to be arranged.)

**NAS 401 - Research (1-8)**
(Credit to be arranged.)

**NAS 404 - Cooperative Education/Internship (1-12)**
Prerequisites: NAS 201, and 8 upper-division credits in NAS or courses approved by adviser.

**NAS 405 - Reading and Conference (1-8)**
(Credit to be arranged.)

**NAS 406 - Special Projects (1-12)**
(Credit to be arranged.)

**NAS 407 - (1-6)**

**NAS 410 - Selected Topics (1-4)**
(Credit to be arranged.)

**NAS 411 - Nationhood: Tribal Sovereignty, Governance & Policy (4)**
Nationhood examines prevalent theories and strategies for pursuing Indigenous self-determination from both inside and outside the state-centric global capital system. This course looks to distinguish between Indigenous place-based cultures and Western time-oriented heritages by utilizing position and land occupation as an ontological framework for understanding relationships.
Prerequisite: Upper-division standing.

**NAS 417 - Maintenance and Revitalization of Endangered Languages (4)**
General introduction to endangered language revitalization, with a focus on native languages of the Pacific Northwest. Topics include history of attempts to eradicate native languages and the effects on those languages and their communities; theoretical basis for revitalization; emerging tribal policies; and relations between linguists and native communities.
NAS 426 - Tribal Critical Race Theory (4)
This course involves the discourse on Native American Studies from the perception of Indigenous storytellers, artists, and activists whose compelling productions undertake critical examinations of imperialism, history, writing and theory—focusing on strategies of resistance. These productions will help us challenge myths about Indigenous peoples which replicate and reproduce stereotypes.
Prerequisite: NAS 201 or instructor approval.

NAS 442 - Decolonizing Methodologies: Insurgent Research and Indigenous Education (4)
Decolonizing Methodologies will provide students the analytical tools and methods necessary for conducting applied research, as well as exploration of the practical, ethical, and political issues involved in conducting research with Indigenous communities. This course integrates a post-colonial research utilizing a decolonized lens—encouraging students to engage in community-based research.
Prerequisite: NAS 201 or instructor approval.

NAS 502 - Independent Study (1-12)
(Credit to be arranged.)

NAS 506 - Special Projects (1-12)
(Credit to be arranged.)

NAS 507 - Seminar (1-8)
(Credit to be arranged.)

NAS 509 - Practicum (1-9)
(Credit to be arranged.)

NAS 510 - Selected Studies (1-8)
(Credit to be arranged.)

Norw - Norwegian
Norw 101 - First-Year Norwegian Term 1 (4)
Beginning Norwegian. Emphasis on communication skills: listening, speaking, reading, writing. This is the first course in a sequence of three: Norw 101, Norw 102, and Norw 103.

Norw 102 - First-Year Norwegian Term 2 (4)
Beginning Norwegian. Emphasis on communication skills: listening, speaking, reading, writing. This is the second course in a sequence of three: Norw 101, Norw 102, and Norw 103.

Norw 103 - First-Year Norwegian Term 3 (4)
Beginning Norwegian. Emphasis on communication skills: listening, speaking, reading, writing. This is the third course in a sequence of three: Norw 101, Norw 102, and Norw 103.

Norw 199 - Special Studies (1-5)
(Credit to be arranged.)

Norw 201 - Second-Year Norwegian Term 1 (4)
Intensive review of basics introduced in first-year courses and further development of communication skills. This is the first course in a sequence of three: Norw 201, Norw 202, and Norw 203. Recommended prerequisite: Norw 103.

Norw 202 - Second-Year Norwegian Term 2 (4)
Intensive review of basics introduced in first-year courses and further development of communication skills. This is the second course in a sequence of three: Norw 201, Norw 202, and Norw 203. Recommended prerequisite: Norw 103.

Norw 203 - Second-Year Norwegian Term 3 (4)
Intensive review of basics introduced in first-year courses and further development of communication skills. This is the third course in a sequence of three: Norw 201, Norw 202, and Norw 203. Recommended prerequisite: Norw 103.

Norw 299 - Special Studies (1-5)
(Credit to be arranged.)

Norw 399 - Special Studies (1-8)
(Credit to be arranged.)
OMSE - Software Engineering

OMSE 500 - Principles of Software Engineering (3)
An introduction to software engineering in industry. This course focuses on understanding the nature of software engineering, the software engineering process, and the problems and solutions manifest in real software development and modification projects. Different models of the software engineering process are compared and contrasted. Current best practices in software engineering and various approaches to software process improvement are presented. Two years of software development experience is required for registration.

OMSE 506 - Special Projects (1-6)
(Credit to be arranged.)

OMSE 507 - Seminar (1-8)
(Credit to be arranged.)

OMSE 510 - Special Topics (1-4)
(Credit to be arranged.)

OMSE 511 - Managing Software Development (3)
Provides the knowledge and skills needed to plan, organize, lead, and control a software project. Topics include planning and estimating, measuring and controlling, and leading and directing a software project. Quantitative measures and risk management will be emphasized throughout the course. Students will prepare project plans for real or hypothetical software projects, to include effort, cost, and schedule estimates and risk management plans. Two years of software development experience is required for registration.

OMSE 513 - Professional Communication Skills for Software Engineers (3)
Covers the skills necessary for appropriate professional conduct and effective communication in a professional setting. It includes technical writing, making effective presentations, conducting effective meetings, conflict resolution, team and decision-making skills, and professional ethics. Students will engage in a project that covers the major topics of the course. Two years of software development experience is required for registration.

OMSE 514 - Computing Foundations (3)
Introduction to the building blocks of a basic computing machine including the central processing unit, data transfer buses, registers, program counters, various types of memories, and instruction sets. A range of processor architectures and organizations including pipelining, virtual memory and caching are explored. Also explores the principles of operating systems and how they relate to the underlying hardware structures as well as concurrency, process synchronization, process scheduling, memory management, interrupt handling, and device management. Basic understanding of C or C++ required.

OMSE 515 - Software Foundations (3)
Introduction to fundamental language constructs including pointers, recursion and abstraction, and the principles of algorithmic analysis and Big-O notation. Progressively explores several foundation data structures and algorithms including linked lists, trees, hashing, and graphs which are illustrated using C, C++ and Java code fragments. Introduces selected topics in statistics and discrete mathematics, in particular, sets, set operations, propositional calculus, first-order predicate calculus and finite state machines. Registration requires permission of the OMSE program office. Recommended prerequisite: Mth 112.

OMSE 516 - Software Process Improvement (3)
How to effectively introduce improvements to software engineering processes in their organization. Designed to help the student successfully discover and improve software engineering practices in such areas as software requirements, architecture, design, coding, integration and testing. Technical issues are emphasized but balanced with real-world considerations including organizational politics, corporate culture, and psychology.
Prerequisite: OMSE 500.

OMSE 517 - Agile Software Development (3)
Designed for graduate level software engineering students who are interested in learning and applying the fundamentals of the Agile software development process in the real world. Explores Agile concepts both in theory and practice. Introduction to the principles and foundations of Agile Development, XP (Extreme Programming) and the SCRUM methodology. Also introduces the students to day-to-
day life on an Agile team. Expected preparation: OMSE 500.

OMSE 521 - Using Metrics and Models to Support Quantitative Decision Making (3)

Provides the knowledge and skills needed to apply quantitative tools based on metrics and models of the software product and development process to make decisions under uncertainty. Topics covered will include measurement concepts, decision-making under uncertainty, and model and metric development for the software development enterprise. Foundation coursework is required for registration.

OMSE 522 - Modeling and Analysis of Software Systems (3)

Abstract models are used to formalize specifications of software systems. Formalized reference specifications serve as a basis for the design of software implementations and for validating critical properties of software systems. Provides the fundamental mathematical concepts needed to understand abstract models of software and to reason about them. Foundation coursework is required for registration.

OMSE 525 - Software Quality Analysis (3)

Processes, methods, and techniques for developing quality software, for assessing software quality, and for maintaining the quality of software. Tradeoffs between software cost, schedule time, and quality. Integrating quality into the software development process; formal review and inspection methods; principles of testing and test planning; module design for testability; maintaining quality while supporting existing software. Two years of software development experience is required for registration.

OMSE 531 - Software Requirements Engineering (3)

Principles, tools, and techniques for requirements elicitation, specification, and analysis. Focus on understanding the role of requirements in the development process, goals of the requirements phase, essential difficulties of specifying requirements for real systems, and effective methods, tools, and techniques. Covers techniques for formally modeling and specifying software requirements with hands-on experience. Two years of software development experience is required for registration.

OMSE 532 - Software Architecture and Domain Analysis (3)

Methods and principles of the architectural design of complex, large-scale software systems to accommodate change and evolution through many product releases or versions. Survey of the major architectural styles, their strengths and weaknesses, and architectural trade-offs with respect to system goals and desired properties. Study of architectural approach to development of open systems and frameworks based on case studies. Software engineering of domain-specific software architectures for families of systems (e.g., product lines) including domain analysis, domain modeling, and design of domain-specific software architectures. Relation of software architecture to requirements and its effects on downstream design and software evolution. Students examine domain analysis and the architectural design process and products in the business context including the effect of decisions on cost and schedule. Foundation coursework is required for registration.

OMSE 533 - Software Design Techniques (3)

Covers the principles of software design and a survey of design methods, techniques, and tools. In-depth and hands-on study of at least one method such as object-oriented design as applied to a realistic industrial problem. Examines the effects of design decisions on the functional and non-functional properties of the software (e.g., ease of understanding, maintainability, and reuse) and how software engineering principles are applied to make appropriate trade-offs. Also examines the design process and products in context including the effect of design decisions on function, quality, cost, and schedule. Foundation coursework is required for registration.

OMSE 534 - Software Estimating (3)

Software estimating techniques and tools enable the responsible software engineering manager to assess project feasibility, secure adequate budgets, and manage project tasks and schedules. The student learns how to make viable software estimates to consistently inform software project planning, scheduling, and oversight. The full range of software estimating methods and tools are explored.

Prerequisite: OMSE 500, OMSE 511.
OMSE 535 - Software Implementation and Testing (3)

Covers the principles of implementing and verifying computer software. Implementation topics include coding style, packaging principles, reuse, testability, and maintainability. Verification topics include structural (white box) testing and techniques for code verification. Also included will be verification and integration of foreign code; testing techniques and how to apply them; including code-based and specification-based testing; hands-on application of the testing process including test case generation; and test adequacy, test validation, test execution, and automation. Foundation coursework is required for registration.

OMSE 551 - Strategic Software Engineering (3)

Where traditional software engineering focuses on the development and maintenance of individual systems, strategic software engineering addresses the development of multiple systems over time. Significant gains in productivity, cost, and schedule can result from systematic improvement of the software development process and systematic reuse of life-cycle products over multiple developments. Covers the principles, methods, and tools for strategic software development including process modeling and improvement, developing programs as families of systems, and systematic approaches to code generation and the reuse of non-code products, including requirements and design.

Prerequisite: All previous OMSE courses.

OMSE 555 - Software Engineering Practicum I (3)

The objective of the practicum is to provide hands-on software engineering management and development experience applying the principles, methods, processes and tools learned from OMSE courses. The practicum is comprised of two parts and organized as two courses, OMSE 555 and OMSE 556 (3 credits each) completed in sequence. The class is grouped into one or more integrated project teams jointly undertaking a coordinated software engineering problem. The evaluation (grading) process equally weights group and individual performance. Problems undertaken by student teams apply the practices learned in OMSE classes across the software engineering process. Projects range from technical evaluations, analysis and specification, through architectural design to prototype development and testing. Every project involves applying best project management, quality assurance and configuration management practices. This is the first course in a sequence of two: OMSE 555 and OMSE 556 which must be taken in sequence.

Prerequisite: All core OMSE courses other than OMSE 555 and OMSE 556, namely, OMSE 500, OMSE 511, OMSE 513, OMSE 525, OMSE 531, OMSE 521, OMSE 532, OMSE 533, OMSE 534, OMSE 535 and OMSE 551.

OMSE 556 - Software Engineering Practicum II (3)

The objective of the practicum is to provide hands-on software engineering management and development experience applying the principles, methods, processes and tools learned from OMSE courses. The practicum is comprised of two parts and organized as two courses, OMSE 555 and OMSE 556 (3 credits each) completed in sequence. The class is grouped into one or more integrated project teams jointly undertaking a coordinated software engineering problem. The evaluation (grading) process equally weights group and individual performance. Problems undertaken by student teams apply the practices learned in OMSE classes across the software engineering process. Projects range from technical evaluations, analysis and specification, through architectural design to prototype development and testing. Every project involves applying best project management, quality assurance and configuration management practices. This is the second course in a sequence of two: OMSE 555 and OMSE 556 which must be taken in sequence.

Prerequisite: All core OMSE courses other than OMSE 555 and OMSE 556, namely, OMSE 500, OMSE 511, OMSE 513, OMSE 525, OMSE 531, OMSE 521, OMSE 532, OMSE 533, OMSE 534, OMSE 535 and OMSE 551.

PA 311U - Introduction to Civic Engagement (4)
This course examines the concept of civic engagement by exploring how relationships are strengthened and communication is nurtured among members of society, and how this contributes to a civic identity that promotes socially conscious thought and action. The course will examine the values, skills and actions that contribute to a sense of civic identity through assigned readings, lectures, discussions, group activities, and self-reflection. A central goal of this course is to help students prepare for a lifetime of responsible citizenship and civic engagement. This course includes a community-based learning project.

PA 312U - Foundations of Community Leadership (4)
This course explores the role of community leadership in advancing civic engagement, civil society, civic capacity, community-building, reasoned debate and other key civic virtues in democratic societies. Students will integrate leadership theory with practical observations in the context of the United States’ socio-political history and the role of civic engagement in our evolving social system. The course builds a definition for community leadership that recognizes the close interface between the role of public servants as agents of policy implementation and the role of citizens as active stewards of the public good.

PA 313U - Fundamentals of Public Service (4)
Exploration of how public service informs the roles of public/nonprofit organizations in social change. Introduction to conceptual public service frameworks and exploration of the historical dimensions, underlying values and external forces that shape contemporary public service. Ways for community members to influence public policy through civic engagement are addressed.

PA 314U - Students as Leaders (4)
Introduces the concepts of leadership from theoretical and practical perspectives. Students will explore their own leadership competencies using the Social Change Model in relation to individuality, group dynamics and community building. Through in-class activities, interviews, and research, students will examine leadership as an individual/group process to create social change.

PA 315U - Managing People for Change (4)
This course examines today’s workforce and the new competencies required to manage people to meet the corresponding modern day challenges. It borrows from contemporary discussions about public sector (government and nonprofit) organizations as well as private sector organizations. Topics include human capital, workplace politics, intergenerational challenges, and job/wage disparities.
Prerequisite: junior standing.

PA 316 - Leadership in New Student Programs (3)
Focus on developing an understanding of the transitional needs of students and their families upon entering Portland State University (PSU). Explores the demographics of students and identifies student development theory in relationship to New Student Programs. Key topics include: utilizing the Change Model of Leadership Development, teamwork, communication, student development, leadership development, and diversity.

PA 320U - Introduction to Nonprofit Management (4)
Introduction to the importance of the nonprofit sector in contemporary society and examination of the sector’s contribution to the social, political, and economic economy. Emphasis placed on practical application of nonprofit management theory, helping students gain the knowledge and skills appropriate to taking on nonprofit leadership roles.
PA 399 - Special Studies (1-4)
(Credit to be arranged.)

PA 402 - Independent Studies (1-8)
(Credit to be arranged.)

PA 403 - (1-9)

PA 405 - Reading and Conference (1-8)
(Credit to be arranged.)

PA 406 - Special Projects (1-8)
(Credit to be arranged.) Consent of instructor.

PA 409 - Practicum (1-12)
(Credit to be arranged.)

PA 410 - Selected Topics (1-6)
(Credit to be arranged.)

PA 412 - Civic Engagement: The Role of Governing Institutions (4)
This course develops understanding of how local governments carry out their governance responsibilities and the roles they play within the larger scheme of the American democratic system. The goal is to assess how the structures and processes of local governments affect opportunities for democratic accountability, citizen participation, the development of civic capacity, citizenship and civic leadership.
Prerequisite: PA 311U or PA 312U.

PA 413 - Civic Engagement: The Role of Individuals (4)
This course provides an overview of the role of the individual in civic engagement processes. Students will develop an understanding of the variety and forms of engagement processes in which individuals participate within local and national governments and public organizations. The course focuses on developing students' ability to critically analyze a variety of civic engagement processes and understand the consequences, limitations, opportunities, and benefits of these various processes. Students will examine whether individuals have equal opportunities to engage in political and social decision-making structures, and how they serve as change agents to address social injustice.
Prerequisite: PA 311U, PA 312U or PA 313U.

PA 414 - Civic Engagement: The Role of Social Institutions (4)
Develops an understanding of the roles that social institutions (voluntary associations, public interest groups, educational and religious institutions, and nonprofit organizations) play within democratic societies. Additionally, the course investigates the literature on social institutions and social capital, including their historical development, modern forms, social functions, and ways in which they shape individuals' participation in governing processes. Students will examine the relationships among socially sustainable communities, strong social institutions and private interests by analyzing the mechanisms that generate participation and deliberation.
Prerequisite: PA 311U or PA 312U.

PA 415 - Civic Leadership Integrative Seminar (4)
This seminar is devoted to exploring, investigating, discussing, understanding, and synthesizing the theoretical understandings and practical applications of civic leadership. Students will have an opportunity to reflect upon, synthesize, and showcase their knowledge through development of a portfolio that demonstrates their learning about civic leadership.
Prerequisite: One of PA 311U, PA 312U or PA 313U, plus one of PA 412, PA 413 or PA 414.

PA 417 - Ethical Leadership (4)
Explores potential ethical conflicts faced by leaders in public and community service. The course will provide students with ethical leadership models that will help them to judge the ethical compromises that may put personal, professional, organizational, and public service values in conflict with one another. Coursework will include a review of the theoretical concepts that underpin ethical leadership and will explore their practical application through case studies and the experiences of elected and career public officials who have faced ethical dilemmas in public and community service.
Prerequisite: PA 312U or PA 313U.

PA 425 - Grantwriting for Nonprofit Organizations (4)
Students will acquire necessary skills to write successful grant proposals for foundations and other private funders. Students will learn how to: develop a project idea, plan a project or program, cultivate and work with prospective funders, develop and write a
proposal, and generally learn skills to strengthen the
grant-seeking process.

**PA 430 - Recruitment of Volunteers (2)**
This course takes a marketing approach to
volunteerism. Interactive activities and discussion
build on applying basic principles of volunteerism;
examining different styles of volunteering; building a
recruiting plan; examining marketing for volunteers;
and managing recruitment. Assignments are
interactive and designed to build applicable skills.
Prerequisite: upper-division standing..

**PA 431 - Training of Volunteers (2)**
This course engages students in organizing training
and continuing education sessions for volunteers.
Topics include: how adults learn, learning styles,
building content, measurable learning objectives,
selecting the best teaching techniques, and evaluation
of learning. Assignments are interactive designed to
build skills directly applicable to a manager of
volunteers program.
Prerequisite: upper-division standing..

**PA 432 - Leadership and Management of
Volunteer Programs (2)**
The healthy organization aligns support for staff who
work with volunteers, makes volunteers an integral
part of all work, provides staff development, and
rewards staff accomplishments related to work with
volunteers. In this course students will gain an
understanding of the impact of communication style
and leadership on volunteer programs.
Prerequisite: upper-division standing..

**PA 433 - Evaluation and Recognition of Volunteer
Programs (2)**
Students are exposed to evaluation methods, types,
and styles for programs and for individual volunteers.
Motivational theories are connected to the
effectiveness of different type of recognition.
Assignments are interactive and designed to build
skills directly applicable to a manager of volunteers
program.
Prerequisite: upper-division standing..

**PA 501 - Research (1-9)**
(Credit to be arranged.)

**PA 502 - Independent Study (1-9)**
(Credit to be arranged.)

**PA 504 - Cooperative Education/Internship (1-9)**
(Credit to be arranged.)

**PA 505 - Reading and Conference (1-6)**
(Credit to be arranged.)

**PA 506 - Special Projects (1-6)**
(Credit to be arranged.) Consent of instructor.

**PA 507 - Seminar (0-6)**
(Credit to be arranged.)

**PA 508 - Reflective Practice (3)**
(Credit to be arranged.)

**PA 509 - Organizational Experience (1-6)**
Final integrative experience required for all M.P.A.
and M.P.A.:HA students, who have limited or no
administrative experience, and for all M.P.H.:HMP
students regardless of experience. The student
completes a field experience with an appropriate
agency, culminating in a project report systematically
analyzing an administrative problem that is both
instructive to the student and of importance to the
agency. Students are required to attend an orientation
seminar to aid them in planning how the field
experience will integrate with their coursework and
their career goals, and to cultivate the habit of
reflective practice. PA 509 may only be taken after
students have earned at least 42 credits in their
program of study.

**PA 510 - Selected Topics (0-6)**
(Credit to be arranged.)

**PA 511 - Public Administration (3)**
The role of administration in a democratic society.
The course surveys the field, the development of the
profession and practices in public administration, and
examines the legal, historical, economic, and political
foundations of the American governmental and
nonprofit traditions.
PA 512 - Case Analysis (3-6)
This course is designed to provide mid-career students with administrative experience an opportunity to develop skills in the areas of reflective practice, administrative problem solving, consulting, and coaching. Students will be required to present a case problem they developed as the basis of an exercise in administrative problem solving and coaching for their fellow students.
Prerequisite: at least three years of full-time administrative or management experience in a public, nonprofit and/or healthcare organization and 42 hours of completed coursework toward the degree.

PA 513 - Administrative Ethics and Values (3)
Explores values, ethics, and morality in public sector administration. It considers such concepts and issues as the following: personal and professional values and roles; the myth of value neutrality; the public interest; values, ethics, and change; value trade-offs; ethical ambiguities; ethical codes, fiscal ethics, and ethics and administrative discretion.
Prerequisite: PA 511.

PA 514 - Global Leadership and Management (3)
Contemporary global realities require emerging public sector leaders to prepare themselves by learning adaptable leadership and management concepts and tools. This core course is designed to equip interested students, both from the U.S. and abroad, with professional skills and practical knowledge that will help them "to lead and manage responsibly" in a range of global settings.

PA 515 - Public Works Administration (3)
A general overview of administrative practices in public works, including an evaluation of organizational practices, project management, and relationships to political processes. The course will consider actual problems in the administration of public works.

PA 516 - Current Issues in Public Management (3)
Explores two major strategies for the reform of public organizations: (1) an economic-centered approach that emphasizes private market-place incentives and the measurement of outcomes and (2) a civic dialogue approach that advocates the use of deliberative processes, reliance on collaboration, and a greater role of nonprofit organizations in the design and delivery of public services. The purpose of this course is to examine these approaches within the context of traditional models that have guided the public policy and management role of the bureaucracy in the American system of democratic governance.

PA 517 - Leadership Development for Public Organizations (3)
Course focuses on two activities: (1) use of assessment instruments to prepare individual leadership profiles and (2) an examination of various leadership theories with applications to specific leadership situations. The goal of the course is to assist participants in understanding their own individual leadership styles and capacities and to better appreciate what is required to successfully lead at an individual, team/group, organizational, and larger community level.

PA 518 - Leading Public Organizations (3)
Course seeks to develop an understanding of the essential ingredients of leading public organizations, including creating a vision, developing support for the vision, and transforming the vision into an organizational legacy. It focuses on the distinctive role responsibilities of the leader as an agent of the organization within the larger community setting, thus distinguishing the course from other leadership classes that focus on either an individual or organizational perspective. As part of this larger external focus, participants acquire the knowledge and skills to undertake inter-jurisdictional and strategic planning, conflict management, to work with the media, and to develop and implement collaborative agreements.

PA 519 - Civic Capacity (3)
Examines the factors that contribute to the capacity of communities to create social agreement and to sustain collective action over time. Provides students with an opportunity to evaluate current research on the factors that contribute to the development of social capital and to apply this research to field-based community building activities.

PA 520 - Introduction to Nonprofit Management (3)
Introduces students to a wide range of management needs, problems, and issues of not-for-profit organizations. It considers such items as the following: the executive director as manager; aspects of governance; volunteer/staff relations; personnel administration; budgeting and financial management;
fund raising and sources of revenue; long-range planning; and community organization.

PA 521 - History And Foundations of the Nonprofit Sector (3)
Provides an introduction to the history and development of the private, nonprofit sector in the United States. It explores theories and concepts that describe the social, political, legal, and economic meaning of volunteerism, philanthropy, and the nonprofit sector as a sector separate from government and business. It provides a specific focus on the relationship of nonprofit to government in the delivery of public services within the context of a welfare state.

PA 522 - Governance of Nonprofit Organizations (3)
Addresses the history and functions of boards in the nonprofit sector, including an examination of the roles of boards in governance and leadership; policy and administration; decision-making processes; board-staff relations; resource development; board composition and recruitment; ethics and liability; and current research on boards and organizational effectiveness.

PA 523 - Nongovernmental Organizations: Nonprofits on the World Stage (3)
Introduction to the history and development of Nongovernmental Organizations (NGOs) and the roles they play on the world stage. Examines the causes of the growth and significant role of NGOs in creating civil society, as well as the roles of NGOs in fighting oppression, safeguarding the environment, building and training workforces and advocating major societal changes.

PA 524 - Financial Management in Nonprofit Organizations (3)
Designed to provide participants without formal accounting or finance training with the conceptual framework and practical tools needed to provide strong fiscal management and fiscal leadership in the nonprofit environment. For students with formal finance and/or accounting background, the course will provide opportunities to compare and contrast fiscal management objectives and functions in nonprofit with those found in for profit and/or governmental entities. It is structured to illustrate the nonprofit fiscal management cycle: planning, execution, recording, reporting, and monitoring.

PA 525 - Grantwriting for Nonprofit Organizations (3)
The process of grant acquisition, beginning with the formulation of a fundable idea and concluding in an application and its review. Students are expected to identify potential funding sources, initiate inquiries, and develop an application for funds to support a program or study of special interest. The steps in this process are discussed in general terms and in the context of each student’s application. The focus is the development of grants from private rather than public funders.

PA 526 - Fundamentals of Fundraising in Nonprofit Organizations (3)
Creating an environment for successful fund development within a nonprofit organization is a serious undertaking that requires a substantive understanding of, and experience with, development programs and fundraising practices. Course provides the learner with the basic theories, principles, and techniques for fund development.

PA 527 - New/Emerging Nonprofits: Development and Management (3)
Intended to develop knowledgeable leaders for the nonprofit sector that understand how to establish and manage newly emerging organizations. Examines a wide range of management and leadership needs, problems and issues that arise for an organization in its early years. Examines how an organization develops and emerges and how the traditional tasks of management: supervision, planning, budgeting, fundraising and marketing can be most effectively administered. Recommended prerequisites: PA 520 or PA 521.

PA 528 - Leadership for the Nonprofit Sector (3)
Examination of the challenges nonprofit leaders face in working across organizations, jurisdictions, and sectors to address entrenched social problems. This course operates from the assumption that a collaborative, systems-based approach to leadership is essential for sustained success. Through this course, students will learn essential leadership concepts and practices to expand their abilities to address and negotiate leadership challenges that arise when stakeholders come together to plan, make decisions, and take action in organizational, community, and sector-wide settings.
PA 529 - Nonprofit Field Study in Oaxaca, Mexico (3-6)

An intensive immersion program in Oaxaca, Mexico, offered by the Institute for Nonprofit Management in the Hatfield School of Government. Course includes nonprofit field study and site visits, cultural immersion homestays, and visits to cultural sites. The program varies from year to year in the types of nongovernmental nonprofit organizations the students visit, based in part on the interests of the students who register. Site visits in recent years have included programs for juvenile offenders and gang members, human rights advocacy groups, medical clinics, an AIDS education program, and a coalition of environmental groups. On-site translation is provided so that proficiency in Spanish is not necessary, but Spanish language study is part of the immersion experience.

PA 530 - Higher Education Policy (3)

Seminar explores critical issues and opportunities facing today’s higher education. Also examines the organization and governance of colleges and universities in the contemporary policy arena. The overarching theme of this course is how interactions and tensions between higher education institutions and policy makers and public influence and shape universities.

PA 533 - Public Policy: Origins and Process (3)

Drawing on the general concept of the policy cycle, this course explores the central actors, processes, and issues associated with all stages of the public policy process. The course considers the interactions among the branches and levels of government, interest groups, nonprofit organizations, and the private sector. Tensions among various forces that affect the development and implementation of policy approaches are considered throughout the course.

PA 534 - Administrative Law (3)

When policies receive the formal status of laws, they acquire a special significance for the executive and judicial branches. This course examines the process of policy implementation through the use of administrative discretion and the rule-making process. Delegation of legislative power, judicial review, informal adjudication, and the role of the administrative law judge are emphasized. The limits of discretionary authority are explored. Students address the theoretical, practical, and ethical issues in implementation, giving particular attention to the relationship between stated goals and actual outcomes.

PA 535 - Strategies for Organizing Recovery, Mitigation and Resilience (3)

Application of resilience concepts in the policy and planning context. The course provides tools for using resilience concepts in policy making, policy analysis, and hazards and disaster planning. Introduces practical tools for analyzing community vulnerabilities and actions to take to improve resilience.

Cross-Listed as: This is the same course and EMCR 535 and may be taken only once for credit.

PA 536 - Strategic Planning (3)

Provides an overview of the application of planning systems to public sector functions and explores newer "stakeholder" theories of planning, planning models, and the step-by-step process for initiating and engaging in strategic planning processes at various levels of government. Through the use of case studies and hands-on exercises, students are exposed to practical applications of strategic planning approaches and techniques.

PA 537 - Law & Public Policy (3)

Law and courts are critical to public policy. The policy process often starts with cases for which no formal policy exists. The seminar examines judges as policymakers and the operation the policy process when courts are involved. It considers critical issues in judicial policymaking, examines fields where courts have played important policy roles, contemplates difficulties faced by judges, and helps students develop techniques to analyze judicial policymaking.

PA 538 - Advocacy and Political Participation by Nonprofit Organizations (3)

Exploration of the role of citizen advocacy and political participation in the United States in the twenty-first century. Investigates the many meanings of the term "civil society," as well as the role of nonprofit and voluntary organizations in lobbying and advocacy, and the role of citizen movements in shaping local, national and global democracy. Will discuss and analyze specific advocacy campaigns with a focus on strategy.
PA 539 - National Policy Process (3)

As a seminar in public administration, the National Policy Process is studied on-site in Washington, D.C. Attention is paid to the actors and the action of policy process, to the institutionalization of that process, and to the administrative components of that process. Meetings are arranged with key policy actors in appropriate organizations including the Office of Management and Budget, Congressional staff, lobbyists and think tanks, the General Accounting Office, regulatory boards, and various agencies. A current piece of legislation or set of legislative initiatives is used as a case study throughout the week.

PA 540 - Administrative Theory and Behavior (3)

Managing organizational systems to accomplish purposeful outcomes. Attention is given to how formal structures and informal processes influence organizational goals in public and nonprofit environments. This includes theories of organizational, group, and individual behavior, such as organizational design, power and authority, leadership, teamwork, communications, work design, and motivation. Emphasis is on managers and managing in public purpose organizations by reviewing major theories and their application and effective use.

Prerequisite: PA 511.

PA 541 - Social Entrepreneurship (3)

This course provides students with core theories and concepts of social entrepreneurship, and contemporary approaches to entrepreneurship for the public and nonprofit sector. It analyzes successful cases of social entrepreneurship and develops competencies to create organizations that generate revenues while serving a social mission. Students learn about setting up and managing social entrepreneurial ventures, focusing on the resources, impact and support structures for social entrepreneurs. Students are given the opportunity to develop their own social entrepreneurial design.

PA 542 - Sustainable Development Implementation (3)

Focuses on the challenges involved in attempting to turn international commitments and policy promises into action. Using examples from around the U.S. and around the world, we examine sustainable development policy implementation and operation in an effort to see what worked, what did not, and how implementation challenges can be addressed.

PA 543 - Creating Collaborative Communities (3)

Collaboration is perceived as an important method for addressing complex community issues through alliances with other organizations in the nonprofit, for-profit, and government organizations. This course introduces students to the theory and practice of collaboration through in-class and "living" case studies in the community. Students will learn the success factors, barriers to, and preconditions of collaboration at the intraorganizational, interorganizational, and intersectoral levels. They will explore the potential for using collaboration in a variety of community settings.

PA 544 - International Field Experience (3)

Students are teamed with counterpart public servants and public organizations in a foreign country to understand "what counts for success" in developing and implementing public policy initiatives. Students use this international comparative governance experience to reflect on the consequences for improving public service innovation and practices within their home organizations and jurisdictions in the United States. An additional important learning goal is to provide students with the knowledge and skills to work more effectively in cross-cultural team settings.

PA 545 - Organizational Development (3)

A consideration of organization development as a strategy for organizational change. This course emphasizes concepts and methodologies relating to organizational problem diagnosis, action research, planned change, change implementation and evaluation, and the development of appropriate interpersonal competencies and skills. Focuses on the public manager as change agent.

Prerequisite: PA 540.

PA 546 - Supervision in the Public Sector (3)

Focuses on the role of the supervisor in contemporary public and nonprofit organizations and the knowledge, skills, and abilities needed to effectively perform this role. Among the topics considered are the ethics and values of supervision; work planning; delegating, motivating, and empowering; communicating effectively; developing a team; coping with conflict; monitoring and evaluating performance; and dealing with the boss(es).
PA 547 - Culture, Values and Leadership (3)
Students reflect the role of culture and values in shaping the roles responsibilities of public service and nonprofit leaders. Draws from the fields of cultural anthropology, inter-cultural communication, and organizational theory to explore how public and nonprofit servants can become more effective through the integration of cultural diversity into their nonprofit and public service roles.

PA 549 - Cross-cultural Communication in the Public Sector (3)
An examination of intercultural communication aspects, processes, and scenarios occurring in public sector interactions. Emphasis on external client/constituent relationships. Development of intercultural awareness is a key goal introduced through class discussion, scenario investigation, and research projects. The course is highly interactive with class discussion required.

PA 550 - Managing Information Resources (3)
Considers information management and computer information systems as they affect public management and public policy. Basic concepts are covered, and emphasis is placed on the use of computerized information technologies as management tools for public sector administrators. Substantial use is made of case studies to highlight how the public sector manager may most appropriately and effectively use computer resources and avoid inappropriate and misleading use of these resources.

PA 551 - Analytic Methods in Public Administration I (3)
Topics to be covered include: research design, sampling methods and theory, data collection, techniques of data analysis and presentation, statistical reasoning, and computer applications for statistical analysis.

PA 552 - Analytic Methods in Public Administration II (3)
A continuation and expansion of topics covered in PA 551, focusing on analytic methods used in research and evaluation of public sector policies, systems, and programs. Topics to be covered may include: qualitative and quantitative applications in research design and data collection; statistical modeling, forecasting, program evaluation, and other areas of applied research.
Prerequisite: PA 551.

PA 552R - (0)

PA 553 - Sustainable Development Policy and Governance (3)
Provides a foundation in sustainability-related policy design, policy analysis and governance approaches at multiple jurisdictional levels and in different cultural and social contexts. Explores challenges and opportunities related to developing policies and governance models that address the complex social, economic and environmental aspects of sustainability. Examines the role of systems thinking plays in policy development and analysis in order to achieve integration across scales and sectors. Relevant topical issues serve as the focus for exploring how policy development and governance develops on the ground.

PA 554 - Policy Analysis Research (3)
Course requires student to become proficient in the use of reference tools for successfully undertaking policy research. Students are required to identify a policy issue and to use library and online resources to track a piece of public policy through the stages of agenda-setting, legislative policy-making, administrative implementation, court adjudication, and follow-up analysis and evaluation of consequences. The course consists of a series of online exercises corresponding to each stage of the policy development and implementation process. The exercises are supplemented with discussion and lectures.

PA 555 - Program Evaluation and Management (3)
Examines program evaluation from the perspective of the public administrator. Covers the major approaches, methods, and concepts in the field of program evaluation. Topics include impact assessment, research design, qualitative evaluation methods, performance auditing, benefit-cost analysis, and other selected topics.

PA 556 - Public Contract Management (3)
Explores what happens when public sector organizations form working relationships with other agencies, communities, nonprofit organizations, or
for-profit firms through contracts. It seeks to understand key elements of the formation, operation, and termination (or transformation) of these relationships and to do so from the perspective of the generalist manager rather than from a narrow technical view. The purpose here is not to debate whether government at all levels should do more contracting or less but to assess what happens when the decision is made to use contractual arrangements to perform services or provides materials.

PA 557 - Operations Research in Public Administration (3)
Addresses the need for today's public administrators to have some understanding of the increasingly important tools of management science and operations research. It has no prerequisite: quantitative or technical background is not required. A variety of topics will be covered, with some flexibility in choice of topics according to students' interest. Topics include: linear programming, queueing, simulation, decision analysis, forecasting, PERT/CPM, inventory analysis, and replacement analysis. Methods taught in the course will be in the context of public administration.

PA 558 - Managing Public Projects and Programs: From Local to Global (3)
Introduction to management concepts and tools required for the design, implementation and sustainability of public sector (government and non-governmental organizations) programs and projects. Draws on contemporary literature and case studies. Students apply their management learnings from this course to a real-life program or project.

PA 559 - Research Design and Analytic Methods for Administrative Leaders (3)
This course provides administrative leaders with the essential principles to frame, develop, review and evaluate research proposals. It also addresses appropriate data collection and analysis methods that aligns with the purpose of the research and supports research conclusions and claims.

PA 560 - Local Government Administration (3)
Introduction to public administration practice at the local government level. Addresses those factors that make local government administration unique, but informed by the fact that contemporary local government professionals are closely connected to a wide range of intergovernmental and often cross-sectoral working relationships. Local government administration learn that leadership within the organization, engagement with the community, and work across organizational and jurisdictional boundaries.

PA 561 - Intergovernmental Relations (3)
This course addresses the complex web of intergovernmental relations that is essential to the successful operation of public administration and policy throughout the nation. At the core of these relationships is a set of concerns about the political, legal, fiscal, and organizational relationships across governments and sectors. This course provides an in-depth examination of the foundations and challenges of these relationships.

PA 562 - Managing Employee Performance in the Public Sector (3)
Managing human capital can be a challenging endeavor and doing so in the public sector, particularly in government, introduces the added burden of politics. This course explores the multifaceted nature of performance in the workplace including the political, legal, economical and managerial issues that often accompany addressing employee performance in the public sector (government and nonprofit). The goal is to manage and improve human resources while holding individual employees and public agencies accountable for organizational performance.

PA 563 - Citizens and Administration (3)
This course analyzes modern civic life and its challenges. Its major focus is the often ambiguous relationship between citizens and administrators in the political system. Other topics emphasized are: transformation of civic life in modern times, declining citizen trust in government, modern approaches to citizen participation in government, and the future of "civism" in the United States.

PA 564 - Environmental Policy and Administration (3)
Explores governance of the environment at international, national, regional, and local scales. The course examines federal, state, local, and informal institutions active in addressing air and water pollution, hazardous wastes, toxics management, and the causes of climate change. The course explores different disciplinary approaches for examining environmental policy issues, how policy tools can be
effectively matched to specific environmental problems, and how social sciences and ecology can be integrated for effective environmental problem-solving.

**PA 565 - Natural Resource Policy and Administration (3)**

Reviews the history, politics, and institutions related to current environmental and natural resource policy and its administration. Reviews policy domains like land and forest, water, energy, fish and wildlife, and environmental quality. Special attention is paid to policy and administrative governance issues like sustaining common pool goods, structuring intergovernmental relations, and evaluating policy implementation strategies of direct production, planning, regulation, and changing market incentives. A central premise is that natural resource administrators face a policy arena that is intrinsically problematic because of the dynamic nature of social values about natural resources, the long time horizon implicit in resources systems, the broadening geographic scale considered in natural resources decisions, and the interdependency of social and ecological communities. Recommended as a first course in the environmental and natural resource administration specialization.

**PA 566 - Water Resources Policy and Administration (3)**

Reviews the history, politics, and institutions related to current water policy and administration in the United States. Examines policy history leading to present institutional and legal arrangements for federal, tribal, regional, state, and local water quality and quantity decision making. Attention is given to the industrial development of the East and created water resources of the arid West as a way to understand changing social sentiments toward water and water policy. Examines the evolution of purpose in pollution laws from human health protection to include ecosystem health protection and explores implementation of such protection through "watershed" approaches to land use and water quality management by NGOs, and federal, state, and local government. A major theme is the problem of developing coherent water policies in a policy arena which has divided authority, plural traditions, and multiple resource and social issues.

**PA 567 - Energy Resources Policy and Administration (3)**

Reviews the history, politics, and institutions related to current energy policy and administration with particular attention to the Pacific Northwest and development of hydroelectric power. National energy policy history is reviewed including political, financial, and environmental problems. Explores the roles of interest groups; state, local, national, and international governments; and regional governing institutions. It explores the changing distribution of social costs and benefits as both a cause and result of policy change. Passage of the 1980 Northwest Power Act, the Northwest Power Planning Council created in the act, and the implementation of the act will be studied, as will current issues like energy conservation, regional power planning, deregulation and the status of institutions involved in energy policy, and Columbia basin fish and wildlife conservation.

**PA 568 - Forest Policy and Administration (3)**

Reviews the history, politics, and institutions related to forest resource policy and management. Focuses on how policy affecting public and private forest land is made and implemented. Case studies, largely from the northwestern United States, are used to examine these processes. History, laws, and programs relating to forest land ownership, public and private forest management, and associated environmental protection are studied at the federal and state levels. Special attention is given to understanding how public values about forests develop, and how public values affect public policy related to forests held by public, nonprofit, industrial, and private owners.

**PA 569 - Fish and Wildlife Policy and Administration (3)**

Reviews the history, politics, and institutions related to fish and wildlife policy and administration. Focuses on how policy affecting fish and wildlife is made and implemented. Case studies, largely from the northwestern United States, are used to examine these processes. Policy history is studied at the state and federal level with particular attention to the federalization of authority in this arena and the role of interest groups in policymaking and implementation. Current issues like endangered species, the role of tribes, bio-diversity conservation, and inter-jurisdictional management of fish and wildlife are the focus of study.
PA 570 - Environmental and Natural Resource Leadership (3)

Skills, styles and attributes of those who lead natural resource and environmental organizations will be examined to enhance the leadership abilities of those in the class. Each class member will analyze presentations by current leaders, prepare a leadership prescription for an organization with which they are familiar, and design a leadership learning program. The course is intended for all those concerned with leadership in natural resource and environmental organizations, regardless of background. Considerable time will be devoted to exchange of information among those in the class.

PA 572 - Columbia River Basin Governance (3)

Uses Columbia River Basin governance as a case study to build an understanding of how organizational interests, culture, institutional identities, and values drive any collaborative governance framework. Examines the Basin’s governance history and the interests of major institutional actors through reading, writing, and expert panel discussion. Expected preparation: PA 540 Administrative Theory and Behavior.

PA 573 - Smart Grid and Sustainable Communities: Making the Smart Grid Work (3)

Provides students with a basic understanding of Smart Grid technology and the conditions that need to be in place for its success as a policy tool for reducing CO2 emissions. Students will be provided with the historical development of the technology and its current status from the standpoint of policy implementation. Expected preparation: PA 540 Administrative Theory and Behavior.

PA 574 - Food and Agriculture Policy (3)

Course explores food- and agriculture policy development and implementation at global, national, and local levels. Examines the social, economic and environmental aspects of food and agricultural systems, including impacts of trade and aid policies, the Farm Bill, food system frameworks, and cross-cutting issues including water resources, toxics, and social equity.

PA 575 - Foundations of Collaborative Governance (3)

This initial course provides an overview of the current governing context and the new models that have emerged in response. In addition, students will explore the nature of collaborative relationships, the role of trust, harnessing the potential power of groups, and how to address conflict and reach consensus.

PA 576 - Collaborative Governance Process and Systems (3)

This skills-based course focuses on the assessment, organization and phases of facilitating collaborative agreement-seeking processes, emphasizing techniques and challenges for reaching mutually satisfying agreements, including how to frame an issue to increase the group’s chance for success.

PA 577 - Case Studies in Collaborative Governance (3)

Student teams to review three collaborative governance cases, one successful, one unsuccessful, and one a work in progress. A fourth case will be identified by the team. The course introduces typologies for different forms of collaborative governance and provides theory-based frameworks to assist in analyzing governance network efficacy.

PA 578 - Collaborative Governance Practicum (3)

In this culminating practicum students participate in discussions with faculty experts and fellow students as they apply the knowledge and skills gained in core courses to a community-based problem, issue or project of their choosing.

Prerequisite: PA 575, PA 576, and USP 584.

PA 579 - Policy Tools in Policy Design (3)

This course concerns the use of policy tools in designing public policy. It considers the strengths and weaknesses of the individual tools and the tradeoffs made in choosing or combining them. The way policy mechanisms and instruments are assembled into a policy mix can be helpful or seriously problematic.

PA 581 - Advanced Fundraising (3)

Focus on the understandings, processes, and skills that are necessary for successful major gift development. As a skill development course, it follows the Fundamentals of Fundraising course (PA 526) which provides theory and content. The course will address the process of developing advanced fundraising techniques, beginning with the formulation of the development plan, moving through
developing a gift management system, and concluding with application and design of effective gift stewardship. The steps in the process are identified in general terms with specific application applied to the context of student experience or projects. The course will also cover the role of leadership especially volunteer leadership and the relationship of that leadership with other human resources such as the Development Officer and the Chief Executive Officer. Expected preparation: PA 526.

**PA 582 - Public Budgeting (3)**
Focuses on the major dimensions of public sector budgetary systems. Major emphasis will be devoted to the local budget processes. Topics will include basic concepts of public budgeting, the budget cycle, budget strategy, planning and presentation, alternative budgeting systems, the budget as a political and management tool.

**PA 583 - Advanced Budgeting Concepts and Techniques (3)**
Investigates how budgeting can be used to review, analyze, and establish public policy and administrative accountability. Students learn how to: 1) design the best budget system to fit various political environments; 2) review the effectiveness and efficiency of programs through budget analyses; and 3) use the budget to clarify public policy issues and establish management accountability for performance. The mechanics of public budgeting will also be discussed in detail, including developing a budget calendar, making fund balance estimates, balancing revenues and expenditures, and monitoring the approved budget. Students should have practical experience or a previous course in budgeting.

**PA 585 - Financial Management in the Public Sector (3)**
An investigation of the sources, methods, and mechanisms available for financing public organizations in a dynamic and complex environment. It includes a consideration of the administrative and behavioral as well as the economic dimensions of financing public organizations. The examination identifies and explores the skills which are appropriate for managing contemporary public finance systems. Among the specific topics considered in this course are the following: tax and nontax sources of revenue; intergovernmental fiscal relations; debt management; productivity; rate analysis; cash flow management; and managing fiscal retrenchment.

**PA 587 - Principles and Practices of Emergency Management (3)**
Explores the history, doctrines, and authorities of emergency management as well as the role of the emergency manager. It provides background on this emerging field as well on theoretical foundations of effective emergency management and strategies for effective emergency management leadership.

Cross-Listed as: This is the same course as EMCR 587 and may be taken only once for credit.

**PA 590 - Human Resource Management in the Public Sector (3)**
Administration and management of human resource systems in public sector and nonprofit organizations. Focus is on the underlying values of human resource management, related public policies, structural patterns, and the functional areas of HRM systems. Specific attention will be directed to the strategic roles of human resource management in day-to-day operations, merit system concepts and practices, position and wage classification systems, methods of securing a qualified labor force, and labor relations. Legal requirements in each of these areas will be examined. Emphasis will be on learning by doing through use of skill-building exercises, simulation and analysis of case materials, review of relevant case law, administrative rulemaking, and current literature. This course serves as a foundation for PA 591.

Prerequisite: PA 511.

**PA 591 - Employment Law and Policy (3)**
This course delves into the legal environment and the range of laws that are associated with the employment process from recruiting through termination or retirement and its overall policy impact on the practice of human resource management (HRM). Such areas entail federal, state and local legislation as well as ordinances, statutes and Executive Orders that govern equal employment opportunity and the legal framework within which human resource management must operate. Also considered are the constitutionality of employment laws and how constitutional law is applied to certain groups that may render private sector employees somewhat distinct in some ways from those in the public sector, in this case, government or state actors (e.g., those who work on behalf of the government). This course is heavily focused on case law, case analyses and the impact of various court decisions over time on policy interpretations, HRM practices.
and charting the employment through termination processes. Expected preparation: PA 511 and PA 590.

**PA 592 - Volunteerism and Volunteer Management (3)**
Examines the historical, social, and cultural context of voluntarism in America as a way of understanding who volunteers and why, and what difference it makes in the lives of organizations and communities. The course includes skill development in the management and administration of volunteer programs in a nonprofit organizational context, including volunteer program planning, evaluation of volunteer programs, recruitment, training, and retention of volunteers.

**PA 593 - Civil Rights for Public Managers (3)**
Public service professionals deal with a variety of civil rights issues on a regular basis. They manage a diverse workforce with civil rights considerations central to effective human resource management. That diverse workforce serves increasingly diverse communities. Civil rights include race and ethnicity, but other issues and groups as well. This course considers the major issues of civil rights from a public law perspective with a concern for the challenges facing public managers.

**PA 594 - Enhancing Diversity in the Workplace (3)**
To examine the effects of diversity across organizations with particular emphasis on those within the public sector. Three aspects of diversity initiatives will be employed: valuing, enabling and managing diversity. A wide range of cultural and social diversity issues, to include but not limited to race, gender, age, nationality, class, language, sexual orientation and disability, will be discussed. Theories and practical tools will be explored and students will be given the opportunity to work on diversity issues by way of discussions, case studies and field assessments.

**PA 595 - Public Sector Labor Relations (3)**
The history and development of public sector labor relations in the United States. This course explores the impact of labor organizations on government activities and the role of public sector managers in responding to unions. The course provides both a historical context for labor relations and a set of precepts for working with labor organizations in public administration. From hospitals, to school districts, regional government, cities, counties, state agencies and even some large nonprofits, this course explores the importance of developing and maintaining a constructive working relationship with the labor organizations that represent the employees of those organizations.

**PA 596 - Public Sector Collective Bargaining: Negotiations and Impasse Resolution (3)**
Deals with the diversity of roles of the parties in negotiation; planning for negotiations; development of original demands and fallback positions; negotiation strategy and tactics; the major issues in negotiating; and the diversity and similarity of negotiations in state government, cities, counties, school districts, and higher education. A mock negotiation case will be bargained. This course will also deal with the process of mediation, fact-finding, and interest arbitration.
Prerequisite: PA 595.

**PA 598 - Values-based Management I (3)**
Introduces the model of values-based management as a method to enhance compatibility between the individual and the organization that is essential for decision-making and supervision, particularly in nonprofit organizations. Students will develop a theoretical understanding of the elements of effective supervision and of the impact that a director/supervisor has on the human resource system in their organizations. Students will work through the process of clarifying agency mission, purpose, and values and develop skills for aligning their practices with these values.

**PA 601 - Research (1-9)**
(Credit to be arranged.)

**PA 603 - Thesis (1 - 15)**
(Credit to be arranged.)

**PA 605 - Reading and Conference (1-9)**
(Credit to be arranged.)

**PA 607 - Seminar (1-9)**
(Credit to be arranged.)
PA 609 - Practicum (1-9)  
(Credit to be arranged.)

PAH 410 - Selected Studies (1-6)  
(Credit to be arranged.)

PAH 509 - Practicum (1-6)  
(Credit to be arranged.)

Cross-Listed as: HSMP 509.

PAH 543 - Culture and Health Care (3)

The course is designed to provide an examination of health delivery and outcomes and the influence of culture. Using readings in conjunction with interactive learning, students consider various cultures and their interactions with the health care system. Knowledge of the tools, techniques, and applications of cultural assessment and cultural competency will be achieved. This course is open to admitted students in the graduate programs in the Division of Public Administration and other appropriate graduate programs. This is the same course as HSMP 543 and may be taken only once for credit.

Cross-Listed as: HSMP 543.

PAH 570 - Health Administration (3)

An examination of issues related to the administration of health care systems. Topics include: changing patterns of health care, budget and financial management techniques, and political influences on health administration. This is the same course as HSMP 570 and may be taken only once for credit. Cross-Listed as: HSMP 570.

PAP - Public Affairs-Policy

PAP 403 - Thesis (1-12)  
(Credit to be arranged.)

PAP 412 - Introduction to Policy Advocacy (3)

Examines the importance of public policy advocacy for public and nonprofit organizations and the impact of policy advocacy on society. Also offered for graduate-level credit as PAP 512 and may be taken only once for credit. Prerequisite: upper-division standing.

PAP 413 - Ethics and Public Policy (4)

An examination of the normative dimensions of public policy, focusing both on the ethical issues raised by the means of policymaking as well as the values that might shape the ends of public policy. Also offered for graduate-level credit as PAP 513 and may be taken only once for credit. Prerequisite: upper-division standing.

PAP 504 - (1-9)

PAP 505 - Reading and Conference (1-9)  
(Credit to be arranged.)

PAP 508 - Professional Development Plan (1-3)

Professional development planning workshop for students enrolled in the Master of Public Policy program. Students work with faculty to prepare a professional development plan, including career-goals, portfolio creation, job networking, and a program exit interview.

Prerequisite: Enrollment in the Master of Public Policy program.

PAP 509 - Public Policy Project (1-3)

Summative project for students enrolled in the Master of Public Policy program. Options include a research-oriented report or a client report linked to a short internship or placement experience.

Prerequisite: enrollment in Master of Public Policy program.
PAP 510 - Selected Studies (1-9)
(Credit to be arranged.)

PAP 511 - Introduction to Public Policy (3)
This course explores fundamental concepts and approaches to public policy analysis and advocacy. Policy actors, process and issues are all part of the domain. The course will introduce students to a number of current policy issues.

PAP 512 - Introduction to Policy Advocacy (3)
Examines the importance of public policy advocacy for public and nonprofit organizations and the impact of policy advocacy on society.
Also offered for undergraduate-level credit as PAP 412 and may be taken only once for credit.

PAP 513 - Ethics and Public Policy (4)
An examination of the normative dimensions of public policy, focusing both on the ethical issues raised by the means of policymaking as well as the values that might shape the ends of public policy.
Also offered for undergraduate-level credit as PAP 413 and may be taken only once for credit.

PAP 514 - Institutional Dynamics of Public Policy (3)
Focus on the institutional determinants and factors that shape the public policy arena. Coverage includes the varieties of institutions, including their rules and cultures, that affect public policy, how policy change strategies can incorporate institutions, and how institutions shape policy outcomes and impacts.

PAP 601 - Research (1-9)
(Credit to be arranged.)

PAP 602 - Independent Study (1-9)
(Credit to be arranged.)

PAP 603 - Dissertation (1-15)
(Credits to be arranged.)

PAP 604 - Internship (1-9)
(Credit to be arranged.)

PAP 605 - Reading and Conference (1-9)
(Credit to be arranged.)

PAP 606 - Project (1-8)
(Credit to be arranged.)

PAP 607 - Seminar (1-8)
(Credit to be arranged.)

PAP 609 - Practicum (1-9)
(Credit to be arranged.)

PAP 610 - Selected Studies (1-9)
(Credit to be arranged.)

PAP 611 - Normative Foundations of Governance (3)
A survey of the major theories of the normative basis of governance that have shaped approaches to political legitimacy in the modern era.

PAP 613 - Organization Theory and Behavior (3)
An examination of the structure and design of organizations, the interaction of organizations and their environment, and the behavior of individuals within organizations. Application to problems of administration and governance.

PAP 614 - Contemporary Governance (3)
Contemporary factors impacting governance worldwide: political instability and fragmentation of government; erosion in the jurisdiction and power of the nation state and its causes; the search for new approaches and substitutes to government; accelerated blurring of sector boundaries; increasing use of third party providers; and non-political boundaries.
Prerequisite: admission to the Ph.D. program in public administration and policy.

PAP 615 - Administrative Process (3)
The purpose of this course is to explore the nature of the administrative process and its relationship to organizational structure, process, and behavior within the broader context of programmatic and
organizational governance. Emphasis will be placed on the following topics: the influence of structural alternatives on behavior; value systems and normative prescriptions; organizational culture; and the influence of the administrative process on the way in which agencies formulate and implement policy within the context of their respective legislative mandates.

Prerequisite: admission to the Ph.D. program in public administration and policy.

**PAP 616 - Policy Process (3)**
This course focuses on the politics of the policy process. It examines the role, influence, and interaction of legislatures, executives, bureaucracies, courts, policy communities, and citizens. The course follows the stages of policy development: problem definition, agenda setting, budgeting, authorization, implementation, and oversight. Case material is taken from federal, state, and local governments with special consideration given to the intergovernmental aspects of the policy process.

Prerequisite: admission to the Ph.D. program in public administration and policy.

**PAP 620 - Seminar on American Political Institutions (3)**
Introduction to the field of American Politics, with a particular focus on American political institutions and their respective sub-fields within the discipline of political science.

**PAP 621 - Comparative Political Institutions (3)**
This course examines the performance, capabilities, and overall function of governments worldwide. Emphasis is on advanced analyses of theories and concepts in comparative politics, with a particular focus on institutions of the state.

**PAP 630 - Proseminar in International Relations (4)**
Graduate seminar surveys the main theoretical and analytical approaches encountered in the study of international relations. Themes include the grand theoretical traditions of liberalism, realism, and radicalism; analytical and methodological perspectives, like behavioralism and rational choice theory; as well as the normative, critical, and postmodern challenges to the mainstream.

**PAP 645 - American Foreign Policy (4)**
A seminar that explores different kinds of international disputes and actual conflicts in order to identify and assess theories, analytical frameworks, and methods of conflict resolution, management, and prevention. Emphasis is on understanding the roots of conflicts and techniques that may be appropriate to different levels and dimensions of conflict.

**PAP 653 - Policy Analysis (3)**
Introduction to policy analysis as a practice of creating, assessing, and communicating information that is useful for understanding and improving policies. Theoretical methods of problem structuring, forecasting, recommending, monitoring, evaluating, and improving policies.

**PAP 654 - Policy Analysis Research (3)**
Contact the department for a description for this course.

**PAP 656 - Advanced Political Economy (3)**
Readings seminar provides a review of the literature in theories and selected issues in international political economy. Core requirement for graduate students in the PAP doctoral program and for master's students in political science who select international relations as their primary field of specialization.

**PAP 690 - Research Design for Politics and Policy (4)**
This course helps students understand the processes, design, and the philosophical foundations of research. The focus of this course is to train students to become researchers who can design professional-quality research, and write a research proposal that will satisfy the requirements for a doctoral dissertation or grant proposal.

Cross-Listed as: This is the same course as PS 594 and may be taken only once for credit.

**PE - Physical Education**
**PE 100 - Adapted Physical Activity (1)**
This course is designed to individualize workouts for students with permanent or temporary physical disabilities. This course can also be used to make accommodations for students enrolled in other PE
courses who have health or injury conditions which impact regular participation in the course.

**PE 101 - Gentle Yoga (1)**

This course is designed for students who need a slower-paced, less rigorous class: those with health issues, including but not limited to injuries, pregnancy, chronic illness; those who have not or do not exercise on a regular basis. Focus in this class will be on alignment; increasing flexibility and learning to work safely in each asana (pose), using props to bring the pose to the student. Poses will be modified or variations of the pose will be taught based on students' needs.

**PE 102 - Gentle Tai Chi (1)**

Please contact the department for a course description.

**PE 103 - Relaxation Yoga (1)**

The gentle practice of mind/body integration allows for the development of strength, endurance, flexibility, and balance in a supportive and non-threatening atmosphere. Through these practices the student is lead to greater health, renewed energy, and restored balance. We will be exploring various different techniques to bring about greater relaxation and awareness. Class will include restorative yoga, somatics, yoga nidra and gentle movements. This course is designed to attempt to meet your individual needs with gentle yoga poses and breaths that focus on restoring and maintaining health. If you have an individual need, be sure to discuss it with me and sit close to the front. Usually, any pose can be adapted to accommodate individual needs.

**PE 104 - Meditation (1)**

Meditation is often helpful in reducing stress, discovering inner resources for peace of mind, healing, creativity, and calming of spirit. Meditation is a universal, health-giving resource used for hundreds of years and in most cultures. This course will introduce the student to different methods of meditation, including gazing, imagery, breathing, mindfulness and other methods.

**PE 105 - Yoga (1)**

Yoga is an ancient philosophy, one of six, from India. Originating in the oral tradition, there are 196 sutras or threads - short statements which explain the philosophy of Yoga - written by Patanjali. The word yoga means union, to bring together the mind, body, and spirit. There are eight aspects of yoga: Yama (universal moral commandments), Niyama (personal disciplines), Asanas (practice of the poses), Pranayama (rhythmic controlled breathing), Pratyahara (withdrawal of the senses), Dharana (concentration), Dhyana (meditation), and Samadhi (a state of super-consciousness or bliss). This course will explore these different aspects of the yoga experience, looking into the meanings and practice of each and its role in yoga.

**PE 112 - Tai Chi Chuan 24 Forms (1)**

Tai Chi Chuan is one of the most popular and influential Chinese martial arts (Wu Shu). It is composed of slow, gentle and constant body movements. This 24-posture Tai Chi Chuan form is based on Yang style Tai Chi, also known as a moving meditation. Practitioners perform a series of postures designed to achieve balance and harmony in both body and mind, as well as to improve overall health.

**PE 119 - Zumba (1)**

This course provides the student with the opportunity to participate in Zumba® Fitness for credit. Are you ready to party yourself into shape? That's exactly what the Zumba® program is all about. It's an exhilarating, effective, easy-to-follow, Latin-inspired, calorie-burning dance fitness-party™ that's moving millions of people toward joy and health. Zumba Fitness® is the only Latin-inspired dance-fitness program that blends red-hot international music, created by Grammy Award-winning producers, and contagious steps to forma "fitness-party" that is downright addictive. Since its inception in 2001, the Zumba program has grown to become the world's largest – and most successful – dance-fitness program with more than 14 million people of all shapes, sizes and ages taking weekly Zumba classes in over 140,000 locations across more than 150 countries.

**PE 120 - Barre Fitness (1)**

Barre Fitness combines the Pilates philosophy with traditional ballet barre choreography to create a fun, high-energy sculpting class that tones, strengthens and stretches the entire body uniformly. This class challenges the body's range of motion with balance work, high repetitions, weights, balls and bands. Much of this class is performed on releve (tip toe) and plie (bent knees). This class is open to multiple levels, as modifications are available.
PE 121 - Cardio Kickboxing (1)
This fast paced exercise class combines real kickboxing techniques to modern dance beats for a great workout. Cardio kickboxing is a group-led class which uses a combination of martial arts kicks, punches, strength and cardio training to help reach strength and endurance goals. This class offers an intense, high impact workout which incorporates basic self-defense actions. Cardio-kickboxing is rated as the #1 calorie-burning workout, with the potential to burn 600-800 calories per hour of activity. This class targets all the major muscle groups of the body for an incredibly effective workout while reducing stress and improving self-confidence.

PE 122 - Body Weight Boot Camp (1)
This course utilizes HIIT (high intensity interval training) incorporating bodyweight exercises. This course provides the ultimate workout for cardio and fat burning. HIIT is an intense interval training circuit that gets the body’s major muscle groups involved through a series of repeated bodyweight exercises. With high intensity exercise, your body continues to burn fat long after your workout is complete. This class is super effective and is the perfect workout to burn calories, strengthen and lengthen your body.

PE 124 - Abs and Lower Body (1)
Abs and Lower Body is a group-led exercise class designed to improve muscle strength and tone in your core and lower body. You will see a wide range of exercises and perform different levels of squats, lunges, lower body, back and abdominal exercises, as well as high-intensity exercises such as jump-roping, running, and stair climbing. This is an advanced level class, but modifications are available. When the weather is nice, the class goes outside.

PE 125 - Body Sculpt (1)
This course emphasizes muscular endurance training for the upper body, lower body, and abdominals. In a typical session, we use dumbbells, soft weights, tubing, steps, small medicine balls, and body resistance to challenge every major muscle group in the body. This class is an excellent choice for participants who get plenty of cardiovascular training through other activities and want to concentrate on muscular development.

PE 127 - Flex Fitness (1)
This course provides the student with the flexibility for self-paced and self-directed participation in the Physical Education courses offered at PSU. With the freedom to select the activity, day and time from the attached list of approved courses, the options are almost limitless. The student can attend an activity once or they may choose to stick with the same class throughout the entire term. The choice is completely up to them and their schedule(s). Simply select the desired activity, check with the instructor of the chosen activity before participating and present attached attendance record form and join the activity (given space available). No more stressing about missing class to meet with classmates or instructors - just choose an alternate activity, date or time. This class is available as a 1 or 2 credit option.

PE 128 - Weight Training (1)
This class gives instruction and practice in the use of resistance machines, free weights and other training implements. It is a self-paced class and individual workout plans are expected. Instruction will be given on proper lifting technique and spotting. Students are requested to follow a routine in order to achieve best results. Students can proceed on their own or arrange a time to design a program with the instructor. All weight room rules will be strictly enforced.

PE 129 - Fitness Conditioning (1)
Achieve a higher level of physical fitness for a longer, healthier lifespan. A fun, moderate-impact cardio routine that will leave you feeling lean and mean, Fitness Conditioning is designed to transform your body to an entirely new fitness level. Each class session will utilize a variety of cardiovascular activities, targeted strength and bodyweight exercises to prevent injuries and avoid plateaus while improving all areas of your physical fitness.

PE 131 - Sports Conditioning (1)
This course includes sport specific training for a multitude of sports, including plyometric training, speed and agility training, resistance training, and different modes of aerobic training. Sports Conditioning focuses on how to train different types of athletes, as well as teaching how each specific type of training is related to the sport/event involved. This is a high intensity exercise course.
PE 132 - Weight Loss Boot Camp (1)
Weight Loss Boot Camp (WL Boot Camp) is a group fitness class, which includes high impact exercises and an intense workout. The class uses body sculpting, muscular endurance, and cardiovascular endurance activities to enhance weight loss goals. The class will incorporate squats, lunges, stair climbing, running, jumping, side stepping, push-ups, and dips, in a wide variety of combinations to preserve muscle mass while you lose weight.

PE 135 - Pilates 1: Strength and Form (1)
Students learn the structure, technique and form of Pilates, while awakening and strengthening the deep muscular skeletal system.

PE 136 - Pilates Fusion (1)
Combining The Pilates form with aspects of internal martial arts, yoga and release technique, students learn to activate their center through complex movement patterning, breath and mindfulness practices.

PE 137 - Pilates 2: Mindful Movement Flow (1)
Combining the Pilates form with aspects of internal martial arts, yoga and release technique, students learn to activate their center through complex movement patterning, breath and mindfulness practices.

PE 140 - Self Defense (1)
This class is reality based: we will teach what works best to defend against threats to your life and body in the real world. The training exposes you to simulated verbal attacks from obnoxious bar patrons, vulgar street thugs and the common irate, shopper who gets in your face and starts cussing a blue streak in the parking lot. As a reality based class the students are presented with live simulations which forces one to function even while jacked up on adrenaline. Since the adrenal rush is an instinctual reaction to stress, the trick is learning to harness and focus all that power into one’s defense by using tools that don’t require size or strength for the average person. Preferred strategy: remain cognizant of surrounding at all times. This increases our chance of being successful and fluctuates from day to night.

PE 144 - Judo (1)
In the study of Judo, you will learn techniques in falling, throwing and grappling to aid in self-defense. Judo will improve your strength, agility and overall aerobic capacity. Judo utilizes virtually every muscle of the body and is an excellent overall conditioner. This discipline promotes a confidence that affects one's entire life.

PE 145 - Brazilian Jiu-Jitsu I (1)
Brazilian Jiu-Jitsu is an advanced form of the Japanese martial art of the same name. It has been modified by the Brazilians to become "arguably the most effective martial art in the world." The form of Jiu-Jitsu the Brazilians created is a Martial Art that is designed to adapt to any type of Fighting Style or Martial Art, making it reality based. This is a tested and proven style, art, and science. With the arrival of Brazilian Jiu-Jitsu on the martial arts scene, it has forever changed the way fighters train. Brazilian Jiu-Jitsu offers a complete system of self-defense that works whether you are big and strong or small of frame. Because of the principles of leverage that Brazilian Jiu-Jitsu is founded upon, a practitioner could pursue it throughout their lifetime. Brazilian Jiu-Jitsu is beneficial in helping maintain cardiovascular fitness and the integrity of bones and muscles, thus keeping you fit and youthful.

PE 146 - Brazilian Jiu-Jitsu II (1)
Review the basic fundamentals of Brazilian Jiu-Jitsu and refine your skills. Students will learn to identify their strengths and improve upon their weakness. (See the class description for Brazilian Jiu-Jitsu for more detail).

PE 149 - Aqua Fitness (1)

PE 150 - Argentine Tango (1)
An introduction to the beautiful dance of Argentine Tango, known to be a dance of passion and grace. Argentine tango is a highly individualistic and improvisational dance, with endless possibilities for expressing the music. A true social dance, based on the art of leading and following, students will find it to be ever exciting, challenging and fun. In this class students will explore both the close embrace and open embrace, "Milonguero" and "Salon" styles and movements of tango. Music education will include a wide variety of traditional classical tango orchestrations as well as popular alternative tango music. Variations of movement and the depth of emotion and
expression will be explored in traditional tango, fast
paced playful Milonga, and the elegant Vals. Tango
is a dance of present moment connection and zen,
highly addictive, and a worthwhile adventure.

PE 161 - Swing Dance (1)
Swing dance, sometimes referred to as "sophisticated
swing", is a slotted swing dance, using techniques of
connection through body positions that create
extension/leverage, compression, and elasticity
controlling momentum to create amazing lead and
follow options. It is a playful and wonderful dance,
with much room for improvisation and self-
expression. Using many rhythm variations,
syncopations, slides, and stops, West Coast swing
allows dancers a lot of freedom to play with their
own personality and be creative with the music on the
dance floor.

PE 162 - Beginning Belly Dance (1)
This course will focus on the movement technique of
popular styles of belly dance and related traditional
dances. An emphasis will be placed on understanding
the complexity of the rhythms and how they relate to
the dance movement.

PE 163 - Ballroom Dance (1)
A fun dance class created to introduce you to the joy
of social ballroom dancing. Each term students will
explore the 6 most popular ballroom dance styles:
Waltz, Rumba, Fox trot, Tango, Swing, ChaCha.
Time permitting, we may also explore more other
styles of Ballroom, Viennese Waltz, Quickstep,
Samba, Bolero, Jive or Paso Doble. Developing a
new appreciation and skill set for the art of
lead/follow, connection with your partner, and the
necessary posture, technique styling to create each
dance style developed for expressing the music.
Students will learn mini-routines in each dance style
taught for social dancing success and students may
choose to showcase what they learn and perform at
local venues, sharing the joy of ballroom dance with
others.

PE 164 - Salsa and Social Latin (1)
An introduction to Salsa social Latin dancing.
Focuses primarily on the popular social dance styles
of today, including Salsa, Bachata, Cha-Cha,
Merengue and Cumbia. Designed to bring success in
social dancing. Emphasis on ‘Club styling’ used for
the smaller, crowded, dance floors and the basic
rhythm variations found in Latin music from cultures
around the world.

PE 165 - Dance Improv (1)
Practice the techniques, tools and training needed to
cultivate the sensing, and imaginative body, and use
them as a guide in movement patterns and dances,
both individually and collectively. No prior dance
experience required.

PE 176 - Day Hiking (1)
Portland has numerous parks and a variety of
neighborhood pedestrian paths to offer enjoyable
exercise to residents and visitors. The course will
introduce a sample of day excursions between 4 to 8
miles in length on a variety of surfaces: asphalt,
gravel, natural trails, flat, or hilly. The hikes in this
course will be within 15- 25 minutes of PSU. Hiking
is a great way to improve cardiovascular fitness while
burning calories. Basic hiking principles, selecting
appropriate paths for ability levels, and progression
of difficulty will be the cornerstone of the course.
Since hiking is a weight bearing exercise and low
impact workout, it prevents osteoporosis while
enjoying the outdoors.

PE 177 - Hiking in the Columbia Gorge (1)
Portland as a city is privileged to have in close
proximity the Columbia Gorge. Within 30-45
minutes it offers numerous hiking trails (long or short)
of all levels for enjoyment and exercise in the
outdoors. This course will introduce light hiking day
excursions between 3 to 5 miles in length which will
provide walking fitness, but also focus on waterfalls,
geology, Oregon history, animal habitats, flora and
fauna.

PE 181 - Varsity Sports (1)
Please contact the department for a course
description.

PE 193 - Fitness Instruction: Adapted Physical
Education (2)
Please contact the department for a course
description.
PE 194 - Fitness Instruction: Personal Training (2)
Please contact the department for a course description.

PE 227 - Flex Fitness (2)
This course provides the student with the flexibility for self-paced and self-directed participation in the Physical Education courses offered at PSU. With the freedom to select the activity, day and time from the attached list of approved courses, the options are almost limitless. The student can attend an activity once or they may choose to stick with the same class throughout the entire term. The choice is completely up to them and their schedule(s). Simply select the desired activity, check with the instructor of the chosen activity before participating and present attached attendance record form and join the activity (given space available). No more stressing about missing class to meet with classmates or instructors - just choose an alternate activity, date or time. This class is available as a 1 or 2 credit option.

PE 230 - (4)

PE 280 - Physical Education Service Courses: Women (2)
A variety of activities taught for physiological and recreational values. Two hours per week plus field trips and extended experiences.

PE 281 - Viking Experience (2)
Please contact the department for a course description.

PE 281L - Lab for PE 281 (0)
Please contact the department for a course description.

Per - Persian
Per 101 - First-Year Persian Term 1 (4)
Introduction to spoken and written Persian. Grammar, reading, and simple conversation. This is the first course in a sequence of three: Per 101, Per 102, and Per 103.

Per 102 - First-Year Persian Term 2 (4)
Introduction to spoken and written Persian. Grammar, reading, and simple conversation. This is the second course in a sequence of three: Per 101, Per 102, and Per 103.

Per 103 - First-Year Persian Term 3 (4)
Introduction to spoken and written Persian. Grammar, reading, and simple conversation. This is the third course in a sequence of three: Per 101, Per 102, and Per 103.

Per 199 - Special Studies (1-6)
(Credit to be arranged.)

Per 201 - Second-Year Persian Term 1 (4)
Graded readings in the modern literary language. Conversation and prose composition. This is the first course in a sequence of three: Per 201, Per 202, and Per 203. Recommended prerequisite: Per 103.

Per 202 - Second-Year Persian Term 2 (4)
Graded readings in the modern literary language. Conversation and prose composition. This is the second course in a sequence of three: Per 201, Per 202, and Per 203. Recommended prerequisite: Per 103.

Per 203 - Second-Year Persian Term 3 (4)
Graded readings in the modern literary language. Conversation and prose composition. This is the third course in a sequence of three: Per 201, Per 202, and Per 203. Recommended prerequisite: Per 103.

Per 299 - Special Studies (1-12)
(Credit to be arranged.)

Per 301 - Third-year Persian (4)
Reading in literature, composition, expository writing, and conversation. This is the first course in a sequence of two: Per 301 and Per 302. Recommended prerequisite: Per 203.
Per 302 - Third-year Persian (4)
Reading in literature, composition, expository writing, and conversation. This is the second course in a sequence of two: Per 301 and Per 302. Recommended prerequisite: Per 203.

Per 330U - Persian Culture and Civilization (4)
A multimedia survey of major aspects of 2500 years of Persian civilization including traditions, art, music, architecture, handicrafts, literature, cities, and sports. Reflects Persian culture from the glories of Iran's past to contemporary scenes of rural life. Taught in English.

Per 341 - Introduction to Persian Literature (4)
Selected texts from classical and modern Persian poetry and prose including epic, lyric, and mystic traditions placed in historical contexts. Covers the most important genres such as the Qasida, the Ghazal, the Ruba'i and the Masnavi. Expected preparation: Per 302.

Per 399 - Special Studies (1-4)
(Credit to be arranged.)

Per 401 - Research (1-6)
(Credit to be arranged.)

Per 404 - Cooperative Education/Internship (1-12)
(Credit to be arranged.)

Per 409 - Practicum (1-4)
(Credit to be arranged.)

Per 410 - Selected Topics (1-6)
(Credit to be arranged.)

Ph - Physics
Ph 101 - Essentials of Physics (4)
An elementary introduction to the basic principles of physics, their interpretation and application. Designed to accommodate all liberal arts students. This is the first course in a sequence of two: Ph 101 and Ph 102. Concurrent enrollment in Ph 104, 105 is encouraged. Recommended prerequisite: high school algebra.

Ph 102 - Essentials of Physics (4)
An elementary introduction to the basic principles of physics, their interpretation and application. Designed to accommodate all liberal arts students. This is the second course in a sequence of two: Ph 101 and Ph 102. Concurrent enrollment in Ph 104, 105 is encouraged. Recommended prerequisite: high school algebra.

Ph 104 - Experimental Investigations for Non-science Majors (2)
Discovery labs for essential laws of physics. Investigate gravity, force, acceleration, momentum, heat, work, energy, electricity, light, and radioactivity. Make simple electrical circuits and an electrical motor. Improve computer literacy by working with graphic models of radioactive decay. This is the first course in a sequence of two: Ph 104 and Ph 105. One two-hour discussion and laboratory period. Concurrent enrollment in Ph 101, 102 is encouraged. Recommended prerequisite: high school algebra.

Ph 105 - Experimental Investigations for Non-science Majors (2)
Discovery labs for essential laws of physics. Investigate gravity, force, acceleration, momentum, heat, work, energy, electricity, light, and radioactivity. Make simple electrical circuits and an electrical motor. Improve computer literacy by working with graphic models of radioactive decay. This is the second course in a sequence of two: Ph 104 and Ph 105. One two-hour discussion and laboratory period. Concurrent enrollment in Ph 101, 102 is encouraged. Recommended prerequisite: high school algebra.

Ph 121 - General Astronomy (4)
An introductory historical, descriptive, and interpretative study of astronomy. Emphasis on the basic scientific methods as they apply to astronomical problems. Detailed examination of the earth, followed by a survey of the other members of the solar system. Survey of the stars, their types, grouping, and motions. Models for the evolution of the Universe and the possibility of life elsewhere. The nature of light, the types of information it carries, and the types of devices used to detect it. This is the
first course in a sequence of two: Ph 121 and Ph 122 which need not be taken in sequence.

**Ph 122 - General Astronomy (4)**

An introductory historical, descriptive, and interpretative study of astronomy. Emphasis is on the basic scientific methods as they apply to astronomical problems. Detailed examination of the earth, followed by a survey of the other members of the solar system. Survey of the stars, their types, grouping, and motions. Models for the evolution of the Universe and the possibility of life elsewhere. The nature of light, the types of information it carries, and the types of devices used to detect it. This is the second course in a sequence of two: Ph 121 and Ph 122 which need not be taken in sequence.

**Ph 199 - Special Studies (1-3)**

(Credit to be arranged.)

**Ph 201 - General Physics (4)**

Introductory physics for science majors. The student will explore topics in physics including Newtonian mechanics, electricity, and magnetism, thermal physics, optics, and modern physics. This is the first course in a sequence of three: Ph 201, Ph 202, and Ph 203 and must be taken in sequence. 

Prerequisite: Mth 112 or Mth 251 or Aleks Placement Test score 76 or higher. Corequisite: Ph 214.

**Ph 202 - General Physics (4)**

Introductory physics for science majors. The student will explore topics in physics including Newtonian mechanics, electricity, and magnetism, thermal physics, optics, and modern physics. This is the second course in a sequence of three: Ph 201, Ph 202, and Ph 203 and must be taken in sequence. 

Prerequisite: Ph 201 or Ph 231. Corequisite: Ph 215.

**Ph 203 - General Physics (4)**

Introductory physics for science majors. The student will explore topics in physics including Newtonian mechanics, electricity, and magnetism, thermal physics, optics, and modern physics. This is the third course in a sequence of three: Ph 201, Ph 202, and Ph 203 and must be taken in sequence. 

Prerequisite: Ph 202 or Ph 232. Corequisite: Ph 216.

**Ph 211 - General Physics (with Calculus) I (4)**

Introductory physics for students majoring in science and engineering. The student will explore statics and dynamics using the methods of calculus. This is the first course in a sequence of three: Ph 211, Ph 212, and Ph 213 and must be taken in sequence. 

Prerequisite: Mth 251. Corequisite: Ph 214.

**Ph 212 - General Physics (with Calculus) II (4)**

Introductory physics for students majoring in science and engineering. The student will explore topics in electricity and electromagnetism using the methods of calculus. This is the second course in a sequence of three: Ph 211, Ph 212, and Ph 213 and must be taken in sequence. 

Prerequisite: Ph 211 and Mth 252. Corequisite: Ph 215.

**Ph 213 - General Physics (with Calculus) III (4)**

Introductory physics for students majoring in science and engineering. The student will explore topics in thermodynamics, and optics using the methods of calculus. This is the third course in a sequence of three: Ph 211, Ph 212, and Ph 213 and must be taken in sequence. 

Prerequisite: Ph 212 and Mth 252. Corequisite: Ph 216.

**Ph 214 - Lab for Ph 201 or Ph 211 or Ph 221 or Ph 231 (1)**

Introductory laboratory for students in General Physics (with Calculus). This is the first lab in a sequence of three: Ph 214, Ph 215, and Ph 216. One 3-hour laboratory period. 

Prerequisite: Concurrent enrollment in Ph 201, Ph 211, Ph 221, or Ph 231.

**Ph 215 - Lab for Ph 202 or Ph 212 or Ph 222 or Ph 232 (1)**

Introductory laboratory for students in General Physics (with Calculus). This is the second lab in a sequence of three: Ph 214, Ph 215, and Ph 216. One 3-hour laboratory period. 

Prerequisite: Concurrent enrollment in Ph 202, Ph 212, Ph 222, or Ph 232.

**Ph 216 - Lab for Ph 203 or Ph 213 or Ph 223 or Ph 233 (1)**

Introductory laboratory for students in General Physics (with Calculus). This is the third lab in a sequence of three: Ph 214, Ph 215, and Ph 216. One 3-hour laboratory period. 

Prerequisite: Concurrent enrollment in Ph 203, Ph 213, Ph 223, or Ph 233.
**Ph 221 - General Physics (with Calculus) I (3)**
Introductory physics for students majoring in engineering. The student will explore topics in statics and dynamics using the methods of calculus. This is the first course in a sequence of three: Ph 221, Ph 222, and Ph 223 and must be taken in sequence.
Prerequisite: Mth 251. Corequisite: Ph 214.

**Ph 222 - General Physics (with Calculus) II (3)**
Introductory physics for students majoring in engineering. The student will explore topics in electricity and electromagnetism using the methods of calculus. This is the second course in a sequence of three: Ph 221, Ph 222, and Ph 223 and must be taken in sequence.
Prerequisite: Ph 221 and Mth 252. Corequisite: Ph 215.

**Ph 223 - General Physics (with Calculus) III (3)**
Introductory physics for students majoring in engineering. The student will explore topics in thermodynamics, and optics using the methods of calculus. This is the third course in a sequence of three: Ph 221, Ph 222, and Ph 223 and must be taken in sequence.
Prerequisite: Ph 222 and Mth 252. Corequisite: Ph 216.

**Ph 231 - General Physics I with Life Science and Medical Applications (4)**
This is a general physics course with a focus on life science and medical applications. In Ph 231 students explore mechanics. This is the first course in a sequence of three: Ph 231, Ph 232, and Ph 233 and it is recommended they be taken in this order.
Prerequisite: Mth 112 or Mth 251 or Aleks Placement Test score 76 or higher. Corequisite: Ph 214.

**Ph 232 - General Physics II with Life Science and Medical Applications (4)**
This is a general physics course with a focus on life science and medical applications. In Ph 232 students explore fluids and electromagnetism. This is the second course in a sequence of three: Ph 231, Ph 232, and Ph 233 and it is recommended they be taken in this order.
Prerequisite: Ph 201 or Ph 231. Corequisite: Ph 215.

**Ph 233 - General Physics III with Life Science and Medical Applications (4)**
This is a general physics course with a focus on life science and medical applications. In Ph 233 students explore thermodynamics, waves and optics. This is the third course in a sequence of three: Ph 231, Ph 232, and Ph 233 and it is recommended they be taken in this order.
Prerequisite: Ph 202 or Ph 232. Corequisite: Ph 216.

**Ph 234 - Lab for General Physics I with Life Science and Medical Applications (1)**
This is a general physics lab course with a focus on life science and medical applications. Students conduct lab exercises exploring mechanics and thermal physics. This is the first course in a sequence of three: Ph 234, Ph 235, and Ph 236 and it is recommended they be taken in this order.
Prerequisite: Mth 112 or Aleks Placement Test at 75%. Corequisite: Ph 231.

**Ph 235 - Lab for General Physics II with Life Science and Medical Applications (1)**
This is a general physics lab course with a focus on life science and medical applications. Students conduct lab exercises exploring fluids and electromagnetism. This is the second course in a sequence of three: Ph 234, Ph 235, and Ph 236 and it is recommended they be taken in this order.
Prerequisite: Mth 112 or Aleks Placement Test at 75%. Corequisite: Ph 232.

**Ph 236 - Lab for General Physics III with Life Science and Medical Applications (1)**
This is a general physics lab course with a focus on life science and medical applications. Students conduct lab exercises exploring waves and optics. This is the third course in a sequence of three: Ph 234, Ph 235, and Ph 236 and it is recommended they be taken in this order.
Prerequisite: Mth 112 or Aleks Placement Test at 75%. Corequisite: Ph 233.

**Ph 237 - Workshop for PH 231 General Physics I with Life Science and Medical Applications (1)**
Optional peer-led problem-solving sessions designed to promote the success of students in Ph 231, Ph 232, Ph 233 General Physics with Life Science and Medical Applications sequence.
Corequisite: Concurrent enrollment in Ph 231 required.

**Ph 238 - Workshop for PH 232 General Physics II with Life Science and Medical Applications (1)**
Optional peer-led problem-solving sessions designed to promote the success of students in Ph 231, Ph 232, Ph 233 General Physics with Life Science and Medical Applications sequence.
Corequisite: Concurrent enrollment in Ph 232 required.
Ph 276 - Workshop for PH 233 General Physics III with Life Science and Medical Applications (1)

Optional peer-led problem-solving sessions designed to promote the success of students in Ph 231, Ph 232, Ph 233 General Physics with Life Science and Medical Applications sequence.
Corequisite: Concurrent enrollment in Ph 233 required.

Ph 284 - Workshop for Ph 201 General Physics (1)

Optional peer-led problem-solving sessions designed to promote the success of students in Ph 201, Ph 202, Ph 203 general physics sequence. Concurrent enrollment: corresponding lecture course Ph 201, Ph 202, Ph 203. Pass/no pass only.
Prerequisite: Concurrent enrollment in Ph 201.

Ph 285 - Workshop for Ph 202 General Physics (1)

Optional peer-led problem-solving sessions designed to promote the success of students in Ph 201, Ph 202, Ph 203 general physics sequence. Concurrent enrollment: corresponding lecture course Ph 201, Ph 202, Ph 203. Pass/no pass only.
Prerequisite: Concurrent enrollment in Ph 202.

Ph 286 - Workshop for Ph 203 General Physics (1)

Optional peer-led problem-solving sessions designed to promote the success of students in Ph 201, Ph 202, Ph 203 general physics sequence. Concurrent enrollment: corresponding lecture course Ph 201, Ph 202, Ph 203. Pass/no pass only.
Prerequisite: Concurrent enrollment in Ph 203.

Ph 294 - Workshop for Ph 211/221 General Physics (with Calculus) (1)

Optional peer-led problem-solving sessions designed to promote the success of students in Ph 211, Ph 212, Ph 213 OR Ph 221, Ph 222, Ph 223 general physics sequence. Concurrent prerequisite: corresponding lecture course Ph 211 or Ph 221, Ph 212 or Ph 222, Ph 213 or Ph 223. Pass/no pass only.
Prerequisite: Concurrent enrollment in Ph 211 or Ph 221.

Ph 295 - Workshop for Ph 212/222 General Physics (with Calculus) (1)

Optional peer-led problem-solving sessions designed to promote the success of students in Ph 211, Ph 212, Ph 213 OR Ph 221, Ph 222, Ph 223 general physics sequence. Concurrent prerequisite: corresponding lecture course Ph 211 or Ph 221, Ph 212 or Ph 222, Ph 213 or Ph 223. Pass/no pass only.
Prerequisite: Concurrent enrollment in Ph 212 or Ph 222.

Ph 296 - Workshop for Ph 213/223 General Physics (with Calculus) (1)

Optional peer-led problem-solving sessions designed to promote the success of students in Ph 211, Ph 212, Ph 213 OR Ph 221, Ph 222, Ph 223 general physics sequence. Concurrent prerequisite: corresponding lecture course Ph 211 or Ph 221, Ph 212 or Ph 222, Ph 213 or Ph 223. Pass/no pass only.
Prerequisite: Concurrent enrollment in Ph 213 or Ph 223.

Ph 299 - Special Studies (1-8)

(Credit to be arranged.)

Ph 311 - Introduction to Modern Physics I (4)
The revolution in the concepts of physics in the early 20th century. Quanta, black-body radiation, relativity, Bohr's theory of the atom. Introduction to quantum mechanics. This is the first course in a sequence of two: Ph 311 and Ph 312 and must be taken in sequence. Expected preparation: Mth 253.
Prerequisite: Mth 252, Ph 203 or Ph 213.

Ph 312 - Introduction to Modern Physics II (4)
The revolution in the concepts of physics in the 20th century. Radioactivity, introduction to quantum mechanics. Atomic, molecular spectroscopy, periodic table. Introduction to nuclear and solid state physics, and elementary particles. This is the second course in a sequence of two: Ph 311 and Ph 312 and must be taken in sequence.
Prerequisite: Ph 311.

Ph 314 - Experimental Physics I (4)
Experiments in electrical measurements, digital logic circuits with applications to experimental control and computer interfacing, and analog circuits. Two 3-hour lab periods. This is the first course in a sequence of three: Ph 314, Ph 315 and Ph 316.

Ph 315 - Experimental Physics II (4)
Experiments in electrical measurements, digital logic circuits with applications to experimental control and computer interfacing, and analog circuits. Two 3-hour lab periods. This is the second course in a sequence of three: Ph 314, Ph 315 and Ph 316.

Ph 316 - Experimental Physics III (4)
Students will perform several experiments illustrating quantum and relativistic effects. The emphasis will be on computer-assisted experimentation and data
analyses. Experiments will include instrumentation and counting in nuclear physics, measurement of band gap in semiconductors, measurement of ratio of electron charge to electron mass, speed of light, Frank-Hertz experiment and electron spin resonance. Two 3-hour laboratory periods. This is the third course in a sequence of three: Ph 314, Ph 315 and Ph 316. Expected preparation: Ph 311.

Ph 319 - Solid State Physics for Engineering Students (4)
Survey of solid state physics including topics necessary for understanding crystalline solids and their electron transport processes. Topics include crystal lattices, x-ray diffraction, concepts of quantum physics, the Schrödinger equation, electron tunneling, physical statistics, the free electron theory of metals, periodic potentials, semiconductors, and superconductors. Recommended prerequisite: Ph 213 or 223.

Ph 321 - Current Electricity (4)
Electric potential and current; Kirchhoff's Laws and equivalent circuits. Transient and A.C. behavior of circuit elements. Theory of operation of diodes and transistors. Recommended prerequisites: Ph 203 or 213; concurrent enrollment in Ph 314.
Corequisite: Ph 314.

Ph 322 - Computational Physics (4)
Formulation and numerical solution of physics problems. Use of computers and graphical displays to enhance intuition and supplement analytical procedures. Approaches to complex physical situations, especially those involving dissipative, nonlinear and stochastic phenomena. Recommended prerequisite: Working knowledge of at least one computer language.

Ph 331 - Physics of Music (4)
A series of lectures and laboratories illustrating the basic principles of acoustics and their application to string, wind, brass, and percussion/instruments. Some of the laboratory exercises are adaptable for use in primary and secondary school classes. Recommended prerequisite: one year of music, or one year of a physical science.

Ph 333U - Weather (4)
Introductory course in the atmospheric environment providing a comprehensive understanding of atmospheric structure and the changes over time that result in the weather we experience. Topics include: atmospheric moisture (fog, rain, clouds), atmospheric stability and cloud development, air pressure and winds, air masses and fronts, and hurricanes and tornadoes. This course is the same as Geog 333U; course may be taken only once for credit. Recommended: upper division standing or Geog 210.
Cross-Listed as: Geog 333U.

Ph 335U - Wacky or Real: What Everyone Should Know About Physics Scams (4)
The use and misuse of physics: beginning with a firm understanding of the strengths and weaknesses of the scientific method, analyzes how people veer away from it, resulting in pathological, junk, pseudo and fraudulent physics. Examples such as magnetic therapy, perpetual motion, ESP, X-ray cures, and astrology are included. Recommended prerequisites: upper division standing.

Ph 337 - Physics in Biomedicine(4)
The physics behind the most important medical instruments and technologies. A wide range of concepts from electromagnetism, optics, to quantum mechanics are used to explain the mechanisms behind ultrasound, endoscopy, optical microscopy, EKG, pacemaker, defibrillators, LASER eye surgery, microscopy, x-ray, radiation, CAT scan, PET scan, MRI, and more. Expected preparation: Ph 201, 203 or Ph 101, 102.

Ph 353U - Radiation in the Environment (4)
Examines sources of radiation and the hazards they represent. Students will explore the interaction of radiation with matter, including living tissue, and examine dosage and risk assessment. Topics include: fundamentals of electromagnetic radiation, nuclei and radioactive decay; cosmic background radiation and radon gas; nuclear chain reactions and atomic weapons; nuclear power generation, waste disposal and nuclear disasters; medical x-rays and non-ionizing radiation from microwaves and cellular phones.
Prerequisite: Upper-division standing. Cross-Listed as: This is the same course as Sci 353U and may be taken only once for credit.

Ph 361U - General Astronomy I (4)
An introduction to the history of astronomy, the nature of light, telescopes, and an examination of the Earth and other planets both within and outside of the solar system. Emphasis on basic scientific methods, including relationships found through ratios, powers,
and a few square roots. Includes laboratory. This is the first course in a sequence of two: Ph 361U and Ph 362U.

Cross-Listed as: Sci 315U.

Ph 362U - General Astronomy II (4)
Survey of the sun, stars, black holes, galaxies, and the role of women in the study of cosmic evolution and structure. Emphasis on basic scientific methods, including relationships found through ratios, powers, and a few square roots. Includes laboratory. This is the second course in a sequence of two: Ph 361U and Ph 362U.

Cross-Listed as: Sci 316U.

Ph 365 - Fractals, Chaos, and Complexity (4)
Introduction to the basic physical ideas behind fractals in nature, chaos, complexity, and other current concepts in physics, with emphasis on fractals and chaos. Computer simulations and desktop experiments involving fractals, chaos, and complex systems. Recommended prerequisite: astronomy, general physics, or Natural Science Inquiry.

Ph 366U - Complexity and the Universe I (4)
Introduction to the basic physical ideas behind complexity and other current concepts in physics. Computer simulations and desktop experiments involving fractals, chaos, and complex systems. Includes laboratory and/or fieldwork. Recommended prerequisite: general physics or Natural Science Inquiry.

Ph 367U - Complexity and the Universe II (4)
Continuation of Sci 318/Ph 366. Emphasizes scientific cosmology with a focus on understanding how insights gained from physics and astronomy affect your view of the universe and your place in it. Students participate actively in seeing how some of the information was gathered, to help critically analyze what to believe about the history and arrangement of the universe and what it means to them. Includes laboratory and/or fieldwork. Recommended prerequisite: astronomy, general physics, or Natural Science Inquiry.

Ph 371 - Fractals, Chaos, Complexity, and Other Current Topics in Physics (4)
Introductory survey to current concepts in fractals in the natural world, chaos, complexity, and other related topics in physics. Computer simulations and the use of microcomputers, desktop experiments are an essential part of the course. Recommended prerequisite: one year of general physics.

Ph 375U - Climate Change and Human Life (4)
An introduction to the global environment and how human activities are causing climatic changes, ozone depletion, and deforestation. Emphasizes the interrelationship between environmental processes. Deals with the qualitative aspects of how the earth's climate works, how it can be altered by burning of fossil fuels (emissions of carbon dioxide) and by the increasing concentrations of other "greenhouse gases"; how the ozone layer can be depleted by man-made chemicals, and what is being done, or can be done to avert the undesirable consequences of these global changes.

Ph 378U - Science Through Science Fiction (4)
This class uses science fiction literature to examine a wide variety of topics in science. Recommended prerequisites: astronomy, general physics, or Natural Science Inquiry. Also listed as Sci 355; course may be taken only once for credit.

Ph 382U - Introduction to Nanoscience and Nanotechnology (4)
Basic introduction to nanoscience and nanotechnology for all interested science, engineering and social science and humanities students. This is the same course as Sci 382U and may be taken only once for credit.

Cross-Listed as: Sci 382U.

Ph 384 - From Contemporary Nanoscience Towards Sustainable Nanotechnologies (4)
Provides an overview of nanoscience/technology, its interdisciplinarity, how it complements biomedical, engineering, economic, and environmental studies and gives students an appreciation of why “soft” machines are favored over “hard” machines. As second part of Ph 382U (cross listed Sci 382U), it provides a scientific/technological basis for sustainable future technology developments.

Cross-Listed as: This is the same course as Sci 384 and may be taken only once for credit.

Ph 399 - Special Studies (0-6)
(Credit to be arranged.)
Ph 401 - Research (1-6)  
(Credit to be arranged.) Consent of instructor.

Ph 402 - Independent Study (1-9)  
(Credit to be arranged.)

Ph 404 - Cooperative Education/Internship (1-12)  
(Credit to be arranged.)

Ph 405 - Reading and Conference (1-6)  
(Credit to be arranged.) Consent of instructor.

Ph 406 - Special Projects (0-9)  
(Credit to be arranged.) Consent of instructor.

Ph 407 - Seminar (0-6)  
(Credit to be arranged.) Consent of instructor.

Ph 408 - Workshop (1-12)  
(Credit to be arranged.)

Ph 410 - Selected Topics (1-6)  
(Credit to be arranged.) Consent of instructor.

Ph 411 - Introduction to Quantum Mechanics (4)  
An introduction to the formulation and application of wave mechanics; the Schrodinger equation and its application to time-independent problems (both one- and three-dimensional problems); identical particles; approximation methods including mainly time-independent perturbations. Brief exploration of the potential applications of quantum mechanics to engineering: quantum nano-structures and quantum computers. Expected preparation: Ph 318 or 311, Mth 256.  
Also offered for graduate-level credit as Ph 511 and may be taken only once for credit. Prerequisite: Ph 411, Ph 311, and Mth 256.

Ph 412 - Quantum Mechanics II (4)  
Introduction to the three-dimensional Schrodinger equation and applications such as band theory, selection rules, and molecules. The first half of the course will focus on exactly solvable models and analytic solutions. The second half will emphasize approximation methods in quantum mechanics, including perturbation theory, the variational principle, and the WKB approximation. The use of scientific software and modeling to solve quantum mechanical problems will be emphasized.  
Also offered for graduate-level credit as Ph 512 and may be taken only once for credit. Prerequisite: Ph 411, Ph 311, and Mth 256.

Ph 413 - Introduction to Solid State Physics (4)  
Experimental and theoretical survey of the lattice and electronic properties of solids with particular emphasis on the properties of electrons in metals. Expected preparation: Ph 411 or Ph 312.  
Also offered for graduate-level credit as Ph 513 and may be taken only once for credit.

Ph 415 - Experimental Optics (3)  
Advanced experiments in physical optics. One 4-hour laboratory period. Expected preparation: Ph 203 or Ph 213.  
Also offered for graduate-level credit as Ph 515 and may be taken only once for credit.

Ph 424 - Classical Mechanics I (4)  

Ph 425 - Classical Mechanics II (4)  
Also offered for graduate-level credit as Ph 525 and may be taken only once for credit.

Ph 426 - Thermodynamics and Statistical Mechanics (4)  
Concepts of temperature, work, and heat; first and second laws of thermodynamics and applications; thermodynamic potentials; heat engines, Carnot cycle, and ideal gases; entropy and its statistical interpretation; kinetic theory of gases; classical and quantum statistics; introduction to statistical mechanical ensembles. Expected preparation: Ph 203 or Ph 213, Mth 254, and Ph 311.
Also offered for graduate-level credit as Ph 526 and may be taken only once for credit.

**Ph 431 - Electricity and Magnetism I (4)**
Advanced study of electricity and magnetism covering field and potential of charge arrays, electrostatic field energy, images, multipoles, Laplace's equation, Biot-Savart and Ampere's laws, magnetic field energy, vector potential, displacement current, dielectrics and their microscopic models, electromagnetic wave equations, boundary conditions, energy radiation, magnetic materials and their microscopic models. This is the first course in a sequence of two: Ph 431 and Ph 432. Expected preparation: Ph 312 and Mth 256.

Also offered for graduate-level credit as Ph 531 and may be taken only once for credit.

**Ph 432 - Electricity and Magnetism II (4)**
Advanced study of electricity and magnetism covering field and potential of charge arrays, electrostatic field energy, images, multipoles, Laplace's equation, Biot-Savart and Ampere's laws, magnetic field energy, vector potential, displacement current, dielectrics and their microscopic models, electromagnetic wave equations, boundary conditions, energy radiation, magnetic materials and their microscopic models. This is the second course in a sequence of two: Ph 431 and Ph 432. Expected preparation: Ph 312 and Mth 256.

Also offered for graduate-level credit as Ph 532 and may be taken only once for credit.

**Ph 434 - Methods of Mathematical Physics (4)**
A survey of methods of applied mathematics used in modern physics, to include: vectors, matrices, operators, and eigenvalues; perturbation theory and series expansion; variation and optimization; numerical methods; transforms; and special functions. Expected preparation: Ph 312 and Mth 256.

Also offered for graduate-level credit as Ph 534 and may be taken only once for credit.

**Ph 440 - Physics of Solid State Devices (4)**
This is a survey intended to provide the foundation necessary for understanding of function, technology and design of solid state devices, rather than their application. Topics will include: introduction to and application of concepts of quantum physics to solids, effect of periodicity in solids on electron energy states, electron statistics, metals, insulators, semiconductors and superconductors, thermionic and field assisted electron emission, electron scattering and mobility of charge carriers, intrinsic and extrinsic semiconductors, quantitative treatment of p-n junction, diffusion and recombination of excess carriers, quantitative treatment of electron injection, majority and minority components of the junction current, breakdown, quantitative treatments of bipolar junction transistor, field effect transistor and tunnel diodes, physics of metal-semiconductor and metal-insulator-semiconductor junctions and devices, superconductivity and superconducting devices, DC and AC Josephson effects, Josephson junctions, superconductive quantum interference devices. This is the first course in a sequence of two: Ph 440 and Ph 441. Expected preparation: Ph 312 or Ph 318.

Also offered for graduate-level credit as Ph 540 and may be taken only once for credit.

**Ph 441 - Physics of Solid State Devices (4)**
This is a survey intended to provide the foundation necessary for understanding of function, technology and design of solid state devices, rather than their application. Topics will include: introduction to and application of concepts of quantum physics to solids, effect of periodicity in solids on electron energy states, electron statistics, metals, insulators, semiconductors and superconductors, thermionic and field assisted electron emission, electron scattering and mobility of charge carriers, intrinsic and extrinsic semiconductors, quantitative treatment of p-n junction, diffusion and recombination of excess carriers, quantitative treatment of electron injection, majority and minority components of the junction current, breakdown, quantitative treatments of bipolar junction transistor, field effect transistor and tunnel diodes, physics of metal-semiconductor and metal-insulator-semiconductor junctions and devices, superconductivity and superconducting devices, DC and AC Josephson effects, Josephson junctions, superconductive quantum interference devices. This is the second course in a sequence of two: Ph 440 and Ph 441. Expected preparation: Ph 312 or Ph 318.

Also offered for graduate-level credit as Ph 541 and may be taken only once for credit.

**Ph 444 - Microelectronic Device Fabrication I (4)**
The first part of the series includes crystal growth, crystal structure, wafer preparation, doping and diffusion, oxidation, defects, heterogeneous chemical reactions, ion implantation, and AC Josephson effects, Josephson junctions, superconductive quantum interference devices. This is the second course in a sequence of two: Ph 440 and Ph 441. Expected preparation: Ph 312 or Ph 318.

Extension and limitation of "top-down" processing to fabrication of nanoscale structures such as nano-rods, nano-wires, etc., and application of these to devices are also introduced.
Also offered for graduate-level credit as Ph 545 and may be taken only once for credit. Prerequisite: Ph 314 or consent of instructor.

**Ph 446 - Microelectronic Device Fabrication II (4)**
The emphasis of second part of this series is on metallization, dielectrics, and multilevel interconnects. Metallization issues discussed will include silicides, barrier layers, interconnects, multilevel metallization architecture, and low-k dielectrics. This is followed by discussion of deposition and properties of various dielectric films. Epitaxial growth and properties of SOI and SiGe devices are also covered. In all these discussions, physics related to fabrication of nanoscale devices and special effects that come into play at these dimensions will be examined. Assignments will include computer simulations of device fabrication (i.e., virtual fab software).

Also offered for graduate-level credit as Ph 546 and may be taken only once for credit. Prerequisite: Ph 445 or Ph 545 or consent of instructor.

**Ph 447 - Microelectronic Device Fabrication III (4)**
The third part of this series starts with the techniques required to pattern the nanoscale structures on wafers. These techniques include electron beam, x-ray, EUV, and photolithography, including discussion of resist technology. This is followed by methods to produce these structures using wet and dry methods. Discussion of dry processing includes fundamentals and applications of plasmas for etching and deposition (e.g., high-density plasmas), including plasma damage. The limitations of fabrication and operation of nanoscale devices are discussed. Special project for this class will involve fabrication of a virtual device (bipolar junction transistor) with specified electrical performance parameters using the virtual fab software.

Also offered for graduate-level credit as Ph 547 and may be taken only once for credit. Prerequisite: Ph 446 or Ph 546 or consent of instructor.

**Ph 451 - Electron Microscopy (4)**
Electron optics theory, specimen preparation and experimental work with transmission and scanning electron microscopes. Microchemical analysis with an energy dispersive spectrometer. Specimens from all the sciences. Two lectures, one 3-hour laboratory period. This is the first course in a sequence of two: Ph 451 and Ph 452. Expected preparation: one year of general physics and one year of any other science.

Also offered for graduate-level credit as Ph 551 and may be taken only once for credit.

**Ph 452 - Electron Microscopy (4)**
Electron optics theory, specimen preparation and experimental work with transmission and scanning electron microscopes. Microchemical analysis with an energy dispersive spectrometer. Specimens from all the sciences. Two lectures, one 3-hour laboratory period. This is the second course in a sequence of two: Ph 451 and Ph 452. Expected preparation: one year of general physics and one year of any other science.

Also offered for graduate-level credit as Ph 552 and may be taken only once for credit.

**Ph 464 - Applied Optics (4)**
An overview of optics and such principal application as fiber optics; chemical, biological, and physical sensors; optical information processing, acousto-optics; lasers and detectors. This course is the same as ECE 594; course may only be taken once for credit. Expected preparation: Ph 203 or Ph 213 or Ph 223, Mth 254.

Also offered for graduate-level credit as Ph 564 and may be taken only once for credit.

**Ph 471 - Physical and Human Dimensions of Climate Change (4)**
A holistic course on global change science connecting atmospheric change, climate theory and the human response to global warming. Lays a foundation for understanding the complex issues of climatic change, its linkages and feedbacks. Policy options to manage the climate are examined using models, their predictions, and uncertainties.

Also offered for graduate-level credit as Ph 571 and may be taken only once for credit. Prerequisite: Ph 211, Ph 212, Ph 213, Mth 251, Mth 252, Mth 253. Cross-Listed as: ESM 471.

**Ph 472 - Introduction to Nonlinear Dynamics and Chaos (4)**
Introduction to basic theoretical and experimental tools to study chaos and nonlinear behavior. Desktop experiments and computer simulations of chaotic systems. Expected preparation: one year of general physics.

Also offered for graduate-level credit as Ph 572 and may be taken only once for credit.

**Ph 473 - Alternative Energies (4)**
Starting with a review of global energy trends, this course will cover the major resources of alternative energies (hydropower, wave, tidal and wind energy, solar energy, nuclear fission and fusion), their characteristics, utilization and technology as well as environmental and public impact. Special attention
will be given to photovoltaics and solar cell technology. Market developments will also be analyzed based on simple models.

Also offered for graduate-level credit as Ph 573 and may be taken only once for credit. Prerequisite: Ph 213 or Ph 223.

**Ph 475 - Stellar Astronomy Online for Educators (4)**

Class will access online materials in stellar astronomy education to help current and prospective science teachers update their knowledge of recent developments in astronomy. Expected preparation: one year of general physics.

Also offered for graduate-level credit as Ph 575 and may be taken only once for credit.

**Ph 476 - Observational Astronomy (2)**

Emphasis on hands-on activities and the observation of our own night sky. Observation of planets, sun, moon, globular clusters, galaxies, and black holes. Observational techniques including the use of telescopes, binoculars, and photography will be covered. Observational field trip to an observatory at a dark sky site. Expected preparation: one year of general physics.

Also offered for graduate-level credit as Ph 576 and may be taken only once for credit.

**Ph 477 - Air Pollution (4)**

Air pollution meteorology needed to understand air pollution, atmospheric dispersion models, K-theory, box models and receptor models. Use of simple computer models. This course is a foundation for the quantitative understanding of air pollution: At any point in the environment (receptor), how much pollution is caused by a known source? If there are many sources, how much pollution does each source contribute at a receptor? Expected preparation: Ph 213 or Ph 223, one year of calculus, introductory course in differential equations.

Also offered for graduate-level credit as Ph 577 and may be taken only once for credit.

**Ph 481 - Introduction to Nano(materials)-Science and –Engineering (4)**

An introduction to nano(materials)-science and engineering for students in physics, chemistry, geology, electrical and computer engineering, and mechanical and materials engineering. Nanoscale processes and devices and their applications. Expected preparation: two specific advanced upper division science courses dependent on major, or consent of instructor.

Also offered for graduate-level credit as Ph 581 and may be taken only once for credit.

**Ph 490 - Cellular and Molecular Biophysics (4)**

An introduction to the physical ideas and methods in the studies of biological phenomena, organization, structure, and function at the cellular and molecular level. Atomic and molecular structures, energy and interacting forces relating to cellular and molecular biophysics will be discussed. This is the first course in a sequence of two: Ph 490 and Ph 491. Expected preparation: Ph 203, Bi 253, and Ch 223. Calculus, previously or concurrently, is recommended.

Also offered for graduate-level credit as Ph 590 and may be taken only once for credit.

**Ph 491 - Cellular and Molecular Biophysics (4)**

An introduction to the physical ideas and methods in the studies of biological phenomena, organization, structure, and function at the cellular and molecular level. Atomic and molecular structures, energy and interacting forces relating to cellular and molecular biophysics will be discussed. This is the second course in a sequence of two: Ph 490 and Ph 491. Expected preparation: Ph 203, Bi 253, and Ch 223. Calculus, previously or concurrently, is recommended.

Also offered for graduate-level credit as Ph 591 and may be taken only once for credit.

**Ph 495 - Materials Physics: Structure and Physical Properties of Ordered and Disordered Condensed Matter (4)**

Introduction to materials physics. Generalized geometric-structural crystallography is at the core of this field because it allows for the derivation of the physical properties of condensed matter. Crystallographic symmetries are treated as continuous features. Quantitative X-ray diffraction, crystal defects, textures, modulated structures, and quasicrystals are also discussed.

Also offered for graduate-level credit as Ph 595 and may be taken only once for credit. Prerequisite: Ph 211, Ph 212, Ph 213, Ph 221, Ph 222, Ph 223, Ph 311, Ph 312, Ph 314, Ph 315, Ph 316, Ph 322, Ph 431, Ph 432, Ph 434, and their prerequisites; Mth 251, Mth 252, Mth 253: Calculus I-III, Mth 261: Linear Algebra and their prerequisites.

**Ph 413 - Introduction to Solid State Physics (4)**

Experimental and theoretical survey of the lattice and electronic properties of solids with particular emphasis on the properties of electrons in semiconductors and modern materials. Expected preparation: Ph 411 or Ph 312.
Also offered for graduate-level credit as Ph 513 and may be taken only once for credit. Prerequisite: Upper division standing.

Ph 501 - Research (1-9)
(Credit to be arranged.) Consent of instructor.

Ph 502 - Independent Study (1-6)
(Credit to be arranged.)

Ph 503 - Thesis (1-9)
(Credit to be arranged.)

Ph 504 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

Ph 505 - Reading and Conference (1-6)
(Credit to be arranged.) Consent of instructor.

Ph 506 - Special Projects (1-9)
(Credit to be arranged.) Consent of instructor.

Ph 507 - Seminar (0-6)
(Credit to be arranged.) Consent of instructor.

Ph 511 - Introduction to Quantum Mechanics (4)
An introduction to the formulation and application of wave mechanics; the Schrodinger equation and its application to time-independent problems (both one- and three-dimensional problems); identical particles; approximation methods including mainly time-independent perturbations. Brief exploration of the potential applications of quantum mechanics to engineering; quantum nano-structures and quantum computers. This course is the same as ECE 598 and may be taken only once for credit. Expected preparation: Ph 318 or 311, Mth 256.

Ph 512 - Quantum Mechanics II (4)
Introduction to the three-dimensional Schrodinger equation and applications such as band theory, selection rules, and molecules. The first half of the course will focus on exactly solvable models and analytic solutions. The second half will emphasize approximation methods in quantum mechanics, including perturbation theory, the variational principle, and the WKB approximation. The use of scientific software and modeling to solve quantum mechanical problems will be emphasized. Expected preparation: Ph 434 or Mth 322.

Ph 513 - Introduction to Solid State Physics (4)
Experimental and theoretical survey of the lattice and electronic properties of solids with particular emphasis on the properties of electrons in semiconductors and modern materials. Expected preparation: Ph 411 or Ph 312.

Ph 515 - Experimental Optics (3)
Advanced experiments in physical optics. One 4-hour laboratory period.

Ph 525 - Classical Mechanics II (4)
Advanced formulation of mechanics. Lagrange's and Hamilton's equations. The inertial tensor, free rotations, and rigid body dynamics. Theory of small oscillations, coupled oscillations and normal modes.

Ph 526 - Thermodynamics and Statistical Mechanics (4)
Concepts of temperature, work, and heat; first and second laws of thermodynamics and applications; thermodynamic potentials; heat engines, Carnot cycle, and ideal gases; entropy and its statistical interpretation; kinetic theory of gases; classical and quantum statistics; introduction to statistical mechanical ensembles.

Ph 531 - Electricity and Magnetism I (4)
Advanced study of electricity and magnetism covering field and potential of charge arrays,
Ph 532 - Electricity and Magnetism II (4)

Advanced study of electricity and magnetism covering field and potential of charge arrays, electrostatic field energy, images, multipoles, Laplace's equation, Biot-Savart and Ampere's laws, magnetic field energy, vector potential, displacement current, dielectrics and their microscopic models, electromagnetic wave equations, boundary conditions, energy radiation, magnetic materials and their microscopic models. This is the first course in a sequence of two: Ph 531 and Ph 532.

Also offered for undergraduate-level credit as Ph 431 and may be taken only once for credit.

Ph 534 - Methods of Mathematical Physics (4)

A survey of methods of applied mathematics used in modern physics, to include: vectors, matrices, operators, and eigenvalues; perturbation theory and series expansion; variation and optimization; numerical methods; transforms; and special functions.

Also offered for undergraduate-level credit as Ph 434 and may be taken only once for credit.

Ph 540 - Physics of Solid State Devices (4)

This is a survey intended to provide the foundation necessary for understanding of function, technology and design of solid state devices, rather than their application. Topics will include: introduction to and application of concepts of quantum physics to solids, effect of periodicity in solids on electron energy states, electron statistics, metals, insulators, semiconductors and superconductors, thermionic and field assisted electron emission, electron scattering and mobility of charge carriers, intrinsic and extrinsic semiconductors, quantitative treatment of p-n junction, diffusion and recombination of excess carriers, quantitative treatment of electron injection, majority and minority components of the junction current, breakdown, quantitative treatments of bipolar junction transistor, field effect transistor and tunnel diodes, physics of metal-semiconductor and metal-insulator-semiconductor junctions and devices, superconductivity and superconducting devices, DC and AC Josephson effects, Josephson junctions, superconductive quantum interference devices. This is the second course in a sequence of two: Ph 531 and Ph 532.

Also offered for undergraduate-level credit as Ph 440 and may be taken only once for credit.

Ph 541 - Physics of Solid State Devices (4)

This is a survey intended to provide the foundation necessary for understanding of function, technology and design of solid state devices, rather than their application. Topics will include: introduction to and application of concepts of quantum physics to solids, effect of periodicity in solids on electron energy states, electron statistics, metals, insulators, semiconductors and superconductors, thermionic and field assisted electron emission, electron scattering and mobility of charge carriers, intrinsic and extrinsic semiconductors, quantitative treatment of p-n junction, diffusion and recombination of excess carriers, quantitative treatment of electron injection, majority and minority components of the junction current, breakdown, quantitative treatments of bipolar junction transistor, field effect transistor and tunnel diodes, physics of metal-semiconductor and metal-insulator-semiconductor junctions and devices, superconductivity and superconducting devices, DC and AC Josephson effects, Josephson junctions, superconductive quantum interference devices. This is the second course in a sequence of two: Ph 530 and Ph 541.

Also offered for undergraduate-level credit as Ph 441 and may be taken only once for credit.

Ph 545 - Microelectronic Device Fabrication I (4)

The first part of the series includes crystal growth, crystal structure, wafer preparation, ion implantation, doping and diffusion, oxidation, defects, heterogeneous chemical reactions, thermodynamics and kinetics of basic processes such as diffusion and oxidation. These concepts are applied both to IC and photovoltaic device fabrication. Realistic process flows, physical metrology, device structure, electrical behavior and their trade-offs are discussed. Extension and limitation of "top-down" processing to fabrication of nanoscale structures such as nano-rods, nano-wires, etc., and application of these to devices are also introduced.

Also offered for undergraduate-level credit as Ph 445 and may be taken only once for credit.

Ph 546 - Microelectronic Device Fabrication II (4)

The emphasis of second part of this series is on metallization, dielectrics, and multilevel interconnects. Metallization issues discussed will include silicides, barrier layers, interconnects, multilevel metallization architecture, and low-k
dielectrics. This is be followed by discussion of deposition and properties of various dielectric films. Epitaxial growth and properties of SOI and SiGe devices are also covered. In all these discussions, physics related to fabrication of nanoscale devices and special effects that come into play at these dimensions will be examined. Assignments will include computer simulations of device fabrication (i.e., virtual fab software).

Also offered for undergraduate-level credit as Ph 446 and may be taken only once for credit.

**Ph 547 - Microelectronic Device Fabrication III (4)**

The third part of this series starts with the techniques required to pattern the nanoscale structures on wafers. These techniques include electron beam, x-ray, EUV, and photolithography, including discussion of resist technology. This is followed by methods to produce these structures using wet and dry methods. Discussion of dry processing includes fundamentals and applications of plasmas for etching and deposition (e.g., high-density plasmas), including plasma damage. The limitations of fabrication and operation of nano-scale devices are discussed. Special project for this class will involve fabrication of a virtual device (bipolar junction transistor) with specified electrical performance parameters using the virtual fab software.

Also offered for undergraduate-level credit as Ph 447 and may be taken only once for credit. Prerequisite: Ph 446 or Ph 546 or consent of instructor.

**Ph 551 - Electron Microscopy (4)**

Electron optics theory, specimen preparation and experimental work with transmission and scanning electron microscopes, Microchemical analysis with an energy dispersive spectrometer. Specimens from all the sciences. Two lectures, one 3-hour laboratory period. This is the first course in a sequence of two: Ph 551 and Ph 552.

Also offered for undergraduate-level credit as Ph 451 and may be taken only once for credit.

**Ph 552 - Electron Microscopy (4)**

Electron optics theory, specimen preparation and experimental work with transmission and scanning electron microscopes, Microchemical analysis with an energy dispersive spectrometer. Specimens from all the sciences. Two lectures, one 3-hour laboratory period. This is the second course in a sequence of two: Ph 551 and Ph 552.

Also offered for undergraduate-level credit as Ph 452 and may be taken only once for credit.

**Ph 564 - Applied Optics (4)**

An overview of optics and such principal application as fiberoptics; chemical, biological, and physical sensors; optical information processing, acousto-optics; lasers and detectors.

Also offered for undergraduate-level credit as Ph 464 and may be taken only once for credit. Cross-Listed as: This course is the same as ECE 594 and may only be taken only once for credit.

**Ph 571 - Physical and Human Dimensions of Climate Change (4)**

A holistic course on global change science connecting atmospheric change, climate theory and the human response to global warming. Lays a foundation for understanding the complex issues of climate change, its linkages and feedbacks. Policy options to manage the climate are examined using models, their predictions, and uncertainties.

Also offered for undergraduate-level credit as Ph 471 and may be taken only once for credit. Prerequisite: Ph 211, Ph 212, Ph 213, Mth 251, Mth 252, Mth 253.. Cross-Listed as: ESM 571.

**Ph 572 - Introduction to Nonlinear Dynamics and Chaos (4)**

Introduction to basic theoretical and experimental tools to study chaos and nonlinear behavior. Desktop experiments and computer simulations of chaotic systems. Expected preparation: one year of general physics.

Also offered for undergraduate-level credit as Ph 472 and may be taken only once for credit.

**Ph 573 - Alternative Energies (4)**

Starting with a review of global energy trends, this course will cover the major resources of alternative energies (hydropower, wave, tidal and wind energy, solar energy, nuclear fission and fusion), their characteristics, utilization and technology as well as environmental and public impact. Special attention will be given to photovoltaics and solar cell technology. Market developments will also be analyzed based on simple models.

Also offered for undergraduate-level credit as Ph 473 and may be taken only once for credit.

**Ph 575 - Stellar Astronomy Online for Educators (4)**

Class will access online materials in stellar astronomy education to help current and prospective science teachers update their knowledge of recent developments in astronomy.
Also offered for undergraduate-level credit as Ph 475 and may be taken only once for credit.

**Ph 576 - Observational Astronomy (2)**

Emphasis on hands-on activities and the observation of our own night sky. Observation of planets, sun, moon, globular clusters, galaxies, and black holes. Observational techniques including the use of telescopes, binoculars, and photography will be covered. Observational field trip to an observatory at a dark sky site.

Also offered for undergraduate-level credit as Ph 476 and may be taken only once for credit.

**Ph 577 - Air Pollution (4)**

Air pollution meteorology needed to understand air pollution, atmospheric dispersion models, K-theory, box models and receptor models. Use of simple computer models. This course is a foundation for the quantitative understanding of air pollution: At any point in the environment (receptor), how much pollution is caused by a known source? If there are many sources, how much pollution does each source contribute at a receptor?

Also offered for undergraduate-level credit as Ph 476 and may be taken only once for credit.

**Ph 581 - Introduction to Nanomaterials - Science and - Engineering (4)**

An introduction to nanomaterials-science and engineering for students in physics, chemistry, geology, electrical and computer engineering, and mechanical materials engineering. Nanoscale processes and devices and their applications.

Also offered for undergraduate-level credit as Ph 481 and may be taken only once for credit.

**Ph 582 - Physical Metallurgy (2)**

Introduction to principles of physical metallurgy. Includes the atomic and crystallographic structures of metals and alloys; defects in structure and the importance of them in determining the properties of metals; phase diagrams of alloy systems and examples of important systems; diffusion and phase transformations, emphasizing the solid state; plasticity and fracture of crystals; and corrosion. Recommended prerequisites: Ph 203, Ch 223.

**Ph 583 - Physical Metallurgy (2)**

Introduction to principles of physical metallurgy. Includes the atomic and crystallographic structures of metals and alloys; defects in structure and the importance of them in determining the properties of metals; phase diagrams of alloy systems and examples of important systems; diffusion and phase transformations, emphasizing the solid state; plasticity and fracture of crystals; and corrosion. Recommended prerequisites: Ph 203, Ch 223.

**Ph 584 - Physical Metallurgy Laboratory (1)**

Experimental studies of the structure of metals by light microscope, X-ray diffraction, and microhardness techniques. Heat treatment of metals and studies of the resulting structural changes. Corequisite: concurrent enrollment in Ph 481, 482, 483.

**Ph 585 - Experimental Methods in Applied Physics (4)**

Introduction to modern instrumentation used in applied physics, focusing on nanoscience and materials, atmospheric physics, and biophysics, including theory and practice of the instruments. This is the first course in a sequence of two: Ph 585 and Ph 586.

Prerequisite: admission to Ph.D program in Applied Physics, M.S. in Physics, or ESR Ph.D programs.

**Ph 586 - Experimental Methods in Applied Physics (4)**

Introduction to modern instrumentation used in applied physics, focusing on nanoscience and materials, atmospheric physics, and biophysics, including theory and practice of the instruments. This is the second course in a sequence of two: Ph 585 and Ph 586.

Prerequisite: admission to Ph.D program in Applied Physics, M.S. in Physics, or ESR Ph.D programs.

**Ph 590 - Cellular and Molecular Biophysics (4)**

An introduction to the physical ideas and methods in the studies of biological phenomena, organization, structure, and function at the cellular and molecular level. Atomic and molecular structures, energy and interacting forces relating to cellular and molecular biophysics will be discussed. This is the first course in a sequence of two: Ph 590 and Ph 591.

Also offered for undergraduate-level credit as Ph 490 and may be taken only once for credit.

**Ph 591 - Cellular and Molecular Biophysics (4)**

An introduction to the physical ideas and methods in the studies of biological phenomena, organization, structure, and function at the cellular and molecular level. Atomic and molecular structures, energy and interacting forces relating to cellular and molecular biophysics will be discussed. This is the second course in a sequence of two: Ph 590 and Ph 591.
Ph 595 - Materials Physics: Structure and Physical Properties of Ordered and Disordered Condensed Matter (4)

Introduction to materials physics. Generalized geometric-structural crystallography is at the core of this field because it allows for the derivation of the physical properties of condensed matter. Crystallographic symmetries are treated as continuous features. Quantitative X-ray diffraction, crystal defects, textures, modulated structures, and quasicrystals are also discussed.

Also offered for undergraduate-level credit as Ph 495 and may be taken only once for credit. Prerequisite: Ph 211, Ph 212, Ph 213, Ph 221, Ph 222, Ph 223, Ph 311, Ph 312, Ph 314, Ph 315, Ph 316, Ph 322, Ph 431, Ph 432, Ph 434, and their prerequisites; Mth 251, Mth 252, Mth 253: Calculus I-III, Mth 256: Differential equations and multivariate calculus, Mth 261: Linear Algebra and their prerequisites.

Ph 601 - Research (1-12)
(Credit to be arranged.)

Ph 602 - Independent Study (1-12)
(Credit to be arranged.)

Ph 603 - Dissertation (1-16)
(Credit to be arranged.)

Ph 604 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

Ph 605 - Reading and Conference (1-9)
(Credit to be arranged.)

Ph 606 - Special Problems/Projects (1-9)
(Credit to be arranged.)

Ph 607 - Seminar (0-9)
(Credit to be arranged.)

Ph 610 - Selected Topics (1-9)
(Credit to be arranged.)

Ph 617 - Quantum Mechanics (4)

A detailed discussion of the approximation models for solving the time-independent Schrödinger equation; scattering theory in terms of stationary unbound states; time-dependent theory including the perturbation method; the two-level problem and its application to laser operation. Dirac's formulation using bra and ket; different time-evolution pictures; concept of density matrices; Berry's phase; quantum theory of angular momentum; Feynman's path integral formulation; introduction to relativistic quantum mechanics; issues on the fundamental aspects of quantum mechanics including Bell's theorem, the EPR paradox, hidden-variable theory; and Schrödinger's cat problem. This is the first course in a sequence of three: Ph 617, Ph 618, and Ph 619.

Prerequisite: Ph 411/511, Ph 424.

Ph 618 - Quantum Mechanics (4)

A detailed discussion of the approximation models for solving the time-independent Schrödinger equation; scattering theory in terms of stationary unbound states; time-dependent theory including the perturbation method; the two-level problem and its application to laser operation. Dirac's formulation using bra and ket; different time-evolution pictures; concept of density matrices; Berry's phase; quantum theory of angular momentum; Feynman's path integral formulation; introduction to relativistic quantum mechanics; issues on the fundamental aspects of quantum mechanics including Bell's theorem, the EPR paradox, hidden-variable theory; and Schrödinger's cat problem. This is the second course in a sequence of three: Ph 617, Ph 618, and Ph 619.

Prerequisite: Ph 411/511, Ph 424.

Ph 619 - Quantum Mechanics (4)

A detailed discussion of the approximation models for solving the time-independent Schrödinger equation; scattering theory in terms of stationary unbound states; time-dependent theory including the perturbation method; the two-level problem and its application to laser operation. Dirac's formulation using bra and ket; different time-evolution pictures; concept of density matrices; Berry's phase; quantum theory of angular momentum; Feynman's path integral formulation; introduction to relativistic quantum mechanics; issues on the fundamental aspects of quantum mechanics including Bell's theorem, the EPR paradox, hidden-variable theory; and Schrödinger's cat problem. This is the third course in a sequence of three: Ph 617, Ph 618, and Ph 619.
Ph 624 - Classical Mechanics (4)
Advanced treatment of analytical mechanics of particles, systems of particles, and rigid bodies. Methods of Lagrange, Hamilton, and Jacobi. Symmetry and conservation laws. This is the first course in a sequence of two: Ph 624 and Ph 625. Recommended prerequisite: Ph 425.

Ph 626 - Hydrodynamics (4)
The theory of fluids and continuous media. Equations of continuity, Euler's equation, flow fields, and applications. Recommended prerequisite: Ph 625.

Ph 631 - Electromagnetic Fields and Interactions (4)
Classical description of the electromagnetic field: classical electron theory and plasmas. This is the first course in a sequence of three: Ph 631, Ph 632, and Ph 633. This course is the same as ECE 635, 636, 637; course may only be taken once for credit. Prerequisite: Ph 431.. Cross-Listed as: ECE 635.

Ph 632 - Electromagnetic Fields and Interactions (4)
Classical description of the electromagnetic field: classical electron theory and plasmas. This is the second course in a sequence of three: Ph 631, Ph 632, and Ph 633. This course is the same as ECE 635, 636, 637; course may only be taken once for credit. Prerequisite: Ph 431.. Cross-Listed as: ECE 636.

Ph 633 - Electromagnetic Fields and Interactions (4)
Classical description of the electromagnetic field: classical electron theory and plasmas. This is the third course in a sequence of three: Ph 631, Ph 632, and Ph 633. This course is the same as ECE 635, 636, 637; course may only be taken once for credit. Prerequisite: Ph 431.. Cross-Listed as: ECE 637.

Ph 664 - Statistical Mechanics (4)
Foundations of statistical mechanics and kinetic theory; statistical interpretation of thermodynamics; ensembles in classical and quantum systems; transport phenomena. This is the first course in a sequence of three: Ph 664, Ph 665, and Ph 666. Expected Preparation: Ph 619 or Ph 625.

Ph 665 - Statistical Mechanics (4)
Foundations of statistical mechanics and kinetic theory; statistical interpretation of thermodynamics; ensembles in classical and quantum systems; transport phenomena. This is the second course in a sequence of three: Ph 664, Ph 665, and Ph 666. Expected Preparation: Ph 619 or Ph 625.

Ph 679 - Advanced Atmospheric Physics (4)
Advanced course to provide a working knowledge of base models for studying global change including the greenhouse effect, global warming, stratospheric ozone depletion from man-made chemicals, tropospheric chemistry of HO and O3 and transport modeling. Recommended prerequisites: Ph 578.

PHE - Public Health Education
PHE 199 - Special Studies (1-4)
(Credit to be arranged.)

As a gateway course of the OHSU-PSU undergraduate Indigenous Health Concentration, this foundational course will engage in concepts of Indigenous values, knowledge and perspectives and launch students into concepts of racial healing and racial justice for health equity. This course will introduce students to a decolonizing framework to advance health equity that centers on the strengths of Indigenous peoples.

PHE 250 - Our Community: Our Health (4)
Examines social, behavioral, and environmental community health-related issues and the controversies that surround them. This course will be a recommended prerequisite for all upper-division classes in the major.

PHE 252 - First Aid (4)
Emergency care for various types of injuries: assessment, life threatening injuries, medical emergencies, and special situations. Additional training for childbirth and CPR for adult, infant, and child. Course leads to Red Cross certification.
PHE 270 - Basic Biomechanics (2)
Designed to introduce the anatomical and mechanical principles of kinesiology and biomechanics and their influences upon human movement/physical activity to include; Fundamental principles of the anatomy related to the musculoskeletal system to include; basic muscular structure, functional anatomy of joints and basic principles of physics.

PHE 275 - Stress Management (4)
An overview of the physiology of stress, stress triggers, assessment of stress, and stress management techniques and strategies.

PHE 295 - Health Promotion/Disease Prevention (4)
Examines scientific literature regarding lifestyle choices that promote optimal health and functioning. Behaviors regarding self-protection, self-care, and health promotion are compared to recommendations emerging from this literature.

PHE 299 - Special Studies (0-4)
(Credit to be arranged.)

PHE 314 - Research in Health and Fitness (4)
Examines basic aspects of scientific research related to health and fitness. Topics include: reading and critically evaluating scientific research reports; reviewing interpretation of basic statistical analyses; investigating the fundamental skills for developing a research plan, including problems selection, literature review, instrumentation, ethics and sampling.

PHE 315 - Justice in Public Health: The Epidemic of Missing and Murdered Indigenous Women & Peoples (4)
Students will investigate the Missing Murdered Indigenous Women and People epidemic through a multi-layered decolonizing framework. They will study theory and praxis centered around historical trauma from colonization, the long-term effects of colonialism, and the social and system-level responses that serve to further disempower Indigenous women and girls and perpetuate the ongoing cycle of colonial violence against them. Students will also study critical healing and strengths-based approaches drawn from Indigenous values, experiences, and perspectives to address this critical issue.

PHE 320U - Health Ethics: Contemporary Issues (4)
Explores the theoretical, historical, and institutional contexts of health ethics across populations. Students will learn and apply practical skills to deconstruct and analyze ethical challenges across a continuum of health-related topics from the classical cases through contemporary debates regarding our global social health, social justice, and related issues. This is the same course as PAH 320U and may be taken only once for credit.
Cross-Listed as: PAH 320U.

PHE 321U - Introduction to Health Policy (4)
This course presents an overview of health policymaking and describes health policy at the state and federal levels. In addition to the policy process, special emphasis is placed on the role of health services and public health managers and other advocates, and the role they play in crafting policy. The course examines new developments in health policy as they are introduced during the duration of the course and follows them throughout their journey.

PHE 322U - Health Services Administration (4)
Understanding the functions of management and administration is essential for anyone assuming administrative roles in health services delivery organizations (e.g., hospitals, clinics, and nonprofits). This course introduces the six classic management functions, and illustrates health services applications of topics such as strategic planning, risk management, working in/with teams, and changing trends in health care. Students will develop knowledge and the interdisciplinary skills needed to effectively work in administration in various types of health services organizations.

PHE 323U - Intro to Fat Studies (4)
This course will use a social justice and critical pedagogy approach to examine the impacts of weight bias (sizeism) on individuals and society. We will center the voices and experiences of those living in larger bodies and use an intersectional lens to analyze how we can effectively impact social determinants of health and well-being. Current innovative challenges to the weight bias paradigm will be explored along with ways that students can participate in this emerging movement.
PHE 325U - Nutrition for Health (4)
Examines basis for and quality of current nutritional requirements, standards, and guidelines. Studies evidence regarding current food fads and controversies. Analyzes personal dietary practices.

PHE 326U - Drug Education (4)
Examines various approaches to drug education, harm reduction and treatment, while engaging students in furthering their own education on drugs and their impacts on the individual and society. Reviews current and controversial issues, and innovative solution options.

PHE 327U - Community Nutrition (4)
This course provides students with an understanding of community nutrition as a career. Course topics include program planning, policies, resources, and issues specific to community nutrition.

PHE 328U - Health and Housing Across the Life Course (4)
Addresses social, cultural, and environmental forces on the relationships between health and housing throughout the life-course. Topics include health disparities in housing quality and type; interventions to improve housing and neighborhood health; and international models of housing. Public and private strategies to prevent or solve housing-related health problems will be emphasized.

PHE 335U - Human Sexuality (4)
A survey of the psychological, physiological, and behavioral aspects of human sexuality, with particular emphasis on the influence of popular culture on these dimensions.

PHE 340 - Motor Learning (4)
Introduction to the principles and practice of motor learning as applied to physical education, physical fitness and sports related activities. Examination of the fundamental process of learning and teaching human movement patterns, the learner, and the process of teaching movement skills.

PHE 350 - Health and Health Systems (4)
An overview of the organization, financing, and delivery of health services in the United States, with particular emphasis on analysis from professional, organizational, community, and systems perspectives.

PHE 351U - Film and Health (4)
Critically explores public health issues as they are portrayed in popular films and discusses the scientific, social, and political underpinnings of the public health issues portrayed in these movies. Covers diseases such as AIDS, hemorrhagic fever, MS, cancer, leukemia, and multiple chemical sensitivity from both biomedical and social perspectives. Guest speakers from the community will contribute to the discussion.

PHE 354U - Social Gerontology (4)
Addresses the social and ethical issues, problems, policies, and programs that affect the quality of life for our rapidly aging population. The interdisciplinary field of gerontology offers students the opportunity to integrate biological, psychological, and social theories of aging. Also examines the economic and political impacts of an aging society.

PHE 355U - Consumer Health Issues (4)
Identifies and critically analyzes issues related to the production, marketing, and consumption of health-related goods and services. Media messages about consumer health issues are examined; topical and timely research is analyzed.

PHE 361 - Care and Prevention of Injuries (4)
Introduction to the prevention, recognition, care, and rehabilitation of injuries resulting from participation in activity. Practical skills are demonstrated and practiced with emphasis on student participation. Recommended prerequisites: Bi 301, 302.

PHE 363 - Communicable Diseases and Chronic Health Problems (4)
Reviews etiology, epidemiology, and approaches to prevention of infectious and chronic diseases. Aspects of risk factors, transmission, pathogenesis, immunology, case management, and control programs are discussed. Basic human physiological processes are reviewed. Expected preparation: PHE 250.
PHE 365 - Health Promotion Programs for Children and Youth (4)
Provides an understanding of factors that influence health status and development of children and youth in the United States. Particular attention will be directed at health promotion programs for children, youth, and families in school and community settings. Includes a service component.

PHE 369 - Public Health Law, Policy, and Ethics (4)
This course will introduce the ways in which the public’s health is impacted by public policy, law and ethics through the examination of real-world case studies. What health protections are individuals and communities entitled to, who are the players who determine and enforce public health law and policy, and what are the implications of the conflicts of interest that arise?

PHE 370 - Applied Kinesiology (4)
Overview of anatomical and mechanical bases of human movement. Review of biomechanical principles with applications to exercise and health. Prerequisite: PHE 270.

PHE 399 - Special Studies (1-6)
(Credit to be arranged.)

PHE 401 - Research (1-8)
(Credit to be arranged.) Consent of instructor.

PHE 402 - Independent Study (1-8)
(Credit to be arranged.)

PHE 404 - Cooperative Education/Internship (1-15)
(Credit to be arranged.) A work related experience designed to connect and integrate theory with specific activities in a "real" environment under supervision. Field hours for students taking the internship will be 30 hours per credit per term. Additionally, students will be expected to attend scheduled seminars.

PHE 405 - Reading and Conference (0-6)
(Credit to be arranged.) Consent of instructor.

PHE 406 - Special Projects (1-6)
(Credit to be arranged.)

PHE 407 - Seminar (1-9)
(Credit to be arranged.) Maximum: 9 credits.

PHE 408 - Workshop (0-15)
(Credit to be arranged.)

PHE 409 - Practicum (1-12)
(Credit to be arranged.)

PHE 410 - Selected Topics (1-8)
(Credit to be arranged.)

PHE 410U - Selected Topics (4)
(Credit to be arranged.)

PHE 415 - Native American Health: Decolonizing Health Equity (4)
Provides an overview of socio-cultural determinants of health within a Native American context, and culturally responsive and community-centered solutions to achieve health equity with an emphasis on Native American experiences, wisdom, and healing. Prerequisite: Upper-division standing.

PHE 416 - Families and Aging (4)
Family ties of middle aged and older adults are explored using a life course perspective. The diversity of family structure and experience is emphasized with attention to gender, race, class, and ethnicity. Life transitions are highlighted as are informal and formal services available to support older adults and their families. Prerequisite: junior standing.

PHE 417 - Adapted Physical Education (4)
Designed to give students a background in how to effectively teach physical activity to individuals with disabilities. Additionally, this course is constructed to
facilitate the student’s understanding of the specific characteristics of exceptional individuals in order to realize their limitations, and especially to maximize their potential.

Prerequisite: Twelve hours of upper-division coursework in PHE.

PHE 418 - Lactation Education 1: Introduction to Human Lactation (4)
The first in the lactation education series. Students will develop skills to assess and counsel families experiencing common breastfeeding challenges. Assessment tools and techniques will be introduced. Students will gain strategies for working with diverse adult learners and develop professional communication skills for the health care setting. This is the first course in a sequence of three: PHE 418, PHE 419, PHE 420 which must be taken in sequence.

Prerequisite: Instructor approval.

PHE 419 - Lactation Education 2: Advanced Lactation Care (4)
The second in the lactation education series. Students will develop evaluation and support techniques to address complex maternal and infant breastfeeding challenges. Attention will be given to critically understanding and utilizing evidence-informed information to guide direct lactation support and communication with the health-care team. Students will deepen knowledge of use of referrals and resources to support the parent-baby dyad. This is the second course in a sequence of three: PHE 418, PHE 419, PHE 420 which must be taken in sequence.

Prerequisite: PHE 418.

PHE 420 - Lactation Education 3: Clinical Considerations in Lactation (2)
The third in the lactation education series. This course prepares students for working with complex cases including prematurity, medically fragile infants, and infants or parents with special medical or nutritional needs. Students will strengthen their understanding of the IBLCE Code of Professional Conduct, the IBLCE Scope of Practice, the ILCA Standards of Practice plus additional policies that govern the practice of International Board Certified Lactation Consultants (IBCLCs). Students completing this course as part of the Lactation Education series are prepared for clinical experience and are eligible to apply for the Lactation Practicum. This is the third course in a sequence of three: PHE 418, PHE 419, PHE 420 which must be taken in sequence.

Prerequisite: PHE 419.

PHE 421 - Health Coaching Strategies (4)
Concepts and techniques for work with individuals and groups on improving all areas of wellness including fitness, nutrition, weight, stress, and management of life issues that affect health. Program planning theories and models as well as practices for health education, including developing rapport, nonviolent communication, motivational interviewing and practice management. Students gain practical experience through live coaching demonstrations.

Prerequisite: Twelve hours of upper-division coursework in PHE.

PHE 423 - Business and Aging (4)
Economic and business implications of population aging, including an exploration of demographic changes, the economic reality faced by today's older adults in work and retirement, and older adults as consumers.

Prerequisite: Upper-division standing.

PHE 426 - Advanced Topics in Health Services Administration (4)
This advanced course will build upon knowledge attained in previous courses in the HSMP curriculum. Content addresses advanced discussion of topics regarding systems, policy and organization in health services administration practice. Current issues/events will be emphasized. The course employs techniques that capitalize on group participation and peer-to-peer learning to stimulate sharing of diverse perspectives and increase the participants’ level of engagement with historically marginalized viewpoints.

Prerequisite: PHE 350.

PHE 427 - Introduction to Health Informatics (4)
An introduction to health informatics, the field devoted to the optimal use of data, information, and knowledge to advance individual health, health care, public health, and health-related research. Students will learn the application of informatics skills and knowledge to health-related problems.

Prerequisite: Upper-division standing.

PHE 443U - Environmental Health (4)
Designed to enable the student to understand and evaluate complex environmental health issues induced by waste products generated by modern technology. Specific topics include water quality, air quality, solid and hazardous waste, occupational health, ionizing and nonionizing radiation, chemical contamination of foods, food additives, animal
transmission of disease, noise, and selected current topics.

**PHE 444U - Global Health (4)**
Critically explores global public health issues as they pertain to different populations throughout the world, such as global disease eradication initiatives, environmental and infectious diseases from an international perspective, and discusses health needs of special populations.

**PHE 445 - Men's Health (4)**
The focus of this course is current men's health issues. Students have opportunities to critically explore a broad array of men's health concerns across the life span from a multidisciplinary perspective. Men's health issues may include such topics as reproductive health, violence, aging, heart disease, depression, and sexuality. The class is taught in an interactive format through group discussion, presentations, and the participation of group speakers. The course focuses on the consideration and critique of current influences on men's health including the effect of the health care system, male socialization, the impact of the social and cultural factors, and the influence of evolving technology.

Also offered for graduate-level credit as PHE 545 and may be taken only once for credit.

**PHE 446U - Community Health Principles and Practices (4)**
Provides an overview of the scope of problems in the field of community health. Examines disease prevention/control, community health service delivery, the structure of official/unofficial agencies, and policy/decision-making processes. Course includes field work in a community health agency.

**PHE 448 - Health Education Techniques and Strategies (4)**
Introduces students to basic techniques and strategies used in planning and carrying out health education programs in a variety of settings. Special emphasis is given to scope and sequencing skills, objective writing, selection/development of health education resources/materials, and methods for and use of technology in the delivery of health education programs. Recommended prerequisite: PHE 350.

**PHE 450 - Epidemiology (4)**
Introduces principles and methods of epidemiological investigation of infectious/non-infectious diseases. Illustrates methods by which properly conducted studies of the distribution and dynamic behavior of disease in a population can contribute to understanding of etiologic factors, modes of transmission, and pathogenesis of disease. Recommended prerequisite: PHE 363.

**PHE 451 - Women and Holistic Health (4)**
Exploring the intersection of three fields—allopathic medicine, women's health, and complementary therapies—the course examines the emerging field of integrative medicine, highlighting the contributions that women caregivers and healers have made to its development. An overview of common women's health concerns provides the opportunity to compare and contrast essential elements of holistic treatment approaches with those of allopathic medicine.

Expected preparation: PHE 295 or WS 101.

Also offered for graduate-level credit as PHE 551 and may be taken only once for credit.

**PHE 452U - Gender, Race, Class and Health (4)**
Emphasizes how the gender-, race-, and class-based organization of society affects the health of our communities. Covers an introduction and historical framework for social inequities in health; describes disparities in health by gender, race, and class; and explores the interplay between these major social forces and the biological mechanisms that influence the occurrence of disease.

**PHE 453 - Women's Reproductive Health (4)**
Critical review of current public health and socioeconomic issues in women's reproductive health. Both national and international topics are discussed. Students apply health knowledge in identifying and seeking solutions to the issues which concern health care providers, consumers, and policy makers.

Expected preparation: PHE 250 and PHE 335.

Also offered for graduate-level credit as PHE:553 and may be taken only once for credit.

**PHE 454 - Maternal & Child Health (4)**
This course uses a discussion-based format to address maternal and child health as a public health issue. The course will emphasize the importance of the social, political, and economic contexts for maternal and child health. Ultimately, students in this course will be exposed to the major health issues facing mothers and children today and understand how
politics and social norms affect maternal and child health.

Also offered for graduate-level credit as PHE 554 and may be taken only once for credit. Prerequisite: Junior standing.

PHE 456 - Health Aspects of Aging (4)
Examination of health-related changes that occur with aging. Review of current scientific literature with an investigation of physiological mechanisms responsible for changes in functional capacity throughout life. Explores the role of physical activity and nutrition in healthy aging. Expected preparation: PHE 295 or PHE 250, and Bi 302.

PHE 466 - Mind/Body Health: Disease Prevention (4)
An investigation of the integral relationship between body and mind and how that relationship manifests itself in health, illness, and promotes healing. Philosophical and scientific foundations of mind/body health are explored. Mind/body research and its application within allopathic medicine is examined as is research and practice in complementary fields of medicine and health care. Expected preparation: Psy 204, PHE 363.

Also offered for graduate-level credit as PHE 566 and may be taken only once for credit.

PHE 467 - Mind/Body Health: Human Potential (4)
Theory and research in the human potential movement is integrated with research in mind/body medicine to produce an expanded understanding of human transformative capacities. Transformative practices including meditation, yoga, imagery, biofeedback, and sport are examined. Elements common to all transformative practices are identified. Expected preparation: PHE 466/566.

Also offered for graduate-level credit as PHE 567 and may be taken only once for credit.

PHE 471 - Program Planning and Evaluation in Health Education: Theory and Skill Development (4)
Examines program planning models for health education. Includes needs assessment; program goals and objectives; program content and methodologies, evaluation, budgeting, and proposal writing. Students will gain practical experience in program planning and evaluation through community-based learning. Field work required. Recommended prerequisite: twelve hours of upper-division coursework in PHE.

PHE 472 - Marketing Public Health (4)
From behavior change to policy change, how do we make the healthy choice the easy choice? This course will explore the attitudes we bring to our public health work, and tools and strategies we can use to develop our effectiveness in improving health outcomes for individuals and society.

Prerequisite: junior standing.

PHE 473 - Physiology of Exercise (4)
Examination of physiological responses and adaptations to exercise, with a focus on the interaction of metabolic, endocrine, neuromuscular, circulorespiratory, and environmental factors related to fitness and health.

Also offered for graduate-level credit as PHE 573 and may be taken only once for credit. Prerequisite: Bi 301 and Bi 302 or equivalent. Corequisite: PHE 473L.

PHE 473L - Physiology of Exercise Lab (0)
Physiology exercise lab.

PHE 474 - Exercise Prescription and Training (4)
Focuses on the basic principles and skills needed for developing and implementing physical fitness programs. Emphasis includes: appropriate/safe training procedures and the underlying principles which support such methods, applications to younger and older populations, gender differences, motivational strategies and health behavior theory, and exercise leadership skills. A significant portion of the course involves experiential learning. Recommended prerequisites: PHE 295, 473.

PHE 475 - Exercise Testing Techniques (4)
Theory and application of assessment methods/tools used to evaluate physiological function relating to fitness and health, including laboratory and field tests. Significant emphasis on developing skills necessary for conducting tests on apparently healthy individuals. Assessment categories include anaerobic performance, muscular strength and endurance, flexibility, body composition, cardiovascular function.

Also offered for graduate-level credit as PHE 575 and may be taken only once for credit. Prerequisite: PHE 473, or consent of instructor. Corequisite: PHE 475L.

PHE 475L - Exercise Testing Techniques Lab (0)
Exercise testing techniques lab.
PHE 478 - Program Planning and Evaluation: Needs Assessment and Interventions (4)
Examines program planning theories and models for health education. Includes needs assessment; program goals and objectives; interventions; program content and methodologies, measurement, and proposal writing. Students will gain practical experience in program planning through community-based learning. Field work required. This is the first course in a sequence of two: PHE 478 and PHE 479 and must be taken in sequence.

PHE 479 - Program Planning and Evaluation in Health Education: Implementation and Evaluation (4)
Examines program planning theories and models for health education. Includes implementation strategies and evaluation approaches; resource allocation, budgeting, marketing, evaluation design, data analysis and reporting. Students will gain practical experience in program planning through community-based learning. Field work required. This is the second course in a sequence of two: PHE 478 and PHE 479 and must be taken in sequence.

Prerequisite: PHE 478.

PHE 480 - Controversial Issues in Community Health (4)
Examines controversial issues in the field of community health (e.g., violence, women's health, medical technology, access to health services). Group presentations required. Recommended prerequisites: senior status and 12 credits of PHE.

PHE 501 - Research (1-6)
(Credit to be arranged.) Consent of instructor.

PHE 503 - Thesis (0-15)
(Credit to be arranged.)

PHE 504 - Cooperative Education/Internship (0-15)
(Credit to be arranged.)

PHE 505 - Reading and Conference (0-6)
(Credit to be arranged.) Consent of instructor.

PHE 506 - Special Projects (1-6)
(Credit to be arranged.)

PHE 507 - Seminar (1-9)
(Credit to be arranged.) Maximum: 9 credits.

PHE 508 - Workshop (0-15)
(Credit to be arranged.)

PHE 509 - Practicum (1-9)
(Credit to be arranged.)

PHE 510 - Selected Topics (1-8)
(Credit to be arranged.)

PHE 511 - Foundations of Public Health (3)
Provides students with an understanding of the field of public health. It provides knowledge about public health principles, concepts, values, tools, and applications. Key topics in the class include the mission of public health, the politics of public health, determinants of health in the United States, major models and strategies for health promotion, and community perspectives on public health interventions.

PHE 512 - Principles of Health Behavior (3)
Presents the biological, psychological, behavioral, sociocultural, and environmental factors that function in the promotion of health and prevention of disease. Theories developed to explain health and illness behaviors at intrapersonal, interpersonal, and group/community levels are introduced. Ethical
issues involved in health-related behavior change are examined. Satisfies the core M.P.H. requirement. Expected preparation: graduate standing. Also offered as PHE 612 for doctoral students.

**PHE 514 - Physical Activity in Public Health (3)**
Overview of topics relevant to the study of physical activity in the United States. Topics: review of physiological alterations related to physical activity; historical background of physical activity recommendations; measurement issues; community-based approaches to increasing physical activity; school-based physical activity programs; older adults and special populations; work site and health care settings.

**PHE 517 - Community Organizing (3)**
Emphasizes the role of community organizing to engage diverse communities to advance the conditions in which people can be healthy. It further examines the role of health educators, grassroots activists, and others in stimulating social, political, and economic approaches to promote community health. Also addresses the advancement of theoretical knowledge and practical skills of community organizing.

**PHE 518 - Topics in Health Studies (3)**
In-depth analysis of recent research and related program developments on one or more health-related topics. Topics vary according to term and instructor. Course may be taken more than once on different topics. Topics may include: mind/body health, nutrition, international health, environmental health, physical activity/exercise, and health of special populations. Recommended prerequisite: graduate standing.

**PHE 519 - Introduction to the Etiology of Disease (3)**
The biological and molecular bases of public health: the immune system, genomics, environmental exposures. The evidence-based role of biology in ecological models of population health, its integration in disease prevention and control policies and programs. Effects of behavior on biology. Legal, social, ethical issues will be considered.

**PHE 520 - Qualitative Research Design (3)**
Prepares the philosophical and theoretical bases supporting the development of alternate research paradigms in human inquiry. Essential characteristics of three major alternate paradigms (interpretivist, constructivist, and critical theory) are introduced. Validity, reliability, and related concepts are examined from the perspective of each paradigm. Alternate strategies for inquiry are presented and ethical considerations related to qualitative forms of inquiry are addressed. Recommended prerequisite: graduate standing.

**PHE 521 - Quantitative Research Design and Analysis (3)**
Introduction to quantitative research design and statistical analysis. Emphasis on development of research proposal. Topics include descriptive research, experimental and quasi-experimental research, univariate statistical procedures, and methods for planning and writing a research report. Prerequisite: Bsta 525 and Epi 512.

**PHE 522 - Health and Social Inequalities (3)**
Introduction to historical and theoretical foundations for social epidemiology; investigates the conceptualization and measurement of different social determinants of health using a life-course approach; explores how the "embodiment" of social forces influence disease processes; and examines different actions (i.e., behavioral, clinical, social, legislative and political) used to eliminate health inequities within our local, national and international communities.

Also offered as PHE 622 and may be taken only once for credit.

**PHE 527 - Food Systems and Public Health (3)**
Examines public health effects of industrial and alternative food systems. Designed as an introductory course for students interested in exploring issues at the intersections of public health, equity, and the environment. Key course themes include: food consumption patterns, health inequities, food insecurity and hunger, healthy food environments, food animal production.

**PHE 531 - Women and Exercise: Physiological Aspects (3)**
Overview of physiological and health-related effects of exercise on women. Emphasis on the responses and adaptations to exercise specific to women. Topics include gender differences, the menstrual cycle, pregnancy, menopause, and osteoporosis. Recommended prerequisite: PHE 473/573.
**PHE 532 - Developmental Origins of Health and Disease (DOHaD) - Epidemiology (3)**
Covers the history of the Developmental Origins of Health and Disease (DOHaD) framework, the trends that drive and result from DOHaD processes. It will explain epigenetics and other mechanisms which through priming influence lifelong health.
Also offered as PHE 632 to doctoral students.

**PHE 534 - Social Epidemiology Methods & Theory (3)**
Surveys social epidemiology practice including measurement, study design, analysis and translation for researching behavioral, social, economic, and cultural determinants of population distributions of health outcomes. The course emphasizes the application of social epidemiology methods tightly coupled to theory salient to community health practice & policy.
Also offered as PHE 634 for doctoral students.
Prerequisite: Epi 512 and Bsta 525.

**PHE 540 - Mass Media and Health (3)**
Examine the use and effectiveness of mass media to both report the news about health and to promote changes of action in health-related areas. Students will be required to critique media health messages regarding their objectivity and the extent to which they are comprehensive.
Prerequisite: PHE 512.

**PHE 541 - Media Advocacy and Public Health (3)**
Provides students with an understanding of the role of media advocacy in advancing public health policies to promote health. The course uses lectures, group exercises, and case studies to illustrate basic concepts and skills related to media advocacy. Topics covered include: gaining access to the news, framing issues from a public health perspective, and the use of paid advertising to advance policy. Content areas include tobacco, violence, handguns, suicide, alcohol, and other public health issues.
Prerequisite: PHE 512.

**PHE 543 - Drugs, Behavior, and Society (3)**
Emphasis will be placed on the relationship between drug and alcohol use and a broad range of social circumstances associated with socio-economic status, race/ethnicity, and gender. Particular attention will be given to policy and service issues regarding the treatment and prevention of alcohol and drug abuse from a public health perspective. Recommended prerequisite: graduate standing.

**PHE 544 - Urban and Community Health (3)**
Examines the social factors associated with urban health and quality of life, such as social class, gender inequalities, and racism. Emphasis will be placed upon community development and collective responses to the maintenance of health rather than upon individualized health promotion and disease prevention strategies.

**PHE 545 - Men's Health (4)**
The focus of this course is current men's health issues. Students have opportunities to critically explore a broad array of men's health concerns across the life span from a multidisciplinary perspective. Men's health issues may include such topics as reproductive health, violence, aging, heart disease, depression, and sexuality. The class is taught in an interactive format through group discussion, presentations, and the participation of group speakers. The course focuses on the consideration and critique of current influences on men's health including the effect of the health care system, male socialization, the impact of the social and cultural factors, and the influence of evolving technology.
Also offered for undergraduate-level credit as PHE 445 and may be taken only once for credit.

**PHE 546 - Urban and Community Health (3)**
Examines the social factors associated with urban health and quality of life, such as social class, gender inequalities, and racism. Emphasis will be placed upon community development and collective responses to the maintenance of health rather than upon individualized health promotion and disease prevention strategies.

**PHE 550 - Health Promotion Program Planning (4)**
Addresses practical applications of health promotion theories. Presents examples of planning, implementation, and evaluation of health promotion programs in a variety of settings as guides for the development of health promotion programs.

**PHE 551 - Women and Holistic Health (4)**
Explores the intersection of three fields --allographic medicine, women's health, and complementary therapies-- the course examines the emerging field of integrative medicine, highlighting the contributions that women care givers and healers have made to its development. An overview of common women's health concerns provides the opportunity to compare and contrast essential elements of holistic treatment approaches with those of allopathic medicine.
Also offered for undergraduate-level credit as PHE 451 and may be taken only once for credit.

**PHE 552 - Women's Health (3)**
Focuses on constructions of gender and sex and their implications for understanding determinants of population health, developing health promotion programs, and creating healthy public policy.
Emphasizes the importance of the social, political, and economic context for women's health. Topics include epidemiology of women's health; diversity and health issues; reproductive health and sexuality; health care and access to health services; violence; mental health and emotional well-being; aging; lesbian health; and research in women's health. Course learning will be synthesized through a community-based learning experience involving working with a community organization to evaluate women's health needs in Portland.

**PHE 553 - Women's Reproductive Health (4)**
Critical review of current public health and socio-political issues in women's reproductive health. Both national and international topics are discussed. Students apply health knowledge in identifying and seeking solutions to the issues which concern health care providers, consumers, and policy makers.

Also offered for undergraduate-level credit as PHE 453 and may be taken only once for credit.

**PHE 554 - Maternal & Child Health (4)**
This course uses a discussion-based format to address maternal and child health as a public health issue. The course will emphasize the importance of the social, political, and economic contexts for maternal and child health. Ultimately, students in this course will be exposed to the major health issues facing mothers and children today and understand how politics and social norms affect maternal and child health.

Also offered for undergraduate-level credit as PHE 454 and may be taken only once for credit.

**PHE 561 - Cultural Variations in Aging (3)**
The aging population includes an increasing percentage of people from a variety of ethnic groups. Although there may be cultural similarities between these groups and the dominant culture, there are also important differences, particularly in the role of the family in decision-making, attitudes and beliefs about illness, dying, and death. Students learn about cultural differences and similarities through observing programs that serve ethnic elders, talking with guest speakers who represent different ethnic communities, and reading several texts related to counseling, healthcare, and understanding grief, death, and dying in a variety of ethnic groups.

Also offered as PHE 661 and may be taken only once for credit.

**PHE 562 - Global Aging (3)**
The rapid, unprecedented aging of the world's populations is resulting in myriad changes that will affect societies, cultures, economies, families, and individuals and their daily lives. Students will learn about broad global trends related to the aging of the world as well as aging in particular countries and regions.

**PHE 566 - Mind/Body Health: Disease Prevention (4)**
An investigation of the integral relationship between body and mind and how that relationship manifests itself in health, illness, and promotes healing. Philosophical and scientific foundations of mind/body health are explored. Mind/body research and its application within allopathic medicine is examined as is research and practice in complementary fields of medicine and health care.

Also offered for undergraduate-level credit as PHE 466 and may be taken only once for credit.

**PHE 567 - Mind/Body Health: Human Potential (4)**
Theory and research in the human potential movement is integrated with research in mind/body medicine to produce an expanded understanding of human transformative capacities. Transformative practices including meditation, yoga, imagery, biofeedback, and sport are examined. Elements common to all transformative practices are identified. Expected preparation: PHE 466/566.

Also offered for undergraduate-level credit as PHE 467 and may be taken only once for credit.

**PHE 573 - Physiology of Exercise (4)**
Examination of physiological responses and adaptations to exercise, with a focus on the interaction of metabolic, endocrine, neuromuscular, circulorespiratory, and environmental factors related to fitness and health.

Also offered for undergraduate-level credit as PHE 473 and may be taken only once for credit.

Corequisite: PHE 573L.

**PHE 573L - Physiology of Exercise Lab (0)**
Physiology exercise lab.

**PHE 575 - Exercise Testing Techniques (4)**
Examination of physiological responses and adaptations to exercise, with a focus on the interaction of metabolic, endocrine, neuromuscular, circulorespiratory, and environmental factors related to fitness and health.

Also offered for undergraduate-level credit as PHE 473 and may be taken only once for credit.

Corequisite: PHE 573L.
flexibility, body composition, cardiovascular function.

Also offered for undergraduate-level credit as PHE 475 and may be taken only once for credit. Prerequisite: PHE 473, or consent of instructor. Corequisite: PHE 575L.

**PHE 575L - Exercise Testing Techniques Lab (0)**

Exercise testing techniques lab.

**PHE 576 - Physical Activity, Health, and Disease (3)**

Review of current research to explore the relationships between physical activity/exercise and health/disease. Primarily investigates the role of physical activity in disease prevention, but also examines the impact of a variety of physical conditions (e.g., obesity, aging, etc.) on the potential for an active lifestyle. Topics include cardiovascular diseases, musculoskeletal disorders, respiratory conditions, metabolic diseases, cancers, and mental health. Recommended prerequisite: PHE 473.

**PHE 577 - Exercise, Nutrition, and Performance (3)**

Review of metabolic processes and physiological mechanisms involved in nutrient utilization in humans. Examination of the relationships between nutrition and health, with an emphasis on analysis of current research. Topics include carbohydrates, fats, protein, vitamins/minerals, fluids, weight control, and ergogenic aids. Analysis of nutritional modifications presumably related to exercise, health, and performance. Recommended prerequisites: PHE 473.

**PHE 601 - Research (1-12)**

(Credit to be arranged.)

**PHE 602 - Independent Study (1-6)**

(Credit to be arranged.)

**PHE 603 - (1-12)**

**PHE 605 - Reading and Conference (1-8)**

(Credit to be arranged.)

**PHE 606 - Special Projects (1-12)**

(Credit to be arranged.)

**PHE 607 - Seminar (1-9)**

(Credit to be arranged.)

**PHE 608 - Workshop (1-9)**

(Credit to be arranged.)

**PHE 609 - Practicum (1-9)**

(Credit to be arranged.)

**PHE 610 - Special Topics (1-9)**

(Credit to be arranged.)

**PHE 612 - Principles of Health Behavior (3)**

Presents the biological, psychological, behavioral, sociocultural, and environmental factors that function in the promotion of health and prevention of disease. Theories developed to explain health and illness behaviors at intrapersonal, interpersonal, and group/community levels are introduced. Ethical issues involved in health-related behavior change are examined. Satisfies the core M.P.H. requirement. Expected preparation: graduate standing. Also offered as PHE 512.

**PHE 619 - Mentored Teaching Experience (4)**

Each student will be paired with a Community Health faculty member to shadow one term of teaching of either an UG or an MPH level Community Health class.

**PHE 622 - Health and Social Inequalities (3)**

Introduction to historical and theoretical foundations for social epidemiology; investigates the conceptualization and measurement of different social determinants of health using a life course approach; explores how the "embodiment" of social forces influence disease processes; and examines different actions (i.e., behavioral, clinical, social, legislative and political) used to eliminate health inequities within our local, national and international communities. Also offered as PHE 522 and may be taken only once for credit.
PHE 623 - Doctoral Seminar in Health Research (1)
Research seminar required for first- and second-year doctoral students in the community health PhD program. Students learn about critical evaluation of health research, hypothesis generation, the publication and review process, grant application process, and development of an independent research program.

PHE 624 - From Philosophy through Power Calculations: Writing Methods Sections for Research Proposals (3)
Approaches to community health research are explored, including the scientific method, ethics in research, theories, conceptual models and hypothesis generation, causal inference, the elements of research design, measurement (reliability, validity), developing data collection instruments, internal and external validity, and experimental methods.

PHE 625 - Advanced Methods Toolkit: Design, Sampling, Scale Development, & More (3)
A course in applied, non-experimental research designs used in epidemiological research. Emphasis in this course is on quasi-experimental designs, program evaluation, sampling methods, longitudinal designs, and secondary data sources. Students will learn about research design, critical evaluation of research methods, and research proposal concepts.

PHE 626 - Teaching and Learning in Health Promotion & Social Work (3)
This course focuses on pedagogical theory and practice in professional settings. Students develop skills to design, evaluate, and implement effective curriculum and instruction across settings: academic classrooms, community contexts, and research projects. Topics include educational theory, course design, learning and teaching strategies, assessment, and scholarship of teaching and learning.
Cross-Listed as: SW 626.

PHE 632 - Developmental Origins of Health and Disease (DOHaD) - Epidemiology (3)
Covers the history of the Developmental Origins of Health and Disease (DOHaD) framework, the trends that drive and result from DOHaD processes. It will explain epigenetics and other mechanisms which through priming influence lifelong health.
Also offered for graduate-level credit as PHE 532.

PHE 634 - Social Epidemiology Methods & Theory (3)
Surveys social epidemiology practice including measurement, study design, analysis and translation for researching behavioral, social, economic, and cultural determinants of population distributions of health outcomes. The course emphasizes the application of social epidemiology methods tightly coupled to theory salient to community health practice & policy.
Also offered for graduate-level credit as PHE 534.
Prerequisite: Epi 512 and Bsta 525.

PHE 661 - Cultural Variations in Aging (3)
The aging population includes an increasing percentage of people from a variety of ethnic groups. Although there may be cultural similarities between these groups and the dominant culture, there are also important differences, particularly in the role of the family in decision-making, attitudes and beliefs about illness, dying, and death. Students learn about cultural differences and similarities through observing programs that serve ethnic elders, talking with guest speakers who represent different ethnic communities, and reading several texts related to counseling, healthcare, and understanding grief, death, and dying in a variety of ethnic groups.
Also offered as PHE 561 and may be taken only once for credit.

PHE 699 - Special Studies (1-6)
(Credit to be arranged.)

Phl - Philosophy
Phl 199 - Special Studies (1-6)
(Credit to be arranged.)

Phl 201 - Introduction to Philosophy (4)
General introduction to philosophy. While different instructors will use different materials -- typically classical texts -- attention will be given to what makes a question a philosophical question and the nature and methods of philosophical inquiry.

Phl 210 - Philosophy of Religion (4)
Examination of philosophical questions involved in the study of religion, e.g., the meaning of "God," or "gods;" the traditional arguments for the existence of a god; the meaning of faith and the question of its connection to reason; the problem of evil (of
reconciling a god's alleged perfection with the existence of evil). Note: this is not a class in comparative religion or the history of religion.

**Phl 212 - Philosophy in Literature (4)**
An introduction to traditional philosophical issues as they appear in literature, especially in fiction. The specific philosophical problems and the literary works will vary from term to term and from instructor to instructor.

**Phl 299 - Special Studies (1-12)**
(Credit to be arranged.)

**Phl 300U - Philosophical Methods and Concepts (4)**
A survey of the major strategies of proof and disproof central to philosophical reasoning, and of the fundamental concepts and distinctions employed in current philosophical discourse. Aims at providing students who have a serious interest in thinking philosophically with the conceptual tools found to be useful for this purpose. Not recommended as a first course in philosophy.

**Phl 301U - Ancient Philosophy (4)**
Study of Ancient Greek philosophy with a primary focus on the philosophies of Plato and Aristotle. Key topics include form, matter, substance, and causation.

**Phl 302U - Medieval Philosophy (4)**
Study of philosophy during the Medieval period. Topics include developments in logic, role of faith and reason in knowledge, and use of Platonic and Aristotelian philosophy. Course readings include Christian, Jewish, and Islamic authors.

**Phl 303U - Early Modern Philosophy (4)**
History of Western philosophy during the Early Modern period (17th and 18th centuries) from Descartes to Kant. Topics include nature of knowledge and reality; theories of human nature.

**Phl 304U - Nineteenth Century Philosophy (4)**
Study of continental European philosophy from Hegel to Nietzsche. Topics include post-Kantian idealism, the "social turn" in epistemology, communitarian ethics, reactions to the crisis in Christianity, and the radical critiques of modern social and political institutions.

**Phl 305U - Philosophy of Medicine (4)**
Examination of central philosophical issues that arise within the theory and practice of medicine such as: the relationship of medicine to basic sciences, the roles played in medicine by normative concepts such as health and illness, the nature of causal reasoning in medicine, and the nature of diagnostic categories in medicine and psychiatry.

**Phl 306U - Science and Pseudoscience (4)**
An examination of basic issues in philosophy of science through an analysis of creation science, faith healing, UFO abduction stories, and other pseudosciences. Some of the questions addressed: What distinguishes science from pseudoscience? How are theories tested? When is evidence reliable? Must we invoke the supernatural to explain certain aspects of reality?

**Phl 307U - Introduction to the Philosophy of Social Science (4)**
A survey of philosophical issues that arise within social sciences: what is the object of study of the social sciences, are social sciences scientific, are there laws in social sciences, are social sciences descriptive or explanatory, and does the proper methodology of social sciences include unique hermeneutical principles of understanding or merely methods of causal inference and/or structural analysis?

**Phl 308U - Elementary Ethics (4)**
General introduction to ethical theory. Attention will be given to such questions as whether there are objective moral distinctions, what makes right acts right and wrong acts wrong, and how we know (if we do) that actions are right or wrong. Among the theories to be considered are relativism, egoism, utilitarianism, and Kantianism.

**Phl 309U - Business Ethics (4)**
Study of the ethical aspects of practices and organizational structures in the business world such as: the moral status of corporations; the concept of work place rights; responsibility in advertising; environmental constraints on business; affirmative
action in hiring; the social roles of profit and private property; role of work in the life of the individual.

**Phl 310U - Environmental Ethics (4)**

Critical study of issues raised by the attempt to formulate an adequate environmental ethic. Some of these issues deal with how our treatment of the environment affects other human beings, i.e., future generations. Others have to do with how non-human beings are to be treated. Do animals have rights? Do species have rights? Do our proper moral concerns extend to such things as trees, rivers, and possibly the planet itself? A number of current problems will be considered, such as population control, limits to growth, global warming, and endangered species.

**Phl 311U - The Morality of Punishment (4)**

The focus is on the nature and proper aims of punishment; moral considerations that bear on the justice and wisdom of punishment. Consideration will be given to the main theories of punishment: retributionism, utilitarianism, paternalism, and the view that punishment should be replaced by therapy.

**Phl 312U - Feminist Philosophy (4)**

Critically examines traditional schools of philosophical thinking from a feminist perspective.

**Phl 313U - Life and Death Issues (4)**

Study of moral problems dealing with life and death issues including abortion, euthanasia, the death penalty, starvation, and nuclear war.

**Phl 314U - Computer Ethics (4)**

Examines the moral principles and judgments relevant for computer-related practices. Topics include: ethical aspects of new information technologies; are technologies value-laden; potential abuses and their social consequences; freedom, privacy, and control; security, reliability, and professional responsibilities; risks, control, and regulations; piracy and ownership; ethics of hacking; ethics of virtual environment; and international aspects of new technologies.

**Phl 315 - Existentialism (4)**

Introduction to a number of philosophers and literary figures gathered together under the name "existentialism." Authors include Dostoyevsky, Kierkegaard, Nietzsche, Rilke, Kafka, Ortega y Gasset, Jaspers, Heidegger, Sartre and Camus. Topics include consciousness, (in)authenticity, alienation, death, anxiety, freedom, time, nihilism, historical meaning and religion. Recommended: one philosophy course.

**Phl 316U - Social and Political Philosophy (4)**

The main philosophical theories of the nature and principles of a just society. Social and political order, freedom, justice, and happiness are declared to be the principal ends of any society. Philosophical theories describe, explore, explain, and frequently attempt to justify specific social or political arrangements in order to attain these goals.

**Phl 317U - Philosophy of Art (4)**

Philosophical issues concerning the creation, interpretation, and consumption of art. Includes an overview of the major philosophical theories about the nature of art, an examination of the relationship between art and ethics, art and psychology, art and pornography, and relativism of aesthetic value judgments.

**Phl 318U - Philosophy of Medicine (4)**

Examination of central philosophical issues that arise within the theory and practice of medicine such as: the relationship of medicine to basic sciences, the roles played in medicine by normative concepts such as health and illness, the nature of causal reasoning in medicine, and the nature of diagnostic categories in medicine and psychiatry.

**Phl 319U - Introduction to Asian Philosophy (4)**

A study of different systems of eastern philosophy through the main classical texts drawn from Hinduism, Buddhism, Taoism, and Confucianism. Topics include: the nature of reality, the self, causality, language, knowledge, and ethics.

**Phl 320U - Critical Thinking (4)**

Designed to improve reasoning and skills of critical assessment of information. Focuses on practical methods that are applied to case studies from public media such as editorials, essays, propaganda advertisements, and newspaper reports of scientific studies.
**Phl 321U - Practical Epistemology (4)**
Considers criteria for knowledge-claims based on different sources, such as: memory, perception, eyewitness testimony, expert testimony, and medical and scientific experts.

**Phl 322U - Minds and Machines (4)**
Study of philosophical aspects of artificial intelligence including its functionalist ontology. Topics include the nature of computation, learning, and intelligence and the role of consciousness in thinking and behavior. Expected preparation: 8 credits in any science or 8 credits in any philosophy courses.

**Phl 324U - Introduction to Formal Logic I (4)**
A course in basic formal logic. Major topics include the method of deduction for showing propositional arguments valid and the method of counter-example for showing such arguments invalid. Truth table methods, tests for consistency, and syllogistic arguments are optional topics.

**Phl 325U - Introduction to Formal Logic II, Predicate Logic (4)**
Continuation of Phl 324 Introduction to Formal Logic. Primary emphasis will be on formal methods for dealing with arguments involving the terms "all" and "some." Major topics include the method of deduction for showing predicate logic arguments valid, and the method of counter-example for showing such arguments invalid. Recommended prerequisite: Phl 324.

**Phl 327 - Introduction to Quantitative Literacy (4)**
The goal is to learn to think intelligently and critically about important uses of quantitative data by means of discussion of the following topics: samples, measures, scales, relationships, risks, predictions, graphs, averages, percentages, distributions, random effects, and estimates. Intended for students who do not normally take classes that involve quantitative matters; its mathematical content is kept at an absolute minimum.

**Phl 330U - Language, Representation, and Reality (4)**
An introduction to theories of meaning and their central topics: nature of representation and the referential capacity of language, role of use in meaning, and the role of language in thought and experience.

**Phl 331U - Philosophy of Education (4)**
Exploration of the nature, aims, and value of education by situating it in its historical and contemporary philosophical context and perspectives. Expected preparation: at least one course in philosophy and/or education.

**Phl 332 - Intentionality, Phenomenology, and Existentialism (4)**
Examination of the Kantian roots of what becomes known as "intentionality" (i.e., that our conscious acts are directed toward objects, intending them) and subsequent theories of intentionality (e.g., Husserl, Heidegger, Frege, and Searle). Recommended prerequisite: 8 credits in philosophy.

**Phl 333U - Philosophy of Law (4)**
Examines the nature of law, legal obligation and legal interpretation. Is law a part of morality, or nothing more than an expression of social power? When are we permitted or required to disobey the law? What is the proper methodology for interpreting laws and deciding cases? Do judges discover or create law? Readings include classics of jurisprudence (e.g., Austin, Hart, Dworkin) as well as judicial opinions in a selected topic. Recommended prerequisites: Phl 308, 311 or 316.

**Phl 336 - Ancient Political Philosophy (4)**
A study of central philosophical themes (justice, power, citizenship, etc.) across major figures in ancient Greek and Roman political thought.

**Phl 344U - Military Ethics (4)**
Examination of the central conceptual, ethical, and existential issues concerning war and the military as an institution and a culture. Topics include theories of war, military values, and the ethics of technology (UAVs, WMDs), insurgency, and terrorism.
Phl 350U - International Ethics (4)
Introduction to central moral principles relevant for international relations. Topics include military, humanitarian, and covert intervention, economic sanctions, development assistance and human rights.

Phl 351U - Philosophy of International Human Rights (4)
Examination of concepts of human rights through classics of political philosophy, international human rights law and its development, and current high-profile cases of alleged violations of human rights.

Phl 352U - Philosophy of International Law (4)
Analysis of International Law through its philosophical foundations, major historical forms of implementation, and current roles in ameliorating global problems (e.g., war, poverty, and revolutions).

Phl 355U - Morality and Health Care (4)
Examination of central issues of the ethics of health care such as euthanasia, abortion and equitable medical allocation.

Phl 360U - American Philosophy (4)
Study of American pragmatism through some of its major representatives (e.g., Dewey, Peirce, James, and Mead), its intellectual and cultural context, and its influences on contemporary American philosophers.

Phl 365U - Atheism (4)
Examination of atheist philosophy including secularism in ethics and politics, naturalism in epistemology and metaphysics, and contemporary naturalistic accounts of religion and faith-based beliefs.

Phl 367U - Philosophy of Sport (4)
An examination of the central conceptual, ethical, and existential issues concerning sports. Topics include the nature and role of sports in human flourishing, theories of embodiment, and the morality of sports as an institution and culture including competition and violence.

Phl 369U - Philosophy of Sex and Love (4)
An examination of the central philosophical issues emerging from a reflection on sex and love such as: possible essence of heterosexuality, homosexuality, and asexuality; morality of different expressions of sex and love such as sadomasochism and polygamy; role of sexuality and romantic love in our self-conception; influence of conceptual sources on our experiences of sexuality and love.

Phl 370U - Philosophy of Work and Leisure (4)
Role and nature of work and leisure in theories of the good life and central social and political practices.

Phl 371U - Philosophy and the City (4)
Explores the role and nature of the city in the history of philosophy and especially social and political theory and the philosophical bases of contemporary urban theory including political, civic, sustainable, and aesthetic ideas of the city.

Phl 373 - Queer Philosophy (4)
The aim of this course is to illuminate the theoretical underpinnings and the radical epistemological, social, and political possibilities that are afforded by queer philosophy/theory. Queer Philosophy problematizes and challenges rigid identity categories, norms of sexuality and gender and the oppression and violence that such norms justify. This course will interrogate the metaphysical, epistemological, phenomenological, social, and political dimensions of queer philosophy.

Cross-Listed as: This is the same course as WS 373 and may be taken only once for credit.

Phl 375U - Food Ethics (4)
An introduction to ethical issues surrounding food choices including the fairness of food markets, the moral status of animals, and our obligations to the hungry.

Phl 379U - Feminist Care Ethics (4)
Provides a comprehensive introduction to care ethics from its origins in feminist theory to its present multidisciplinary and international manifestations. The implications of care ethics for ontology, epistemology, aesthetics, identity, performativity and moral theory are addressed. Care ethics is differentiated from mainstream ethical theories. Care theory is applied to a variety of academic and
professional disciplines including but not limited to business, education, healthcare, literature, political science, performance studies, and psychology.

Cross-Listed as: This is the same course as WS 379U and may be taken only once for credit.

**Phl 380 - Philosophical Writing (4)**

Philosophical Writing is a “writing in the genre” course for philosophy majors. It teaches strategies for the major types of philosophical writing, including summaries, blog posts, abstracts, argumentative essays, and research papers. Students may also study essays, dialogues, and short stories to explore the diverse ways in which people have communicated philosophical ideas. This is a writing-intensive course in which students will receive feedback on multiple drafts to improve their writing.

**Phl 399 - Special Studies (1-6)**

(Credit to be arranged.)

**Phl 401 - Research (1-6)**

(Credit to be arranged.) Consent of instructor.

**Phl 402 - Independent Study (1-12)**

(Credit to be arranged.)

**Phl 403 - Honors Thesis (1-4)**

(Credit to be arranged.) Consent of instructor.

**Phl 404 - Cooperative Education/Internship (1-12)**

(Credit to be arranged.)

**Phl 405 - Reading and Conference (1-6)**

(Credit to be arranged.) Consent of instructor.

**Phl 406 - Projects (1-12)**

(Credit to be arranged.)

**Phl 407 - Seminar (1-6)**

(Credit to be arranged.)

**Phl 409 - Practicum (1-12)**

(Credit to be arranged.)

**Phl 410 - Selected Topics (1-6)**

(Credit to be arranged.)

**Phl 414 - Plato (4)**

Study of selected dialogues of Plato with attention to such topics as his theory of forms, moral philosophy, political philosophy, and to the individual topics of the dialogues, as, for example, knowledge, being, virtue, piety, love, friendship, the state, the nature of philosophy. Expected preparation: 8 credits in philosophy.

Also offered for graduate-level credit as Phl 514 and may be taken only once for credit.

**Phl 415 - Aristotle (4)**

Study of some of the works of Aristotle, such as his Physics, Metaphysics, Ethics, Politics, parts of the Organon Rhetoric. Among topics for attention are substance, essence, categories, cause, the good man, practical reason. Recommended prerequisite: 8 credits in philosophy.

Also offered for graduate-level credit as Phl 515 and may be taken only once for credit.

**Phl 416 - The Rationalists: Descartes, Leibniz, Spinoza (4)**

Study, with comparisons, of selected works of philosophers who maintained that knowledge comes primarily from reason. Likely readings: for Descartes, Meditations, or Rules, or Discourse on Method; for Spinoza, Ethics; for Leibniz, a selection from among his many collected works and fragments. Recommended prerequisite: 8 credits in philosophy.

Also offered for graduate-level credit as Phl 516 and may be taken only once for credit.

**Phl 417 - The Empiricists (4)**

Study of the British philosophers, Locke, Berkeley and Hume, who hold that all of the ingredients of thought enter the mind by way of experience and that only what has a definite relation to experience can be thought. Among the particular topics considered will be material substance, spirit, abstract ideas, causation, induction, and skepticism. Recommended prerequisite: 8 credits in philosophy.

Also offered for graduate-level credit as Phl 517 and may be taken only once for credit.
Phl 419 - Kant (4)
Study of Kant's Philosophy primarily as represented in the Critiques of Pure Reason, Practical Reason, Judgment. Readings from some of these or related works. Possible topics for consideration: necessary connection, the analytic-synthetic distinction, conceptions of science and metaphysics, relation between metaphysics and morality. Recommended prerequisite: 8 credits in philosophy.
Also offered for graduate-level credit as Phl 519 and may be taken only once for credit.

Phl 420 - Wittgenstein (4)
Study of some of the major works of Wittgenstein with emphasis on the later work, especially the Philosophical Investigations. Attention will be given to Wittgenstein's contributions to philosophical method, as well as to his treatment of issues concerning language, meaning, intention, understanding, necessity, and the nature of human persons as language users. Recommended prerequisite: 12 credits in philosophy.
Also offered for graduate-level credit as Phl 520 and may be taken only once for credit.

Phl 423 - Metaphysics (4)
Philosophical examination of traditional metaphysical issues (such as relation of body and mind, free will and determinism) and of the more influential ontologies (idealism, materialism, dualism). Introduction also to contemporary controversies over the feasibility of metaphysics as a rational discipline (logical positivism and its critics). Recommended prerequisite: 8 credits in philosophy.
Also offered for graduate-level credit as Phl 523 and may be taken only once for credit.

Phl 424 - Epistemology (4)
Philosophical examination of some of the main issues in the theory of knowledge (such as our knowledge of the external world, of the minds of others, of logical and mathematical truths, etc.). Recommended prerequisite: 8 credits in philosophy.
Also offered for graduate-level credit as Phl 524 and may be taken only once for credit.

Phl 432 - Philosophy of Mind (4)
Study of the debates over the nature of mental states and our knowledge of them. Main topics are dualism and various forms of physicalism, behaviorism, mind-body identity theories, functionalism and eliminativism. Expected preparation: 8 credits in philosophy.
Also offered for graduate-level credit as Phl 532 and may be taken only once for credit.

Phl 433 - Philosophy of Language (4)
A study of the nature of language, and of problems of meaning, reference, and truth. Recommended prerequisite: 8 credits in philosophy.
Also offered for graduate-level credit as Phl 533 and may be taken only once for credit.

Phl 445 - Advanced Ethics (4)
A course in moral epistemology or "meta-ethics" dealing with such matters as the distinction and connections between fact and value, "is" and "ought," and description and evaluation. Recommended prerequisite: 8 credits in philosophy.
Also offered for graduate-level credit as Phl 545 and may be taken only once for credit.

Phl 446 - Topics in Ethics (4)
Topics in contemporary moral philosophy, including (but not limited to) the relation between applied and theoretical ethics, the foundations of moral responsibility, virtues, and the role of outcomes in moral evaluation. Course may be repeated for credit toward major requirements with departmental approval. Expected preparation: Phl 308 or Phl 445.
Also offered for graduate-level credit as Phl 546 and may be taken only once for credit.

Phl 447 - Topics in Social and Political Philosophy (4)
An in-depth study of an important current issue (such as global justice, multiculturalism, or power) or figure (such as John Rawls, Jürgen Habermas, or Michel Foucault) in social and political philosophy. Course may be repeated for credit if topics are different.
Also offered for graduate-level credit as Phl 547 and may be taken only once for credit. Prerequisite: Phl 316U or junior-level standing or by instructor approval.

Phl 448 - Biomedical Ethics (4)
Advanced study of central ethical issues in medicine, biomedical research, and health care systems, such as patient autonomy and medical paternalism, justice in provision of health services, protection of human subjects in research, and death, dying, and end of life care. Expected preparation: Phl 355.
Also offered for graduate-level credit as Phl 548 and may be taken only once for credit. Prerequisite: Upper-division standing.

Phl 449 - Philosophy of Sustainability (4)
Examination of the core philosophical issues that arise within the theory and practice of sustainability
and across its three complementary dimensions: environmental, economic, and social.

Also offered for graduate-level credit as Phl 549 and may be taken only once for credit. Prerequisite: junior standing.

**Phl 451 - Classical Figures (4)**
Intensive study of some classical figures such as Descartes, Spinoza, Leibniz, Nietzsche, Hegel. Course may be repeated for credit. Recommended: junior level standing.

Also offered for graduate-level credit as Phl 551 and may be taken only once for credit.

**Phl 460 - Contemporary European Philosophy (4)**
In-depth study of a current theme (such as phenomenology, post-modernism, or post-structuralism) or topical figure (such as Habermas, Derrida, or Benjamin) of European, "Continental" Philosophy.

Also offered for graduate-level credit as Phl 560 and may be taken only once for credit. Prerequisite: Junior standing or consent of instructor.

**Phl 470 - Philosophy of Science (4)**
History and philosophy of the scientific method. Topics include an overview of the major models of the scientific method (inductivism, falsificationism, Kuhnian paradigms, etc.) and issues pertaining to the accuracy of these models and their rationality such as theory-ladenness of observation, testing-holism, and the incommensurability of theory change. Recommended prerequisites: 8 credits in philosophy and upper-division standing.

Also offered for graduate-level credit as Phl 570 and may be taken only once for credit.

**Phl 471 - Topics in Philosophy of Science (4)**
An in-depth analysis of some specific metaphysical issue pertaining to scientific epistemology such as (but not limited to) explanation, causation, realism, geometry, and relativism. Topics vary per course which will allow students to take course more than once, with departmental approval, to apply toward major requirements. Recommended prerequisites: 8 credits in philosophy and upper-division standing.

Also offered for graduate-level credit as Phl 571 and may be taken only once for credit.

**Phl 474 - Philosophy of Logic (4)**
Topics: validity, sentence-proposition, connectives, quantifiers, truth, paradoxes, logical necessity and possibility. Optional topics: metalogic, the construction of formal systems of logic and formal proofs of certain of their properties, e.g., consistency and completeness. Recommended prerequisite: Phl 325.

Also offered for graduate-level credit as Phl 574 and may be taken only once for credit.

**Phl 481 - Biomedical Ethics (4)**
A three-terms sequence that provides a practical bioethics education in clinical health care, biomedical and behavioral research, and public policy. Phl 481/581: introduction to the concepts, methods, and literature of health care and biomedical research ethics, designed to familiarize participants with the basic definitions and arguments in the major topics of clinical and research ethics. Phl 482/582 and Phl 483/583: concepts and skills developed in 481/581 will be intensively examined; students take responsibility for several aspects of teaching. This is the first course in a sequence of three: Phl 481, Phl 482, and Phl 483 which must be taken in sequence. Recommended prerequisite: an acquaintance with health care services.

Also offered for graduate-level credit as Phl 581 and may be taken only once for credit.

**Phl 482 - Biomedical Ethics (4)**
A three-terms sequence that provides a practical bioethics education in clinical health care, biomedical and behavioral research, and public policy. Phl 481/581: introduction to the concepts, methods, and literature of health care and biomedical research ethics, designed to familiarize participants with the basic definitions and arguments in the major topics of clinical and research ethics. Phl 482/582 and Phl 483/583: concepts and skills developed in 481/581 will be intensively examined; students take responsibility for several aspects of teaching. This is the second course in a sequence of three: Phl 481, Phl 482, and Phl 483 which must be taken in sequence. Recommended prerequisite: an acquaintance with health care services.

Also offered for graduate-level credit as Phl 582 and may be taken only once for credit.

**Phl 483 - Biomedical Ethics (4)**
A three-terms sequence that provides a practical bioethics education in clinical health care, biomedical and behavioral research, and public policy. Phl 481/581: introduction to the concepts, methods, and literature of health care and biomedical research ethics, designed to familiarize participants with the basic definitions and arguments in the major topics of clinical and research ethics. Phl 482/582 and Phl 483/583: concepts and skills developed in 481/581 will be intensively examined; students take responsibility for several aspects of teaching. This is the third course in a sequence of three: Phl 481, Phl
482, and Phil 483 which must be taken in sequence. Recommended prerequisite: an acquaintance with health care services.

Also offered for graduate-level credit as Phil 583 and may be taken only once for credit.

Phl 485 - Honors Seminar (4)
Selected topics within areas of the instructor's research. Students will be expected to produce substantial written material on the topic, to be shared and critiqued. Recommended particularly for students considering graduate work in philosophy. Recommended prerequisites: 20 credits in philosophy with a GPA in philosophy courses of at least 3.5.

Phl 501 - Research (1-9)
(Credit to be arranged.)

Phl 504 - Cooperative Education/Internship (0-12)
(Credit to be arranged.)

Phl 505 - Reading and Conference (0-6)
(Credit to be arranged.) Consent of instructor.

Phl 507 - Seminar (1-6)
(Credit to be arranged.)

Phl 510 - Selected Topics (1-6)
(Credit to be arranged.)

Phl 514 - Plato (4)
Study of selected dialogues of Plato with attention to such topics as his theory of forms, moral philosophy, political philosophy, and to the individual topics of the dialogues, as, for example, knowledge, being, virtue, piety, love, friendship, the state, the nature of philosophy.

Also offered for undergraduate-level credit as Phil 414 and may be taken only once for credit.

Phl 515 - Aristotle (4)
Study of some of the works of Aristotle, such as his Physics, Metaphysics, Ethics, Politics, parts of the Organon Rhetoric. Among topics for attention are substance, essence, categories, cause, the good man, practical reason.

Also offered for undergraduate-level credit as Phil 415 and may be taken only once for credit.

Phl 516 - The Rationalists: Descartes, Leibniz, Spinoza (4)
Study, with comparisons, of selected works of philosophers who maintained that knowledge comes primarily from reason. Likely readings: for Descartes, Meditations, or Rules, or Discourse on Method; for Spinoza, Ethics; for Leibniz, a selection from among his many collected works and fragments.

Also offered for undergraduate-level credit as Phil 416 and may be taken only once for credit.

Phl 517 - The Empiricists (4)
Study of the British philosophers, Locke, Berkeley and Hume, who hold that all of the ingredients of thought enter the mind by way of experience and that only what has a definite relation to experience can be thought. Among the particular topics considered will be material substance, spirit, abstract ideas, causation, induction, and skepticism.

Also offered for undergraduate-level credit as Phil 417 and may be taken only once for credit.

Phl 519 - Kant (4)
Study of Kant's Philosophy primarily as represented in the Critiques of Pure Reason, Practical Reason, Judgment. Readings from some of these or related works. Possible topics for consideration: necessary connection, the analytic-synthetic distinction, conceptions of science and metaphysics, relation between metaphysics and morality.

Also offered for undergraduate-level credit as Phil 419 and may be taken only once for credit.

Phl 520 - Wittgenstein (4)
Study of some of the major works of Wittgenstein with emphasis on the later work, especially the Philosophical Investigations. Attention will be given to Wittgenstein's contributions to philosophical method, as well as to his treatment of issues concerning language, meaning, intention, understanding, necessity, and the nature of human persons as language users.

Also offered for undergraduate-level credit as Phil 420 and may be taken only once for credit.

Phl 523 - Metaphysics (4)
Philosophical examination of traditional metaphysical issues (such as relation of body and mind, free will and determinism) and of the more influential ontologies (idealism, materialism, dualism). Introduction also to contemporary controversies over the feasibility of metaphysics as a rational discipline (logical positivism and its critics).
Also offered for undergraduate-level credit as Phil 423 and may be taken only once for credit.

**Phil 524 - Epistemology (4)**

Philosophical examination of some of the main issues in the theory of knowledge (such as our knowledge of the external world, of the minds of others, of logical and mathematical truths, etc.).

Also offered for undergraduate-level credit as Phil 424 and may be taken only once for credit.

**Phil 532 - Philosophy of Mind (4)**

Study of the debates over the nature of mental states and our knowledge of them. Main topics are dualism and various forms of physicalism, behaviorism, mind-body identity theories, functionalism and eliminativism.

Also offered for undergraduate-level credit as Phil 432 and may be taken only once for credit.

**Phil 533 - Philosophy of Language (4)**

A study of the nature of language, and of problems of meaning, reference, and truth.

Also offered for undergraduate-level credit as Phil 433 and may be taken only once for credit.

**Phil 545 - Advanced Ethics (4)**

A course in moral epistemology or "meta-ethics" dealing with such matters as the distinction and connections between fact and value, "is" and "ought," and description and evaluation.

Also offered for undergraduate-level credit as Phil 445 and may be taken only once for credit.

**Phil 546 - Topics in Ethics (4)**

Topics in contemporary moral philosophy, including (but not limited to) the relation between applied and theoretical ethics, the foundations of moral responsibility, virtues, and the role of outcomes in moral evaluation. Course may be repeated for credit toward major requirements with departmental approval.

Also offered for undergraduate-level credit as Phil 446 and may be taken only once for credit.

**Phil 547 - Topics in Social and Political Philosophy (4)**

An in-depth study of an important current issue (such as global justice, multiculturalism, or power) or figure (such as John Rawls, Jürgen Habermas, or Michel Foucault) in social and political philosophy. Course may be repeated for credit if topics are different.

Also offered for undergraduate-level credit as Phil 447 and may be taken only once for credit.

**Phil 548 - Biomedical Ethics (4)**

Advanced study of central ethical issues in medicine, biomedical research, and health care systems, such as patient autonomy and medical paternalism, justice in provision of health services, protection of human subjects in research, and death, dying, and end of life care.

Also offered for undergraduate credit as Phil 448 and may be taken only once for credit.

**Phil 549 - Philosophy of Sustainability (4)**

Examination of the core philosophical issues that arise within the theory and practice of sustainability and across its three complementary dimensions: environmental, economic, and social.

Also offered for undergraduate-level credit as Phil 449 and may be taken only once for credit.

**Phil 551 - Classical Figures (4)**

Intensive study of some classical figures such as Descartes, Spinoza, Leibniz, Nietzsche, Hegel. Course may be repeated for credit.

Also offered for undergraduate-level credit as Phil 451 and may be taken only once for credit.

**Phil 555 - Morality and Health Care (4)**

Examination of issues in health care such as euthanasia, abortion, allocation of transplantable organs, rationing health care, treatment of impaired newborns. Recommended prerequisite: 8 credits in philosophy.

**Phil 560 - Contemporary European Philosophy (4)**

In-depth study of a current theme (such as phenomenology, post-modernism, or post-structuralism) or topical figure (such as Habermas, Derrida, or Benjamin) of European, "Continental" Philosophy.

Also offered for undergraduate-level credit as Phil 460 and may be taken only once for credit.

**Phil 570 - Philosophy of Science (4)**

History and philosophy of the scientific method. Topics include an overview of the major models of the scientific method (inductivism, falsificationism, Kuhnian paradigms, etc.) and issues pertaining to the accuracy of these models and their rationality such as theory-ladenness of observation, testing-holism, and the incommensurability of theory change.
Also offered for undergraduate-level credit as Phil 470 and may be taken only once for credit.

**Phil 571 - Topics in Philosophy of Science (4)**
An in-depth analysis of some specific metaphysical issue pertaining to scientific epistemology such as (but not limited to) explanation, causation, realism, geometry, and relativism. Topics vary per course which will allow students to take course more than once, with departmental approval, to apply toward major requirements.

Also offered for undergraduate-level credit as Phil 471 and may be taken only once for credit.

**Phil 574 - Philosophy of Logic (4)**
Topics: validity, sentence-proposition, connectives, quantifiers, truth, paradoxes, logical necessity and possibility. Optional topics: metalogic, the construction of formal systems of logic and formal proofs of certain of their properties, e.g., consistency and completeness.

Also offered for undergraduate-level credit as Phil 474 and may be taken only once for credit.

**Phil 581 - Biomedical Ethics (4)**
A three-term sequence that provides a practical bioethics education in clinical health care, biomedical and behavioral research, and public policy. Phil 481/581: introduction to the concepts, methods, and literature of health care and biomedical research ethics, designed to familiarize participants with the basic definitions and arguments in the major topics of clinical and research ethics. Phil 482/582 and Phil 483/583: concepts and skills developed in 481/581 will be intensively examined; students take responsibility for several aspects of teaching. This is the third course in a sequence of three: Phil 581, Phil 582, and Phil 583 which must be taken in sequence.

Recommended prerequisite: an acquaintance with health care services.

Also offered for undergraduate-level credit as Phil 481 and may be taken only once for credit.

**PHP - Public Health Practice**
Courses offered as part of the joint OHSU-PSU School of Public Health.

**Port - Portuguese**

**Port 101 - First-Year Portuguese Term 1 (4)**
An introduction to elementary Portuguese. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, elementary readings. This is the first course in a sequence of three: Port 101, Port 102, and Port 103.

**Port 102 - First-Year Portuguese Term 2 (4)**
An introduction to elementary Portuguese. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, elementary readings. This is the second course in a sequence of three: Port 101, Port 102, and Port 103.

**Port 103 - First-Year Portuguese Term 3 (4)**
An introduction to elementary Portuguese. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, elementary readings. This is the third course in a sequence of three: Port 101, Port 102, and Port 103.
Port 199 - Special Studies (1-3)  
(Credit to be arranged.)

Port 201 - Second-Year Portuguese Term 1 (4)  
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the first course in a sequence of three: Port 201, Port 202, and Port 203. Expected preparation: Port 103.

Port 202 - Second-Year Portuguese Term 2 (4)  
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the second course in a sequence of three: Port 201, Port 202, and Port 203. Expected preparation: Port 103.

Port 203 - Second-Year Portuguese Term 3 (4)  
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the third course in a sequence of three: Port 201, Port 202, and Port 203. Expected preparation: Port 103.

Port 299 - Special Studies (1-12)  
(Credit to be arranged.)

Port 301 - Third Year Portuguese (4)  
Continued work on the Portuguese language. Port 301 emphasizes listening comprehension and speaking, 302 grammatical patterns, reading, and writing. May be taken concurrently. This is the first course in a sequence of two: Port 301 and Port 302. Expected preparation: Port 203.

Port 302 - Third Year Portuguese (4)  
Continued work on the Portuguese language. Port 301 emphasizes listening comprehension and speaking, 302 grammatical patterns, reading, and writing. May be taken concurrently. This is the second course in a sequence of two: Port 301 and Port 302. Expected preparation: Port 203.

Port 330 - Brazilian Culture and Civilization (4)  
Historical development of life, thought and the arts in Brazil. Conducted in English. This course may be taken twice for credit with different topics.

Port 399 - Special Studies (1-6)  
(Credit to be arranged.)

Port 404 - Cooperative Education/Internship (1-12)  
(Credit to be arranged.)

Port 409 - Practicum (1-8)  
(Credit to be arranged.)

PS - Political Science  
PS 101 - United States Government (4)  
An examination is made of American government in theory and practice. Topics include: the constitutional foundations of American government; federalism, civil liberties, and civil rights; Congress and the legislative process; the presidency and modern bureaucracy; the Supreme Court and judicial policy-making.

PS 102 - United States Politics (4)  
Introduction to issues and trends in political culture, political behavior, and public policy making. Topics include: public opinion, political parties and pressure groups, elections and voting behavior, political participation, the role of the media, policy making, the budget process, domestic policy, and national security policy.

PS 103 - State of the World (4)  
The course surveys and analyzes the major global issues of our time, including human rights, environmental protection, poverty and underdevelopment, and war and peace. The importance of using interdisciplinary tools of analysis, and understanding the meaning of a global perspective on world affairs, are emphasized.

PS 199 - Special Studies (1-4)  
(Credit to be arranged.) Consent of instructor.
PS 200 - Introduction to Politics (4)
Basic introduction to the central themes and fundamental issues of political life. Examines the nature and meaning of politics and political association in both domestic and international settings. Fundamental concepts and ideas associated with government, and politics more generally, are explored, along with the nature of political culture and the way this culture is reflected in the institutions and operations of government.

PS 203 - Introduction to State and Local Politics (4)
Provides an introduction to the role and structure of state and local governments, and examines the forces that influence subnational politics. Topics include federalism, intergovernmental relations, elections, the policy-making process, and the problems confronting states and communities.

PS 204 - Comparative Politics (4)
A general survey of theories, concepts, and methods employed in comparative politics. Attention given to political behavior, structures, and processes.

PS 205 - International Politics (4)
An analysis of the nature of relations among nations, with specific reference to contemporary international issues. Motivating factors will be examined, including nationalism, economic rivalries, and the quest for security. Also treated will be the problem of national sovereignty and its relationship to international cooperation, changing threats to international security in the post-Cold War era, and the increasing importance of international economic competition and cooperation.

PS 208 - Introduction to Political Theory (4)
General introduction to the problems of political theory. A selective survey of the political ideas of Plato, Machiavelli, Locke, Rousseau, Mill, and Marx which introduced some of the major traditions of political thought in the west. The foundations of the communitarian, republican, and liberal political discourse are examined and discussed.

PS 211 - Introduction to Law and Legal Studies (4)
Introduction to the nature and function of public law in the United States. The course focuses on fundamental problems of jurisprudence, the relation between law and politics, the nature and function of the court system, judicial process, and the workings of the criminal justice system.

PS 295 - The Art and Science of Political Science Research (4)
This course is designed to improve students’ critical thinking skills and provide tools to craft and critique political science research. Topics covered include the development of research questions, study design, and literature reviews; qualitative and quantitative research methods; and research ethics.

PS 299 - Special Studies (1-4)
(Credit to be arranged.)

PS 310 - How to Win a U.S. Political Campaign (4)
Close examination of major aspects of a modern political campaign in the United States. The course takes a pragmatic, skills-based approach aimed at preparing students for high-level, meaningful work on a local, state, or national campaign for both candidates and ballot measures. Topics include campaign organization and management, fundraising and campaign finance, communications and messaging, polls and focus groups, campaign strategy and storytelling.

PS 312 - Legislative Process (4)
An examination of the role of legislatures in state politics. Particular attention is given to the forces that shape legislative elections, the relationship between legislatures and governors, and efforts to reform legislative politics. Recommended prerequisites: PS 101 and 102.

PS 313U - The Power Game: A Simulation of Washington Politics (4)
Examines the nature of political power, the complexities involved in policy-making, and the relationship between the major political actors in Washington, D.C. The course revolves around a simulation of the U.S. government in which students...
play the roles of real members of Congress, the executive branch, interest groups, and the press.

PS 316U - Politics and the Arts (4)
Politics permeate the arts, from government support of arts organizations to battles over public art. This course examines the government’s involvement in the arts. Topics include a history, modern challenges to artists and art organizations, funding, how arts policy is made, copyright protection, artists’ rights, censorship, equity, and diversity. Meant for majors and non-majors who are interested in how government actions affect performing and visual artists, filmmakers, and others in the arts community.

PS 317U - Film and Politics (4)
Examines the political meanings of films. Topics include: how films reflect, and sometimes challenge, basic themes in American political culture; how filmmakers capture and encode images in ways that tell a culturally-pleasing story; how audiences make sense of these images and stories to construct particular understanding of power, government, and the individual; and the relationship between Hollywood and politics.

PS 318U - Media, Opinion, and Voting (4)
Course examines the interaction between the mass media, public opinion, and voting behavior in the United States. Competing theories of media effects on public opinion and voting behavior are analyzed, as are competing proposals for reforming electoral campaigns, campaign advertising, presidential debates, and other features of mass-mediated elections in order to enhance citizen participation. Key questions students will consider include the degree of responsibility that politicians, journalists, and citizens should assume for improving citizen engagement with electoral politics. Recommended prerequisite: PS 102.

PS 319U - Politics of the Environment (4)
The human relationship with nature is a source of much political conflict and has been since the emergence of the state. This course explores the short- and long-term origins of current conflicts, the emergence of political movements around environmental issues, alternative world views regarding nature, and the distinctiveness of politics around these issues. Specific conflicts will be examined, including the relationship between human attempts to control nature and human hierarchies, population, water, and conservation of biodiversity.

PS 320 - Explore the Law (2)
Interact with practicing lawyers and learn more about the legal profession through a series of workshops. Includes assistance with the law school application process such as personal statement preparation and LSAT studying. This course may be repeated for credit up to two times.

PS 321 - Introduction to the Supreme Court (4)
An exploration of the U.S. Supreme Court's place in America's constitutional structure, including how the Court forms and shapes policy and how political forces shape Court practices, selection, and decision-making processes.

PS 325U - Politics and the Legal Enforcement of Morals (4)
Critical examination of law as a mechanism for the enforcement of moral standards. The limits of law and political authority more generally are explored through an analysis of specific problem areas associated with the legal enforcement of morality. These include, but are not limited to: the use of criminal justice to enforce standards of conventional morality, political tolerance, civil disobedience, and the politics of law and order. Recommended prerequisite: PS 221.

PS 331 - Oregon Politics (4)
An examination of political structures and policy trends in the state of Oregon. Attention is given to local governments as well as state government with special emphasis upon the relationships among different governmental entities.

PS 335U - Race and Politics in the United States (4)
Provides a general survey of constraints and opportunities in American racial minority politics against the backdrop of tremendous demographic change since 1965. Explores a series of debates in American politics with an eye toward the political implications of the changing demographic mix.
PS 343 - Politics of War (4)
Introduction to the theory and practice of both interstate war and civil conflict with particular attention to levels of analysis as well as the process and consequences of war.

PS 345 - U.S. Foreign Policy: The Cold War and Beyond (4)
Analysis of the U.S. foreign policy process, its motives, objectives, and manner of implementation, in the major developments of each administration since 1945. Emphasis is on U.S. relations with the U.S.S.R/Russia and the Third World. Recommended prerequisite: PS 205.

PS 352U - Introduction to European Politics (4)
An introduction to the political systems and politics of countries in both western and eastern Europe. Includes analysis of institutions, policies, and political behavior, as well as an examination of the roles of culture and history. Both theory and case studies will be presented, and in addition, analysis of European integration.

PS 353U - Introduction to Latin American Politics (4)
An examination of a number of Latin American countries (Argentina, Chile, Brazil, Mexico, Peru, etc.) in comparative perspective. Topics covered include: the emergence and decline of various regime types within each of these nation-states; the role of the state, various state sectors, state autonomy and state capacity; the emergence of various social classes, class coalition and the impact of both of these on the state; the importance of international factors such as the international economy and the United States.

PS 354U - Introduction to Asian Politics (4)
Introduction to the policies, institutions, and processes of the politics of Northeast and Southeast Asia.

PS 355U - Introduction to African Politics (4)
Introduction to the policies, institutions, and processes of the politics of Sub-Saharan Africa.

PS 361U - Introduction to the Politics of the Middle East (4)
Introduction to Middle Eastern political systems. Focus will be on the nature of traditional politics, modernization and political development in the region, social stratification, institutions of government, and the political systems of selected Middle East countries. Recommended prerequisite: PS 204 or 205.

PS 362U - Arab-Israeli Conflict (4)
Examination of the conflicting ideological perspectives, the formation of the state of Israel, rise of Arab nationalism, emergence of Palestinian nationalism, the Arab-Israeli wars, rise of Palestinian activism, diplomatic efforts at partial settlements, and possibilities of a comprehensive settlement. Special attention is given to those elements opposed to a final settlement of the conflict, both within Israel and among the Palestinian and greater Arab communities. Recommended prerequisite: PS 204, 205, or 361.

PS 363 - Politics of Iran (4)
Deepens knowledge of Iran’s modern political history and to enriches understanding of Iran’s foreign policy. Topic will include: nuclear politics, proxy conflict, political Islam, terrorism, the politics of oil, and regional security and stability in general. The course will focus on Iran’s relations with Iraq, Syria, Israel/Palestine, and the Gulf Cooperation Council (GCC) and U.S.-Iran relations.

PS 371 - War and Morality (4)
Examines the limits observed by states in their resort to war and in the conduct of battle. Surveys the historical, moral, and legal foundations of these limits, and their enduring relevance in light of changes in international conflict and modern warfare. Topics include aggression and self-defense, preemption, humanitarian intervention, terrorism, torture, and war crimes.

PS 373 - Violence, Rebellion, and Civil War (4)
Discusses the causes and consequences of the dominant modes of rebellion and civil war with attention to the role that violence plays in shaping their character, duration, and outcome. Topics include genocide, famine, civil war, sexual violence in war, nationalism and ethnic conflict, counterinsurgency and counterterrorism, and peacekeeping.
PS 380U - Women and Politics (4)
Analysis of the political role of women in politics. Reviews the historical and contemporary analyses of women's participation and status in politics. Recommended prerequisite: PS 101 or 102.

PS 381U - Women's Leadership (4)
Provides an overview of scholarly theories on why/when/how women lead in politics, business, and law, utilizing a comparative perspective as well as an intersectional lens. In addition, this course includes a significant skill-building element in which students develop their leadership skills and meet with current women leaders in various fields.

PS 387 - Politics and Fiction (4)
This course explores various themes associated with politics as they are presented in fictional media. The course integrates traditional academic material with novels, film, television, poetry, etc., in order to expand student awareness of politics and public life. Recommended prerequisite: PS 200.

PS 389U - Environmental Political Theory (4)
Examines the conceptual and normative issues surrounding the politics of the environment, including the understanding of environmental problems suggested by various theoretical frameworks, including democratic theory, economic rationalism, sustainability, and green radicalism. Issues discussed include the idea of nature in the history of political thought, climate change, and animal rights.

PS 399 - Special Studies (1-6)
(Credit to be arranged.)

PS 399U - Special Studies (4)
(Credit to be arranged.)

PS 401 - Research (1-6)
(Credit to be arranged.) Consent of instructor.

PS 402 - Independent Study (1-12)
(Credit to be arranged.)

PS 403 - Honors Thesis (1-12)
(Credit to be arranged.) Consent of instructor.

PS 404 - Cooperative Education/Internship (1-12)
(Credit to be arranged.)

PS 405 - Reading and Conference (1-6)
(Credit to be arranged.)

PS 406 - Special Projects (1-12)
(Credit to be arranged.)

PS 407 - Seminar (1-6)
(Credit to be arranged.) Reading and discussion about an area of political science, with a research project required. Enrollment limited.

PS 407H - Seminar (1 - 6)
Contact the department for a description of this course.

PS 408 - Workshop (1-4)
(Credit to be arranged.)

PS 409 - Practicum (1-12)
(Credit to be arranged.) Consent of instructor.

PS 410 - Selected Topics (1-6)
(Credit to be arranged.) Consent of instructor.

PS 410U - Selected Topics (1-4)
(Credit to be arranged.)

PS 411 - Advanced Overview of Political Science (4)
An advanced overview of the four established fields of research in political science: American, Comparative, International Relations, and Political Theory, and faculty sub-areas of expertise.
PS 412 - The Presidency (4)
Analysis of the institution, functions, and problems of the presidency. Special attention given to presidential elections, presidential powers, relations with media, presidential leadership, White House staff, executive- legislative relations, and the presidential role in domestic, economic, foreign policy making and execution. Expected preparation: PS 101 and PS 102.
Also offered for graduate-level credit as PS 512 and may be taken only once for credit.

PS 413 - Congress (4)
Study of the structure, organization, powers and operations of Congress. Topics covered include: the evolution of Congress, congressional recruitment and elections, legislative functions, the membership, the leaders, the committee system, the rules and procedures, executive-legislative relations, pressure groups, lobbying, and reform. Expected preparation: PS 101 and PS 102.
Also offered for graduate-level credit as PS 513 and may be taken only once for credit.

PS 414 - Issues in Public Policy (4)
A study of selected major policies and programs of governmental regulation and service. Emphasis is placed upon the formation, administration, and substantive content of policies in such areas as transportation, public utility regulation, medical care, civil rights, education, agriculture, natural resources, and antitrust laws and the preservation of competition.
Also offered for graduate-level credit as PS 514 and may be taken only once for credit.

PS 415 - Comparative Public Policy (4)
Introduction to theories, methods, and cases in comparative public policy. Emphasis on policy learning and applied comparative policy analysis. Unique and shared characteristics of policies in different countries or regions. Topics may include welfare and environmental policy.
Also offered for graduate-level credit as PS 515 and may be taken only once for credit. Prerequisite: upper-division standing.

PS 416 - Political Parties and Elections (4)
An examination of political parties and elections in America. Covers such topics as: the changing role of party organizations, machine politics, electoral rules, candidate recruitment, the nomination process, campaign strategies and tactics, campaign finance, and electoral reform. Expected preparation: PS 101 and 102.
Also offered for graduate-level credit as PS 516 and may be taken only once for credit.

PS 417 - Interest Groups (4)
This course analyzes the role of interest groups in the political process. Particular attention is given to why some interests are more successful at forming groups and influencing politics than others. The course also examines techniques used to lobby legislatures, the executive branch, and the courts. Expected preparation: PS 101 and PS 102.
Also offered for graduate-level credit as PS 517 and may be taken only once for credit.

PS 418 - Contemporary Political Protest in America (4)
Analyzes the role of social movements in recent American history. The course blends theoretical readings with empirical research into specific movements. Movements considered include but are not limited to: civil rights, the new left, public interest reform, the freeze movement, the women's movement, the Christian Right, and the paramilitary/skinhead movement.
Also offered for graduate-level credit as PS 518 and may be taken only once for credit.

PS 419 - Political Reform (4)
Examines the concerns that drive the demand for political reform in America, and how specific reform proposals may affect the political system. The first part of the course focuses on a variety of proposals to open up the electoral system and to improve representation. The second part examines various reforms that are designed to make the government work more effectively and efficiently.
Also offered for graduate-level credit as PS 519 and may be taken only once for credit.

PS 421 - The Supreme Court and American Politics (4)
Uses selective case law in order to explore the place of the Supreme Court in America's constitutional structure and its interpretation of the relationship between the branches of federal government. Examines the way the Court forms and shapes policy through constitutional interpretation, and the way political forces and influences shape Court practices, judicial selection, and the decision-making process.
Also offered for graduate-level credit as PS 521 and may be taken only once for credit.
PS 422 - Constitutional Law (4)
A study of the way in which the Supreme Court has shaped and influenced governmental structure and political power. Special attention is given to judicial decisions in the areas of federalism, separation of powers, the commerce clause, and the authority of the presidency. Expected preparation: PS 221.
Also offered for graduate-level credit as PS 522 and may be taken only once for credit.

PS 423 - Civil Liberties (4)
A study of Supreme Court decisions that affect individual rights and liberties. Areas of concentration include, but are not limited to, freedom of speech and press, religious liberty, criminal justice, racial justice, gender justice, and the right to privacy. Expected preparation: PS 221.
Also offered for graduate-level credit as PS 523 and may be taken only once for credit.

PS 424 - Law, Politics, and Society (4)
Examines the relationship between law and the society which creates and enforces it. Law will be studied from bottom-up rather than top-down. Emphasis is placed on what law is, how people use law, including whether access to law is equal, and how the state exercises power through law. Expected preparation: PS 221.
Also offered for graduate-level credit as PS 524 and may be taken only once for credit.

PS 425 - Women and the Law (4)
Examines the relationship between women and the law. The first half of the course considers several theories of women’s equality. During the second half of the course students will apply these theories to a variety of problems in gender justice. Substantive issues covered may include: sexual harassment, abortion, fetal protection policies, and pornography. This course is the same as WS 424 and may be taken only once for credit.
Also offered for graduate-level credit as PS 525 and may be taken only once for credit. Cross-Listed as: WS 424.

PS 427 - The Politics of Public Opinion (4)
Course provides students with solid foundations for understanding the nature and evaluating the role of public opinion in American democracy. It will also teach students how to interpret public opinion polls intelligently. Specific topics covered will include how "public opinion" has been defined historically and in contemporary discourse; the various influences that shape peoples’ values, beliefs, and attitudes about politics; the methods that pollsters and survey researchers use to measure public opinion and problems with those methods; and the content of Americans’ views on controversial political issues. Expected preparation: PS 318.
Also offered for graduate-level credit as PS 527 and may be taken only once for credit.

PS 429 - American Immigration Politics & Policy (4)
Exploration of American immigration politics over time and into the current era. Expected preparation: PS 101 or PS 102.
Also offered for graduate-level credit as PS 529 and may be taken only once for credit. Prerequisite: Upper-division standing.

PS 431 - State and Local Politics (4)
Intensive examination of the role of the states and cities in the federal system. The course pays particular attention to the importance of political culture in shaping state politics and power relationships between the different levels and branches of government. Oregon’s political experiences are used as examples and for comparison. Expected preparation: PS 203.
Also offered for graduate-level credit as PS 531 and may be taken only once for credit.

PS 432 - Great Tribal Leaders (4)
Course is based on videotaped interviews with contemporary American Indian leaders discussing the personal and social forces that shaped them and the roles they played in shaping federal Indian policy, law, and natural resource management. Key areas of study include historic eras of federal Indian policy; the exercise of power by federal legislative, judicial, and executive branches and their affects on tribal lives and societies; the continuing survival of tribes; and the evolution of tribal governments to meet unforeseen and overwhelming challenges. Recommended prerequisite: PS 101.

PS 435 - Disasters and Public Policy (4)
The political, administrative, and public policy issues surrounding major and catastrophic risks and disasters including both natural (earthquakes, pandemics, asteroids) and man-made (climate change, nuclear weapons, bio-terrorism) events. Expected preparation: PS 101, PS 102, or PS 200.
Also offered for graduate-level credit as PS 535 and may be taken only once for credit.
PS 442 - Contemporary Theories of World Politics (4)
Surveys concepts and arguments from various theoretical traditions in international relations. Topics are drawn from the ongoing debate between the realist and liberal schools of thought, as well as the challenges posed by radical, normative, and critical international relations theory. Theories will be examined mainly for their insights on issues of war and peace. Expected preparation: PS 441.
Also offered for graduate-level credit as PS 542 and may be taken only once for credit.

PS 444 - National Security Strategy: Regional Perspectives (4)
Focuses on the regional contexts that influence U.S. national security strategy and the multifaceted reasons security policies succeed or fail in each region of the world. Critical analysis applied to major social, cultural, political, economic, military, technological, and historical issues that shape formation of regional security strategy, and to strategic assessments of U.S. security policies as perceived from other regions' perspectives. Expected preparation: PS 205.
Also offered for graduate-level credit as PS 544 and may be taken only once for credit.

PS 446 - National and International Security Policies (4)
A comparison of national and international security systems, strategies, and policies. Emphasis will be on the current issues arising in these security systems and on the problems that arise when their needs conflict. Particular emphasis will be placed on contending theories of national and international security. Expected preparation: PS 205 or PS 441.
Also offered for graduate-level credit as PS 546 and may be taken only once for credit.

PS 447 - International Organization (4)
The nature and extent of the organization of interaction among nations. Focus on the United Nations, but illustrations and generalization from a wide range of regional and functional organizations including the specialized agencies. Emphasis is on the processes of communication, interaction, and negotiation within the organizational environment.
Also offered for graduate-level credit as PS 547 and may be taken only once for credit.

PS 448 - International Law (4)
Introduction to public international law. Particular emphasis is placed on the interplay of politics and law in the international system. Types of law, sources of law, law creating agencies, law applying agencies are considered. Contemporary substantive issues in international law will be discussed. Expected preparation: PS 205 or PS 441.
Also offered for graduate-level credit as PS 548 and may be taken only once for credit.

PS 449 - International Environmental Politics and Law (4)
Explores various environmental problems and issue areas that exist between and among nation-states. There will be an exploration of the political difficulties that impede solutions and the various pathways that may lead to environmental cooperation. There will also be a focus on the international legal regimes and international institutions designed to regulate environmental problems.
Also offered for graduate-level credit as PS 549 and may be taken only once for credit.

PS 445 - The European Union (4)
Focuses on how the EU has evolved since its beginnings in the 1950s, on its present-day organization and functions, and on how the member countries interact with one another in making EU policies for jointly regulating their internal economies and societies as well as their external policies, i.e., how the EU members also try to manage their relations with the rest of the world. This is the same course as Intl 452 and may be taken only once for credit.
Also offered for graduate-level credit as PS 552 and may be taken only once for credit. Cross-Listed as: Intl 452.

PS 454 - International Political Economy (4)
A study of the contending theories of international political economy: power and interdependence, Regime Theory, dependency, integration, and functionalism, as well as the ideologies of political economy-the liberal, national, and Marxist perspectives. Also considered are the politics of trade, aid, and investment. Expected preparation: PS 205 or PS 441.
Also offered for graduate-level credit as PS 554 and may be taken only once for credit.

PS 455 - Politics of Economic Reform in Emerging Market Countries (4)
Explores the process of economic reform in a comparative and international setting by focusing on emerging market countries (e.g., Argentina, Brazil, Mexico, Indonesia, Poland, Turkey, and Thailand). Designed to give a more in-depth analysis of reform policies for the students. Expected preparation: PS 454/554.
Also offered for graduate-level credit as PS 555 and may be taken only once for credit.

**PS 460 - Political Development in Modern Turkey (4)**

Designed to provide students with an in-depth study of political development literature with a focus on modern Turkey. Examines how modern Turkish republic emerged from the ashes of the Ottoman Empire and evaluate stages of political development during the first, second, and third republic. Finally, assesses the implications of Turkey’s new geopolitics (since the end of the Cold War) on Turkish political and economic development in a global perspective.

Also offered for graduate-level credit as PS 560 and may be taken only once for credit. Cross-listed as:

This course is the same as Intl 460 and may only be taken once for credit.

**PS 461 - Politics of Economic Reform in Modern Turkey (4)**

This course is designed to provide students with an in-depth study of political development literature with a focus on modern Turkey. We will examine how modern Turkish republic emerged from the ashes of the Ottoman Empire and evaluate stages of economic development during the first, second, and third republic. Finally, we will assess the implications of Turkey’s new geopolitics (since the end of the Cold War) on Turkish economic development in a global perspective. This is the same course as Intl 461 and may be taken only once for credit.

Also offered for graduate-level credit as PS 561 and may be taken only once for credit. Cross-listed as: Intl 461.

**PS 462 - International Relations of the Middle East (4)**

Examination of the external dimension of Middle East politics; the role of the great powers; brief analysis of the British and French roles since 1945; extended analysis of American and Soviet/Russian policy in the Middle East. Special attention will be given to new patterns of international relations in the Middle East in the post-Cold War, post-Gulf War era. Expected preparation: PS 361.

Also offered for graduate-level credit as PS 562 and may be taken only once for credit.

**PS 466 - Politics of China (4)**

A survey of the historical, institutional, and social roots of contemporary politics in China as well as a consideration of several public policy areas.

Also offered for graduate-level credit as PS 566 and may be taken only once for credit.

**PS 468 - International Politics of East Asia (4)**

Examination of the foreign policy motives, objectives, and systems of the major East Asian states: China, Japan, and Korea. Attention is paid in particular to the political economy of regional and extra-regional relationships.

Also offered for graduate-level credit as PS 568 and may be taken only once for credit.

**PS 470 - Theories of Comparative Politics (4)**

Examines the evolution of the theories and methods of comparative politics, addressing both the recent history of the discipline and the current state of its practices. Topics include: the behavioral revolution, political development, the role of state, the new institutionalism, and the state-in-society approaches. Expected preparation: PS 204.

Also offered for graduate-level credit as PS 570 and may be taken only once for credit.

**PS 471 - Gender & Politics: A Comparative Perspective (4)**

Examination of the role, progress, behavior, and power of women in politics using a comparative lens. Topics include the representation of women in government, the problems confronting female candidates, the behavior of women officeholders, and the gender gap in politics. Examines women in western democracies, as well as in communist states and developing nations. Individual countries are used as case studies. Expected preparation: PS 200 and junior standing.

Also offered for graduate-level credit as PS 571 and may be taken only once for credit.

**PS 472 - Democratization and Authoritarianism in the Middle East and North Africa (4)**

Introduction to theoretical, empirical, and methodological debates in the comparative and international relations of the Middle East. Examination of contemporary political, economic, and social topics, including institutions and regimes, political economy, women and politics, Israeli-Palestinian conflict, and regional and international affairs.

Also offered for graduate-level credit as PS 572 and may be taken only once for credit. Prerequisite: Upper-division standing.

**PS 473 - Government and Politics of Arab North Africa (4)**

Examines the domestic and international politics of Arab North Africa, including Morocco, the Moroccan/Western Sahara, Mauritania, Algeria, Tunisia, Libya, and Egypt. Topics include the history
of the region, political regimes and authoritarianism, the Arab spring, women’s rights, and U.S.-Maghrebi relations.

Also offered for graduate-level credit as PS 573 and may be taken only once for credit. Prerequisite: upper-division standing.

**PS 474 - Democracy and Development in Latin America (4)**

Examines issues of democracy and development in Latin America. It addresses such topics as the role of history, political culture, political leadership, political institutions, the state, the military, civil society, social classes, level of socio-economic development, and their relationship to the possibilities of success or failure for democracy in Latin America. The course examines specific cases such as Argentina, Brazil, Mexico, Chile, Peru, Venezuela, and Uruguay.

Expected preparation: PS 353.

Also offered for graduate-level credit as PS 574 and may be taken only once for credit.

**PS 475 - Comparative Political Parties and Elections (4)**

Parties and elections are crucial elements of governance in countries around the world. But while these institutions are omnipresent, there are differences in the power and behavior of political parties as well as in the function and outcome of legislative electoral systems. In this course, we examine those differences with a focus on representation, party survival, and electoral behavior, and perform in-depth case studies of elections in such countries as Germany, Russia, Japan, and Brazil.

Also offered for graduate-level credit as PS 575 and may be taken only once for credit. Prerequisite: Upper-division standing.

**PS 476 - Politics of Inequality in the United States (4)**

Examines three themes: 1) How and why did economic inequality explode in the U.S. in recent decades? This level of inequality is not inevitable. We look to American politics for answers. 2) How does economic inequality intersect with other forms of inequality (e.g., gender, race, and place)? and 3) What is to be done? Students will draw from their personal experiences with inequality via exercises and assignments.

Also offered for graduate-level credit as PS 576 and may be taken only once for credit. Prerequisite: Upper-division standing.

**PS 477 - Global Food Politics and Policy (4)**

Politics and policy of food production and consumption in both rich and poor nations. Review of competing policy arguments across issues relating to food security, markets and market access, and the environment and public health.

Also offered for graduate-level credit as PS 577 and may be taken only once for credit. Prerequisite: Upper-division standing or graduate standing.

**PS 478 - Comparative Democratic Institutions (4)**

Examines differences in how democratic governments are structured across the globe and what these differences mean for governing. Explores differences both among and between presidential, parliamentary, and semi-presidential political systems. Examines federal and unitary political structures, and the role of supreme courts. Field trip to observe alternative democratic system.

Also offered for graduate-level credit as PS 578 and may be taken only once for credit. Prerequisite: Upper-division standing.

**PS 479 - Transitions to Democracy (4)**

Comparative analysis of political systems which have experienced a transition from an authoritarian to a democratic regime. Attention is given to the conditions supportive of democratic transition and to the problems of maintaining democratic stability.

Expected preparation: PS 204.

Also offered for graduate-level credit as PS 579 and may be taken only once for credit.

**PS 481 - Democratic Theory (4)**

Critical examination of the principles of democratic politics, including important statements in the history of political thought and contemporary political theory. Issues discussed include participation, deliberation, electoral competition, constitutionalism, and the challenges of democratic legitimacy in the context of US institutions and increasing globalization.

Also offered for graduate-level credit as PS 581 and may be taken only once for credit. Prerequisite: Sophomore standing or higher.

**PS 482 - Liberalism and Its Critics (4)**

Critical examination of the theory and practice of liberalism as an ongoing tradition. The basic elements of liberalism are identified and discussed and criticisms of the liberal tradition, as offered by communitarians, classical republicans, feminists, and postmodernists, are examined. Liberal responses to these criticisms are also explored. Expected preparation: PS 381.

Also offered for graduate-level credit as PS 582 and may be taken only once for credit.
PS 483 - Justice in the Modern World (4)
Critical analysis of the nature and meaning of social justice. Special attention is given to liberal theories of justice, questions of distributive justice, justice and the rule of law, inter-generational justice, and political alternatives to the liberal vision of social justice. Expected preparation: PS 381.
Also offered for graduate-level credit as PS 583 and may be taken only once for credit.

PS 486 - American Political Thought: 1600 to 1820 (4)
The development from 1600 to 1820 of American political thought about government and its proper relation to the individual and society. Specific topics considered include the English background; the colonial mind; ideas informing the revolution; the creation of the Constitution; and the ratification debates; the Jeffersonian and Hamiltonian conflict; John Marshall and the expansion of national power. Attention given to bringing to the surface the fundamental, often inarticulate, patterns, and presuppositions of American thought about political things.
Also offered for graduate-level credit as PS 586 and may be taken only once for credit.

PS 487 - American Political Culture: 1820 to the Present (4)
The development from 1820 to the present of American political thought about government and its proper relation to life, liberty, property and the pursuit of happiness. Topics considered include democratization and the Jacksonian period, slavery, and the nature of the Union, Social Darwinism and industrialization, the progressive period, the coming of the welfare state, and contemporary concerns. Attention given to bringing to the surface the fundamental, often inarticulate, patterns, and presuppositions of American thought about political things.
Also offered for graduate-level credit as PS 587 and may be taken only once for credit.

PS 491 - Testing Theories in Political Science (4)
Survey of the most common methods used to evaluate empirical questions in political science research and assess the adequacy of theories. The course prepares students to interpret, critique, design, and conduct social scientific analysis. It examines both qualitative and quantitative methodologies, including case study, content analysis, interviewing, surveys, participant observation, field experiments, and statistical analysis.
Also offered for graduate-level credit as PS 591 and may be taken only once for credit. Prerequisite: Upper division standing or permission of instructor.

PS 493 - Philosophy of the Social Sciences (4)
An analysis of the practical challenges and competing approaches to the practice of social science, especially political science. Subjects considered include the aims of social science, concepts and description, causality, rationality, macro and micro explanations, interpretation, and postmodernism.
Also offered for graduate-level credit as PS 593 and may be taken only once for credit.

PS 495 - Topics in Specialized Research Methods for Political Science (4)
An examination of a specialized methodological approach and/or technique for interpreting and conducting empirical political science research. Each quarter will offer in-depth coverage of a single topic; topics will vary from quarter to quarter dependent on student interests and instructor specialty. Sample topics include: network analysis, survey research, qualitative methods, formal modeling, maximum likelihood estimation, or usage of specific statistical software applications. Expected preparation: Mth 243, Mth 244, and/or PS 491. This course may be repeated for credit with different topics.
Also offered for graduate-level credit as PS 595. Prerequisite: Upper-division standing.

PS 501 - Research (1-9)
(Credit to be arranged.) Consent of instructor.

PS 502 - (1-9)

PS 503 - Thesis (1-9)
(Credit to be arranged.) Pass/no pass option.

PS 504 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

PS 505 - Reading and Conference (1-12)
(Credit to be arranged.)

PS 506 - Special Problems (1-12)
(Credit to be arranged.)
PS 507 - Seminar (1-6)
(Credit to be arranged.) Reading and discussion about an area of political science, with a research project required. Enrollment limited.

PS 509 - Practicum (1-9)
(Credit to be arranged.) Consent of instructor.

PS 510 - Selected Topics (1-6)
(Credit to be arranged.) Consent of instructor.

PS 511 - Advanced Overview of Political Science (4)
An advanced overview of the four established fields of research in political science: American, Comparative, International Relations, and Political Theory, and faculty sub-areas of expertise.
Also offered for undergraduate-level credit as PS 411 and may be taken only once for credit.

PS 512 - The Presidency (4)
Analysis of the institution, functions, and problems of the presidency. Special attention given to presidential elections, presidential powers, relations with media, presidential leadership. White House staff, executive-legislative relations, and the presidential role in domestic, economic, foreign policy making and execution.
Also offered for undergraduate-level credit as PS 412 and may be taken only once for credit.

PS 513 - Congress (4)
Study of the structure, organization, powers and operations of Congress. Topics covered include: the evolution of Congress, congressional recruitment and elections, legislative functions, the membership, the leaders, the committee system, the rules and procedures, executive-legislative relations, pressure groups, lobbying, and reform.
Also offered for undergraduate-level credit as PS 413 and may be taken only once for credit.

PS 514 - Issues in Public Policy (4)
A study of selected major policies and programs of governmental regulation and service. Emphasis is placed upon the formation, administration, and substantive content of policies in such areas as transportation, public utility regulation, medical care, civil rights, education, agriculture, natural resources, and antitrust laws and the preservation of competition.

PS 515 - Comparative Public Policy (4)
Introduction to theories, methods, and cases in comparative public policy. Emphasis on policy learning and applied comparative policy analysis. Unique and shared characteristics of policies in different countries or regions. Topics may include welfare and environmental policy.
Also offered for undergraduate-level credit as PS 415 and may be taken only once for credit.

PS 516 - Political Parties and Elections (4)
An examination of political parties and elections in America. Covers such topics as: the changing role of party organizations, machine politics, electoral rules, candidate recruitment, the nomination process, campaign strategies and tactics, campaign finance, and electoral reform.
Also offered for undergraduate-level credit as PS 416 and may be taken only once for credit.

PS 517 - Interest Groups (4)
This course analyzes the role of interest groups in the political process. Particular attention is given to why some interests are more successful at forming groups and influencing politics than others. The course also examines techniques used to lobby legislatures, the executive branch, and the courts.
Also offered for undergraduate-level credit as PS 417 and may be taken only once for credit.

PS 518 - Contemporary Political Protest in America (4)
Analyzes the role of social movements in recent American history. The course blends theoretical readings with empirical research into specific movements. Movements considered include but are not limited to: civil rights, the new left, public interest reform, the freeze movement, the women's movement, the Christian Right, and the paramilitary/skinhead movement.
Also offered for undergraduate-level credit as PS 418 and may be taken only once for credit.

PS 519 - Political Reform (4)
Examines the concerns that drive the demand for political reform in America, and how specific reform proposals may affect the political system. The first part of the course focuses on a variety of proposals to open up the electoral system and to improve representation. The second part examines various reforms that are designed to make the government work more effectively and efficiently.
Also offered for undergraduate-level credit as PS 419 and may be taken only once for credit.

**PS 520 - Seminar on American Political Institutions (4)**
Introduction to the field of American Politics, with a particular focus on American political institutions and their respective sub-fields within the discipline of political science.

**PS 521 - The Supreme Court and American Politics (4)**
Uses selective case law in order to explore the place of the Supreme Court in America's constitutional structure and its interpretation of the relationship between the branches of federal government. Examines the way the Court forms and shapes policy through constitutional interpretation, and the way political forces and influences shape Court practices, judicial selection, and the decision-making process.
Also offered for undergraduate-level credit as PS 421 and may be taken only once for credit.

**PS 522 - Constitutional Law (4)**
A study of the way in which the Supreme Court has shaped and influenced governmental structure and political power. Special attention is given to judicial decisions in the areas of federalism, separation of powers, the commerce clause, and the authority of the presidency.
Also offered for undergraduate-level credit as PS 422 and may be taken only once for credit.

**PS 523 - Civil Liberties (4)**
A study of Supreme Court decisions that affect individual rights and liberties. Areas of concentration include, but are not limited to, freedom of speech and press, religious liberty, criminal justice, racial justice, gender justice, and the right to privacy.
Also offered for undergraduate-level credit as PS 423 and may be taken only once for credit.

**PS 524 - Law, Politics, and Society (4)**
Examines connection between law and the society which creates and enforces it. Law will be studied from bottom up rather than top down. Emphasis is placed on what law is, how people use law, including whether access to law is equal, and how the state exercises power through law.
Also offered for undergraduate-level credit as PS 424 and may be taken only once for credit.

**PS 525 - Women and the Law (4)**
Examines the relationship between women and the law. The first half of the course considers several theories of women's equality. During the second half of the course students will apply these theories to a variety of problems in gender justice. Substantive issues covered may include: sexual harassment, abortion, fetal protection policies, and pornography.
Also offered for undergraduate-level credit as PS 425 and may be taken only once for credit.

**PS 526 - The Politics of the News (4)**
Explores the role of the news media in political life and the political and economic forces shaping the news. Examines the purposes and functions of mass media in a democracy, the legal and economic structure of the American media, and the journalistic practices and communications strategies that contribute to news coverage of politics.
Also offered for undergraduate-level credit as PS 426 and may be taken only once for credit.

**PS 527 - The Politics of Public Opinion (4)**
Course provides students with solid foundations for understanding the nature and evaluating the role of public opinion in American democracy. It will also teach students how to interpret public opinion polls intelligently. Specific topics covered will include how "public opinion" has been defined historically and in contemporary discourse; the various influences that shape peoples' values, beliefs, and attitudes about politics; the methods that pollsters and survey researchers use to measure public opinion and problems with those methods; and the content of Americans' views on controversial political issues.
Also offered for undergraduate-level credit as PS 427 and may be taken only once for credit.

**PS 528 - The Politics of Law and Order (4)**
As American crime control policies have become increasingly punitive, the criminal justice system has expanded in size and scope, crime control has become increasingly federalized, and record numbers of Americans have been incarcerated. Class explores what is political about crime control and why American crime policy takes on a particularly punitive cast. In particular, carefully examines the social construction of the crime problem: how popular beliefs about criminals and the causes of crime interact with the media and the political system to create a style of crime policy that is uniquely American.
Also offered for undergraduate-level credit as PS 428 and may be taken only once for credit.
PS 529 - American Immigration Politics & Policy (4)
Exploration of American immigration politics over time and into the current era.
Also offered for undergraduate-level credit as PS 429 and may be taken only once for credit.

PS 530 - Proseminar in International Relations (4)
Graduate seminar surveys the main theoretical and analytical approaches encountered in the study of international relations. Themes include the grand theoretical traditions of liberalism, realism, and radicalism; analytical and methodological perspectives, like behaviorism and rational choice theory; as well as the normative, critical, and postmodern challenges to the mainstream.

PS 531 - State and Local Politics (4)
Intensive examination of the role of the states and cities in the federal system. The course pays particular attention to the importance of political culture in shaping state politics and power relationships between the different levels and branches of government. Oregon's political experiences are used as example and for comparison.
Also offered for undergraduate-level credit as PS 431 and may be taken only once for credit.

PS 535 - Disasters and Public Policy (4)
The political, administrative, and public policy issues surrounding major and catastrophic risks and disasters including both natural (earthquakes, pandemics, asteroids) and man-made (climate change, nuclear weapons, bio-terrorism) events.
Also offered for undergraduate-level credit as PS 435 and may be taken only once for credit.

PS 542 - Contemporary Theories of World Politics (4)
Surveys concepts and arguments from various theoretical traditions in international relations. Topics are drawn from the ongoing debate between the realist and liberal schools of thought, as well as the challenges posed by radical, normative, and critical international relations theory. Theories will be examined mainly for their insights on issues of war and peace.
Also offered for undergraduate-level credit as PS 442 and may be taken only once for credit.

PS 543 - Resolving International Conflicts (4)
A seminar that explores different kinds of international disputes and actual conflicts in order to identify and assess theories, analytical frameworks, and methods of conflict resolution, management, and prevention. Emphasis is on understanding the roots of conflicts and techniques that may be appropriate to different levels and dimensions of conflict.

PS 544 - National Security Strategy: Regional Perspectives (4)
Focuses on the regional contexts that influence U.S. national security strategy and the multifaceted reasons security policies succeed or fail in each region of the world. Critical analysis is applied to major social, cultural, political, economic, military, technological, and historical issues that shape formation of regional security strategy, and to strategic assessments of U.S. security policies as perceived from other regions' perspectives.
Also offered for undergraduate-level credit as PS 444 and may be taken only once for credit.

PS 545 - American Foreign Policy (4)
Contemporary foreign relations of the United States; objectives, world, and domestic factors affecting American foreign policy; governmental institutions concerned with development and execution of foreign policy; major issues and problems.

PS 546 - National and International Security Policies (4)
A comparison of national and international security systems, strategies, and policies. Emphasis will be on the current issues arising in these security systems and on the problems that arise when their needs conflict. Particular emphasis will be placed on contending theories of national and international security.
Also offered for undergraduate-level credit as PS 446 and may be taken only once for credit.

PS 547 - International Organization (4)
The nature and extent of the organization of interaction among nations. Focus on the United Nations, but illustrations and generalization from a wide range of regional and functional organizations including the specialized agencies. Emphasis is on the processes of communication, interaction, and negotiation within the organizational environment.
Also offered for undergraduate-level credit as PS 447 and may be taken only once for credit.

PS 548 - International Law (4)
Introduction to public international law. Particular emphasis is placed on the interplay of politics and
law in the international system. Types of law, sources of law, law creating agencies, law applying agencies are considered. Contemporary substantive issues in international law will be discussed.

Also offered for undergraduate-level credit as PS 448 and may be taken only once for credit.

PS 549 - International Environmental Politics and Law (4)

Explores various environmental problems and issue areas that exist between and among nation-states. There will be an exploration of the political difficulties that impede solutions and the various pathways that may lead to environmental cooperation. There will also be a focus on the international legal regimes and international institutions designed to regulate environmental problems.

Also offered for undergraduate-level credit as PS 449 and may be taken only once for credit.

PS 552 - The European Union (4)

Focuses on how the EU has evolved since its beginnings in the 1950s, on its present-day organization and functions, and on how the member countries interact with one another in making EU policies for jointly regulating their internal economies and societies as well as their external policies, i.e., how the EU members also try to manage their relations with the rest of the world.

Also offered for undergraduate-level credit as PS 452 and may be taken only once for credit.

PS 553 - Power Transitions: Past, Present, and Future (4)

Uses power transition theory to examine what elements contribute to global war. Creates a foundation for understanding why nations fight, when they fight, the outcome of wars, and the relationship between global and regional conflicts. Also explores the continuum of peaceful interactions at the global level, and how and when the next series of upheavals will occur in the international system.

Also offered for undergraduate-level credit as PS 453 and may be taken only once for credit.

PS 554 - International Political Economy (4)

A study of the contending theories of international political economy: power and interdependence, Regime Theory, dependency, integration, and functionalism, as well as the ideologies of political economy: the liberal, national, and Marxist perspectives. Also considered are the politics of trade, aid, and investment.

Also offered for undergraduate-level credit as PS 454 and may be taken only once for credit.

PS 555 - Politics of Economic Reform in Emerging Market Countries (4)

Explores the process of economic reform in a comparative and international setting by focusing on emerging market countries (e.g., Argentina, Brazil, Mexico, Indonesia, Poland, Turkey, and Thailand). Designed to give a more in-depth analysis of reform policies for the students. Expected preparation: PS 554.

Also offered for undergraduate-level credit as PS 455 and may be taken only once for credit.

PS 556 - Advanced Political Economy (3)

Readings seminar provides a review of the literature in theories and selected issues in international political economy. Core requirement for graduate students in the PAP doctoral program and for master's students in political science who select international relations as their primary field of specialization.

PS 559 - Political and Economic Decision-making (3)

Examines the philosophical and conceptual assumptions embodied in alternative decision-making theories in the fields of economics and politics. Designed to show students the differences in individual and collective decision-making processes and the technical and social challenges faced in decision-making processes in the market place and the realm of politics. Examples cover local, national, and international policy topics. This course is the same as USP 636; can only be taken once for credit. Recommended prerequisite: USP 515/615.

Cross-Listed as: USP 636.

PS 560 - Political Development in Modern Turkey (4)

Designed to provide students with an in-depth study of political development literature with a focus on modern Turkey. Examines how modern Turkish republic emerged from the ashes of the Ottoman Empire and evaluate stages of political development during the first, second, and third republic. Finally, assesses the implications of Turkey’s new geopolitics (since the end of the Cold War) on Turkish political and economic development in a global perspective. This course is the same as Intl 560 and may be taken only once for credit.

Also offered for undergraduate-level credit as PS 460 and may be taken only once for credit. Cross-Listed as: Intl 560.
PS 561 - Politics of Economic Reform in Modern Turkey (4)

This course is designed to provide students with an in depth study of political development literature with a focus on modern Turkey. We will examine how modern Turkish republic emerged from the ashes of the Ottoman Empire and evaluate stages of economic development during the first, second, and third republic. Finally, we will assess the implications of Turkey's new geopolitics (since the end of the Cold War) on Turkish economic development in a global perspective. This course is the same as Intl 561 and may be taken only once for credit.

Also offered for undergraduate-level credit as PS 461 and may be taken only once for credit. Cross-Listed as: Intl 561.

PS 562 - International Relations of the Middle East (4)

Examination of the external dimension of Middle East politics; the role of the great powers; brief analysis of the British and French roles since 1945; extended analysis of American and Soviet/Russian policy in the Middle East. Special attention will be given to new patterns of international relations in the Middle East in the post-Cold War, post-Gulf War era.

Also offered for undergraduate-level credit as PS 462 and may be taken only once for credit.

PS 563 - Politics and Policy of the Middle East (4)

Examines conceptual debates in comparative politics and international relations of the Middle East. Focuses on state formation; authoritarian politics, political regimes, and institutions; public opinion, Islamist movements; gender and politics; political economy; the Israeli-Palestinian conflict, and regional and international relations of the greater Middle East.

PS 566 - Politics of China (4)

A survey of the historical, institutional, and social roots of contemporary politics in China as well as a consideration of several public policy areas.

Also offered for undergraduate-level credit as PS 466 and may be taken only once for credit.

PS 568 - International Politics of East Asia (4)

Examination of the foreign policy motives, objectives, and systems of the major East Asian states: China, Japan, and Korea. Attention is paid in particular to the political economy of regional and extra-regional relationships.
the Arab spring, women’s rights, and U.S.-Maghrebi relations.

Also offered for undergraduate-level credit as PS 473 and may be taken only once for credit.

**PS 574 - Democracy and Development in Latin America (4)**

Examine issues of democracy and development in Latin America. It addresses such topics as the role of history, political culture, political leadership, political institutions, the state, the military, civil society, social classes, level of socio-economic development, and their relationship to the possibilities of success or failure for democracy in Latin America. The course examines specific cases such as Argentina, Brazil, Mexico, Chile, Peru, Venezuela, and Uruguay.

Also offered for undergraduate-level credit as PS 474 and may be taken only once for credit.

**PS 575 - Comparative Political Parties and Elections (4)**

Parties and elections are crucial elements of governance in countries around the world. But while these institutions are omnipresent, there are differences in the power and behavior of political parties as well as in the function and outcome of legislative electoral systems. In this course, we examine those differences with a focus on representation, party survival, and electoral behavior, and perform in-depth case studies of elections in such countries as Germany, Russia, Japan, and Brazil.

Also offered for undergraduate-level credit as PS 475 and may be taken only once for credit.

**PS 576 - Politics of Inequality in the United States (4)**

Examines three themes: 1) How and why did economic inequality explode in the U.S. in recent decades? This level of inequality is not inevitable. We look to American politics for answers. 2) How does economic inequality intersect with other forms of inequality (e.g., gender, race, and place)? and 3) What is to be done? Students will draw from their personal experiences with inequality via exercises and assignments.

Also offered for undergraduate-level credit as PS 476 and may be taken only once for credit.

**PS 577 - Global Food Politics and Policy (4)**

Politics and policy of food production and consumption in both rich and poor nations. Review of competing policy arguments across issues relating to food security, markets and market access, and the environment and public health.

Also offered for undergraduate-level credit as PS 477 and may be taken only once for credit. Prerequisite: Upper-division standing or graduate standing.

**PS 578 - Comparative Democratic Institutions (4)**

Examine differences in how democratic governments are structured across the globe and what these differences mean for governing. Explores differences both among and between presidential, parliamentary, and semi-presidential political systems. Examines federal and unitary political structures, and the role of supreme courts. Field trip to observe alternative democratic system.

Also offered for undergraduate-level credit as PS 478 and may be taken only once for credit.

**PS 579 - Transitions to Democracy (4)**

Comparative analysis of political systems which have experienced a transition from authoritarian to a democratic regime. Attention is given to the conditions supportive of democratic transition and to the problems of maintaining democratic stability.

Also offered for undergraduate-level credit as PS 479 and may be taken only once for credit.

**PS 580 - Democratic Theory (4)**

Critical examination of the principles of democratic politics, including important statements in the history of political thought and contemporary political theory. Issues discussed include participation, deliberation, electoral competition, constitutionalism, and the challenges of democratic legitimacy in the context of US institutions and increasing globalization.

Also offered for undergraduate-level credit as PS 480 and may be taken only once for credit.

**PS 581 - Liberalism and Its Critics (4)**

Critical examination of the theory and practice of liberalism as an ongoing tradition. The basic elements of liberalism are identified and discussed and criticisms of the liberal tradition, as offered by communitarians, classical republicans, feminists, and postmodernists, are examined. Liberal responses to these criticisms are also explored.

Also offered for undergraduate-level credit as PS 481 and may be taken only once for credit.

**PS 582 - Justice in the Modern World (4)**

Critical analysis of the nature and meaning of social justice. Special attention is given to liberal theories of justice, questions of distributive justice, justice and the rule of law, inter-generational justice, and political alternatives to the liberal vision of social justice.
Also offered for undergraduate-level credit as PS 483 and may be taken only once for credit.

PS 586 - American Political Thought: 1600 to 1820 (4)
The development from 1600 to 1820 of American political thought about government and its proper relation to the individual and society. Specific topics considered include the English background; the colonial mind; ideas informing the revolution; the creation of the Constitution; and the ratification debates; the Jeffersonian and Hamiltonian conflict; John Marshall and the expansion of national power. Attention given to bringing to the surface the fundamental, often inarticulate, patterns, and presuppositions of American thought about political things.

Also offered for undergraduate-level credit as PS 486 and may be taken only once for credit.

PS 587 - American Political Culture: 1820 to the Present (4)
The development from 1820 to the present of American political thought about government and its proper relation to liberty, property and the pursuit of happiness. Topics considered include democratization and the Jacksonian period, slavery, and the nature of the Union. Social Darwinism and industrialization, the progressive period, the coming of the welfare state, and contemporary concerns. Attention given to bringing to the surface the fundamental, often inarticulate, patterns, and presuppositions of American thought about political things.

Also offered for undergraduate-level credit as PS 487 and may be taken only once for credit.

PS 588 - Political Scientist Professionalization (2)
This is a skill-building course that focuses on developing two sets of practical skills that all future political scientists working in academia will need: first, the skills necessary to create a top-quality application package that will get students into top-ranked Political Science PhD programs, and second, the skills to revise written work into an excellent writing sample or conference paper.

PS 589 - How to Teach and Present Social Science Research (2)
Focuses on the skills necessary for designing and teaching a political science course and delivering effective research presentations at conferences. Students will spend the first half of the course on teaching skills and the second half on building and workshop presentations, emphasizing skills such as public speaking, building effective slideshows and other visuals, and communicating research to audiences with mixed levels of expertise.

PS 590 - Introduction to Graduate School: Skills for Scholarly Success (1)
Welcomes students to the graduate environment and culture of academia. Designed for the first quarter of graduate study, this course focuses on developing essential skills for success in graduate level education, such as: how to read academic literature, note-taking and seminar norms, and understanding the prospectus requirement. Also teaches skills to navigate the often-competing demands on graduate students’ time, and develops the students’ academic toolkit which will serve them throughout their career.

PS 591 - Testing Theories in Political Science (4)
Survey of the most common methods used to evaluate empirical questions in political science research and assess the adequacy of theories. The course prepares students to interpret, critique, design, and conduct social scientific analysis. It examines both qualitative and quantitative methodologies, including case study, content analysis, interviewing, surveys, participant observation, field experiments, and statistical analysis. PS 591 is required for graduate students in the political science master’s program and should be taken after PS 594.

Also offered for undergraduate-level credit as PS 491 and may be taken only once for credit.

PS 593 - Philosophy of the Social Sciences (4)
An analysis of the practical challenges and competing approaches to the practice of social science, especially political science. Subjects considered include the aims of social science, concepts and description, causality, rationality, macro and micro explanations, interpretation, and postmodernism.

Also offered for undergraduate-level credit as PS 493 and may be taken only once for credit.

PS 594 - Research Design for Politics and Policy (4)
This course will introduce the logic of social science research and provide a brief overview of the various methods that are commonly used. The focus is on developing design skills that will help clarify research ideas, organize research design and research questions of interest to students.

Cross-Listed as: This is the same course as PAP 690 and may be taken only once for credit.
PS 595 - Topics in Specialized Research Methods for Political Science (4)
An examination of a specialized methodological approach and/or technique for interpreting and conducting empirical political science research. Each quarter will offer in-depth coverage of a single topic; topics will vary from quarter to quarter dependent on student interests and instructor specialty. Sample topics include: network analysis, survey research, qualitative methods, formal modeling, maximum likelihood estimation, or usage of specific statistical software applications. Expected preparation: Mth 243, Mth 244, and/or PS 491. This course may be repeated for credit with different topics.
Also offered for undergraduate-level credit as PS 495.

PS 605 - Reading and Conference (1-6)
(Credit to be arranged.)

PS 663 - Politics and Policy of the Middle East (4)
Examines conceptual debates in comparative politics and international relations of the Middle East. Focuses on state formation; authoritarian politics, political regimes, and institutions; public opinion, Islamist movements; gender and politics; political economy; the Israeli-Palestinian conflict, and regional and international relations of the greater Middle East.

Psy - Psychology

Psy 200 - Psychology as a Natural Science (4)
Covers the scientific foundations of human behavior in areas such as physiological and biological psychology, cognitive, moral, and emotional development, sensation and perception, consciousness, learning, thinking and memory. Also focuses on issues in experimental design and teaches students how to critically evaluate psychological research.

Psy 204 - Psychology as a Social Science (4)
Explores human individuality and the social context of behavior. Topics include intelligence, personality, motivation, social psychology, coping with stress, and psychological disorders. Describes theories and research findings in the context of social issues and introduces students to challenges of psychological measurement. Recommended as a first psychology course for both majors and nonmajors.

Psy 207 - Introduction to Applied Psychology (4)
A survey of selected applications of concepts and methodologies from the different areas of psychology such as experimental, industrial/organizational, social, and developmental. Recommended prerequisites: Psy 200, 204.

Psy 299 - Special Studies (1-4)
(Credit to be arranged.)
Prerequisite: Psy 204.

Psy 300U - Personal Decision Making (4)
How to make wiser decisions. Ways to think more creatively and more logically in making both everyday choices and major life decisions. Instruction and hands-on experience.

Psy 310U - Psychology of Women (4)
Review and evaluate assumptions underlying psychological research on women. Survey the research in areas such as the development of sex differences, acquisition of gender roles and maintenance of gender stereotypes. Explore the pertinence of these findings to topical areas such as women's work roles, women and mental health, and the women's movement. Recommended prerequisite: 4 credits in psychology.

Psy 311U - Human Development (4)
Development of the individual across the lifespan, from conception to death. Surveys the biological bases and social contexts of developmental processes (e.g., cognitive, social, emotional development). Implications of research for education, parenting/family relations, and social policy. Recommended prerequisites: Psy 200 and 204, or appropriate Sophomore Inquiry course.

Psy 315 - Careers in Psychology (4)
The course combines career considerations with exploration of multiple aspects of psychology as a discipline and their relevance to student futures. Exposure to faculty, graduate students and employers will help ground decisions about employment and graduate school, broadening perspective on what it is to be a knowledgeable, psychologically literate citizen.
Prerequisite: Psy 204.
Psy 317 - Personal and Social Adjustment (4)
Traces the course of normal adjustment with special interest in those factors which are instrumental in shaping human behavior. Concepts such as emotional maturity, psychological stress, and maladjustment are considered. Recommended prerequisite: 4 credits in 200-level psychology.

Psy 320 - Social Science Research Methods II (4)
Introduction and application of statistical modeling to psychological data. Guidance and practice in the interpretation and reporting of common statistical tests and software use. Topics include descriptive statistics, comparisons of means among groups, relations among variables, statistical model specification with multiple predictors, and the analysis of categorical data.
Prerequisite: Stat 243 or Soc 396.

Psy 321 - Research Methods in Psychology (4)
Study of methods for evaluating the quality of psychological measurements, including various concepts of reliability and validity, and item analysis techniques; common sources of invalidity in the interpretation of psychological data; strategies of selecting and analyzing observations which minimize these sources of invalidity. Recommended prerequisites: Stat 243, 244, and 4 credits in psychology.

Psy 340 - Principles of Behavior Analysis (4)
A course in the concepts of behavior analysis. Includes presentation of respondent and operant conditioning, extinction, response differentiation, schedules of reinforcement, shaping, escape and avoidance behavior, stimulus discrimination, punishment and similar concepts. The course is intended to provide the student with a thorough introduction to a developing technology of behavior.

Psy 342 - Social Psychology: Self, Attitudes and Social Influence (4)
Examination of psychological and sociological processes associated with people’s thoughts about and interactions with one another. Particular emphasis on self, social identity, social cognition, attitudes, prejudice and persuasion. Expected preparation: Soc 200, or Psy 200 or 204. Credit will not be given for both Soc 342 and Psy 342.

Psy 343 - Social Psychology: Social Relationships and Groups (4)
Examination of sociological and psychological processes associated with interpersonal, group, and inter-group behavior. Particular emphasis on aggression, pro-social behavior, interpersonal attraction, group influence, conflict and cooperation. Expected preparation: Soc 200, or Psy 200 or 204. Credit will not be given for both Soc 343 and Psy 343.

Psy 345 - Motivation (4)
A course on the causes for acquiring, choosing, or persisting in specific actions within specific circumstances. Students review the conditions, principles, and theories of motivation. Recommended prerequisite: Psy 200 or 204.

Psy 346 - Learning (4)
Conditions, principles, and theories of learning. Assessment of experimental methods and results in relation to current theory. Recommended prerequisite: 4 credits in 200-level psychology.

Psy 347 - Perception (4)
Introduction to the principles and theories of visual and auditory perception. Topics include sensory pathways, color perception, perceptual illusions, and the role of knowledge and cognitive factors in perception. Recommended prerequisite: Psy 200.

Psy 348 - Cognition (4)
Processes by which we form representations of reality, and strategies we use for manipulating those representations in order to explore possible actions and outcomes. Includes topics in perception, attention, memory, imagery, language, comprehension, problem solving, creative thinking, judgment, reasoning, and decision making. Recommended prerequisite: 4 credits in 200-level psychology.

Psy 350 - Counseling (4)
A survey of counseling and interviewing procedures, contributions of psychological theory to counseling techniques. Recommended prerequisite: 4 credits in 200-level psychology.
Psy 357 - Comparative Psychology (4)
A study of the behavioral differences and similarities within the phylogenetic scale. Emphasis is on the examination of the evolution of the behavior of individuals and species, paying particular attention to the basic concepts of psychology, such as sensation, perception, learning, and social processes. The role of animals in theories and as models for human behavior. Recommended prerequisite: 4 credits in 200-level psychology.

Psy 360 - Industrial/Organizational Psychology (4)
The scientific study of human behavior in work settings, covering the adjustments people make to the places they go, the people they meet, and the things they do in their occupational activities of all types. Recommended prerequisite: Psy 200 or 204.

Psy 361 - Industrial Psychology (4)
Overview of the scientific study of people in work settings, including job analysis, the measurement of individual differences for hiring and promoting workers, the assessment of employee performance through performance appraisal systems, and employee training. Course contains a substantial component focused on application through a community-based learning or class project.

Psy 362 - Organizational Psychology (4)
Overview of the scientific study of people in work settings, including work motivation, leadership, organizational change and development, group processes, work and family issues, stress, job attitudes, and occupational health psychology. Course contains a substantial component focused on applications such as community-based learning or class projects.

Psy 399 - Special Studies (1-6)
(Credit to be arranged.)

Psy 401 - Research (0-6)
(Credit to be arranged.) Consent of instructor.

Psy 402 - Independent Study (1-12)
(Credit to be arranged.)

Psy 404 - Cooperative Education/Internship (0-12)
(Credit to be arranged.)

Psy 405 - Reading and Conference (1-6)
(Credit to be arranged.) Consent of instructor.

Psy 406 - Special Projects (1-12)
(Credit to be arranged.)

Psy 407 - Seminar (1-6)
(Credit to be arranged.) Consent of instructor.

Psy 409 - Practicum (0-12)
(Credit to be arranged.) Supervised psychological practice including observing, studying, and participating in the activities of private settings or community service agencies such as schools, mental health clinics, correctional agencies, and day care centers. Supervision may include guided reading, daily journals, and evaluative reports.

Psy 410 - Selected Topics (1-6)
(Credit to be arranged.)

Psy 413 - Ecopsychology (4)
Course explores a range of topics regarding the human-nature relationship, including humans as an inseparable from nature, influences of built and natural environments on mind and behavior, psychological theory and strategies for addressing environmental problems, evolutionary and cultural factors, and the use of nature in therapy. Discussions, lecturettes, experiential, guest-speakers. Also offered for graduate-level credit as Psy 513 and may be taken only once for credit. Prerequisite: Psy 200, Psy 204, and Psy 321.

Psy 425 - Psychology of Black Manhood in America (4)
Examines the psychological underpinnings of the Black male experience in American culture; looks at the “invisibility syndrome” and the impact of discrimination on mental, emotional, and physical health. In addition, consideration will also be given to understanding the ways racism, medical neglect and malpractice, stereotypes, and various forms of trauma negatively impacts perceptions of self.
Psy 426 - Psychology of Stigma & Social Inequality (4)
Investigates the ways in which individuals perceive, respond to, perpetuate, and work to dismantle stigma and social inequality. We will delve into classic and contemporary work, touching on topics including: why do we stigmatize? How and why do we justify social inequality? How do stigma and social inequality affect our health, well-being, and interactions with others? We will also think deeply about how to apply our knowledge to current social issues and policy.
Prerequisite: Upper-division standing..

Psy 427 - History and Systems of Psychology (4)
A survey of the history of psychology and of past and current theoretical approaches in psychology. Study of the historical roots of current theories in perception, learning, motivation, personality and other fields. Expected preparation: Stat 243 and Stat 244, at least 18 credits in psychology, including Psy 321.
Also offered for graduate-level credit as Psy 527 and may be taken only once for credit.

Psy 428 - Diversity, Prejudice and Intergroup Relations (4)
Delves into social psychological research and theory on Prejudice, Diversity, and Intergroup Relations. From a social psychological perspective, it addresses both historical and contemporary perspectives on stereotyping, prejudice, and discrimination, including implicit bias, modern racism, social identity threats, and benevolent sexism. Example topics include the impact of prejudice in policing, education, work organizations, online mediums, and health care. The course also focuses on ways to reduce prejudice and counteract bias.
Prerequisite: Upper-division standing..

Psy 429 - The Psychology of Race & Gender in Sport (4)
Using a social psychological approach, this course will examine how issues of race and gender affect the sporting domain. Specifically, the course will emphasize how social psychological theories of intergroup relations, stereotyping, prejudice, and discrimination impact athletes, coaches, referees, and fans.
Prerequisite: upper-division standing..

Psy 430 - Applied Social Psychology (4)
Explores current and potential applications of social psychological theories and research methods, with a focus on work conducted in field settings. As a final project, each student examines an applied area of their own choosing (previous projects have focused on normative role transitions, responses to natural disasters, political attitudes, conflict resolution, and intergroup relations). Expected preparation: Stat 243 and Stat 244, Psy 321, Psy 342, or Psy 343.
Also offered for graduate-level credit as Psy 530 and may be taken only once for credit.

Psy 431U - Psychology of Men and Masculinities (4)
Reviews various social and personality theories that describe the psychology of men and the diverse forms and expressions of masculinity across cultures. Applies these theories to a wide range of issues in men’s lives, including emotions, health, work and family roles, sexuality, relationships, and violence.
Prerequisite: four credits in psychology.

Psy 432 - Personality (4)
Personality structure and theory. Recommended prerequisite: Stat 243 and 244, eight credits in psychology, including Psy 321.

Psy 433 - Introduction to Psychological Testing (4)
Covers theoretical and practical issues related to psychological tests used in educational, organizational, and clinical settings. Testing areas covered include intelligence, personality, values, interests, moral development, aptitudes and psychological disorders. Students will learn how to evaluate the quality of a psychological test and how to make informed choices about whether a test is appropriate for a particular setting. Recommended prerequisites: Psy 321 and Stat 243 and 244.

Psy 434 - Introduction to Psychopathology (4)
Course content will survey the development of modern ideas of mental illness, the origins of mental illnesses, the diagnostic system and the clinical syndromes, and methods of treatment of neuropsychiatric disorder. This course does not produce diagnosticians of mental illness but is a preparation for the clinical study of diagnosis. Expected preparation: Psy 200, Psy 204, Stat 243 and Stat 244, and at least 6 additional credits in psychology, including Psy 321.
Also offered for graduate-level credit as Psy 534 and may be taken only once for credit.
Psy 436 - Performance Appraisal and Feedback (4)

Applications of psychological concepts to the development of performance appraisal systems in organizations. Topics include job analysis, cognitive processes in performance appraisal, types of rating scales, rater training methods, technical aspects of developing a performance appraisal system, performance feedback, individuals' reactions to performance feedback factors related to the perceived accuracy of performance feedback. Recommended prerequisites: Stat 243 and 244, Psy 321 and 360 or 361.

Psy 440 - Group Process (4)

A course on the psychology of small groups. Topics will include but not be limited to: interpersonal attraction, stages of group development, group structure, coalition formation, personal power, leadership, group decision making and problem solving, intergroup relations and the principles of negotiation. Expected preparation: Stat 243 and Stat 244, Psy 321, graduate standing or consent of instructor.

Also offered for graduate-level credit as Psy 540 and may be taken only once for credit.

Psy 444 - Job Analysis (4)

Methods (e.g., interviews, surveys) used to collect information about jobs for use in human resource functions such as personnel recruitment and selection, training, performance appraisal, and compensation. Such information is also used to develop job descriptions and specifications. Course contains a community-based learning component. Students participate in a full job analysis including data collection, analysis, and interpretation. Expected preparation: Stat 243 and Stat 244; Psy 321 and Psy 360 or Psy 361; or comparable Business Administration courses.

Also offered for graduate-level credit as Psy 544 and may be taken only once for credit.

Psy 445 - Employee Development (4)

Covers the application of psychological principles to employee training and development. Topics include organization, job, and person analysis; program design; the application of learning principles to enhance training effectiveness; evaluation of training programs; and employee training and development methodology. A heavy emphasis is placed on current psychological research. This course may include a community-based learning component. Expected preparation: Stat 243 and Stat 244; Psy 321 and Psy 360 or Psy 361.

Psy 447 - Personnel Psychology (4)

How individual differences affect work behavior and task performance and how psychologists measure and predict such differences. Covers the development, administration, and utility of modern instruments for selection and appraisal. Data combination strategies and decision making in personnel systems are discussed. Expected preparation: Stat 243 and Stat 244, Psy 321 and Psy 360 or Psy 361.

Also offered for graduate-level credit as Psy 547 and may be taken only once for credit.

Psy 448 - Psychology of Work Motivation (4)

Examination of the role that motivation plays in initiating, guiding, and maintaining work behaviors. Discussion of job attitudes, emotional intelligence, personality factors, socialization and culture, effects of participation, careers, job enrichment, re-engineering, and power and politics. Expected preparation: Psy 321.

Also offered for graduate-level credit as Psy 548 and may be taken only once for credit.

Psy 449 - Survey of Human Factors (4)

An introduction to systems analysis concepts. An examination of the role of man and his interrelationships with complex man-machine systems. Topics include: man-machine systems, visual and auditory presentation of information, design of controls, layout of work places, effects of environment on human performance, and the physical limits of human performance. Recommended prerequisites: eight credits in psychology; Stat 243, 244, and Psy 321.

Psy 450 - Psychopharmacology (4)

How do drugs affect us? Discover the structure and function of the nervous system, techniques used to study drug actions and effects, and the specific molecular and behavioral influence of alcohol and other drugs, including opioids, psychostimulants, cannabinoids and psychedelics.

Prerequisite: Upper division standing.

Psy 451 - Introduction to Neurophysiological Psychology (4)

The study of the nervous system, various anatomical, neurophysiological, and imaging techniques for studying the brain and behavior, including specific cognitive abilities such as sensation, perception, attention, language, and emotion.
Also offered for graduate-level credit as Psy 551 and may be taken only once for credit. Prerequisite: Junior standing.

**Psy 452 - Advanced Neurophysiological Psychology (4)**

Explore current federally funded topics in neurophysiology, acquire skill in reading and presenting original research, visit the Oregon National Primate Research Center and learn alongside area graduate students and postdocs in neuroscience.

Prerequisite: Psy 347 or Psy 450 or Psy 451.

**Psy 454 - Experimental Psychology (5)**

Principles of experimental design, evaluation of research methods, formulation and testing of hypotheses using research procedures, use of statistical software for analyzing research data, writing a research manuscript using APA form.

Recommended prerequisites: at least 12 credits in psychology including Psy 321 and at least one of the following: Stat 243 and 244.

**Psy 455 - Experimental Psychology (4)**

Principles of experimental design, evaluation of research methods, formulation and testing of hypotheses using research procedures, use of statistical software for analyzing research data, writing a research manuscript using APA form.

Recommended prerequisites: at least 12 credits in psychology including Psy 321 and at least one of the following: Stat 243 and 244.

**Psy 458 - Development & Education of African-Diaspora Children & Youth (4)**

Explores development from childhood through emerging adulthood for persons in the African-diaspora using a sociocultural psychology perspective. Individual African-American children and youths' interactions with local, distal, and sociohistorical contexts will be discussed as sources of developmental trajectories. Special attention will be given to schooling as a developmental context and critical psychology perspectives.

Prerequisite: Upper-division standing.

**Psy 459 - Infant Development (4)**

Development of the individual from conception to age two. Theory and research pertaining to infant development.

**Psy 459U - Infant Development (4)**

Development of the individual from conception to age two. Theory and research pertaining to infant development.

Prerequisite: Upper-division standing.

**Psy 460 - Child Psychology (4)**

Also offered for graduate-level credit as Psy 560 and may be taken only once for credit.

**Psy 461U - Psychology of Adolescence and Early Maturity (4)**

Development of the individual from puberty to early adulthood. Theory and research pertaining to adolescent development.

Prerequisite: Upper-division standing.

**Psy 462 - Psychology of Adult Development and Aging (4)**

Development of the individual from early adulthood through old age. Theory and research focusing on adult development from a life-span perspective.

Expected preparation: Stat 243 and Stat 244, Psy 311 and Psy 321 plus one of the following: Psy 459, Psy 460, or Psy 461.

Also offered for graduate-level credit as Psy 562 and may be taken only once for credit.

**Psy 463 - Development and Education of Immigrant Children and Youth (4)**

This undergraduate seminar course will focus on the development and education of children and youth from immigrant backgrounds, primarily in the U.S.

The course readings are selected to be broad in scope but will focus on original scholarship and current research on the education and development of immigrant children and adolescents. The course will cover topics such as acculturation, ethnic identity, school experiences, and major sources of risk and resilience among children from immigrant backgrounds.

Prerequisite: Upper-division standing.

**Psy 464 - Developmental Psychopathology (4)**

Study of the origins and course of individual patterns of behavioral adaptation and maladaptation.

Application of developmental principles to an understanding of social, emotional, and conduct disorders of children and their outcome in adult life.

Expected preparation: Stat 243 and Stat 244, Psy 321
and Psy 434 plus 8 credits in courses numbered Psy 459-461.

Also offered for graduate-level credit as Psy 564 and may be taken only once for credit.

**Psy 465 - Applied Developmental Psychology (4)**

Theory, methods, and research in selected areas of applied developmental psychology. Expected preparation: Stat 243 and Stat 244, Psy 311 and Psy 321 and consent of instructor.

Also offered for graduate-level credit as Psy 565 and may be taken only once for credit.

**Psy 467 - Work and Family (4)**

An examination of the effects of work on family, and family on work, in contemporary society. Includes study of dual-career and dual-work families, effects of maternal employment on children, impact of child care and elder care on the workplace, and parental leave and other workplace supports for families. Implications of research for social policy. Expected preparation: Stat 243 and Stat 244, Psy 311 and Psy 321.

Also offered for graduate-level credit as Psy 567 and may be taken only once for credit.

**Psy 468 - Social Development (4)**

Development of individual's social relationships from infancy to adolescence. Theory and research pertaining to social development from an interactional perspective. Expected preparation: Stat 243 and Stat 244, Psy 311 and Psy 321 and one of the following: Psy 459, Psy 460, Psy 461, or Psy 462.

Also offered for graduate-level credit as Psy 568 and may be taken only once for credit.

**Psy 469 - Psychology of Human Sexuality (4)**

Explores questions relating to sexuality, with a particular emphasis on the psychological aspects of sex. We will discuss gender roles, gender identity, sexual orientation, relationships, sexual aggression, pornography, contraception, pregnancy, abortion, sexuality across the lifespan, and cultural influences that impact decisions we make about sex. This course is designed to increase awareness and sensitivity to sexuality and issues relating to it.

Prerequisite: Upper-division standing.

**Psy 470 - Diversity in the Workplace (4)**

Explores human diversity in workplace contexts, with an emphasis on the psychological aspects of diversity and management. We will first cover the psychology of diversity and inclusion and proceed to cover the perspectives of several different employee groups. We will also discover relevant theoretical and practical considerations concerning strategies for implementing effective diversity management policies and procedures.

Prerequisite: Upper-division standing.

**Psy 471 - Health Psychology (4)**

Study of the social and psychological influences on how people stay well, why some people become ill, and how persons respond to illness. Particular attention to the stress process. Expected preparation: Stat 243 and Stat 244, plus 12 credits in psychology, including Psy 321; Soc 200 may be substituted for 4 of these credits and PHE 223 may be substituted for 4 of these credits.

Also offered for graduate-level credit as Psy 571 and may be taken only once for credit.

**Psy 478 - Leadership and Group Effectiveness (4)**

Study of leadership in small groups with an emphasis on interpersonal influence processes. Leadership is viewed as statements or actions intended to influence a group's efforts toward goal setting and achievement. Includes discussion of leadership training/development, and self-awareness of style. Expected preparation: Psy 321.

Also offered for graduate-level credit as Psy 578 and may be taken only once for credit.

**Psy 479 - Women and Organizational Psychology (4)**

Examines the relationship between gender and work in different kinds of organizations across the economy. Focus is on the ways that gender influences such experiences as stress, hiring and career development, leadership opportunity, group interactions and organizational relationships, and the ways the greater understanding of gender/work interactions can influence individual experience and result in strategies for change. Recommended prerequisites: Stat 243 and Stat 244, Psy 310 and Psy 321.

**Psy 480 - Community Psychology: Empowerment, Action, and Social Change (4)**

Community Psychology seeks to understand the relationship between individual well-being and diverse environmental influences, from families and neighborhoods to culture and mass media. In this course, students will learn major theories and concepts in the field, apply them to pressing social issues, evaluate their implications for research, practice, and policy.
Also offered for graduate-level credit as Psy 580 and may be taken only once for credit. Prerequisite: upper-division standing.

**Psy 484 - Principles of Behavior Modification (4)**

A survey of recent developments in the application of behavior theory to problems of psychological adjustment. The course includes treatment of the behavioral concept of "abnormal", and the development of a technology of behavior therapy. The course is intended for advanced students in psychology, social work, special education, speech pathology, and nursing. Expected preparation: Psy 346.

Also offered for graduate-level credit as Psy 584 and may be taken only once for credit. Prerequisite: Psy 340.

**Psy 485 - Self-modification of Behavior (4)**

The technology of self-change developed within the framework of behavior modification theory, including relevant ethical and theoretical issues, specific techniques of change and the application of these techniques within a systematic program development model. Expected preparation: Psy 346.

Also offered for graduate-level credit as Psy 585 and may be taken only once for credit. Prerequisite: Psy 484.

**Psy 486 - Human Performance and Mental Workload (4)**

Introduction to mathematical and conceptual theories of how the human performs simple and complicated tasks. Topics include signal detection theory, information theory, reaction time, attention, effort. Measures and theories of mental workload will be discussed as well as what leads to cognitive overload and how it can be altered. Recommended prerequisites: Psy 321, Stat 243 and 244, and 12 credits of psychology.

**Psy 487 - Life-span Development (4)**

Theories and methodology for the study of processes and change in life-span developmental perspective. Practical implications of different perspectives for theories and research regarding human development. Expected preparation: Stat 243 and Stat 244, Psy 311 and Psy 321 plus 8 credits in courses numbered Psy 459, Psy 460, Psy 461, or Psy 462.

Also offered for graduate-level credit as Psy 587 and may be taken only once for credit.

**Psy 491 - Decision Making I: Values & Choice (4)**

Normative models, descriptive models, and cognitive aids for structuring decision problems, evaluating consequences of alternative courses of action, and choosing among alternatives. Prerequisite: Stat 243 and 244, Psy 321 and 348; or permission of instructor.

**Psy 492 - Decision Making II: Judgement and Reason (4)**

Contact the department for a description of this course.

**Psy 493 - Decision Making Laboratory (4)**

Practice in the use of judgment techniques and decision software to structure decision problems, evaluate alternative courses of action, perform sensitivity analyses, and prepare presentations. Wherever possible, practice will be on current decision problems in field settings. Expected preparation: Psy 491, Psy 492.

Also offered for graduate-level credit as Psy 593 and may be taken only once for credit.

**Psy 495 - Psychological Measurement (4)**

Development, validation, and applications of psychological tests. Students will learn about various types of psychological tests, the issues of reliability, validity, item analysis, and standardization of tests, and ethics in choosing and applying tests. There will be both lecture and lab portions required. Prerequisite: Stat 243 and 244, and Psy 321.

Also offered for graduate-level credit as Psy 595 and may be taken only once for credit.

**Psy 497 - Applied Survey Research (4)**

Provides theoretical framework for and experience in design, execution, and interpretation of social surveys including sampling procedures, questionnaire design, interviewing techniques, coding and computer analysis, and report writing. Expected preparation: Stat 243 and Stat 244, Psy 321.

Also offered for graduate-level credit as Psy 597 and may be taken only once for credit.

**Psy 498 - Field Observation Methods (4)**

Applied experience in the major methodological techniques of field observation, as well as the key problems of validity and reliability as they arise while developing a behavioral observation system. Expected preparation: Stat 243 and Stat 244, Psy 321, plus 12 upper-division credits in psychology.

Also offered for graduate-level credit as Psy 598 and may be taken only once for credit.

**Psy 501 - Research (0-9)**

(Credit to be arranged.) Consent of instructor.
Psy 502 - Independent Study (1-9)  
(Credit to be arranged.)

Psy 503 - Thesis (0-9)  
(Credit to be arranged.)

Psy 504 - Cooperative Education/Internship (0-9)  
(Credit to be arranged.)

Psy 505 - Reading and Conference (0-9)  
(Credit to be arranged.) Consent of instructor.

Psy 506 - Projects (1-9)  
(Credit to be arranged.)

Psy 507 - Seminar (1-6)  
(Credit to be arranged.) Consent of instructor.

Psy 509 - Practicum (0-9)  
(Credit to be arranged.) Supervised psychological practice including observing, studying, and participating in the activities of private settings or community service agencies such as: schools, mental health clinics, correctional agencies, and day care centers. Supervision may include guided reading, daily journals, and evaluative reports.

Psy 510 - Selected Topics (1-6)  
(Credit to be arranged.)

Psy 513 - Ecopsychology (4)  
Course explores a range of topics regarding the human-nature relationship, including humans as an inseparable from nature, influences of built and natural environments on mind and behavior, psychological theory and strategies for addressing environmental problems, evolutionary and cultural factors, and the use of nature in therapy. Discussions, lecturettes, experiential, guest-speakers.

Also offered for undergraduate-level credit as Psy 413 and may be taken only once for credit.

Prerequisite: Psy 200, Psy 204, and Psy 321.

Psy 514 - Advanced Applied Social Psychology (4)  
Theory, methods, and selected topics in advanced applied social psychology.

Also offered as Psy 614 and may be taken only once for credit.

Psy 515 - Advanced Applied Developmental Psychology (4)  
Theory, methods, and selected topics in advanced applied developmental psychology.

Also offered as Psy 615 and may be taken only once for credit.

Psy 516 - Advanced Organizational Psychology (4)  
Theory, methods, and selected topics in organizational psychology including leadership, motivation, job attitudes, job stress, organizational climate, and employee retention.

Also offered as Psy 616 and may be taken only once for credit.

Psy 517 - Advanced Industrial Psychology (4)  
Theory, methods, and selected topics in industrial psychology including job analysis, performance appraisal, personnel selection, legal issues, and training. Expected preparation: admission to Psychology graduate program.

Also offered as Psy 617 and may be taken only once for credit.

Psy 518 - Ethics and Professional Issues in Applied Research and Practice (4)  
Examines ethical issues of importance to applied psychologists with special attention to the use of human subjects in psychological research. Addresses ethical issues in professional relationships and in the teaching of psychology.

Also offered as Psy 618 and may be taken only once for credit.

Psy 519 - Field Experimental Methods (4)  
Problems of designing an experimental investigation of psychological phenomena in a naturalistic field setting. Course requirements include the design of a realistic research proposal. Extensive use is made of instructor experience with field experimental studies in the field of mental health.

Prerequisite: graduate status in psychology or urban studies.

Psy 520 - Methods of Psychological Assessment (4)  
Formulation of problems that can be answered by tests. Reliability, validity, and standardization of measurement, test fairness; methods of identifying
assessment tools (tests, etc.) appropriate to specific testing or assessment problems are also considered. Prerequisite: Stat 243.

**Psy 521 - Univariate Quantitative Methods (5)**
Survey of topics in univariate quantitative methods, including: graphical displays, descriptive statistics, statistical inference, group comparisons, analysis of variance for between group and factorial designs, correlation, regression, and analysis of association for categorical variables.

Also offered as Psy 621 and may be taken only once for credit.

**Psy 522 - Multiple Regression and Multivariate Quantitative Methods (5)**
Exploration of statistical methods with several variables, including: simultaneous and hierarchical regression, discriminant analysis, multivariate analysis of variance, analysis of covariance, and logistic regression. SPSS will be used for conducting analyses and students will gain experience in writing journal quality results and discussion sections.

Also offered as Psy 622 and may be taken only once for credit.

**Psy 523 - Structural Equation Modeling (4)**
Introduction to path analysis, confirmatory factor analysis, and structural equation modeling, topics include exploratory and confirmatory factor analysis, model fitting concepts, mediation, analysis of nonnormal and categorical data, and longitudinal models.

Also offered as Psy 623 and may be taken only once for credit.

**Psy 524 - Research Design in Applied Psychology (4)**
Process of exploring how key social/community, organizational, and developmental concepts shape the conceptualization and design of research in applied psychology. Students conceptualize and construct three alternative study designs employing the relevant concepts. Explore basic design issues such as control, causation, confounding, contrasts, and threats to validity; measurement; and the use of key concepts such as organizational context, social interactions, dynamics, levels of analysis, and systems in psychological theory and research.

Also offered as Psy 624 and may be taken only once for credit.

**Psy 525 - Categorical Data Analysis (4)**
Introduction to categorical data analyses. Topics include: review of discrete probability distributions and descriptive statistics, simple proportions and chi-square, contingency table analyses, matched pairs analyses, loglinear models, logistic and probit regression models, propensity scores, ordinal and multinomial logistic regression, generalized linear models, and categorical measurement issues.

Also offered as Psy 625. Prerequisite: Students should have at least one graduate statistics course covering chi-square, ANOVA, and regression analysis, such as Psy 521/Psy 621 and Psy 522/Psy 622.

**Psy 526 - Multilevel Regression (4)**
Multilevel regression models can be used to analyze hierarchically structured data, such as educational studies, and longitudinal data. Material is presented with an applied researcher's perspective in mind, covering fundamental concepts, basic mathematical and statistical underpinnings, and illustrations using computer software. Topics include: random coefficients, interclass correlation coefficient, explained variance, cross-level interactions, centering, model assumptions and diagnostics, binary and ordinal outcomes, and growth curve models. This course assumes prior knowledge about multiple regression analysis.

Prerequisite: Prerequisites: Psy 521/Psy 621 and Psy 522/Psy 622 or equivalent approved by instructor.

**Psy 527 - History and Systems of Psychology (4)**
A survey of the history of psychology and of past and current theoretical approaches in psychology. Study of the historical roots of current theories in perception, learning, motivation, personality and other fields.

Also offered for undergraduate-level credit as Psy 427 and may be taken only once for credit.

**Psy 528 - Seminar in Applied Developmental Psychology (4)**
Theory and research in selected topics in applied developmental psychology.

Also offered as Psy 628 and may be taken only once for credit.

**Psy 529 - Psychological Issues in Later Life (4)**
Methodological, theoretical and empirical issues in research on psychology and aging. Topics include cognitive processes, family and caregiving relationships, environmental issues and psychological predictors of successful aging. Emphasis is on encouraging students to develop their own research project in the field of psychology of aging.

Prerequisite: admission to a graduate program or Graduate Certificate in Gerontology program.
Psy 530 - Applied Social Psychology (4)
Explores current and potential applications of social psychological theories and research methods, with a focus on work conducted in field settings. As a final project, each student examines an applied area of their own choosing (previous projects have focused on normative role transitions, responses to natural disasters, political attitudes, conflict resolution, and intergroup relations).
Also offered for undergraduate-level credit as Psy 430 and may be taken only once for credit.

Psy 532 - Clinical Interviewing (4)
Introduction to principles and techniques of interviewing. Focus on clinical applications in organizational settings.

Psy 533 - Contemporary Social Psychology (4)
Current knowledge of social psychology presented with an emphasis on what the field can contribute to understanding contemporary social problems and issues. Major topics will include the nature of social interaction, the relationship of attitude and behavior, and group processes. Areas of application will include social helping networks and the relationships of social psychology to law, health, and the environment.
Prerequisite: admission to a graduate program in psychology, systems science, or urban affairs.

Psy 534 - Introduction to Psychopathology (4)
Course content will survey the development of modern ideas of mental illness, the origins of mental illnesses, the diagnostic system and the clinical syndromes, and methods of treatment of neuropsychiatric disorder. This course does not produce diagnosticians of mental illness but is a preparation for the clinical study of diagnosis.
Also offered for undergraduate-level credit as Psy 434 and may be taken only once for credit.

Psy 535 - Psychological Consulting in Organizations (4)
Psychologically-based theories and techniques aimed at the planned change of organizational work setting for the purpose of enhancing individual development and improving organizational performance. Issues in consultant-client relationships, specific change methods, and ramifications of guided change using the action research model are integrated throughout the course.

Psy 536 - Performance Appraisal and Feedback (4)
Applications of psychological concepts to the development of performance appraisal systems in organizations. Topics include job analysis, cognitive processes in performance appraisal, types of rating scales, rater training methods, technical aspects of developing a performance appraisal system, performance feedback, individuals' reactions to performance feedback factors related to the perceived accuracy of performance feedback. Recommended prerequisites: Stat 243 and 244, Psy 321 and 360 or 361.

Psy 537 - Qualitative Research Methods for Social Inquiry (4)
Introduction to qualitative research methods in psychology. Covers epistemology, research design, data collection techniques, narrative analysis, computer-aided analysis of text, qualitative research ethics, and writing/reporting of research. Includes field research project in the community.
Also offered as Psy 637 and may be taken only once for credit.

Psy 540 - Group Process (4)
A course on the psychology of small groups. Topics will include but not be limited to: interpersonal attraction, stages of group development, group structure, coalition formation, personal power, leadership, group decision making and problem solving, intergroup relations and the principles of negotiation. Expected preparation: graduate standing or consent of instructor.
Also offered for undergraduate-level credit as Psy 440 and may be taken only once for credit.

Psy 544 - Job Analysis (4)
Methods (e.g., interviews, surveys) used to collect information about jobs for use in human resource functions such as personnel recruitment and selection, training, performance appraisal, and compensation. Such information is also used to develop job descriptions and specifications. Course contains a community-based learning component. Students participate in a full job analysis including data collection, analysis, and interpretation.
Also offered for undergraduate-level credit as Psy 444 and may be taken only once for credit.

Psy 545 - Employee Development (4)
Covers the application of psychological principles to employee training and development. Topics include organization, job, and person analysis; program
design; the application of learning principles to enhance training effectiveness; evaluation of training programs; and employee training and development methodology. A heavy emphasis is placed on current psychological research. This course may include a community-based learning component.

Also offered for undergraduate-level credit as Psy 445 and may be taken only once for credit.

**Psy 546 - Personnel Selection (4)**

Technical and theoretical issues involved in selecting the appropriate worker to fit a job. Includes current research and theory in test development, test validation, selection methods, and criterion development. Heavy emphasis on psychological measurement (e.g., reliability and validity) and the legal issues involved in hiring and promoting employees.

Also offered as Psy 646 and may be taken only once for credit. Prerequisite: admission to the psychology graduate program.

**Psy 547 - Personnel Psychology (4)**

How individual differences affect work behavior and task performance and how psychologists measure and predict such differences. Covers the development, administration, and utility of modern instruments for selection and appraisal. Data combination strategies and decision making in personnel systems are discussed.

Also offered for undergraduate-level credit as Psy 447 and may be taken only once for credit.

**Psy 548 - Psychology of Work Motivation (4)**

Examination of the role that motivation plays in initiating, guiding, and maintaining work behaviors. Discussion of job attitudes, emotional intelligence, personality factors, socialization and culture, effects of participation, careers, job enrichment, re-engineering, and power and politics.

Also offered for undergraduate-level credit as Psy 448 and may be taken only once for credit.

**Psy 550 - Occupational Health Psychology (4)**

Application of professional psychological principles of practice, theory, and research to work settings. Focus on science and practice drawn from psychology and other disciplines in the promotion and development of workplace health- and safety-related initiatives. Occupational Health Psychology researchers and practitioners draw from the domains of public health, preventive medicine, nursing, industrial engineering, law, epidemiology, and psychology to develop sound theory and practice for protecting and promoting the safety, health, and well being of individuals in occupational settings.

Also offered as Psy 650 and may be taken only once for credit.

**Psy 551 - Introduction to Neurophysiological Psychology (4)**

The study of the nervous system, various anatomical, neurophysiological, and imaging techniques for studying the brain and behavior, including specific cognitive abilities such as sensation, perception, attention, language, and emotion.

Also offered for undergraduate-level credit as Psy 451 and may be taken only once for credit.

**Psy 554 - Social Psychology of Mental Health (4)**

Principles of experimental design, evaluation of research methods, formulation and testing of hypotheses using research procedures, use of statistical software for analyzing the research data, writing a research manuscript using APA form.

Also offered as Psy 654 and may be taken only once for credit.

**Psy 559 - Infant Development (4)**

Development of the individual from conception to age two. Theory and research pertaining to infant development.

**Psy 560 - Child Psychology (4)**

Development of the individual from conception through childhood. Theory and research pertaining to child development.

Also offered for undergraduate-level credit as Psy 460 and may be taken only once for credit.

**Psy 561 - Psychology of Adolescence and Early Maturity (4)**

Development of the individual from puberty to early adulthood. Theory and research pertaining to adolescent development.

**Psy 562 - Psychology of Adult Development and Aging (4)**

Development of the individual from early adulthood through old age. Theory and research focusing on adult development from a life-span perspective.

Also offered for undergraduate-level credit as Psy 462 and may be taken only once for credit.

**Psy 564 - Developmental Psychopathology (4)**

Study of the origins and course of individual patterns of behavioral adaptation and maladaptation. Application of developmental principles to an
understanding of social, emotional, and conduct disorders of children and their outcome in adult life. Also offered for undergraduate-level credit as Psy 464 and may be taken only once for credit.

Psy 565 - Applied Developmental Psychology (4)
Theory, methods, and research in selected areas of applied developmental psychology. Also offered for undergraduate-level credit as Psy 465 and may be taken only once for credit.

Psy 566 - Research in Applied Developmental Psychology (4)
Conducted in collaboration with an approved faculty research mentor. Research areas may include prosocial, social, cognitive, and motivational development, attachment, peer groups, parenting, teaching, early literacy, identity, aging, coping, self-system processes, and the social and cross-cultural contexts of development, including the family, schools, and day care. Involves data gathering, analysis, and/or reporting results of research conducted in a field setting. Emphasis on applied issues related to research design, data collection, data analysis, and scientific writing. Also offered as Psy 666 and may be taken only once for credit.

Psy 567 - Work and Family (4)
An examination of the effects of work on family, and family on work, in contemporary society. Includes study of dual-career and dual-work families, effects of maternal employment on children, impact of child care and elder care on the workplace, and parental leave and other workplace supports for families. Implications of research for social policy. Also offered for undergraduate-level credit as Psy 467 and may be taken only once for credit.

Psy 568 - Social Development (4)
Development of individual's social relationships from infancy to adolescence. Theory and research pertaining to social development from an interactional perspective. Also offered for undergraduate-level credit as Psy 468 and may be taken only once for credit.

Psy 569 - Research in Applied Social/Community Psychology (4)
Conducted in collaboration with an approved faculty research mentor. Research areas may include social relationships and health behaviors; social relationships and subjective well-being; community-based interventions; self-help groups; social psychological perspectives on social movements; gender issues; family violence; and prevention. Involves data gathering, analysis, and/or reporting results of research conducted in a field setting. Emphasis on applied issues related to research design, data collection, data analysis, and scientific writing. Also offered as Psy 669 and may be taken only once for credit.

Psy 571 - Health Psychology (4)
Study of the social and psychological influences on how people stay well, why some people become ill, and how persons respond to illness. Particular attention to the stress process. Also offered for undergraduate-level credit as Psy 471 and may be taken only once for credit.

Psy 578 - Leadership and Group Effectiveness (4)
Study of leadership in small groups with an emphasis on interpersonal influence processes. Leadership is viewed as statements or actions intended to influence a group's efforts toward goal setting and achievement. Includes discussion of leadership training/development, and self-awareness of style. Also offered for undergraduate-level credit as Psy 478 and may be taken only once for credit.

Psy 580 - Community Psychology: Empowerment, Action, and Social Change (4)
Community Psychology seeks to understand the relationship between individual well-being and diverse environmental influences, from families and neighborhoods to culture and mass media. In this course, students will learn major theories and concepts in the field, apply them to pressing social issues, evaluate their implications for research, practice, and policy. Also offered for undergraduate-level credit as Psy 480 and may be taken only once for credit.

Psy 584 - Principles of Behavior Modification (4)
A survey of recent developments in the application of behavior theory to problems of psychological adjustment. The course includes treatment of the behavioral concept of "abnormal", and the development of a technology of behavior therapy. The course is intended for advanced students in psychology, social work, special education, speech pathology, and nursing. Also offered for undergraduate-level credit as Psy 484 and may be taken only once for credit.

Psy 585 - Self-modification of Behavior (4)
The technology of self-change developed within the framework of behavior modification theory,
including relevant ethical and theoretical issues, specific techniques of change and the application of these techniques within a systematic program development model.

Also offered for undergraduate-level credit as Psy 485 and may be taken only once for credit.

**Psy 586 - Social Program Evaluation (4)**

Foundational concepts in social program evaluation theory and practice including theoretical perspectives on the nature and purpose of program evaluation, phases of program evaluation, ethics and standards of practice, sociopolitical considerations, and proposal and report writing. Expected preparation: Psy 521, Psy 522, Psy 524.

Also offered as Psy 686 and may be taken only once for credit.

**Psy 587 - Life-span Development (4)**

Theories and methodology for the study of processes and change in life-span developmental perspective. Practical implications of different perspectives for theories and research regarding human development.

Also offered for undergraduate-level credit as Psy 487 and may be taken only once for credit.

**Psy 589 - Adult Socialization (4)**

This course examines the acquisition of social roles in adulthood. Two themes prevail: stages of socialization; and levels of transmission of social norms (cultural, organizational, and interpersonal).

Also offered as Psy 689 and may be taken only once for credit. Prerequisite: graduate status.

**Psy 591 - Decision Making I: Values and Choice (4)**

Normative models, descriptive models, and cognitive aids for structuring decision problems, evaluating consequences of alternative courses of action, and choosing among alternatives.

Prerequisite: Stat 243 and 244, Psy 321 and 348; or permission of instructor.

**Psy 592 - Decision Making II: Judgement and Reason (4)**

Normative and descriptive models for structuring decision problems, evaluating consequences of alternative courses of action, thinking about probability and causation, and choosing among alternatives. Recommended prerequisites: Stat 243 and 244, Psy 321 and 348.

**Psy 593 - Decision Making Laboratory (4)**

Practice in the use of judgment techniques and decision software to structure decision problems, evaluate alternative courses of action, perform sensitivity analyses, and prepare presentations. Wherever possible, practice will be on current decision problems in field settings. Expected preparation: Psy 591, Psy 592.

Also offered for undergraduate-level credit as Psy 493 and may be taken only once for credit.

**Psy 594 - Mathematical Models in Psychology (4)**

Introduction to the use of probability theory and elementary functions in models for psychological processes; applications include decision analysis, psychophysics, and descriptive and theoretical applications of Markov chains in the study of learning and interpersonal interactions.

**Psy 595 - Psychological Measurement (4)**

Theories, methods, and implications in the development and validation of measures of psychological constructs. Students will learn about the issues of reliability, validity, item analysis, standardization, and applications of measures via both lectures and hands-on experiences in the lab.

Expected preparation: PSY521 or equivalent statistics/method courses.

Also offered as Psy 695 and may be taken only once for credit.

**Psy 597 - Applied Survey Research (4)**

Provides theoretical framework for and experience in design, execution, and interpretation of social surveys including sampling procedures, questionnaire design, interviewing techniques, coding and computer analysis, and report writing.

Also offered for undergraduate-level credit as Psy 497 and may be taken only once for credit.

**Psy 598 - Field Observation Methods (4)**

Applied experience in the major methodological techniques of field observation, as well as the key problems of validity and reliability as they arise while developing a behavioral observation system.

Also offered for undergraduate-level credit as Psy 498 and may be taken only once for credit.

**Psy 601 - Research (1-12)**

(Credit to be arranged.) Consent of instructor.
Psy 602 - Independent Study (1-9)
(Credit to be arranged.)

Psy 603 - Dissertation (1-12)
(Credit to be arranged.)

Psy 604 - Internship (1-9)
(Credit to be arranged.)

Psy 605 - Reading and Conference (1-6)
(Credit to be arranged.) Consent of instructor.

Psy 606 - Projects (1-9)
(Credit to be arranged.)

Psy 607 - Seminar (1-6)
(Credit to be arranged.) Consent of instructor.

Psy 608 - Workshop (1-9)
(Credit to be arranged.)

Psy 609 - Practicum (1-9)
(Credit to be arranged.)

Psy 610 - Selected Topics (1-6)
(Credit to be arranged.)

Psy 614 - Advanced Applied Social Psychology (4)
Theory, methods, and selected topics in advanced applied social psychology.
Also offered as Psy 514 and may be taken only once for credit.

Psy 615 - Advanced Applied Developmental Psychology (4)
Theory, methods, and selected topics in advanced applied developmental psychology.
Also offered as Psy 515 and may be taken only once for credit.

Psy 616 - Advanced Organizational Psychology (4)
Theory, methods, and selected topics in organizational psychology including leadership, motivation, job attitudes, job stress, organizational climate, and employee retention.
Also offered as Psy 516 and may be taken only once for credit.

Psy 617 - Advanced Applied Developmental Psychology (4)
Theory, methods, and selected topics in industrial psychology including job analysis, performance appraisal, personnel selection, legal issues, and training. Expected preparation: admission to Psychology graduate program.
Also offered as Psy 517 and may be taken only once for credit.

Psy 618 - Ethics and Professional Issues in Applied Research and Practice (4)
Examines ethical issues of importance to applied psychologists with special attention to the use of human subjects in psychological research. Addresses ethical issues in professional relationships and in the teaching of psychology.
Also offered as Psy 518 and may be taken only once for credit.

Psy 621 - Univariate Quantitative Methods (5)
Survey of topics in univariate quantitative methods, including: graphical displays, descriptive statistics, statistical inference, group comparisons, analysis of variance for between group and factorial designs, correlation, regression, and analysis of association for categorical variables.
Also offered as Psy 521 and may be taken only once for credit.

Psy 622 - Multiple Regression and Multivariate Quantitative Methods (5)
Exploration of statistical methods with several variables, including: simultaneous and hierarchical regression, discriminant analysis, multivariate analysis of variance, analysis of covariance, and logistic regression. SPSS will be used for conducting analyses and students will gain experience in writing journal quality results and discussion sections.
Also offered as Psy 522 and may be taken only once for credit.

Psy 623 - Structural Equation Modeling (4)
Introduction to path analysis, confirmatory factor analysis, and structural equation modeling. Topics include exploratory and confirmatory factor analysis, model fitting concepts, mediation, analysis of
nonnormal and categorical data, and longitudinal models.

Also offered as Psy 523 and may be taken only once for credit.

**Psy 624 - Research Design in Applied Psychology (4)**

Process of exploring how key social/community, organizational, and developmental concepts shape the conceptualization and design of research in applied psychology. Students conceptualize and construct three alternative study designs employing the relevant concepts. Explore basic design issues such as control, causation, confounding, contrasts, and threats to validity; measurement; and the use of key concepts such as organizational context, social interactions, dynamics, levels of analysis, and systems in psychological theory and research.

Also offered as Psy 524 and may be taken only once for credit.

**Psy 625 - Categorical Data Analysis (4)**

Introduction to categorical data analyses. Topics include: review of discrete probability distributions and descriptive statistics, simple proportions and chi-square, contingency table analyses, matched pairs analyses, loglinear models, logistic and probit regression models, propensity scores, ordinal and multinomial logistic regression, generalized linear models, and categorical measurement issues.

Also offered as Psy 525. Prerequisite: Students should have at least one graduate statistics course covering chi-square, ANOVA, and regression analysis, such as Psy 521/Psy 621 and Psy 522/Psy 622.

**Psy 626 - Multilevel Regression (4)**

Multilevel regression models can be used to analyze hierarchically structured data, such as educational studies, and longitudinal data. Material is presented with an applied researcher's perspective in mind, covering fundamental concepts, basic mathematical and statistical underpinnings, and illustrations using computer software. Topics include: random coefficients, interclass correlation coefficient, explained variance, cross-level interactions, centering, model assumptions and diagnostics, binary and ordinal outcomes, and growth curve models. This course assumes prior knowledge about multiple regression analysis.

Prerequisite: Prerequisites: Psy 521/Psy 621 and Psy 522/Psy 622 or equivalent approved by instructor.

**Psy 628 - Seminar in Applied Developmental Psychology (4)**

Theory and research in selected topics in applied developmental psychology.

Also offered as Psy 528 and may be taken only once for credit.

**Psy 629 - Psychological Issues in Later Life (4)**

Methodological, theoretical and empirical issues in research on psychology and aging. Topics include cognitive processes, family and caregiving relationships, environmental issues and psychological predictors of successful aging. Emphasis is on encouraging students to develop their own research project in the field of psychology of aging.

Prerequisite: admission to a graduate program or Graduate Certificate in Gerontology program.

**Psy 632 - Clinical Interviewing (4)**

Introduction to principles and techniques of interviewing. Focus on clinical applications in organizational settings.

**Psy 633 - Contemporary Social Psychology (4)**

Current knowledge of social psychology presented with an emphasis on what the field can contribute to understanding contemporary social problems and issues. Major topics will include the nature of social interaction, the relationship of attitude and behavior, and group processes. Areas of application will include social helping networks and the relationships of social psychology to law, health, and the environment.

Prerequisite: admission to a graduate program in psychology, systems science, or urban affairs.

**Psy 635 - Psychological Consulting in Organizations (4)**

Psychologically-based theories and techniques aimed at the planned change of organizational work setting for the purpose of enhancing individual development and improving organizational performance. Issues in consultant-client relationships, specific change methods, and system ramifications of guided change using the action research model are integrated throughout the course.

**Psy 637 - Qualitative Research Methods for Social Inquiry (4)**

Introduction to qualitative research methods in the social sciences. The course reviews epistemologies informing qualitative research. The course also
explores commonly used methods including field notes, interviews, focus groups, case studies, observational methods, and open-ended surveys. Introduction to various analysis and writing strategies will be explored. This is the same course as SW 637 and may be taken only once for credit.

Also offered as Psy 537 and may be taken only once for credit. Cross-Listed as: SW 637.

**Psy 646 - Personnel Selection (4)**

Technical and theoretical issues involved in selecting the appropriate worker to fit a job. Includes current research and theory in test development, test validation, selection methods, and criterion development. Heavy emphasis on psychological measurement (e.g., reliability and validity) and the legal issues involved in hiring and promoting employees.

Also offered as Psy 546 and may be taken only once for credit. Prerequisite: admission to the psychology graduate program.

**Psy 650 - Occupational Health Psychology (4)**

Application of professional psychological principles of practice, theory, and research to work settings. Focus on science and practice drawn from psychology and other disciplines in the promotion and development of workplace health- and safety-related initiatives. Occupational Health Psychology researchers and practitioners draw from the domains of public health, preventive medicine, nursing, industrial engineering, law, epidemiology, and psychology to develop sound theory and practice for protecting and promoting the safety, health, and well being of individuals in occupational settings.

Also offered as Psy 550 and may be taken only once for credit.

**Psy 654 - Social Psychology of Mental Health (4)**

Principles of experimental design, evaluation of research methods, formulation and testing of hypotheses using research procedures, use of statistical software for analyzing the research data, writing a research manuscript using APA form.

Also offered as Psy 554 and may be taken only once for credit.

**Psy 666 - Research in Applied Developmental Psychology (4)**

Conducted in collaboration with an approved faculty research mentor. Research areas may include prosocial, social, cognitive, and motivational development, attachment, peer groups, parenting, teaching, early literacy, identity, aging, coping, self-system processes, and the social and cross-cultural contexts of development, including the family, schools, and day care. Involves data gathering, analysis, and/or reporting results of research conducted in a field setting. Emphasis on applied issues related to research design, data collection, data analysis, and scientific writing.

Also offered as Psy 566 and may be taken only once for credit.

**Psy 669 - Research in Applied Social/Community Psychology (4)**

Conducted in collaboration with an approved faculty research mentor. Research areas may include social relationships and health behaviors; social relationships and subjective well-being; community-based interventions; self-help groups; social psychological perspectives on social movements; gender issues; family violence; and prevention. Involves data gathering, analysis, and/or reporting results of research conducted in a field setting. Emphasis on applied issues related to research design, data collection, data analysis, and scientific writing.

Also offered as Psy 569 and may be taken only once for credit.

**Psy 686 - Social Program Evaluation (4)**

Foundational concepts in social program evaluation theory and practice including theoretical perspectives on the nature and purpose of program evaluation, phases of program evaluation, ethics and standards of practice, sociopolitical considerations, and proposal and report writing. Expected preparation: Psy 621, Psy 622, Psy 624.

Also offered as Psy 586 and may be taken only once for credit.

**Psy 689 - Adult Socialization (4)**

This course examines the acquisition of social roles in adulthood. Two themes prevail: stages of socialization; and levels of transmission of social norms (cultural, organizational, and interpersonal).

Also offered as Psy 589 and may be taken only once for credit. Prerequisite: graduate status.

**Psy 695 - Psychological Measurement (4)**

Theories, methods, and implications in the development and validation of measures of psychological constructs. Students will learn about the issues of reliability, validity, item analysis, standardization, and applications of measures via both lectures and hands-on experiences in the lab. Expected preparation: Psy 621 or equivalent statistics/method courses.

Also offered as Psy 595 and may be taken only once for credit.
READ - READOregon

READ 509 - Practicum: ReadOregon (1-3)
The practicum is carried out in schools and/or districts and consists of reading endorsement candidates working directly with students, other faculty, administrators, and the school community to fulfill various roles of the reading specialist. Among the roles to be demonstrated during the practicum are: (1) teaching reading; (2) literacy testing; (3) developing curriculum for various groups of readers including ELL, struggling, readers, average and/or gifted readers; (4) assessing and making recommendations for a school's reading program; and (5) developing literacy-focused professional development sessions for faculty, administrators, instructional assistants, and parents.

Prerequisite: The practicum may not be taken until a candidate has completed a minimum of 12 credit hours of coursework in literacy. Typically, the practicum is the final capstone course of the reading endorsement course of study.

READ 518 - Language and Literacy Development, K-8 (3)
Examine the connection between early childhood oral language acquisition and the development of reading and writing skills. Discuss relevant language and literacy research, differences in language and literacy development, foundations of language development in the brain and its implication as regards phonological skills, grammatical knowledge, vocabulary, comprehension, and writing.

READ 519 - Linguistics, Phonics, and Word-Level Reading Difficulties (3)
Addresses phonetics, phonological awareness, phonics, word identification, and spelling. Explores developmental trajectories, instructional strategies, and assessment tools through culturally responsive and culturally sustaining pedagogical lenses. Includes characteristics associated with dyslexia, tools used to screen for such characteristics, instructional strategies designed to benefit students with these characteristics, and related laws/policies. Field-based work with K-12 reader exhibiting characteristics of dyslexia and with K-12 school to examine curriculum and interview teachers.

READ 522 - Literacy Foundations (3)
Focuses on the foundational areas of psychology, history, theory, and research, and familiarizes teachers and reading specialists with varied ideas about how reading and writing work and how they are learned, through the examination of major theorists and researchers, both present and past.

READ 527 - Literature in Classrooms K-12 (3)
This course focuses on the exploration of literature for students in grades K-12, and the application of literature in the classroom. Emphasis is on selection and evaluation of books, children’s reading interests, classroom applications and school leadership in promoting literature in classroom and school settings.

READ 530 - Reading and Composition in the Content Areas (3)
Designed for pre-service and in-service teachers to explore literacy strategies in order to guide their students in acquiring skills needed for adequate reading, writing, and study in content areas. Emphasis is on the functional teaching of reading and writing including designing and preparing materials to use with curriculum materials in all school subjects. Designed also to help educators identify and design materials to promote and develop Oregon’s Standard and Benchmark literacy abilities in their students.

READ 531 - Teaching the Struggling Adolescent Reader (3)
For middle and high school teachers who want to experience hands-on teaching and learning strategies for improving motivation and learning in the core subject areas. As part of a collaborative effort, teachers will work with each other to develop tutoring plans and activities in curriculum materials to be used in teaching struggling readers in their own classroom. Recommended prerequisites: enrollment in ReadOregon Reading Endorsement program or COE Literacy or master's program.

READ 532 - Writing Program Design and Implementation in K-12 Classrooms (3)
This course explores the design and implementation of writing curricula in both literacy and content-based classrooms. The course provides a comprehensive approach to the development of a writing classroom, including the designing writing strategies and assessment. In addition, the course explores the roles of inquiry, inclusion, and collaboration in the teaching of writing. The focus is on creating writing instruction and assessment that is authentic, engaging and aligned to the instructional needs of students.
READ 533 - Boy Readers/Boy Writers (3)
Critically analyze and implement research-based practices in reading and writing as they relate to boys’ learning style. Demonstrate appropriate professional knowledge, skills and dispositions through reading critical theory in instructional strategies that benefit boy’s needs. Use evidence to solve problems of practice and make educational decisions.

READ 534 - Literacy Assessment (3)
Examines purposes for and types of literacy assessment; how culture and language intersect with assessment. Addresses selection of specific assessments to guide instruction, using assessments to inform various stakeholders, evaluation of validity and reliability, assessment bias, stereotype threat, advocating for equity and asset-based practices with colleagues, schoolwide assessment plans, and analysis of current practices. Field-based work with K-12 school: participate in data analysis meeting, interview teachers, examine a literacy assessment tool and student assessment data.

READ 540 - Media Literacy: K-12 (1)
This course is concerned with helping K-12 teachers develop an informed and critical understanding of the nature of mass media, so that they can teach children how to build connections between their learning in the classroom and their use of media outside of school. Participants will develop abilities to access, analyze, evaluate, and communicate information in a variety of formats.

READ 544 - Comprehension, Text Structure, and Vocabulary (3)
Addresses learning, teaching, and assessing reading comprehension and vocabulary. Emphasis on culturally responsive and culturally sustaining instruction, students who are emergent multilinguals, and students experiencing difficulty with comprehension or vocabulary. Topics include developmental trajectories, morphology, historical instructional approaches, strategic reading, cultural variations in text structure, curricular analysis, digital tools, digital citizenship, and visual literacy. Field-based work with K-12 reader experiencing difficulty with comprehension or vocabulary.

READ 551 - Literacy Instruction for Special Needs Students K-12 (3)
Designed to prepare effective and reflective teachers in language and literacy instruction for students with special needs. Participants will explore multiple perspectives, practices, and methodological approaches to literacy instruction which are research-based, and proven effective to promote literacy development. Topics include (but are not limited to): (1) language and literacy development; (2) characteristics of special needs students; (3) framework of effective literacy instruction within context of students with special needs; (4) methods of effective basic literacy skills instruction; (5) methods of teaching comprehension and critical thinking strategies; (6) methods of promoting learning and meta-cognitive strategies for lifelong learning, and (7) methods of appropriate and meaningful assessment.

READ 554 - Literacy Instruction Strategies with ELL Students, K-12 (3)
Focuses on research-based effective literacy instruction frameworks and strategies for working with English language learners. Emphasis is placed on frameworks and strategies that promote ELL's academic and English literacy development in an authentic and culturally responsive environment.

READ 571 - Principles/Methods of Diagnosis and Assessment K-12 (3)
Literacy theory (review/overview of the psychological, sociological, and linguistic foundations of reading processes and instruction, including developmental stages of literacy). Psychometrics (the science of measurement in the social sciences). Measures of reading proficiency and reading achievement (with specific examples of standardized reading measures and discrete-point reading proficiency measures). Authentic literacy assessment (with specific examples of authentic reading assessment tasks). Literacy assessment and students with special needs (English language learners, students with learning disabilities, talented and gifted students). Test ethics and how assessment results are used (including communication with various stakeholders). Recommended prerequisites: enrollment in ReadOregon Reading Endorsement program or COE Literacy or master's program.
READ 580 - School Reading Program Leadership (3)
Designed for pre-service and practicing educators who are applying for a reading endorsement or MEd with a reading emphasis, as well as others interested in school leadership. Emphasis is on the functional planning, organization, and management of classroom and school-wide reading programs. Recommended prerequisites: Enrollment in ReadOregon Reading Endorsement program or COE Literacy or master's program.

READ 582 - Reading Leadership in Middle and High Schools (3)
Designed for administrators and teachers in leadership roles in middle and high schools. Explores ways to improve reading achievement in schools by identifying the school's existing strengths, applying current research and practice, and creating an action plan. Recommended prerequisites: enrollment in ReadOregon Reading Endorsement program or COE Literacy or master's program.

RE - Real Estate
RE 199 - Special Studies (1-8)
(Credit to be arranged.)

RE 360 - Real Estate Finance I (4)
Application of finance and economic principles to analysis of real estate finance and investments. Emphasis on the development of problem solving capabilities through the use of computer application programs. Special attention is given to risk analysis, alternative mortgage instruments, hedging techniques, and the tax effects of real estate investment.
Prerequisite: Ec 201. This course is cross listed as USP 360 and may only be taken once for credit.

RE 399 - Special Studies (1-8)
(Credit to be arranged.)

RE 401 - Research (1-12)
(Credit to be arranged.)

RE 404 - Cooperative Education/Internship (1-12)
(Credit to be arranged.)

RE 405 - Reading and Conference (1-8)
(Credit to be arranged.)

RE 407 - Seminar (1-8)
(Credit to be arranged.)

RE 409 - Practicum (1-8)
(Credit to be arranged.)

RE 410 - Selected Studies (1-8)
(Credit to be arranged.)

RE 431 - Urban Economics (4)
Functions of the urban economy: the market sector and the public sector. Economic analysis of issues such as land use, environmental quality, transportation, housing, income distribution, and the organization and financing of urban public services. This course is the same as Ec 431 and USP 431 and may only be taken once for credit.
Prerequisite: Ec 201, Ec 202 and junior standing. Cross-Listed as: Ec 431 and USP 431.

RE 438 - Real Estate Law I (3)
Provides students with a comprehensive summary of real property from a legal perspective with an emphasis on transactional issues. Includes issues relating to types of ownership, descriptions of property, easements, public and private limitations on use, real estate contracts, forms utilized in transfers, financing and title assurances. The class will enable students to understand the legal framework and the rights and responsibilities of owners and transferors/transferees of real property. This is the same course as USP 438 and may be taken only once for credit.
Also offered for graduate-level credit as RE 538S and may be taken only once for credit. Prerequisite: Ec 201. Cross-Listed as: USP 438.

RE 459 - Real Estate Valuation II (3)
Applies concepts from 439/539 to examine case studies in real estate appraisal and valuation. Topics include valuation for financial reporting, determining the highest and best use for a site, and determination of value following a property taking or condemnation.
Also offered for graduate-level credit as RE 559 and may be taken only once for credit. Prerequisite: RE 439 and Fin 319.

**RE 460 - Real Estate Finance II (4)**

**RE 501 - Research (1-12)**
(Credit to be arranged.)

**RE 504 - Cooperative Education/Internship (1-12)**
(Credit to be arranged.)

**RE 505 - Reading and Conference (1-8)**
(Credit to be arranged.)

**RE 507 - Seminar (1-8)**
(Credit to be arranged.)

**RE 509 - Practicum (1-8)**
(Credit to be arranged.)

**RE 510 - Selected Studies (1-8)**
(Credit to be arranged.)

**RE 510S - (1-8)**

**RE 521 - Real Estate Finance I (4)**
Introduces business finance within the context of commercial real estate. Concepts and techniques will include financial statements, analysis, and forecasting; present value and discounted cash flow analysis, an introduction to real estate valuation measurements; and analysis of performance risk versus return. Students also receive an overview of the legal definitions of real estate terminology, including title, contract, regulation, and financing issues, and case studies in real estate development. Expected preparation: Ec 201 and Ec 202.

**RE 522 - Real Estate Finance II (4)**
Application of finance and economic principles to analysis of real estate finance and investments. Emphasis on the development of problem solving capabilities through the use of computer application programs. Special attention given to risk analysis, alternative mortgage instruments, hedging techniques, and the tax effects of real estate investment.

Prerequisite: RE 521.

**RE 523 - Real Estate Investment Analytics (4)**
Students will learn financial approach to analyzing real estate investments, analyzing case studies of investment decisions, learning spreadsheet-based software for analyzing leases and income flows, and understanding the tax implications of real estate investment.

Prerequisite: RE 521 and RE 522 or permission of the instructor. RE 522 may be taken concurrently.

**RE 531 - Executive Perspectives on Real Estate (1)**
A series of presentations by local and regional leaders in the real estate industry highlighting issues in the development of their business and career opportunities in the real estate industry.

Prerequisite: admission to the Master of Real Estate Development program.

**RE 532 - Multifamily Property Management (4)**
Gives students an overview of multifamily property management, including operations, maintenance, management and leasing of various types of apartment communities. The course will cover fundamental components of the human resources function for apartment communities, an overview of accounting and budgeting skills needed to meet a property owners’ goals, fair housing laws, key components of a maintenance plan, and fundamental marketing tools and analysis for multifamily properties.

Also offered for undergraduate-level credit as Mgmt 432 and may be taken only once for credit. Cross-Listed as: This is the same course as RE 532S and may be taken only once for credit.

**RE 532S - Multifamily Property Management (4)**
Gives students an overview of multifamily property management, including operations, maintenance, management and leasing of various types of apartment communities. The course will cover
RE 533 - Commercial Property and Asset Management (4)
Explores management of different classes of commercial real estate including office, retail, and industrial assets. Students will gain an understanding of the following areas of commercial property and asset management: financial/budgeting, facility, management, and legal. Discussions will cover leasing strategies and ways to enhance building value. Students will learn how to reposition an asset to increase its value and how to best use technology to manage assets.

Also offered for undergraduate-level credit as Mgmt 433 and may be taken only once for credit. Cross-Listed as: This is the same course as RE 532 and may be taken only once for credit.

RE 533S - Commercial Property and Asset Management (4)
Explores management of different classes of commercial real estate including office, retail, and industrial as well as management of a portfolio of real estate assets. Students will gain an understanding of the following areas of commercial property and asset management: financial/budgeting, facility, management, and legal. Discussions will cover leasing strategies and ways to enhance building value. Students will learn how to reposition an asset to increase its value and how to best use technology to manage assets.

Also offered for undergraduate-level credit as Mgmt 433 and may be taken only once for credit. Cross-Listed as: This is the same course as RE 533 and may be taken only once for credit.

RE 538S - Real Estate Law I (3)
Provides students with a comprehensive understanding of real property from a legal perspective with an emphasis on transactional issues. Includes issues relating to types of ownership, descriptions of property, easements, public and private limitations on use, real estate contracts, forms utilized in transfers, financing and title assurances. The class will enable students to understand the legal framework and the rights and responsibilities of owners and transferors/transferees of real property. This is the same course as USP 538 and may be taken only once for credit. Expected preparation for graduate students: RE 521.

Also offered for undergraduate-level credit as RE 438 and may be taken only once for credit. Cross-Listed as: This is the same course as USP 538 and may be taken only once for credit.

RE 539 - Real Estate Valuation I (4)
Fundamentals of appraising real estate, focusing on valuation techniques for income-producing real estate assets. Analysis of income and expenses, net operating income, leveraged and unleveraged cash flows, debt coverage ratios, direct capitalization, multipliers, and discounted cash flows. Marketability analysis, highest and best use concepts, zoning, environmental issues, and the risks and rewards of real estate development are discussed.

Also offered for undergraduate-level credit as Fin 439 and may be taken only once for credit. Prerequisite: Fin 513 or Fin 551 or RE 521. Cross-Listed as: This is the same course as RE 539S and may be taken only once for credit.

RE 539S - Real Estate Valuation I (4)
Fundamentals of appraising real estate. Land utilization. Analysis of real estate values by approaches followed by governmental and private appraisers.

Also offered for undergraduate-level credit as Fin 439 and may be taken only once for credit. Prerequisite: Fin 513 or Fin 551 or RE 521. Cross-Listed as: This is the same course as RE 539 and may be taken only once for credit.

RE 548 - Real Estate Market Analysis (3)
A well-researched market study provides critical information that can make or break a development project. This course will provide students with the tools needed to evaluate trends and understand the key factors affecting real estate markets. The class will demonstrate where to get and analyze information on the demand for multifamily, hotel, office, industrial, and mixed-use developments. Expected preparation: RE 521 or USP 515.

RE 559 - Real Estate Valuation II (3)
Applies concepts from 439/539 to examine case studies in real estate appraisal and valuation. Topics include valuation for financial reporting, determining the highest and best use for a site, and determination
of value following a property taking or condemnation.
Also offered for undergraduate-level credit as RE 459 and may be taken only once for credit. Prerequisite: RE 539 and RE 521.

**RE 562 - Real Estate Development Workshop (4)**
Students form a real estate development team and produce an original development plan, including the development concept, the market analysis, the conceptual design, economic analysis capital and operations budget, and management plan. The student's plan will demonstrate mastery of the development concepts and tools learned through the previous courses.
Prerequisite: USP 546 or instructor's consent. Course may be taken twice for credit with instructor's consent.

**RE 573 - Real Estate Economics (4)**
Looks at the economics of real estate and housing, including land rent, interest rates, apartment rents, and housing prices, using an economic framework. Basic concepts in urban economics such as urbanization and agglomeration, transportation costs and congestion, inequality and segregation, growth controls and sprawl, as well as amenities, externalities, and public goods are reviewed. Explores the technique most commonly used in real estate and housing economics: hedonic pricing. Explores the rationale and impact of government intervention in the private real estate market. Expected preparation: USP 515 or Fin 512.
Corequisite: Taking RE 521 and RE 573 simultaneously is permitted. Cross-Listed as: This is the same course as USP 573 and may be taken only once for credit.

**Rus - Russian**

**Rus 101 - First-Year Russian Term 1 (4)**
An introduction to elementary Russian. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the first course in a sequence of three: Rus 101, Rus 102, and Rus 103.

**Rus 102 - First-Year Russian Term 2 (4)**
An introduction to elementary Russian. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the second course in a sequence of three: Rus 101, Rus 102, and Rus 103.

**Rus 103 - First-Year Russian Term 3 (4)**
An introduction to elementary Russian. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the third course in a sequence of three: Rus 101, Rus 102, and Rus 103.

**Rus 111 - Introduction to Flagship Studies Term 1 (1)**
An introduction to issues related to language acquisition, proficiency standards, and assessment instruments for students in the Russian Flagship Program. This is the first course in a sequence of three: Rus 111, Rus 112, and Rus 113.
Prerequisite: admission to the Russian Flagship Partner Program.

**Rus 112 - Introduction to Flagship Studies Term 1 (1)**
An introduction to issues related to language acquisition, proficiency standards, and assessment instruments for students in the Russian Flagship Program. This is the second course in a sequence of three: Rus 111, Rus 112, and Rus 113.
Prerequisite: admission to the Russian Flagship Partner Program.

**Rus 113 - Introduction to Flagship Studies Term 3 (1)**
An introduction to issues related to language acquisition, proficiency standards, and assessment instruments for students in the Russian Flagship Program. This is the third course in a sequence of three: Rus 111, Rus 112, and Rus 113.
Prerequisite: admission to the Russian Flagship Partner Program.

**Rus 150 - Beginning Flagship Russian Term 1 (6)**
Intensive introduction to fundamentals of Russian focusing on language production in high-frequency settings. Conducted primarily in Russian, the course prepares students for study in Russia and is a prerequisite for further study in the Russian Flagship Program. This is the first course in a sequence of three: Rus 150, Rus 151, and Rus 152.

**Rus 151 - Beginning Flagship Russian Term 2 (6)**
Intensive introduction to fundamentals of Russian focusing on language production in high-frequency settings. Conducted primarily in Russian, the course prepares students for study in Russia and is a prerequisite for further study in the Russian Flagship Program.
Rus 152 - Beginning Flagship Russian Term 3 (6)  
Intensive introduction to fundamentals of Russian focusing on language production in high-frequency settings. Conducted primarily in Russian, the course prepares students for study in Russia and is a prerequisite for further study in the Russian Flagship Program. This is the second course in a sequence of three: Rus 150, Rus 151, and Rus 152.

Rus 201 - Second-Year Russian Term 1 (4)  
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the first course in a sequence of three: Rus 201, Rus 202, and Rus 203. Expected preparation: Rus 103.

Rus 201H - Second-year Russian Heritage ()  
Designed for students who speak Russian but have limited writing skills. Covers the content of second-year Russian with particular attention to writing. Rus 203H satisfies the PSU BA requirement and prepares students to enter Rus 301H.

Rus 202 - Second-Year Russian Term 2 (4)  
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the second course in a sequence of three: Rus 201, Rus 202, and Rus 203. Expected preparation: Rus 103.

Rus 202H - Second-year Russian Heritage ()  
Designed for students who speak Russian but have limited writing skills. Covers the content of second-year Russian with particular attention to writing. Rus 203H satisfies the PSU BA requirement and prepares students to enter Rus 301H.

Rus 203 - Second-Year Russian Term 3 (4)  
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the third course in a sequence of three: Rus 201, Rus 202, and Rus 203. Expected preparation: Rus 103.

Rus 203H - Second-year Russian Heritage ()  
Designed for students who speak Russian but have limited writing skills. Covers the content of second-year Russian with particular attention to writing. Rus 203H satisfies the PSU BA requirement and prepares students to enter Rus 301H.

Rus 299 - Special Studies (1-12)  
(Credit to be arranged.)

Rus 301 - Third-Year Russian Term 1 (4)  
Focus on acquisition of vocabulary, practical application. Intensive practice in speaking listening, reading and writing. This is the first course in a sequence of three: Rus 301, Rus 302, and Rus 303. Expected preparation: Rus 203.

Rus 301H - Third-year Russian Heritage ()  
Designed for students from Russian-speaking backgrounds. Covers the content of third-year Russian with particular attention to culture, stylistic registers, accuracy. Prepares students to enter Rus 411 (Advanced Russian) and to apply for the PSU Russian Language Flagship program.

Rus 302 - Third-Year Russian Term 2 (4)  
Focus on acquisition of vocabulary, practical application. Intensive practice in speaking listening, reading and writing. This is the second course in a sequence of three: Rus 301, Rus 302, and Rus 303. Expected preparation: Rus 203.

Rus 302H - Third-year Russian Heritage ()  
Designed for students from Russian-speaking backgrounds. Covers the content of third-year Russian with particular attention to culture, stylistic registers, accuracy. Prepares students to enter Rus 411 (Advanced Russian) and to apply for the PSU Russian Language Flagship program.

Rus 303 - Third-Year Russian Term 3 (4)  
Focus on acquisition of vocabulary, practical application. Intensive practice in speaking listening, reading and writing. This is the third course in a
sequence of three: Rus 301, Rus 302, and Rus 303. Expected preparation: Rus 203.

Rus 303H - Third-year Russian Heritage ()
Designed for students from Russian-speaking backgrounds. Covers the content of third-year Russian with particular attention to culture, stylistic registers, accuracy. Prepares students to enter Rus 411 (Advanced Russian) and to apply for the PSU Russian Language Flagship program.

Rus 325 - Russian Phonetics and Phonology (4)
Introduction to the sounds of Russian: their place and manner of articulation (phonetics) as well as how they pattern with respect to each other and as influenced by morphological and syntactic factors (phonology). Conducted in English. Expected preparation: Rus 203.

Rus 330U - Russian Culture and Civilization (4)
A multimedia survey of major developments in Russian art, architecture, music, dance, theater, cinema and literature. The class focuses on ways major works relate to the artistic atmosphere of their times and on how subsequent generations have reinterpreted and reused them. Taught in English.

Rus 331U - Russian Film Topics (4)
Surveys cinematic narratives significant to Russian culture, with a focus on issues of gender and/or national identity. Taught in English.

Rus 341 - Introduction to Russian Literature (4)
Study of selected short stories of the 19th century. For non-native speakers only. This is the first course in a sequence of two: Rus 341 and Rus 342. Expected preparation: Rus 203.

Rus 342 - Introduction to Russian Literature (4)
Study of selected short stories of the 19th century. For non-native speakers only. This is the second course in a sequence of two: Rus 341 and Rus 342. Expected preparation: Rus 203.

Rus 399 - Special Studies (1-6)
(Credit to be arranged.)

Rus 401 - Research (1-6)
(Credit to be arranged.)

Rus 404 - Cooperative Education/Internship (1-12)
(Credit to be arranged.)

Rus 405 - Reading and Conference (1-12)
(Credit to be arranged.)

Rus 407 - Seminar (1-12)
(Credit to be arranged.)

Rus 408 - Workshop (1-12)
(Credit to be arranged.)

Rus 409 - Practicum (1-12)
(Credit to be arranged.)

Rus 410 - Selected Topics (1-12)
(Credit to be arranged.)

Rus 411 - Advanced Russian (4)
Special problems of Russian grammar; selected writing and reading assignments and discussion. For non-native speakers of Russian only. This is the first course in a sequence of three: Rus 411, Rus 412, and Rus 413. Expected preparation: Rus 303. Also offered for graduate-level credit as Rus 511 and may be taken only once for credit.

Rus 412 - Advanced Russian (4)
Special problems of Russian grammar; selected writing and reading assignments and discussion. For non-native speakers of Russian only. This is the second course in a sequence of three: Rus 411, Rus 412, and Rus 413. Expected preparation: Rus 303. Also offered for graduate-level credit as Rus 512 and may be taken only once for credit.

Rus 413 - Advanced Russian (4)
Special problems of Russian grammar; selected writing and reading assignments and discussion. For
non-native speakers of Russian only. This is the third course in a sequence of three: Rus 411, Rus 412, and Rus 413. Expected preparation: Rus 303.

Also offered for graduate-level credit as Rus 513 and may be taken only once for credit.

**Rus 414 - Advanced Russian Grammar (4)**

Systematic study of Russian grammar for advanced students and prospective teachers. Expected preparation: Rus 301.

Also offered for graduate-level credit as Rus 514 and may be taken only once for credit.

**Rus 416 - Readings in Russian (2)**

A variable-content course designed to give advanced students of Russian experience reading in a variety of content areas. Rus 416 is to be taken in conjunction with regularly scheduled corequisite courses. Students taking a corequisite course will do part of the required reading for that course in Russian. Expected preparation: Rus 342.

**Rus 420 - Topics in Russian History (4)**

A content-based language course based on study of major issues in Russian and Soviet history such as Peter I, Westerners and Slavophiles, the Thaw, and others. May be repeated for credit when topics differ. Expected preparation: Rus 342.

Also offered for graduate-level credit as Rus 520 and may be taken only once for credit. Prerequisite: junior standing.

**Rus 421 - Topics in Contemporary Russian Culture (4)**

Study of current issues in post-Soviet society such as political processes, educational reform, migration, and others. May be repeated for credit when topics differ. Expected preparation: Rus 342.

Also offered for graduate-level credit as Rus 521 and may be taken only once for credit.

**Rus 427 - Topics in Russian Literature of the 19th Century (4)**

Representative literature of the major Russian writers of the nineteenth century. Such topics as Golden Age, or the 19th Century Short Story. Expected preparation: Rus 303.

Also offered for graduate-level credit as Rus 527 and may be taken only once for credit.

**Rus 433 - Topics in Russian Literature of the 20th Century (4)**

Representative literature of major Russian writers of the twentieth century. Such topics as Soviet Satire, The Thaw, Glasnost. Expected preparation: Rus 303. May be repeated for credit when topic differs.

Also offered for graduate-level credit as Rus 533 and may be taken only once for credit.

**Rus 441U - Russian Literature in Translation: Nineteenth Century (4)**

Major works of nineteenth-century Russian literature. Readings, lectures, and discussion in English. Expected preparation: Sophomore Inquiry or 4 credits of upper division literature.

**Rus 442 - Russian Literature in Translation: Twentieth Century (4)**

Major works of twentieth-century Russian literature. Readings, lectures, and discussions in English.

**Rus 442U - Russian Literature in Translation: Twentieth Century (4)**

Major works of twentieth-century Russian literature. Readings, lectures, and discussions in English. Expected preparation: Sophomore Inquiry or 4 credits of upper division literature.

**Rus 444 - Flagship Studies: Globalization Term 1 (2)**

A Russian across the curriculum course aligned with PSU’s University Studies Program. Flagship students develop advanced reading, writing, speaking and listening skills while exploring "Globalization" in Russian. This is the first course in a sequence of three: Rus 444, Rus 445, and Rus 446. Prerequisite: admission to the Russian Flagship Program.

**Rus 445 - Flagship Studies: Globalization Term 2 (2)**

A Russian across the curriculum course aligned with PSU’s University Studies Program. Flagship students develop advanced reading, writing, speaking and listening skills while exploring "Globalization" in Russian. This is the second course in a sequence of three: Rus 444, Rus 445, and Rus 446. Prerequisite: admission to the Russian Flagship Program.
Rus 446 - Flagship Studies: Globalization Term 3 (2)
A Russian across the curriculum course aligned with PSU’s University Studies Program. Flagship students develop advanced reading, writing, speaking and listening skills while exploring "Globalization" in Russian. This is the third course in a sequence of three: Rus 444, Rus 445, and Rus 446.
Prerequisite: admission to the Russian Flagship Program.

Rus 454 - Flagship Studies: American Studies (2)
A Russian across the curriculum course aligned with PSU’s University Studies Program. Flagship students develop advanced reading, writing, speaking and listening skills while exploring the U.S. Jazz Age in Russian.
Prerequisite: admission to the Russian Flagship Program.

Rus 455 - Flagship Studies: European Studies (2)
A Russian across the curriculum course aligned with PSU’s University Studies Program. Flagship students develop advanced reading, writing, speaking and listening skills while exploring the modern European history and culture in Russian.
Prerequisite: admission to the Russian Flagship Program.

Rus 456 - Flagship Studies: Environmental Sustainability (2)
A Russian across the curriculum course aligned with PSU’s University Studies Program. Flagship students develop advanced reading, writing, speaking and listening skills while exploring the questions of ecology and sustainability in Russian.
Prerequisite: admission to the Russian Flagship Program.

Rus 457 - Flagship Studies: Russian in the Major Term 1 (2)
A Russian across the curriculum course designed to permit advanced Flagship students to develop appropriate vocabulary, discourse strategies, and research skills in their respective majors. This is the first course in a sequence of three: Rus 457, Rus 458, and Rus 459.
Prerequisite: admission to the Russian Flagship Program.

Rus 458 - Flagship Studies: Russian in the Major Term 2 (2)
A Russian across the curriculum course designed to permit advanced Flagship students to develop appropriate vocabulary, discourse strategies, and research skills in their respective majors. This is the third course in a sequence of three: Rus 457, Rus 458, and Rus 459.
Prerequisite: admission to the Russian Flagship Program.

Rus 459 - Flagship Studies: Russian in the Major Term 3 (2)
A Russian across the curriculum course designed to permit advanced Flagship students to develop appropriate vocabulary, discourse strategies, and research skills in their respective majors.
Prerequisite: admission to the Russian Flagship Program.

Rus 494 - Russian Linguistics (4)
Introduction to the basic concepts of linguistics and their application to Russian. Analysis of the phonetics, phonemics, syntax and morphology of modern Russian. Recommended prerequisite: Rus 303.

Rus 497 - Applied Russian Linguistics (4)
A practical application of linguistics to modern Russian. Emphasis on a contrastive analysis of the structures of Russian and English. Recommended prerequisite: Rus 303.

Rus 501 - Research (1-9)
(Credit to be arranged.)

Rus 504 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

Rus 505 - Reading and Conference (1-12)
(Credit to be arranged.)

Rus 507 - Seminar (1-12)
(Credit to be arranged.)

Rus 508 - Workshop (1-8)
(Credit to be arranged.)
Rus 509 - Practicum (1-6)  
(Credit to be arranged.)

Rus 510 - Selected Topics (1-12)  
(Credit to be arranged.)

Rus 511 - Advanced Russian (4)  
Special problems of Russian grammar; selected writing and reading assignments and discussion. For non-native speakers of Russian only. This is the first course in a sequence of three: Rus 511, Rus 512, and Rus 513. Expected preparation: Rus 303. Also offered for undergraduate-level credit as Rus 411 and may be taken only once for credit.

Rus 512 - Advanced Russian (4)  
Special problems of Russian grammar; selected writing and reading assignments and discussion. For non-native speakers of Russian only. This is the second course in a sequence of three: Rus 511, Rus 512, and Rus 513. Expected preparation: Rus 303. Also offered for undergraduate-level credit as Rus 412 and may be taken only once for credit.

Rus 513 - Advanced Russian (4)  
Special problems of Russian grammar; selected writing and reading assignments and discussion. For non-native speakers of Russian only. This is the third course in a sequence of three: Rus 511, Rus 512, and Rus 513. Expected preparation: Rus 303. Also offered for undergraduate-level credit as Rus 413 and may be taken only once for credit.

Rus 514 - Advanced Russian Grammar (4)  
Systematic study of Russian grammar for advanced students and prospective teachers. Expected preparation: Rus 301. Also offered for undergraduate-level credit as Rus 414 and may be taken only once for credit.

Rus 520 - Topics in Russian History (4)  
A content-based language course based on study of major issues in Russian and Soviet history such as Peter I, Westerners and Slavophiles, the Thaw, and others. May be repeated for credit when topics differ. Expected preparation: Rus 342. Also offered for undergraduate-level credit as Rus 420 and may be taken only once for credit. Prerequisite: junior standing.

Rus 521 - Topics in Contemporary Russian Culture (4)  
Study of current issues in post-Soviet society such as political processes, educational reform, migration, and others. May be repeated for credit when topics differ. Expected preparation: Rus 342. Also offered for undergraduate-level credit as Rus 421 and may be taken only once for credit.

Rus 527 - Topics in Russian Literature of the 19th Century (4)  
Representative literature of the major Russian writers of the nineteenth century. Such topics as Golden Age, or the 19th Century Short Story. Expected preparation: Rus 303. Also offered for undergraduate-level credit as Rus 427 and may be taken only once for credit.

Rus 533 - Topics in Russian Literature of the 20th Century (4)  
Representative literature of major Russian writers of the twentieth century. Such topics as Soviet Satire, The Thaw, Glasnost. May be repeated for credit when topic differs. Expected preparation: Rus 303. Also offered for undergraduate-level credit as Rus 433 and may be taken only once for credit.

Rus 594 - Russian Linguistics (4)  
Introduction to the basic concepts of linguistics and their application to Russian. Analysis of the phonetics, phonemics, syntax and morphology of modern Russian. Recommended prerequisite: Rus 303.

Rus 597 - Applied Russian Linguistics (4)  
A practical application of linguistics to modern Russian. Emphasis on a contrastive analysis of the structures of Russian and English. Recommended prerequisite: Rus 303.

Sci - Science Ed: Center for

Sci 199 - Special Studies (1-8)  
(Credit to be arranged.)

Sci 201 - Natural Science Inquiry (4)  
This is the University Studies Sophomore Inquiry course that serves as the gateway to the Science in the Liberal Arts curriculum. The course aims to introduce students to the knowledge-making
strategies of science. The curriculum is taught using small group and class projects that engage students in various science inquiry activities. Students gain experience in gathering and understanding scientific information, data management, interpretation and presentation, making and defending knowledge claims, working collaboratively, writing technically, and communicating scientific results.

Sci 311U - Teaching Everyday Science (4)
Two-term sequence designed to immerse potential mathematics and science teachers in laboratory and thinking experiences that they can use as a foundation for their own understanding of the physical sciences and related mathematics and curriculum development in future teaching experiences. In addition to experiences in the laboratory, environmental impact issues will be investigated. Includes laboratory and/or fieldwork. This is the first course in a sequence of two: Sci 311 and Sci 312. Recommended prerequisite: Natural Science Inquiry.

Sci 312U - Teaching Everyday Science (4)
Two-term sequence designed to immerse potential mathematics and science teachers in laboratory and thinking experiences that they can use as a foundation for their own understanding of the physical sciences and related mathematics and curriculum development in future teaching experiences. In addition to experiences in the laboratory, environmental impact issues will be investigated. Includes laboratory and/or fieldwork. This is the second course in a sequence of two: Sci 311 and Sci 312. Recommended prerequisite: Natural Science Inquiry.

Sci 313U - Environmental Mathematical Modeling (4)
An introduction to differential and integral calculus, this course is intuitive in approach and emphasizes applications, especially with respect to environmental issues. The interested student may follow it with a more extensive and rigorous calculus sequence. Includes laboratory and/or fieldwork. Recommended prerequisites: Natural Science Inquiry, Mth 111.

Sci 314U - Environmental Statistics (4)
Explores a selection of mathematical topics in the context of environmental issues, using real data. Topics will include statistics, data display, data analysis, probability, and probability distributions.

Sci 315U - General Astronomy I (4)
Introductory historical, descriptive, and interpretive study of astronomy. Emphasis is on the basic scientific methods as they apply to astronomical problems. Detailed examination of the earth, followed by a survey of the other members of the solar system. Survey of the stars, their types, grouping, and motions. Models for the evolution of the Universe and the possibility of life elsewhere. The nature of light, the types of information it carries, and the types of devices used to detect it. Includes laboratory and/or fieldwork. This is the first course in a sequence of two: Sci 315U and Sci 316U. This is the same course as Ph 361U and may be taken only once for credit. Expected preparation: Natural Science Inquiry. Taught by a faculty member from the Department of Physics. Cross-Listed as: Ph 361U.

Sci 316U - General Astronomy II (4)
Introductory historical, descriptive, and interpretive study of astronomy. Emphasis is on the basic scientific methods as they apply to astronomical problems. Detailed examination of the earth, followed by a survey of the other members of the solar system. Survey of the stars, their types, grouping, and motions. Models for the evolution of the Universe and the possibility of life elsewhere. The nature of light, the types of information it carries, and the types of devices used to detect it. Includes laboratory and/or fieldwork. This is the second course in a sequence of two: Sci 315U and Sci 316U. This is the same course as Ph 362U and may be taken only once for credit. Expected preparation: Natural Science Inquiry. Taught by a faculty member from the Department of Physics. Cross-Listed as: Ph 362U.

Sci 317U - Fractals, Chaos, and Complexity (4)
Introduction to the physics of fractals in nature, chaos, and complexity. Computer simulations and desktop experiments involving fractals, chaos, and complex systems. Recommended prerequisite: Natural Science Inquiry. Taught by a faculty member from the Department of Physics.

Sci 318U - Complexity and the Universe I (4)
Introduction to the physics of complexity and other current concepts in physics. Computer simulations and desktop experiments involving fractals, chaos, and complex systems. Includes laboratory and/or
Sci 319U - Complexity and the Universe II (4)
Continuation of Sci 318/Ph 366. Emphasizes scientific cosmology with a focus on understanding how insights gained from physics and astronomy affect your view of the universe and your place in it. Students participate actively in seeing how some of the information was gathered, help critically analyze what to believe about the history and arrangement of the universe and what it means to them. Includes laboratory and/or fieldwork. Recommended prerequisite: Natural Science Inquiry. Taught by a faculty member from the Department of Physics.

Sci 320U - Rates of Change (4)
Explores rates of change in a laboratory-style format. Analyzes the relationships between quantities and rates using hand-drawn and computer-generated graphic representations. Provides resources for pre-service teachers.

Sci 321U - Energy and Society I (4)
Study of the generation and usage of energy, including the technical, economic, social, and political issues related to energy production and end uses. Examination of energy resources, methods of producing and converting various forms of energy, energy conservation, and environmental and economic implications of energy production and energy policies. Includes laboratory and possibly fieldwork. This is the first course in a sequence of two: Sci 321 and Sci 322. Recommended prerequisite: Natural Science Inquiry.

Sci 322U - Energy and Society II (4)
Study of the generation and usage of energy, including the technical, economic, social, and political issues related to energy production and end uses. Examination of energy resources, methods of producing and converting various forms of energy, energy conservation, and environmental and economic implications of energy production and energy policies. Includes laboratory and possibly fieldwork. This is the second course in a sequence of two: Sci 321 and Sci 322. Recommended prerequisite: Natural Science Inquiry.

Sci 325U - Science of a Hydrogen Economy (4)
Hydrogen is considered as an ideal energy source. Explores various methods of hydrogen production, storage, delivery, and uses. Includes discussion of hydrogen's image as an abundant, clean, high energy output, easily obtainable, safe energy source. Considers safety issues and codes/standards from various related agencies and organizations that would have been necessary to have avoided such historical mishaps as those involving the Hindenberg and the space shuttle Challenger. Recommended prerequisite: Natural Science Inquiry.

Sci 327U - Oceans and Society (4)
Provides a working knowledge of how the physical, chemical and biological ocean environment impacts the development and distribution of marine communities. Discussions on how humans interface with marine systems, how marine systems impact global sustainability, the environmental, economic and ethical responsibilities humans have for our marine systems.

Sci 331U - AI: Urban Air Pollution (4)
Interaction of the atmosphere with other earth systems, chemical cycling, and the effect of humans on the atmosphere will be explored. The physical and chemical properties and interactions of the atmosphere will be investigated through laboratory investigations, fieldwork, and computer modeling. Topics will include urban air quality, global climate change, and the "management" of the atmosphere. Includes laboratory and/or fieldwork. This is the first course in a sequence of two: Sci 331 and Sci 332. Recommended prerequisite: Natural Science Inquiry.

Sci 332U - AI: Urban Air Pollution (4)
Interaction of the atmosphere with other earth systems, chemical cycling, and the effect of humans on the atmosphere will be explored. The physical and chemical properties and interactions of the atmosphere will be investigated through laboratory investigations, fieldwork, and computer modeling. Topics will include urban air quality, global climate change, and the "management" of the atmosphere. Includes laboratory and/or fieldwork. This is the second course in a sequence of two: Sci 331 and Sci 332. Recommended prerequisite: Natural Science Inquiry.
Sci 333U - Climate and Water Resources (4)
An inquiry-based examination of the principal controls on climate and hydrology, with emphasis on processes and interactions; students will do fieldwork, data analysis, and laboratory work. Recommended prerequisite: Natural Science Inquiry. Also listed as Geog 310U; course may be taken only once for credit.
Cross-Listed as: Geog 310U.

Sci 334U - Climate Variability and Change (4)
Provides an understanding of how and why climate varies and changes over space and time. Climate variability is explored across a range of scales from ice ages to monsoon circulations. Examines the scientific basis for anthropogenic climate change and how it differs from natural variability. Students will learn by analyzing climate data, performing experiments with climate models, and researching how climate variability and change impact everyday life. Includes laboratory and/or fieldwork.
Cross-Listed as: Also offered as Geog 312U and may be taken only once for credit.

Sci 335U - Water in the Environment I (4)
Studies of the unique properties of water in all of its roles, including a study of the water cycle, water resources, treatment of municipal water, and wastewater treatment. Special attention will be placed on natural waters as a resource, including natural and introduced constituents and the movements of natural waters. Includes laboratory and fieldwork. This is the first course in a sequence of two: Sci 335 and Sci 336. Recommended prerequisite: Natural Science Inquiry.

Sci 336U - Water in the Environment II (4)
Studies of the unique properties of water in all of its roles, including a study of the water cycle, water resources, treatment of municipal water, and wastewater treatment. Special attention will be placed on natural waters as a resource, including natural and introduced constituents and the movements of natural waters. Includes laboratory and fieldwork. This is the second course in a sequence of two: Sci 335 and Sci 336. Recommended prerequisite: Natural Science Inquiry.

Sci 338U - Investigating Forest Ecosystems (4)
Fundamental concepts of terrestrial ecology in the context of present unresolved forest management issues. Participants will learn an appropriate set of field skills in soil and vegetation monitoring and engage in a short-term research project at a local site. Socio-political context of Pacific Northwest forest management will be covered through guided controversies and guest speakers.
Prerequisite: one ecology or environmental science course.

Sci 341L - Lab for Bi 341 (0)
Lab for Bi 341.
Corequisite: Sci 341U.

Sci 341U - Biology Concepts and Applications I (4)
Two-term course focusing on four main topics: classical Mendelian and current molecular genetics, evolution and predator/prey interactions, growth and metabolism, and biomes and biodiversity. In each topic area students will participate in laboratory and/or field components, discussion, and Internet exercises. Includes laboratory and/or fieldwork. This is the first course in a sequence of two: Sci 341 and Sci 342. Recommended prerequisite: Natural Science Inquiry.
Corequisite: Sci 341L.

Sci 342L - Lab for Sci 342 (0)
Lab for Sci 342.
Corequisite: Sci 342U.

Sci 342U - Biology Concepts and Applications II (4)
Two-term course focusing on four main topics: classical Mendelian and current molecular genetics, evolution and predator/prey interactions, growth and metabolism, and biomes and biodiversity. In each topic area students will participate in laboratory and/or field components, discussion, and Internet exercises. Includes laboratory and/or fieldwork. This is the second course in a sequence of two: Sci 341 and Sci 342. Recommended prerequisite: Natural Science Inquiry.
Corequisite: Sci 342L.

Sci 343U - Columbia Basin Plant Communities (4)
In this two-term course students will explore the relationships found in alpine, desert, forest, and grassland plant communities. They will gain an understanding of how these plant communities interact with their environment and why they exhibit certain characteristics and processes. Includes laboratory and fieldwork. Recommended prerequisite: Natural Science Inquiry.
Sci 345U - Old Growth Forest Ecology and Management I (4)

Explores the ecological characteristics of old growth forests, including the outstanding biodiversity that exists at multiple levels, as well as the management paradigms that have impacted these systems in the Pacific Northwest (U.S. and Canada), including ethical, social, economic, and political aspects of forest management. Sci 345 includes laboratory and local fieldwork plus projects involving: analysis of environmental impact statement alternatives, evaluation of management issues, and advisory statements for governmental activities. Sci 346 involves more extensive fieldwork, data analysis, and presentations. This is the first course in a sequence of two: Sci 345 and Sci 346. Recommended prerequisite: Natural Science Inquiry.

Sci 346U - Old Growth Forest Ecology and Management II (4)

Explores the ecological characteristics of old growth forests, including the outstanding biodiversity that exists at multiple levels, as well as the management paradigms that have impacted these systems in the Pacific Northwest (U.S. and Canada), including ethical, social, economic, and political aspects of forest management. Sci 345 includes laboratory and local fieldwork plus projects involving: analysis of environmental impact statement alternatives, evaluation of management issues, and advisory statements for governmental activities. Sci 346 involves more extensive fieldwork, data analysis, and presentations. This is the second course in a sequence of two: Sci 345 and Sci 346. Recommended prerequisite: Natural Science Inquiry.

Sci 347U - Science, Gender, and Social Context I (4)

Considers how gender, race and sexuality influence and are constructed by the theories and practice of science, using historical and contemporary examples. Explores the strengths and limitations of science to describe and predict human and non-human natural phenomena. Topics may include organismal, cell/molecular, or biomedical sciences. Laboratory and/or field experiences are included and emphasized. Companion course to Sci 347U; can be taken in any order.

Cross-Listed as: This course is the same as WS 347U and may only be taken once for credit.

Sci 348U - Science, Gender, and Social Context II (4)

Considers how gender, race and sexuality influence and are constructed by the theories and practice of science, using historical and contemporary examples. Explores the strengths and limitations of science to describe and predict human and non-human natural phenomena. Topics may include organismal, cell/molecular, or biomedical sciences. Laboratory and/or field experiences are included and emphasized. Companion course to Sci 347U; can be taken in any order.

Cross-Listed as: This course is the same as WS 348U and may only be taken once for credit.

Sci 350U - Context of Science in Society (4)

Addresses the promises and limitations of the scientific enterprise in the framework of "real world" social, economic, political and ethical issues. Courses also address the historical and cultural role of science and technology, providing a link between laboratory science and contemporary society. Some CSS courses introduce risk-benefit analyses and decision-making methodologies. The prerequisite course for Context of Science in Society courses is Sci 201 Natural Science Inquiry or consent of the instructor.

Sci 351U - Northwest Wetlands: Conservation, Restoration, and Mitigation (4)

Focus on science and public policy issues in wetland conservation, restoration, and mitigation, especially in Oregon and the Pacific Northwest. Recommended prerequisite: Natural Science Inquiry or consent of instructor.

Sci 352U - Science and Policy of Climate Change (4)

Evaluates the scientific data and the policy statements concerning the potential for human impact of climate, and in particular the questions of the existence and impacts of global warming. The interaction between scientific analysis and policy analysis will be explored, and students will consider the roles that citizens, scientists, and policy makers in developing local, regional, and global responses to climate change. Recommended prerequisite: Natural Science Inquiry.

Sci 353U - Radiation in the Environment (4)

Examines sources of radiation and the hazards they represent. Students will explore the interaction of
radiation with matter, including living tissue, and examine dosage and risk assessment. Topics include: fundamentals of electromagnetic radiation, nuclei and radioactive decay; cosmic background radiation and radon gas; nuclear chain reactions and atomic weapons; nuclear power generation, waste disposal and nuclear disasters; medical x-rays and non-ionizing radiation from microwaves and cellular phones.

Prerequisite: Upper-division standing. Cross-Listed as: This is the same course as Ph 353U and may be taken only once for credit.

Sci 354U - Science and Politics of Columbia River Decisions (4)

Exploration of case studies of relationships between science and politics in making decisions about controversial Columbia River management issues. Students will identify a particular issue and its related stakeholders, define objectives, collect as well as analyze scientific data and political positions, and participate in role-playing decisions as stakeholder groups and as management committees.

Prerequisite: Natural Science Inquiry.

Sci 355U - Science Through Science Fiction (4)

This class uses science fiction literature to examine a wide variety of topics in science. Recommended prerequisite: Natural Science Inquiry. Also listed as Ph 378; course may be taken only once for credit.

Sci 356U - Environmental Success Stories (4)

A positive reflection on how and why we can approach environmental catastrophes with willingness and certainty that we can develop strategies to overcome current and future challenges. Case-studies, work with community organizations and evaluation of the literature will help students identify key elements of successful endeavors and create best-practices for successful environmental problem solving. Community connections will also focus on how to create sustainable and resilient solutions by identifying and supporting stakeholder values.

Sci 357U - Sustainability in the United States-Mexico Border Region (4)

Explores environmental and economic sustainability issues at the United States-Mexico border. Dialogue with United States and Mexican border residents; tours of immigration facilities and multinational factories; homestays with working class families; and service with Mexican-based agencies. Spanish language skills not required.

Sci 359U - Biopolitics (4)

Designed to introduce the ethical, social, and political implications of knowledge and technologies attending advances in reproductive medicine and molecular genetics, including: in vitro fertilization, fetal surgery, and somatic cell gene therapy. Particular attention is paid to the manner in which such advances are likely to affect women's lives. Recommended prerequisite: Natural Science Inquiry.

Sci 361U - Science: Power-Knowledge (4)

Systematically examines orthodox portrayals of science in comparison to recent anthropological, feminist, and poststructuralist accounts in an attempt to formulate a fresh understanding of the public's science literacy as a critical component of democratic political practice and civic responsibility. Recommended prerequisite: Natural Science Inquiry.

Sci 365U - The Science of Gendered Bodies (4)

The scientific gendering of the human body is studied from an interdisciplinary and intersectional queer and feminist perspective integrating biology, health and medicine with current and historical social, cultural and political forces.

Cross-Listed as: This is the same course as WS 365U and may be taken only once for credit.

Sci 382U - Introduction to Nanoscience and Nanotechnology (4)

Basic introduction to nanoscience and nanotechnology for all interested science, engineering and social science and humanities students. This is the same course as Ph 382U and may be taken only once for credit.

Prerequisite: sophomore inquiry - Natural Science Inquiry. Cross-Listed as: Ph 382U.

Sci 383U - Nanotechnology: Simulation & Design (4)

Introductory circuit simulation; properties of selected nanotechnology devices and systems; nanodevice simulation; development of nanodevice models. This is the same course as ECE 383U and may be taken only once for credit.

Prerequisite: upper-division standing or permission of the instructor. Cross-Listed as: ECE 383U.
Sci 384 - From Contemporary Nanoscience Towards Sustainable Nanotechnologies (4)
Provides an overview of nanoscience/technology, its interdisciplinarity, how it complements biomedical, engineering, economic, and environmental studies and gives students an appreciation of why “soft” machines are favored over “hard” machines. As second part of PH 382U (cross listed SCI 382U), it provides a scientific/technological basis for sustainable future technology developments.
Cross-Listed as: This is the same course as Ph 384 and may be taken only once for credit.

(Credit to be arranged.)

Sci 415 - Understanding the Next Generation Science Standards: Energy and Matter (4)
This course will provide current and future teachers with the science content knowledge they will need to teach science as presented in the Next Generation Science Standards (NGSS) at the elementary level. The course will be conducted through an integrated program of short lectures, labs, and student projects.
Also offered for graduate-level credit as Sci 515 and may be taken only once for credit. Prerequisite: upper-division standing.

Sci 416 - Understanding the Next Generation Science Standards: Change Over Time (4)
This course will provide current and future teachers with the science content knowledge they will need to teach science as presented in the Next Generation Science Standards (NGSS) at the elementary level. The course will be conducted through an integrated program of short lectures, labs, and student projects.
Also offered for graduate-level credit as Sci 516 and may be taken only once for credit. Prerequisite: upper-division standing.

Sci 417 - Understanding the Next Generation Science Standards: Interactions and Systems (4)
This course will provide current and future teachers with the science content knowledge they will need to teach science as presented in the Next Generation Science Standards (NGSS) at the elementary level. The course will be conducted through an integrated program of short lectures, labs, and student projects.
Also offered for graduate-level credit as Sci 517 and may be taken only once for credit. Prerequisite: upper-division standing.

(Credit to be arranged.)

Sci 515 - Understanding the Next Generation Science Standards: Energy and Matter (4)
This course will provide current and future teachers with the science content knowledge they will need to teach science as presented in the Next Generation Science Standards (NGSS) at the elementary level. The course will be conducted through an integrated program of short lectures, labs, and student projects. Also offered for undergraduate-level credit as Sci 415 and may be taken only once for credit. Prerequisite: upper-division standing.

Sci 516 - Understanding the Next Generation Science Standards: Change Over Time (4)
This course will provide current and future teachers with the science content knowledge they will need to teach science as presented in the Next Generation Science Standards (NGSS) at the elementary level. The course will be conducted through an integrated program of short lectures, labs, and student projects. Also offered for undergraduate-level credit as Sci 416 and may be taken only once for credit. Prerequisite: upper-division standing.

Sci 517 - Understanding the Next Generation Science Standards: Interactions and Systems (4)
This course will provide current and future teachers with the science content knowledge they will need to teach science as presented in the Next Generation Science Standards (NGSS) at the elementary level. The course will be conducted through an integrated program of short lectures, labs, and student projects. Also offered for undergraduate-level credit as Sci 417 and may be taken only once for credit. Prerequisite: upper-division standing.

Sci 808 - Workshop (1-12)
CSE offers a number of credit-based professional development opportunities for existing science teachers. These courses are taught by CSE faculty and community partners and cover a wide range of environmental and science education topics. Credits earned through these courses do not fulfill graduate program credit requirements.

Sci 810 - Special Topics (1-12)
CSE offers a number of credit-based professional development opportunities for existing science teachers. These courses are taught by CSE faculty and community partners and cover a wide range of environmental and science education topics. Soc - Sociology

Soc 199 - Special Studies (0-9)  
Recommended prerequisite: consent of instructor.  
Maximum: 8 credits.

Soc 200 - Introduction to Sociology (4)  
Sociological concepts and perspectives concerning human groups; includes attention to socialization, culture, institutions, stratification, and societies. Consideration of fundamental concepts and research methodology.

Soc 250 - Introduction to Sociology for the Health Sciences (4)  
Provides a comprehensive overview of sociological concepts that are important to the health sciences.

Soc 299 - Special Studies (1-8)  
(Credit to be arranged.)

Soc 300 - Foundations of Sociology I (4)  

Soc 301 - Classical Sociological Theory (4)  

Soc 302 - Contemporary Sociological Theory (4)  
Developments in American sociological theory from mid-twentieth century to today. Considers impact of social change and social movements on theory, including neo-Marxism, feminism, post-modernism and current new directions.  
Prerequisite: Soc 301.

Soc 310 - U.S. Society (4)  
Examination of the social structure, culture, and demography of the United States. Sociological approaches to such institutions as the economy, religion, education, and the family are explored. Attention given to comparison with other industrialized countries as well as to selected social issues and controversies. Recommended prerequisites: Soc 200, 301, 302.

Soc 314U - Alcohol and Other Drugs (4)  
Sociological analysis of the behavior and belief patterns relative to alcohol and other drugs in American society. Prevention and intervention strategies are briefly reviewed.

Soc 320U - Globalization (4)  
Exploration of issues and approaches in sociological thinking relative to world systems. World systems are treated not only as world orders made up of political and economic exchanges, but also as cultural orders and institutionalized structures transcending national geographic boundaries. Attention given to the international, national, regional, and local ways that people attempt to deal with the instabilities accompanying globalization. Expected preparation: Soc 200, Soc 301, Soc 302.

Soc 330 - Sociology of Food Inequalities (4)  
Examination of food and nutrition issues and problems through the lens of the social sciences, with an emphasis on inequalities in the production, distribution and consumption of food. Economic, social, political and symbolic dimensions of food systems and food behaviors. Social determinants of
hunger, malnutrition, and obesity. Exploration of solutions at the local, societal and global level.

**Soc 337U - Prejudice, Privilege, and Power (4)**
Examines the structuring of relationships between dominant and minority groups, including racial, ethnic, gender, religious, and cultural minorities, with primary emphasis on U.S. society. Covers basic concepts and theoretical approaches to the study of majority-minority group relations, including issues of oppression, privilege, adaptation, and intersectionality. Emphasizes the social construction of difference, as well as the structural and historical roots of dominant group privilege and unequal social, economic, and political power.

**Soc 339U - Marriage and Intimacy (4)**
Introduction to sociological and social psychological perspectives on intimate relationships, marriage, and diverse family forms. Examination of the effects of historical and current social contexts and the role of gender, race, and class in shaping personal choices and experiences. Emphasis is on sociological theory and research.

**Soc 341U - Population Trends and Policy (4)**
Introduction to the general field of population analysis; a review of the development of population theories, techniques of measurement and analysis of the basic demographic variables, their interrelationships, and population changes. Recommended prerequisites: Soc 200.

**Soc 342 - Social Psychology: Self, Attitudes and Social Influence (4)**
Examination of psychological and sociological processes associated with people’s thoughts about and interactions with one another. Particular emphasis on self, social identity, social cognition, attitudes, prejudice and persuasion. Expected preparation: Soc 200, or Psy 200 or 204. Credit will not be given for both Soc 342 and Psy 342.

**Soc 343 - Social Psychology: Social Relationships and Groups (4)**
Examination of sociological and psychological processes associated with interpersonal, group, and inter-group behavior. Particular emphasis on aggression, pro-social behavior, interpersonal attraction, group influence, conflict and cooperation.

**Soc 344U - Gender and Sexualities (4)**
Examines the ways in which social constructions of gender both influence and are influenced by the cultural organization of and individual expressions of sexuality. The course explores the intersections among sexuality, culture, gender, and the body and examines a variety of sexualities and emphasizes the multifaceted nature of power, privilege, and oppression.

**Soc 350U - Coming of Age: Adulthood in the US, Europe, and Asia (4)**
An examination of changes in life-course in the US, Scandinavia, Southern Europe, and Japan focusing on the impact of globalization, gender, race and class on key life-transitions (leaving home, education, work, partnering, and having children).

**Soc 370 - Sociology of Deviancy (4)**
Introduction and analysis of deviant behavior. Delineation of the sociological and social psychological factors which give rise to deviant roles. Recommended prerequisites: Soc 200.

**Soc 376 - Social Change (4)**
Deals with the technological and ideological factors which govern the evolution and transformation of society, with special emphasis on the operation of such factors since 1800. Recommended prerequisites: Soc 200.

**Soc 380U - Sports in Society (4)**
An objective examination of sports in America as social phenomena. Study of various socio-cultural structures, patterns, and organizations or groups involved with sports. Issues such as race, gender, and class within the context of sports will be explored through a critical sociological lens.

**Soc 396 - Social Research Methods, Social Statistics (4)**
Introduction to the range of techniques for analyzing social science data. Emphasis on the conceptualization, operationalization, and
measurement of socially based phenomena. Topics include: level of measurement, operationalization, summary statistics, probability, hypothesis tests, and the use of data analysis software (SPSS).

**Soc 397 - Social Research Methods (5)**

Study of the structuring of sociological inquiry, conceptualization and measurement, operationalization, computers in social research, analysis of bivariate and multivariate relations, the logic of sampling and inference. Course includes lecture (4 hours per week) and an introductory research laboratory (2 hours per week).

**Soc 397L - Social Research Methods Lab (0)**
Lab for Soc 397.
Corequisite: Soc 397.

**Soc 398 - Sociology Research Project (4)**

Development and execution of a research project integrating some aspect of sociological theory with social science research methodology. Students work in teams to identify a research problem, design and conduct research bearing on this problem, and write a research report. Soc 397 and 398 are to be taken as a two-term sequence.

**Soc 399 - Special Studies (1-6)**
(Credit to be arranged.)

**Soc 399U - Special Studies (4)**
(Credit to be arranged.)

**Soc 401 - Research (1-6)**
(Credit to be arranged.) Consent of instructor.

**Soc 403 - Thesis (1-4)**
(Credit to be arranged.)

**Soc 404 - Cooperative Education/Internship (1-12)**
(Credit to be arranged.)

**Soc 405 - Reading and Conference (1-6)**
(Credit to be arranged.) Consent of instructor.

**Soc 407 - Seminar (1-6)**
(Credit to be arranged.) Consent of instructor.

**Soc 408 - Workshop (1-12)**
(Credit to be arranged.)

**Soc 410 - Selected Topics (1-9)**
(Credit to be arranged.) Maximum: 12 credits. Consent of instructor.

**Soc 417 - Law & Society: The Sociology of Law (4)**

Examination of different sociological and sociolegal theories and empirical research on the social origins, processes, functions, and actors of the social reality known as law. Consideration of law as a social institution that shapes and is shaped by society, including how law reinforces and/or ameliorates class, gender, and racial inequalities as well as fundamental issues such as free speech and privacy.

Prerequisite: Soc 200.

**Soc 418 - Criminology and Delinquency (4)**

Also offered for graduate-level credit as Soc 518 and may be taken only once for credit.

**Soc 419 - Sociology of Mental Illness (4)**

An overview of sociological perspectives on mental health and illness. Informs understanding of mental health and illness by challenging dominant views of mental illness, examining how social relationships play a role in mental illness, questioning the goals and implications of mental health policy and presenting research on how mental health services are organized and provided.

Also offered for graduate-level credit as Soc 519 and may be taken only once for credit. Prerequisite: Soc 200.
Soc 420 - Urbanization and Community (4)
Analytical approach to the meaning of community in the modern world. The determinants, social consequences of, and responses to the processes of urbanization are considered. Theories of the city emphasizing ecological, sociocultural, and critical explanations for growth and change in urban regions are examined. Patterns of social and structural organization of the metropolis and the cognitive and behavioral aspects of urban life are explored.
Also offered for graduate-level credit as Soc 520 and may be taken only once for credit.

Soc 423 - Stratification (4)
Also offered for graduate-level credit as Soc 523 and may be taken only once for credit.

Soc 424 - Groups, Interaction and Identity (4)
Analysis of the formation and functioning of intergroup and intragroup relations. Attention to group organization and interaction, performance, cooperation, conflict, and group membership and individual identity. Expected preparation: Soc or Psy 342.
Also offered for graduate-level credit as Soc 524 and may be taken only once for credit.

Soc 425 - Sociology of Gender (4)
Consideration of the theoretical, methodological, and empirical contributions of current sociological scholarship on gender. Emphasis on the intersection of gender, sexuality, race/ethnicity, and class. Analysis of topics such as: masculinity/femininity, parenting, family, education, work, sexualities, reproduction, politics, and social change. This is the same course as WS 425 and may be taken only once for credit.
Also offered for graduate-level credit as Soc 525 and may be taken only once for credit. Prerequisite: Soc 200.

Soc 426 - Gender & Mental Health (4)
Social and historical explanations of, and research on, mental illness and mental health, with a focus on gender. Contemporary distributions, diagnoses, and treatments of mental illness among men and women are examined. Focus on psychiatric disorder and gender-based discourse. This is the same course as WS 426 and may be taken only once for credit.
Also offered for graduate-level credit as Soc 526 and may be taken only once for credit. Prerequisite: Upper-division standing. Cross-Listed as: WS 426.

Soc 427 - Gender and Work (4)
Consideration of the theoretical, methodological, and empirical contributions of current scholarship in the area of gender and work. Emphasis on the intersection of gender, sexuality, race/ethnicity, and class. Topics include: inequalities in the labor force, low wage work and poverty, work/family conflict, sex/sexuality in the workplace, and masculinity.
Also offered for graduate-level credit as Soc 527 and may be taken only once for credit.

Soc 430 - Hate Crimes (4)
Hate crimes as a social issue. Central themes: the role that gender plays in the commission and awareness of hate crimes and the mainstreaming of bias crimes and the ideology behind them. Includes analysis of propaganda and coded language in the popular media and the Internet, analysis of the grass-roots response in the popular media, and evaluation of their effectiveness.
Also offered for graduate-level credit as Soc 530 and may be taken only once for credit. Prerequisite: Soc 200.

Soc 436 - Social Movements (4)
Formation, dynamics, and outcomes of social movements. Examination of the effects of circumstances, strategies, and alliances on the outcomes of social movements, including their impact on politics and society. Recommended prerequisite: Soc 200.

Soc 441 - Population and Society (4)
Survey and analysis of population dynamics (births, deaths, migration) and society. Examination of demographic concepts, theories, data and measurements, and research. Role of population processes on social life and public policies are highlighted, including population aging, economic development and the environment, urbanization, health and health care, race and ethnicity, and government/social/business planning. This course is the same as USP 419/USP 519; course may be taken only once for credit.
Also offered for graduate-level credit as Soc 541 and may be taken only once for credit. Prerequisite: Soc 200. Cross-Listed as: USP 419.
Soc 444 - Race, Ethnicity, and Nationality (4)
Analysis of the emergence, persistence and meaning of definitions of racial, ethnic and national statuses in selected areas of the modern world. Consideration of the consequences of changing definitions for intergroup and global relations. Expected preparation: Soc 200.
Also offered for graduate-level credit as Soc 544 and may be taken only once for credit.

Soc 446 - Immigrants in America (4)
Exploration of controversial issues around immigration to the U.S. Students will read and discuss social science research on demographics of immigrants, immigration policy, immigrant incorporation, and the impact of immigration on the receiving society.
Prerequisite: Soc 200 or Soc 337U.

Soc 448 - Sociology of Education (4)
Development of a sociological understanding of education in the United States. Examination the role of schooling in regards to the larger society, the social structure of schools, processes of social mobility, stratification and social reproduction; the dynamics of race, class, and gender inequalities in education, student teacher relationship; school choice; and the outcomes of education. Expected preparation: Soc 200.
Also offered for graduate-level credit as Soc 548 and may be taken only once for credit. Prerequisite: Soc 300.

Soc 450 - Sociology of Higher Education (4)
Social factors affecting individuals within higher education. Particular attention to inequalities within higher education and the role higher education plays in promoting social mobility as well as social reproduction. Includes models of higher education, the application of sociological theories to issues in higher education, access to college, Affirmative Action, standardized testing, and class, race, and gender-based differences in individual educational outcomes and retention.
Also offered for graduate-level credit as Soc 550 and may be taken only once for credit. Prerequisite: sophomore standing or higher; Soc 200.

Soc 452 - Education and Equality: Comparing the US, Asia, Europe (4)
Despite the promise of equal opportunity, US public schools produce vast inequalities in educational outcomes compared to other nations. Why? The course examines the impacts of tracking, testing, teaching styles, race, class, and gender in the US through comparisons of Japan, Singapore, Germany, and Finland.
Also offered for graduate-level credit as Soc 552 and may be taken only once for credit. Prerequisite: Soc 200, Soc 310, or Soc 320.

Soc 454 - Sociology through Film (4)
Filmmakers, like sociological fieldworkers, use stories to trace the action of their subjects or characters and scenes to reconstruct their shared social worlds. Through sociological studies and documentary and narrative films, the course examines portrayals of social institutions and processes which may include education, ethnic relations, artistic production, and other fields.
Also offered for graduate-level credit as Soc 554 and may be taken only once for credit. Prerequisite: Soc 200, Soc 310, or Soc 320.

Soc 457 - Complex Organizations (4)
Examination of complex organizations both as formal structures and as cultural systems. Analysis of the relations between organizations and individuals of inter-organizational dynamics and of the rationalization of modern societies. Expected preparation: Soc 200.
Also offered for graduate-level credit as Soc 557 and may be taken only once for credit.

Soc 459 - Sociology of Health and Medicine (4)
The application of sociology to the field of health and medicine. Attention given to a consideration of the broader questions of health in modern society, including the role of the medical practitioner in modern society, social factors and disease and responses to illness. The social organization of medicine is examined within the context of the larger medical care system. Recommended prerequisite: Soc 200.

Soc 460 - Youth Subcultures (4)
Youth as crisis and in crisis. Focus on methodology, ethnomethodology, and field experience; students will create ethnographs. Examination of the science of semiotics to understand subcultural style as language. Expected preparation: Soc 397.
Also offered for graduate-level credit as Soc 560 and may be taken only once for credit. Prerequisite: Soc 200.

Soc 461 - Sociology of the Family (4)
Sociological analysis of the structure and functions of the family institution and its relationship to external systems such as the economy and polity. Changing
Soc 462 - Sociology of Integrative Medicine (4)
An examination of common systems and practices understood as complementary and alternative medicine (CAM) including prevalence, patterns of use, trends, consumer health beliefs and motivations, and integration with mainstream allopathic medicine; philosophical, historical and political dimensions; theories of health and illness; evidence-based research vs. traditional and folk beliefs; and a consideration of benefits and limitations considering the growing popularity. Not a course about how to practice any form of alternative medicine. Expected preparation: Soc 200.
Also offered for graduate-level credit as Soc 561 and may be taken only once for credit.

Soc 463 - Global Inequalities and Health (4)
An examination of international health inequalities from social, political and economic perspectives. The impact of globalization, transnationalism and migration on population health. Inequalities within and between countries and regions, and the social dynamics that shape those inequalities. Infectious pandemics and chronic diseases, and global efforts to control diseases and improve health. Recommended prerequisites: Soc 200.
Also offered for graduate-level credit as Soc 562 and may be taken only once for credit.

Soc 465 - Environmental Sociology (4)
Survey and analysis of the types of social forces which frame the nature of environmental problems concerning natural resource use and distribution as they emerge in public consciousness within the United States and globally. Examination of the social forces which lead to the consideration and implementation of mechanisms to solve these issues once they have emerged.

Soc 466 - Sociology of Dying and Death (4)
This course will explore the nature of dying and death in the U.S. Topics will include: where death occurs, how social policy affects the experience of dying, how medical perspectives affect the experience of dying, how death affects family members, and race, class, gender differences in dying and death.

Also offered for graduate-level credit as Soc 566 and may be taken only once for credit. Prerequisite: Upper-division standing.

Soc 468 - Political Sociology (4)
Analysis of consensus and disensus in community and society. Examination of public opinion, authority, influence, and the processes by which elites are formed and acquire legitimacy and popular support. Social bases of democracy and totalitarianism. Recommended prerequisite: Soc 200.

Soc 469 - Sociology of Aging (4)
A study of social determinants of the human life course, including biological and demographic conditions, age status patterns, age grading, rites of passage, socialization, generational phenomena, and youth and old age movements. Expected preparation: Soc 200.
Also offered for graduate-level credit as Soc 569 and may be taken only once for credit.

Soc 480 - Sociology of Religion (4)
Also offered for graduate-level credit as Soc 580 and may be taken only once for credit.

Soc 483 - Sociology of the Middle East (4)
This course will examine the sociological development of the modern Middle East. It will especially focus on causes and consequences of rapid social change, including revolutions, coups, and insurgent movements. It will examine the role of Islam and tribalism in these movements. Expected preparation: Soc 200.
Also offered for graduate-level credit as Soc 583 and may be taken only once for credit.

Soc 497 - Applied Survey Research (4)
Provides theoretical framework for and experience in design, execution, and interpretation of social surveys including sampling procedures, questionnaire design, interviewing techniques, coding and computer analysis, and report writing. Expected preparation: Stat 243 and Soc 397, Soc 398 or equivalent.
Also offered for graduate-level credit as Soc 597 and may be taken only once for credit.
Soc 501 - Research (1-9)
(Credit to be arranged.) Consent of instructor.

Soc 502 - Independent Study (1-9)
(Credit to be arranged.)

Soc 503 - Thesis (1-9)
(Credit to be arranged.) Pass/no pass option.

Soc 504 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

Soc 505 - Reading and Conference (1-6)
(Credit to be arranged.) Consent of instructor.

Soc 507 - Seminar (1-6)
(Credit to be arranged.) Consent of instructor.

Soc 509 - Practicum (1-9)
(Credit to be arranged.)

Soc 510 - Selected Topics (1-9)
(Credit to be arranged.) Maximum: 12 credits. Consent of instructor.

Soc 513 - Thesis Workshop (1)
Workshop for all sociology graduate students who are currently enrolled in Soc 503 for four credits or more. Discussion and review of students' progress and problems. Recommended prerequisite: graduate status in sociology. Corequisite: Soc 503. Pass/no pass only.

Soc 518 - Criminology and Delinquency (4)

Also offered for undergraduate-level credit as Soc 418 and may be taken only once for credit.

Soc 519 - Sociology of Mental Illness (4)
An overview of sociological perspectives on mental health and illness. Informs understanding of mental health and illness by challenging dominant views of mental illness, examining how social relationships play a role in mental illness, questioning the goals and implications of mental health policy and presenting research on how mental health services are organized and provided.

Also offered for undergraduate-level credit as Soc 419 and may be taken only once for credit. Prerequisite: Soc 200.

Soc 520 - Urbanization and Community (4)
Analytical approach to the meaning of community in the modern world. The determinants, social consequences of, and responses to the processes of urbanization are considered. Theories of the city emphasizing ecological, sociocultural, and critical explanations for growth and change in urban regions are examined. Patterns of social and structural organization of the metropolis and the cognitive and behavioral aspects of urban life are explored. Expected preparation: Soc 200.

Also offered for undergraduate-level credit as Soc 420 and may be taken only once for credit.

Soc 523 - Stratification (4)
Survey and analysis of stratification theories and empirical research. Analysis of class, race, ethnicity, gender, and sexual orientation, considering economic, social, political, and cultural dimensions of power. Recommended prerequisite: Soc 200.

Also offered for undergraduate-level credit as Soc 423 and may be taken only once for credit.

Soc 524 - Groups, Interaction and Identity (4)
Analysis of the formation and functioning of intergroup and intragroup relationships. Attention to group organization and interaction, performance, cooperation, conflict, and group membership and individual identity. Analysis of the formation and functioning of intergroup and intragroup relations. Attention to group organization and interaction, performance, cooperation, conflict, and group membership and individual identity. Expected preparation: Soc or Psy 342.

Also offered for undergraduate-level credit as Soc 424 and may be taken only once for credit. Prerequisite: Soc 200.
Soc 525 - Sociology of Gender (4)
Consideration of the theoretical, methodological, and empirical contributions of current sociological scholarship on gender. Emphasis on the intersection of gender, sexuality, race/ethnicity, and class. Analysis of topics such as: masculinity/femininity, parenting, family, education, work, sexualities, reproduction, politics, and social change. This is the same course as WS 525 and may be taken only once for credit.
Also offered for undergraduate-level credit as Soc 425 and may be taken only once for credit. Prerequisite: junior standing. Cross-Listed as: WS 525.

Soc 526 - Gender & Mental Health (4)
Social and historical explanations of, and research on, mental illness and mental health, with a focus on gender. Contemporary distributions, diagnoses, and treatments of mental illness among men and women are examined. Focus on psychiatric disorder and gender-based discourse. This is the same course as WS 526 and may be taken only once for credit.
Also offered for undergraduate-level credit as Soc 426 and may be taken only once for credit. Cross-Listed as: WS 526.

Soc 527 - Gender and Work (4)
Consideration of the theoretical, methodological, and empirical contributions of current scholarship in the area of gender and work. Emphasis on the intersection of gender, sexuality, race/ethnicity, and class. Topics include: inequalities in the labor force, low wage work and poverty, work/family conflict, sex/sexiaty in the workplace, and masculinity.
Also offered for undergraduate-level credit as Soc 427 and may be taken only once for credit..

Soc 528 - Gender Inequality (4)
Explore sociological scholarship on topics related to gender inequality. Emphasis is on examining the intersection of gender with race, ethnicity, class, and sexuality. Major focus will be evaluating the theoretical, methodological, and empirical contributions of scholarship in the area of gender inequality.
Also offered as Soc 628 and may be taken only once for credit..

Soc 530 - Hate Crimes (4)
Hate crimes as a social issue. Central themes: the role that gender plays in the commission and awareness of hate crimes and the mainstreaming of bias crimes and the ideology behind them. Includes analysis of propaganda and coded language in the popular media and the Internet, analysis of the grassroots response in the popular media, and evaluation of their effectiveness.
Also offered for undergraduate-level credit as Soc 430 and may be taken only once for credit. Prerequisite: Soc 200.

Soc 537 - Qualitative Data Analysis (4)
Introduction to three techniques for analyzing qualitative data: software-based analysis using ATLAS.ti, Grounded Theory, and Thematic Analysis. Practical orientation, emphasizing hands-on experience with these techniques. Most useful for students engaged in data collection.
Also offered as Soc 637 and may be taken only once for credit. Prerequisite: Soc 592.

Soc 538 - Integrating Qualitative and Quantitative Methods (4)
Research designs for combining qualitative and quantitative methods that have reasonably well-understood benefits, and can be implemented in a relatively straightforward fashion. The value of pragmatism as a philosophical paradigm for doing mixed methods research will also be considered.
Also offered as Soc 638 and may be taken only once for credit.

Soc 539 - Focus Groups Interviewing (4)
A practically oriented course which teaches the methods of conducting research using focus groups. Course will follow the steps involved in conducting a research project that uses focus groups. Related methods, dyadic interviewing, and hands on training are at the center of this course.
Also offered as Soc 639 and may be taken only once for credit.

Soc 541 - Population and Society (4)
Survey and analysis of population dynamics (births, deaths, migration) and society. Examination of demographic concepts, theories, data and measurements, and research. Role of population processes on social life and public policies are highlighted, including population aging, economic development and the environment, urbanization, health and health care, race and ethnicity, and government/social/business planning. This course is the same as course as USP 519 and may be taken only once for credit.
Also offered for undergraduate-level credit as Soc 441 and may be taken only once for credit. Prerequisite: Soc 200. Cross-Listed as: USP 519.
Soc 544 - Race, Ethnicity, and Nationality (4)
Analysis of the emergence, persistence and meaning of definitions of racial, ethnic and national statuses in selected areas of the modern world. Consideration of the consequences of changing definitions for intergroup and global relations. Expected preparation: Soc 200.
Also offered for undergraduate-level credit as Soc 444 and may be taken only once for credit.

Soc 548 - Sociology of Education (4)
Development of a sociological understanding of education in the United States. Examination the role of schooling in regards to the larger society, the social structure of schools, processes of social mobility, stratification and social reproduction; the dynamics of race, class, and gender inequalities in education, student teacher relationship; school choice; and the outcomes of education.
Also offered for undergraduate-level credit as Soc 448 and may be taken only once for credit.

Soc 550 - Sociology of Higher Education (4)
Social factors affecting individuals within higher education. Particular attention to inequalities within higher education and the role higher education plays in promoting social mobility as well as social reproduction. Includes models of higher education, the application of sociological theories to issues in higher education, access to college, Affirmative Action, standardized testing, and class, race, and gender-based differences in individual educational outcomes and retention.
Also offered for undergraduate-level credit as Soc 450 and may be taken only once for credit.
Prerequisite: sophomore standing or higher; Soc 200.

Soc 552 - Education and Equality: Comparing the US, Asia, Europe (4)
Despite the promise of equal opportunity, US public schools produce vast inequalities in educational outcomes compared to other nations. Why? The course examines the impacts of tracking, testing, teaching styles, race, class, and gender in the US through comparisons of Japan, Singapore, Germany, and Finland.
Also offered for undergraduate-level credit as Soc 452 and may be taken only once for credit.
Prerequisite: Soc 200, Soc 310, or Soc 320.

Soc 554 - Sociology through Film (4)
Filmmakers, like sociological fieldworkers, use stories to trace the action of their subjects or characters and scenes to reconstruct their shared social worlds. Through sociological studies and documentary and narrative films, the course examines portrayals of social institutions and processes which may include education, ethnic relations, artistic production, and other fields.
Also offered for undergraduate-level credit as Soc 454 and may be taken only once for credit.
Prerequisite: Soc 200, Soc 310, or Soc 320.

Soc 557 - Complex Organizations (4)
Examination of complex organizations both as formal structures and as cultural systems. Analysis of the relations between organizations and individuals of inter-organizational dynamics and of the rationalization of modern societies. Expected preparation: Soc 200.
Also offered for undergraduate-level credit as Soc 457 and may be taken only once for credit.

Soc 560 - Youth Subcultures (4)
Youth as crisis and in crisis. Focus on methodology, ethnomethodology, and field experience; students will create ethnographs. Examination of the science of semiotics to understand subcultural style as language. Expected preparation: Soc 397.
Also offered for undergraduate-level credit as Soc 460 and may be taken only once for credit.
Prerequisite: Soc 200.

Soc 561 - Sociology of the Family (4)
Sociological analysis of the structure and functions of the family institution and its relationship to external systems such as the economy and polity. Changing and diverse forms of family organization in urban society. Analysis of role relations in the family. Expected preparation: Soc 200.
Also offered for undergraduate-level credit as Soc 461 and may be taken only once for credit.

Soc 562 - Sociology of Integrative Medicine (4)
An examination of common systems and practices understood as complementary and alternative medicine (CAM) including prevalence, patterns of use, trends, consumer health beliefs and motivations, and integration with mainstream allopathic medicine; philosophical, historical and political dimensions; theories of health and illness; evidence-based research vs. traditional and folk beliefs; and a consideration of benefits and limitations considering the growing popularity. Not a course about how to practice any form of alternative medicine. Recommended: Soc 200.
Also offered for undergraduate-level credit as Soc 462 and may be taken only once for credit.
Soc 565 - Environmental Sociology (4)
Analysis of the types of social forces which frame the nature of environmental problems concerning resource use and distribution across spatial and geopolitical levels. Examines the social forces which influence which problems are tackled; the mechanisms selected to solve the problems; and the social impact of the selected solutions. Expected preparation: undergraduate exposure to basic social science concepts.
Also offered as Soc 665 and may be taken only once for credit.

Soc 566 - Sociology of Dying and Death (4)
This course will explore the nature of dying and death in the U.S. Topics will include: where death occurs, how social policy affects the experience of dying, how medical perspectives affect the experience of dying, how death affects family members, and race, class, gender differences in dying and death.
Also offered for undergraduate-level credit as Soc 466 and may be taken only once for credit.

Soc 569 - Sociology of Aging (4)
A study of social determinants of the human life course, including biological and demographic conditions, age status patterns, age grading, rites of passage, socialization, generational phenomena, and youth and old age movements. Expected preparation: Soc 200.
Also offered for undergraduate-level credit as Soc 469 and may be taken only once for credit.

Soc 572 - Contemporary Sociological Theory (4)
Study of various frames of reference in contemporary sociological theory. Specific topics vary with instructor. Recommended prerequisites: Soc 200, 301, 302; senior standing.

Soc 576 - Theories of Social Change (3)
A critical examination of the major theories of social change. Analysis of the components of change; cause, agents, targets, channels, and strategies. Consideration of the relationship between change and power, influence, planning and control, modernization, development, and world systems approaches. Recommended prerequisite: graduate status.

Soc 577 - Topics in Contemporary Theory (4)
Exploration of theoretical approaches and issues of emerging interest in sociology, such as conceptualization of social systems, conflict, the problems of relativity, and ideology. Specific topics vary with instructor. Recommended prerequisite: Soc 301, 302 and graduate status.

Soc 579 - Food, Justice, and Social Movements (4)
This seminar examines growing social movements around food and agriculture. Includes theoretical and conceptual frameworks for understanding historical and current dynamics in the global food and agriculture system, and debates over land grabs, food price crises, hunger, and the role of biotechnology, agribusiness, and low-input peasant agriculture. Case studies examine social movements around land and food in the global South and North. Concludes with alternative models and emerging paradigms, including food sovereignty and food justice.
Also offered as Soc 679 and may be taken only once for credit.

Soc 580 - Sociology of Religion (4)
Also offered for undergraduate-level credit as Soc 480 and may be taken only once for credit.

Soc 583 - Sociology of the Middle East (4)
This course will examine the sociological development of the modern Middle East. It will especially focus on causes and consequences of rapid social change, including revolutions, coups, and insurgent movements. It will examine the role of Islam and tribalism in these movements. Expected preparation: Soc 200.
Also offered for undergraduate-level credit as Soc 483 and may be taken only once for credit.

Soc 584 - Social Inequality (4)
Theoretical perspectives and current research in social inequality including dimensions such as social class, race/ethnicity, gender, age, and nativity. Exploration of social inequality in selected domains, such as health services and outcomes, employment and work, educational attainment, housing, and other areas of sociological inquiry.
Soc 585 - Medical Sociology (4)
Seminar in medical sociology. Topics include how social stratification affects health outcomes, environmental hazards, social construction of medical knowledge, health care occupations, U.S. health policy, privatization of medical industries, and comparative health care systems. Expected preparation: Soc 459/Soc 559 or consent of instructor.

Soc 586 - Topics in Health and Inequality (4)
Seminar focusing on the impact of race, class, and/or gender on health and health care. Topics may include medicalization of women’s bodies, the social consequences of disparities, and current public policy debates about reducing disparities. Expected preparation: Soc 459/559.

Soc 587 - International Health Inequalities (4)
Explores the sociology of health and inequality in an international context. Topics include international health institutions, healthcare systems, and the social determinants of health inequalities in a global perspective.

Soc 588 - Social Sustainability Theory and Practice (4)
Healthy families; healthy communities; healthy democracies; economic, gender and racial equity; and social justice are all factors of social sustainability. This course will examine how to measure and how to reach these goals, by examining models locally, nationally and internationally. We will look at best practices of city, state and national governments, businesses, unions, and NGOs. We will also examine the relationship between economic, environmental and social sustainability.

Soc 591 - Theoretical Perspectives in Sociology (4)
Analysis of the major contemporary theories in sociology. Attention to the problems of order and change, and power and inequality, as well as to the micro/macro problem in sociological theory. Recommended prerequisite: Soc 470 and graduate status.

Soc 592 - Qualitative Methods (4)
Strategies for acquisition and analysis of data using such approaches as participant observation, content analysis, field and case studies. Attention to the special problems of validity and reliability in such research. Consideration of ethical issues and researcher responsibility in qualitative research. Recommended prerequisite: graduate status.

Soc 593 - Quantitative Methods (4)
The application of quantitative methodology to sociological problems. Topics include: science and logical empiricism; measurement of association; procedures of statistical inference; multivariate and log linear analysis; computer application for social research. Recommended prerequisites: Stat 243, Soc 397, 398, graduate status.

Soc 594 - Theory Construction and Research (4)
Examination of the craft of sociological research in conjunction with thesis work. The role of theory in research, evaluating published work, biases in data sources and the process of thesis writing. Recommended prerequisites: Soc 590, 591; graduate status.

Soc 595 - Research Practicum (4)
Overview of the process of linking sociological data and ideas to broader communities of interest. Exercises in preparation of research grants and experience in working in a team research environment. Recommended prerequisites: Soc 590, 591; graduate status.

Soc 597 - Applied Survey Research (4)
Provides theoretical framework for and experience in design, execution, and interpretation of social surveys including sampling procedures, questionnaire design, interviewing techniques, coding and computer

Also offered for undergraduate-level credit as Soc 497 and may be taken only once for credit.

Soc 598 - Globalization Seminar (4)
Analysis of the ways in which economic patterns that reach across national boundaries affect the security of communities and their standards of living. Topics include how different economic classes fare in the rapid reshuffling of national economies that globalization entails; the role of international institutions in shaping economic globalization; the experience and responses of workers as a group; and the role of states in facilitating or resisting the adverse impacts of globalization.

Also offered as Soc 698 and may be taken only once for credit.

Soc 601 - Research (0-9)
(Credit to be arranged.)

Soc 603 - Dissertation (1-9)
(Credit to be arranged.)

Soc 604 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

Soc 605 - Reading and Conference (1-6)
(Credit to be arranged.)

Soc 607 - Seminar (1-6)
(Credit to be arranged.)

Soc 610 - Selected Topics (1-9)
(Credit to be arranged.)

Soc 619 - Sociology of Mental Health & Mental Illness (4)
The sociological study of mental health and illness is uniquely different from the orientations of other disciplines in that it focuses on (1) identifying the social conditions that affect psychological well-being and (2) describing the processes linking the social conditions to their psychological effects. The dual aims of this course are to provide both the theoretical foundations necessary for the study of societal effects on individuals’ well-being and a familiarity with relevant sociological research on mental health and mental illness.

Prerequisite: Graduate student status or permission of the instructor.

Soc 628 - Gender Inequality (4)
Explore sociological scholarship on topics related to gender inequality. Emphasis on examining the intersection of gender with race, ethnicity, class, and sexuality. Major focus will be evaluating the theoretical, methodological, and empirical contributions of scholarship in the area of gender inequality.

Also offered as Soc 528 and may be taken only once for credit.

Soc 637 - Qualitative Data Analysis (4)
Introduction to three techniques for analyzing qualitative data: software-based analysis using ATLAS.ti, Grounded Theory, and Thematic Analysis. Practical orientation, emphasizing hands-on experience with these techniques. Most useful for students engaged in data collection.

Also offered as Soc 537 and may be taken only once for credit. Prerequisite: Soc 592.

Soc 638 - Integrating Qualitative and Quantitative Methods (4)
Research designs for combining qualitative and quantitative methods that have reasonably well-understood benefits, and can be implemented in a relatively straightforward fashion. The value of pragmatism as a philosophical paradigm for doing mixed methods research will also be considered.

Also offered as Soc 538 and may be taken only once for credit.

Soc 639 - Focus Groups Interviewing (4)
A practically oriented course which teaches the methods of conducting research using focus groups. Course will follow the steps involved in conducting a research project that uses focus groups. Related methods, dyadic interviewing, and hands-on training are at the center of this course.

Also offered as Soc 539 and may be taken only once for credit.

Soc 665 - Environmental Sociology (4)
Analysis of the types of social forces which frame the nature of environmental problems concerning resource use and distribution across spatial and geopolitical levels. Examines the social forces which influence which problems are tackled; the mechanisms selected to solve the problems; and the
social impact of the selected solutions. Expected preparation: undergraduate exposure to basic social science concepts.

Also offered as Soc 565 and may be taken only once for credit.

**Soc 679 - Food, Justice, and Social Movements (4)**

This seminar examines growing social movements around food and agriculture. Includes theoretical and conceptual frameworks for understanding historical and current dynamics in the global food and agriculture system, and debates over land grabs, food price crises, hunger, and the role of biotechnology, agribusiness, and low-input peasant agriculture. Case studies examine social movements around land and food in the global South and North. Concludes with alternative models and emerging paradigms, including food sovereignty and food justice.

Also offered as Soc 579 and may be taken only once for credit. Prerequisite: None.

**Soc 684 - Social Inequality (4)**

Theoretical perspectives and current research in social inequality including dimensions such as social class, race/ethnicity, gender, age, and nativity. Exploration of social inequality in selected domains, such as health services and outcomes, employment and work, educational attainment, housing, and other areas of sociological inquiry.

Also offered as Soc 584 and may be taken only once for credit.

**Soc 685 - Medical Sociology (4)**

Seminar in medical sociology. Topics include how social stratification affects health outcomes, environmental hazards, social construction of medical knowledge, health care occupations, U.S. health policy, privatization of medical industries, and comparative health care systems. Expected preparation: Soc 459/Soc 559 or consent of instructor.

Also offered as Soc 585 and may be taken only once for credit.

**Soc 686 - Topics in Health and Inequality (4)**

Seminar focusing on the impact of race, class, and/or gender on health and health care. Topics may include medicalization of women’s bodies, the social consequences of disparities, and current public policy debates about reducing disparities. Expected preparation: Soc 459/Soc 559.

Also offered as Soc 586 and may be taken only once for credit.

**Soc 687 - International Health Inequalities (4)**

Explores the sociology of health and inequality in an international context. Topics include international health institutions, healthcare systems, and the social determinants of health inequalities in a global perspective.

Also offered as Soc 587 and may be taken only once for credit.

**Soc 688 - Social Sustainability Theory and Practice (4)**

Healthy families; healthy communities; healthy democracies; economic, gender and racial equity; and social justice are all factors of social sustainability. This course will examine how to measure and how to reach these goals, by examining models locally, nationally and internationally. We will look at best practices of city, state and national governments, businesses, unions, and NGOs. We will also examine the relationship between economic, environmental and social sustainability.

Also offered as Soc 588 and may be taken only once for credit.

**Soc 692 - Foundations of Ecosystem Services (4)**

Learn key ecological, social, economic and philosophical theories that underlie ecosystem services science and management. Examine ecological processes, policy and governance in managing these systems, as well as impacts of changing climate, human demographics, etc. This is the same course as ESR 692 and may be taken only once for credit.

Cross-Listed as: ESR 692.

Examination of social forces and institutions that influence use and guide policy for management of ecosystems services. Investigation of inter-jurisdictional governance of natural systems to establish law and policy that promote investment in ecosystems to create sustainable cities.

**Soc 695 - Advanced Quantitative Methods (4)**

Introduces a range of advanced quantitative methods commonly found in published research in sociology. Particular attention will be paid to the techniques commonly used to address the most common shortcomings of sociological data, including estimation of multivariate models with categorical dependent variables (i.e. logistic regression) and to nonparametric methods for analyzing data.
Prerequisite: Soc 585/Soc 685, Soc 593, and Stat 543 or equivalent.

Soc 695L - Advanced Methods in Sociology Lab (0)
Lab for Advanced Methods in Sociology.

Soc 698 - Globalization Seminar (4)
Analysis of the ways in which economic patterns that reach across national boundaries affect the security of communities and their standards of living. Topics include how different economic classes fare in the rapid reshuffling of national economies that globalization entails; the role of international institutions in shaping economic globalization; the experience and responses of workers as a group; and the role of states in facilitating or resisting the adverse impacts of globalization.
Also offered as Soc 598 and may be taken only once for credit.

Span - Spanish
Span 101 - First-Year Spanish Term 1 (4)
An introduction to elementary Spanish. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the first course in a sequence of three: Span 101, Span 102, and Span 103.

Span 101M - First-year Spanish Modified (4)
An introduction to elementary Spanish. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings.

Span 102 - First-Year Spanish Term 2 (4)
An introduction to elementary Spanish. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the second course in a sequence of three: Span 101, Span 102, and Span 103.

Span 102M - First-year Spanish Modified (4)
An introduction to elementary Spanish. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings.

Span 103 - First-Year Spanish Term 3 (4)
An introduction to elementary Spanish. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the third course in a sequence of three: Span 101, Span 102, and Span 103.

Span 103M - First-year Spanish Modified (4)
An introduction to elementary Spanish. Emphasis on listening comprehension and oral practice, the elements of grammar, vocabulary building, and elementary readings.

Span 150 - First-year Spanish (Intensive) (6)
A two-term course covering the content of Span 101, 102, 103.

Span 151 - First-year Spanish (Intensive) (6)
A two-term course covering the content of Span 101, 102, 103.

Span 199 - Special Studies (1-12)
(Credit to be arranged.)

Span 201 - Second-Year Spanish Term 1 (4)
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the first course in a sequence of three: Span 201, Span 202, and Span 203. Expected preparation: Span 103.

Span 201H - Second-year Spanish Heritage ()
Intensive review of basic materials introduced in first-year program and further development of communication skills. Expected preparation: Span 103.

Span 202 - Second-Year Spanish Term 2 (4)
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the second course in a sequence of three: Span 201, Span 202, and Span 203. Expected preparation: Span 103.
Span 202H - Second-year Spanish Heritage ()
Intensive review of basic materials introduced in first-year program and further development of communication skills. Expected preparation: Span 103.

Span 203 - Second-Year Spanish Term 3 (4)
Intensive review of basic materials introduced in first-year program and further development of communication skills. This is the third course in a sequence of three: Span 201, Span 202, and Span 203. Expected preparation: Span 103.

Span 203H - Second-year Spanish Heritage ()
Intensive review of basic materials introduced in first-year program and further development of communication skills. Expected preparation: Span 103.

Span 209 - Special Studies (1-12)
(Credit to be arranged.)

Span 299 - Special Studies (1-12)
(Credit to be arranged.)

Span 299H - Special Studies (1 - 12)
(Credit to be arranged.)

Span 301 - Third-year Spanish (4)
Spanish language study to help develop advanced proficiency. Intensive grammar instruction in preparation for upper division courses in culture, linguistics and literature. Emphasis on speaking, listening comprehension, reading, and writing skills for analysis and research. This is the first course in a sequence of three: Span 301, Span 302, and Span 303. It is preferable to take the sequence in order.

Span 301H - Third-year Spanish Heritage ()

Span 302 - Third-year Spanish (4)
Spanish language study to help develop advanced proficiency. Intensive grammar instruction in preparation for upper division courses in culture, linguistics and literature. Emphasis on speaking, listening comprehension, reading, and writing skills for analysis and research. This is the second course in a sequence of three: Span 301, Span 302, and Span 303. It is preferable to take the sequence in order.

Span 302H - Third-year Spanish Heritage ()

Span 303 - Third-year Spanish (4)
Spanish language study to help develop advanced proficiency. Intensive grammar instruction in preparation for upper division courses in culture, linguistics and literature. Emphasis on speaking, listening comprehension, reading, and writing skills for analysis and research. This is the third course in a sequence of three: Span 301, Span 302, and Span 303. It is preferable to take the sequence in order.

Span 303H - Third-year Spanish Heritage ()

Span 311 - Spanish Conversation (4)
Practice of spoken Spanish through conversation, interviews, and listening to or viewing Spanish language broadcasts. Special language focus chosen by instructor, such as: pronunciation, word choice,
the subjunctive, the sequence of tenses, or special time expressions.

Prerequisite: 8 credits of Span 301, 301H, 302, 302H, 303, or 303H.

**Span 312 - Introduction to Teaching Spanish (4)**

Introduction to the field of teaching Spanish. Students will explore current practices through observation and reflection, as well as research and discuss a variety of issues related to Spanish language teaching. Students will identify and articulate their own beliefs about teaching, and develop individual plans for professional development. Course is conducted in Spanish.

Prerequisite: 8 credits of Span 301, Span 302, or Span 303, or equivalent Spanish language proficiency.

**Span 313 - Business & Culture in the Hispanic World (4)**

Solid foundation in Spanish business vocabulary and cultural business concepts. Students will engage in situational role-play practices that will prepare them to successfully interact with today's growing Hispanic economies.

Prerequisite: 8 credits of Span 301, Span 302 or Span 303.

**Span 314 - Spanish in Social and Legal Services (4)**

Study of cultural and linguistic issues that affect successful interaction with the Spanish-speaking community faced with matters concerning the law and social services.

Prerequisite: 8 credits of Span 301, Span 302, or Span 303.

**Span 315 - Written Translation (English-Span & Span-English) (4)**

Practice in translating a variety of genres and styles, both literary and non-literary. It introduces the translation of specialized subject matter, in particular political texts and economic and financial texts. Students have the opportunity to analyze critically, and to resolve creatively, the problems involving such issues in translation as context, register, tone, and audience. Written translation is offered both from English to Spanish, and from Spanish to English.

Prerequisite: 8 credits of any of these classes: Span 301, Span 302, or Span 303.

**Span 316 - Spanish and Medical Culture (4)**

An historical-descriptive and interdisciplinary perspective on the field and practice of medicine, this course will help students get familiar with the themes and vocabulary of the medical profession.

Prerequisite: 8 credits of Span 301, Span 302, or Span 303.

**Span 317 - Spanish for Agriculture Purposes (4)**

This class will improve student's Spanish agricultural vocabulary and their ability to describe and participate in agricultural practices in Spanish. It will also give a summary of US agricultural policy and its connection to migrant communities; explaining the impact of the international industrialization of agriculture on rural populations in both Latin America and the United States.

Prerequisite: 8 credits of any of these classes: Span 301, or Span 302, or Span 303, or Span 301H, or Span 302H, or Span 303H.

**Span 325 - Spanish Phonetics and Phonology (4)**

Introduction to the sounds of Spanish: their place and manner of articulation (phonetics) as well as how they pattern with respect to each other and as influenced by morphological and syntactic factors (phonology).

Prerequisite: Eight credits of Span 301, Span 302, or Span 303.

**Span 330 - Peninsular Culture and Civilization (4)**

Historical development of life, thought, and the arts in Spain.

Prerequisite: Eight credits of Span 301, Span 302, or Span 303.

**Span 331 - Latin American Culture and Civilization (4)**

Historical development of life, thought, and the arts in Latin America.

Prerequisite: Eight credits of Span 301, Span 302, or Span 303.

**Span 341 - Pre-Modern Cultural and Literary Foundations (4)**

Study of medieval and/or pre-Colombian cultural texts and practices that form the foundations of Spanish literary traditions.

Prerequisite: Span 301, Span 302, and Span 303.

**Span 342 - Early Modern and Colonial Cultural and Literary Expression (4)**

Study of Early Modern Spanish and/or Hispanic American literary practices and works from the 15th to the 17th century.

Prerequisite: Span 301, Span 302, and Span 303.
**Span 343 - Cultural and Literary Expressions of Independence (4)**
Study of Spanish and/or Hispanic American literary practices and works in the context of 18th-, 19th-, and 20th-century independence and republican movements.
Prerequisite: Span 301, Span 302, and Span 303.

**Span 344 - Modern Cultural and Literary Expressions (4)**
Study of Spanish and/or Hispanic American literary practices and works in the 20th century with emphases on war, dictatorship, revolution and globalization.
Prerequisite: Span 301, Span 302, and Span 303.

**Span 345 - Present-Day Cultural and Literary Expression (4)**
Study of contemporary Spanish and/or Hispanic American literary practices, works, and new media and works in global and digital contexts.
Prerequisite: Span 301, Span 302, and Span 303.

**Span 395 - Spanish in the World (4)**
The expansion of Spanish through media, Spanish and the other official languages of the Iberian Peninsula, Spanish in the USA, and the language politics of Latin America.

**Span 399 - Special Studies (1-12)**
(Credit to be arranged.)

**Span 399U - Special Studies (4)**
(Credit to be arranged.)

**Span 401 - Research (1-6)**
(Credit to be arranged.)

**Span 404 - Cooperative Education/internship (1-12)**
(Credit to be arranged.)

**Span 405 - Reading and Conference (1-6)**
(Credit to be arranged.)

**Span 407 - Seminar (0-6)**
(Credit to be arranged.)

**Span 408 - Workshop (1-6)**
(Credit to be arranged.)

**Span 409 - Practicum (1-12)**
(Credit to be arranged.)

**Span 410 - Selected Topics (1-12)**
(Credit to be arranged.)

**Span 410U - Selected Topics (4)**
(Credit to be arranged.)

**Span 411 - Advanced Spanish (4)**
Intensive training in composition, translation, and conversation. May be taken concurrently with Span 414 or Span 514.
Also offered for graduate-level credit as Span 511 and may be taken only once for credit. Prerequisite: Span 301, Span 302, and Span 303.

**Span 414 - Advanced Spanish Grammar (4)**
A thorough study of grammar and syntax for majors and prospective teachers. May be taken concurrently with Span 411 or Span 511.
Also offered for graduate-level credit as Span 514 and may be taken only once for credit. Prerequisite: Span 301, Span 302, and Span 303.

**Span 421 - Major Topics: Peninsular Prose (4)**
Study, analysis, and critique of major prose works of Spain by authors such as Fernando de Rojas, Cervantes, Galdós, Unamuno, and Goytisolo.
Also offered for graduate-level credit as Span 521. Prerequisite: 4 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 422 - Major Topics: Peninsular Drama (4)**
Study, analysis, and critique of major dramatic works of Spain by authors such as Lope de Vega, Tirso de Molina, Calderón de la Barca, Zorrilla, García Lorca, and Buero Vallejo.
Also offered for graduate-level credit as Span 522. Prerequisite: 4 units of Span 341, Span 342, Span 343, Span 344 or Span 345.
**Span 423 - Major Topics: Peninsular Poetry (4)**
Study, analysis, and critique of the poetry of Spain by authors such as Berceo, Gongora, Quevedo, Machado, Jimenez, and Cernuda.
Also offered for graduate-level credit as Span 523.
Prerequisite: 4 units of SPAN 341, Span 342, SPAN 343, SPAN 344 or SPAN 345.

**Span 427 - Major Topics: Latin American Prose (4)**
Study, analysis, and critique of major prose works of Latin America by authors such as Garcia Marquez, Fuentes, Paz, Vargas Llosa, Mastretta, and Borges.
The course may be repeated for up to 12 credits.
Also offered for graduate-level credit as Span 527.
Prerequisite: 4 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 428 - Major Topics: Latin American Drama (4)**
Study, analysis, and critique of major dramatic works of Latin America by authors such as Gambaro, Benedetti, Usigli, Diaz, and de la Parra.
Also offered for graduate-level credit as Span 528.
Prerequisite: 4 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 429 - Major Topics: Latin American Poetry (4)**
Study, analysis, and critique of major prose works of Latin America, by authors such as Dario, Huidobro, Vallejo, Neruda, Guillen, and Mistral.
Also offered for graduate-level credit as Span 529.
Prerequisite: 4 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 430 - Major Topics: Ibero-American Film (4)**
Study, analysis, and critique of films from Ibero-America on such topics as national film traditions, Cinema Novo, Third Cinema, violence, migration, gender studies, and globalization. Course may be repeated for credit when topics vary.
Also offered for graduate-level credit as Span 530.
Prerequisite: 4 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 434 - Major Topics: Peninsular Multiple Genres (4)**
Study, analysis, and critique of works in multiple genres on such topics as Medieval Literature, the Celestina, Women Writers, Literature of the Franco Years, the Poetry & Drama of Garcia Lorca, and the Generation of '98. Course may be repeated for credit when topics vary.
Also offered for graduate-level credit as Span 534.
Prerequisite: 4 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 436 - Major Topics: Latin American Multiple Genres (4)**
Study, analysis, and critique of works in multiple genres on such topics as Transvestism, Feminism, Sickness and Literature, Prose and Poetry of Borges, and Pre-Colombian Literature. Course may be repeated for credit when topics vary.
Also offered for graduate-level credit as Span 536.
Prerequisite: 4 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 441 - Major Works in Translation (4)**
Study of selections from masterpieces in translation by authors such as Cervantes, Neruda, Borges, Lispector, and Garcia Marquez. Readings, lectures, and discussions in English. Expected preparation: 4 credits of upper division literature.
Also offered for graduate-level credit as Span 541 and may be taken only once for credit.

**Span 490 - History of the Spanish Language (4)**
Study of the development of the Spanish language in terms of phonological, morphological, and syntactical changes.
Also offered for graduate-level credit as Span 590 and may be taken only once for credit.
Prerequisite: Span 301, Span 302, Span 303, and Span 325.

**Span 494 - Spanish Linguistics (4)**
Introduction to the basic concepts of linguistics and their application to the Spanish language. Emphasis on practical analysis of the sound system and the grammatical system. Brief survey of the historical development, followed by an analysis of the phonetics, phonemics, morphology, and syntax of modern Spanish.
Also offered for graduate-level credit as Span 594 and may be taken only once for credit.
Prerequisite: Span 301, Span 302, Span 303, and Span 325.

**Span 495 - Spanish Dialectology (4)**
Study of Spanish dialects with attention to geographic regions that differentiate the Spanish speaking world including official and unofficial varieties of Spanish in Europe, the Americas, Africa, and Asia.
Also offered for graduate-level credit as Span 595 and may be taken only once for credit. Prerequisite: Span 325.

**Span 497 - Applied Spanish Linguistics (4)**

Also offered for graduate-level credit as Span 597 and may be taken only once for credit. Prerequisite: Span 301, Span 302, and Span 303.

**Span 498 - Spanish Syntax (4)**

Also offered for graduate-level credit as Span 598 and may be taken only once for credit. Prerequisite: Span 301, Span 302, and Span 303.

**Span 501 - Research (1-9)**
(Credit to be arranged.)

**Span 503 - Thesis (1-9)**
(Credit to be arranged.)

**Span 504 - Cooperative Education/internship (1-9)**
(Credit to be arranged.)

**Span 505 - Reading and Conference (1-6)**
(Credit to be arranged.)

**Span 507 - Seminar (1-6)**
(Credit to be arranged.)

**Span 508 - Workshop (1-6)**
(Credit to be arranged.)

**Span 509 - Practicum (1-9)**
(Credit to be arranged.)

**Span 510 - Selected Topics (1-6)**
(Credit to be arranged.)

**Span 511 - Advanced Spanish (4)**
Intensive training in composition, translation, and conversation. May be taken concurrently with Span 414 or Span 514.

Also offered for undergraduate-level credit as Span 411 and may be taken only once for credit. Prerequisite: Span 301, Span 302, and Span 303.

**Span 514 - Advanced Spanish Grammar (4)**
A thorough study of grammar and syntax for majors and prospective teachers. May be taken concurrently with Span 411 or Span 511.

Also offered for undergraduate-level credit as Span 414 and may be taken only once for credit. Prerequisite: Span 301, Span 302, and Span 303.

**Span 521 - Major Topics: Peninsular Prose (4)**
Study, analysis, and critique of major prose works of Spain by authors such as Fernando de Rojas, Cervantes, Galdós, Unamuno, and Goytisolo.

Also offered for undergraduate-level credit as Span 421. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 522 - Major Topics: Peninsular Drama (4)**
Study, analysis, and critique of major dramatic works of Spain by authors such as Lope de Vega, Tirso de Molina, Calderón de la Barca, Zorrilla, García Lorca, and Buero Vallejo.

Also offered for undergraduate-level credit as Span 422. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 523 - Major Topics: Peninsular Poetry (4)**
Study, analysis, and critique of the poetry of Spain by authors such as Berceo, Gongora, Quevedo, Machado, Jiménez, and Cernuda.

Also offered for undergraduate-level credit as Span 423. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 527 - Major Topics: Latin American Prose (4)**
Study, analysis, and critique of major prose works of Latin America by authors such as García Marquez, Fuentes, Paz, Vargas Llosa, Márquez, and Borges. The course may be repeated for up to 12 credits.
Also offered for undergraduate-level credit as Span 427. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 528 - Major Topics: Latin American Drama (4)**

Study, analysis, and critique of major dramatic works of Latin America by authors such as Gambaro, Benedetti, Usigli, Diaz, and de la Parra.

Also offered for undergraduate-level credit as Span 428. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 529 - Major Topics: Latin American Poetry (4)**

Study, analysis, and critique of major prose works of Latin America, by authors such as Dario, Huidobro, Vallejo, Neruda, Guillen, and Mistral.

Also offered for undergraduate-level credit as Span 429. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 530 - Major Topics: Ibero-American Film (4)**

Study, analysis, and critique of films from Ibero-America on such topics as national film traditions, Cinema Novo, Third Cinema, violence, migration, gender studies, and globalization. Course may be repeated for credit when topics vary.

Also offered for undergraduate-level credit as Span 430. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 534 - Major Topics: Peninsular Multiple Genres (4)**

Study, analysis, and critique of works in multiple genres on such topics as Medieval Literature, the Celestina, Women Writers, Literature of the Franco Years, the Poetry Drama of Garcia Lorca, and the Generation of '98. Course may be repeated for credit when topics vary.

Also offered for undergraduate-level credit as Span 434. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 536 - Major Topics: Latin American Multiple Genres (4)**

Study, analysis, and critique of works in multiple genres on such topics as Transvestism, Feminism, Sickness and Literature, Prose and Poetry of Borges, and Pre-Colombian Literature. Course may be repeated for credit when topics vary.

Also offered for undergraduate-level credit as Span 436. Prerequisite: 8 credits of Span 341, Span 342, Span 343, Span 344, or Span 345.

**Span 541 - Major Works in Translation (4)**

Study of selections from masterpieces in translation by authors such as Cervantes, Neruda, Borges, Lispector, and Garcia Marquez. Readings, lectures, and discussions in English. Expected preparation: 4 credits of upper division literature.

Also offered for undergraduate-level credit as Span 441 and may be taken only once for credit.

**Span 551 - Hispanic Poetry (4)**

Critical study of the lyric poetry of Latin America and/or Spain.

**Span 552 - Hispanic Drama (4)**

Critical study of representative works of Latin American and/or Spanish drama.

**Span 553 - Hispanic Prose (4)**

Critical study of representative works of the prose of Latin America and/or Spain.

**Span 554 - Hispanic Multiple Genres (4)**

Critical works of Latin American and/or Spanish authors.

**Span 590 - History of the Spanish Language (4)**

Study of the development of the Spanish language in terms of phonological, morphological, and syntactical changes.

Also offered for undergraduate-level credit as Span 490 and may be taken only once for credit. Prerequisite: Span 301, Span 302, Span 303, and Span 325.

**Span 594 - Spanish Linguistics (4)**

Introduction to the basic concepts of linguistics and their application to the Spanish language. Emphasis on practical analysis of the sound system and the grammatical system. Brief survey of the historical development, followed by an analysis of the phonetics, phonemics, morphology, and syntax of modern Spanish. Must be taken in sequence.

Also offered for undergraduate-level credit as Span 494 and may be taken only once for credit. Prerequisite: Span 301, Span 302, Span 303, and Span 325.
Span 595 - Spanish Dialectology (4)
Study of Spanish dialects with attention to geographic regions that differentiate the Spanish speaking world including official and unofficial varieties of Spanish in Europe, the Americas, Africa, and Asia.
Also offered for undergraduate-level credit as Span 495 and may be taken only once for credit.

Span 597 - Applied Spanish Linguistics (4)
Also offered for undergraduate-level credit as Span 497 and may be taken only once for credit.
Prerequisite: Span 301, Span 302, and Span 303.

Span 598 - Spanish Syntax (4)
A practical approach to Spanish Syntax. Study and analysis of syntactical functions and sentence structure. Emphasis on modern grammatical theory and findings. Examination of discourse connectors.
Expected preparation: 4 credits of linguistics.
Also offered for undergraduate-level credit as Span 498 and may be taken only once for credit.
Prerequisite: Span 301, Span 302, and Span 303.

SpEd - Special Education

SpEd 120 - Career and Community Studies First Year of Study (2)
This course will support first year students to actively engage in academic studies, employment, independent living and campus life. Students will meet with their CCS advisor, academic coach and peer navigator each week and attend a series of three seminars. Students will learn to more fully participate in their person-centered planning meetings, use their individualized supports, develop college goals, and practice skills that will be critical to their success during and after college.

SpEd 199 - Special Studies (1-6)
(Credit to be arranged.)

SpEd 220 - Career and Community Studies Second Year of Study (2)
This course will support second year Career and Community Studies (CCS) students to increase their independence and engagement in college through a full range of individualized supports with seminar and workshop options to choose from each term. Students will learn to make decisions about academic course options, use their supports, expand their experiences on campus, discover career interests while on the job, speak up for themselves within planning meetings, and set college goals.
Prerequisite: SpEd 120.

SpEd 320 - Career and Community Studies Third Year of Study (2)
This course will support third year Career and Community Studies (CCS) students to increase their independence and engagement in college through a full range of individualized supports with seminar and workshop options to choose from each term. Students will self manage their supports, use their voices and make informed decisions, expand their experiences on campus, deepen their awareness of career pathways, learn to lead their planning meetings, and meet their college goals.
Prerequisite: SpEd 120 and SpEd 220.

SpEd 401 - Research (1-6)
(Credit to be arranged.)

SpEd 402 - Independent Study (0-9)
(Credit to be arranged.)

SpEd 403 - Thesis (1-6)
(Credit to be arranged.)

SpEd 404 - Cooperative Education/Internship (1-12)
(Credit to be arranged.)

SpEd 405 - Reading and Conference (1-6)
(Credit to be arranged.)

SpEd 406 - Special Problems (1-6)
(Credit to be arranged.)

SpEd 407 - Seminar (1-6)
(Credit to be arranged.)
SpEd 408 - Workshop (1-6)
(Credit to be arranged.)

SpEd 409 - Practicum (1-12)
(Credit to be arranged.)

SpEd 410 - Experimental Course (1-12)
(Credit to be arranged.)

SpEd 411 - Foundations of Special Education (3)
Introduces research, theory and data as foundation for guiding decision making and professional practice in special education guided by the "Critical Concepts" of Special Education as identified by department faculty including Individualization; Inclusion and Diversity; Scaffolding Instruction; Data-based Decision Making; Collaboration and Teaming; and Leadership and Advocacy.
Also offered for graduate-level credit as SpEd 511 and may be taken only once for credit. Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 412 - Diagnostic Assessment (3-4)
The focus of this course is the legal requirements and professional skills required for conducting non-biased, standardized, academic assessments. Students will develop knowledge and skills in: collecting relevant background information; selecting, administering, and interpreting assessments; developing academic goals and objectives; preparing meaningful reports; and conducting meetings to convey assessment results.
Also offered for graduate-level credit as SpEd 512 and may be taken only once for credit. Prerequisite: Mth 211, Mth 212, SpEd 418, and admission to the program.

SpEd 414 - Legal and Ethical Foundations of Special Education (3)
Overview of state and federal laws, rules and regulations, including analysis of the Individuals with Disabilities Education Act (2004), and their impact on service provision for students with disabilities. Issues of ethics, inclusion, and diversity are integrated within this course. Application of Oregon Administrative Rules will be highlighted.
Also offered for graduate-level credit as SpEd 514 and may be taken only once for credit. Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 415 - Classroom Assessment, Instruction, and Behavior Management (Elementary) (4)
Focus on establishing effective instructional environments through research-based techniques of behavior management, assessment, and instructional delivery in elementary settings.
Also offered for graduate-level credit as SpEd 515 and may be taken only once for credit. Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 416 - Classroom Assessment, Instruction, and Behavior Management (Secondary) (4)
Establishing effective instructional environments through research-based techniques of behavior management, assessment, and instructional delivery.
Also offered for graduate-level credit as SpEd 516 and may be taken only once for credit. Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 417 - Introduction to Special Education (4)
Provides an introduction to the field of special education and the use of evidence-based teaching practices in special education. Students explore particular career options of interest and participate in a community-based learning experience in public school settings with learners who are at-risk or have special education needs. Recommended prerequisite (or concurrent enrollment): Psy 311, SpEd 418.

SpEd 418 - Survey of Exceptional Learners (3)
Overview of working with exceptional individuals, including special education and multicultural differences. Nature of diversities (including the talented and gifted) and educational ramifications for the teacher. Expected preparation: Psy 311.
Also offered for graduate-level credit as SpEd 518 and may be taken only once for credit.

SpEd 419 - Principles of Special Education (3)
Prepares students entering special education with basic knowledge, skills, and values necessary for future success in their profession. Major overview of theory and research underlying delivery of special education services in the public schools. Intensive study of career planning, graduate writing and research, information systems, current legislation, teaching and learning theory, curricular models, and professional ethics and standards. Expected preparation (or concurrent enrollment): Psy 311, SpEd 418.
SpEd 420 - Career and Community Studies
Fourth Year of Study (2)
This course will support fourth year Career and Community Studies (CCS) students to increase their independence and engagement in college through a full range of individualized supports with seminar and ePortfolio workshop series each term. Students will set goals for finishing college, transition to a career-focused job off campus, expand their experiences in the community, develop a portfolio, lead their planning meetings, and direct their supports at college and in the community.
Prerequisite: SpEd 120, SpEd 220 and SpEd 320.

SpEd 422 - Comprehensive Individualized Assessment and Curriculum I (3)
Applies knowledge and skills for functional assessment and applied behavior analysis in the design and implementation of an individualized curriculum for individuals with significant and multiple disabilities. Emphasizes curricular content for life skills, communication, social, motor, and cognitive/functional academic domains. Provides instructional strategies for routines-based, naturalistic, and teacher-directed learning. This is the first course in a sequence of two: SpEd 422 and SpEd 423.
Also offered for graduate-level credit as SpEd 522 and may be taken only once for credit. Prerequisite: Admission to the program.

SpEd 423 - Comprehensive Individualized Assessment and Curriculum II (3)
Applies knowledge and skills for functional assessment and applied behavior analysis in the design and implementation of an individualized curriculum for individuals with significant and multiple disabilities. Emphasizes curricular content for life skills, communication, social, motor, and cognitive/functional academic domains. Provides instructional strategies for routines-based, naturalistic, and teacher-directed learning. This is the second course in a sequence of two: SpEd 422 and SpEd 423.
Also offered for graduate-level credit as SpEd 523 and may be taken only once for credit. Prerequisite: Admission to the program.

SpEd 425 - Student Teaching (6-15)
This full-time student teaching experience provides opportunities for students to apply, practice, and generalize concepts and skills learned in university courses. Students will have opportunities to observe and participate in the responsibilities of the special educator, and further develop their skills in instruction and classroom management.
Also offered for graduate-level credit as SpEd 525. Prerequisite: Mth 211, Mth 212, SpEd 418 and admission to program. Corequisite: SpEd 426.

SpEd 426 - IEP and Collaborative Teaming (4)
This course is about the processes and skills involved in collaborative teaming and consultation within schools settings. Throughout the student teaching experience, course participants will learn about their role in the IEP process, experience a full range of professional responsibilities including instructional and non-instructional roles, and prepare an edTPA portfolio.
Also offered for graduate-level credit as SpEd 526 and may be taken only once for credit. Prerequisite: Mth 211, Mth 212, SpEd 418 and admission to program. Corequisite: SpEd 425.

SpEd 427 - IEP and Collaborative Teaming (Secondary) (3)
This course examines collaborative teaming and consultation among teaching professionals, students, families, paraprofessionals, administrators and service personnel in the context of culturally diverse schools and communities. Careful examination of the IEP process will help define requisite case management skills and effective meeting facilitation skills that promote productive teaming processes.
Also offered for graduate-level credit as SpEd 527 and may be taken only once for credit. Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 430 - Families and Advocacy (3)
This course investigates practical strategies in the areas of student support and advocacy, school-family collaboration and transition planning. Person-centered planning and teaching self-determination skills will be addressed. Course participants will examine collaborative skills needed to empower students and families to work effectively with school professionals in K-12 and transition settings.
Also offered for graduate-level credit as SpEd 530 and may be taken only once for credit. Prerequisite: Admission to program.

SpEd 431 - Families and Advocacy (Secondary) (3)
Investigate practical strategies, tools and exemplary practitioners in the areas of student support and advocacy, school-family collaboration and transition planning. Address concepts and curriculum related to person-centered planning and teaching self-
determination skills. Examine collaborative skills needed to empower students, families, service agencies, and other support systems to facilitate inclusive practices.

Also offered for graduate-level credit as SpEd 531 and may be taken only once for credit. Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 432 - Inclusive Practices (2)
This course prepares teacher candidates to use evidence-based practices to support students with diverse learning needs to gain access to the general education curriculum. Incorporating Universal Design for Learning as a framework, teacher candidates will plan, implement and assess study skills and learning strategies for students in all academic areas.

Also offered for graduate-level credit as SpEd 532 and may be taken only once for credit. Prerequisite: Mth 211, Mth 212, SpEd 418 and admission to the program.

SpEd 433 - Math Assessment and Instruction (Elementary) (3-4)
Examine assessment, instructional methods, and curricula for teaching math and supporting the learning of SPED students at the elementary and secondary levels. Learn techniques for teaching concepts, skills, problem-solving, and learning strategies as means to help learners achieve success in school and beyond the secondary levels.

Also offered for graduate-level credit as SpEd 533 and may be taken only once for credit. Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 437 - Reading Assessment and Instruction (Elementary) (3-4)
Teacher candidates will develop a foundation in research-based instruction for reading to children pre-kindergarten through eighth grade with a broad range of skills and needs in special and regular education. Course provides an overview of language and reading development, instructional practices for teaching, and assessing core early literacy skills.

Also offered for graduate-level credit as SpEd 537 and may be taken only once for credit. Prerequisite: Admission to program.

SpEd 438 - Reading Assessment and Instruction (Secondary) (3-4)
Develop the knowledge base and skills for effectively teaching reading skills to students with high incidence disabilities in schools. Address instructional methods for students who are emergent, developing, and more fluent readers and writers.

Explore the use of research-based reading programs and other literacy materials in grades 6 - 12.

Also offered for graduate-level credit as SpEd 538 and may be taken only once for credit. Prerequisite: Admission to program.

SpEd 439 - Historical and Contemporary Issues in Disability Studies (4)
Examines how views of disability in schools and other social contexts challenge traditional understandings of disability in the field of special education. Students will examine their views of disability through analysis of texts produced by writers with disabilities and the examination of society’s treatment of persons with disability.

Also offered for graduate-level credit as SpEd 539 and may be taken only once for credit. Prerequisite: Upper-division standing.

SpEd 448 - Positive Behavior Support in the Classroom (3)
This course will teach research-based strategies within a positive behavior support framework to promote desired classroom behavior and maximize instructional time. Prevention, teaching and consequence strategies (positive and corrective) will be taught for implementation ranging from school-wide intervention to classroom-wide instruction to individualized function-based support for students with intensive needs.

Also offered for graduate-level credit as SpEd 548 and may be taken only once for credit. Prerequisite: Admission to the Special Educator Licensure Program.

SpEd 455 - Working With LEP Children Who Have Special Needs (2)
Examine the current research in special education and see where it is appropriate in working with the Limited English Proficient (LEP) child. Consider issues including testing and diagnosis, appropriate teaching material and method, and placement. Discuss political, social, and community concerns in working with LEP students with special needs.

Also offered for graduate-level credit as SpEd 555 and may be taken only once for credit.

SpEd 460 - Outdoor Education/Recreation With Persons With Disabilities (6)
Course provides a supervised practicum in a variety of outdoor activities with children, youth, and adults with disabilities. Students serve as counselor trainees, under the guidance of experienced outdoor specialists and teachers in a residential program located at the Mt. Hood Kiwanis Camp. Emphasis on learning from and about persons with disabilities, teamwork within
living groups, and developing outdoor and leadership skills.

Also offered for graduate-level credit as SpEd 560 and may be taken only once for credit.

SpEd 480 - Introduction to Early Intervention/Early Childhood Special Education (3)

Provides historical, social, and legal foundations for early intervention and early childhood special education and other services to young children with special needs. Introduces concepts and processes for screening and assessment, family-centered planning, blending developmentally and individually appropriate practices, providing learning opportunities in natural early childhood settings, planning environments and activities to include all children, and transition planning. Expected preparation: admission to program or permission of instructor.

Also offered for graduate-level credit as SpEd 580 and may be taken only once for credit.

SpEd 481 - Family Guided Early Intervention (3)

Develops knowledge and skills necessary for providing early intervention services to infants and toddlers with developmental delay/disabilities and their families.

Also offered for graduate-level credit as SpEd 581 and may be taken only once for credit.

SpEd 482 - Specialized Techniques: Early Intervention/Early Childhood Special Education (3)

Develops specialized knowledge and skills necessary for providing early intervention and early childhood special education services to infants, toddlers, and preschool children with severe and multiple disabilities, including children with physical and sensory impairments, children with health impairments, and children with autism.

Also offered for graduate-level credit as SpEd 582 and may be taken only once for credit.

SpEd 483 - Communication and Language Development: EI/SE (Early Intervention/Early Childhood Special Education) (3)

Designed to provide information about typical and atypical communication development, birth through early childhood. In addition, information will include strategies for EI/SE to promote communication development for all children. Expected preparation: SpEd 480/580 and admission to program.

Also offered for graduate-level credit as SpEd 583 and may be taken only once for credit.

SpEd 487 - Introduction to Infant Toddler Mental Health (3)

Introductory course linking theory, research, and practice with interdisciplinary principles and collaboration. Key concepts of mental health of children (birth through 36 months) and their families including attachment, temperament, social-emotional development, context of family, culture and community, risk and resilience. Practices related to observation, screening, assessment, diagnosis; treatment.

Also offered for graduate-level credit as SpEd 587 and may be taken only once for credit. Prerequisite: Upper-division standing.

SpEd 501 - Research (1-9)

(Credit to be arranged.)

SpEd 502 - Independent Study (0-9)

(Credit to be arranged.)

SpEd 503 - Thesis (1-9)

(Credit to be arranged.)

SpEd 504 - Cooperative Education/Internship (1-9)

(Credit to be arranged.)

SpEd 505 - Reading and Conference (1-6)

(Credit to be arranged.)

SpEd 506 - Special Problems (1-6)

(Credit to be arranged.)

SpEd 507 - Seminar (1-6)

(Credit to be arranged.)

SpEd 508 - Workshop (1-6)

(Credit to be arranged.)

SpEd 509 - Practicum (1-9)

(Credit to be arranged.)
SpEd 510 - Experimental Course (1 - 12)
Experimental course. Contact the department for a course description. (Credit to be arranged.)

SpEd 511 - Foundations of Special Education (3)
Introduces research, theory and data as foundation for guiding decision making and professional practice in special education guided by the "Critical Concepts" of Special Education" as identified by department faculty including Individualization; Inclusion and Diversity; Scaffolding Instruction; Data-based Decision Making; Collaboration and Teaming; and Leadership and Advocacy.
Also offered for undergraduate-level credit as SpEd 411 and may be taken only once for credit.
Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 512 - Diagnostic Assessment (3-4)
The focus of this course is the legal requirements and professional skills required for conducting non-biased, standardized, academic assessments. Students will develop knowledge and skills in: collecting relevant background information; selecting, administering, and interpreting assessments; developing academic goals and objectives; preparing meaningful reports; and conducting meetings to convey assessment results.
Also offered for undergraduate-level credit as SpEd 412 and may be taken only once for credit.
Prerequisite: Mth 211, Mth 212, SpEd 418 and Admission to program.

SpEd 513 - Classroom Based Assessment and Instructional Planning (3)
Informal, formative, ongoing assessment techniques for students with special needs in special and regular education settings. Using information from assessments to make instructional decisions and for IEP documentation and planning.
Prerequisite: SpEd 519 and admission to program.

SpEd 514 - Legal and Ethical Foundations of Special Education (3)
Overview of state and federal laws, rules and regulations, including analysis of the Individuals with Disabilities Education Act (2004), and their impact on service provision for students with disabilities. Issues of ethics, inclusion, and diversity are integrated within this course. Application of Oregon Administrative Rules will be highlighted.
Also offered for undergraduate-level credit as SpEd 414 and may be taken only once for credit.

SpEd 515 - Classroom Assessment, Instruction, and Behavior Management (Elementary) (4)
Focus on establishing effective instructional environments through research-based techniques of behavior management, assessment, and instructional delivery in elementary settings.
Also offered for undergraduate-level credit as SpEd 415 and may be taken only once for credit.
Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 516 - Classroom Assessment, Instruction, and Behavior Management (Secondary) (4)
Establishing effective instructional environments through research-based techniques of behavior management, assessment, and instructional delivery.
Also offered as undergraduate-level credit as SpEd 416 and may be taken only once for credit.
Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

SpEd 518 - Survey of Exceptional Learners (3)
Overview of working with exceptional individuals, including special education and multicultural differences. Nature of diversities (including the talented and gifted) and educational ramifications for the teacher.
Also offered for undergraduate-level credit as SpEd 418 and may be taken only once for credit.

SpEd 519 - Principles of Special Education (3)
Prepares students entering special education with basic knowledge, skills, and values necessary for future success in their profession. Major overview of theory and research underlying delivery of special education services in the public schools. Intensive study of career planning, graduate writing and research, information systems, current legislation, teaching and learning theory, curricular models, and professional ethics and standards. Expected preparation (or concurrent enrollment: Psy 311, SpEd 418).

SpEd 520 - Collaboration I: Families and Community - EL and EI/SE (3)
Designed to develop knowledge in the areas of family systems theory, strengths-based model, information gathering techniques, and collaboration techniques with families and professionals. Information related to cultural competence is infused
throughout the course. In addition, students receive information on grief related to having a child with a disability and the death of a student. Students are required to participate in a family conversation project to identify family strengths, concerns, and resources with a family who has a child with special needs.

Prerequisite: admission to program.

**SpEd 522 - Comprehensive Individualized Assessment and Curriculum I (3)**

Applies knowledge and skills for functional assessment and applied behavior analysis in the design and implementation of an individualized curriculum for individuals with significant and multiple disabilities. Emphasizes curricular content for life skills, communication, social, motor, and cognitive/functional academic domains. Provides instructional strategies for routines-based, naturalistic, and teacher-directed learning. This is the first course in a sequence of two: SpEd 522 and SpEd 523.

Also offered for undergraduate-level credit as SpEd 422 and may be taken only once for credit.

Prerequisite: Admission to program.

**SpEd 523 - Comprehensive Individualized Assessment and Curriculum II (3)**

Applies knowledge and skills for functional assessment and applied behavior analysis in the design and implementation of an individualized curriculum for individuals with significant and multiple disabilities. Emphasizes curricular content for life skills, communication, social, motor, and cognitive/functional academic domains. Provides instructional strategies for routines-based, naturalistic, and teacher-directed learning. This is the second course in a sequence of two: SpEd 522 and SpEd 523.

Also offered for undergraduate-level credit as SpEd 423 and may be taken only once for credit.

Prerequisite: Admission to program.

**SpEd 524 - Collaboration II: Schools and Inclusion Strategies (Mid-level/High School) (3)**

Designed to help preservice teachers learn collaborative strategies that facilitate the inclusion of students with disabilities into the general education program.

**SpEd 525 - Student Teaching (6-15)**

Observation and teaching under the direction of a supervising teacher. Opportunities for assuming direct responsibility for the learning activities of the disabled learner, for developing skill in techniques of teaching and schoolroom management, and for participating in the life of the school.

Also offered for undergraduate-level credit as SpEd 425.

Prerequisite: Satisfactory completion of SpEd 509 Directed Field Experience II.

Corequisite: SpEd 526.

**SpEd 526 - IEP and Collaborative Teaming (4)**

This course is about the processes and skills involved in collaborative teaming and consultation within schools settings. Throughout the student teaching experience, course participants will learn about their role in the IEP process, experience a full range of professional responsibilities including instructional and non-instructional roles, and prepare an edTPA portfolio.

Also offered for undergraduate-level credit as SpEd 426 and may be taken only once for credit.

Prerequisite: Admission to program.

Corequisite: SPED 525 and SPED 526 are taken together.

**SpEd 527 - IEP and Collaborative Teaming (Secondary) (3)**

This course examines collaborative teaming and consultation among teaching professionals, students, families, paraprofessionals, administrators and service personnel in the context of culturally diverse schools and communities. Careful examination of the IEP process will help define requisite case management skills and effective meeting facilitation skills that promote productive teaming processes.

Also offered for undergraduate-level credit as SpEd 427 and may be taken only once for credit.

Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

**SpEd 528 - Instructional Methods I: Literacy (Midlevel/High School) (3)**

Develops knowledge and practices for teaching reading, writing, and other literacy skills to middle and secondary students with high incidence disabilities. Curriculum and instructional methods for students who are emergent, developing, and fluent readers and writers are addressed. The development of student's use of learning strategies to become more independent and effective learners is described.

Prerequisite: SpEd 519, Ed 511, and admission to program.

**SpEd 529 - Instructional Methods II: Math and Content Instruction (Mid-level/High School) (3)**

Purpose of this course is for preservice and practicing educators to develop the knowledge and skills to effectively teach mathematics and other content area subjects to students with mild disabilities in middle/secondary schools. Educators will learn how
to use instructional methods and content enhancement devices to make curricular content more accessible for students with disabilities. Strategies for promoting retention, application, and generalization of content learning will also be examined.

Prerequisite: SpEd 519 and admission to program.

**SpEd 530 - Families and Advocacy (3)**

This course investigates practical strategies in the areas of student support and advocacy, school-family collaboration and transition planning. Person-centered planning and teaching self-determination skills will be addressed. Course participants will examine collaborative skills needed to empower students and families to work effectively with school professionals in K-12 and transition settings.

Also offered for undergraduate-level credit as SpEd 430 and may be taken only once for credit.

Prerequisite: Admission to program.

**SpEd 531 - Families and Advocacy (Secondary) (3)**

Investigate practical strategies, tools and exemplary practitioners in the areas of student support and advocacy, school-family collaboration and transition planning. Address concepts and curriculum related to person-centered planning and teaching self-determination skills. Examine collaborative skills needed to empower students, families, service agencies, and other support systems to facilitate inclusive practices.

Also offered for undergraduate-level credit as SpEd 431 and may be taken only once for credit.

Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

**SpEd 532 - Inclusive Practices (2)**

This course prepares teacher candidates to use evidence-based practices to support students with diverse learning needs to gain access to the general education curriculum. Incorporating Universal Design for Learning as a framework, teacher candidates will plan, implement and assess study skills and learning strategies for students in all academic areas.

Prerequisite: Admission to the program. Cross-listed as: SPED 432 This course prepares teacher candidates to use evidence-based practices to support students with diverse learning needs to gain access to the general education curriculum. Incorporating Universal Design for Learning as a framework, teacher candidates will plan, implement and assess study skills and learning strategies for students in all academic areas.

**SpEd 533 - Math Assessment and Instruction (3)**

Examine assessment, instructional methods, and curricula for teaching math and supporting the learning of SPED students at the elementary and secondary levels. Learn techniques for teaching concepts, skills, problem-solving, and learning strategies as means to help learners achieve success in school and beyond the secondary levels.

Also offered for undergraduate-level credit as SpEd 433 and may be taken only once for credit.

Prerequisite: Admission to the Special Educator Licensure Program or MS in Special Education.

**SpEd 536 - Specialized Techniques (3)**

Information and skills development for meeting the specialized support needs commonly found with students with significant disabilities. Focus on educational implications considering (1) the nature of the medical condition, (2) methods for instruction (i.e., positioning, mobility), and (3) procedures for structural modifications. Course incorporates information from various disciplines and is designed to assist the educator in becoming an effective member of a transdisciplinary team that serves students with routine and emergency medical and physical needs.

Prerequisite: SpEd 418/518 and admission to the program.

**SpEd 537 - Reading Assessment and Instruction (Elementary) (3-4)**

Teacher candidates will develop a foundation in research-based instruction for reading to children pre-kindergarten through eighth grade with a broad range of skills and needs in special and regular education. Course provides an overview of language and reading development, instructional practices for teaching, and assessing core early literacy skills.

Also offered for undergraduate-level credit as SpEd 437 and may be taken only once for credit.

Prerequisite: Admission to program.

**SpEd 538 - Reading Assessment and Instruction (Secondary) (3-4)**

Develop the knowledge base and skills for effectively teaching reading skills to students with high incidence disabilities in schools. Address instructional methods for students who are emergent, developing, and more fluent readers and writers. Explore the use of research-based reading programs and other literacy materials in grades 6 - 12.

Also offered for undergraduate-level credit as SPED 438 and may be taken only once for credit.

Prerequisite: Admission to program.
**SpEd 539 - Historical and Contemporary Issues in Disability Studies (4)**

Examines how views of disability in schools and other social contexts challenge traditional understandings of disability in the field of special education. Students will examine their views of disability through analysis of texts produced by writers with disabilities and the examination of society’s treatment of persons with disability.

Also offered for undergraduate-level credit as SpEd 439 and may be taken only once for credit.

**SpEd 540 - Foundations of Education for the Visually Impaired Learner (3)**

Provides historical educational background for students with visual impairments, common eye conditions, basic eye anatomy, and overview of instructional strategies with emphasis on the expanded core curriculum. Introduces Grade I braille and tactile graphics production. Addresses instructional considerations for diverse learners with vision loss, including additional disabilities and deafblindness.

Prerequisite: SpEd 418/SpEd 518 and admission to the program.

**SpEd 541 - Implications of Vision Problems of Children/Youth (3)**

Anatomy, physiology, common diseases, and hygiene of the human eye. Emphasis on vision screening, testing, and techniques for evaluation of functional visual skills in the classroom. Focus includes strategies for improving medical/ optometric eye reports. Emphasis on working with the regular classroom teacher regarding prevention of potential eye disorders and referral to eye specialists.

Prerequisite: SpEd 540 and admission to the program.

**SpEd 542 - Assessment of the Visually Impaired (3)**

Examination and application of diagnostic and assessment instruments useful with or modified for visually impaired learners. Designed to prepare teachers of the visually disabled for administering, scoring, and interpreting test results for program planning and implementation. Developmental areas include cognition, social/ emotional skills, psychomotor skills, and self-help skills.

Prerequisite: SpEd 418/518 and admission to the program.

**SpEd 543 - Reading and Literacy - Visually Impaired Learners (3)**

This course provides an overview of language development and literacy instruction from prereading through adolescence. Age-appropriate methods for literacy instruction will be discussed, with emphasis on similarities and differences between sighted print readers and readers with visual impairments, including blindness. Both conventional and functional literacy will be addressed.

**SpEd 544 - Methods of Teaching Academics: Visually Impaired Learner (3)**

Course focuses upon curricular adaptations for use with the visually impaired learner in the classroom. Academic areas examined and strategies for inclusion for the visually impaired learner in all aspects of the school curriculum. Teaching of Braille, use of abacus for mathematics, and adapted materials. In-depth curricular focus for the multi-disabled child.

Prerequisite: SpEd 418/518 and admission to the program.

**SpEd 545 - Introduction to Orientation and Mobility and Independent Living Skills (3)**

Introduces the historical development and field of orientation and mobility (O&M). Provides instruction in basic O&M and human guide techniques. Emphasizes evidence-based curricular content for independent living skills; psychosocial, motor, and concept development domains. Addresses instructional considerations for diverse learners with vision loss, including additional disabilities and deafblindness.

Prerequisite: SpEd 418/SpEd 518.

**SpEd 546 - Braille I (3)**

The Braille code is presented, to include Grade II literary Braille, and use of the abacus.

Prerequisite: SpEd 540 and admission to the program.

**SpEd 547 - Braille II (2)**

All special signs and symbols relating to the literary code are learned and special formatting techniques used in printed materials, charts, and graphs. Study of Braille Nemeth Code for mathematics.

Prerequisite: SpEd 546 and admission to the program.
SpEd 548 - Positive Behavior Support in the Classroom (3)

This course will teach research-based strategies within a positive behavior support framework to promote desired classroom behavior and maximize instructional time. Prevention, teaching and consequence strategies (positive and corrective) will be taught for implementation ranging from school-wide intervention to classroom-wide instruction to individualized function-based support for students with intensive needs.

Also offered for undergraduate-level credit as SpEd 448 and may be taken only once for credit.

Prerequisite: Admission to the Special Educator Licensure Program.

SpEd 549 - Orientation and Mobility Methods (3)

Examine the foundations of learning and teaching Orientation and Mobility. Activities and synchronous online lectures introduce the principles of concept development, spatial orientation, and environmental analysis as related to the independent travel of individuals who are visual impairments including those with additional disabilities, deafblindness and/or from diverse backgrounds.

Prerequisite: SpEd 540, SpEd 541, SpEd 545.

SpEd 550 - Orientation and Mobility Assessment and Instruction - Children (3)

Provides an overview of O&M assessment and instruction for infants, preschoolers, elementary and transition age students with vision loss, including those from diverse backgrounds and additional disabilities and deafblindness. Examines methods in team instruction, consultation and itinerant teaching. Includes 25 hours of field-based experiences in the school setting.

Prerequisite: SpEd 540, SpEd 541, SpEd 545.

SpEd 551 - Orientation and Mobility Assessment and Instruction - Adults (3)

Examines demographics and service delivery models for adults with visual impairments from diverse backgrounds, including those with health conditions and sensory impairments. Addresses O&M assessment and instruction while considering individual travel environments and emerging technologies. Includes 25 hours of field-based experiences with adults receiving O&M training.

Prerequisite: SpEd 540, SpEd 545, SpEd 541.

SpEd 552 - Orientation and Mobility Advanced Techniques (4)

Instruction in navigation methods used by persons with vision loss. Students complete 5+ hours lab based work per day under simulated conditions in indoor and outdoor environments. Course covers the knowledge base of the instructional needs of persons with visual impairments including those from diverse backgrounds, additional disabilities and deafblindness.

Prerequisite: SpEd 540, SpEd 541, SpEd 545.

SpEd 553 - Leisure Education for Persons with Disabilities (3)

Focuses on recreation and leisure as a major aspect of independent living and community adjustment. Roles of the schools in providing a comprehensive leisure education program for students with disabilities.

Prerequisite: SpEd 418/518.

SpEd 554 - Orientation and Mobility Practicum (3-12)

Minimum 350 hour supervised internship for pre-service O&M specialists with individuals with visual impairment, ranging from school-aged students to adult vocational and geriatric populations, including diverse learners with additional disabilities and deafblindness. Integrates O&M coursework and field-based competencies tailored to pass the international ACVREP O&M examination.

SpEd 555 - Working With LEP Children Who Have Special Needs (2)

Examine the current research in special education and see where it is appropriate in working with the Limited English Proficient (LEP) child. Consider issues including testing and diagnosis, appropriate teaching material and method, and placement. Discuss political, social, and community concerns in working with LEP students with special needs.

Also offered for undergraduate-level credit as SpEd 455 and may be taken only once for credit.

SpEd 556 - Career Education for Persons with Disabilities (3)

Course presents a broad conceptual framework for organizing and developing career education programs for disabled students (elementary/young adult); helps participants gain knowledge which strengthens vocational success for disabled persons; and program models train persons with disabilities in transition from school to community life.

Prerequisite: SpEd 418/518.
SpEd 558 - Concepts and Principles of Applied Behavior Analysis (5)

Introduces students to the philosophical underpinnings of applied behavior analysis (ABA). It provides students with knowledge of ABA concepts and principles. Students will learn how to apply positive behavior support and technological methods specific to the needs of the community in such settings as schools, clinics, and homes.

SpEd 559 - Assessing Behavior (5)

Students will learn the fundamental elements of behavior assessment, how to identify behaviors appropriate for behavioral assessment, selecting behavior goals and strategies, conducting indirect and direct assessments to identify behavior function, and addressing professional issues that may arise during the process of behavioral assessment.

SpEd 560 - Outdoor Education/Recreation With Persons With Disabilities (6)

Course provides a supervised practicum in a variety of outdoor activities with children, youth, and adults with disabilities. Students serve as counselor trainees, under the guidance of experienced outdoor specialists and teachers in a residential program located at the Mt. Hood Kiwanis Camp. Emphasis on learning from and about persons with disabilities, teamwork within living groups, and developing outdoor and leadership skills.

Also offered for undergraduate-level credit as SpEd 460 and may be taken only once for credit.

SpEd 561 - PBS: Behavior-Change Strategies (5)

Focuses on the design of comprehensive, multi-component, functional assessment-based behavior support plans for individuals with a variety of disabilities who engage in challenging behavior. Students learn how to apply the positive behavior support method and to choose appropriate and effective behavior-change strategies to address behavior goals. These include the use of technology and responses to ethical and professional issues in implementing behavior support plans.

SpEd 562 - Ethical Issues in Applied Behavior Analysis (5)

Students learn how to apply ethical standards that are salient to the interactions in their work, with the people they serve, and with others involved in the process (e.g., other professionals, families, systems of care, society). Although the class focuses on the BACB’s Professional and Ethical Compliance Code for Behavior Analysts, other ethical standards will be reviewed as well.

SpEd 563 - Advanced Techniques of Reading (5)

Primarily concerned with educational methods designed to teach students with severe to moderate response deficits in reading.

Prerequisite: CI 474/574.

SpEd 564 - Learning Disabilities (3)

Concepts, issues, and major sources in the field of learning disabilities: definition, causation and identification, ability vs. task analysis models, perceptual training, and aptitude treatment interaction, early identification, and reading disability.

SpEd 565 - Single-Subject Research Design in Applied Behavior Analysis (5)

Introduces students to the foundations of single-subject research designs and the application of single-case research methodology. The course content aligns with items on the BCBA Task List (5th Edition). It provides students with the most effective experimental research methods to measure cutting-edge treatments, such as innovative technological interventions and positive behavior support.

SpEd 566 - Advanced Research Methods in ABA (4)

Students will demonstrate their knowledge and application of single-case research methodology. Specifically, the implementation of research proposals designed to answer applied research questions specific to the needs of the local community in schools, clinics, homes, and other settings. In addition to their management of overall intervention implementation, students will assess the quality of implementation and intervention impact.

SpEd 567 - ABA Leadership Capstone (3)

As a culminating experience for students in the ABA Program, this course focuses on current issues in ABA, supports students’ preparation for the BCBA® exam, and supports students in formulating their own plan for supervision and management of supervisees. The topics selected for this seminar were guided by BACB® Task List (5th ed.) on what behavior analysts should know about the science of behavior.
analysis, as well as providing ABA services and supervision.

SpEd 568 - Advanced Behavior Management (3)
Course for educational professionals serving students with challenging behavior. Focuses on a continuum of behavioral intervention in schools including functional behavioral assessment and positive behavioral supports for students with challenging behavior.
Prerequisite: SpEd 521.

SpEd 570 - Communication Systems for Persons with Severe Disabilities (3)
Course for students who will be teaching communication skills to persons with severe disabilities, including nonverbal individuals. Examines specialized systems for teaching communication skills, normal speech, and implementation of communication instruction.
Prerequisite: SpEd 418/518.

SpEd 571 - Adolescents with Learning Differences (2)
Explores the impact of various disabilities or other life experiences on learning and the developmental stage of adolescence. Examines what middle and high school teachers need to understand about students with learning differences and how they can provide support and accommodations.
Prerequisite: admission to SDEP program.

SpEd 573 - Assessment and Planning for Students With Mild Disabilities (3)
Examination and application of diagnostic and assessment instruments used to measure cognitive language abilities and social/emotional functioning. Formal and informal methods of assessment.
Prerequisite: SpEd 418/518.

SpEd 575 - Braille III/Technology for the Visually Impaired (3)
Study of computer applications for visually impaired learners, including existing and proposed hardware and software that would improve accessibility to print information for visually impaired and blind students. Adaptations of existing technology, evaluation of its effectiveness.
Prerequisite: SpEd 540.

SpEd 576 - Visually Impaired Learner with Additional Disabilities (3)
Study of visually handicapped students with concomitant disabilities such as hearing impairments, mental retardation, and behavior disorders. Emphasizes on curricular adaptations, teaching strategies, and behavior management.
Prerequisite: SpEd 418/518.

SpEd 577 - Interagency Collaboration (2)
Focuses on service coordination that unifies school personnel and community agencies to strategically use collective expertise to plan the transition from school to adult life with students and families for the development and well-being of youth. Strategies for effective leadership and community resource mapping are employed.

SpEd 579 - Literacy in Early Intervention/Special Education (3)
Knowledge and skill development of early literacy, including early writing and spelling, for children, birth through age 8, with special needs. Focuses on strategies to support early foundations of literacy, language concepts, vocabulary, phonological awareness, alphabetic understanding, letter-sound correspondence, phonics, reading comprehension. Emphasizes collaboration of families and professionals.

SpEd 580 - Introduction to Early Intervention/Early Childhood Special Education (3)
Provides historical, social, and legal foundations for early intervention and early childhood special education and other services to young children with special needs. Introduces concepts and processes for screening and assessment, family-centered planning, blending developmentally and individually appropriate practices, providing learning opportunities in natural early childhood settings, planning environments and activities to include all children, and transition planning. Expected
preparation: admission to program or permission of instructor.

Also offered for undergraduate-level credit as SpEd 480 and may be taken only once for credit.

**SpEd 581 - Family Guided Early Intervention (3)**
Develops knowledge and skills necessary for providing early intervention services to infants and toddlers with developmental delay/disabilities and their families.

Also offered for undergraduate-level credit as SpEd 481 and may be taken only once for credit.

**SpEd 582 - Specialized Techniques: Early Intervention/Early Childhood Special Education (3)**
Develops specialized knowledge and skills necessary for providing early intervention and early childhood special education services to infants, toddlers, and preschool children with severe and multiple disabilities, including children with physical and sensory impairments, children with health impairments, and children with autism.

Also offered for undergraduate-level credit as SpEd 482 and may be taken only once for credit.

**SpEd 583 - Communication and Language Development: EI/SE (Early Intervention/Early Childhood Special Education) (3)**
Designed to provide information about typical and atypical communication development, birth through early childhood. In addition, information will include strategies for EI/SE to promote communication development for all children. Expected preparation: SpEd 480/SpEd 580 and admission to program.

Also offered for undergraduate-level credit as SpEd 483 and may be taken only once for credit.

**SpEd 584 - Assessment: EI/SE (3)**
Provides an overview of assessment procedures in the field of early intervention/early childhood special education. These procedures include screening and testing using norm-referenced, criterion-referenced, curriculum-based, and observational methods. Reliability and validity of assessments are discussed in relation to standardized testing. Learners have the opportunity to observe and record the behaviors of young children. Assessment strategies such as arena assessment, play-based assessment, parent reporting, and family interviewing. Emphasis on the assessment process for the young child and the family's role in the assessment of the young child with developmental delays or disabilities.

**SpEd 585 - Instructional Strategies I: EI/SE (3)**
Develops knowledge and practices for teaching and facilitating development of children with special needs, birth through the primary grades. Builds upon the student's knowledge of child development and developmentally appropriate practices. Focuses upon the design of individually appropriate practices, principles of applied behavior analysis, activity-based intervention, naturalistic teaching strategies, discrete trial teaching, and positive behavioral supports. Develops knowledge and skills for curriculum-based assessment, design of individual program plans, and use of data collection systems to monitor child progress.

**SpEd 586 - Instructional Strategies II: EI/SE (3)**
Develops advanced knowledge and practices for teaching and facilitating development of children with special needs, birth through the primary grades. Builds upon the student's knowledge of individually appropriate practice, applied behavior analysis, and design of individual and group plans for instruction. Develops knowledge and skills for implementation of specific strategies supported by current research and recommended practices, including strategies to support early relationships, peer interaction, social-emotional development, cognitive development, and early literacy.

**SpEd 587 - Introduction to Infant Toddler Mental Health (3)**
Introductory course linking theory, research, and practice with interdisciplinary principles and collaboration. Key concepts of mental health of children (birth through 36 months) and their families including attachment, temperament, social-emotional development, context of family, culture and community, risk and resilience. Practices related to observation, screening, assessment, diagnosis; treatment.

Also offered for undergraduate-level credit as SpEd 487 and may be taken only once for credit.

**SpEd 588 - Foundations of Applied Behavior Analysis (3)**
Introduction to the Board Certified Behavior Analyst (BCBA) course sequence designed to prepare students to take the BCBA exam. Specifically designed to provide students with the knowledge of ABA terms as well as the application of positive behavior support and technological methods specific to the needs of your community. This is the first course in a sequence of six SpEd 588, SpEd 589,
SpEd 590, SpEd 591, SpEd 592, SpEd 593 and must be taken in sequence.

Prerequisite: Admission to the PSU BCBA program.

**SpEd 589 - Behavioral Assessment (5)**

Designed for students to learn the fundamental elements of behavior assessment, how to identify behaviors appropriate for behavioral assessment, selecting behavior goals and strategies, ethical and professional issues that may arise during the process of behavioral assessment. This is the second course in a sequence of six: SpEd 588, SpEd 589, SpEd 590, SpEd 591, SpEd 592, SpEd 593 and must be taken in sequence.

Prerequisite: Admission in the PSU BCBA program; SpEd 588.

**SpEd 590 - Positive Behavior Support (5)**

This course is designed for students to learn the positive behavior support method, selecting appropriate and effective strategies to address behavior goals including the use of technology, and responding to ethical and professional issues that may arise during the process of implementing behavior support methods. This is the third course in a sequence of six: SpEd 588, SpEd 589, SpEd 590, SpEd 591, SpEd 592, SpEd 593 and must be taken in sequence.

Prerequisite: Admission in the PSU BCBA program; SpEd 588.

**SpEd 591 - Single Subject Design (5)**

This course in the single subject research method applies knowledge of applied behavior analytic interventions based on the Behavior Analyst Certification Board (BACB®) Foundational Knowledge List. This is the first of two research courses in the Board Certified Behavior Analyst (BCBA) sequence to prepare students to take the BCBA exam. This is fourth course in a sequence of six: SpEd 588, SpEd 589, SpEd 590, SpEd 591, SpEd 592, SpEd 593 and must be taken in sequence.

Prerequisite: Admission in the PSU BCBA program; SpEd 588, SpEd 589, SpEd 590.

**SpEd 592 - Ethics in Applied Behavior Analysis (4)**

This course is specifically designed to provide students with the knowledge of ethics within the field of ABA as well as ethical application of positive behavior support and technological methods specific to the needs of your local community identified in the technology project for this course. This is fifth course in a sequence of six: SpEd 588, SpEd 589, SpEd 590, SpEd 591, SpEd 592, SpEd 593 and must be taken in sequence.

Prerequisite: Admission in the PSU BCBA program; SpEd 588, SpEd 589, SpEd 590, SpEd 591.

**SpEd 593 - Advanced Single Subject Design (4)**

Designed for students to learn measurement and design considering behavior change, systems support, implementation, management, supervision and ethical and professional issues relevant to the practice of behavioral intervention and research design. This is sixth course in a sequence of six: SpEd 588, SpEd 589, SpEd 590, SpEd 591, SpEd 592, SpEd 593 and must be taken in sequence.

Prerequisite: Admission in the PSU BCBA program; SpEd 588, SpEd 589, SpEd 590, SpEd 591, SpEd 592.

**SpEd 594 - Assessment Methods and Classification in Infant Mental Health (3)**

Develop knowledge and skills to complete the assessment process of infants, toddlers and their caregivers through multiple sources of information within a culturally relevant context. Topics include selection of tools and methods for information collection, methods for screening and assessment, and use of classification systems within the mental health system.

**SpEd 595 - Prevention and Intervention in Infant Mental Health (3)**

Concepts of early intervention and prevention with the infant-toddler mental health perspective. Examines the range of interventions used in the field of infant mental health. Emphasis on the importance of treating infants and toddlers in the context of their families and communities. Intervention strategies for those targeted at children with psychosocial/relational and developmental disturbances as well as those determined to be at risk. Includes a review of international, national, and regional established and pilot programs in early intervention and prevention. Assess and critically evaluate the current science around treatment efficacy of various interventions.

**SpEd 596 - Topics in Special Education Research (3)**

Specialized topics in special education focused on the scientific process and the development of research-based practice. Research regarding theories, interventions, instructional strategies, curriculum and assessment are examined for each topic. Sections address topics such as: Literacy, English Language Learners, Positive Behavior Intervention Supports and Students with Significant Disabilities.
SpEd 597 - Topics in Special Education Issues and Practices (3)
Specialized topics in special education focused on issues and practices in the education of students with disabilities. Current practices and issues, evidence-based practices, the use of research and assessment to understand problems, and the implementation and evaluation of interventions are examined for each topic. Topics such as the following are included: Literacy, English Language Learners, Positive Behavior Intervention Supports, Students with Significant Disabilities.

SpEd 601 - Research (1-9)
(Credit to be arranged.)

SpEd 602 - Independent Study (1-9)
(Credit to be arranged.)

SpEd 603 - Dissertation (1-16)
(Credit to be arranged.)

SpEd 604 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

SpEd 605 - Reading and Conference (1-9)
(Credit to be arranged.)

SpEd 606 - Special Problems (1-9)
(Credit to be arranged.)

SpEd 607 - Seminar (1-9)
(Credit to be arranged.)

SpEd 608 - Workshop (1-9)
(Credit to be arranged.)

SpEd 609 - Practicum (1-9)
(Credit to be arranged.)

SpEd 610 - Selected Topics (1-9)
(Credit to be arranged.)

SpEd 801 - Research (0-9)
(Credit to be arranged.)

SpEd 802 - Independent Study (0-9)
(Credit to be arranged.)

SpEd 804 - Cooperative Education/Internship (0-9)
(Credit to be arranged.)

SpEd 805 - Reading and Conference (0-9)
(Credit to be arranged.)

SpEd 806 - Special Problems (0-9)
(Credit to be arranged.)

SpHr 199 - Special Studies (0-15)
(Credit to be arranged.)
**SpHr 222 - Introduction to Speech, Language & Hearing Sciences (4)**

An overview of the field of speech, language and hearing sciences and its professions. Focus on the scientific basis of speech production, hearing perception and speech acoustics. Foundational information regarding language science will also be addressed. Emphasis is on the scientific analysis of speech and language, with an applied clinical focus.

**SpHr 262 - Voice and Diction (4)**

Study and practice of principles of voice production and articulation of speech sound, with attention to elementary speech physiology and phonetics. Intended for students who desire to develop more effective speech and for meeting special needs of teachers, radio and television speakers, public speakers, and others who require special competence in speaking. Emphasis is on both theory and practice. Two hours per week of laboratory work required.

**SpHr 365U - Survey of Speech, Language, and Hearing Disorders (4)**

Designed as an overview of speech, language, and hearing in children and adults. Topics to include: cleft palate, stuttering, hearing impairment, and multi-cultural differences. Recommended for general speech students.

**SpHr 370 - Phonetics and Acoustics (4)**

A study of sounds used in speech, their acoustic properties, and their transcription utilizing the IPA; description of sounds, their symbolic nature, their production, and physical and psychological problems involved in their perception. The acoustical bases of speech and hearing will also be addressed.

**SpHr 371 - Anatomy and Physiology of Speech and Swallowing (4)**

A study of the anatomy and physiology of the respiratory, phonatory, and articulatory systems for speech, with applications to speech disorders. The physiology of swallowing and swallowing disorders is also covered.

**SpHr 372U - Speech and Language Development in Children (4)**

Provides students with a foundation of knowledge regarding basic processes of language acquisition. In addition to the study of normal language development from a theoretical, developmental, and clinical perspective, related areas of study include cognition, social interactions, play, and literacy. Bilingual and multicultural issues are also addressed.

**SpHr 385 - Autism Spectrum Disorders (4)**

Examines current issues related to diagnosis and intervention for children and adolescents with autism spectrum disorders (ASD). It focuses on current research related to theories of development across varied domains (social and communicative, motor, sensory, cognitive and adaptive behaviors) and interdisciplinary practice for serving children with ASD.

**SpHr 394 - Guided Observation (1)**

Designed to acquaint students with the clinical process in speech, language, and audiology cases. Students will observe phases of clinical operation including diagnostic management, parent conferencing, and material preparation.

**SpHr 395 - Directed Clinical Assistantship (2)**

Designed to acquaint pre-professional students with the direct management of speech, language, and hearing cases in cooperation with advanced clinicians and under the direction of a qualified clinical supervisor. Students will participate in all phases of clinical operation, including scheduling, diagnostic management, parent conferencing, report writing, material preparation.

Prerequisite: SpHr 370; may be taken in conjunction with SpHr 494, 495 or 496.

**SpHr 399 - Special Studies (0-15)**

(Credit to be arranged.)

**SpHr 401 - Research (0-15)**

(Credit to be arranged.) Consent of instructor. Use 501 to register for comprehensive exams.

**SpHr 402 - Independent Study (1-12)**

(Credit to be arranged.)

**SpHr 404 - Cooperative Education/Internship (1-15)**

(Credit to be arranged.)
SpHr 405 - Reading and Conference (0-15)
(Credit to be arranged.) Consent of instructor.

SpHr 406 - Special Projects (1-8)
(Credit to be arranged.) Consent of instructor.

SpHr 407 - Seminar (0-15)
(Credit to be arranged.) Consent of instructor.

SpHr 408 - Workshop (0-15)
(Credit to be arranged.)

SpHr 409 - Practicum (0-12)
(Credit to be arranged.) Students must show proof of professional liability insurance.

SpHr 410 - Selected Topics (0-12)
(Credit to be arranged.)

SpHr 410H - (1 - 12)

SpHr 432 - Alternative Medicine (4)
This course offers a general introduction to influential medical systems (i.e., Traditional Chinese Medicine, Western Homeopathy, Indian Ayurveda, etc.) in the world that are emerging in the U.S. as alternative medicines to the conventional (or allopathic) biomedicine. For senior level and graduate students of all majors who are interested in health and medicine, including those who are preparing for medical or allied health professions like speech-language pathology.

SpHr 452 - Screening in the Schools (1)
Students will participate, under supervision, in screening school-aged students for speech, language, and/or hearing disabilities.

SpHr 461 - Neurology of Speech and Hearing (4)
A course specifically designed for speech and hearing majors to provide a study in-depth of the neurology of the speech and hearing mechanisms with special attention given to the major deviations affecting verbal communication.

SpHr 463 - Language Disorders in Children (4)
An overview of developmental language disorders in children. Disorders will be presented in terms of etiology, incidence, and characteristics. Assessment issues and treatment principles will be discussed.

SpHr 464 - Speech Disorders in Children (4)
Discussion of normal speech development and how it can differ in individuals with speech disorders. Exploration of assessment, diagnosis, and treatment for speech disorders in children. Introduction to linguistic and cultural factors related to speech development and disorders, and to special populations with high incidence of speech disorders.

SpHr 465 - Introduction to Research Methods for Clinical Scientists (4)
Covers designs and data interpretation methods used in clinical research. Validity threats are highlighted and discussed in the context of clinical studies. Focus on application of research principles in the evaluation of journal articles, with the goal of enabling students to critically review the literature.

SpHr 471 - Neurolinguistics (4)
Neurolinguistics introduces the study of the relationship between linguistic processes and the human brain. Learn about language processing from psychological and neurological perspectives. Expected preparation: Introductory understanding of linguistics and psychology is strongly recommended (Introduction to Linguistics and Introduction to Psychology).

SpHr 473 - Perspectives on Disability (4)
Introduces students to perspectives on disability and ableism. Students will examine definitions of disability and the history of disability, particularly as it relates to communication and clinical practice. We will investigate the influence of media on perceptions of disability and discuss how models of disability influence approaches to service provision, communication choice, intervention, and education.
These issues will be examined within the framework of how ableism has evolved and is expressed within society.

Also offered for graduate-level credit as SpHr 573 and may be taken only once for credit. Prerequisite: Upper-division standing.

**SpHr 475 - Introduction to the Professions of Speech-Language Pathology and Audiology (4)**

Overview of topics related to professional development in speech-language pathology and audiology, including professional behavior, ethical responsibility, scope of practice, interdisciplinary collaboration, professional affiliations, continuum of care, typical work settings, and applying to graduate schools.

Prerequisite: senior standing.

**SpHr 480 - Introduction to Sociocultural Aspects of Interactions (4)**

Introduction to communication and interaction on context and influence of context on communication disorders. Explores situational, social-interpersonal, and cultural variables. Examines systems theory and cultural practices as they influence communication.

Prerequisite: must be junior, undergraduate, or post-baccalaureate status.

**SpHr 485 - Bilingualism and Communication Disorders (4)**

Introduction to typical bilingual/bicultural development and communication disorders. Addresses language, cognitive and social-emotional characteristics of bilingual children and adults with communication disorders. Discusssions on clinical challenges and general assessment and intervention approaches when working with bilinguals with communication disorders in Speech-Language pathology. Students participate in small group and class discussions, review related literature and participate in small projects.

Prerequisite: SpHr 372U.

**SpHr 487 - Hearing Sciences (4)**

Introductory course in audiology emphasizing basic acoustics and psychoacoustics, anatomy and physiology of the ear, hearing measurement, and types and causes of hearing impairment.

Prerequisite: upper-division standing.

**SpHr 488 - Clinical Audiology (4)**

Introduction to the audiological test battery. Topics include bone-conduction, masking, speech audiometry, and objective tests. Auditory pathologies and their audiometric correlates are also covered.

Prerequisite: SpHr 487; may be taken concurrently.

**SpHr 489 - Aural Rehabilitation (4)**

Theoretical course covering the role of speechreading (lip reading) and auditory training as it relates to speech, language, and communication. Historical perspectives and philosophies considered, communication systems, speech acoustics and perception, amplification and hearing aids, speech reading, and auditory training. Multicultural issues will be included. Expected preparation: SpHr 488/SpHr 588.

Also offered for graduate-level credit as SpHr 589 and may be taken only once for credit.

**SpHr 490 - Audiological Rehabilitation Clinic (2)**

Supervised clinical practicum in the diagnosis and rehabilitation of children and adults with hearing disabilities; staff seminars in case dispositions. Maximum: 18 credits. Recommended prerequisite: SpHr 489/589, 498/598.

Also offered for graduate-level credit as SpHr 590.

**SpHr 491 - Principles of Behavior Analysis: Clinical Applications (4)**

The aim of this course is to examine key principles of behavior, including: assessment, behavior modification, and measurement. While the course will discuss how principles of behavior can be applied across all populations, specific attention will be given to individuals with communication challenges and how to meet the needs of individuals with such challenges. Prerequisite: Upper-division standing.

Prerequisite: Upper-division standing.

**SpHr 495 - Neurogenic Communication Disorders (4)**

Introduction to speech and language disorders with emphasis on acquired neurogenic disorders due to stroke, traumatic brain injury, and neurodegenerative disorders (e.g., aphasia, dysarthria, right hemisphere syndrome).

Prerequisite: SpHr 461.

**SpHr 496 - Introduction to Clinical Management (4)**

Provides an introduction to assessment and management of diverse persons with communication disorders across the lifespan. Covers basic principles of assessment and intervention, evidence-based practices, and behavior management. Introduces terminology and basic techniques for addressing speech, language, and hearing disorders, with special consideration of program design and delivery.
Prerequisite: SpHr 371, 372. Expected Preparation: SpHr 370.

SpHr 501 - Research (0-15)
(Credit to be arranged.) Consent of instructor. Use 501 to register for comprehensive exams.

SpHr 502 - Independent Study (1-12)
(Credit to be arranged.)

SpHr 503 - Thesis (0-9)
Consent of instructor. Must register for minimum of 6 credits total, with at least 1 credit in term of defense. (Credit to be arranged.)

SpHr 504 - Cooperative Education/Internship (0-15)
(Credit to be arranged.)

SpHr 505 - Reading and Conference (0-9)
(Credit to be arranged.) Consent of instructor.

SpHr 506 - Special Projects (1-8)
(Credit to be arranged.) Consent of instructor.

SpHr 507 - Seminar (0-15)
(Credit to be arranged.) Consent of instructor.

SpHr 508 - Workshop (0-15)
(Credit to be arranged.)

SpHr 509 - Practicum (1-12)
(Credit to be arranged) Restricted to SpHr graduate students only. Students must show proof of professional liability insurance.

SpHr 510 - Selected Topics (0-15)
(Credit to be arranged.)

SpHr 530 - Evidence-based Practices in Communication Disorders (4)
Focuses on the evidence-based practices of assessment and intervention in communication differences and disorders. Specifically, principles of static and dynamic assessment, intervention planning and implementation, goal writing and data collection—across communities and developmental stages. Emphasizes diversity, equity, and contextual influences on communication and social interaction. Restricted to graduate students.
Prerequisite: SpHr 370 and SpHr 463.

SpHr 540 - Multicultural Topics in Communication Disorders (2)
Introduces topics of communication disorders within the framework of culture and identity. Explores cultural attitudes and beliefs about communication and disabilities, cultural differences and cultural identity. May not be repeated for credit.

SpHr 541 - Bilingual Topics in Communication Disorders (2)
Explores current topics within bilingual speech and language development and disorders. Covers typical and atypical development within many areas of speech and language, diagnostic criteria for determining disability, and assessment and intervention topics for children and adults from bilingual language backgrounds. Emphasis on Spanish-English bilingual populations.

SpHr 545 - Pathways to Professional Practice (2)
Overview of topics related to professional practice of speech-language pathology: professional organization membership, certification, licensure, and ethical and legal responsibilities. Career development issues: preparing for national exams; résumé writing, interviewing, and planning for the Clinical Fellowship; team collaboration; supervision; and reimbursement practices.
Prerequisite: SpHr 530.

**SpHr 546 - Professional Ethics (2)**
Enhances student awareness of and knowledge about ethical principles that form the basis for the American Speech-Language-Hearing Association Code of Ethics. Explores complexity of professional practice of SLP that have ethical considerations. Includes weekly group discussion to engage in ethical diagnosis using clinical scenarios based on individuals with communication disorders.
Prerequisite: SpHr 530.

**SpHr 552 - Screening in the Schools (1)**
Students will participate, under supervision, in screening school-aged students for speech, language, and/or hearing disabilities.
Also offered for undergraduate-level credit as SpHr 452. Prerequisite: 25 clock hours of practicum.

**SpHr 553 - Counseling in Communication Disorders (2)**
Presents approaches to counseling with emphasis on and implications for developing effective working relationships with clients with communication disorders and their families. Presents techniques for effective therapeutic interventions. Students will explore and apply current interviewing and counseling strategies used for assessment, treatment, and intervention in the practice of speech-language pathology.
Prerequisite: SpHr 530.

**SpHr 554 - Advanced Speech Sound Disorders: Theories and Application (4)**
Development and disorders of speech sound production, with particular emphasis on children. Phonological and phonetic theories used in understanding speech and speech sound development and disorders. Various means of assessing and providing intervention for speech sound disorders, including childhood apraxia of speech. Restricted to graduate students.

**SpHr 555 - Assessment and Treatment of Dysphagia in Adults ()**
Introduction to dysphagia and related disorders in adults. Covers the following topics: 1) anatomy and physiology of swallowing; 2) types of acquired dysphagia; 3) clinical swallowing examination; 4) common methods of instrumental swallowing examination, including radiographic studies, fiber-endoscopic examinations and manometry; and 5) Dysphagia Intervention.
Prerequisite: Stat 243, 244 or equivalent.

**SpHr 556 - Assessment and Treatment of Dysphagia in Pediatrics ()**
Introduction to dysphagia and related disorders in children. Covers the following topics: 1) anatomy and physiology of swallowing; 2) types of acquired dysphagia; 3) clinical swallowing examination; 4) common methods of instrumental swallowing examination, including radiographic studies, fiber-endoscopic examinations and 5) Dysphagia Intervention.

**SpHr 558 - Symbol Systems in Early Communication (2)**
Focuses on communication characteristics of individuals with severe communication disorders and their use of augmentative and alternative communication to meet both pre-intentional and intentional and symbolic communication needs. Emphasis on holistic communication assessment methods and intervention strategies to enhance communication in children.
Prerequisite: SpHr 530.

**SpHr 559 - Augmentative and Alternative Communication (2)**
Introductory course in augmentative and alternative communication (AAC) with a focus on manual and technological communication methods. Includes strategies for appropriate assessment of speech, language, cognitive, and sensory-motor skills, and addresses partner support requirements for AAC use. Students gain knowledge and skills for treating children, adolescents, and adults with moderate to severe developmental or acquired disorders in speech and language.
Prerequisite: SpHr 530.

**SpHr 560 - Research Methods in Communication Sciences and Disorders (4)**
Introduction to research methods in communication sciences and disorders. Covers research strategies and designs commonly used in communication sciences and disorders, as well as methods used in the collection, analysis and interpretation of data. The course focuses on the application of research principles in the critical evaluation of journal articles and other research literature, with the goal of enabling students to make informed decisions as to which developments in communication disorders should be applied to clinical practice. The principles and processes of evidence-based, clinical practice are emphasized.
Prerequisite: Stat 243, 244 or equivalent.
SpHr 561 - Neurology of Speech and Hearing (4)
A course specifically designed for speech and hearing majors to provide a study in-depth of the neurology of the speech and hearing mechanisms with special attention given to the major deviations affecting verbal communication.
Also offered for undergraduate-level credit as SpHr 461 and may be taken only once for credit.

SpHr 562 - Cognitive Rehabilitation (4)
Discusses causes, symptoms, prevention, assessment, and management of cognitive-communication disorders following acquired brain injury across the lifespan. Specific populations to be discussed include traumatic brain injury, stroke, and the dementias. Places emphasis on evidence-based clinical reasoning and applying the World Health Organization model to clinical management in rehabilitation settings. Restricted to graduate students.

SpHr 563 - Adult Language Disorders (4)
Presents theories of acquired language disorders in adults specific to aphasia rehabilitation, including causes, symptoms, prevention, assessment, and management of aphasia in adults. Emphasis is placed on evidence-based clinical reasoning and applying the World Health Organization model to clinical management in a variety of rehabilitation settings.
Prerequisite: SpHr 461. Restricted to graduate students.

SpHr 564 - Medical Speech-Language Pathology I (2)
Addresses current topics related to practice of medical speech-language pathology in a variety of settings. Topics may include management of tracheostomy/ventilator dependence; medical terminology; medical billing, reporting, and appeals; interdisciplinary models; evidence-based practices; common medications and their side effects; and other topics of contemporary interest to learners.
Prerequisite: SpHr 461, SpHr 562, and SpHr 563.

SpHr 566 - Motor Speech Disorders (4)
Discusses disorders of speech sensorimotor production, including causes, symptoms, prevention, assessment, and management of acquired apraxia of speech and the dysarthrias across the lifespan. Emphasis placed on evidence-based clinical reasoning and applying the World Health Organization model to clinical management in varied settings.
Prerequisite: SpHr 530.

SpHr 567 - Cleft and Craniofacial Disorders (2)
Provides in-depth clinical management of children with cleft lip and palate and other craniofacial syndromes. Particular emphasis placed on identification, description, assessment, and treatment of speech production, feeding, and psychosocial development. Explores evidence-based models of teamcare, including the role of other medical professionals.
Prerequisite: SpHr 370, SpHr 371, SpHr 530, and SpHr 554.

SpHr 568 - Medical Speech Pathology II (2)
Covers advanced topics pertinent to assessment and treatment of speech and swallowing in individuals with respiratory impairments in a medical setting. Topics will include pulmonary function and defenses, types of respiratory impairments, tracheostomy, mechanical ventilation, and selected speech and swallowing interventions for individuals with respiratory impairments.
Prerequisite: For current students in the Speech-Language Pathology Graduate Program, completion of SpHr 564 Medical Speech Pathology I is required. For practicing community clinicians with a Masters degree or higher, no prerequisite is required.

SpHr 570 - Audiometric Practicum (2)
Supervised clinical practice designed for Speech and Hearing Science majors. Practical training in basic pure-tone and speech audiometry, including audiometric screening of children and adults.
Prerequisite: SpHr 488/588.

SpHr 571 - Neurolinguistics (4)
Neurolinguistics introduces the study of the relationship between linguistic processes and the human brain. Learn about language processing from psychological and neurological perspectives. Expected preparation: Introductory understanding of linguistics and psychology is strongly recommended (Introduction to Linguistics and Introduction to Psychology).
Also offered for undergraduate-level credit as SpHr 471 and may be taken only once for credit.

SpHr 581 - Stuttering (3)
Covers disorders of fluency, including causes, symptoms, prevention, theories of stuttering, assessment, and management of stuttering in pediatric and adults. Emphasis is placed on evidence-based clinical reasoning and applying the World Health Organization model to clinical management in a variety of practical settings.
Prerequisite: SpHr 530.
SpHr 582 - Voice Disorders (3)

Presents advanced information about the anatomy and physiology of normal and disordered voice production, including causes, symptoms, prevention, assessment, and management of voice disorders across the lifespan for organic and functional voice disorders.

Prerequisite: SpHr 530..

SpHr 584 - Assessment and Treatment of Language Disorders: Birth to Age Five (4)

Focuses on causation, evaluation, and management for addressing communication disorders in infants, toddlers, and preschool children with multiple challenges; particular emphasis on emerging communication across multiple developmental domains, with family-centered, interdisciplinary assessment and intervention. All topics target use of evidence-based practices and the influence of context on performance.

SpHr 585 - Assessment and Treatment of Language Disorders in School-aged Children and Adolescents (4)

Includes static, dynamic, and curriculum-based communication assessment of language, learning, and communication disorders. Discusses relation between language and learning disabilities, with focus on treatment of language-based disorders of reading and writing. Intervention emphasizes interdisciplinary service delivery models. Topics target use of evidence-based practices and the influence of context on performance.

Prerequisite: SpHr 584..

SpHr 586 - Autism (2)

Investigates current issues related to diagnosis and intervention for children and adolescents with autism spectrum disorders (ASD). Focuses on current research related to theories of social, communication, motor, sensory, cognitive, and adaptive behavior development. Emphasizes interdisciplinary nature of serving children with ASD. Restricted to graduate students.

SpHr 587 - Advanced Topics in Literacy in Children with Language Impairments (2)

Current topics specific to literacy disorders in children and adolescents with language impairment and other communication disorders. Specific topics may include review of typical literacy development, classification of literacy disorders, perspectives in teaching literacy, and assessment and intervention in areas including decoding, spelling, reading comprehension, digital literacy and written language.

Prerequisite: SpHr 585..

SpHr 588 - Advanced Assessment and Intervention for Bilinguals (2)

This course is focused on clinical language assessment and intervention for bilingual, bicultural, and non-mainstream populations within the field of speech-language pathology. Students learn how to select, administer and synthesize results from various assessment tools (e.g., standardized norm-referenced, criterion-referenced tests, dynamic assessment and parent interviews) to diagnose or rule out language impairment in bilinguals. Intervention goals and models are also addressed. While the course addresses several languages and cultures, it focuses on general principles.

SpHr 589 - Aural Rehabilitation (4)

Theoretical course covering the role of speechreading (lip reading) and auditory training as it relates to speech, language, and communication. Historical perspectives and philosophies considered, communication systems, speech acoustics and perception, amplification and hearing aids, speech reading, and auditory training. Multicultural issues will be included. Expected preparation: SpHr 488/SpHr 588.

Also offered for undergraduate-level credit as SpHr 489 and may be taken only once for credit..

SpHr 590 - Audiological Rehabilitation Clinic (2)

Supervised clinical practicum in the diagnosis and rehabilitation of children and adults with hearing disabilities; staff seminars in case dispositions. Maximum: 18 credits. Recommended prerequisite: SpHr 489/589, 498/598.

Also offered for undergraduate-level credit as SpHr 490..

SSc - Social Science: General

SSc 299 - Special Studies (1-6)

(Credit to be arranged.)

SSc 601 - Research (1-9)

(Credit to be arranged.)

SSc 602 - Independent Study (1-9)

(Credit to be arranged.)
SSc 603 - Thesis (1-9)
(Credit to be arranged.)

SSc 604 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

SSc 605 - Reading and Conference (1-9)
(Credit to be arranged.)

SSc 606 - Special Problems/Projects (1-9)
(Credit to be arranged.)

SSc 607 - Seminar (1-9)
(Credit to be arranged.)

SSc 608 - Workshop (1-9)
(Credit to be arranged.)

SSc 609 - Practicum (1-9)
(Credit to be arranged.)

SSc 610 - Selected Topics (1-9)
(Credit to be arranged.)

Stat - Statistics

Stat 105 - Elementary Data Analysis (4)
A course in exploration of data analysis and basic statistical topics. May include descriptive statistics, graphical and tabular summaries, computer software, confidence intervals, correlation and regression.
Prerequisite: Completion of Mth 95 with a grade of C- or above within the last year, or passing at the necessary level on the mathematics placement test within the last year (see Math Department webpage at mth.pdx.edu for information).

Stat 199 - Special Studies (1-4)
(Credit to be arranged.)

Stat 241 - Application of Statistics for Business (4)
Introduction of statistical analysis as part of management practice. Content includes statistical analysis, theoretical foundations and tools, as they relate to the application of statistics to problem solving in uncertain business environments. Emphasizes application of statistical tools to real world datasets and ability of students to make managerial recommendations.
Prerequisite: Completion of Mth 95 with a grade of C- or above within the last year, or passing at the necessary level on the mathematics placement test within the last year (see Math Department webpage at mth.pdx.edu for information).

Stat 243 - Introduction to Probability and Statistics I (4)
A basic course in statistical analysis including presentation of data, descriptive statistics, probability, probability distributions, sampling distributions, estimation, and use of statistical computer packages. A broad nontechnical survey designed primarily for non-math students who need to utilize the subject in their own fields. Not approved for major credit. This is the first course in a sequence of two: Stat 243 and Stat 244 which must be taken in sequence.
Prerequisite: Completion of Mth 095 with a grade of C- or above within the last year, or passing at the necessary level on the mathematics placement test within the last year (see Math Department webpage at mth.pdx.edu for information).

Stat 243R - Recitation for Stat 243 (0)
Recitation for Stat 243.
Corequisite: Stat 243.

Stat 244 - Introduction to Probability and Statistics II (4)
A basic course in statistical analysis including estimation, tests of significance, experimental design and analysis of variance, linear regression and correlation, nonparametric statistics, selected topics, applications, and use of statistical computer packages. A broad nontechnical survey designed primarily for non-math students who need to utilize the subject in their own fields. Not approved for major credit. This is the second course in a sequence of two: Stat 243 and Stat 244 which must be taken in sequence.
Prerequisite: Stat 243.

Stat 244R - Recitation for Stat 244 (0)
Recitation for Stat 244.
Corequisite: Stat 244.

**Stat 299 - Special Studies (1-4)**
(Credit to be arranged.)

**Stat 351 - Probability and Statistics for Electrical and Computer Engineering (4)**
An introduction to applied probability, statistics, and data analysis. Sample spaces, probability laws, discrete and continuous probability models, sampling theory, point and interval estimation, hypothesis testing, regression, correlation, experimental design, analysis of variance, computer simulation and computation in Matlab. Applications to problems of current interest to electrical and computer engineers.
Prerequisite: Mth 252.

**Stat 353 - Exploratory Data Analysis and Statistics for Mechanical and Materials Engineering (4)**
A statistics course with the main emphasis on understanding data from mechanical engineering applications. Computer-based methods and the R software are used extensively. Descriptive statistics, probability and Bayes’ Rule are introduced. Formal inference and hypothesis testing are presented with methods of regression and analysis of variance.
Prerequisite: Mth 252.

**Stat 361 - Introduction to Statistical Methods (4)**
Calculus-based introductory statistics course. Introduction to probability concepts (random variables, probability distributions, expectation, variance, covariance) and statistical concepts (fundamental sampling distributions and data descriptions, one-sample estimation and testing problems).
Prerequisite: Mth 252.

**Stat 363 - Statistical Computing and Data Visualization in R (4)**
Provides an introductory survey of methods in R, RStudio and RMarkdown to process, manipulate, analyze, and visualize data; as well as to generate reproducible reports from data driven analysis. Expected preparation: Prior programming experience is helpful but not required. We will be using the R language in RStudio and RMarkdown for ease of exposition.
Prerequisite: Stat 361.

**Stat 364 - Modern Regression Analysis (4)**
Foundations of statistical regression modeling and applications. Focus on application of statistical models. Topics include linear regression, multiple linear regression, model diagnosis, model selection and validation, and inference.
Prerequisite: Mth 343 and Stat 363.

**Stat 366 - Introduction to Experimental Design (4)**
Nonparametric statistics, multiple regression, topics in experimental design analysis of variance, factorial designs, analysis of covariance, other designs.
Prerequisite: Stat 244.

**Stat 387 - Introduction to Statistical Learning (4)**
Provides an introduction to the techniques of statistical learning, including assessing model accuracy, linear regression in high dimension, binary and multi-ary classification, re-sampling methods, tree-based methods and neural networks.
Prerequisite: Stat 364.

**Stat 399 - Special Studies (1-6)**
(Credit to be arranged.)

**Stat 401 - Research (1-6)**
(Credit to be arranged.) Consent of instructor.

**Stat 404 - Cooperative Education/Internship (1-12)**
(Credit to be arranged.)

**Stat 405 - Reading and Conference (1-8)**
(Credit to be arranged.) Consent of instructor.

**Stat 407 - Seminar (1-4)**
(Credit to be arranged.) Consent of instructor.

**Stat 409 - Practicum (1-12)**
(Credit to be arranged.)

**Stat 410 - Selected Topics (1-8)**
(Credit to be arranged.) Consent of instructor.

**Stat 451 - Applied Statistics for Engineers and Scientists I (4)**
Sample spaces, probability, counting measures, discrete and continuous probability models, sampling
theory, and computer applications. This is the first course in a sequence of two: Stat 451 and Stat 452 and must be taken in sequence.

Also offered for graduate-level credit as Stat 551 and may be taken only once for credit. Prerequisite: Mth 252.

Stat 452 - Applied Statistics for Engineers and Scientists II (3)

Point and interval estimation, hypothesis testing, regression, correlation, experimental design, analysis of variance, multivariable experiments, nonparametrics, statistical quality control, and computer applications. This is the second course in a sequence of two: Stat 451 and Stat 452 and must be taken in sequence.

Also offered for graduate-level credit as Stat 552 and may be taken only once for credit. Prerequisite: Stat 451.

Stat 461 - Introduction to Mathematical Statistics I (3)

Theory of probability, distribution of random variables, expectation and bivariate distributions. This is the first course in a sequence of three: Stat 461, Stat 462, and Stat 463 which must be taken in sequence. Expected preparation: MTH 253.

Prerequisite: Mth 254 and Mth 261 or equivalent.

Stat 462 - Introduction to Mathematical Statistics II (3)

Functions of random variables – one dimensional and higher dimensional, sampling distributions, Central Limit Theorem, point and interval estimation. This is the second course in a sequence of three: Stat 461, Stat 462, and Stat 463 which must be taken in sequence.

Prerequisite: Stat 461 or equivalent.

Stat 463 - Introduction to Mathematical Statistics III (3)

Testing of hypotheses, analysis of variance, analysis of categorical data, introduction to regression and correlation and nonparametric tests. This is the third course in a sequence of three: Stat 461, Stat 462, and Stat 463 which must be taken in sequence.

Prerequisite: Stat 462 or equivalent.

Stat 464 - Applied Regression Analysis (3)

Basic concepts of regression analysis, matrix approach to linear regression selecting the "best" regression equation, and multiple regression. Computational algorithms and computer software regression packages. Applications in science, engineering, and business.

Also offered for graduate-level credit as Stat 564 and may be taken only once for credit. Prerequisite: Mth 261 and either Stat 451/Stat 551 or Stat 461/Stat 561.

Stat 465 - Experimental Design: Theory and Methods I (3)

A theoretical and applied treatment of experimental design; analysis of variance, checking model adequacy; block designs; Latin squares; factorial designs; fractional factorial designs. All sections will illustrate real world applications with computer usage. This is the first course in a sequence of two: Stat 465 and Stat 466 which must be taken in sequence.

Also offered for graduate-level credit as Stat 565 and may be taken only once for credit. Prerequisite: Stat 464/Stat 564.

Stat 466 - Experimental Design: Theory and Methods II (3)

A theoretical and applied treatment of experimental design; fixed and random effects models; split-plot designs; nested designs; relation to regression analysis; analysis of covariance. All sections will illustrate real world applications with computer usage. This is the second course in a sequence of two: Stat 465 and Stat 466 which must be taken in sequence.

Also offered for graduate-level credit as Stat 566 and may be taken only once for credit. Prerequisite: Stat 465/Stat 565.

Stat 467 - Applied Probability I (3)

Basic concepts of probability, conditional probability, conditional expectation, discrete-time Markov chains, branching processes, Poisson processes. This is the first course in a sequence of two: Stat 467 and Stat 468 which must be taken in sequence.

Also offered for graduate-level credit as Stat 567 and may be taken only once for credit. Prerequisite: Stat 461/Stat 561 or Stat 451/Stat 551.

Stat 468 - Applied Probability II (3)

Continuous-time Markov chains, birth and death processes, queues and inventory, renewal processes. This is the second course in a sequence of two: Stat 467 and Stat 468 which must be taken in sequence.

Also offered for graduate-level credit as Stat 568 and may be taken only once for credit. Prerequisite: Stat 461/Stat 561 or Stat 451/Stat 551.

Stat 469 - Statistical Consulting (1-3)

Introduction to techniques and methods of statistical consulting. Faculty supervised consulting sessions with clients on appropriate projects brought to the
Statistics Consulting Laboratory. Data and/or statistical problems, from within and outside the University, are provided by clients and interdisciplinary guest lecturers. Introduction to and proficiency with various statistical computing packages as data analytic tools. A community-based learning course.

Also offered for graduate-level credit as Stat 570 and may be taken only once for credit.

**Stat 501 - Research (1-6)**
(Credit to be arranged.) Consent of instructor.

**Stat 504 - Cooperative Education/Internship (1-12)**
(Credit to be arranged.)

**Stat 505 - Reading and Conference (1-12)**
(Credit to be arranged.) Consent of instructor.

**Stat 507 - Seminar (1-4)**
(Credit to be arranged.) Consent of instructor.

**Stat 509 - Selected Topics (1-8)**
(Credit to be arranged.) Consent of instructor.

**Stat 543 - Survey of Statistical Methods (4)**
An introductory, discipline-neutral course in statistical analysis to prepare graduate students for research methods courses in other departments. Topics include descriptive statistics, confidence intervals, hypothesis tests, regression and correlation, analysis of variance, chisquared tests, and use of statistical software.

**Stat 551 - Applied Statistics for Engineers and Scientists I (4)**
Sample spaces, probability, counting measures, discrete and continuous probability models, sampling theory, and computer applications. This is the first course in a sequence of two: Stat 551 and Stat 552 and must be taken in sequence.

Also offered for undergraduate-level credit as Stat 451 and may be taken only once for credit.

Prerequisite: Mth 252.

**Stat 552 - Applied Statistics for Engineers and Scientists II (3)**
Point and interval estimation, hypothesis testing, regression, correlation, experimental design, analysis of variance, multivariable experiments, nonparametrics, statistical quality control, and computer applications. This is the second course in a sequence of two: Stat 551 and Stat 552 and must be taken in sequence.

Also offered for undergraduate-level credit as Stat 452 and may be taken only once for credit.

Prerequisite: Stat 551.

**Stat 561 - Mathematical Statistics I (3)**
Provides a foundation in the theory and methods of statistical inference. Topics include foundations of probability, random variables and distribution functions, moment generating functions, and common families of distributions. This is the first course in a sequence of three: Stat 561, Stat 562, and Stat 563 which must be taken in sequence.

Prerequisite: Stat 462 or equivalent.

**Stat 562 - Mathematical Statistics II (3)**
Provides a foundation in the theory and methods of statistical inference. Topics include multivariate distributions, transform methods, conditional distributions, covariance, distributions of sample statistics, and convergence theorems. This is the second course in a sequence of three: Stat 561, Stat 562, and Stat 563 which must be taken in sequence.

Prerequisite: Stat 561.

**Stat 563 - Mathematical Statistics III (3)**
Provides a foundation in the theory and methods of statistical inference. Topics include point estimation, evaluating estimators, hypothesis testing, confidence intervals, and asymptotic results for statistical tests. This is the third course in a sequence of three: Stat 561, Stat 562, and Stat 563 which must be taken in sequence.

Prerequisite: Stat 562.

**Stat 564 - Applied Regression Analysis (3)**
Basic concepts of regression analysis, matrix approach to linear regression selecting the "best" regression equation, and multiple regression. Computational algorithms and computer software regression packages. Applications in science, engineering, and business.

Also offered for undergraduate-level credit as Stat 464 and may be taken only once for credit.

Prerequisite: Mth 261 and either Stat 451/Stat 551 or Stat 461/Stat 561.
**Stat 565 - Experimental Design: Theory and Methods I (3)**

A theoretical and applied treatment of experimental design; analysis of variance, checking model adequacy; block designs; Latin squares; factorial designs; fractional factorial designs. All sections will illustrate real world applications with computer usage. This is the first course in a sequence of two: Stat 565 and Stat 566.

Also offered for undergraduate-level credit as Stat 465 and may be taken only once for credit.

Prerequisite: Stat 464/Stat 564.

**Stat 566 - Experimental Design: Theory and Methods II (3)**

A theoretical and applied treatment of experimental design; fixed and random effects models; split-plot designs; nested designs; relation to regression analysis; analysis of covariance. All sections will illustrate real world applications with computer usage. This is the second course in a sequence of two: Stat 565 and Stat 566.

Also offered for undergraduate-level credit as Stat 466 and may be taken only once for credit.

Prerequisite: Stat 465/Stat 565.

**Stat 567 - Applied Probability I (3)**

Basic concepts of probability, conditional probability, conditional expectation, discrete-time Markov chains, branching processes, Poisson processes. This is the first course in a sequence of two: Stat 567 and Stat 568 which must be taken in sequence.

Also offered for undergraduate-level credit as Stat 467 and may be taken only once for credit.

Prerequisite: Stat 461/Stat 561 or Stat 451/Stat 551.

**Stat 568 - Applied Probability II (3)**

Continuous-time Markov chains, birth and death processes, queues and inventory, renewal processes. This is the second course in a sequence of two: Stat 567 and Stat 568 which must be taken in sequence.

Also offered for undergraduate-level credit as Stat 468 and may be taken only once for credit.

Prerequisite: Stat 461/Stat 561 or Stat 451/Stat 551.

**Stat 569 - Statistical Consulting (1-3)**

Introduction to techniques and methods of statistical consulting. Faculty supervised consulting sessions with clients on appropriate projects brought to the Statistics Consulting Laboratory. Data and/or statistical problems, from within and outside the University, are provided by clients and interdisciplinary guest lecturers. Introduction to and proficiency with various statistical computing packages as data analytic tools. A community-based learning course.

Also offered for undergraduate-level credit as Stat 470 and may be taken only once for credit.

**Stat 571 - Applied Multivariate Statistical Analysis (3)**

Introduction to techniques and methods of multivariate statistical analysis. Deals with vector-valued data generated on individual experimental units. Applies the methods of vector analysis and matrix algebra to statistical problems of estimation and hypothesis testing, based primarily on the multivariate normal distribution. Computing to be an integral part of the course. Calculations will be done using a software package such as SAS or SPSS.

Recommended prerequisites: Stat 244, Mth 254, and Mth 261.

**Stat 572 - Bayesian Statistics (3)**

Modern applied Bayesian methods including Markov Chain Monte Carlo methods for analyzing multivariate posterior distributions. Computing will be done primarily in R using standard libraries for sampling.

Prerequisite: Stat 561 or instructor approval.

**Stat 573 - Computer Intensive Methods in Statistics (3)**

Resampling methods in statistics using empirical data, programming with statistical software, review materials (sampling distributions, hypothesis testing, confidence interval construction, and design of experiments), resampling version of review materials, and applications. Expected preparation: Stat 452/Stat 552 or Stat 466/Stat 566.

**Stat 576 - Sampling Theory and Methods (3)**

Introduction to the theory and methodology of random sampling. Includes stratified, cluster, systematic, and multi-stage sampling. Applications include sampling design and analysis, as well as sample weighting and sampling with unequal probabilities. Expected preparation: Stat 451/Stat 551.

**Stat 577 - Categorical Data Analysis (4)**

Topics include cross-tabulation statistics for matched samples, and methods to assess confounding and interaction via stratified tables. Students explore logistic regression in some detail, and relate results back to those found with stratified analyses. Topics
for logistic regression will include: parameter interpretation, statistical adjustment, variable selection techniques, and model fit assessment. Statistical software is used. Expected preparation: Stat 452/Stat 552.

**Stat 578 - Survival Analysis (3)**

Time-to-event data subject to random and/or deliberate censoring. Specialized models and procedures that accommodate censoring are presented. Parametric models and methods, including accelerated failure time models, the Kaplan-Meier estimate of survival, Cox proportional hazards model, the extended Cox model, and frailty models. Software package such as S-PLUS is used. Expected preparation: Stat 452/Stat 552.

**Stat 580 - Nonparametric Methods (3)**

Focus on standard nonparametric methods useful for the analysis of experimental data with minimal model assumptions. Topics include one and two-sample problems, one and two-way analysis of variance, multiple comparisons, rank correlation, estimation and confidence intervals, theory of U-statistics, permutation tests, Bootstrap, Monte Carlo power simulation studies.

Prerequisite: Stat 562 or with the approval of the Instructor.

**Stat 601 - Research (1-9)**

(Credit to be arranged.)

**Stat 604 - Cooperative Education/Internship (1-12)**

(Credit to be arranged.)

**Stat 605 - Reading and Conference (1-8)**

(Credit to be arranged.)

**Stat 607 - Seminar (1-4)**

(Credit to be arranged.)

**Stat 610 - Selected Topics (0-4)**

(Credit to be arranged.)

**Stat 661 - Advanced Mathematical Statistics I (3)**

**Stat 662 - Advanced Mathematical Statistics II (3)**

**Stat 663 - Advanced Mathematical Statistics III (3)**

**Stat 664 - Theory of Linear Models I (3)**

Multivariate normal distribution; moments and characteristic functions; noncentral Chi-square and noncentral F distributions; distribution of quadratic forms; estimation and distribution of estimators; principles of maximum likelihood and least squares; confidence regions and tests of hypotheses; regression models; Wishart distribution; Hotelling’s T2 statistic. This is the first course in a sequence of three: Stat 664, Stat 665, and Stat 666 which must be taken in sequence. Recommended prerequisite: Stat 563.

**Stat 665 - Theory of Linear Models II (3)**

Multivariate normal distribution; moments and characteristic functions; noncentral Chi-square and noncentral F distributions; distribution of quadratic forms; estimation and distribution of estimators; principles of maximum likelihood and least squares; confidence regions and tests of hypotheses; regression models; Wishart distribution; Hotelling’s T2 statistic. This is the second course in a sequence of three: Stat 664, Stat 665, and Stat 666 which must...
be taken in sequence. Recommended prerequisite: Stat 563.

**Stat 666 - Theory of Linear Models III (3)**
Multivariate normal distribution; moments and characteristic functions; noncentral Chi-square and noncentral F distributions; distribution of quadratic forms; estimation and distribution of estimators; principles of maximum likelihood and least squares; confidence regions and tests of hypotheses; regression models; Wishart distribution; Hotelling’s T² statistic. This is the third course in a sequence of three: Stat 664, Stat 665, and Stat 666 which must be taken in sequence. Recommended prerequisite: Stat 563.

**Stat 671 - Statistical Learning I (3)**
Bayesian theory of classification, the bias/variance trade-off, linear and quadratic discriminant analysis, Bayesian logistic regression, neural networks, Gaussian processes and structured learning. This is the first course in a sequence of three courses on Statistical Learning: Stat 671, Stat 672, Stat 673. Prerequisite: Stat 561 and Stat 562 and Stat 563.

**Stat 672 - Statistical Learning II (3)**
Bayesian networks, k-means, mixture models, the expectation maximization algorithm, Markov random fields, Gibbs distributions, belief propagation algorithms, variational inference, Markov chain Monte Carlo. This is the second course in a sequence of three courses on Statistical Learning: Stat 671, Stat 672, Stat 673. Prerequisite: Stat 561 and Stat 562 and Stat 563.

**Stat 673 - Statistical Learning III (3)**
This sequence is designed for graduate students in Math/Stat or Engineering. The focus of this third course is research topics in statistical learning to be determined each time this course is taught. This is the third course in a sequence of three courses on Statistical Learning: Stat 671, Stat 672, Stat 673. Prerequisite: Stat 561 and Stat 562 and Stat 563.

**Swah - Swahili**
These courses are currently inactive and the department is not planning to offer them this year.

**Swah 101 - First-Year Swahili Term 1 (4)**
Introduction to elementary Swahili. Emphasis is on listening comprehension, and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the first course in a sequence of three: Swah 101, Swah 102, and Swah 103.

**Swah 102 - First-Year Swahili Term 2 (4)**
Introduction to elementary Swahili. Emphasis is on listening comprehension, and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the second course in a sequence of three: Swah 101, Swah 102, and Swah 103.

**Swah 103 - First-Year Swahili Term 3 (4)**
Introduction to elementary Swahili. Emphasis is on listening comprehension, and oral practice, the elements of grammar, vocabulary building, and elementary readings. This is the third course in a sequence of three: Swah 101, Swah 102, and Swah 103.

**Swah 201 - Second-Year Swahili Term 1 (4)**
Intensive review of basic materials introduced in first year program and further development of communication skills. This is the first course in a sequence of three: Swah 201, Swah 202, and Swah 203. Expected preparation: Swah 103.

**Swah 202 - Second-Year Swahili Term 2 (4)**
Intensive review of basic materials introduced in first year program and further development of communication skills. This is the second course in a sequence of three: Swah 201, Swah 202, and Swah 203. Expected preparation: Swah 103.

**Swah 203 - Second-Year Swahili Term 3 (4)**
Intensive review of basic materials introduced in first year program and further development of communication skills. This is the third course in a sequence of three: Swah 201, Swah 202, and Swah 203. Expected preparation: Swah 103.

**Swah 301 - Third-Year Swahili (4)**
Focus on acquisition of vocabulary, practical application. Intensive practice in speaking, listening, reading, and writing. This is the first course in a sequence of three: Swah 301, Swah 302, and Swah 303. Expected preparation: Swah 203.
Swah 302 - Third-Year Swahili (4)
Focus on acquisition of vocabulary, practical application. Intensive practice in speaking, listening, reading, and writing. This is the second course in a sequence of three: Swah 301, Swah 302, and Swah 303. Expected preparation: Swah 203.

Swah 303 - Third-Year Swahili (4)
Focus on acquisition of vocabulary, practical application. Intensive practice in speaking, listening, reading, and writing. This is the third course in a sequence of three: Swah 301, Swah 302, and Swah 303. Expected preparation: Swah 203.

Swah 330 - Topics in East African Culture and Civilization (4)
A study of literary forms, theories, and analysis of texts in their socio-cultural contexts. Topics include: Oral literature, folklore, short stories, traditions and modernity, and biographies. Conducted in English.

Swah 331 - Language, Literacy and Leadership: A Community Based Learning Course (4)
Students learn by helping students from other cultures (e.g. Swahili) succeed in the US. Through classroom study and community involvement, students obtain knowledge and skills applicable to societal problems. Students will tutor individuals and small groups while gaining an understanding of other communities and their challenges.

Swah 399 - Special Studies (1-6)
(Credit to be arranged.)

Swed - Swedish
Swed 101 - First-Year Swedish Term 1 (4)
Beginning Swedish. Emphasis on communication skills: listening, speaking, reading, writing. This is the first course in a sequence of three: Swed 101, Swed 102, and Swed 103.

Swed 201 - Second-Year Swedish Term 1 (4)
Intensive review of basics introduced in first-year courses and further development of communication skills. This is the first course in a sequence of three: Swed 201, Swed 202, and Swed 203. Recommended prerequisite: Swed 103.

SW - Social Work
SW 301U - Introduction to Social Work (4)
This course introduces the student to the profession of social work and the field of social welfare through a historical lens. This course provides the student with the foundational language, principles of social work and introduces the student to the BSW Program. It will include introduction and overview of the knowledge, values, and skills of becoming a professional generalist social worker.
SW 320U - Introduction to Child Welfare (4)

An overview of the child welfare systems. Introduction to the identification, treatment of child abuse and neglect. Present historical and current development of child welfare systems in the United States, discussion of the key practice considerations human service professionals working with maltreated children and their families address.

SW 339 - Introduction to Oppression and Privilege (4)

Introduction and exploration of diversity, oppression and privilege frameworks; intersectionality regarding the dynamics of race, ethnicity, gender, sexual orientation, religion, (dis)ability status, and class. The course will focus on theory, knowledge, values, and beginning skills to work with individuals in the area of social justice and social work. The course will have relevant knowledge, values, and skills pertaining to acquiring the BASW.

Prerequisite: Admission to major.

SW 340 - Advocacy for Policy Change (4)

Current structures and history of social welfare policies and services will be examined, and students will be engaged in policy practice to advance social and economic well-being of families, groups and communities.

Prerequisite: Admission to major, junior standing, SW 339.

SW 341 - Social Justice Practice (4)

Engages in generalist social work policy practice to advance social and economic well-being and to deliver effective social work services through the lens of social justice.

Prerequisite: admission to major; junior standing; SW 339, SW 340, SW 350.

SW 350 - Human Behavior Through the Lifespan (4)

Theoretical and conceptual foundations of working with individuals and families throughout the lifespan in professional and community settings. Historical and socio-political issues will be integrated with theory to prepare beginning generalist social workers for effective practice in a variety of contexts.

Prerequisite: Admission to the major, junior standing, SW 339.

SW 351 - Social Work Practice I(4)

This is the first course in a four-course sequence, Social Work Practice I-IV, which prepares students to work with individuals, families, groups, and communities. Successful completion of this course is required for students to enter a field placement in their senior year (SW 400).

Prerequisite: SW 339, SW 340, SW 350.

SW 375 - Intimate Partner Violence: Theories & Practices (4)

Introduces theories, interventions, research, and complex issues associated with intimate partner violence (IPV). Survey popular/unpopular theories used to understand and explain IPV. Explores range of interventions targeting individuals, communities used by diverse stakeholders. While most IPV interventions engaged by soc serv providers target micro practice, students will explore the intersections of micro macro violence to better understand the influence of state and structural violence on the lives of individuals, communities, particularly those from racialized groups.

SW 384U - Addictions and Recovery: Impact on Families and Communities (4)

The impact of addictions will be addressed through the literature and practices of psychology, sociology, medicine, and social work. We will explore the definitions of substance abuse and paths to recovery mediated by the influence of social, cultural, and political forces impacting individuals, families, and communities.

Prerequisite: Upper-division standing.

SW 399 - Special Studies (1-4)

(Credit to be arranged.)

SW 399U - Special Studies (4)

(Credit to be arranged.)

SW 400 - Field Placement and Seminar I-III (4)

This course is the 9-month agency-based field placement and concurrent field seminar where students apply generalist social work knowledge, values, and develop generalist social work skills. The supervised field placement and weekly field seminar facilitate a student’s application of social work practice skills, the integration of theoretical content and the development of critical thinking skills. This course is a core component of the BSW curriculum, allowing students to apply knowledge gained in their social work courses in real world practice settings.
Corequisite: Corequisites: SW 430, SW 431 and SW 432.

**SW 401 - Research (1-12)**
(Credit to be arranged.)

**SW 402 - Independent Study (1-12)**
(Credit to be arranged.)

**SW 403 - Thesis (1-4)**
(Credit to be arranged.)

**SW 404 - Internship (1-8)**
Contact the department for a description for this course.

**SW 405 - Reading and Conference (1-6)**
(Credit to be arranged.) Consent of instructor.

**SW 406 - (1-12)**

**SW 407 - Seminar (1-6)**
(Credit to be arranged.) Consent of instructor.

**SW 409 - Practicum (1-12)**
(Credit to be arranged.)

**SW 410 - Selected Topics (1-6)**
(Credit to be arranged.)

**SW 410U - Selected Topics (4)**
(Credit to be arranged.)

**SW 416 - Motivational Interviewing (4)**
Hands on practice intensive course teaches the central theoretical and empirical tenets of Motivational Interviewing (MI), as well as the clinical skills necessary to deliver the intervention to a wide range of clients in diverse settings. Students will learn and practice both the spirit and techniques of motivational interviewing.

Prerequisite: Upper Division or Post-Bac standing.

**SW 430 - Social Work Practice II (3)**
This is the second course in a four-course sequence, Social Work Practice I-IV, which prepares students to work with individuals, families, groups, and communities. BSW students take this sequence concurrently with their field placement.

Prerequisite: Admission to the major and SW 351.
Corequisite: SW 400.

**SW 431 - Social Work Practice III (3)**
The third course in a four courses sequence, Social Work Practice I-IV, which prepares students to work with individuals, families, groups, and communities. BSW students take this sequence concurrently with their field placement.

Prerequisite: SW 351 and SW 430.
Corequisite: SW 400.

**SW 432 - Social Work Practice IV (3)**
This is the fourth course in a four-course sequence, Social Work Practice I-IV, which prepares students to work with individuals, families, groups, and communities. BSW students take this sequence concurrently with their field placement.

Prerequisite: SW 431.
Corequisite: SW 400.

**SW 441 - Psychobiology for Social Workers (3)**
Provides baccalaureate level social workers with a basic understanding of biological concepts, physiological systems, and neurological-environmental interactions. Enhances social work practice skills by providing a holistic conceptualization of people-in-environment.

Prerequisite: Admission to major.

**SW 447 - Social Work and Sustainability (3)**
Examines the role of professional social work in achieving sustainability at individual, community, regional, national, and global levels. Using a multidisciplinary perspective, the environmental, economic, and social aspects of sustainability, considered theoretically and practically. Sustainability linked to attainment of environmental, economic, and social justice. Includes community-based learning projects addressing sustainability.

Also offered for graduate-level credit as SW 547 and may be taken only once for credit. Prerequisite: SW 440 (BSW program) or SW 541 (graduate) or their equivalent.
SW 450 - Social Work Research and Evaluation I (3)

The importance of social work research and evaluation for practice and policy. Qualitative and quantitative research, critical consumption of research, and conducting evaluations. Focuses on research that promotes social and economic justice and that encourages respect for diversity. Includes experimental designs, single system designs, focus groups, and interviews. Covers early phases of the research process: conceptualization, design, sampling, measurement, and data collection. Emphasizes ethical issues.

Prerequisite: Admission to major; SW 351.

SW 451 - Social Work Research and Evaluation II (3)

Teaches next phases of the research and evaluation process: data analysis, formulation of implications of findings, and dissemination. Critical consumption of research findings as well as conducting data analysis. Qualitative and quantitative data analysis, including descriptive statistics, hypothesis testing, data analysis of single system designs, and thematic analysis. Focuses on research and evaluation that promote social and economic justice and that encourage respect for diversity. Emphasizes ethical issues.

Prerequisite: Admission to major; SW 450.

Introduction to Indian child welfare with an emphasis on understanding legal, historical, and cultural issues applying to work with American Indian and Alaskan native youth. Emphasis is on Indian child welfare issues in the Pacific Northwest.

SW 501 - Research (1-9)
(Credit to be arranged.)

SW 502 - Laboratory (1-9)
(Credit to be arranged.)

SW 503 - Thesis I, II, III (1-9)
(Credit to be arranged.)

SW 504 - Cooperative Education/Internship (0-15)
(Credit to be arranged.)

SW 505 - Reading and Conference (1-6)
(Credit to be arranged.)

SW 506 - Special Problems (1-6)
(Credit to be arranged.)

SW 507 - Seminar (1-6)
(Credit to be arranged.)

SW 508 - Workshop (1-6)
(Credit to be arranged.)

SW 509 - Practicum (1-9)
(Credit to be arranged.)

SW 510 - Selected Topics (1-6)
(Credit to be arranged.)

SW 511 - Field Seminar and Field Placement (1-4)
Nine month agency-based 500 hour field placement with a concurrent field seminar. Supervised field placement and weekly field seminar to integrate theory and critical thinking. Apply generalist social work knowledge and skills in real world practice settings. Core component of MSW curriculum. Required three times in generalist year.

SW 512 - Advanced Field Placement (1-4)
Nine month agency-based 500 hour field placement. Supervised field placement to integrate advanced theory and skill building. Core component of MSW curriculum. Required three times in advanced year.

SW 513 - Research Methods for Social Work Advanced Standing Students (3)
Required research methods course for students admitted to the MSW Advanced Standing program. It assures students have a solid foundation in research knowledge and skills needed for the advanced year of the MSW Program.
SW 514 - Cultural and Spanish Language Immersion for Social Workers Costa Rica (3)

Course includes culture and language classes with visits to social service agencies in Costa Rica. Course will prepare students to offer social work services in multicultural, multilingual settings through the context of social work values and ethics and with special attention to anti-oppressive and non-discriminatory practice with diverse populations.

SW 515 - Skills for the Helping Process - Groups (3)

Help students to develop assessment and intervention skills across multiple levels. Assess types and stages of groups, roles, and group dynamics. Develop a group proposal. Learn how to begin, facilitate, and end a group with clients, organizations, and communities.

Corequisite: SW 511.

SW 516 - Motivational Interviewing (3)

Teaches the central theoretical and empirical tenets of Motivational Interviewing (MI), as well as the clinical skills necessary to deliver the intervention to a wide range of clients in diverse settings. Students will learn and practice both the spirit and techniques of motivational interviewing.

SW 517 - Health Across the Lifespan I (3)

This is a three-term advanced concentration course for students in health related settings. Focus on self-awareness, ethics, chronic disease, teamwork, disparities, health literacy, and use of interpreters. Role of social work across numerous settings explored. Relevant legal reporting, medical terminology and introduction to theory. This is the first course in a sequence of three: SW 517, SW 518, SW 519 and must be taken in sequence.

Prerequisite: SW 511 or SW 589. Corequisite: SW 512.

SW 518 - Health Across the Lifespan II (3)

Advanced concentration course for students in health related settings. Intervention and assessment modalities and important practice theories. Transitional planning across the continuum of care, health reform, integrated medicine, advance care planning, moral distress, critical thinking about medical model and oppression, navigation of team dynamics, bias, privilege, pain management. This is the second course in a sequence of three: SW 517, SW 518, SW 519 and must be taken in sequence.

Prerequisite: SW 517. Corequisite: SW 512.

SW 519 - Health Across the Lifespan III (3)

Advanced concentration course for students in health related settings. Peer consultation, ethics committees, social determinants of health, group work, surrogate decision making, harmreduction models, assessment tools, intervention and evaluation of practice, NASW Practice Standards, basic pharmacology, policy related to systems of care. This is the third course in a sequence of three: SW 517, SW 518, SW 519 and must be taken in sequence.

Prerequisite: SW 518. Corequisite: SW 512.

SW 520 - Social Welfare History and Policy (3)

Addresses the policy making of social welfare and explores values and ethical choices affecting the process. Examines historical and contemporary issues and their impact on the social work profession and social welfare. Highlights relations among social problems, social policies, and social practices as means for promoting social justice.

SW 521 - Advanced Anti-Oppressive Practice (3)

This course builds student capacity for anti-oppressive practice in the micro and mezzo practice arenas, with an emphasis on the micro levels of intervention. The focus is on the positional privilege of social worker and the oppression experiences of service users (clients) and communities.

Prerequisite: SW 539 and SW 532, or SW 589.

SW 522 - Trauma Informed Care (3)

Prepares students to apply Trauma Informed Care principles. Reviews trauma and toxic stress (neurobiology, adverse childhood experiences, and resiliency) and uses this knowledge to evaluate behavior, policies, and procedures. Examines how TIC complicates and complements others approaches with a specific focus on the intersection with equity, inclusion, and cultural responsivity. TIC is beneficial to a variety of disciplines in a variety of settings including judicial/corrections, veterans’ services, housing, healthcare, education, and child-welfare.
SW 523 - Health Care Policies and Programs (3)
Advanced policy course analyzes the history of selected health care policies, programs, and disease categories within the context of social work practice in health care. Contemporary outcomes in current health and service delivery systems presented from a policy perspective. Develops skills for policy change.

SW 524 - Community Organization (3)
Presents community organizing as a well-established social work method for promoting social change and improving community life through community and institutional reform. Topics for class will include an overview of the history of community organizing, models of community change (locality development, social planning, and social action), methods of social change (advocacy, mobilizing, organizing, coalition building, and partnership), examples of community-based organization, leadership development, and measuring the benefit to communities. Discussion also includes understanding the role of power and culture that exists within neighborhoods and communities.

Prerequisite: SW 520 or SW 589 (Advanced standing only).

SW 525 - Poverty: Policies and Programs (3)
Examines the nature and causes of poverty and inequality in the United States and the impact of economic globalization on social work's response to these critical social problems. Studies ways in which people in poverty cope and support each other in low-income urban neighborhoods; examines the ways in which work and welfare interact with each other and with informal social supports. Addresses policy issues, including those involved in both service and income strategies to relieve or prevent poverty; develops skills for effective practice with low-income communities, families, and individuals.

Also offered as SW 625 and may be taken only once for credit. Prerequisite: SW 520 or SW 589 (Advanced standing only).

SW 526 - Applied Ethics and Law in Social Work Practice (3)
Apply ethical theory, law, policy, and codes to actual social work practice cases and situations. Consider the role of individual free will, and strategies to address the influence of personal values and biases. Explore the interpretation and application of Oregon statutes to social work practice.

SW 528 - Facilitation of Multi-disciplinary/Care Coordination Team Meetings (3)
Addresses the theoretical foundations, applications and facilitation skills required for collaborative participatory decision-making in the context of social work practice across populations. Develop framework for facilitating in-depth strengths, needs assessment and problem solving. Gain understanding and skills in balancing power dynamics, clinical perspectives, and timely decision-making within agency parameters.

SW 529 - International Mental Health Policy (3)
Compares mental health policies from a global perspective, emphasizing United Nations and World Health Organization perspectives. Programs and policies from various countries are compared and contrasted with those of the U.S., and Oregon in particular.

Also offered as SW 629 and may be taken only once for credit. Prerequisite: SW 520 or SW 589 (Advanced standing only).

SW 530 - Social Work Practice with Individuals and Families I Theory and Engagement (3)
The first in a two-course sequence focusing on social work practice with individuals and families and integration of theory into practice. Students will develop engagement and exploration skills for working with individuals and families. They will critically evaluate and apply commonly used human development theories during the engagement and exploration phase of generalist practice. A framework for critical evaluation will be presented for comparing, applying, and evaluating various development theories covered in the course.

Corequisite: SW 511.

SW 531 - SW Practice with Individuals and Families II Theory, Assessment and Intervention (3)
The second in a two-course sequence focuses on social work practice with individuals and families and integration of theory into practice. Students will develop assessment and intervention skills for working with individuals and families. They will critically evaluate and apply commonly used human development theories during the assessment and intervention phase of generalist practice. A framework for critical evaluation will be used to compare, apply, and evaluate various human development theories covered in the course.

Prerequisite: SW 530. Corequisite: SW 511.
SW 532 - Advocacy and Empowerment (3)
Builds the advocacy skills to form purposive and equitable partnerships with service users, their communities, and organizations. Includes empowerment-based practices in micro, mezzo and macro work. Healthy critique of the role of the professional social worker as "expert" is examined.

SW 533 - Clinical Social Work Practice I (3)
This is a three term clinical concentration course that provides advanced theory-based practice from multiple theoretical perspectives. Special attention will be paid to relational self-awareness, cultural responsiveness, ethics, evidenced-based principles and intervention with individuals, families, and groups. This is the first course in a sequence of three: SW 533, SW 534, SW 535 and must be taken in sequence. Co-requisite: SW 512.
Prerequisite: SW 511 or SW 589 (Advanced standing only). Corequisite: SW 512.

SW 534 - Clinical Social Work Practice II (3)
The second in a three-course sequence, course addresses the family of origin perspective on family systems theory. Students deepen self-awareness related to their diversity and positionality in providing clinical services. Understanding and managing one's reactivity in clinical interactions is a focus. Other theories are integrated. This is the second course in a sequence of three: SW 533, SW 534, SW 535 and must be taken in sequence.
Prerequisite: SW 533. Corequisite: SW 512.

SW 535 - Clinical Social Work Practice III (3)
This course integrates knowledge from previous courses and field practicum. Students are provided an opportunity to develop and articulate their personal theoretical orientation or practice model, an essential step in beginning a career as a professional clinical social worker. Professional issues and licensing will be addressed. This is the third course in a sequence of three: SW 533, SW 534, SW 535 and must be taken in sequence.
Prerequisite: SW 534. Corequisite: SW 512.

SW 539 - Social Justice in Social Work (3)
Examines epistemological and theoretical approaches to understanding social justice and equity as they relate to social exclusion, marginalization, and oppression.
Prerequisite: Must be enrolled in the MSW program.

SW 541 - Societal, Community and Organizational Structures and Processes (3)
Service users and social work practitioners are constrained by societal, community, and organizational structures and processes. Social construction of conceptual frames with social work values and ethics are critiqued. Theories addressing the behavior and change in process of communities and organizations are applied and evaluated.

SW 542 - Social Work in Native American Communities (3)
Introduces and expands social work knowledge and methods appropriate for working with tribal and urban Indian communities. The historical, social and cultural contexts of social work practice with individuals, families, groups, and communities in Indian Country will be examined.

SW 543 - The African American Family: Multigenerational Trauma and Issues of Violence (3)
Exposes students to historical events and policies which have led to contemporary social problems and structural inequalities that continue to negatively impact African Americans. Will provide practical tools to inform practice at the five levels of service and empower individuals, families, groups, organizations and communities throughout the change process.

SW 544 - Mid-Life and Beyond (3)
Focuses on development in mid and late adulthood from a lifespan perspective. Promotes appreciation of the developmental potential for normal and healthy aging. Explores demographic, socio-historical and developmental characteristics of currently emerging older adults. Focuses on current developmental theories in social cognition and identity development in mid and late adulthood.

SW 545 - Advanced Human Behavior in the Social Environment (3)
Provides an opportunity for students to explore current theoretical developments in the social and behavioral sciences which apply to social work practice including populations at risk. Taught in different sections each of which covers social and cultural contexts for human behavior in the social environment. May be repeated for additional credit.
Also offered as SW 645. Prerequisite: SW 531, SW 541 or SW 589 (Advanced standing only).

**SW 547 - Social Work and Sustainability (3)**
Examines the role of professional social work in achieving sustainability at individual, community, regional, national, and global levels. Using a multidisciplinary perspective, the environmental, economic, and social aspects of sustainability, considered theoretically and practically. Sustainability linked to attainment of environmental, economic, and social justice. Includes community-based learning projects addressing sustainability.
Also offered for undergraduate-level credit as SW 447 and may be taken only once for credit. Prerequisite: SW 440 (BSW program) or SW 541 (graduate) or their equivalent.

**SW 548 - Advanced Social Work Practice with Latinx (3)**
Provides a foundation of Latinx social work in outpatient mental health and integrated health settings. Examines Latinx cultural diversity, health disparities, values, attitudes, traditions, spirituality and offers general guidelines to integrate these cultural factors in effective behavioral/mental health screens and evaluations as well as interventions to address consumers’ needs.
Prerequisite: SW 530 or SW 589.

**SW 549 - Spirituality in Social Work Practice (3)**
Explores the spiritual and religious diversity of clients and communities and its role in individual, group and community life. Identify and apply a framework of knowledge, values and practice methodologies to conducting bio-psychosocial spiritual assessments within a wide range of social work practice settings.

**SW 550 - Research and Evaluation I (3)**
Introduction to research and evaluation in social work. Introduces critical consumption of research and ethics. Addresses qualitative and quantitative social work research, group designs, single system designs, and evaluation. Considers measurement, sampling, design, and data collection. Addresses social and economic justice, cultural sensitivity, inclusion, and diversity.

**SW 551 - Research and Evaluation II (3)**
Focuses on techniques of quantitative data analysis and introduces methods of qualitative data analysis. Descriptive statistics, probability theory and hypothesis testing, and inferential methods. Addresses connections between (a) social work research and evaluation and (b) social and economic justice, cultural sensitivity, inclusion, and diversity.
Prerequisite: SW 550.

**SW 553 - Research for Racial Justice (3)**
Reduce racial inequities in organizations requires gaining theory and practice skills. This course provides both, integrating heightened attention to policy, research and intervention approaches to reduce racial disparities in a wide array of human service systems. The course focuses on building individual, organizational and leadership efficacy for advancing racial equity.
Prerequisite: SW 550 and SW 551, or SW 513.

**SW 555 - Social Work Perspectives on Mental Health Disorders (3)**
Reviews and analyzes mental disorders from DSM-5 perspectives and variables that reshape and redefine concepts and definitions of mental health and illness. The development, use, influence, and limitations of DSM are considered from various contexts. Examines strategic approaches to assessment, diagnosis, and intervention from the recovery philosophy and SW perspectives.
Prerequisite: SW 530 or SW 589.

**SW 556 - Advanced Clinical Practice in Integrated Health Care (3)**
Introduction to the direct practice of integrated health in primary care. Students will become knowledgeable of the roles of health providers working in primary care settings, theories and models of care, engagement, assessment, intervention, practice evaluation, and cross-cultural issues.
Prerequisite: SW 530, SW 531 and SW 551, or SW 589.

**SW 557 - Supervision in Social Work Practice (3)**
Explores the knowledge and skills for effective social work supervision emphasizing a collaborative, developmental, reflective and competency-based approach. Attention is paid to the cross cultural, sociopolitical, and ethical influences on supervision and the supervisory relationship.

**SW 558 - Abuse and Trauma: Theory and Intervention (3)**
Examines the impact of trauma and abuse on adults, children, and families. Acute and long-term sequelae will be identified, emphasizing the interaction of traumatic and developmental effects. An integrative biopsychosocial intervention model for working with
individuals, groups, and families will be explored through multiple theoretical lens.

**Prerequisite:** SW 530 or SW 589.

**SW 559 - Community and Organization Research (3)**
Prepares for mezzo and macro research practices to create the evidence base for social change (building the research base to advance reforms), strengthening organizations (designing and using program evaluation to improve programs and organizations), and building the voice and influence of marginalized communities (including local and regional communities and organizational service users).

**Prerequisite:** SW 550 and SW 551, or SW 513.

**SW 560 - Understanding and Working with LGBT Populations in Social Work (3)**
Explore current theory of privilege and oppression that applies to sexual orientation/gender/gender identity/gender expression. Emphasis on combating oppression and discrimination in professional, personal, community, and social environments, and in developing affirming SW practices. Focus on students engaging in experiential learning that challenges their internalized and socially constructed beliefs.

**SW 561 - Clinical Social Work with Groups (3)**
Deals with the theory and practice of clinical social work within the wide range of groups in which social workers participate as workers and co-workers. Articulates issues related to group process and development as to their effect on the group experience. Includes leadership strategies and diverse populations.

**Prerequisite:** SW 515 or SW 589.

**SW 562 - Loss & Grief Across the Lifespan (3)**
Examination of loss and grief in relation to death and diverse non-death experiences across the lifespan. Review of theory, research, and best practices for social workers helping with bereavement processes, grief integration, and meaning making for individuals, families, and across communities. Unique cultural and spiritual perspectives discounted or devalued through dominant discourses are brought to light.

**Prerequisite:** SW 530 or SW 589.

**SW 563 - Social Work with Children, Adolescents, and Their Families (3)**
Explores clinical social work practice with children, adolescents, and families. Emphasizes a collaborative and contextual approach that, in addition to child-focused interventions, includes work with parents, families, and groups in a variety of settings. Delineation and demonstration of specific clinical strategies and techniques with opportunities to practice and apply in field.

**SW 564 - Social Work in Schools (3)**
Uses a policy/practice perspective to prepare students for effective and culturally sensitive social work practice in early childhood and K-12 education. Presents multiple roles of school social workers and educational policies that provide context for practice. Emphasizes collaboration among families, schools, and communities.

**SW 565 - Critical Disability Studies in Practice (3)**
Emphasizes deepening understanding of lived experiences of individuals with disability in the context of larger societal and community structures. Students will examine participation, community, health, mental health, education, academia, personal assistance services, violence, hate crime, and employment through critical disabilities studies theory and first person narratives. Through lectures, readings, guest speakers, assignments and discussions, students will engage with each other to encourage application of new concepts in current and future academic, professional, and personal lives.

**SW 566 - Child Welfare Seminar: Practice and Policy (1)**
Offered to social work students who also work in the field of child welfare across the state of Oregon. The course offers a 9-month online seminar format to discuss key practice and policy issues in child welfare and explore innovative approaches nationally and around the world. Students will deepen their knowledge of applying social work skills to their work in child welfare at both micro and macro levels of social work practice. This course is repeatable for up to 3 credits.

**SW 567 - Evidence Based Interventions for Community Mental Health Practice (3)**
Reviews and critiques evidence-based interventions for community-based mental health populations. These interventions include supported employment, assertive community treatment/case management, psychosocial rehabilitation, psychopharmacology, recovery and consumer perspectives, and integrated treatment for co-occurring substance use disorders.
Theoretical frameworks include harm reduction, transtheoretical/readiness to change, and health promotion.

Prerequisite: SW 531, SW 532, or SW 589 (Advanced standing only).

**SW 568 - Interdisciplinary Community Mental Health Seminar (1-3)**

Seminar on interdisciplinary relationships among social work, psychiatry, and nursing; and on a variety of clinical, and policy topics. For students in community mental health placements and those working with individuals with severe and persistent mental illness. Jointly offered with OHSU's Department of Public Psychiatry. Enrollment is limited to six students per term and requires instructor approval. This course is repeatable up to 2 times for credit.

**SW 569 - Social Work in End-of-Life and Palliative Care (3)**

Covers a broad range of topics related to social work and end-of-life and palliative care. Addresses: cultural and spiritual dimensions at end-of-life, pain and symptom management, hospice, ethical considerations, practice and policy guidelines, team work, mental health at end-of-life, vulnerable populations and resources available to patients and families.

**SW 570 - Brief Behavioral Interventions & Treatment (3)**

Prepares students to practice brief interventions with clients and families. They will develop skills in case conceptualization, assessment, intervention, and treatment planning using advanced therapeutic techniques and methods including solution-focused, cognitive-behavioral, and mindfulness with special focus on crisis intervention. Students will also gain knowledge and skills in anti-oppressive, culturally responsive practice.

Prerequisite: SW 530 or SW 589. Corequisite: NA.

**SW 571 - Substance Use, Abuse and Addiction and Social Work Practice (3)**

Provide students with a foundation in direct and indirect practice issues with clients, families and communities challenged by substance abuse and addiction. Assist students in further developing and integrating their social work practice frameworks with deeper understanding and skill regarding the psychodynamic, biological and ecological nature of substance abuse disorders.

**SW 574 - Social Work with Older Adults (3)**

Mental and physical frailties experienced by older adults are examined for their implications for adaptation and intervention. Mental disorders as they are uniquely characterized in late adulthood are reviewed, with special emphasis on age appropriate assessment. Psychosocial interventions for both community and institutionalized populations will include individual, family, group, and environmental approaches.

**SW 575 - Multicultural Social Justice Work in Action (3)**

Examine current perspectives on multicultural SW practices for individuals, families and groups marginalized due to race, ethnicity, economic status, sexual identity, and immigration. Develop strategies to provide holistic, empowering and culturally-responsive services based on assessment, engagement and intervention and the liberation health SW model.

Prerequisite: SW 539 and SW 530, or SW 589.

**SW 578 - Social Work in the Juvenile and Criminal Justice Systems (3)**

Analyzes current controversies concerning the origin and meaning of criminal and delinquent behavior; the socio-economic and multicultural characteristics of contemporary life contributing to delinquency and crime; social work’s role in the "people processing system"; the major current modalities and inquiry into their effectiveness; social policy issues confronting the juvenile justice system; and current policy and practice trends toward incarceration and away from rehabilitation.

Also offered as SW 678 and may be taken only once for credit. Prerequisite: SW 520 or SW 589 (Advanced standing only).

**SW 579 - Engaging with the Mandated Client (3)**

Course examines legal, ethical and effective practice with involuntary clients, often members of oppressed groups. Will also address research regarding "involuntary practitioners," self-care, client advocacy, value conflicts, and reform efforts.

**SW 583 - Empowerment Approaches with Transition-Age Youth with Mental Health Needs (3)**

Prepares students to work collaboratively with youth and young adults with mental health needs. Co-taught with a young adult and a parent with mental health
services experience. Focuses on skills for partnering with youth to overcome barriers to success, increase self-determination and leadership skills, and strengthen family and peer support.

**SW 584 - Intimate Partner Violence (3)**
Aims to (re)introduce theories, interventions, research, and complex issues associated with intimate partner violence (IPV). Students will be asked to explore the intersections of micro and macro violence to better understand the influence of state and structural violence on the lives of individuals and communities, particularly those from racialized groups.

**SW 585 - Fund Development and Grant Writing (3)**
Deepening understanding of funding role and development in nonprofit industry. Application of fundraising strategies and grant writing to create or recreate innovative programs and marketing strategies. Develop program budgeting, accurate case statements and messages, draft grant applications and learn to create and sustain authentic long term fund development strategies.

**SW 586 - Children, Youth and Families I (3)**
Advanced concentration course for students working with children, youth, and families. Focus on ethics, self-reflection and identity, and social location, critical analysis, and multi-disciplinary system work. Theories and frameworks for multidimensional assessments are examined. This is the first course in a sequence of three: SW 586, SW 587, SW 588 and must be taken in sequence. Co-requisite: SW 512.
Prerequisite: SW 511 or SW 589. Corequisite: SW 512.

**SW 587 - Children, Youth, and Families II (3)**
Advanced concentration course for students interested in working with children, youth, and families. Student will continue to explore, learn, and apply methods for multi-systemic social work practice. Demonstration of practice methods and skills for working though barriers created by social policies that impact children, youth, and families will be addressed. This is the second course in a sequence of three: SW 586, SW 587, SW 588 and must be taken in sequence.
Prerequisite: SW 586. Corequisite: SW 512.

**SW 588 - Children, youth, and families III (3)**
Third advanced concentration course for students interested in working with children, youth, and families. The course requires a deepening of practice skills. Students address secondary traumatization, burnout, and self-care. Also will examine impact of policy on service-users and promoting service user influence on policy. This is the third course in a sequence of three: SW 586, SW 587, SW 588 and must be taken in sequence.
Prerequisite: SW 587. Corequisite: SW 512.

**SW 589 - Advanced Standing Seminar (4)**
Students who successfully complete this seminar will demonstrate the competencies to enter the advanced year of the MSW program. This seminar will provide a connection between the BSW curriculum and advanced MSW curriculum, and evaluate students' readiness for advanced practice. The course requires students to demonstrate foundational social work skills, critical self-reflection, and academic readiness for graduate course work.
Prerequisite: Admission to advanced standing program.

**SW 590 - Advanced Topics in Applied Research Methods for Social Work (3)**
Builds on foundation research methods and data analysis courses. Courses offered under this number present an evidence-based framework for social work practice and methods for analyzing quantitative data (e.g., multiple linear regression) and/or qualitative data (e.g., ethnography). Emphasizes application of methods to build knowledge in a specialized area relevant to a student’s field of practice and/or to complete an evaluation of program(s) or practice. Emphasizes interpretation of results to inform effective social work practice in community and agency-based settings. May be repeated for credit.
Prerequisite: SW 551 or SW 589 (Advanced standing only).

**SW 591 - Child & Adolescent Behavior & Development in the Social Environment: Advanced Theory & Research (3)**
Builds on micro and macro Human Behavior in the Social Environment and research methods. Presents ecological-developmental framework and culturally sensitive theories for understanding individual, family, peer, school, community, and societal influences on child and adolescent behavior and development. Presents prevention framework for using research-based knowledge of behavior and development.
Prerequisite: SW 531 or SW 589.
SW 593 - Practice and Leadership with Communities and Organizations I (3)
This course anchors the three-quarter advanced concentration for social work practice and leadership in community and organizational contexts, advancing skills in empowering individuals, organizations and communities for just solutions to social problems. This is the first course in a sequence of three: SW 593, SW 594, SW 595 and must be taken in sequence. Co-requisite: SW 512.
Prerequisite: SW 511 or SW 589.. Corequisite: SW 512.

SW 594 - Practice and Leadership with Communities and Organizations II (3)
The second course of a three-term sequence is focused on group work, organizational and community assessments. This course is designed to look at features of organizational and community action planning including building coalitions, with emphasis on popular education, increasing equity, and reducing disparities. This is the second course in a sequence of three: SW 593, SW 594, SW 595 and must be taken in sequence. Co-requisite: SW 512.
Prerequisite: SW 593.. Corequisite: SW 512.

SW 595 - Practice and Leadership with Communities and Organizations III (3)
In the third term of this course sequence involves building student skills in social transformation, at both the organizational and community level, with heightened focus on improving public policy. Students will build skills for practicing policy advocacy from inside and outside the system. This is the third course in a sequence of three: SW 593, SW 594, SW 595 and must be taken in sequence. Co-requisite: SW 512.
Prerequisite: SW 594.. Corequisite: SW 512.

SW 601 - Research (0-15)
(Credit to be arranged.)

SW 602 - Independent Study (1-9)
(Credit to be arranged.)

SW 603 - Dissertation (0-15)
(Credit to be arranged.)

SW 605 - Reading and Conference (0-15)
(Credit to be arranged.)

SW 607 - Seminar (0-15)
(Credit to be arranged.)

SW 610 - Selected Topics (0-15)
(Credit to be arranged.)

SW 620 - Substantive Area Conceptualization (3)
Primary focus is development of a conceptual framework to guide scholarly work in student's selected area of inquiry. Students define domain of interest, review relevant literature, consider cultural, historical, and political contexts, and note relevance for human services professions. Students explore multiple theoretical perspectives, evaluate their merits, synthesize into conceptual framework, and discuss implications for research and practice.

SW 621 - Social Problem Analysis: Intervention Phase (3)
Intervention phase of the social problem solving process applied to the student's selected social problem. Focus is on the development of a multi-level intervention plan based on review of empirical literature. Program theory and theories of change will be explored. Analysis of policy-level interventions and related effectiveness literature. Construction of logic models. Integration of policy and practice will be emphasized.
Prerequisite: SW 620..

SW 622 - Substantive Area Investigation (3)
This class allows students to put into practice what they have learned in their theory, research methods, and substantive area courses. Students will design a study in their substantive area, focusing on methodological rigor, ethical practice, community/stakeholder engagement, and potential impact.
Prerequisite: SW 620..

SW 625 - Poverty: Policies and Programs (3)
Examines the nature and causes of poverty and inequality in the United States and the impact of economic globalization on social work’s response to these critical social problems. Studies ways in which people in poverty cope and support each other in low-income urban neighborhoods; examines the ways in which work and welfare interact with each other and with informal social supports. Addresses policy issues, including those involved in both service and income strategies to relieve or prevent poverty;
develops skills for effective practice with low-income communities, families, and individuals.

Also offered as SW 525 and may be taken only once for credit. Prerequisite: SW 520 or SW 589 (Advanced standing only).

**SW 626 - Teaching and Learning in Health Promotion & Social Work (3)**

Focus on pedagogical theory and practice in professional settings. Students develop skills to design, evaluate, and implement effective curriculum and instruction across settings: classrooms, community contexts, and research projects. Topics include educational theory, course design, learning and teaching strategies, assessment, and scholarship of teaching and learning. This is the same course as PHE 626 and may be taken only once for credit.

Prerequisite: Doctoral student status in Social Work.
Cross-listed as: PHE 626.

**SW 629 - International Mental Health Policy (3)**

Compares mental health policies from a global perspective, emphasizing United Nations and World Health Organization perspectives. Programs and policies from various countries are compared and contrasted with those of the U.S., and Oregon in particular.

Also offered as SW 529 and may be taken only once for credit. Prerequisite: SW 520 or SW 589 (Advanced standing only).

**SW 630 - Philosophy of Science for Social Sciences (3)**

The goal of this course is to introduce students to philosophies of science and the implications for scientific practices and other means of generating knowledge. The course will advance students’ activities to critically analyze issues related to the consumption and production of knowledge in the social and behavioral sciences generally.

**SW 631 - Introduction to Quantitative Research Methods in Social Work (3)**

Introduces students to basic quantitative methods for applied social work research and examines the assumptions underlying quantitative methods. Reviews core elements of research design and the selection of appropriate methods to address specific types of research questions with attention to questions of ethics and research across diverse populations. Includes a review of internal and external validity issues in conducting experimental and quasi-experimental designs. Provides experience in applying quantitative methods by developing a proposal for social work research project.

**SW 632 - Quantitative Data Analysis in Social Work Research (4)**

Provides preparation in the selection and use of statistical methods appropriate for social work research questions. Covers descriptive statistics, probability theory, statistical inference, and basic inferential methods. Preparation for multivariate statistical methods. Empirical social work studies critiqued and discussed. Includes application and analysis laboratory.

Prerequisite: SW 630, 631.

**SW 633 - Qualitative Research I: Critical Research Frames and Beginning Practices (3)**

This course is the first part of a required three-term sequence that introduces students to the theoretical foundations and methods for qualitative research in social work. The class is designed to support learners with techniques and tools to approach the inquiry process from a critical perspective, as contextualized in the profession of social work. The forms of research methods covered in this research sequence (and introduced in this first course) cover qualitative research at the micro, mezzo and macro levels, specifically: individual lived experiences, society and culture, and language and communication. In order to cover each of these levels of analysis, the course will address at least one research methodology in each of the three levels. These are hermeneutic phenomenology, life history research, critical ethnography, and critical discourse analysis.

Prerequisite: SW 630.

**SW 634 - Quantitative Data Analysis in Social Work Research II (4)**

Introductory multivariate statistical procedures. Core topics: correlation and partial correlation, reliability and validity of measures and scale construction, and linear and logistic regression. Covers considerations of level of measurement and distributional assumptions for each statistical procedure. Balances developing theoretical understanding and hands-on running of tests and interpretation of results.

Prerequisite: SW 632.

**SW 635 - Qualitative Research II: Collecting Data for Interpretive & Constructivist Research (3)**

The second course of a required three-terms sequence. Data collection methods with a special emphasis on collecting stories and narratives to explore the individual, group, community, organizational, and national experience.

Prerequisite: SW 630 and SW 633.
SW 637 - Qualitative Research Methods for Social Inquiry (4)

Introduction to qualitative research methods in the social sciences. The course reviews epistemologies informing qualitative research. The course also explores commonly used methods including field notes, interviews, focus groups, case studies, observational methods, and open-ended surveys. Introduction to various analysis and writing strategies will be explored. This is the same course as Psy 637 and may be taken only once for credit.

Cross-Listed as: Psy 637.

SW 640 - Research Practicum and Seminar (3)

Participation in a research study under the supervision of appropriate faculty. Opportunity to master research skills which fit the student's learning needs. Time on site working on the project is 100 hours. Seminar taken concurrently with practicum enables students to explore together their research experiences in their respective research projects. Students will gain deepening knowledge through comparison of experiences. Pass/no pass only.

Prerequisite: SW 637.

SW 644 - Mid-Life and Beyond (3)

Focuses on development in mid and late adulthood from a lifespan perspective. Promotes appreciation of the developmental potential for normal and healthy aging. Explores demographic, socio-historical and developmental characteristics of currently emerging older adults. Focuses on current developmental theories in social cognition and identity development in mid and late adulthood.

SW 645 - Advanced Human Behavior in the Social Environment (3)

Provides an opportunity for students to explore current theoretical developments in the social and behavioral sciences which apply to social work practice including populations at risk. Taught in different sections each of which covers social and cultural contexts for human behavior in the social environment. May be repeated for additional credit.

Also offered as SW 545. Prerequisite: SW 531, SW 541 or SW 589 (Advanced standing only).

SW 650 - History of Social Work Professional (3)

History of the profession of social work through a social justice lens. The role of government, economics, historical figures, and culture in shaping social work profession. Critical theories will guide the exploration of social work's mission, history, ethics, values and prominent issues within the context of national and international trends.

SW 651 - Integrative Writing Seminar (1)

Course addresses integration of social work theory, practice, policy, and research. Synthesis developed through writing of manuscript for submission to professional journal, a grant application, or other suitable product. Assistance with submission provided.

Prerequisite: completion of Part I of comprehensive examinations. May be repeated for additional credit.

SW 653 - PhD Data Analysis Seminar (1)

Provides a structure to facilitate a working group of researchers who share ideas and support one another in the conduct of research. Group members may work together on research projects as well as use the group to consult about independent research projects. Expected themes include research design issues, measurement selection, rating and coding procedures, data analysis and presentation and reporting of research results. The primary focus of this group is on quantitative methods, with secondary attention to qualitative methods. Course may be repeated for credit.

Prerequisite: SW 634.

SW 660 - Ph.D. Seminar – First Year (1)

Discusses current research studies undertaken in the field of social work. Based on published articles, working papers, and research project materials, the seminar features presentations by social work faculty, graduate students, and community partners. Considers practical aspects of applied research, including methodological issues, cultural competency, consumer involvement, and interdisciplinary collaboration. May be repeated for additional credit.

SW 661 - Ph.D. Seminar – Second Year (1)

The Ph.D. Seminar–Second Year is a three-term sequence designed to provide a forum for students to continue professional exploration, and learn how to navigate finding and securing employment opportunities both within and outside academia. Students also spend this time learning how to progress successfully through major milestones post-coursework, including comprehensive examination and dissertation.

Prerequisite: SW 660.
**SW 678 - Social Work in the Juvenile and Criminal Justice Systems (3)**

Analyzes current controversies concerning the origin and meaning of criminal and delinquent behavior; the socio-economic and multicultural characteristics of contemporary life contributing to delinquency and crime; social work’s role in the "people processing system"; the major current modalities and inquiry into their effectiveness; social policy issues confronting the juvenile justice system; and current policy and practice trends toward incarceration and away from rehabilitation.

Also offered as SW 578 and may be taken only once for credit. Prerequisite: SW 520 or SW 589 (Advanced standing only).

**SW 690 - Teaching Practicum and Seminar (3)**

Focuses on the practical teaching aspects in various social work settings, including instruction in the classroom, and the facilitation of trainings and workshops. Salient theoretical and practical issues in adult learning are explored. Discusses curriculum planning and issues around human diversity and teaching. Supports student teaching experiences. This course requires to complete 65 hours of hands-on teaching-related experience.

Prerequisite: SW 626.

**SW 700 - Postbaccalaureate Professional Development (1-6)**

(Credit to be arranged.)

**SySc - Systems Science**

**SySc 330U - Models in Science (4)**

This interdisciplinary course focuses on the role of models in scientific inquiry. Students explore how scientists from a variety of disciplines use different types of models, including physical (scale), mathematical (analytic and numeric), agent-based, animal, and network. The course has three stages of inquiry: Definition, Analysis, and Synthesis.

**SySc 332U - Introduction to Agent-Based Modeling (4)**

At the crossroads of biology, ecology, economics, philosophy, and artificial intelligence, this course introduces Agent-Based Modeling: a new computer-based approach that’s grounded in the perspective that the complex macro-level patterns we observe in social systems are emergent from decentralized and self-organizing micro-level interaction among agents following simple and localized rules.

**SySc 334U - Modeling Social-Ecological Systems (4)**

Understanding social and ecological cycles and the interaction between social and ecological systems is essential for making human actions more sustainable. This course uses ideas from UNEP’s Green Economy Initiative and an easy-to-learn computer modeling approach called System Dynamics to explore the interaction between and dynamics within social-ecological systems.

**SySc 336U - Networks and Society (4)**

Introduces the new science of networks and its role in modeling the inherently complex problems of an interconnected, global society. Simulations explore the evolution of hierarchical, small-world and scale-free network structures and their dynamic behaviors. Implications for information democracy, cyber-terrorism, alternative economies (among other topics of student interest) are discussed.

Prerequisite: upper-division standing.

**SySc 338U - Decision Making in Complex Environments: A View Towards Collective Action and Social Change (4)**

An interdisciplinary course that explores the heuristics through which individuals, groups and communities make their decisions in response to their environmental conditions. Such actions are sometimes optimal, sometimes sub-optimal and sometimes outright irrational and harmful and the course identifies the reasons for deviations from rational behavior.

**SySc 340U - Big Data and the Modern World (4)**

Overview of data science, big data, and its impact society including its promise, limitations, and ethical considerations.

**SySc 342U - Systems Thinking for Social Change (4)**

Why are complex social problems like poverty, homelessness, and climate change so hard to solve? How can we identify effective leverage points for change? This interdisciplinary course addresses social challenges using the methods of systems thinking. We’ll dig into real-world examples and learn how to create interactive systems “maps” using causal-loop diagramming. Causal mapping enables a rich understanding of context, interrelationships, and
perspectives. Students will gain practical tools they can use in their future work.

**SySc 346U - Exploring Complexity in Science and Technology (4)**

Introduction to Complex Systems, an interdisciplinary field that studies how collections of simple entities organize themselves to produce complex behavior, use information, and adapt and learn. Focus on common principles underlying complexity in science and technology, and includes ideas from physics, biology, the social sciences, and computer science. This course is the same as CS 346U; course may be taken only once for credit.

Cross-Listed as: CS 346U.

**SySc 350U - Indigenous and Systems Perspectives on Sustainability (4)**

Explores sustainability by drawing upon the field of Systems Science and the perspectives of traditional and contemporary indigenous peoples and scholars. Dialogue-oriented format and small group exercises promote a cooperative, student-driven learning environment. Course work calls upon students to apply their developing understanding of sustainability to their own lives.

**SySc 399 - Special Studies (4)**

(Credit to be arranged.)

**SySc 399U - Special Studies (4)**

(Credit to be arranged.)

**SySc 401 - Research (1-8)**

(Credits to be arranged.)

**SySc 403 - Honor Thesis (1-8)**

(Credits to be arranged.)

**SySc 405 - Reading and Conference (1-8)**

(Credits to be arranged.)

**SySc 406 - Special Projects (1-12)**

(Credits to be arranged.)

**SySc 407 - Seminar (1-8)**

(Credits to be arranged.)

**SySc 409 - Practicum (1-8)**

(Credits to be arranged.)

**SySc 410 - Selected Studies (1-6)**

(Credit to be arranged.)

**SySc 411 - Systems Theory (4)**

Surveys fundamental systems concepts and central aspects of systems theory. Gives an overview of the systems paradigm and the systems field as a whole. Topics include introductions to networks, set- and information-theoretic multivariate relations, dynamic systems, regulation and control, modeling, decision analysis, optimization, and game theory.

Also offered for graduate-level credit as SySc 511 and may be taken only once for credit. Prerequisite: Upper-division standing and either CS 346U or any course labeled SYSC3XXU or SYSC4XXU.

**SySc 413 - Holistic Strategies for Problem Solving (4)**

This course focuses on the application of Systems ideas and practitioner skill development across disciplines. Readings and diversified class sessions explore topics including the meaning of "holistic," multiple levels of analysis, multiple perspectives, values, learning organizations, frameworks/processes for problem-solving, and use of tools like graphic representations and causal-loop diagramming.

Also offered for graduate-level credit as SySc 513 and may be taken only once for credit. Prerequisite: Upper-division standing and completion of one SySc cluster course or permission of instructor.

**SySc 414 - System Dynamics (4)**

Introduces concepts and methodology to analyze dynamic behavior of systems with complex feedback loops. Emphasizes building computer models to enhance understanding, make predictions, and find ways to improve the performance of systems and processes. Models are defined via "rate" equations that are numerically integrated to simulate behavior.

Also offered for graduate-level credit as SySc 514 and may be taken only once for credit. Prerequisite: Upper-division standing and either CS346U or any course labeled SYSC3xxU or SYSC4xxU.
SySc 416 - Systems Thinking for Business (4)
Learn highly applied system thinking that delivers crucial insights into business or career situations where the usual methods are lacking. Specifically, to develop qualitative skills: system archetypes, leverage points, strategic behavior and game theory, ecosystems and evolution, and networks; and to gain high-level working knowledge of system modeling and simulation.

Also offered for graduate-level credit as SySc 516 and may be taken only once for credit. Prerequisite: upper-division standing.

SySc 418 - System Sustainability and Organizational Resilience (4)
Organizations are complex adaptive systems coupled with their environment, supply chains, strategic partners, and competitors. Survival depends on structural resilience market turbulence, and the environmental/political climate. Principles of emergent leadership and living systems are applied to various fields including strategic business management, environmental stewardship, health and public administration, technology management.

Also offered for graduate-level credit as SySc 518 and may be taken only once for credit. Prerequisite: Upper-division standing and either CS 346U or any course labeled SySc 3xxU or SySc 4xx.

SySc 421 - Systems Philosophy (4)
A study of ideas central to systems theory and philosophy. The course focuses on concepts rather than mathematics, and organizes systems ideas around the theme of the fundamental "difficulties" (problems, imperfections, modes of failure) encountered by systems of widely differing types. Though these systems ideas often come from the natural sciences and engineering, they are significant also for the social sciences, the professional fields, and even the arts and humanities.

Also offered for graduate-level credit as SySc 521 and may be taken only once for credit. Prerequisite: Upper-division standing and/or admission to the Honors College or one SySc cluster course.

SySc 423 - Systems Ideas and Sustainability: Limits, Structural Change, and Resilience (4)
This course offers a systems-theoretic perspective on sustainability. Using graph theory, non-linear dynamics, game/decision theory, thermodynamics, and theories of complexity and complex adaptive systems, the course explores systems insights into the challenge of environmental, economic, and social sustainability and systems principles to help us meet this challenge.

Also offered for graduate-level credit as SySc 523 and may be taken only once for credit. Prerequisite: upper-division standing and completion of one of the SySc 300-level cluster courses.

SySc 431 - Data Mining with Information Theory (4)
DMIT is a hands-on project-based course in which students use information- and graph-theoretic methods to analyze their own data to discover complex and nonlinear interactions. These methods are implemented in OCCAM, software developed at PSU, the main analytical tool used in the course.

Also offered for graduate-level credit as SySc 531 and may be taken only once for credit. Prerequisite: upper-division standing and completion of one of the SySc cluster courses.

SySc 435 - Modeling & Simulation with R and Python (4)

Also offered for graduate-level credit as SySc 535 and may be taken only once for credit. Prerequisite: Stat 241 or Stat 243 and Mth 252.

SySc 440 - Introduction to Network Science (4)
Interdisciplinary introduction to network science, complex systems research, and social psychological concepts. In depth exposure to foundations of network science, including classical topics: random graphs, small world networks, etc. Discussion of social processes such as social contagion, opinion formation, etc. Introduction to advanced topics: community detection and (social) network interventions.

Also offered for graduate-level credit as SySc 540 and may be taken only once for credit. Prerequisite: Stat 241 or Stat 243, and Mth 261.

SySc 445 - Application of Data Science (4)
Introduction to data science as a profession and toolset, including its role in various types of projects, from exploration to discovery to prediction. Surveys current methods and technologies, emphasizing what’s possible, feasible, and practical in terms of modeling and interactive visualization. Complements courses focused on specific methods and tools.

Expected preparation: It will be helpful though not required to have exposure to data management or programming/scripting tools such as Matlab,
Mathematica, R, Python, SPSS, or advanced Excel scripting or formulas.

Also offered for graduate-level credit as SySc 545 and may be taken only once for credit. Prerequisite: Stat 241 or Stat 243 and CS 161.

**SySc 452 - Game Theory (4)**
Study of cooperation, competition, and conflict in social systems and associated issues of rationality. Emphasis is on game-theoretic models, particularly of dilemmas of collective action, their possible solutions, and their applications to social, economic, and political phenomena. Also covered are social choice theory, and other systems-theoretic approaches to cooperation, competition and conflict.

 Also offered for graduate-level credit as SySc 552 and may be taken only once for credit.

**SySc 501 - Research (1-9)**
(Credits to be arranged.)

**SySc 502 - Independent Study (1-12)**
(Credit to be arranged.)

**SySc 503 - Thesis (1-9)**
(Credits to be arranged.)

**SySc 504 - Cooperative Education/Internship (1-9)**
(Credit to be arranged.)

**SySc 505 - Reading and Conference (1-6)**
(Credits to be arranged.)

**SySc 506 - Special Projects (1-6)**
(Credits to be arranged.)

**SySc 507 - Seminar (1-6)**
(Credits to be arranged.)

**SySc 508 - Workshop (2-6)**
(Credits to be arranged.)

**SySc 509 - Practicum (1-9)**
(Credits to be arranged.)

**SySc 510 - Selected Studies (1-6)**
(Credits to be arranged.)

**SySc 511 - Systems Theory (4)**
Surveys fundamental systems concepts and central aspects of systems theory. Gives an overview of the systems paradigm and the systems field as a whole. Topics include introductions to networks, set- and information-theoretic multivariate relations, dynamic systems, regulation and control, modeling, decision analysis, optimization, and game theory.

 Also offered for undergraduate-level credit as SySc 411 and may be taken only once for credit. Prerequisite: graduate standing, calculus, probability, computer programming.

**SySc 513 - Holistic Strategies for Problem Solving (4)**
This course focuses on the application of Systems ideas and practitioner skill development across disciplines. Readings and diversified class sessions explore topics including the meaning of "holistic," multiple levels of analysis, multiple perspectives, values, learning organizations, frameworks/processes for problem-solving, and use of tools like graphic representations and causal-loop diagramming.

 Also offered for undergraduate-level credit as SySc 413 and may be taken only once for credit. Prerequisite: upper-division standing and completion of one SySc cluster course or permission of instructor.

**SySc 514 - System Dynamics (4)**
Introduces concepts and methodology to analyze dynamic behavior of systems with complex feedback loops. Emphasizes building computer models to enhance understanding, make predictions, and find ways to improve the performance of systems and processes. Models are defined via "rate" equations that are numerically integrated to simulate behavior.

 Also offered for undergraduate-level credit as SySc 414 and may be taken only once for credit. Prerequisite: Graduate standing.

**SySc 516 - Systems Thinking for Business (4)**
Learn highly applied system thinking that delivers crucial insights into business or career situations where the usual methods are lacking. Specifically, to develop qualitative skills: system archetypes, leverage points, strategic behavior and game theory, ecosystems and evolution, and networks; and to gain high-level working knowledge of system modeling and simulation.
Also offered for undergraduate-level credit as SySc 416 and may be taken only once for credit.

**Prerequisite:** upper-division standing.

**SySc 518 - System Sustainability and Organizational Resilience (4)**

Organizations are complex adaptive systems coupled with their environment, supply chains, strategic partners, and competitors. Survival depends on structural resilience market turbulence, and the environmental/political climate. Principles of emergent leadership and living systems are applied to various fields including strategic business management, environmental stewardship, health and public administration, technology management.

Also offered for undergraduate-level credit as SySc 418 and may be taken only once for credit.

**SySc 521 - Systems Philosophy (4)**

A study of ideas central to systems theory and philosophy. The course focuses on concepts rather than mathematics, and organizes systems ideas around the theme of the fundamental "difficulties" (problems, imperfections, modes of failure) encountered by systems of widely differing types. Though these systems ideas often come from the natural sciences and engineering, they are significant also for the social sciences, the professional fields, and even the arts and humanities.

Also offered for undergraduate-level credit as SySc 421 and may be taken only once for credit.

**Prerequisite:** upper-division standing and/or admission to the Honors College or one SySc cluster course.

**SySc 523 - Systems Ideas and Sustainability: Limits, Structural Change, and Resilience (4)**

This course offers a systems-theoretic perspective on sustainability. Using graph theory, non-linear dynamics, game/decision theory, thermodynamics, and theories of complexity and complex adaptive systems, the course explores systems insights into the challenge of environmental, economic, and social sustainability and systems principles to help us meet this challenge.

Also offered for undergraduate-level credit as SySc 423 and may be taken only once for credit.

**Prerequisite:** upper-division standing and completion of one of the SySc 300-level cluster courses.

**SySc 525 - Agent Based Simulation (4)**

Introduction to simulation methods that impart simple rules to collections of "agents" that interact within an environment represented as a spatial grid. The properties of the agents and the environment vary dynamically, and often result in behavior patterns that are complex in ways that are not readily apparent from an examination of the rules that generated the behavior. Such behavior is often referred to as emergent, with examples including flocks of birds, traffic jams, ant colonies, crowd phenomena, etc. Of particular interest is the fact that such phenomena occur without centralized control. This approach is often used to study social systems, but may be used to study a variety of natural and non-natural systems.

Also offered as SySc 625 and may be taken only once for credit.

**SySc 527 - Discrete System Simulation (4)**

The primary focus is on the application of discrete systems simulation to real world problems using the Arena simulation language. The mathematical basis for discrete systems simulation is probability theory and queuing theory. It is used extensively in the fields of operations research, civil engineering, and industrial engineering. Students apply the tools to projects within their fields of interest.

Also offered as SySc 627 and may be taken only once for credit.

**Prerequisite:** graduate standing or consent of the instructor.

**SySc 531 - Data Mining with Information Theory (4)**

DMIT is a hands-on project-based course in which students use information- and graph-theoretic methods to analyze their own data to discover complex and nonlinear interactions. These methods are implemented in OCCAM, software developed at PSU, the main analytical tool used in the course.

Also offered for undergraduate-level credit as SySc 431 and may be taken only once for credit.

**Prerequisite:** upper-division standing and completion of one of the SySc cluster courses.

**SySc 535 - Modeling & Simulation with R and Python (4)**

Also offered for undergraduate-level credit as SySc 435 and may be taken only once for credit.

**Prerequisite:** Recommended preparation: Basic probability & statistics and exposure to calculus; exposure to writing scripts (e.g. Matlab, Mathematica, R, etc.).
SySc 540 - Introduction to Network Science (4)
Interdisciplinary introduction to network science, complex systems research, and social psychological concepts. In depth exposure to foundations of network science, including classical topics: random graphs, small world networks, etc. Discussion of social processes such as social contagion, opinion formation, etc. Introduction to advanced topics: community detection and (social) network interventions.
Also offered for undergraduate-level credit as SySc 440 and may be taken only once for credit.
Prerequisite: Recommended preparation: Basic linear algebra, probability, statistics, and scripting tools such as Matlab, Mathematica, or R.

SySc 545 - Application of Data Science (4)
Introduction to data science as a profession and toolset, including its role in various types of projects, from exploration to discovery to prediction. Surveys current methods and technologies, emphasizing what’s possible, feasible, and practical in terms of modeling and interactive visualization. Complements courses focused on specific methods and tools.
Expected preparation: It will be helpful though not required to have exposure to data management or programming/scripting tools such as Matlab, Mathematica, R, Python, SPSS, or advanced Excel scripting or formulas.
Also offered for undergraduate-level credit as SySc 445 and may be taken only once for credit.
Prerequisite: Stat 241 or Stat 243 and CS 161.

SySc 551 - Discrete Multivariate Modeling (4)
This course focuses on information theory as a tool for modeling and multivariate analysis and as a general framework for the study of structure and organization. The course examines the use of set- and information-theoretic techniques for the analysis of constraints in qualitative, as well as quantitative, data. Also covered are software implementations, relations to log-linear methods, and applications in the natural and social sciences and the arts.
Also offered as SySc 651 and may be taken only once for credit.

SySc 552 - Game Theory (4)
Study of cooperation, competition, and conflict in social systems and associated issues of rationality. Emphasis is on game-theoretic models, particularly of dilemmas of collective action, their possible solutions, and their applications to social, economic, and political phenomena. Also covered are social choice theory, and other systems-theoretic approaches to cooperation, competition and conflict.
Also offered for undergraduate-level credit as SySc 452 and may be taken only once for credit.

SySc 557 - Artificial Life (4)
Artificial life (ALife) encompasses mathematical and computational studies of phenomena such as replication, metabolism, morphogenesis, learning, adaptation, and evolution. Situated at the intersection of computer science and biology (also physics and chemistry) and focused on abstract, materiality-independent aspects of life, its purpose is two-fold: to understand biologically phenomena and to develop computational technologies. ALife bears significantly also on the social sciences and philosophy. It is part of the research program into "complex adaptive systems". Emphasizes (1) cellular automata (and other discrete dynamical models), (2) ecological and evolutionary simulations, and (3) genetic algorithm optimization and adaptation. Other topics include artificial chemistry (metabolism and origins of life) and philosophical issues.
Also offered as SySc 657 and may be taken only once for credit.
Prerequisite: graduate standing, calculus, probability, computer programming.

SySc 575 - AI: Neural Networks I (4)
Introduces approach for developing computing devices whose design is based on models taken from neurobiology and on notion of "learning." A variety of NN architectures and associated computational algorithms for accomplishing the learning are studied. Experiments with various available architectures are performed via a simulation package. Students do a major project on the simulator or a special programming project.
Prerequisite: graduate standing.

SySc 601 - Research (0-15)
(Credit to be arranged.)

SySc 603 - Dissertation (0-15)
(Credit to be arranged.)

SySc 604 - Internship (1-9)
(Credit to be arranged.)

SySc 605 - Reading and Conference (0-9)
(Credit to be arranged.)
SySc 607 - Seminar (1-9)
(Credit to be arranged.)

SySc 608 - Workshop (1-9)
(Credit to be arranged.)

SySc 610 - Selected Studies (1-9)
(Credit to be arranged.)

SySc 625 - Agent Based Simulation (4)
Introduction to simulation methods that impart simple rules to collections of "agents" that interact within an environment represented as a spatial grid. The properties of the agents and the environment vary dynamically, and often result in behavior patterns that are complex in ways that are not readily apparent from an examination of the rules that generated the behavior. Such behavior is often referred to as emergent, with examples including flocks of birds, traffic jams, ant colonies, crowd phenomena, etc. Of particular interest is the fact that such phenomena occur without centralized control. This approach is often used to study social systems, but may be used to study a variety of natural and non-natural systems.
Also offered as SySc 525 and may be taken only once for credit.

SySc 627 - Discrete System Simulation (4)
The primary focus is on the application of discrete systems simulation to real world problems using the Arena simulation language. The mathematical basis for discrete system simulation is probability theory and queuing theory. It is used extensively in the fields of operations research, civil engineering, and industrial engineering. Students apply the tools to projects within their fields of interest.
Also offered as SySc 527 and may be taken only once for credit. Prerequisite: graduate standing or consent of the instructor.

SySc 651 - Discrete Multivariate Modeling (4)
This course focuses on information theory as a tool for modeling and multivariate analysis and as a general framework for the study of structure and organization. The course examines the use of set- and information-theoretic techniques for the analysis of constraints in qualitative, as well as quantitative, data. Also covered are software implementations, relations to log-linear methods, and applications in the natural and social sciences and the arts.
Also offered as SySc 551 and may be taken only once for credit.

SySc 657 - Artificial Life (4)
Artificial life (Alife) encompasses mathematical and computational studies of phenomena such as replication, metabolism, morphogenesis, learning, adaptation, and evolution. Situated at the intersection of computer science and biology (also physics and chemistry) and focused on abstract, materiality-independent aspects of life, its purpose is two-fold: to understand biological phenomena and to develop computational technologies. Alife bears significantly also on the social sciences and philosophy. It is part of the research program into "complex adaptive systems". Emphasizes (1) cellular automata (and other discrete dynamical models), (2) ecological and evolutionary simulations, and (3) genetic algorithm optimization and adaptation. Other topics include artificial chemistry (metabolism and origins of life) and philosophical issues.
Also offered as SySc 557 and may be taken only once for credit. Prerequisite: graduate standing, calculus, probability, computer programming.

SysE - Systems Engineering
SysE 504 - Cooperative Education/Internship (1-9)
SysE 505 - Reading and Conference (1-8)
(Credit to be arranged.)

SysE 506 - Special Projects (1-9)
(Credit to be arranged.)

SysE 510 - Selected Studies (1-6)
(Credit to be arranged.)

SysE 561 - Logistics Engineering (4)
Concentrates on logistics from a systems engineering perspective. Systems will include a mix of products and processes, materials, equipment, software, people, data, information, and services, within some form of hierarchy. The design for supportability/serviceability, the production and effective distribution for customer use, and the sustaining maintenance will be addressed on a total system life-cycle basis, with particular emphasis in the early phases of the development of new systems and/or reengineering of existing systems.
Prerequisite: basic knowledge of systems engineering concepts and statistics.

**SysE 567 - Systems Engineering Management (4)**
Management techniques applicable to Systems Engineering as part of its interface role to integrate project control (cost and scheduling) and technical specialties, including evaluating new technologies and integrating with legacy systems, technical performance measures, development-process tailoring, maturity assessment models, conducting technical reviews. Expected preparation: SysE 591.

**SysE 573 - Requirements Engineering (4)**
Students gain knowledge to translate needs and priorities into system requirements that are the starting point for the engineering of complex hardware/software systems. Topics include: larger context in which requirements for a system are developed; developing mission needs or market opportunities first versus assessing available technology first; translating needs and priorities into an operational concept and then into specific functional and performance requirements; assessment of requirements, including such aspects as correctness, completeness, consistency, measurability, testability and clarity of documentation; relationship between interface definitions and requirements; risk management of requirement issues, and stakeholders input to increase the prospects for project success. Case studies will be used, many provided by students and involving software-intensive systems. Recommended prerequisite: SysE 591.

**SysE 575 - Reducing Risk in Decision Making (4)**
Examines the concepts, techniques and tools for managing risk and making decisions as key components of the systems engineering process. Risk connotes a measure of the probability and severity of an undesired event. Begins with an overview of the risk management (identifying, assessing, monitoring, and mitigating) and decision process. Differences between mission critical and non-mission critical programmatic risk emphasized. Other topics include the limits of expected value-based risk analysis, decision making strategies such as max/min, min/max and regrets. Formal methods in risk analysis, elementary decision analysis and decision trees, multi-objective decision making, pareto techniques, optimality, and trade-off analysis will be covered. Risk and decision techniques will be contrasted with the interfacing processes of program management and software engineering, from both the government and industrial perspectives.

Prerequisite: experience with systems engineering process.

**SysE 590 - Integrative Workshop (0-4)**
Systems engineering is an acquired behavior to be developed throughout the master's degree program. Students and faculty advisers will engage in creative workshop activities integrating technical specialty skills and project experience invoking systems engineering applications of communication, synthesis and creativity, teambuilding, problem solving, management of time and resources, and system life-cycle thinking. A student portfolio will document the program plan and document that the desired behavioral change is taking place.

Prerequisite: consent of instructor. Pass/No pass only.

**SysE 591 - Systems Engineering Approach (4)**
Engineering of complex hardware, software systems encompasses quantitative methods to understand vague problem statements, determine what a proposed product/system must do (functionality), generate measurable requirements, decide how to select the most appropriate solution design, integrate the hardware and software subsystems, and test the finished product to verify it satisfies the documented requirements. Additional topics that span the entire product life cycle include interface management and control, risk management, tailoring of process to meet organizational and project environments, configuration management, test strategies, and trade-off studies.

Prerequisite: consent of instructor.

**SysE 595 - Hardware-Software Integration (4)**
Systems engineering is applied to the integration of hardware-software systems, focusing on embedded computer products development and information technology systems. Factors that affect the selection of hardware and software solutions in design will be examined, as well as the use of trade studies to optimize the efficiency of integration issues. Techniques for partitioning of system-level functions and requirements to hardware/software components will be provided, as will practical guidance, through case studies, process templates, and design checklists.

Prerequisite: basic understanding of hardware and software development.

**TA - Theater Arts**
**TA 101 - Theater Appreciation (4)**
This course is intended as a general introduction to the art of the theater: acting; directing; playwriting; scenic, costume, and lighting design. Emphasis is
placed on theater as a performing art today rather than upon the history or origins of the theater. The class, in part, involves attendance at live performances and events in the Portland area.

**TA 102 - Introduction to Acting (4)**
A study in the basic building blocks of how to approach, prepare, and act a role. Text analysis, improvisation, exercises to expand the imaginative world of the play, preparation, commitment to an action, commitment to body and voice exercises to increase awareness, and how to work collaboratively.

**TA 111 - Stagecraft I (3)**
An introduction to backstage fundamentals and the tools and techniques used to build scenery. Also covered are technical drawings, stage machinery, and rigging.
Corequisite: TA 114.

**TA 112 - Stagecraft II (3)**
This second course in a two-course sequence concerns stage lighting and sound. Students will learn to read lighting plots and to understand lighting instruments and controls. Sound equipment and its installation for production will be covered. This course requires a two-hour lab period per week and participation in departmental productions presented that term. This is the second course in a sequence of two: TA 111 and TA 112 and must be taken in sequence.
Prerequisite: TA 111. Corequisite: TA 115.

**TA 114 - Technical Theater Production I (1)**
Students gain hands-on proficiency in stagecraft while working on the department's current production.
Corequisite: Must be taken with TA 111.

**TA 115 - Technical Theater Production II (1)**
Students gain hands-on proficiency in stagecraft while working on the department's current production.
Prerequisite: TA 111 and TA 114. Corequisite: TA 112.

**TA 121 - Introduction to Design for Theater (4)**
Introduces the four primary fields of theatrical design - scenery, costumes, lighting and sound, with an emphasis on analysis, research, and the exploration of design ideas. Basic artistic skills and techniques introduced to aid development of the skills required to communicate design. Technical skills are not required.

**TA 134 - Workshop Theater: Scenery, Costume & Lighting Production I (1)**
A study and practical application of skills related to scenery, costume, and lighting for the theater. Students will learn through participating on construction and implementation and/or run crews for the departmental production.

**TA 144 - Voice for the Actor I (3)**
An introductory course in basic principles and techniques of voice production specifically for stage performance including physiology, breath support and resonance, articulation and projection.

**TA 145 - Acting Workshop (1-4)**
Rehearsal, performance, and analysis of scenes directed by Directing I students for studio presentation and critique.
Prerequisite: TA 102.

**TA 146 - Acting/Playwriting Workshop (3)**
Readings, discussions, and walk-throughs of plays written by Playwriting II students.
Prerequisite: TA 142.

**TA 147 - Movement for the Actor (3)**
Introduction to concepts and techniques of theatrical movement and physical theater. Will utilize a variety of relaxation, centering, stylization, and imagery exercises designed to increase body awareness and expressiveness. Skills in ensemble, mime, mask, and light acrobatics will be developed.

**TA 151 - Introduction to Theater Arts & Practice (4)**
Investigates theater as both a dramatic art and an industry. Introduces topics in theater history, playwriting, performance, design, and theater management. Students exposed to a variety of productions and theater professions in the Portland community.

**TA 199 - Special Studies (1-12)**
(Credit to be arranged.)
TA 201 - Script Analysis (4)
Examination and analysis of fundamental principles of dramatic structure, form, and style though study and analysis of representative plays selected from major periods. Emphasis on the production implications of selected text.

TA 234 - Workshop Theater: Scenery, Costume & Lighting Production II (1)
A study and practical application of skills related to scenery, costume, and lighting for the theatre. Students will learn through participating on construction and implementation and/or run crews for the departmental production. 200 level workshops assume familiarity with the shop(s); a higher level of responsibility will be expected.
Prerequisite: TA 134.

TA 241 - Improvisational Acting I (3)
Seeks to acquaint the student through exercises, theater games, and study of basic techniques for creative role playing with the skills and techniques necessary for improvisational acting and development of material for public performance. This is the first course in a sequence of two: TA 241 and TA 242 which must be taken in sequence.

TA 242 - Improvisational Acting II (3)
Seeks to acquaint the student through exercises, theater games, and study of basic techniques for creative role playing with the skills and techniques necessary for improvisational acting and development of material for public performance. This is the second course in a sequence of two: TA 241 and TA 242 which must be taken in sequence.

TA 248 - Acting I: Process (4)
The first acting class for the major. Emphasis on the building blocks of actor technique leading into scene work: text analysis for the actor, preparation, commitment, character arc, boldness, rhythm, living a life onstage, and collaboration. This course is rigorous and demands outside time commitment for rehearsal.
Prerequisite: TA major; sophomore standing.

TA 252 - Stage Makeup (2)
A study of the basics principles of the art and technique of makeup for stage and screen.

TA 253 - Workshop Theater I- (1-3)
Training in theater production through the intensive study and rehearsal of scenes and plays. Maximum: 12 credits.

TA 299 - Special Studies (1-4)
(Credit to be arranged.)

TA 305U - Understanding Theater (4)
An investigation of theater designed to develop a heightened awareness of how the theater arts express and communicate ideas and experiences. To expand critical awareness of the process by which theater creates meaning and communicates through performance to contemporary audiences. Course will examine the dynamic relationship between theater and the society it both mirrors and influences.

TA 311 - Scene Design I (4)
A study of visual arts principles as related to scenic design. Projects in stage geography, design composition, and visual imagery are used to develop the student's communication skills in the area of scenic design.
Prerequisite: TA 111, 112, 301, 316. Recommended: TA 114 and 115.

TA 312 - Scene Painting (3)
Training to extend the student's basic skills in traditional methods and techniques of scene painting.
Prerequisite: TA 111, 112. Recommended: TA 114, 115, and 316.

TA 314 - Lighting Design I (4)
Introduction to stage lighting. Exploration of the medium of light through observation, analysis, and recreation while working with the fixtures used in modern stage lighting. Also includes the graphic standards for stage lighting design. Open to non-majors with instructor consent.
Prerequisite: TA 121, TA 201.

TA 316 - Technical Theater Lab (2)
Students gain advanced hands-on proficiency in stagecraft while working on the department's current production. Students will take on greater responsibilities on productions building on their experiences from the TA 114/TA 115 production labs.
Prerequisite: TA 111, TA 112, TA 114, TA 115.
TA 317 - Theater Technologies (2)
The study and practical application of advanced techniques and materials in all aspects of stagecraft, including drafting and drawing for the scene shop, the organization and planning of scenery construction within a production calendar, and problem solving on current department productions. Expected preparation: TA 114, 115.
Prerequisite: TA 111, TA 316.

TA 321 - Introduction to Costume Design (4)
An introduction to the theory, techniques, and design principles of contemporary stage costumes.
Prerequisite: TA 111, TA 201.

TA 322U - History of Dress I (4)
Historical survey of dress in Western civilization from ancient Egyptian to modern times with emphasis on aesthetic, cultural, and political expressions of clothing. Course may be taken out of sequence.
Prerequisite: Upper-division standing. Cross-Listed as: This is the same course as Art 322U and may be taken only once for credit.

TA 323U - History of Dress II (4)
Historical survey of dress in Western civilization from ancient Egyptian to modern times with emphasis on aesthetic, cultural, and political expressions of clothing. Course may be taken out of sequence.
Prerequisite: Upper-division standing. Cross-Listed as: This is the same course as Art 323U and may be taken only once for credit.

TA 325 - Costume Production (2)
A study and practical application of stage costume construction techniques, beginning and advanced. Students will participate in the construction of costumes for departmental productions. Recommended prerequisite: 3 credits of theater arts. Maximum 6 credits.

TA 326 - Pattern Development (1-4)
A study and practical application of the methods for creating patterns for theatrical costumes, including flat drafting, draping, and period pattern adaptation.
Prerequisite: TA 325. Recommended: TA 321.

TA 327 - Costume Technology (1-4)
A study and practical application of costume craft and decorative techniques, including fabric dyeing and painting and accessories fabrication. Recommended prerequisite: TA 321.

TA 330U - Multicultural Theater (4)
Exploration of the diversity of our society through theater—comparing and contrasting the works of certain ethnic specific writers and those writers often considered to be in the mainstream of the modern theater.

TA 333 - Workshop Theater: Directing/Stage Management/Dramaturgy (1-2)
For the School of Music and Theater productions. Offerings include stage manager, assistant director, dramaturg, choreography, and music direction. Participants are required to audition or interview for productions. Information about auditions/interviews is provided on the Theater Call Board outside of LH 127. Meeting times are arranged by the director. Most performances and rehearsals are held in the evening. Technical rehearsal for mainstage productions require a full weekend technical schedule. Course is repeatable for credit.

TA 334 - Workshop Theater: Scenery, Costume & Lighting Production 3 (1-2)
For PSU Theater Department productions. Offerings include scene construction and painting, costume construction and crew, stage/run crews, props, sound design and crew, lighting design and crew. Meeting times depend upon the assignment registered for, but usually include daytime, evening, and/or weekends. Technical rehearsal for mainstage productions require a full weekend technical schedule. Course is repeatable for credit.

TA 335 - Workshop Theater: Management/Publicity (1)
For PSU Theater Department productions. Offerings include house management, public relations, audience development, publications, educational outreach, and display. This course meets each term for one hour per week as a group, with the remaining meeting times depending upon the specific assignments for the term in question. Meeting times depend upon the assignment registered for, but may include daytime, evening, and/or weekends. Course is repeatable for credit.
TA 340 - Acting II: Scene Study (4)
Building on TA 248, coursework deepens the student actor's understanding of arc, character development, commitment, rhythm of sound and language, and choices that ignite the text. Class demands commitment to intense scene work outside the classroom. Must be taken in sequence.
Prerequisite: TA major, TA 248, and permission of instructor.

TA 341 - Acting III: Classical Text (4)
Building on TA 340, and using increasingly difficult texts, this advanced class moves the actor further into technique. Language and epic style is a major focus of the work, with emphasis on such writers as Shakespeare, Moliere, Behn, and Ford. Class demands commitment to intense scene work outside the classroom.
Prerequisite: TA major; TA 248 and TA 340, and permission of instructor.

TA 342 - Advanced Acting (4)
Builds on past lessons and explores the way we rehearse and apply our craft. Individual acting blocks are addressed. Advanced acting problems are explored through complex texts. Must be taken in sequence.
Prerequisite: TA major; TA 341, and permission of instructor.

TA 344 - Voice for the Actor II (3)
An intermediate course in the principles of voice production for the stage, concepts and techniques for adapting the voice to various stage environments, and techniques necessary for analyzing stage speech problems and developing appropriate solutions.
Prerequisite: TA 144.

TA 345 - Topics in Acting (1-4)
Intensive study of a particular subset of performance, for example, How 2 B Funny, Audition Techniques, Movement Performance or Stage Combat. This course is repeatable up to 6 times for credit.

TA 346 - Stage Dialects (4)
An introduction to the method and techniques of dialect production for theatrical performance, including a survey of basic American, English, and European dialects.

TA 347 - Mainstage Production (1-4)
Through rehearsal and the stage production, students are challenged to pursue a commitment to individual excellence and collaboration, discover a passion for their discipline, and develop a firm grounding in the core components of live performance.

TA 348 - Acting for the Camera (4)
An introduction to acting before the camera for film and video.

TA 361 - Theater Appreciation (4)
An intermediate course in the art of the theater: acting; directing; playwriting; and, design. Special emphasis on theater as a performing art today, not the history or origins of the theater. Course involves in part, attendance at live performances in the Portland area.
Prerequisite: upper-division standing.

TA 363 - Development of Dramatic Art I (4)
Survey of dramatic literature and theater history from ancient times to the emergence of the modern theater in the 19th century. This is the first course in a sequence of two: TA 363, TA 364; the course is chronological in its presentation but each term may be taken separately.
Prerequisite: upper-division standing.

TA 364 - Development of Dramatic Art II (4)
Survey of dramatic literature and theater history from ancient times to the emergence of the modern theater in the 19th century. This is the second course in a sequence of two: TA 363, TA 364; the course is chronological in its presentation but each term may be taken separately.
Prerequisite: upper-division standing.

TA 369U - Women, Theater, and Society (4)
An examination of ways in which women and sexuality have been represented in Western theatrical production since the Greeks. Selected topics will be analyzed relating feminist theories to the creation of the theater arts by women, with consideration of cultural contexts in which they work. Study of artistic practice by women in relation to issues of power, representation, and access.

TA 381L - Lab for TA 381 (0)
Lab for TA 381.
Corequisite: TA 381.

**TA 383L - Lab for TA 383 (0)**
Lab for TA 383.
Corequisite: TA 383.

**TA 399 - Special Studies (1-6)**
(Credit to be arranged.)

**TA 401 - Research (1-6)**
(Credit to be arranged.)

**TA 402 - Independent Study (1-12)**
(Credit to be arranged.)

**TA 404 - Cooperative Education/Internship (1-12)**
(Credit to be arranged.)

**TA 405 - Reading and Conference (1-6)**
(Credit to be arranged.)

**TA 406 - Special Projects (1-6)**
(Credit to be arranged.)

**TA 407 - Seminar (1-6)**
(Credit to be arranged.) Recent topics have included Introduction to Playwriting and Women, Theater, and Society.

**TA 408 - Workshop (1-6)**
(Credit to be arranged.)

**TA 409 - Practicum (1-12)**
(Credit to be arranged.)

**TA 410 - Selected Topics (1-6)**
(Credit to be arranged.)

**TA 421 - Costume Design (3)**
An in-depth study of costume design principles. Emphasis is placed on the design of costumes for specific plays, using a variety of styles and rendering media. Recommended: TA 325.
Prerequisite: TA 321.

**TA 430 - Scene Design 2 (4)**
Advanced course in scene design for the theater. Emphasis on research, conceptual thought, the imagination and manipulation of the stage environment, constructive collaboration, and the development of technical skills required of professional scenic designers. Open to non-majors with instructor consent.
Prerequisite: TA 311.

**TA 435 - Lighting Design 2 (4)**
Advanced stage lighting with primary focus on implementation and documentation required to organize, communicate and track your ideas. Extensive training in two essential programs: Vectorworks™ and Lightwright™.
Prerequisite: TA 314. Open to non-majors with instructor consent.

**TA 440 - Advanced Acting Studio (1-4)**
Advanced studio work focusing on rehearsal technique, style, preparation, developing material, and working with diverse environments, all leading to a public performance. May be repeated for a total of 12 credit hours.
Also offered for graduate-level credit as TA 540.
Prerequisite: TA major; TA 342, by audition/interview and permission of instructor.

**TA 454 - Directing I (4)**
Also offered for graduate-level credit as TA 554 and may be taken only once for credit.
Prerequisite: TA 111, TA 201, TA 248.

**TA 455 - Directing II (4)**
Advanced practice in analysis and directing of plays for public performance.
Also offered for graduate-level credit as TA 555 and may be taken only once for credit.
Prerequisite: TA 111, TA 316, TA 454.

**TA 460 - Advanced Directing (3)**
Specific problems in directorial methods and styles for presentation in public performance.
Also offered for graduate-level credit as TA 560 and may be taken only once for credit.
Prerequisite: TA 455 or equivalent experience.
TA 466W - Development of Dramatic Literature (3)
A survey of dramatic literature from its beginnings to the emergence of the modern theater in the late 19th century together with pertinent facts on theaters and stagings. The course is chronological in its presentation but each term may be taken separately.

TA 467 - Modern Theater I (4)
A consideration of theater and drama from the late 19th and early 20th century to the present. Representative plays chosen from continental European, English, Irish, and American repertories. Examination of key directors and trends in staging. This is the first course in a sequence of two: TA 467 and TA 468. Courses may be taken out of sequence. Also offered for graduate-level credit as TA 567 and may be taken only once for credit. Prerequisite: upper-division standing.

TA 468 - Modern Theater II (4)
A consideration of theater and drama from the late 19th and early 20th century to the present. Representative plays chosen from continental European, English, Irish, and American repertories. Examination of key directors and trends in staging. This is the second course in a sequence of two: TA 467 and TA 468. Courses may be taken out of sequence. Also offered for graduate-level credit as TA 568 and may be taken only once for credit. Prerequisite: upper-division standing.

TA 471 - Theater History: Periods and Topics (1-4)
Concentrated study of a particular period and/or topic in theater history: for example, Ancient Greek Theater and Drama, Medieval and Renaissance Theater, Theater and Science, Restoration/18th Century Drama, American Theater and Drama, and Theatrical Expressionism. Expected preparation: TA 363 and TA 364 or appropriate sophomore inquiry course. Also offered for graduate-level credit as TA 571.

TA 472 - Theater History: Major Figures (1-4)
Concentrated study of the contribution of one or more major theater artists: for example, Ibsen, Stanislavsky, Appia, Brecht, and Artaud. Also offered for graduate-level credit as TA 572. Prerequisite: upper-division standing.

TA 474 - Dramatic Writing I (4)
A sequence in scriptwriting involving analysis of dramatic structure, practical application of scriptwriting techniques. This is the first course in a sequence of two: TA 474 and TA 475 which must be taken in sequence. Also offered for graduate-level credit as TA 574 and may be taken only once for credit. Prerequisite: TA 201 or permission of the instructor.

TA 475 - Dramatic Writing II (4)
A sequence in scriptwriting involving analysis of dramatic structure, practical application of scriptwriting techniques. This is the second course in a sequence of two: TA 474 and TA 475 which must be taken in sequence. Expected preparation: 8 credits of TA and/or English. Also offered for graduate-level credit as TA 575 and may be taken only once for credit.

TA 501 - Research (1-9)
(Credit to be arranged.)

TA 502 - Independent Study (1-12)
(Credit to be arranged.)

TA 503 - Thesis (1-9)
(Credit to be arranged.)

TA 504 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

TA 505 - Reading and Conference (1-6)
(Credit to be arranged.)

TA 506 - Special Projects (1-6)
(Credit to be arranged.)

TA 507 - Seminar (1-6)
(Credit to be arranged. Recent topics have included Introduction to Playwriting and Women, Theater, and Society.)

TA 508 - Workshop (1-6)
(Credit to be arranged.)
TA 509 - Practicum (1-9)
(Credit to be arranged.)

TA 510 - Selected Topics (1-6)
(Credit to be arranged.)

TA 511 - Introduction to Theater Research (2)
An introductory course in research methods and bibliography for graduate study in theater.

TA 514 - History of Decor (4)
A historical survey of period decor focusing on furniture and interior architectural detail from Egyptian to modern times with emphasis on periods most commonly used in theater production. Expected preparation: 6 credits of theater arts.

TA 540 - Advanced Acting Studio (1-4)
Advanced studio work focusing on rehearsal technique, style, preparation, developing material, and working with diverse environments, all leading to a public performance. May be repeated for a total of 12 credit hours.
Also offered for undergraduate-level credit as TA 440 and may be taken only once for credit.
Prerequisite: TA major; TA 342, by audition/interview and permission of instructor.

TA 554 - Directing I (4)
Study and practice in play analysis and directing of scenes.
Also offered for undergraduate-level credit as TA 454 and may be taken only once for credit.

TA 555 - Directing II (4)
Advanced practice in analysis and directing of plays for public performance.
Also offered for undergraduate-level credit as TA 455 and may be taken only once for credit.

TA 560 - Advanced Directing (3)
Specific problems in directorial methods and styles for presentation in public performance.
Also offered for undergraduate-level credit as TA 460 and may be taken only once for credit.
Prerequisite: TA 455 or equivalent experience.

TA 567 - Modern Theater I (4)
A consideration of theater and drama from the late 19th and early 20th century to the present. Representative plays chosen from continental European, English, Irish, and American repertories. Examination of key directors and trends in staging. This is the first course in a sequence of two: TA 567 and TA 568. Courses may be taken out of sequence.
Also offered for undergraduate-level credit as TA 467 and may be taken only once for credit.
Prerequisite: upper-division standing.

TA 568 - Modern Theater II (4)
A consideration of theater and drama from the late 19th and early 20th century to the present. Representative plays chosen from continental European, English, Irish, and American repertories. Examination of key directors and trends in staging. This is the second course in a sequence of two: TA 567 and TA 568. Courses may be taken out of sequence.
Also offered for undergraduate-level credit as TA 468 and may be taken only once for credit.
Prerequisite: upper-division standing.

TA 571 - Theater History: Periods and Topics (1-4)
Concentrated study of a particular period and/or topic in theater history: for example, Ancient Greek Theater and Drama, Medieval and Renaissance Theater, Theater and Science, Restoration/18th Century Drama, American Theater and Drama, and Theatrical Expressionism. Expected preparation: TA 464 and TA 465 or appropriate sophomore inquiry course.
Also offered for undergraduate-level credit as TA 471.

TA 572 - Theater History: Major Figures (1-4)
Concentrated study of the contribution of one or more major theater artists: for example, Ibsen, Stanislavsky, Appia, Brecht, and Artaud.
Also offered for undergraduate-level credit as TA 472.
Prerequisite: upper-division standing.

TA 574 - Dramatic Writing I (4)
A sequence in scriptwriting involving analysis of dramatic structure, practical application of scriptwriting techniques. This is the first course in a sequence of two: TA 574 and TA 575 which must be taken in sequence. Expected preparation: 8 credits of TA and/or English.
Also offered for undergraduate-level credit as TA 474 and may be taken only once for credit.
**TA 575 - Dramatic Writing II (4)**
A sequence in scriptwriting involving analysis of dramatic structure, practical application of scriptwriting techniques. This is the second course in a sequence of two: TA 574 and TA 575 which must be taken in sequence. Expected preparation: 8 credits of TA and/or English.
Also offered for undergraduate-level credit as TA 475 and may be taken only once for credit.

**Tur - Turkish**
These courses are currently inactive and the department is not planning to offer them this year.

**Tur 101 - First-Year Turkish Term 1 (4)**
Introduction to Turkish. Emphasis on elements of grammar, vocabulary building, and conversation. Elementary reading. This is the first course in a sequence of three: Tur 101, Tur 102, and Tur 103.

**Tur 102 - First-Year Turkish Term 2 (4)**
Introduction to Turkish. Emphasis on elements of grammar, vocabulary building, and conversation. Elementary reading. This is the second course in a sequence of three: Tur 101, Tur 102, and Tur 103.

**Tur 103 - First-Year Turkish Term 3 (4)**
Introduction to Turkish. Emphasis on elements of grammar, vocabulary building, and conversation. Elementary reading. This is the third course in a sequence of three: Tur 101, Tur 102, and Tur 103.

**Tur 199 - Special Studies (1-5)**
(Credit to be arranged.)

**Tur 201 - Second-Year Turkish Term 1 (4)**
Intense review of materials introduced in first-year course and further development of communicative skill and reading comprehension. Elementary writing. This is the first course in a sequence of three: Tur 201, Tur 202, and Tur 203. Expected preparation: Tur 103.

**Tur 202 - Second-Year Turkish Term 2 (4)**
Intense review of materials introduced in first-year course and further development of communicative skill and reading comprehension. Elementary writing. This is the second course in a sequence of three: Tur 201, Tur 202, and Tur 203. Expected preparation: Tur 103.

**Tur 203 - Second-Year Turkish Term 3 (4)**
Intense review of materials introduced in first-year course and further development of communicative skill and reading comprehension. Elementary writing. This is the third course in a sequence of three: Tur 201, Tur 202, and Tur 203. Expected preparation: Tur 103.

**Tur 299 - Special Studies (1-12)**
(Credit to be arranged.)

**Tur 301 - Third-year Turkish (4)**
Composition, conversation, readings in literature, and grammar review. This is the first course in a sequence of three: Tur 301, Tur 302, and Tur 303. Expected preparation: Tur 203.

**Tur 302 - Third-year Turkish (4)**
Composition, conversation, readings in literature, and grammar review. This is the second course in a sequence of three: Tur 301, Tur 302, and Tur 303. Expected preparation: Tur 203.

**Tur 303 - Third-year Turkish (4)**
Composition, conversation, readings in literature, and grammar review. This is the third course in a sequence of three: Tur 301, Tur 302, and Tur 303. Expected preparation: Tur 203.

**Tur 330U - Popular Culture and Literature in Turkey (4)**
Development of popular culture and literature in modern Turkey. Impact of Westernization, modernization, journalism, and urban and European migration. Popular literature, films, and media interacting with Marxism, feminism, and Islamism. Conducted in English.

**Tur 331U - Women and Gender in Turkey (4)**
Explores construction of gender, women’s roles and issues through modern Turkish literature and culture. Conducted in English.
Tur 341U - Turkish Literature in Translation (4)
Study of texts representative of major Turkish authors, themes or genres from the modern period in translation. Examples are modern drama, realism, autobiography, contemporary novel. Conducted in English.

Tur 361U - Turkey through Film (4)
Viewing of feature films or made-for-TV series followed by discussion of social, historical, and artistic significance of the visual narratives. Individual directors like Yılmaz Güney, genres like comedy and period-dramas of the 1970s or 1960s may be used. Films have subtitles. Readings, viewings and discussions are in English. Expected preparation: Tur 203.

Tur 399 - Special Studies (1-12)
(Credit to be arranged.)

Tur 401 - Research (1-6)
(Credit to be arranged.)

Tur 404 - Cooperative Education/Internship (1-12)
(Credit to be arranged.)

Tur 410 - Selected Topics (1-12)
(Credit to be arranged.)

Tur 410U - Selected Topics (4)
(Credit to be arranged.)

Tur 416 - Readings in Turkish (2)
A variable-content course designed to give advanced students of Turkish experience reading in a variety of content areas. To be taken in conjunction with regularly scheduled co-requisite courses. Students taking a co-requisite course will do part of the required reading for that course in Turkish. Expected preparation: Tur 341.

ULib - Library Research
ULib 101 - Library Research Skills (2)
Introduces library research skills with a focus on information use in the digital environment. Topics include finding, evaluating, and using information ethically. Emphasizes research skills needed for undergraduate research assignments.

ULIB 510 - Special Topics (1-9)
(Credit to be arranged.)

UnSt - University Studies
UnSt 170 - Multilingual FRINQ/SINQ Lab (1-2)
Multilingual resident and international FRINQ/SINQ students collaborate to further develop skills and strategies for academic success. Course content includes targeted instruction in reading, writing, presentation, and class participation skills and is responsive to self-reported student needs. Instructors utilize materials from FRINQ/SINQ courses and provide students with individualized assistance.

UnSt 194 - College Success Topics (3)
College Success is a comprehensive course designed to enhance student success and retention. Students will learn strategies for creating greater academic, professional, and personal success. Students will understand self-empowerment, personal responsibility, self-motivation, interdependence, self-awareness and other critical components of keeping them on course to their goals.

UnSt 195 - Career Exploration (1)
Explores and explains the career planning process by engaging students in self-assessment and career exploration activities intended to assist them in choosing a major or career.

UnSt 196 - Summer Bridge Program (3)
The Summer Bridge Program is a TRiO/Student Support Services (SSS) joint partnership with PSU. Students will strengthen and use the academic skills needed for success at the University. Students will become familiar with the campus and visit classes to better understand the rigor and expectations of college courses.
UnSt 197 - Academic Writing Support/Student Support Services (1)
The purpose of this course is to assist Student Support Services students with their academic writing. This class is designed to support students who feel unprepared with the writing demands of college or who may feel the need for additional writing support. Instructor consent required.

UnSt 198 - Roads to Success Intersession (3)
Roads to Success is an early start program for new freshmen at PSU designed to enhance student and academic success and retention at PSU. The course will examine effective college study strategies, self-empowerment theories, differences between high school and college, goal setting and engagement at PSU.
Corequisite: UnSt 298.

UnSt 199 - Special Studies (1-8)
(Credit to be arranged.)

UnSt 210 - Sophomore Transition (4-5)
Contact department for more information on this course.

UnSt 298 - Roads to Success Fall Seminar (1)
Roads to Success fall seminar is a co-requisite to Roads to Success Intersession and continues the curriculum from the two-week course. Students are exposed to critical study skills, PSU resources for success and learn the important of becoming engaged members of the PSU community.
Corequisite: UnSt 198.

UnSt 299 - Selected Studies (1-4)
(Credit to be arranged.)

UnSt 310 - Transfer Transition (4-5)
Contact department for more information on this course.

UnSt 321U - Learning in Action (4)
Applied learning experience in the UNST cluster. Two required parts: 1) Individual community internship, volunteer experience, or project. 2) Online course exploring connections between disciplinary approaches in cluster and community work, different forms of engagement, intersections of race, class, and gender with community work, and development of professional skills.

UnSt 389 - Transition from College to Your Professional Life (1)
This course is designed to assist Student Support Services upperclassmen transition from college to career opportunities or graduate and/or professional programs. By providing assistance with these processes, we hope our students will experience success in their various endeavors after graduation.

UnSt 390 - TRiO Student Support Services - Transfer Student Bridge Program (2)
Introduction to personnel, resources, and systems at PSU. Through classroom activities, discussions, group work, and presentations, the class aims to give transfer students a solid foundation for understanding how to successfully navigate their experience at PSU and get the most out of their education.
Prerequisite: Admission to the TRiO SSS program.

UnSt 394 - College Success Topics (3)
College Success is a comprehensive course designed to enhance student success and retention. Students will learn proven strategies for creating greater academic, professional, and personal success. Students will understand self-empowerment, personal responsibility, self-motivation, interdependence, self-awareness and other critical components of keeping them on course to their goals.

UnSt 399 - Special Studies (1-8)
(Credit to be arranged.)

UnSt 401 - Research (1-4)
(Credit to be arranged.)

UnSt 402 - Independent Study (1-9)
(Credit to be arranged.)

UnSt 404 - Cooperative Ed/Internship (1-8)
(Credit to be arranged.)
UnSt 405 - Reading and Conference (1-8)
(Credit to be arranged.)

UnSt 406 - Special Projects (1-4)
(Credit to be arranged.)

UnSt 407 - Seminar (1-6)
(Credit to be arranged.)

UnSt 408 - Workshop (1-8)
(Credit to be arranged.)

UnSt 409 - Practicum (0-4)
(Credit to be arranged.)

UnSt 410 - Selected Studies (1-6)
(Credit to be arranged.)

UnSt 411 - Inquiry Mentor (3)
Contact department for more information on this course.

UnSt 412 - Inquiry Mentor (1-4)
Contact department for more information on this course.

UnSt 413 - Inquiry Mentor (1-3)
Contact department for more information on this course.

UnSt 421 - Capstone (1-6)
The culmination of the University Studies program is the Capstone course requirement. This 6-credit, community-based learning course is designed to provide students with the opportunity to apply, in a team context, what they have learned in the major and in their other university studies courses to a real challenge emanating from the community. Interdisciplinary teams of students address these challenges and produce a summation product in a University Studies approved Capstone course under the instruction of a PSU faculty member. The Capstone’s purpose is to further enhance student learning while cultivating critical life abilities that are important both academically and professionally: establishing connections within the larger community, developing strategies for analyzing and addressing problems, and working with others trained in fields different from one’s own. Independent volunteering, work experience, by arrangement credits, internships and practica cannot fulfill the Capstone requirement. Students must have completed 90 credit hours before registering for their Capstone course. For a full description of each of the 220 Capstone courses, please visit the Capstone website at: http://capstone.unst.pdx.edu/.

UnSt 450 - Mentoring in Higher Education (4)
Introduction to theories, research, and best practices for peer mentoring in higher education. Focus is on issues that impact the retention and success rates of college students. Students will develop their own frameworks, resources, and skills to become effective peer mentors.

UnSt 509 - Practicum (1-4)
(Credit to be arranged.)

UPA-Urban and Public Affairs

UPA 103 - CUPA Pathways: Student Success (4)
Focuses on identity, community and skill building for a successful and meaningful educational experience. Assignments enable the development of strong technical and communication skills, preparing students for academic and professional success. Autonomy, realistic educational objectives and support services are highlighted.

UPA 199 - (1-12)

UPA 335 - World Changing Jobs: Career Exploration (4)
Expose students to a wide array of career-related resources in urban and public affairs, allow for skill building and professional networking. Students will gain a better understanding of what career options would be a good fit for them and ways to use their educational experience for professional development purposes. Assignments will allow students to further develop communication, research, and presentation skills.
**UPA 399 - Special Studies (1-12)**  
(Credit to be arranged.)

**UPA 401 - Research (1-6)**  
(Credit to be arranged.)

**UPA 402 - Independent Study (1-8)**  
(Credit to be arranged.)

**UPA 404 - Cooperative Ed/Internship (1-9)**  
(Credit to be arranged.)

**UPA 405 - Reading & Conference (1-6)**  
(Credit to be arranged.)

**UPA 407 - Seminar (4)**  
(Credit to be arranged.)

**UPA 408 - Workshop (1-6)**  
(Credit to be arranged.)

**UPA 409 - Practicum (1-12)**  
(Credit to be arranged.)

**UPA 410 - Selected Studies (1-6)**  
(Credit to be arranged.)

**USP 233 - Real Estate Principles (3)**
Surveys the legal, physical, and economic structure of the real estate market and the characteristics of real estate resources. Develops basic real estate valuation procedures and provides an overview of market analysis and real estate production, marketing and finance methods.  
Prerequisite: Ec 201..

**USP 299 - Special Studies (1-4)**  
(Credit to be arranged.)

**USP 300U - Introduction to Urban Studies (4)**
Introduction to the interdisciplinary field of urban studies drawing on the urban planning, economics, geography, sociology, politics, and the humanities to provide basic concepts for understanding the urbanized world of the twenty-first century. Cities as economic, social, and political systems and ways in which people have thought about cities.

**USP 300 - (4)**
**Introduction to Urban Studies (4)**

Introduction to the interdisciplinary field of urban studies drawing on the urban planning, economics, geography, sociology politics, and the humanities to provide basic concepts for understanding the urbanized world of the twenty-first century. Cities as economic, social, and political systems and ways in which people have thought about cities.

**USP 301U - Introduction to Community Development (4)**
An integrative course providing students with substantive opportunities to explore, connect and apply major theories and practices associated with urban and public affairs. Students will focus on issues of community resilience based in democratic participation for positive community change.  
Prerequisite: Senior standing..

**USP - Urban Studies & Planning**

**USP 199 - Special Studies (1-4)**  
(Credit to be arranged.)
USP 302 - Theory and Philosophy of Community Development (4)

New approaches to the philosophy of community; theory and comparative practice; and case study of local theory and practice, presentation of an in-depth case study from the Pacific Northwest.

Prerequisite: USP 301.

USP 311U - Introduction to Urban Planning (4)

An interdisciplinary perspective on planning theories, principles, and practice. Focuses on the planning process, particularly at the local level. Explores the political, economic, social, and legal forces that influence the planning function and the roles of planners. Changing concepts in practice are also considered. Recommended prerequisite: upper-division standing.

USP 312U - Urban Housing and Development (4)

Problems of housing, development, and redevelopment in an urban setting are analyzed from economic, demographic, and planning perspectives. Introduction to the nature of the urban economy and residential location, with a focus on housing problems and their associated social, physical, and racial aspects. Role of federal and community-based housing policies and programs. Recommended prerequisite: USP 311.

USP 313U - Urban Environmental Issues (4)

Environmental issues and problems are evaluated in the urban context. The course addresses both the origins of urban environmental problems and their economic and social implications. Finding solutions that attempt to achieve balance between social, economic, and ecological factors is addressed in the context of urban environmental policy, planning and community activism.

USP 314U - The City in Film (4)

Critically examines urban social issues reflected in films from different countries. Course includes in-class screening, lecture and discussion, and film review writing exercises. Topics for discussion include the urban form, issues of race, gender and social class, the relationships among communities, political authority, industry, commerce, police, street gangs, criminals, public schools, and other institutions and denizens of the city. The course provides linkages to other courses in USP's undergraduate community development major and to issues related to urban studies.

USP 316 - Community Organizing and Social Change (4)

Community organizing seeks to involve people in collective action to address issues of social change and social justice. This course covers the history, philosophy and goals of community organizing and various elements of the organizing process. Case studies will provide the basics for the development of action plans.

USP 317U - Introduction to International Community Development (4)

An investigation of concepts, models, and perspectives of International Community Development practice. Explores social, cultural, religious, political, economic, and environmental aspects that affect community development practice in the Third or Developing World. Asset-based and sustainable human development models and action research are emphasized. The course utilizes teaching cases and experts from the field and requires substantial reading, reflection and discussion.

USP 323U - Real Estate Development and Finance (4)

Examines urban real estate development, including location of activities within metropolitan areas, public/private partnerships, downtown redevelopment, and affordable housing. Presents tools to evaluate the financial feasibility and performance of a project, including discounting of cash flows and pro forma analysis. Uses a case study method showing how the design, development, market, finance, construction, and management of the project are integrated.

USP 324U - Healthy Communities (4)

Addresses major issues at the intersection of urban policy and planning and individual and community health. Relationships between the ways in which land is used, the transportation choices available, and the health of both urban places and city residents is explored in light of growing concern about increased rates of various health problems. Health consequences of political, economic, and social aspects of metropolitan life are also examined. Movements and programs to create and maintain healthy communities around the world are analyzed.
USP 325U - Community and the Built Environment (4)
This course examines the relationships between urban form and social patterns, and efforts by urban designers to influence community life by shaping the built environment. The history of ideas about urban form and community development, and the history of proposed and implemented projects will be surveyed, and their relevance for contemporary urban planning and design practices will be assessed. Initiatives in the Portland metropolitan area to enhance community livability will be studied.

USP 326U - Neighborhood Conservation and Change (4)
The dynamics of neighborhood development, including economic and institutional factors in neighborhood change; neighborhood definition and image; residential choice; residential segregation; neighborhoods in the political process; and neighborhood conservation strategies.

USP 350U - Inclusive Engagement (4)
Examination of principles, methods, and programs for giving explicit attention to the perspectives of the public in the development and implementation of public policies and programs. Sets public participation in its historical context with an assessment of its impact to date. Participation from the perspective of both the public and the government will be covered as will the variety of approaches for achieving participation goals and objectives.

USP 360 - Real Estate Finance I (4)
Application of finance and economic principles to analysis of real estate finance and investments. Emphasis on the development of problem solving capabilities through the use of computer application programs. Special attention is given to risk analysis, alternative mortgage instruments, hedging techniques, and the effects of real estate investment.
Prerequisite: Ec 201. Cross-Listed as: The course is cross listed as RE 360, and may only be taken once for credit.

USP 385U - History of American Cities (4)
Traces the evolution of urban centers from the colonial period to the present. Focuses on the developing system of cities, on growth within cities, and on the expansion of public responsibility for the welfare of urban residents. Particular attention is given to the industrial and modern eras. Recommended prerequisite: upper-division standing. Also listed as Hst 337. May be taken only once for credit.

USP 386U - Portland Past and Present (4)
Begins with the geological/geographical foundations of Portland then briefly explores Portland's original inhabitants, early exploration and commercial growth. Particular attention is paid to the 20th century and the plans and projects that have guided Portland's development over the past 100 years. Considers the shaping of Portland as a regional city, examining the evolving cityscape, architecture, land use, and transportation, and its development from political, social, economic, and cultural perspectives.

USP 399 - Special Studies (1-6)
(Credit to be arranged.)

USP 401 - Research (0-6)
(Credit to be arranged.) Consent of instructor.

USP 402 - Independent Study (1-8)
(Credit to be arranged.)

USP 403 - Thesis (1-12)
(Credit to be arranged.)

USP 404 - Cooperative Education/Internship (0-9)
(Credit to be arranged.)
USP 405 - Reading and Conference (0-6)
(Credit to be arranged.)

USP 407 - Seminar (1-6)
(Credit to be arranged.)

USP 407U - Seminar (4)
(Credit to be arranged.)

USP 408 - Workshop (0-6)
(Credit to be arranged.)

USP 409 - Practicum (0-12)
(Credit to be arranged.) Consent of instructor.

USP 410 - Selected Topics (1-6)
(Credit to be arranged.)

USP 410U - Selected Topics (1-4)
(Credit to be arranged.)

USP 411 - Pedestrian and Bicycle Planning Lab (3)
A practical approach to bicycle and pedestrian planning and design through a project-based course that focuses on all aspects of the planning process. Students research and develop solutions to a practical challenge in the Portland region and present recommendations in report and presentation form. Co-registered with USP 465 or USP 565 or have taken USP 465 or 565 within the past two years. Also offered for graduate-level credit as USP 511 and may be taken only once for credit. Prerequisite: Junior standing.

USP 413 - Public Space (4)
An introduction to the study of public spaces in American cities, with a special focus on Portland. Key readings include history and theory of concepts of public space, as well as contemporary case studies and field assignments to understand the production and maintenance of public spaces around Portland.

USP 414 - Transportation Seminar (1)
This weekly seminar features a different speaker each week covering various topics in transportation research and practice. The topics cover all modes of transportation, with a focus on current practice. This course may be taken for credit up to three times. Also offered for graduate-level credit as USP 514 and may be taken only once for credit. Cross-Listed as: This is the same course as CE 414.

USP 416 - International Urban Issues Seminar (1)
This seminar surveys research about local and regional planning issues in a global context. It brings speakers with international experiences to share their understanding of urban issues, and to reflect on cultural, economic, and socio-political dimensions of policy-making processes around the world that influence planning worldwide. Also offered for graduate-level credit as USP 516. Prerequisite: Upper-division standing.

USP 419 - Population and Society (4)
Survey and analysis of population dynamics (births, deaths, and migration) and society. Examination of demographic concepts, theories, data and measurements, and research. Role of population processes in social life and public policies are highlighted, including population aging, economic development and the environment, urbanization, health and health care, race and ethnicity, and government/social/business planning. This course is the same as Soc 441 and may only be taken once for credit. Also offered for graduate-level credit as USP 519 and may be taken only once for credit. Prerequisite: Soc 200. Cross-Listed as: Soc 441.

USP 427 - Commercial District Revitalization (3)
Examines the evolution and revitalization of commercial districts over time. It explores the role of commercial districts in contemporary urban regions, and introduces the concepts of commercial district management and other strategies for promoting vital urban centers. Through readings, field observations, classroom discussions, and a series of assignments, students will explore the interrelationships between the built environment, economic trends, and public policy in shaping the commercial districts we see today. Students should learn to understand commercial districts as complex and multifaceted places that are always changing and unpredictable, but often play a crucial role in a community's identity.
and purpose and in supporting affordability, equity, and sustainability.

Also offered for graduate-level credit as USP 527 and may be taken only once for credit. Prerequisite: Upper-division standing.

USP 428 - Concepts of Community Development (4)
An investigation of models and perspectives on community development. Both structural and dynamic concepts related to processes of community-based change will be explored, including methodological approaches for assessing community settings, and the various roles and relationships in a community-based decision environment. Includes required field observation and a substantial independent field research project which examines cases of community problem-solving. Graduate students undertake a substantial independent project in addition to other course requirements.

Also offered for graduate-level credit as USP 528 and may be taken only once for credit. Prerequisite: USP 301 for undergraduates.

USP 429 - Poverty in the Urban Community (3)
An introductory course about the nature, extent, and causes of poverty in the United States. It covers a brief historical overview, demographics and trends, explanations of poverty, and anti-poverty policies. Questions of race, gender, and the spatial manifestation of poverty will be addressed.

USP 430 - Participatory Research Methods for Community Development (4)
This course introduces students to participatory methods, placing special emphasis on research ethics, the positionality of the researcher, and embedding research within community development practice. It focuses on research design, data collection, data analysis, and the dissemination of results. Various approaches to measuring urban phenomena are covered, including basic interview techniques, survey methods, and quantitative analytical methods.

USP 431 - Urban Economics (4)
Functions of the urban economy: the market sector and the public sector. Economic analysis of issues such as land use, environmental quality, transportation, housing, income distribution, and financing of urban public services. This is the same course as Ec 431 and RE 431 may only be taken once for credit.

Prerequisite: Ec 201. Cross-Listed as: Ec 431 and RE 431.

USP 434 - Green Buildings (3)
An overview of contemporary green building practices and the design and development processes essential to their success. Emphasis on strategies that have the highest economic return and/or the greatest environmental benefits. The full lifecycle of the built environment is considered, from planning and design through construction, operation, and the end of use.

Also offered for graduate-level credit as USP 534 and may be taken only once for credit. Prerequisite: Upper-division standing.

USP 438 - Real Estate Law (3)
Provides students with a comprehensive summary of real property from a legal perspective with an emphasis on transactional issues. Includes issues relating to types of ownership, descriptions of property, easements, public and private limitations on use, real estate contracts, forms utilized in transfers, financing and title assurances. The class will enable students to understand the legal framework and the rights and responsibilities of owners and transferees of real property. This is the same course as RE 438 and may be taken only once for credit. Expected preparation for graduate students: RE 521.

Also offered for graduate-level credit as USP 538 and may be taken only once for credit. Prerequisite: Ec 201 (undergraduates). Cross-Listed as: RE 438.

USP 439 - Workforce Development (3)
Introduction to policies and practices for workforce development. Topics discussed include labor market dynamics, failures and inequities; tools and methods for urban labor market analysis; and workforce development policies for skill investment, job matching and career development toward goals of household, business, community and regional economic development.

Also offered for graduate-level credit as USP 539 and may be taken only once for credit. Prerequisite: Upper-division standing.

USP 440 - Measuring People and Communities in the Urban Context (4)
This is an applied research methods course that provides students with the essential data skills for quantitatively measuring social, economic, and demographic trends across urban places. The course provides students with an appreciation for underlying theoretical and practical research methods for identifying, measuring, and conceptualizing trends specific to urban places.
Prerequisite: upper-division standing.

**USP 445 - Cities and Third World Development (3)**

Critical survey of historical, economic, cultural, political, and urban aspects of Third World development, starting with the colonial era. Historical patterns of integration of the Third World with the emerging world market system. Covers problems of the post-independence period, focusing on urban sectoral issues and policy alternatives. Specific topics include trade, investment, industrialization, finance, technology transfer, political participation, land use, housing, transportation, information infrastructure, population growth, social services, militarism, and cultural conflict. This is the same course as Intl 445 and may be taken only once for credit.

Also offered for graduate-level credit as USP 545 and may be taken only once for credit. Cross-Listed as: Intl 445.

**USP 451 - Community Economic Development (3)**

Course sets community economic development within the context of traditional state and local economic development policy and compares their underlying theoretical perspectives. It examines the impact of recent economic, social, and demographic transformations on local labor markets and surveys the labor-market problemsolving activities of local governments and community-based organizations. Business and commercial development strategies are also explored.

Also offered for graduate-level credit as USP 551 and may be taken only once for credit.

**USP 452 - GIS for Community Development (4)**

This course uses lab exercises and lectures to help students develop an in-depth understanding and basic skills for the uses of geographic information systems in community development and planning.

Prerequisite: upper-division standing.

**USP 455 - Land Use: Legal Aspects (3)**

Land use and planning from the legal perspective. Includes historical review of attitudes toward property tenure and ownership; the relationship between local planning and regulations; and current issues and perspectives on land use including emerging state and federal roles. Graduate students undertake a substantial independent project in addition to other requirements.

Also offered for graduate-level credit as USP 555 and may be taken only once for credit.

**USP 456 - Urban Transportation: Problems and Policies (3)**

An introduction to urban transportation policy from a historical and political perspective. Historical developments in transportation policy are traced from the early streetcar days up through the present. Federal, state, and local transportation policies are examined for their impact on urban spatial and economic development. An overview of current issues in transportation policy and planning includes transportation demand management strategies, transit-oriented design, road pricing, and alternative transportation modes. The intersection of environmental and transportation policy is also examined, as is the decision-making structure at the local, regional, and state level.

Also offered for graduate-level credit as USP 556 and may be taken only once for credit.

**USP 457 - Information Cities (3)**

Focuses on the political, social, and cultural impacts of mass media and information technologies within the urban matrix. Contextualizes the "information society" in historical, institutional, political, economic, and global settings. Topics include the flexible production, the segmentation of consumption, alternatives to mass media, the Web, the reorganization of work, the transnationalization of culture, commercial and political surveillance, and the development of urban information infrastructure.

Also offered for graduate-level credit as USP 557 and may be taken only once for credit.

**USP 460 - Community Development Field Seminar (2-6)**

Participant observation through placement in a community-based organization actively engaged in community development activities on behalf of a specific community, and critical reflection on the placement experience. Culminating experience for the Community Development major. This course is repeatable for up to 6 credits.

Prerequisite: Completion of the Community Development Core (USP 300U, 301, and 302) and at least one course from among those listed as Methods in Community Development (USP 350U, USP 430, USP 440, or USP 452).

**USP 465 - Pedestrian and Bicycle Planning (3)**

Examines the importance of walking and bicycling as means of transportation in a sustainable urban environment. Covers planning, design, implementation, and maintenance of bikeways and walkways, as well as ancillary facilities such as bicycle parking. Focus on the role of education, advocacy, and outreach in improving walking and
bicycling conditions. Study relevant examples from various cities, with a heavy emphasis on Portland's experience.

Also offered for graduate-level credit as USP 565 and may be taken only once for credit.

**USP 468 - Oregon Land Use Law (3)**

The Oregon program is placed in a national context that stresses the broad nature of planning here. Structural relations between state, regional, and local government planning and regulation are analyzed. Legal aspects of the implementation of the various functional statewide planning goals are studied, as are the Oregon Land Use Board of Appeals and recent developments in local government land use planning and regulatory processes.

Also offered for graduate-level credit as USP 568 and may be taken only once for credit.

**USP 475 - Urban Design Workshop (4)**

The workshop will explore the use of urban design as an integral part of the planning process through the creation of an urban design plan. Projects in the Portland region will be chosen to familiarize students with the practice of urban design planning and the products of the workshop will be presented to the public.

Also offered for graduate-level credit as USP 575 and may be taken only once for credit. Prerequisite: Enrollment in good standing in the MARCH or MURP graduate degree programs or permission of the instructor.

**USP 480 - Political Economy of Nonprofit Organizations (3)**

Considers theories of altruism, trust, and social capital. Examines the connections between wealth and social responsibility and between elite status and social reproduction. Explores the broad scope of nonprofit activity in the economy, the interdependence of government and nonprofit organizations in the modern state, and the role of think tanks in shaping public policy. Surveys the dramatic rise of non-governmental organizations in developing countries and the future of nonprofits in a global economy.

Also offered for graduate-level credit as USP 580 and may be taken only once for credit.

**USP 490 - Green Economics and Sustainable Development (3)**

Examines prevailing assumptions about economic growth, production, consumption, labor, and leisure. Considers how changes in these basic assumptions might help us design an economic system that includes alternative values such as appropriate scale, community impact and environmental sustainability.

Also offered for graduate-level credit as USP 590 and may be taken only once for credit.

**USP 493 - Public Participation GIS (3)**

Offered as a studio-based GIS class. The objective is for students to apply GIS skills acquired in previous GIS courses to a specific real-world spatial problem. Tasks will involve problem definition, primary data collection, advanced GIS analysis, and presentation of results. This format will give students practical experience in implementing GIS technologies with specific emphasis on planning problems. Students will be required to work in small groups in a simulated professional planning practice environment. Expected preparation: USP 531 and USP 543 or USP 591 and USP 592.

Also offered for graduate-level credit as USP 593 and may be taken only once for credit.

**USP 496 - Affordable Housing Finance (3)**

Introduction to the unique challenges of financing and developing affordable housing projects. The challenges and tools for financing rental as well as owner-occupied housing will be covered, and case studies will be used to illustrate the ways in which financing for affordable housing is created and used, and poses unique challenges for investors, jurisdictions, and community-based groups. Expected preparation: USP 312.

Also offered for graduate-level credit as USP 596 and may be taken only once for credit.

**USP 498 - Introduction to Finance and Real Estate (3)**

Designed for students seeking the graduate certificate in real estate development who have little or no business education, or for those students who desire a course in basic finance and real estate concepts and techniques. Introduces business finance within the context of commercial real estate. Concepts and techniques will include financial statements, analysis, and forecasting; present value and discounted cash flow analysis, an introduction to real estate valuation measurements; and analysis of performance risk versus return. Students also receive an overview of the legal definitions of real estate and its forms of ownership, as well as an overview of real estate title, contract, regulation, and financing issues. Recommended prerequisites: Ec 201 and 202.
USP 499 - Real Estate Finance and Investments (3)
Application of finance and economic principles to analysis of real estate finance and investments. Emphasis on the development of problem solving capabilities through the use of computer application programs. Special attention is given to risk analysis, alternative mortgage instruments, hedging techniques, and the tax effects of real estate investment.

USP 501 - Research (0-9)
(Credit to be arranged.) Consent of instructor.

USP 502 - Independent Study (1-9)
(Credit to be arranged.)

USP 503 - Thesis (0-9)
(Credit to be arranged.)

USP 504 - Cooperative Education/Internship (1-9)
(Credit to be arranged.)

USP 505 - Reading and Conference (0-6)
(Credit to be arranged.)

(Credit to be arranged.)

USP 508 - Workshop (0-6)
(Credit to be arranged.)

USP 509 - Practicum (0-9)
(Credit to be arranged.) Consent of instructor.

USP 510 - Selected Topics (0-6)
(Credit to be arranged.)

USP 511 - Pedestrian and Bicycle Planning Lab (3)
A practical approach to bicycle and pedestrian planning and design through a project-based course that focuses on all aspects of the planning process. Students research and develop solutions to a practical challenge in the Portland region and present recommendations in report and presentation form. Co-registered with USP 465 or USP 565 or have taken USP 465 or 565 within the past two years. Also offered for undergraduate-level credit as USP 411 and may be taken only once for credit. Prerequisite: junior standing.

USP 512 - Environmental Planning Methods (3)
Examination of the patterns and processes in human-dominated landscapes, and the tools for understanding human behavior and decision making. By applying several environmental planning tools to managing landscapes, this course aims to provide students with skills to translate data into information. Topics covered include, land conservation, impact of land use on watersheds, sustainability design, environmental impact assessments, and environmental modeling and simulation. Focus is on the application of tools to addressing pressing problems of regional significance. Recommended prerequisites: USP 531 or Geog 488/588.

USP 513 - Public Space (4)
An introduction to the study of public spaces in American cities, with a special focus on Portland. Key readings include history and theory of concepts of public space, as well as contemporary case studies and field assignments to understand the production and maintenance of public spaces around Portland. Also offered for undergraduate credit as USP 413 and may be taken only once for credit. Prerequisite: upper-division or graduate-level standing.

USP 514 - Transportation Seminar (1)
This weekly seminar features a different speaker each week covering various topics in transportation research and practice. The topics cover all modes of transportation, with a focus on current practice. This course may be taken for credit up to three times. Also offered for undergraduate-level credit as USP 414 and may be taken only once for credit. Cross-Listed as: This is the same course as CE 514.
USP 515 - Economics: Applications in Urban Studies (4)

Microeconomic analysis of individual and firm behavior is developed with emphasis on applications to urban studies. Topics which may be covered include: land use and land rents, urban structure, poverty, housing and slums, transportation, environmental quality, and local government finance.

USP 516 - International Urban Issues Seminar (1)

This seminar surveys research about local and regional planning issues in a global context. It brings speakers with international experiences to share their understanding of urban issues, and to reflect on cultural, economic, and socio-political dimensions of policy-making processes around the world that influence planning worldwide.

Also offered for undergraduate-level credit as USP 416.

USP 517 - Urban Economic Development Policy (3)

This course analyzes urban economic development policy by building on an overall framework that demonstrates how urban economies create and distribute wealth and affect citizens' quality of life. Federal, state, and local policies must pursue three broad objectives: 1. raising the area's standard of living; 2. preserving and protecting environmental quality and quality-of-life; 3. reducing poverty and income inequality. This course provides students the ability to analyze and assess alternative policies through an understanding of the theoretical foundations of urban growth and decline; through the ability to apply analytical methods for assessing policy effectiveness; by examination of evidence of policy effectiveness; by reviewing case studies; and via a student's personal research of specific urban problems.

Prerequisite: USP 515 or equivalent courses in economics.

USP 518 - Energy and Society (3)

Consideration of the role of energy in human society, including energy and social change, energy and urban form, technologies of energy supply and demand, social institutions governing access to energy, and cultures of consumption. Current social issues involving energy efficiency, renewable energy technologies and climate change are stressed.

USP 519 - Population and Society (4)

Survey and analysis of population dynamics (births, deaths, and migration) and society. Examination of demographic concepts, theories, data and measurements, and research. Role of population processes in social life and public policies are highlighted, including population aging, economic development and the environment, urbanization, health and health care, race and ethnicity, and government/social/business planning. This course is the same as Soc 541 and may only be taken once for credit.

Also offered for undergraduate-level credit as USP 419 and may be taken only once for credit.

USP 520 - Applied Demographic Methods I (4)

The first of a two-course sequence. The purpose is to introduce the various basic methods of demographic analysis. The topics to be covered include data sources, population characteristics and change, and measures of mortality and fertility. In addition, the course will help students develop good judgment about data availability and quality, and acquire skills for presenting data. Recommended prerequisite: a course in regression analysis, such as USP 534.

USP 521 - Applied Demographic Methods II (4)

The second of a two courses sequence. The purpose is to introduce more advanced methods of applied demographic analysis. The topics to be covered are: data sources, internal and international migration, data evaluation, population estimates, and projection projections. The course will consist of readings, lectures, laboratory sessions, homework exercises, one examination, and one term-long project.

USP 522 - Practicum in Applied Demography (4)

Represents the capstone course for the graduate concentration in applied demography. The focus is on integrating a practicum experience with the methods of applied demography into a research paper. Students will develop, revise, and resubmit numerous drafts of a final research paper. Students will also provide professional peer review in evaluating the development of fellow student research papers.

USP 523 - Real Estate Development I (4)

Evaluates the new public/private partnerships that are necessary for downtown redevelopment, historic rehabilitation, integrated mixed-use urban centers, urban villages, and new communities. Students will
analyze the critical conceptual, feasibility, and deal-making phases of the development process, as well as the development and management stages. The course examines the new affirmative roles played by both public and private developers, as well as unusual joint development entities. Also considered are innovative concepts of incremental growth, land and development banking, shared parking, and alternative development patterns. Expected preparation: USP 515 or Fin 598 (may be taken concurrently).

USP 524 - Site Planning (3)
This course introduces the fundamentals of site planning in an urban context, as well as contemporary urban design theory and practice. Students will learn the principles of site planning and urban design at the scale of urban centers and specific sites, as well as the synthesis of multiple design decisions made by different actors, at different times, about different properties. The course will explore these topics from various perspectives, including planners and designers, developers and regulators, and others. Slideshow lectures, downtown walking tours, and a term project will use Portland as a living laboratory for how the principles of urban design and site planning are played out in public and private development projects. Students will work in teams to apply class principles to a specific site that is currently slated for redevelopment.

USP 525 - Design Analysis in Planning (2)
Approaches to the analysis of design issues in urban planning. The definition of urban space through mass, rhythm, and scale. Design and urban circulation. Planning tools for the implementation of design goals.

USP 526 - Neighborhood Conservation and Change (4)
The dynamics of neighborhood development, including economic and institutional factors in neighborhood change; neighborhood definition and image, residential choice; residential segregation; neighborhoods in the political process; and neighborhood conservation strategies. Recommended prerequisite: junior standing. Graduate students undertake a substantial independent project in addition to other course requirements.

USP 527 - Commercial District Revitalization (3)
Examines the evolution and revitalization of commercial districts over time. It explores the role of commercial districts in contemporary urban regions, and introduces the concepts of commercial district management and other strategies for promoting vital urban centers. Through readings, field observations, classroom discussions, and a series of assignments, students will explore the interrelationships between the built environment, economic trends, and public policy in shaping the commercial districts we see today. Students should learn to understand commercial districts as complex and multifaceted places that are always changing and unpredictable, but often play a crucial role in a community’s identity and purpose and in supporting affordability, equity, and sustainability.

Also offered for undergraduate-level credit as USP 427 and may be taken only once for credit.

USP 528 - Concepts of Community Development (3)
An investigation of models and perspectives on community development. Both structural and dynamic concepts related to processes of community-based change will be explored, including methodological approaches for assessing community settings, and the various roles and relationships in a community-based decision environment. Includes required field observation and a substantial independent field research project which examines cases of community problem-solving. Graduate students undertake a substantial independent project in addition to other course requirements.

Also offered for undergraduate-level credit as USP 428 and may be taken only once for credit.

USP 530 - Building Community Resilience (4)
Introduction to resilience theory, concepts, and applications in a hazards planning and disaster management. Surveys sociological, public administration, and planning theory literature to understand risk, resilience, and methods to address these at the community level.

Cross-Listed as: This is the same course as EMCR 530 and may be taken only once for credit.

USP 531 - Geographic Information Systems (GIS) for Planners (4)
Introduction to principles and methods of collecting, organizing, analyzing, and visualizing geographic information. Explores types and sources of geographical data used in urban and regional studies and planning with an emphasis on Census data. Provides an overview of principles and components of Geographic Information Systems (GIS) as a primary tool of spatial data analysis and visualization. Attention is given to practical
applications of GIS and to developing essential skills in desktop mapping and spreadsheet software.

**USP 532 - Data Collection (4)**

The acquisition of data for research in an urban context. Emphasis is on the concepts, terminology, and methods related to the use of survey research and secondary data. Recommended prerequisite: USP 430 and/or an introductory undergraduate statistics sequence and USP 530.

**USP 533 - Planning Methods I (4)**

Introduction to applied research in planning with emphasis on problem definition, planning and policy research design, collection and analysis for secondary data, and the use of qualitative observations.

Prerequisite: undergraduate statistics course.

**USP 534 - Green Buildings (3)**

An overview of contemporary green building practices and the design and development processes essential to their success. Emphasis on strategies that have the highest economic return and/or the greatest environmental benefits. The full lifecycle of the built environment is considered, from planning and design through construction, operation, and the end of use.

Also offered for undergraduate-level credit as USP 434 and may be taken only once for credit.

**USP 535 - Planning Methods II (4)**

Continuation of USP 533 focusing on statistics, forecasting, interpretation, and presentation of data in the context of planning practice.

Prerequisite: USP 533.

**USP 536 - Policy Evaluation Methods (3)**

Focuses on the methodological issues that must be addressed in attempting to evaluate programs and policies. Course offers an introduction to a variety of techniques useful in policy evaluation. Topics which may be covered include difference equations, Markov models, and queuing models. A section of the course considers the methodological issues that arise in cost-benefit analysis, such as present value calculations, determining the value of non-market benefits, and correctly evaluating costs. Recommended prerequisite: USP 515 or equivalent.

**USP 537 - Economics of Urban Transportation (3)**

The transportation system is critical to the functioning of an urban area. The movement of people and goods affects both the productivity and livability of the region. Transportation systems also affect and are affected by land use and location decisions. This course presents the economic analysis of urban transportation. This will include analysis of the effects of transportation systems on land use and location as well as the evaluation of transportation investments. These methods will then be applied to evaluating various proposals to improve the urban transportation system. Recommended prerequisite: USP 515 or 615.

**USP 538 - Real Estate Law (3)**

Provides students with a comprehensive summary of real property from a legal perspective with an emphasis on transactional issues. Includes issues relating to types of ownership, descriptions of property, easements, public and private limitations on use, real estate contracts, forms utilized in transfers, financing and title assurances. The class will enable students to understand the legal framework and the rights and responsibilities of owners and transferees/transferees of real property. This is the same course as RE 538S and may be taken only once for credit. Expected preparation for graduate students: RE 521.

Also offered for undergraduate-level credit as USP 438 and may be taken only once for credit. Cross-Listed as: RE 538S.

**USP 539 - Workforce Development (3)**

Introduction to policies and practices for workforce development. Topics discussed include labor market dynamics, failures and inequities; tools and methods for urban labor market analysis; and workforce development policies for skill investment, job matching and career development toward goals of household, business, community and regional economic development.

Also offered for undergraduate-level credit as USP 439 and may be taken only once for credit.

**USP 540 - History and Theory of Planning (4)**

The evolution of the urban planning field from its 19th century European origins through the 20th century U.S. history. Course addresses the question: why do we produce and implement plans? Specific topics include: philosophical issues and political-organization contexts of professional activity; the place of planning in the political economy of U.S. metropolitan development; and problems of rationality in forecasting, analysis, decision making, and design.
USP 541 - Dynamics of Planning Practice (3)
Examination of principles, methods, and programs for giving explicit attention to the perspectives of citizens in the development and implementation of public policies, programs and planning. Sets citizen participation in its historical context with an assessment of its impact to date. Examines issues pertaining to working with diverse communities and highlights ethical dilemmas faced by professional planners.

USP 542 - Land Use Implementation (3)
An examination of alternative approaches to implementation of plans. Topics include: regulatory tools, e.g., zoning and subdivision ordinances; review functions, e.g., design review and administrative review; and programs, e.g., growth management, capital improvements, community development, housing assistance plans; and political-procedural issues, e.g., permit streamlining, cost impacts.

USP 543 - Geographic Applications to Planning (4)
Principles and models of spatial organization, behavior, and location in geographic space. Major conceptual models of urban structure and form, urban regional hierarchy, transportation flows and other forms of spatial interaction, and their applications to modern planning and other disciplines. Spatial data models (rasters, TINs, LRSs, other) and advanced analytical and modeling capabilities of GIS (surface, 3-D, and network analyses). Discussion of real-life GIS applications to transportation, land use, environmental planning, community development, and related areas.

USP 544 - Urban Transportation Planning (3)
Introduces fundamental concepts and methods used in multi-modal urban transportation planning, including problem identification, alternatives analysis, evaluation and decision making, plan implementation, and program management. Exposes students to processes and analytical methods from multiple disciplines, such as law, politics, engineering, sociology, economics, finance, management and marketing. Emphasis on analysis of moderately complex technical information and its interpretation for communication with decision makers.

Prerequisite: USP 535 or equivalent coursework in descriptive and inferential statistics and data presentation. Recommended: USP 515 or USP 537 or an equivalent intermediate-level course in applied microeconomics.

USP 545 - Cities and Third World Development (3)
Critical survey of historical, economic, cultural, political, and urban aspects of Third World development, starting with the colonial era. Historical patterns of integration of the Third World with the emerging world market system. Covers problems of the post-independence period, focusing on urban sectoral issues and policy alternatives. Specific topics include trade, investment, industrialization, finance, technology transfer, political participation, land use, housing, transportation, information infrastructure, population growth, social services, militarism, and cultural conflict.

Also offered for undergraduate-level credit as USP 445 and may be taken only once for credit.

USP 546 - Real Estate Development II (3)
Introduces students to persistent and emerging challenges of real estate development through analysis of case studies. Provides students the experience of developing a comprehensive and unified analysis of a commercial real estate project. Each student will submit a case study with greater specificity showing how the design, development, market, finance, construction, and management of the project are integrated. Students will work closely with industry participants and faculty to develop their analysis as well as alternative strategies for the project at critical stages of its development.

Prerequisite: USP 523.

USP 547 - Urbanization and Planning in the Global South (3)
Urban planning interventions in many cities in the Global South have been facing big challenges as rapid population growth has led to resource scarcity, environmental degradation, and social inequality. This course develops tools and ideas to understand issues confronting cities in diverse socio-economic, political, and cultural circumstances, and how globalization impacts the local space of cities and regions. It focuses on challenges and opportunities in formulating appropriate planning interventions, and prepares planners to work in the diverse and rapidly changing contexts of the Global South.

USP 548 - Public Transportation Planning and Policy (3)
Public transit ridership and investments have been growing for the past two decades as regions around the world grapple with worsening congestion,
growing concerns about climate change, health, and social equity, and a reinvigoration of urban living and sustainable lifestyles. This course will introduce students to processes, policies and rules concerning the planning of public transit systems and the development of new transit investments, focusing mostly on buses and light rail.

**USP 549 - Regional Planning and Metropolitan Growth Management (3)**

Explores regional planning in the U.S. today through an examination of historical and contemporary regional planning practice. Begins with an overview of the history of regional planning, including the evolution of thought regarding regionalism and the nature of regions. Examples of regional plans will be used as the basis for examining assumptions, approaches, and methods serving as the foundation for regional planning practice. A synthesis of the findings of the review of plans will be used to draw general conclusions about the field and its prospects. Pays particular attention to the principles, approaches, and methods of growth management generally and with respect to metropolitan regions.

**USP 550 - Participatory Planning (3)**

Examines the principles and methods for creating participatory planning. Demonstrates the linkage between frameworks and concepts such as collaborative planning, deliberative democracy, equity planning, and the co-production of plans and applied work. Considers various processes, techniques, and tools to foster equitable community engagement. Students design a participatory process for clients.

**USP 551 - Community Economic Development (3)**

Course sets community economic development within the context of traditional state and local economic development policy and compares their underlying theoretical perspectives. It examines the impact of recent economic, social, and demographic transformations on local labor markets and surveys the labor-market problemsolving activities of local governments and community-based organizations. Business and commercial development strategies are also explored.

Also offered for undergraduate-level credit as USP 451 and may be taken only once for credit.

**USP 552 - Urban Poverty in Critical Perspective (3)**

Examines historical, empirical, and theoretical perspectives on urban poverty in the United States. It addresses the politics of poverty discourse by examining why explanations and policy prescriptions have emphasized morality and behavior; race, family, and culture; and dependency and responsibility rather than systemic economic inequality.

**USP 553 - Legal Processes in Urban Planning (1)**

Covers the legal context within which land use planning and plan implementation takes place at the local level. Requirements for the conduct of hearings, appeals, and evidentiary processes are analyzed; skills for and techniques of writing findings and conditions of approval are developed; and questions of ordinance interpretation and liability are discussed.

**USP 554 - Land Use: Legal Aspects (3)**

Land use and planning from the legal perspective. Includes historical review of attitudes toward property tenure and ownership; the relationship between local planning and regulations; and current issues and perspectives on land use including emerging state and federal roles. Graduate students undertake a substantial independent project in addition to other requirements.

Also offered for undergraduate-level credit as USP 455 and may be taken only once for credit.

**USP 555 - Urban Transportation: Problems and Policies (3)**

An introduction to urban transportation policy from a historical and political perspective. Historical developments in transportation policy are traced from the early streetcar days up through the present. Federal, state, and local transportation policies are examined for their impact on urban spatial and economic development. An overview of current issues in transportation policy and planning includes transportation demand management strategies, transit-oriented design, road pricing, and alternative transportation modes. The intersection of environmental and transportation policy is also examined, as is the decision-making structure at the local, regional, and state level.

Also offered for undergraduate-level credit as USP 456 and may be taken only once for credit.

**USP 556 - Information Cities (3)**

Focuses on the political, social, and cultural impacts of mass media and information technologies within
the urban matrix. Contextualizes the "information society" in historical, institutional, political, economic, and global settings. Topics include the flexible production, the segmentation of consumption, alternatives to mass media, the Web, the reorganization of work, the transnationalization of culture, commercial and political surveillance, and the development of urban information infrastructure.

Also offered for undergraduate-level credit as USP 457 and may be taken only once for credit.

**USP 558 - Planning Workshop (3-6)**

Organized team approach to a current planning problem in the Portland metropolitan area. Focus on planning practice, field investigation, data analysis, written and oral communication. Work program includes strategies, methods, and skills needed to identify issues and draw together all participants in the search for solutions. Emphasis is on the blending of practical skills with knowledge gained from core-area courses. Two-term sequence, credit for first term dependent upon successful completion of the second term.

**USP 559 - Internship Seminar (1)**

A 400-hour internship, or combination of internships, is required for completion of the MURP degree. This Seminar serves as a means for graduate students admitted to the MURP degree program to share information regarding securing internships and the work products associated with internship experiences. An annual calendar for the seminar will be posted at the beginning of the year. Attendance at scheduled seminar meetings is required for all MURP candidates during the first two years of their enrollment in the program.

**USP 560 - Climate Resiliency Planning (3)**

Aims to examine the response of society to a changing climate, with an emphasis on the practices, processes, and programs that can improve the resiliency of communities to climate-induced impacts. We will investigate what it means to be "resilient", exploring principles from planning, sociology, engineering, environmental studies, and disaster studies, and other related fields. We will also pay special attention to the interplay between social inequality, poverty, social exclusion and vulnerability to natural disaster.

Cross-Listed as: This is the same course as EMCR 560 and may be taken only once for credit.

**USP 562 - Real Estate Development Workshop (3)**

Students form a real estate development team and produce an original development plan, including the development concept, the market analysis, the conceptual design, economic analysis, capital and operations budget, and management plan. The student's plan will demonstrate and apply mastery of the development concepts and tools learned through the previous courses.

Prerequisite: USP 523 or instructor's consent. Course may be taken twice for credit with instructor's consent.

**USP 563 - Real Estate Construction (3)**

Reviews the nature and characteristics of the real estate construction process, including materials, cost estimating procedures, budgets, schedules and legal procedures. Emphasis on the selection of building systems and review of the forms of construction contracts and associated documents commonly used in the industry. Reviews lessons learned from case studies.

Prerequisite: RE 521.

**USP 564 - Political and Administrative Issues in Aging (3)**

Coverage of organizational dynamics as related to the elderly including the provision and use of services. Covers voting behavior and advocacy as well as administrative and legal issues that are particularly applicable to the elderly.

**USP 565 - Pedestrian and Bicycle Planning (3)**

Examines the importance of walking and bicycling as means of transportation in a sustainable urban environment. Covers planning, design, implementation, and maintenance of bikeways and walkways, as well as ancillary facilities such as bicycle parking. Focus on the role of education, advocacy, and outreach in improving walking and bicycling conditions. Study relevant examples from various cities, with a heavy emphasis on Portland's experience.

Also offered for undergraduate-level credit as USP 465 and may be taken only once for credit.

**USP 566 - National Urban Policy (3)**

Examination of the federal government's involvement with urban issues from a historical and political perspective. Focus on policies pertaining to social welfare and economic development, with an overview of other policy arenas such as housing, health, and education. Critical analysis of how and why the federal government responds to urban crises.
with national policy initiatives and how changes in political regime correspond with changes in policy emphases and perspectives.

**USP 567 - Urban Housing Policies (3)**

Review of the history and the role of public policy in the housing sector. Study of past and current trends in the delivery of housing services in urban areas. The basic philosophies related to the supply of housing are analyzed and examined relative to current trends in the delivery of housing services in urban areas. Critical review of the role of the federal government and the construction industry. Equal attention to the role of public housing and the impact of urban renewal. Active participation in discussion and a research paper are required.

**USP 568 - Oregon Land Use Law (3)**

The Oregon program is placed in a national context that stresses the broad nature of planning here. Structural relations between state, regional, and local government planning and regulation are analyzed. Legal aspects of the implementation of the various functional statewide planning goals are studied, as are the Oregon Land Use Board of Appeals and recent developments in local government land use planning and regulatory processes.

Also offered for undergraduate-level credit as USP 468 and may be taken only once for credit.

**USP 569 - Sustainable Cities and Regions (3)**

This course explores the questions of whether and how cities can be sustainable -- and how they can continue as places that sustain cultures, economics, and nature. Basic technological and theoretical models of human-nature interaction will be considered, along with visionary possibilities for the future of cities and urban regions, globally and in Portland. Particular attention will be given to global-local interactions and to the strategies, programs, policies, and tools that can deliver sustainable and equitable development and advance environmental justice.

**USP 570 - Transportation and Land Use (3)**

An analysis of transportation and land use interactions in urban areas. The impact of highway and transit changes on travel behavior, locational decisions, and urban form are examined. Recommended prerequisites: USP 515 and 544.

**USP 571 - Environmental Policy (3)**

Surveys federal, state, and international environmental policy-making with an emphasis on process design. Political and technical objectives for policy, the roles and responsibilities of institutions, federal-state tensions, representation and analysis of stakeholding interests, the role of the media, and environmental justice are key elements. Topical areas include issues concerning resource management as well as pollution prevention.

**USP 572 - Regional Economic Development (3)**

This course focuses on methods of analyzing why regions differ economically, how they interrelate, and why and how they react to changes in economic policies and conditions. Part of the course will be devoted to a study of models of regional structure and growth, such as economic base or input-output, and the strengths and weaknesses of each in modeling the regional economy. The remainder of the course will be concerned with the development of models for use in regional forecasting and/or evaluation of policy changes on regional development. Recommended prerequisite: USP 515.

**USP 573 - Real Estate Economics (4)**

Looks at the economics of real estate and housing, including land rent, interest rates, apartment rents, and housing prices, using an economic framework. Basic concepts in urban economics such as agglomeration, transportation costs and congestion, inequality and segregation, growth controls and sprawl, as well as amenities, externalities, and public goods are reviewed. Explores the technique most commonly used in real estate and housing economics: hedonic pricing. Explores the rationale and impact of government intervention in the private real estate market. Expected preparation: USP 515 or Fin 512.

Corequisite: Taking RE 521 and USP 573 simultaneously is permitted. Cross-Listed as: This is the same course as RE 573 and may be taken only once for credit.

**USP 574 - Socio-Technical Change in the City (4)**

At the core of the urban sustainability challenge is how societies build, maintain and reform socio-technical systems—linking actors, institutions and values to the built and natural environment. Drawing from science and technology studies, this course analyzes socio-technical systems and the challenges to navigating them along more sustainable trajectories.
USP 575 - Urban Design Workshop (4)
The workshop will explore the use of urban design as an integral part of the planning process through the creation of an urban design plan. Projects in the Portland region will be chosen to familiarize students with the practice of urban design planning and the products of the workshop will be presented to the public.

Also offered for undergraduate-level credit as USP 475 and may be taken only once for credit. 
Prerequisite: Enrollment in good standing in the MARCH or MURP graduate degree programs or permission of the instructor.

USP 576 - Feeding the City (4)
Introduction to historical and contemporary efforts to foster more just and sustainable urban food systems. Integrates critical social science perspectives, applied planning literature, case studies, and analysis of policy and planning best practices.

USP 577 - Urban Environmental Management (3)
An accelerated survey of principles, concepts, and techniques employed in the management of urban environmental problems, with particular emphasis on "best practice" and emerging ideas. Selected topics may include: watershed stewardship, brownfield development, green spaces, protection of urban wildlife, stormwater management, urban agriculture, residential toxics.

USP 578 - Impact Assessment (3)
Empirical techniques employed in measuring the impacts associated with land use change. Topics: goals achievement matrix approaches to impact assessment, trade-offs between community and regional welfare, distance and time in urban analysis, estimating the social profitability of land development, cost-benefit analysis applied to freeway location, techniques for valuation of non-priced resources, measuring municipal revenue and expenditure impacts, gravity models and transport demand estimation, economic base analysis for employment and population impact assessment, estimating air and noise pollution associated with land development. Recommended prerequisite: USP 515.

USP 579 - State and Local Public Finance (3)
The course will focus on the tax burdens, fiscal resources, and expenditure patterns of local governments in metropolitan areas. The impact of revenue sharing and categorical grants will be discussed in relation to state and federal influence on local government finance. The spatial distribution of local government services, transfer payments, and tax burdens will be analyzed. Special attention will be paid to Oregon's complex property tax limitations.
Prerequisite: USP 515.

USP 580 - Political Economy of Nonprofit Organizations (3)
Considers theories of altruism, trust, and social capital. Examines the connections between wealth and social responsibility and between elite status and social reproduction. Explores the broad scope of nonprofit activity in the economy, the interdependence of government and nonprofit organizations in the modern state, and the role of think tanks in shaping public policy. Surveys the dramatic rise of non-governmental organizations in developing countries and the future of nonprofits in a global economy.

Also offered for undergraduate-level credit as USP 480 and may be taken only once for credit.

USP 581 - Environmental Psychology (3)
Examination of the relationship between people and their physical environments. Specific topics include human spatial behavior (personal space and territoriality), the contribution of the behavioral sciences to architectural and urban design, community and neighboring in the city, and environmental cognition.

USP 582 - Sustainable Transportation (3)
This course covers the sustainability dimensions of transportation, considering historical trends and future prospects. Topics covered in the course include energy use and alternative energy sources, technological change, traffic safety, vehicle emissions, environmental justice, the role of transportation in the economy, and the role of land use and urban design.
Prerequisite: Graduate standing.

USP 583 - Transportation Finance (3)
Much of the current funding for roads, transit, and freight comes from fuel taxes; but increasing fuel efficiency of vehicles and the use of alternative energy sources raise questions about the long-term viability of this revenue source. This course will existing transportation finance and examine some of the proposals for alternative financing mechanisms.
U SP 584 - Negotiation in the Public Sector (4)
Overview of conventional and innovative applications of negotiations in public sector activities, and the potential and limitations of negotiation-based approaches to public decision making. Key components include negotiation theory, individual skill development, and a review of the institutional, legal, and political context of negotiations.

U SP 585 - Housing Environments for Older Adults (3)
Explores physical, social, and service contexts related to housing and environments for people across the age and ability spectrums, focusing on older adults. Ecological perspectives and social theories on aging will be examined and applied, and students will examine evidence regarding how older adults use, perceive, and are affected by their homes and environments. Topics include housing options, accessible and inclusive environments, supports and services, policies and politics, economics, neighborhood design, and age-friendly communities.

Also offered for undergraduate-level credit as USP 485 and may be taken only once for credit.

U SP 586 - Urban Social Networks (3)
Analysis of the social psychological and anthropological literature on social networks: the structure and content of interpersonal networks (including kinship, friendship, instrumental) in an urban setting. Specific topics will include: the nature of interpersonal ties in the city, urban migration and networks, access to urban resources, methods of analyzing personal and group networks.

U SP 587 - Travel Demand Modeling (3)
Understand, analyze, and apply travel demand forecasting models from an applied and practical perspective. The underlying theoretical basis of model components will also be covered. Student will become familiar with the traditional four-step travel forecasting process, including model application software package, and interpretation of model output. Involves hands-on use of transportation modeling software.

Prerequisite: an introductory course in urban transportation planning or professional experience in urban transportation planning; familiarity with spreadsheet software; college-level algebra; and introductory statistics (i.e., regression analysis). Prior experience with DOS is helpful but not mandatory.

U SP 588 - Sustainable Development Practices (3)
Introduction to analytic and management approaches intended to limit the social and environmental harms associated with most past patterns of development. Builds upon basic understanding of socio-environmental change and provides a foundation for subsequent in-depth studies of particular sustainable development strategies and analytic techniques. Students study a broader range of sustainable development topics, tools, and techniques.

U SP 589 - Theorizing Urban Natures (4)
This seminar examines various ways of understanding urban "nature". Students will contrast dominant ecological frameworks with those used in the social sciences (e.g., urban political ecology, actor-network theory), with attention to the social, political, and economic contexts in which they arose, and implications of each for research, practice, and politics.

U SP 590 - Green Economics and Sustainable Development (3)
Examines prevailing assumptions about economic growth, production, consumption, labor, and leisure. Considers how changes in these basic assumptions might help us design an economic system that includes alternative values such as appropriate scale, community impact and environmental sustainability.

Also offered for undergraduate-level credit as USP 490 and may be taken only once for credit.

U SP 591 - Geographic Information Systems I: Introduction (4)
The use of computers in Geographic Information Systems (GIS) and mapping. Includes theory of databases related to geographic information management and practical aspects of database design. Students will use a variety of programs for mapping and spatial analysis of geographic information. Each student completes a series of exercises demonstrating a variety of approaches to the analysis and display of spatial data. Students enrolling in this class must register for a computer lab section. This is the same course as Geog 588 and may be taken only once for credit. Expected preparation: Geog 380 or equivalent experience in cartography.

Corequisite: Geog 588L. Cross-Listed as: Geog 588.

U SP 592 - Geographic Information Systems II: Applications (4)
Analysis and applications of geographic information systems concepts and technology to land planning
and management issues. The multipurpose land information systems concept is used as an organizing device for spatial registration of data layers to achieve data sharing and compatibility among functions. User needs assessment and systems design provides the basis for systems procurement, implementation, and use. Expected preparation: Geog 488/588 or USP 591. Students enrolling in this class must register for a computer lab section. This is the same course as Geog 592 and may be taken only once for credit.

Corequisite: Geog 592L. Cross-Listed as: Geog 592.

**USP 593 - Public Participation GIS (3)**

Offered as a studio-based GIS class. The objective is for students to apply GIS skills acquired in previous GIS courses to a specific real-world spatial problem. Tasks will involve problem definition, primary data collection, advanced GIS analysis, and presentation of results. This format will give students practical experience in implementing GIS technologies with specific emphasis on planning problems. Students will be required to work in small groups in a simulated professional planning practice environment. Expected preparation: USP 531 and USP 543 or USP 591 and USP 592.

Also offered for undergraduate-level credit as USP 493 and may be taken only once for credit.

**USP 594 - Planning in the Pacific Northwest (3)**

This course will utilize the work of Pacific Northwest historians, writers, critics, and others as a vehicle for equipping planners with a somewhat systematic and certainly eclectic cultural overview of the region they hope to serve. This course will attempt to prepare them to be members of a place and of a culture of place, and to embrace the art and literature of the Pacific Northwest as part of their ongoing professional development. Though focused on the Pacific Northwest, the general approach used in this course should be applicable to other regions as well.

**USP 595 - Reshaping the Metropolis (3)**

Examination of the contrast between classic models of metropolitan settlement and new patterns emerging in the late twentieth century. Land use changes in the context of new patterns of economic activity; ideas about the physical form of the good city and the societal implications of development patterns; issues of residential choice, community change, globalization, and environmental protection as affected by metropolitan growth.

**USP 596 - Affordable Housing Finance (3)**

Introduction to the unique challenges of financing and developing affordable housing projects. The challenges and tools for financing rental as well as owner-occupied housing will be covered, and case studies will be used to illustrate the ways in which financing for affordable housing is created and used, and poses unique challenges for investors, jurisdictions, and community-based groups. Expected preparation: USP 312.

Also offered for undergraduate-level credit as USP 496 and may be taken only once for credit.

**USP 597 - Regional Economic Analysis (2)**

Reviews analytical tools and data sources and provides hands on training for applying them to questions about regional economies. Includes demographic analysis, regional business structure, analyzing regional economic change, labor market analysis, researching firms, and conducting cluster analysis and economic opportunities analysis. Expected preparation: basic statistics.

**USP 601 - Research (0-9)**

(Credit to be arranged.)

**USP 602 - Independent Study (1-9)**

(Credit to be arranged.)

**USP 603 - Dissertation (0-15)**

(Credit to be arranged.)

**USP 604 - Cooperative Education/Internship (1-9)**

(Credit to be arranged.)

**USP 605 - Reading and Conference (0-9)**

(Credit to be arranged.)

**USP 606 - Project (1-9)**

(Credit to be arranged.)

**USP 607 - Seminar (1-9)**

(Credit to be arranged.)
USP 609 - Practicum (1-9)
(Credit to be arranged.)

USP 610 - Selected Topics (0-9)
(Credit to be arranged.)

USP 612 - Community, Planning, and Ethics (4)
Introduction to the history and theory of community development in North America, the theory and practice of urban planning in North America, and to the ethics of civic and business practices linking the public, private, and non-profit sectors. It examines the tensions among market-based development, community action, and public intervention. Topics range in scale from housing style choices to aggregate trends in metropolitan form and cover a wide range of actors including individual householders, private builders and developers, reformers, nonprofit organizations, and governments. The course will focus on plans as the outcome of political processes with specific consequences for different constituencies within the city.

USP 613 - Urban Economic and Spatial Structure (3)
Provides an introduction to the economic and spatial aspects relevant to the field of urban studies. Provides an overview of existing theories and empirical evidence relating to urban spatial and economic relationships. Examines the impact of federal, state, and local government policies, and changing economic conditions on these relationships.

USP 614 - History and Theory of Urban Studies (3)
Leading thinkers and milestones in the analysis of urban development and urban life. Complementary theories and models of the social sciences. Postmodern approaches. Visionary and critical responses to the possibilities of metropolitan life.

USP 615 - Economic Analysis of Public Policy (4)
Introduction to the use of microeconomic analysis in the evaluation of public policy. Intended for entering graduate students with a limited background in economics. Develops basic analytic methods and emphasizes application of the analysis to issues of public policy. Prepares students for advanced classes that use this type of analysis.

USP 616 - Cities in the Global Political Economy (3)
Introduction to political theory and the political economy of globalization. Begins with core political ideas from classical works of political economy (Locke, Rousseau, Smith, Mills, Marx, Marshall, Keynes, Friedman, and Rawls) and proceeds to an analysis of the rise of transnationalism and globalization. Looks at changes in the global economy, revolutionary changes to capitalism, the fall of communism, and impacts of globalization on cities, communities, the state, work, social mobility, welfare, cultural diversity, and the environment.

USP 617 - The Sociology and Politics of Urban Life (3)
A survey of important theories of and empirical research about the social structure and political dynamics of urban areas. The impacts of globalization on urban social and political life, the changing nature of communities and social relations within cities and suburbs, and evolving patterns of intergovernmental cooperation and conflict within metropolitan regions will be analyzed.

USP 619 - Development Partnerships (3)
Considers public and private partnerships to develop real estate in terms of the benefits to the wider urban community and policy goals such as affordable housing, community redevelopment to economic development, and sustainability. The course looks at how public and private organizations can meet policy goals, create economic returns, and mitigate risk. Expected preparation: USP 523.

USP 624 - Development Project Design (3)
Provides an understanding of architectural practice, the value added by design, the intersection of design with broader community concerns and developer’s objectives, and the management of the design process, including tools for decision analysis in all phases of the building design process. A primer on building systems and engineering and case studies of the major building types will be presented. Expected preparation: USP 523.

USP 625 - Green Buildings II (3)
Applies green building concepts to advanced real estate problems, including the rehabilitation and
adaptive reuse of existing real estate properties. Properties being covered include retail, office, hotel, industrial, and residential properties. The class will examine techniques for increasing density, recycling materials, improving energy efficiency, and creating healthy work and living environments. The course will look at property management and portfolio management from a green building perspective.

Prerequisite: USP 529.

**USP 630 - Research Design (4)**

Principles of research design, including philosophical bases of scientific research, approaches to research, problem identification, problem statement, development of research questions, development of research hypotheses, and the relationship of research hypotheses to modes of data gathering and analysis. The laboratory (USP 630L) must be taken concurrently. Recommended prerequisite: USP 430.

Corequisite: USP 630L.

**USP 630L - Research Design Lab (0)**

Research design lab.

Corequisite: USP 630.

**USP 634 - Data Analysis I (4)**

Application of multivariate statistical analysis in an urban context. Emphasis on applications of various techniques within the general linear model. Recommended prerequisite: USP 532. The laboratory (USP 534L) must be taken concurrently. Recommended prerequisite: USP 430.

Corequisite: USP 634L.

**USP 634L - Data Analysis Lab (0)**

Data analysis lab.

Corequisite: USP 634.

**USP 636 - Political and Economic Decision-making (3)**

Examines the philosophical and conceptual assumptions embodied in alternative decision-making theories in the fields of economics and politics. Designed to show students the differences in individual and collective decision-making processes and the technical and social challenges faced in decision-making processes in the market place and the realm of politics. Examples cover local, national, and international policy topics. This is the same course as PS 559 and may be taken for credit only once. Recommended prerequisite: USP 515/615.

Cross-Listed as: PS 559.

**USP 654 - Data Analysis II (4)**

Takes an applied approach to statistical analysis and research methodology and is the second in a two-course sequence. Provides students with statistical background, conceptual understanding, technical writing skills, computer application, and the ability to apply these skills to realistic data analysis problems and research designs. Topics include simple regression and correlation, multiple regression, and logistic regression. The laboratory (USP 654L) must be taken concurrently. Recommended prerequisites: USP 634 or an equivalent course approved by the instructor and prior experience with statistical software.

Corequisite: USP 654L.

**USP 654L - Data Analysis II Lab (0)**

Data analysis lab.

Corequisite: USP 654.

**USP 655 - Advanced Data Analysis: Structural Equation Modeling (3)**

Introduces students to structural equation modeling, a regression-based technique that incorporates elements of path analysis and confirmatory factor analysis. Topics covered include path analysis, confirmatory factor analysis, and structural models with cross-sectional, longitudinal, and multiple groups. The general goal is to provide a thorough background in the conceptual aspects, statistical underpinnings, and application of this method.

**USP 657 - Advanced Data Analysis: Discrete Choice Modeling (3)**

Presents the theory and practice underlying the formulation and estimation of models of individual discrete choice behavior with applications to travel, travel related and other choices. Provides students with an understanding of the theory, methods, application and interpretation of multinomial logit (MNL), nested logit and other members of the Generalized Extreme Value (GEV) family of models, as well as an introduction to mixed logit models.

Prerequisite: USP 634 or equivalent intermediate statistics/econometrics course.

**USP 660 - Policy Process (3)**

Focuses on the politics of the policy process. It examines the role, influence and interaction of legislatures, executives, bureaucracies, courts, policy communities and citizens. Follows the stages of policy development: problem definition, agenda setting, budgeting, authorization, implementation and oversight. Case material is taken from federal, state,
and local governments with special consideration given to the intergovernmental aspects of the policy process.

**USP 663 - Program Evaluation (3)**

This course is designed as a graduate introduction to the field of evaluation research and program evaluation. Topics covered include contemporary and emerging theoretical perspectives on evaluation research, experimental and quasi-experimental design, internal and external validity and reliability, measurement, analysis of change, ethical issues in evaluation, administration of program evaluation.

**USP 674 - Spatial Analysis (3)**

The use of geographically coded data to identify and anticipate future patterns of human activity in metropolitan areas and systems of cities. Emphasizes techniques to establish whether the characteristic landscapes associated with static and dynamic models of behavior are present. Diffusion processes, expanded location theories, and models of decision making from spatially arrayed cues receive particular attention. Recommended prerequisite: USP 532.

**USP 676 - Activity Location (3)**

The location of human activities in urban systems. Location of economic activities where profit maximization is desired, and location decisions with equity maxima.

**USP 679 - Metropolitan Fiscal Structure (3)**

The course will focus on the following topics: the tax burdens, fiscal resources and expenditure patterns of local governments in metropolitan areas. The impact of revenue sharing and categorical grants. The spatial distribution of local government services, transfer payments, and tax burdens. Review of literature on the urban-suburban exploitation thesis, the Tiebout-Oates model, etc.

Prerequisite: USP 515.

**USP 682 - Sustainable Transportation (3)**

This course covers the sustainability dimensions of transportation, considering historical trends and future prospects. Topics covered in the course include energy use and alternative energy sources, technological change, traffic safety, vehicle emissions, environmental justice, the role of transportation in the economy, and the role of land use and urban design.

Prerequisite: graduate standing.

**USP 683 - Qualitative Analysis (4)**

Study of a variety of qualitative methods of analyzing social science problems, with an emphasis on applications to urban studies. Students study the philosophy of academic inquiry, understanding and interpretation of social action. Specific techniques include content analysis, participant observation, field observation, ethnography, interviewing, and focus groups, among others. Organization, coding, and analysis of qualitative data. Expected preparation: USP 630.

**USP 689 - Advanced Urban Politics and Sociology (3)**

This is an advanced readings seminar focusing on the literature and emerging theoretical and methodological debates in the fields of urban sociology and political science. This course is intended as an intensive seminar for graduate students seeking both greater familiarity and involvement with the literature and discourse in these fields.

Prerequisite: USP 517/617.

**USP 697 - Research Design 2 (4)**

Research seminar required for students in urban studies doctoral program; open to MUS and other advanced graduate students. Students apply their substantive background and methodological training to develop all the components of a social science research paper: statement of focused research question, literature review, development of hypotheses, definition of appropriate methodology, design of data acquisition, and pilot testing of data acquisition strategy. Expected preparation: USP 614, USP 613, and USP 617.

**Viet-Vietnamese**

**Viet 101 - First-Year Vietnamese Term 1 (4)**

Elementary work in the Vietnamese language with emphasis on listening comprehension, speaking, grammatical patterns, reading, and writing. Includes discussions of Vietnamese culture and traditions. Suitable for beginners and Vietnamese speakers with limited ability. This is the first course in a sequence of three: Viet 101, Viet 102, and Viet 103.
Viet 102 - First-Year Vietnamese Term 2 (4)
Elementary work in the Vietnamese language with emphasis on listening comprehension, speaking, grammatical patterns, reading, and writing. Includes discussions of Vietnamese culture and traditions. Suitable for beginners and Vietnamese speakers with limited ability. This is the second course in a sequence of three: Viet 101, Viet 102, and Viet 103.

Viet 103 - First-Year Vietnamese Term 3 (4)
Elementary work in the Vietnamese language with emphasis on listening comprehension, speaking, grammatical patterns, reading, and writing. Includes discussions of Vietnamese culture and traditions. Suitable for beginners and Vietnamese speakers with limited ability. This is the third course in a sequence of three: Viet 101, Viet 102, and Viet 103.

Viet 201 - Second-Year Vietnamese Term 1 (4)
Work in the Vietnamese language focusing on various cultural aspects of Vietnamese life. The language skills include speaking, listening, reading and writing. Resources and information fundamental to the Vietnamese heritage will be discussed. This is the first course in a sequence of three: Viet 201, Viet 202, and Viet 203.

Viet 202 - Second-Year Vietnamese Term 2 (4)
Work in the Vietnamese language focusing on various cultural aspects of Vietnamese life. The language skills include speaking, listening, reading and writing. Resources and information fundamental to the Vietnamese heritage will be discussed. This is the second course in a sequence of three: Viet 201, Viet 202, and Viet 203.

Viet 203 - Second-Year Vietnamese Term 3 (4)
Work in the Vietnamese language focusing on various cultural aspects of Vietnamese life. The language skills include speaking, listening, reading and writing. Resources and information fundamental to the Vietnamese heritage will be discussed. This is the third course in a sequence of three: Viet 201, Viet 202, and Viet 203.

WLL - World Languages & Literature
WLL 101 - Special Studies (1-4)
(Credit to be arranged.)

WLL 102 - First-year World Languages (1-4)
Contact the department for information on this course.

WLL 103 - First-year World Languages (1-4)
Contact the department for information on this course.

WLL 199 - Special Studies (1-8)
(Credit to be arranged.)

WLL 201 - Special Studies (1-4)
(Credit to be arranged.)

WLL 202 - Second-year World Languages (1-4)
Contact the department for information on this course.

WLL 203 - Second-year World Languages (1-4)
Contact the department for information on this course.

WLL 299 - Special Studies (1-6)
(Credit to be arranged.)

WLL 319U - Fairy Tales and Folklore (4)
A study of the fairy tale, folklore and/or other works originating orally representing a range of critical social and cultural issues. May be repeated with different topics. Course taught in English.

WLL 335U - The Icelandic Sagas (4)
Explores the sagas and the cultural milieu in which they were created. Conducted in English. Expected preparation: Sophomore Inquiry.

WLL 349 - Forbidden Love (4)
Study of depictions in literary works of gender and sexual identity, orientation, or practice that differs from that of the majority of the surrounding society. Works will be drawn from world literatures in
translation. Course may be repeated with different topics. Course conducted in English.

**WLL 361U - Bestsellers and Blockbusters (4)**

Study of the interplay between literary works from a variety of time periods and their cinematic representations. Students will develop analytical and critical thinking skills applicable both to the page and the screen. May be repeated with different topics. Course taught in English.

**WLL 371 - Global Citizenship in Professional Contexts (4)**

Designed for students who are interested in developing a better understanding of today’s global issues and ascertaining possible strategies to be functional in a global setting. Through hands-on projects, students will develop strategies to help them break down cultural barriers, challenge stereotypes, appreciate differences and converge commonalities in people, cultures, and communities.

**WLL 380 - Introduction to Comparative Literary and Cultural Studies (4)**

Overview of the practices, methods, and materials of comparative literary and cultural studies, with an emphasis on learning specific modes of encountering creative expression from different linguistic, cultural, and national backgrounds. Introduces students to major questions, concepts, and debates in the field as well as literary works in relation to various themes, ideas, genres, and contexts.

Prerequisite: Upper-division standing. Cross-Listed as: This is the same course as Eng 380 and may be taken only once for credit.

**WLL 381 - Topics in Translation Studies (4)**

Students will develop analytical frameworks to understand translation and its implications for textual interpretation. Students work with case studies that highlight the role of translation throughout history; they also examine how methods from Translation Studies enrich the study of literary and non-literary texts alike. Those with second-language competency can optionally develop skills to produce translations of their own. This course may be repeated for up to 8 credits.

Cross-Listed as: This is the same course as Eng 381.

**WLL 383U - Topics in Comparative Literature, Film and Comics (4)**

Students learn how to compare literary, film, or comic-book genres across two or more world cultures; readings (viewings) of texts/films are followed by discussion of cultural differences. Students also learn how to discuss genre differences and how cultural attitudes shape those different artistic responses and appropriations of global artistic ideas. Analysis of critical texts reveals how cultural attitudes create different expectations or requirements for genres. Readings and discussions are in English. This course may be repeated for up to 8 credits.

Cross-Listed as: This is the same course as Eng 383U.

**WLL 390 - Languages of the World (4)**

Overview of the world’s languages and language families. Presentation of specific languages, basic phonemic and structural analyses to illustrate linguistic terms and concepts.

**WLL 399 - Special Studies (1-12)**

(Credit to be arranged.)

**WLL 403 - Thesis (1-9)**

(Credit to be arranged.)

**WLL 404 - Cooperative Education (1-12)**

(Credit to be arranged.)

**WLL 405 - Reading and Conference (1-12)**

(Credit to be arranged.)

**WLL 408 - Workshop (1-12)**

(Credit to be arranged.)

**WLL 409 - Practicum (1-12)**

(Credit to be arranged.)

**WLL 410 - Selected Studies (1-12)**

(Credit to be arranged.)
WLL 438 - Language and Technology (4)
Examination of the communicative dynamics, cultures, and educational possibilities of digital environments as they are used in social, professional and world language education settings. Students will analyze and assess a variety of online environments for their own language learning or can choose to focus on research or pedagogical projects.
Also offered for graduate-level credit as WLL 538 and may be taken only once for credit. Prerequisite: Upper-division standing.

WLL 448 - Major Figures in World Literature (4)
Concentrated study of the canon of one or more major writers: for example, Dostoevsky, Cervantes, Goethe. Expected preparation: Sophomore Inquiry or 12 credits of literature. Conducted in English.

WLL 448U - Major Figures in World Literature (4)
Concentrated study of the canon of one or more major writers: for example, Dostoevsky, Cervantes, Goethe. Recommended prerequisite: Sophomore Inquiry or 12 credits of literature. Conducted in English.

WLL 449 - Major Topics in World Literature and Culture (4)
Study of the treatment of topics in one or more of the cultures of the world. Such topics as Europe as self and other, Don Juan, exile, the quest, outlaws and bandits, ghosts, fairies and gods. Expected preparation: Sophomore Inquiry or 12 credits of literature. Conducted in English.
Also offered for graduate-level credit as WLL 547 and may be taken only once for credit.

WLL 493 - Language Proficiency Testing and Teaching (4)
Application of proficiency standards in testing and teaching at the novice and intermediate levels. Introduction to ILR/ACTFL/ETS/FSI guidelines and compatible testing methods. Discussion of pragmatic issues: testing technique and test validity; use of teaching materials; logistics. Expected preparation: three years of a foreign language. Conducted in English.
Also offered for graduate-level credit as WLL 593 and may be taken only once for credit.

WLL 498 - Methods of Teaching Foreign Languages (4)
Study and analysis of various pedagogical theories as applied to the learning and teaching of foreign languages. Special emphasis on discourse and content analysis. Recommended for prospective language teachers. Expected preparation: three years of a foreign language. Conducted in English.
Also offered for graduate-level credit as WLL 598 and may be taken only once for credit.

WLL 501 - Research (1-9)
(Credit to be arranged.)

WLL 504 - Cooperative Education (1-12)
(Credit to be arranged.)

WLL 505 - Reading and Conference (1-12)
(Credit to be arranged.)

WLL 508 - Workshop (1-12)
(Credit to be arranged.)

WLL 509 - Practicum (1-12)
(Credit to be arranged.)

WLL 510 - Selected Studies (1-12)
(Credit to be arranged.)

WLL 538 - Language and Technology (4)
Examination of the communicative dynamics, cultures, and educational possibilities of digital environments as they are used in social, professional and world language education settings. Students will analyze and assess a variety of online environments for their own language learning or can choose to focus on research or pedagogical projects.
Also offered for undergraduate-level credit as WLL 438 and may be taken only once for credit.

WLL 549 - Major Topics in World Literature and Culture (4)
Study of the treatment of topics in one or more of the cultures of the world. Such topics as Europe as self and other, Don Juan, exile, the quest, outlaws and bandits, ghosts, fairies and gods. Expected preparation: Sophomore Inquiry or 12 credits of literature. Conducted in English.
preparation: Sophomore Inquiry or 12 credits of literature. Conducted in English.

Also offered for undergraduate-level credit as WLL 447 and may be taken only once for credit.

**WLL 560 - Principles of Scholarly Research (4)**

A theoretical and practical introduction to research methods and literary theory. Investigation of bibliographic materials, primary texts, secondary literature, and major forms of literary criticism. To be taken in first year of graduate study.

**WLL 593 - Language Proficiency Testing and Teaching (4)**

Application of proficiency standards in testing and teaching at the novice and intermediate levels. Introduction to ILR/ACTFL/ETS/FSI guidelines and compatible testing methods. Discussion of pragmatic issues: testing technique and test validity; use of teaching materials; logistics. Expected preparation: three years of a foreign language. Conducted in English.

Also offered for undergraduate-level credit as WLL 493 and may be taken only once for credit.

**WLL 598 - Methods of Teaching Foreign Languages (4)**

Study and analysis of various pedagogical theories as applied to the learning and teaching of foreign languages. Special emphasis on discourse and content analysis. Recommended for prospective language teachers. Expected preparation: three years of a foreign language. Conducted in English.

Also offered for undergraduate-level credit as WLL 498 and may be taken only once for credit.

**Wr - Writing**

**Wr 115 - Introduction to College Writing (4)**

Study and practice of college-level writing and reading, with focus on developing strategies for academic writing. Designed for students wanting preparation for WR 121 or Freshman Inquiry.

**Wr 121 - College Writing (4)**

Study and practice of critical writing, with focus on analyzing and adapting to different contexts. Designed as a foundation for college-level writing.

**Wr 199 - Special Studies (1-4)**

May be repeated for a maximum of 12 credits. See department for course description. (Credit to be arranged.)

**Wr 200 - Writing About Literature (4)**

Introduction to various approaches to writing about literature, with focus on explication, analysis, and research.

**Wr 210 - Grammar Refresher (2)**

Practical review of Standard Academic English, including parts of speech, sentence construction, and punctuation, with focus on self-evaluation and editing.

**Wr 211 - Writing Practice (4)**

Pursuit of advanced writing projects, with focus on writing processes, editorial response, and revision.

**Wr 212 - Introductory Fiction Writing (4)**

Introduces the beginning fiction writer to basic techniques of developing character, point of view, plot, and story idea in fiction. Includes discussion of student work. May be repeated for a total of 8 credits. Expected preparation: Freshman Inquiry.

**Wr 213 - Introductory Poetry Writing (4)**

Introduces the beginning writer of poetry to basic techniques for developing a sense of language, meter, sound, imagery, and structure. Includes discussion of professional examples and student work. May be repeated for a total of 8 credits. Expected preparation: Freshman Inquiry.

**Wr 214 - Introductory Nonfiction Writing (4)**

An introduction to writing with the major forms and techniques of literary nonfiction. Beginning with exercises in foundational skills such as description, reportage and the crafting of personal narrative, students will write and respond to short works of creative nonfiction. May be repeated for a total of 8 credits. Expected preparation: Freshman Inquiry or equivalent.
**Wr 222 - Writing Research Papers (4)**
Introduction to academic inquiry, with focus on evaluating and engaging with secondary research and on conventions for documentation.

**Wr 227 - Introductory Technical Writing (4)**
Practical experience in forms of technical communication, emphasizing basic organization and presentation of technical information. Focuses on strategies for analyzing the audience and its information needs. Recommended: Wr 121 or Freshman Inquiry.

**Wr 228 - Media Writing (4)**
An introductory course in media reporting and writing. Focus on identifying newsworthiness, writing leads, constructing news stories, interviewing, and attributing quotes. Students learn to gather local news, writing some stories in a computer lab on deadline. Expected preparation: Wr 121 or Freshman Inquiry. May be repeated once for a total of 8 credits.

**Wr 299 - Special Studies (1-4)**
(Credit to be arranged.)

**Wr 300 - Topics in Rhetoric and Composition (4)**
Study and practice of writing in different rhetorical contexts, with focus on critical analysis, generic conventions, and writing processes. Course may be repeated for credit with different topics for up to 8 credits. Up to 8 credits of this course number can be applied to the English major.

**Wr 301 - Critical Writing in English (4)**
This writing-intensive course extends the skills developed in Eng 300 by studying some selected theoretical and disciplinary approaches to literary and other texts (including literary and rhetorical theory), and by introducing students to research methods as a way of entering scholarly conversations.

**Wr 312 - Intermediate Fiction Writing (4)**
Builds on fictional techniques introduced in Wr 212, including variations on the classic plot, complex points of view, and conventions of genre. Emphasizes discussion of student work. May be repeated once for credit.

**Wr 313 - Intermediate Poetry Writing (4)**
Continues the study of poetry writing techniques introduced in Wr 213. Includes additional instruction in poetic forms, variations on traditional forms, and experimental forms. Emphasizes discussion of student work. May be repeated once for credit.

**Wr 323 - Writing as Critical Inquiry (4)**
Study and practice of writing and research in various contexts, with focus on pursuing critical questions and crafting rhetorical discourse.

**Wr 327 - Technical Report Writing (4)**
Prepares students for writing as professionals in engineering, scientific and other technical disciplines. Topics covered include technical and workplace genres of writing, such as proposals and reports, oral presentations, writing about and with data, effective language practices, writing collaboratively, and ethics.

**Wr 328 - Media Editing (4)**
Preparation of news and feature stories for publication. Emphasis is on line editing, copy editing, editorial troubleshooting, headline writing, layout, and integration with multimedia.
Prerequisite: Wr 228.

**Wr 330 - Desktop Publishing I (4)**
Integrates writing, design, and visual communication with computer technology, with emphasis on preparing students to produce a variety of shorter products combining writing and design elements.

**Wr 331 - Book Publishing for Writers (4)**
Provides an overview of the book publishing process, organized around the division of labor typically found in publishing houses. Through readings, discussion, and participation in mock publishing companies, students learn about editorial, design, production, marketing, distribution, and sales.

**Wr 333 - Advanced Essay Writing (4)**
Study and practice of the essay genre across creative and critical contexts.
Wr 333H - Advanced Composition

Wr 394 - Careers for English Majors (4)
Exploration of potential career paths for English majors, including (but not limited to) writing, editing, and teaching in various contexts. Students will participate in professional development activities according to their interests.

Wr 398 - Topics: Writing Comics (4)
Study and practice of creating comics and graphic narratives in a variety of genres, with a focus on form and process. Course may be repeated for credit with different topics for up to 8 credits. Up to 8 credits of this course number can be applied to the English major.

Wr 399 - Special Studies (1-5)
See department for course description. (Credit to be arranged.)

Wr 400 - Advanced Topics in Composition (4)
Advanced study of writing theory and practice, with focus on rhetoric, genre, and process. Course may be repeated for credit with different topics for up to 8 credits. Up to 8 credits of this course number can be applied to the English major.
Also offered for graduate-level credit as Wr 500.
Prerequisite: Upper-division standing.

Wr 402 - Independent Study (1-12)
(Credit to be arranged.)

Wr 403 - Thesis (1-12)
(Credit to be arranged.)

Wr 404 - Cooperative Education/Internship (1-12)
See department for course description. (Credit to be arranged.)

Wr 405 - Writing and Conference (1-6)
Consent of instructor. See department for course description. (Credit to be arranged.)

Wr 407 - Writing Seminar (1-6)
Consent of instructor. See department for course description. (Credit to be arranged.)

Wr 410 - Selected Topics in Writing (0-6)
See department for course description. (Credit to be arranged.)

Wr 411 - Internship (1-4)
Students apply their academic training and skills in the workforce, further developing those skills and learning new skills in the process. Students develop a better understanding of the value to employers of their education in literature, writing, and/or publishing. Integrating an internship with reflection and professional development enhances the experience.
Also offered for graduate-level credit as Wr 511.
Prerequisite: Permission of instructor.

Wr 412 - Advanced Fiction Writing (4)
Students can expect to write longer and more ambitious works of fiction, while exploring a variety of technical problems and other questions emerging from class discussion. Course may be repeated once for credit.
Prerequisite: "B" or higher in Wr 312, or consent of instructor based on a writing sample.

Wr 413 - Advanced Poetry Writing (4)
Students can expect to explore a variety of demanding technical problems and to experiment with poetic voices. Course may be repeated once for credit.
Prerequisite: "B" or higher in Wr 313, or consent of instructor based on a writing sample.

Wr 416 - Screenwriting (4)
Students will be introduced to the process of conceiving, structuring, writing, rewriting, and marketing a screenplay for the contemporary American marketplace. "Screenplay paradigms" will be discussed, and a variety of movies will be analyzed. May be repeated for credit.
Also offered for graduate-level credit as Wr 516.

Wr 420 - Writing Studio (4)
Pursuit of advanced writing projects, with focus on process, response, reflection, and revision. Course may be repeated for credit with different topics. Up to 8 credits of this course number can be applied to the English major.
Also offered for graduate-level credit as Wr 520.
Prerequisite: Upper-division standing.

Wr 424 - Grant Writing for Professional Writers (4)
Introduces students training for careers as professional writers to the best practices in writing grants and managing the grant writing process across multiple sectors of the non-profit world and in academia. Students will work collaboratively and individually to develop business plans, identify potential funding sources, and begin preparing grants.

Also offered for graduate-level credit as Wr 524 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 425 - Advanced Technical Writing
Study and practice of foundational ways of thinking and professional skills for students planning to pursue a role or a career as a technical writer across a variety of industries and disciplines, including technology, health, engineering, science, manufacturing, and non-profits. Course topics include audience analysis, writing and editing in plain language for diverse audiences, common genres, ethics, collaborative writing, and project management. Students author individual and collaborative projects for a personal or program professional portfolio.

Also offered for graduate-level credit as Wr 525 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 426 - Document Design (4)
Document planning, creation, and revision, including discussion of the use and abuse of language in business, government, insurance, and law. Students will consider general strategies for document production; analyze different document styles; address questions of target audience; evaluate documents for readability and efficiency; and study the Plain English Movement and its legislative and legal implications.

Also offered for graduate-level credit as Wr 526 and may be taken only once for credit.

Wr 427 - Technical Editing (4)
Gives technical writers practice in technical editing by exposing them to samples of a variety of documents from the files of organizations in the surrounding community. As a community based learning course, it requires students to interact with community partners in collaborative student teams. May be repeated for a maximum of 8 credits.

Also offered for graduate-level credit as Wr 527.

Wr 428 - Advanced Media Writing (4)
Building on the journalism skills learned in Media Writing and Media Editing, students use Portland to cover and write stories from community sources. Students are also introduced to reporting on a regular basis from news beats of their choosing. Expected preparation: Wr 328.

Also offered for graduate-level credit as Wr 528 and may be taken only once for credit. Prerequisite: Wr 228.

Wr 429 - Writing Computer Documentation (4)
Develop skills in writing computer documentation, primarily user manuals and system specifications. Focuses on analyzing informational needs of the audience, and defining and explaining computer terms and concepts for non-technical and semi-technical audiences. Expected preparation: Wr 327, ISQA 111 or CS 105 or equivalent, word processing skills.

Also offered for graduate-level credit as Wr 529 and may be taken only once for credit.

Wr 430 - Desktop Publishing II (4)
Builds from the foundation in Desktop Publishing I to explore further the skills needed to produce publications in the computer age. Topics include typography, page layout, photography, and informational graphics, with a special emphasis on hands-on project production of a 12-page newsletter or magazine.

Also offered for graduate-level credit as Wr 530 and may be taken only once for credit.

Wr 431 - Advanced Topics in Technical Writing Technologies (4)
An introduction to a contemporary technology used by technical writers in industry. Students will produce a portfolio project to demonstrate proficiency in the technology. Students will also learn general strategies for learning new technologies as part of a professional practice. This course is repeatable for up to 16 credits.

Also offered for graduate-level credit as Wr 531. Prerequisite: Upper-division standing.

Wr 432 - Frameworks for Technical Writing (4)
Introduces students to the many frameworks for understanding the fundamental questions that shape technical writing as a practice in industry and as a field of academic study, such as rhetoric, ethics, or social justice. Students will choose a framework to analyze and respond to a technical writing problem or situation of their choice and produce a portfolio to share findings.
Also offered for graduate-level credit as Wr 532 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 433 - Research Methods for Technical Writers (4)
Introduces students to the research methods commonly practiced by professional technical writers. These methods include interviewing subject-matter experts, researching genre conventions, user research, website content analysis, and usability testing. Students will practice methods via client-projects with local community partners, so the methods taught in any given section of the course will be shaped by the needs of the client-project. Students will produce professional-quality project deliverables for the client and the program portfolio. Also offered for graduate-level credit as Wr 533 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 435 - Grammar for Writers (4)
Study and practice of contemporary English grammar and usage, with focus on the relationship between stylistic choices and their rhetorical effects. Also offered for graduate-level credit as Wr 535 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 456 - Forms of Nonfiction (4)
Explores various forms of nonfiction, including essay, personal essay, reviewing, immersion journalism, and memoir, with practice writing in each. Also offered for graduate-level credit as Wr 556 and may be taken only once for credit. Prerequisite: Wr 214 or Wr 228. Instructor approval required.

Wr 457 - Personal Essay Writing (4)
The history and contemporary use of personal essay as a mode of creative communication; gives an understanding of and practice in this kind of writing. Also offered for graduate-level credit as Wr 557 and may be taken only once for credit. Prerequisite: Wr 214 or Wr 228. Instructor approval required.

Wr 458 - Magazine Writing (4)
Examines the development of both long- and short-form magazine pieces, as well as the business and economics of magazine publishing. Students write and peer-critique articles in the styles and formats of a variety of publications and magazine departments. Also offered for graduate-level credit as Wr 558 and may be taken only once for credit. Prerequisite: Wr 214 or Wr 228. Instructor approval required.

Wr 459 - Memoir Writing (4)
Concentrates on elements necessary for writing successful personal narrative, including structure, tone/voice, dialogue, characterization, tense, and point-of-view. Memoirs will be read and discussed, and students will turn in several pieces over the course of the term for workshop discussion. Also offered for graduate-level credit as Wr 559 and may be taken only once for credit. Prerequisite: Wr 214 or Wr 228. Instructor approval required.

Wr 460 - Introduction to Book Publishing (4)
Provides a detailed overview of the publishing process, organized around the division of labor, including introductions to contemporary American publishing, issues of intellectual commerce, copyright law, publishing contracts, book editing, book design and production, book marketing and distribution, and bookselling. Based on work in mock publishing companies, students prepare portfolios of written documents, i.e., book proposals, editorial guidelines, design and production standards, and marketing plans. Guest speakers from the publishing industry and field trips provide exposure to the industry. Also offered for graduate-level credit as Wr 560 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 461 - Book Editing (4)
Provides a comprehensive course in professional book editing, including editorial management, acquisitions editing, substantive/developmental editing, and copyediting. Issues specific to both fiction and nonfiction books will be covered. Also offered for graduate-level credit as Wr 561 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 462 - Book Design Software (4)
Comprehensive course in professional book design and production. Issues specific to the design of fiction and nonfiction books in a variety of genres and markets will be covered, including the applications of both old and new technologies in design and production. Also offered for graduate-level credit as Wr 562 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 463 - Book Marketing (4)
Comprehensive course in professional book marketing. Issues specific to the marketing of fiction/ nonfiction books in a variety of genres and markets will be covered. Students will do market research,
produce marketing plans, write press releases, write advertising copy, and develop related marketing materials.

Also offered for graduate-level credit as WR 563 and may be taken only once for credit. Prerequisite: Upper-division standing.

**WR 464 - Business of Book Publishing (4)**

Comprehensive course in the business of book publishing. Topics covered include publications management, accounting, book production, distribution, and bookselling. Students learn how a variety of agents, including publishers, publishing services companies, distributors, wholesalers, bookstores, etc., are organized.

Also offered for graduate-level credit as WR 564 and may be taken only once for credit. Prerequisite: WR 460.

**WR 465 - Intellectual Property and Copyright (4)**

Outlines opportunities and pitfalls faced by writer (editor, graphic designer, artist) in legal and ethical spheres. Copyright law, U.S. First Amendment law, defamation, right of privacy, trademark, trade secret law. Discusses the importance of the Internet in rethinking copyright and intellectual property rules.

Also offered for graduate-level credit as WR 565 and may be taken only once for credit. Prerequisite: Upper-division standing.

**WR 466 - Digital Skills (4)**

Gives hands-on training in digital skills and surveys developmental trends in writing in computational environments: webpages, computer programs, word processing programs, multimodal essays. Learn core principles and methods of web design, web management, media history, and present-day uses of authoring software. Assess scholarly articles about writing and reading in computational environments.

Also offered for graduate-level credit as WR 566 and may be taken only once for credit. Prerequisite: Upper-division standing.

**WR 471 - Typography, Layout, and Production (4)**

Comprehensive course in professional book design and production. Issues specific to the design of fiction and nonfiction books in a variety of genres and markets will be covered.

Also offered for graduate-level credit as WR 571 and may be taken only once for credit. Prerequisite: WR 462.

**WR 472 - Copyediting (4)**

Learn how to improve the clarity, coherency, consistency, and correctness of other people’s writing through application of grammatical and stylistic guidelines. Study grammar, usage, punctuation, and style. Narrow focus on editing at the line and substantive level, with little to no attention given to broad development of a manuscript.

Also offered for graduate-level credit as WR 572 and may be taken only once for credit. Prerequisite: WR 461.

**WR 473 - Developmental Editing (4)**

Explores the relationship between an editor, a writer, and the work in the process of developmental editing—also known as global, substantive, or comprehensive editing. Examines historically significant editor/author relations, how the editorial process and relationships have changed over time, and how editorial expectations shift based on the expectations of the publisher, the constantly changing global marketplace, and the introduction of new technologies.

Also offered for graduate-level credit as WR 573 and may be taken only once for credit. Prerequisite: WR 461.

**WR 474 - Publishing Studio (4)**

Perform the work of a real publishing house, from acquiring manuscripts to selling books. Gain publishing experience by participating in the various departments of a student-staffed publishing house, Ooligan Press. Departments include Acquisitions, Editing, Design and Sustainable Production, Marketing, External Promotions, Sales, Digital Content, Social Media, and Project Management and Operations. Course may be repeated multiple times.

Also offered for graduate-level credit as WR 574. Prerequisite: WR 475.

**WR 475 - Publishing Lab (1)**

Perform the work of a real publishing house, from acquiring manuscripts to selling books. Gain publishing experience by participating in the various departments of a student-staffed publishing house, Ooligan Press. Departments include Acquisitions, Editorial, Design, Marketing and Sales, Digital, and Social Media. Course may be taken multiple times for credit.

Also offered for graduate-level credit as WR 575. Prerequisite: Upper-division standing.

**WR 476 - Publishing for Young Adults (4)**

Study the techniques commonly deployed by writers and publishers of young adult and middle grade literature.

Also offered for graduate-level credit as WR 576 and may be taken only once for credit.
Wr 477 - Children’s Book Publishing (4)
Study the techniques commonly used by writers and publishers of children’s literature.
Also offered for graduate-level credit as Wr 577 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 478 - Digital Marketing for Book Publishers (4)
This course examines the contexts and impacts of digital book marketing on the book industry, authors, and readers.
Also offered for graduate-level credit as Wr 578 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 480 - Advanced Book Design (4)
Builds upon the Adobe InDesign, Photoshop, Illustrator, and Acrobat skills that students developed in WR 462/562 Book Design Software and further applied in WR 471/571 Typography, Layout, and Design. This class utilizes hands-on design projects that incorporate more advanced book design skills in terms of workflow, indexing, illustrations, visual data representations, etc.
Also offered for graduate-level credit as Wr 580 and may be taken only once for credit. Prerequisite: Wr 471.

Wr 481 - Ebook Production (4)
Ebook Production teaches the hands-on skills of digital publishing. The course will build on an established understanding of basic text-based languages like HTML, CSS, and XML. Students will be introduced to new tools like iBooks Author, oXygen, and Sigil.
Also offered for graduate-level credit as Wr 581 and may be taken only once for credit. Prerequisite: Upper-division standing.

Wr 500 - Advanced Topics in Composition (4)
Advanced study of writing theory and practice, with focus on rhetoric, genre, and process. Course may be repeated for credit with different topics for up to 8 credits.
Also offered for undergraduate-level credit as Wr 400.

Wr 501 - Research (1-12)
(Credit to be arranged.)

Wr 502 - Independent Study (1-6)
(Credit to be arranged.)

Wr 503 - Thesis (1-12)
(Credit to be arranged.)

Wr 504 - Cooperative Education/Internship (1-9)
See department for course description. (Credit to be arranged.)

Wr 505 - Writing and Conference (1-6)
Consent of instructor. See department for course description. (Credit to be arranged.)

Wr 506 - Special Projects (1-8)
(Credit to be arranged.)

Wr 507 - Writing Seminar (1-6)
Consent of instructor. See department for course description. (Credit to be arranged.)

Wr 509 - Practicum (1-9)

Wr 510 - Selected Topics in Writing (0-6)
See department for course description. (Credit to be arranged.)

Wr 511 - Internship (1-4)
Students apply their academic training and skills in the workforce, further developing those skills and learning new skills in the process. Students develop a better understanding of the value to employers of their education in literature, writing, and/or publishing. Integrating an internship with reflection and professional development enhances the experience.
Also offered for undergraduate-level credit as Wr 411. Prerequisite: Permission of instructor.

Wr 512 - Graduate Fiction Writing (4)
Students will further refine their skills by writing longer and more ambitious works of fiction, as well as confront a variety of technical problems emerging from class discussion.
Wr 513 - Fiction Writing (4)
An intensive course for writers who are currently embarked on a project involving the writing of fiction, whether short story, novella, or novel. Recommended prerequisites: Wr 212, 312, 412 or their equivalents. Consent of instructor required.

Wr 514 - Graduate Poetry Writing (4)
Within a workshop format of writing, revising, critiquing and reading, students will strengthen their writing skills, and their understanding of how poems work. May be repeated once for credit.

Wr 515 - Poetry Writing II (4)
Advanced poetry writing at the graduate level. Builds on Wr 514, assumes students will submit their work for publication. Traditional workshop format in which students write, revise, and respond to the poems of others. May be repeated for credit. Recommended prerequisite: Wr 514.

Wr 516 - Screenwriting (4)
Students will be introduced to the process of conceiving, structuring, writing, rewriting, and marketing a screenplay for the contemporary American marketplace. "Screenplay paradigms" will be discussed, and a variety of movies will be analyzed. May be repeated for credit.

Wr 520 - Writing Studio (4)
Pursuit of advanced writing projects, with focus on process, response, reflection, and revision. Course may be repeated for credit with different topics.

Wr 521 - MFA Core Workshop in Fiction (4)
The MFA Core Workshop in Fiction focuses on the writing, revision, and critical discussion of student short stories and chapters from novels. Students' critical analyses of their peers' work are informed by their study of published fiction in the texts, supplemented by lectures clarifying technical strategies in the writing of fiction. May be taken up to six times for credit. This course is restricted to graduate students admitted to the Writing Program (Fiction).

Wr 522 - MFA Core Workshop in Poetry (4)
The MFA Core Workshop in Poetry focuses on the writing, revision, and critical discussion of student poems. Students' verbal and written critical analyses of their peers' work are informed by their reading of published poems representing a range of formal strategies and historical and cultural contexts, and by their reading in prosody and poetics. May be taken up to six times for credit. This course is restricted to graduate students admitted to the Writing Program (Poetry).

Wr 523 - MFA Core Workshop in Nonfiction (4)
The MFA Core Workshop in Nonfiction concentrates on elements necessary for writing successful nonfiction prose—including structure, voice, dialog, characterization, and point-of-view—with a primary emphasis on the in-class workshop and peer review of student pieces. Nonfiction models, both short pieces and book-length, will be read and discussed, and students will write critical responses regarding those models. May be taken up to six times for credit. This course is restricted to graduate students admitted to the Writing Program (Nonfiction).

Wr 524 - Grant Writing for Professional Writers (4)
Introduces students training for careers as professional writers to the best practices in writing grants and managing the grant writing process across multiple sectors of the non-profit world and in academia. Students will work collaboratively and individually to develop business plans, identify potential funding sources, and begin preparing grants.

Wr 525 - Advanced Technical Writing (4)
Study and practice of foundational ways of thinking and professional skills for students planning to pursue a role or a career as a technical writer across a variety of industries and disciplines, including technology, health, engineering, science, manufacturing, and non-profits. Course topics include audience analysis, writing and editing in plain language for diverse audiences, common genres, ethics, collaborative writing, and project management. Students author individual and collaborative projects for a personal or program professional portfolio.

Also offered for undergraduate-level credit as Wr 424 and may be taken only once for credit.

Also offered for undergraduate-level credit as Wr 425 and may be taken only once for credit.
Wr 526 - Document Design (4)

Document planning, creation, and revision, including discussion of the use and abuse of language in business, government, insurance, and law. Students will consider general strategies for document production; analyze different document styles; address questions of target audience; evaluate documents for readability and efficiency; and study the Plain English Movement and its legislative and legal implications.

Also offered for undergraduate-level credit as Wr 426 and may be taken only once for credit.

Wr 527 - Technical Editing (4)

Gives technical writers practice in technical editing by exposing them to samples of a variety of documents from the files of organizations in the surrounding community. As a community-based learning course, it requires students to interact with community partners in collaborative student teams. May be repeated for a maximum of 8 credits.

Also offered for undergraduate-level credit as Wr 427.

Wr 528 - Advanced Media Writing (4)

Building on the journalism skills learned in Media Writing and Media Editing, students use Portland to cover and write stories from community sources. Students are also introduced to reporting on a regular basis from news beats of their choosing.

Also offered for undergraduate-level credit as Wr 428 and may be taken only once for credit.

Wr 529 - Writing Computer Documentation (4)

Develop skills in writing computer documentation, primarily user manuals and systems specifications. Focuses on analyzing informational needs of the audience, and defining and explaining computer terms and concepts for non-technical and semi-technical audiences. Expected preparation: Wr 327, ISQA 111 or CS 105 or equivalent, word processing skills.

Also offered for undergraduate-level credit as Wr 429 and may be taken only once for credit.

Wr 530 - Desktop Publishing II (4)

Builds from the foundation in Desktop Publishing I to explore further the skills needed to produce publications in the computer age. Topics include typography, page layout, photography, and informational graphics, with a special emphasis on hands-on project production of a 12-page newsletter or magazine.

Also offered for undergraduate-level credit as Wr 430 and may be taken only once for credit.

Wr 531 - Advanced Topics in Technical Writing Technologies (4)

An introduction to contemporary technology used by writers in industry. Students will produce a portfolio project to demonstrate proficiency in the technology. Students will also learn general strategies for learning new technologies as part of a professional practice. This course is repeatable for up to 16 credits.

Also offered for undergraduate-level credit as Wr 431.

Wr 532 - Frameworks for Technical Writing (4)

Introduces students to the many frameworks for understanding the fundamental questions that shape technical writing as a practice in industry and as a field of academic study, such as rhetoric, ethics, or social justice. Students will choose a framework to analyze and respond to a technical writing problem or situation of their choice and produce a portfolio to share findings.

Also offered for undergraduate-level credit as Wr 432 and may be taken only once for credit.

Wr 533 - Research Methods for Technical Writers (4)

Introduces students to the research methods commonly practiced by professional technical writers. These methods include interviewing subject-matter experts, researching genre conventions, user research, website content analysis, and usability testing. Students will practice methods via client-projects with local community partners, so the methods taught in any given section of the course will be shaped by the needs of the client-project. Students will produce professional-quality project deliverables for the client and the program portfolio.

Also offered for undergraduate-level credit as Wr 433 and may be taken only once for credit.

Wr 535 - Grammar for Writers (4)

Study and practice of contemporary English grammar and usage, with focus on the relationship between stylistic choices and their rhetorical effects.

Also offered for undergraduate-level credit as Wr 435 and may be taken only once for credit. Prerequisite: Senior or graduate status.

Wr 556 - Forms of Nonfiction (4)

Explores various forms of nonfiction, including essay, personal essay, reviewing, immersion journalism, and memoir, with practice writing in each.
Also offered for undergraduate-level credit as Wr 456 and may be taken only once for credit. Prerequisite: Wr 214 or Wr 228. Instructor approval required.

**Wr 557 - Personal Essay Writing (4)**
The history and contemporary use of personal essay as a mode of creative communication; gives an understanding of and practice in this kind of writing.

Also offered for undergraduate-level credit as Wr 457 and may be taken only once for credit.

**Wr 558 - Magazine Writing (4)**
Examines the development of both long- and short-form magazine pieces, as well as the business and economics of magazine publishing. Students write and peer-critique articles in the styles and formats of a variety of publications and magazine departments.

Also offered for undergraduate-level credit as Wr 458 and may be taken only once for credit.

**Wr 559 - Memoir Writing (4)**
Concentrates on elements necessary for writing successful personal narrative, including structure, tone/voice, dialogue, characterization, tense, and point-of-view. Memoirs will be read and discussed, and students will turn in several pieces over the course of the term for workshop discussion.

Also offered for undergraduate-level credit as Wr 459 and may be taken only once for credit. Prerequisite: Wr 214 or Wr 228. Instructor approval required.

**Wr 560 - Introduction to Book Publishing (4)**
Provides a detailed overview of the publishing process, organized around the division of labor, including introductions to contemporary American publishing, issues of intellectual commerce, copyright law, publishing contracts, book editing, book design and production, book marketing and distribution, and bookselling. Based on work in mock publishing companies, students prepare portfolios of written documents, i.e., book proposals, editorial guidelines, design and production standards, and marketing plans. Guest speakers from the publishing industry and field trips provide exposure to the industry.

Also offered for undergraduate-level credit as Wr 460 and may be taken only once for credit.

**Wr 561 - Book Editing (4)**
Provides a comprehensive course in professional book editing, including editorial management, acquisitions editing, substantive/developmental editing, and copyediting. Issues specific to both fiction and nonfiction books will be covered.

Also offered for undergraduate-level credit as Wr 461 and may be taken only once for credit.

**Wr 562 - Book Design Software (4)**
Provides a strong foundation in design software used in the book publishing industry, focusing on Adobe InDesign. Also explores Adobe Photoshop, Illustrator, and Acrobat, as well as XHTML and e-book design. The class considers audience expectations through a range of hands-on design projects.

Also offered for undergraduate-level credit as Wr 462 and may be taken only once for credit.

**Wr 563 - Book Marketing (4)**
Comprehensive course in professional book marketing. Issues specific to marketing of fiction and nonfiction books in variety of genres and markets will be covered. Students will do market research, produce marketing plans, write press releases, write advertising copy, and develop related marketing materials.

Also offered for undergraduate-level credit as Wr 463 and may be taken only once for credit.

**Wr 564 - Business of Book Publishing (4)**
Comprehensive course in the business of book publishing. Topics covered include publications management, accounting, book production, distribution, and bookselling. Students learn how a variety of agents, including publishers, publishing services companies, distributors, wholesalers, bookstores, etc., are organized and function in the marketplace.

Also offered for undergraduate-level credit as Wr 464 and may be taken only once for credit.

**Wr 565 - Intellectual Property and Copyright (4)**
Outlines opportunities and pitfalls faced by writer (editor, graphic designer, artist) in legal and ethical spheres. Copyright law, U.S. First Amendment law, defamation, right of privacy, trademark, trade secret law. Discusses the importance of the Internet in rethinking copyright and intellectual property rules.

Also offered for undergraduate-level credit as Wr 465 and may be taken only once for credit.

**Wr 566 - Digital Skills (4)**
Gives hands-on training in digital skills and surveys developmental trends in writing in computational environments: webpages, computer programs, word processing programs, multimodal essays. Learn core principles and methods of web design, web management, media history, and present-day uses of authoring software. Assess scholarly articles about writing and reading in computational environments.
Also offered for undergraduate-level credit as Wr 466 and may be taken only once for credit.

**Wr 571 - Typography, Layout, and Production (4)**

Comprehensive course in professional book design and production. Issues specific to the design of fiction and nonfiction books in a variety of genres and markets will be covered.

Also offered for undergraduate-level credit as Wr 471 and may be taken only once for credit. Prerequisite: Wr 562.

**Wr 572 - Copyediting (4)**

Learn how to improve the clarity, coherency, consistency, and correctness of other people’s writing through application of grammatical and stylistic guidelines. Study grammar, usage, punctuation, and style. Narrow focus on editing at the line and substantive level, with little to no attention given to broad development of a manuscript.

Also offered for undergraduate-level credit as Wr 472 and may be taken only once for credit. Prerequisite: Wr 561.

**Wr 573 - Developmental Editing (4)**

Explores the relationship between an editor, a writer, and the work in the process of developmental editing—also known as global, substantive, or comprehensive editing. Examines historically significant editor/author relations, how the editorial process and relationships have changed over time, and how editorial expectations shift based on the expectations of the publisher, the constantly changing global marketplace, and the introduction of new technologies.

Also offered for undergraduate-level credit as Wr 473 and may be taken only once for credit. Prerequisite: Wr 561.

**Wr 574 - Publishing Studio (4)**

Perform the work of a real publishing house, from acquiring manuscripts to selling books. Gain publishing experience by participating in the various departments of a student-staffed publishing house, Ooligan Press. Departments include Acquisitions, Editorial, Design, Marketing and Sales, Digital, and Social Media. May be taken multiple times for credit.

Also offered for undergraduate-level credit as Wr 474 and may be taken only once for credit. Prerequisite: Wr 575.

**Wr 575 - Publishing Lab (1)**

Perform the work of a real publishing house, from acquiring manuscripts to selling books. Gain publishing experience by participating in the various departments of a student-staffed publishing house, Ooligan Press. Departments include Acquisitions, Editorial, Design, Marketing and Sales, Digital, and Social Media. May be taken multiple times for credit.

Also offered for undergraduate-level credit as Wr 475 and may be taken only once for credit.

**Wr 576 - Publishing for Young Adults (4)**

Study the techniques commonly deployed by writers and publishers of young adult and middle grade literature.

Also offered for undergraduate-level credit as Wr 476 and may be taken only once for credit.

**Wr 577 - Children's Book Publishing (4)**

Study the techniques commonly used by writers and publishers of children’s literature.

Also offered for undergraduate-level credit as Wr 477 and may be taken only once for credit.

**Wr 578 - Digital Marketing for Book Publishers (4)**

This course examines the contexts and impacts of digital book marketing on the book industry, authors, and readers.

**Wr 579 - Researching Book Publishing (4)**

Students will learn about book publishing research methods (both qualitative and quantitative) and work through various stages of their final research paper for the culmination of the Book Publishing Master's Program. This course may be repeated once for credit.

**Wr 580 - Advanced Book Design (4)**

Builds upon the Adobe InDesign, Photoshop, Illustrator, and Acrobat skills that students developed in WR 462/562 Book Design Software and further applied in WR 471/571 Typography, Layout, and Design. This class utilizes hands-on design projects that incorporate more advanced book design skills in terms of workflow, indexing, illustrations, visual data representations, etc.

Also offered for undergraduate-level credit as Wr 480 and may be taken only once for credit. Prerequisite: Wr 571.

**Wr 581 - Ebook Production (4)**

Ebook Production teaches the hands-on skills of digital publishing. The course will build on an established understanding of basic text-based
languages like HTML, CSS, and XML. Students will be introduced to new tools like iBooks Author, oXygen, and Sigil.

Also offered for undergraduate-level credit as Wr 481 and may be taken only once for credit. Prerequisite: Wr 562.

**WS - Women's Studies**

**WS 101 - Introduction to Women's Studies (4)**

An overview of a range of topics from both a contemporary and historic feminist lens. Emphasizes an intersectional critical analysis of how various issues impact individuals and communities. Comprehensive introduction to feminist perspectives, expanding students’ awareness of resistance to systems of oppression and resulting structural and social change.

**WS 120 - Workshop for Returning Women (4)**

Designed for those who have experienced an interruption in their formal education. Examines the educational history of American women. Analyzes the ways in which the roles, status, and experiences of women affect educational decisions and performance. Includes the development of skills and self-confidence in studying, writing, research, examinations, time management, mathematics and science. Credit cannot be used to satisfy certificate requirements.

**WS 199 - Special Studies (0-12)**

A variable topics course dealing with contemporary and historical issues in feminism. Recent offerings have included History of Women Artists and History of Women in Science. WS 199 is also available for students who wish to pursue directed independent study.

**WS 260 - Introduction to Women's Literature (4)**

Study of literature written by and about women across historical periods and genres. This is the same course as Eng 260 and may be taken only once for credit.

**WS 299 - Special Studies (1-4)**

(Credit to be arranged.)

**WS 301 - Gender and Critical Inquiry (4)**

Engages students with a range of feminist theoretical perspectives that conceptualize gender and the intersectional factors (such as race, sexuality, indigeneity, class, ability) implicated in it. Addresses feminist knowledge production, agency, and power relations. Emphasis on the development of close reading and critical analysis using a range of sources and approaches.

Prerequisite: WS 101 or UnSt 231 or permission of instructor.

**WS 305 - Women of Color Feminist Theory (4)**

Examines the development and foundational approaches of women of color feminist theories, including scholarship and activism, through an intersectional lens in both national and transnational contexts.

Prerequisite: WS 101 or UnSt 231.

**WS 306U - Global Gender Issues (4)**

Study of gender issues in a global framework. Course will focus on a theme that can be studied comparatively, such as women and the environment; race, gender and food justice; public policy and gender. Topic may also highlight a particular country or national/ethnic group. This course may be repeated with different topics.

**WS 307 - Resistance, Activism, and Social Change (4)**

Focuses on activism of self-identified feminists as they resist and transform oppression. Emphasizes queer and feminist activism aligned with other social movements. Examines activists' strategies, tactics, organizations, goals, accomplishments, and unmet challenges. Topics may include reproductive justice, labor organizing, queer political movements, indigenous and transnational liberation movements, or climate justice.

Prerequisite: WS 101 or UnNSt 231.

**WS 308U - Topics in Gender, Literature, and Popular Culture (4)**

Explores media, popular culture, and/or literature from a feminist perspective which focuses on how gender and other dimensions of power relations are expressed, reproduced, and challenged within cultural expression. Topics may include gender and popular music; girls’ studies through media; class and gender in contemporary literature; depictions of masculinities in films/television; gender and the internet/social networking. This course may be repeated with different topics.
WS 309 - Disney: Gender, Race, and Empire (4)
Explores construction of gender, race, and empire in the animated films of Disney. Examines the content of Disney films created within particular historical and cultural contexts in order to understand cultural production in relation to intersections of racism, sexism, colonialism, and imperialism.

WS 310U - Psychology of Women (4)
Review and evaluate assumptions underlying psychological research on women. Survey the research in areas such as the development of sex differences, acquisition of gender roles, and maintenance of gender stereotypes. Explore the pertinence of these findings to topical areas such as women's work roles, women and mental health, and the women's movement. Recommended prerequisite: 3 credits in psychology.

WS 312U - Feminist Philosophy (4)
Critically examines traditional schools of philosophical thinking from a feminist perspective. Recommended prerequisite: one philosophy course from other than Phl 103, 104, 206.

WS 315 - Feminist Analysis (4)
An advanced feminist theory course exploring a range of theoretical frameworks and research strategies utilized in contemporary feminist scholarship, including debates within feminism. Draws on approaches from several disciplines to define key features of feminist analysis, apply feminist theoretical approaches to current issues, and build a theoretical analysis.
Prerequisite: WS 301 or WS 305.

WS 317U - Writing as Activism (4)
Students will work intensively to develop activist writing projects individually and in collaboration with others. Investigate a variety of forms and sources of activist writing, generate new writing in weekly writing workshops, serve as writing partners/coaches with each other, and work cooperatively to complete community-based, writing-involved activist projects.

WS 320U - Introduction to Girls' Studies (4)
An overview of the field of girls' studies in the U.S., including the ways definitions of girlhood change depending on contexts of race, class, ethnic or national identity, gender identity and sexual orientation. Explores gendered ideals and negotiations of girlhood, concepts of girls' empowerment, theory and research methods.

WS 330U - Women of Color in the United States (4)
A variable topics course focusing on issues which affect women of color in the United States, historically and today.

WS 331U - Women in the Middle East (4)
Aims to explore the role and status of women in the contemporary Middle East with respect to institutions such as the family, law, education, work and politics --areas which intersect and overlap with broader cultural questions about women and their place in tradition, modernity, nation-building, Islam and the West. This course is the same as Intl 331U and may only be taken once for credit.
Cross-Listed as: Intl 331U.

WS 332U - Race, Class, Gender, and Sexuality in the United States (4)
Examines the ways in which race, class, gender, and sexuality are conceptualized and represented in contemporary U.S. culture and society; investigates the institutions, practices, and discourses that comprise notions of race, class, gender, and sexuality in the United States and how these social categories shape and are shaped by one another.

WS 337U - Communication and Gender (4)
An examination of similarities and differences in male and female communication styles and patterns. Particular attention given to the implications of gender as social construct upon perception, values, stereotyping, language use, nonverbal communication, and power and conflict in human relationships. Discussion of influence of mass communication upon shaping and constructing male and female roles.

WS 340U - Women and Gender in America to 1848 (4)
Surveys the history of women in the middle North American continent to 1848. It highlights the experiences of and relationships among women of diverse origins, especially Native women, African women, and European women. Key themes include...
family, kinship, and sex-gender systems; colonialism and slavery; religious life; politics and the law; nation-building and the rise of modern citizenship. Recommended prerequisite: upper division standing.

**WS 341U - Women and Gender in America 1848-1920 (4)**
Explores the diverse experiences of women in the United States between 1848 and 1920. Key themes include slavery, emancipation, and Reconstruction; colonialism and resistance; women's rights and social reform; education and wage labor; immigration/migration; and Victorianism and sexual modernism. Recommended prerequisite: upper division standing.

**WS 342U - Women and Gender in the U.S. 1920 to the Present (4)**
Surveys women's lives and gender change in recent U.S. history. Among our themes will be women in politics, the work force, and social movements as well as changes in family life, gender identities, and sexuality. Women's roles in globalization, the media, and popular culture will figure throughout. Recommended prerequisite: upper division standing.

**WS 343U - American Family History (4)**
History of the American family from the colonial period to the present. The course will draw upon textual sources and oral histories in examining changes in families in the colonial period, and the nineteenth and twentieth centuries. Recommended prerequisite: Hst 201, 202, Sophomore Inquiry (American Studies), or consent of instructor.

**WS 344U - Queer Ecologies (4)**
Applies intersectional queer theories to concepts of nature and the environment, to investigate how gender and sexualities have been central in defining what counts as "natural" for people, places, and practices. Explores how gender and sexualities intersect with colonialism, disability, race, social class, and other categories through social and scientific approaches to nature and what is considered "natural" in human/non-human ecosystems.

**WS 346U - Genes & Society (4)**
Explores the principles of genetics, molecular biology and biotechnology within social and historical context. Emphasis on the ethical issues arising from the intersection of genetics, technology and society, with attention to the role of gender, race and class in the formation and application of scientific knowledge. This is the same course as Bi 346U and may be taken only once for credit. Cross-Listed as: Bi 346U.

**WS 347U - Science, Gender, and Social Context (4)**
Considers how gender, race and sexuality influence and are constructed by the theories and practice of science, using historical and contemporary examples. Explores the strengths and limitations of science to describe and predict human and non-human natural phenomena. Topics may include ecological, evolutionary, and environmental sciences. Laboratory and/or field experiences are included and emphasized. Companion course to WS 348U; can be taken in any order. Cross-Listed as: This course is the same as Sci 347U and may only be taken once for credit.

**WS 348U - Science, Gender, and Social Context (4)**
Considers how gender, race and sexuality influence and are constructed by the theories and practice of science, using historical and contemporary examples. Explores the strengths and limitations of science to describe and predict human and non-human natural phenomena. Topics may include organismal, cell/molecular, or biomedical sciences. Laboratory and/or field experiences are included and emphasized. Companion course to WS 347U; can be taken in any order. Cross-Listed as: This course is the same as Sci 348U and may only be taken once for credit.

**WS 349U - Gender and International Development (4)**
Examines how the material benefits of globalization and development projects are not shared equally across gender(s). Evaluates how development theory and practice address poverty, health, environment, sexuality, population, domestic/paid work. Also examines the emergence of civil society; patterns of violence and political participation globally. This is the same course as Intl 349U and may be taken only once for credit. Cross-Listed as: Intl 349U.

**WS 350 - Introduction to Interpersonal Violence (1)**
Explores the roots of interpersonal violence, the dynamics of domestic violence against women and children and sexual assault, their causes and effects, community resources for intervention and prevention.
Discusses the social norms that influence interpersonal violence as well as the psychological results of violence. Examines the big picture of interpersonal violence and how all forms are interrelated.

WS 351U - Gender and Education (4)
Explores the significance of gender in educational work. The focus will be on the history of gender arrangements in educational organizations and the formation of gender roles in contemporary American society, particularly in the family, schools, and the economy. Students will examine differential socialization of males and females, ongoing practices in educational organizations that are gender-related and/or gender biased and the convergence of gender, race, and class in educational organizations. This course is cross-listed as ELP 455; may only be taken once for credit.

WS 354 - Interpersonal Violence and Special Populations (1)
Physical, emotional and sexual abuse crosses all age, cultural, religious, ethnic, economic and social boundaries. However, the impact of abuse and the remedies and services available to victims/survivors varies widely across different social groups. WS 354: Young Adults and Dating Violence; WS 355: Battered Women in Prison; WS 356: Diversity Awareness and Domestic and Sexual Violence. Each class will consider physical, emotional and sexual abuse. This is the first course in a sequence of three: WS 354, WS 355, and WS 356. Recommended prerequisite: WS 350.

WS 355 - Interpersonal Violence and Special Populations (1)
Physical, emotional and sexual abuse crosses all age, cultural, religious, ethnic, economic and social boundaries. However, the impact of abuse and the remedies and services available to victims/survivors varies widely across different social groups. WS 354: Young Adults and Dating Violence; WS 355: Battered Women in Prison; WS 356: Diversity Awareness and Domestic and Sexual Violence. Each class will consider physical, emotional and sexual abuse. This is the second course in a sequence of three: WS 354, WS 355, and WS 356. Recommended prerequisite: WS 350.

WS 356 - Interpersonal Violence and Special Populations (1)
Physical, emotional and sexual abuse crosses all age, cultural, religious, ethnic, economic and social boundaries. However, the impact of abuse and the remedies and services available to victims/survivors varies widely across different social groups. WS 354: Young Adults and Dating Violence; WS 355: Battered Women in Prison; WS 356: Diversity Awareness and Domestic and Sexual Violence. Each class will consider physical, emotional and sexual abuse. This is the third course in a sequence of three: WS 354, WS 355, and WS 356. Recommended prerequisite: WS 350.

WS 357 - Interventions for Interpersonal Violence (1)
This course sequence will consider interpersonal violence and intervention from a variety of perspectives --as an individual and societal issue. WS 357: Interventions to Help Women Caught in Interpersonal Violence; WS 358: Treatment Philosophies and Interpersonal Violence; WS 359: Holding Perpetrators of Interpersonal Violence Accountable. Each class will address physical, emotional and sexual abuse issues. This is the first course in a sequence of three: WS 357, WS 358, and WS 359. Recommended prerequisite: WS 350.

WS 358 - Interventions for Interpersonal Violence (1)
This course sequence will consider interpersonal violence and intervention from a variety of perspectives --as an individual and societal issue. WS 357: Interventions to Help Women Caught in Interpersonal Violence; WS 358: Treatment Philosophies and Interpersonal Violence; WS 359: Holding Perpetrators of Interpersonal Violence Accountable. Each class will address physical, emotional and sexual abuse issues. This is the second course in a sequence of three: WS 357, WS 358, and WS 359. Recommended prerequisite: WS 350.

WS 359 - Interventions for Interpersonal Violence (1)
This course sequence will consider interpersonal violence and intervention from a variety of perspectives --as an individual and societal issue. WS 357: Interventions to Help Women Caught in Interpersonal Violence; WS 358: Treatment Philosophies and Interpersonal Violence; WS 359: Holding Perpetrators of Interpersonal Violence Accountable. Each class will address physical,
emotional and sexual abuse issues. This is the third course in a sequence of three: WS 357, WS 358, and WS 359. Recommended prerequisite: WS 350.

WS 360U - Introduction to Queer Studies (4)
An interdisciplinary course that focuses on the lives of lesbian, gay, bisexual, and trans people in historical and social context. Looks at the historical roots and political uses of sexual norms and sexual identities and explores the complex interactions of race, class, gender, and desire. Finally, looks at some of the current political contests around sexuality.

WS 361 - Sexual Assault (1)
Examines sexual assault from historical, political, and psychological perspectives; the legal and medical systems' responses to sexual assault; and the trauma that results from rape and the options for healing. Recommended prerequisite: WS 350.

WS 362 - Women and Trauma (2)
Examines effects of trauma on the brain and brain functioning, psychological effects of childhood trauma, resilience as a factor in coping with traumatic experiences, and how to foster healing in trauma survivors. Recommended prerequisite: WS 350.

WS 363 - Moving Beyond Trauma (1)
Examines survival from interpersonal violence, draws on resiliency research to understand what fosters healing, explores the role of support systems, altruism, spirituality, and social activism in overcoming trauma.

WS 365U - The Science of Gendered Bodies (4)
The scientific gendering of the human body is studied from an interdisciplinary and intersectional queer and feminist perspective integrating biology, health and medicine with current and historical social, cultural and political forces.
Cross-Listed as: This is the same course as Sci 365U and may be taken only once for credit.

WS 367U - War, Sexual Violence and Healing (4)
Addresses various forms and causes of human rights violations during periods of both conflict and peace. Examines how poverty, injustice and gender-based inequalities reflect the political-economic structures that perpetuate gender-based violence among people.

Students will investigate methods and means to combat such violence and facilitate healing.

WS 369U - Global Reproductive Justice (4)
This survey course explores movements for reproductive justice within the U.S. and globally. We examine reproductive rights organizing, reproductive health, and the impacts of race, class, gender, sexuality, nationality and ability among other identities on groups seeking to exercise reproductive autonomy.

WS 370U - History of Sexualities (4)
Looks at the various meanings given to sexual desires and practices throughout history. Explores sexuality as reproduction, perversion, pleasure, and as a site of both social/political regulation and subversive agency. Focuses on change over time in the North American context emphasizing the contests involving sexuality beginning with the period of European conquest and ending with looking at HIV/AIDS and transgender issues.

WS 372U - Topics in Literature, Gender, and Sexuality (4)
Study of representations of gender and sexuality in literature and related cultural forms. Course may be repeated for up to 8 credits with different topics.
Cross-Listed as: This is the same course as Eng 372U.

WS 373 - Queer Philosophy (4)
The aim of this course is to illuminate the theoretical underpinnings and the radical epistemological, social, and political possibilities that are afforded by queer philosophy/theory. Queer Philosophy problematizes and challenges rigid identity categories, norms of sexuality and gender and the oppression and violence that such norms justify. This course will interrogate the metaphysical, epistemological, phenomenological, social, and political dimensions of queer philosophy.
Cross-Listed as: This is the same course as Phl 373 and may be taken only once for credit.

WS 374U - Memoir, Gender, and Sexuality (4)
Students will explore the possibilities and limitations of the memoir form, examine the diverse aesthetics of this personally political writing, investigate the resonance “memoir” has across and within categories of difference (e.g., race, indigeneity, ethnicity, gender, nationality, sexuality, class, ability, and
WS 375U- Topics in Sexuality Studies (4)
Study of different topics related to sexuality. Topics will vary from term to term.

WS 377U- Topics in Feminist Spirituality (4)
Investigation of different forms of feminist spirituality. Topics may include feminist biblical interpretation, goddesses and spirituality, and eco-feminist spirituality. This course may be repeated with different topics.

WS 379U- Feminist Care Ethics (4)
Provides a comprehensive introduction to care ethics from its origins in feminist theory to its present multidisciplinary and international manifestations. The implications of care ethics for ontology, epistemology, aesthetics, identity, performativity and moral theory are addressed. Care ethics is differentiated from mainstream ethical theories. Care theory is applied to a variety of academic and professional disciplines including but not limited to business, education, healthcare, literature, political science, performance studies, and psychology.

Cross-Listed as: This is the same course as Phl 379U and may be taken only once for credit.

WS 380U- Women and Politics (4)
Analysis of the political role of women in politics. Reviews historical and contemporary analyses of women's participation and status in politics. Recommended prerequisites: PS 101, 102 or upper-division standing.

WS 381 - Queer of Color Theorizing and Perspectives (4)
Utilizing critical race, feminist, queer, decolonial, and materialist analyses, queer of color theories highlight the intersections of race, sexuality, and nations. An overview of the development and foundational approaches to queer of color critiques, as well as an opportunity to apply these theories to contemporary issues.

Prerequisite: WS 360U or WS 305.

WS 382U- Transgender Studies (4)
Focus on contemporary transgender lives and politics; it is an introduction to the field of Transgender Studies. Analyze lived realities and academic scholarship. Topics may include: transgender history, health care justice, violence and discrimination, the prison-industrial complex, and exclusion and inclusion in feminist and LGBTQ politics.

WS 387 - Feminist Organizations: Theory and Practice (4)
An introduction to the theory and practice of feminist non-profit organizations. Attention to the history of feminist non-profit organizations in the U.S., political and social structures that impact such organizations, and decision-making and management issues related to feminist concepts of power. Partnering with a local feminist non-profit, students will gain hands-on knowledge of how feminist organizations strive to put theory into practice.

Prerequisite: WS 307 or junior standing.

WS 399 - Special Studies (1-6)
(Credit to be arranged.)

WS 401 - Research (1-6)
(Credit to be arranged.)

WS 402 - Independent Study (1-12)
(Credit to be arranged.)

WS 404 - Cooperative Education/Internship (1-12)
(Credit to be arranged.)

WS 405 - Reading and Conference (1-6)
(Credit to be arranged.) Consent of instructor.

WS 407 - Seminar (1-6)
(Credit to be arranged.)

WS 407U- Seminar (4)
(Credit to be arranged.)
WS 409 - Practicum (1-12)
(Credit to be arranged.)

WS 410 - Selected Topics (1-6)
(Credit to be arranged.)

WS 411 - Experiential Learning Seminar (2)
Required during the first term of WS 409 Practicum.
Serves as a learning community for students to present and reflect on their community-based practicum experiences. Participants critically assess the contexts in which they are operating and analyze the relationship between critical theory and practice.
Prerequisite: Upper division standing and permission of the instructor.

WS 412 - Feminist Methodologies (4)
Introduces a range of feminist research methodologies, emphasizing interconnections among race, gender, sexuality, class, disability and other aspects of difference. Assesses knowledge-generating strategies in terms of their suitability for feminist research and addressing power relations.
Development of critical awareness in doing self-directed feminist, queer, decolonial and critical race research.
Also offered for graduate-level credit as WS 512 and may be taken only once for credit.
Prerequisite: WS 315 or WS 381.

WS 415 - Senior Seminar (4)
Focuses on developing and completing an independent project using feminist and/or queer theories and methodologies. Structured workshop format where students will be guided through their project with peer and instructor feedback. Students will work collaboratively as well as independently.
Prerequisite: WS 412.

WS 417 - Women in the Economy (4)
Different economic theoretical perspectives are presented to account for women’s particular economic roles currently and historically. Emphasis on women’s responsibility for child rearing and housework; women’s relatively low wages; occupational segregation by gender; economic differences among women due to ethnicity, generation, and class; and policy issues with particular importance for women’s economic situation. Expected preparation: Ec 201, Ec 202.
Also offerer for graduate-level credit as WS 517 and may be taken only once for credit.

WS 422 - Critical Perspectives on Quantitative Analysis (4)
Uses critical Indigenous, decolonizing, feminist and anti-racist lenses to evaluate quantitative research applications, including development of research questions; study designs; appropriate use of statistical and other quantitative methods; audience and dissemination of quantitative findings.
Interdisciplinary and intersectional focus and applications. Note: Not a methods course; does not teach statistical or quantitative methods.
Also offered for graduate-level credit as WS 522 and may be taken only once for credit. Prerequisite: Familiarity and experience with basic statistical and quantitative data and methods. Instructor permission required. Cross-Listed as: This is the same course as GRN 422 and may be taken only once for credit.

WS 424 - Women and the Law (4)
Examines the relationship between women and the law. The first half of the course considers several theories of women’s equality. During the second half of the course students will apply these theories to a variety of problems in gender justice. Substantive issues covered may include: sexual harassment, abortion, fetal protection policies, and pornography.
This course is the same as PS 425; may only be taken once for credit.
Cross-Listed as: PS 425.

WS 425 - Sociology of Gender (4)
Consideration of the theoretical, methodological, and empirical contributions of current sociological scholarship on gender. Emphasis on the intersection of gender, sexuality, race/ethnicity, and class.
Analysis of topics such as: masculinity/femininity, parenting, family, education, work, sexualities, reproduction, politics, and social change.
This is the same course as Soc 425 and may be taken only once for credit.
Also offered for graduate-level credit as WS 525 and may be taken only once for credit. Prerequisite: Upper-division standing.

WS 426 - Gender & Mental Health (4)
Social and historical explanations of, and research on, mental illness and mental health, with a focus on gender. Contemporary distributions, diagnoses, and treatments of mental illness among men and women are examined. Focus on psychiatric disorder and gender-based discourse.
This is the same course as Soc 426 and may be taken only once for credit.
Also offered for graduate-level credit as WS 526 and may be taken only once for credit. Prerequisite: Upper-division standing.

Cross-Listed as: Soc 426.
**WS 428 - Lesbian History (4)**

Surveys the history of lesbian existence in the United States. Begins by asking what "lesbian" means, identifying the different historical markers of female same-sex desire. Using a rich variety of primary and secondary sources, we analyze historical attitudes about female same-sex desire, follow the emergence of lesbian subcultures and communities, examine the development of sexual identities during the twentieth century, and end by considering lesbian issues.

---

**WS 431U - Women in the Visual Arts (4)**

This course studies both the representation of women and gender and the art and patronage by women in various media (painting, sculpture, architecture, printmaking, photography, textiles and mixed media). Explores 19th century and 20th century America and Europe. This is the same course as ArH 431U and may be taken only once for credit.

Cross-Listed as: ArH 431U.

---

**WS 442 - Women Writers in Global Contexts (4)**

Study of the works of women writers from the postcolonial and non-Western world.

Prerequisite: junior-standing. Cross-Listed as: This is the same course as Eng 442 and may be taken only once for credit.

---

**WS 444 - British Women Writers (4)**

Study of the works of British women writers with attention to themes, styles, and characteristic concerns in the light of feminist criticism and scholarship. This is the same course as Eng 444 and may be taken only once for credit.

---

**WS 445 - American Women Writers (4)**

Study of American women writers, with attention to themes, styles and characteristic concerns, in the light of feminist criticism and scholarship. This is the same course as Eng 445.

---

**WS 451 - Interrupting Oppression (4)**

Advanced exploration of diversity and social justice. It provides a framework for understanding specific interlocking systems of oppression and how they affect us. It gives a pedagogical frame for training about concepts of oppression and diversity; and how to apply this knowledge through the practice.

Also offered for graduate-level credit as WS 551 and may be taken only once for credit. Prerequisite: Upper-division standing.

---

**WS 452 - Gender and Race in the Media (4)**

Primarily examines the representations of gender and race, including age, class and sexual orientation in various media (mainstream and alternative), and will examine theoretical and methodological approaches which may be used to interpret these representations. In addition, considers the potential impact that media institutions have on people’s lives, political decisions and social relations. The overall aim is for students to understand how their own cultural identities affect their media consumption and social positioning. This course is the same as Comm 452; course may only be taken once for credit.

Cross-Listed as: Comm 452.

---

**WS 453 - Feminism and Women’s Health (4)**

The medicalization of women's bodies sustains the myth that the female body is essentially a reproductive body and the male body the standard of health. Using a feminist lens of analysis, this class will examine these gendered conceptions relating to health, medical research, and treatments of gendered bodies.

Also offered for graduate-level credit as WS 553 and may be taken only once for credit. Prerequisite: Upper-division standing.

---

**WS 467 - Work and Family (4)**

An examination of the effects of work on family, and family on work, in contemporary society. Includes study of dual-career and dual-work families, effects of maternal employment on children, impact of child care and elder care on the workplace, and parental leave and other workplace supports for families. Implications of research for social policy. Recommended prerequisites: Psy 311 and 3 credits in courses numbered Psy 321 or higher.

---

**WS 470U - Asian American Women’s Studies (4)**

Interdisciplinary course focusing on the contemporary experiences of Asian American women, examining ways in which race, gender, class, sexuality, and national identity shape the experiences of Asian American women. Topics: histories of immigration and western colonization; family and community structures; representations and stereotypes in media and popular culture; sexuality and sexual identities; mixed-heritage and bicultural experiences; the politics of language; violence against Asian American women; labor force participation; relationship to feminism; and activism and resistance.
WS 471 - Transnational Feminisms (4)
Themes and theoretical principles of transnational feminisms, with special emphasis placed on Third World feminist movements. Themes explored include colonialism, globalization, nationalism and nation-building, representation, global economies, and the politics of race, gender, class, sexuality, and nation.
Also offered for graduate-level credit as WS 571 and may be taken only once for credit. Prerequisite: WS 301 or WS 315 or consent of instructor.

WS 479 - Women and Organizational Psychology (4)
Examines the relationship between gender and the social organization of the workplace. Focus is on gender development as socialization (e.g. hierarchy and leadership, discrimination and harassment, deskill) from a social psychological perspective. Strategies for change are considered. Recommended prerequisites: Psy 310 and 3 additional credits in courses numbered Psy 330 or higher.

WS 480 - Introduction to Critical Disability Studies (4)
Introduction to critical disability studies, what it is, and what it is not. Through lectures, readings, guest speakers, assignments and small group discussion, students will engage with each other to encourage application of new concepts in their current and future academic and personal lives.
Also offered for graduate-level credit as WS 580 and may be taken only once for credit. Prerequisite: Senior standing or instructor approval.

WS 481 - Disability and Intersectionality (4)
Focuses on intersectionality in the context of disability. Explores the historical and current contexts of disability in combination with race, ethnicity, gender, sexuality, and social class. Students engage with the application of these new concepts in their current and future studies and personal lives.
Also offered for graduate-level credit as WS 581 and may be taken only once for credit. Prerequisite: WS 480 or consent of instructor.

WS 482 - Topics in Transnational Sexuality Studies (4)
An examination of how sexualities are understood within a transnational frame of analysis. Topics include the sexual politics of migration, tourism and desire, colonialism and its lingering effects, militarization and sexuality, transnational biopolitics of sexuality, and the politics of global gay rights discourse.
WS 522 - Critical Perspectives on Quantitative Analysis (4)

Uses critical Indigenous, decolonizing, feminist and anti-racist lenses to evaluate quantitative research applications, including development of research questions; study designs; appropriate use of statistical and other quantitative methods; audience and dissemination of quantitative findings. Interdisciplinary and intersectional focus and applications. Note: Not a methods course; does not teach statistical or quantitative methods. Also offered for undergraduate-level credit as WS 422 and may be taken only once for credit. Prerequisite: Familiarity and experience with basic statistical and quantitative data and methods. Cross-Listed as: This is the same course as GRN 522 and may be taken only once for credit.

WS 525 - Sociology of Gender (4)

Consideration of the theoretical, methodological, and empirical contributions of current sociological scholarship on gender. Emphasis on the intersection of gender, sexuality, race/ethnicity, and class. Analysis of topics such as: masculinity/femininity, parenting, family, education, work, sexualities, reproduction, politics, and social change. This is the same course as Soc 525 and may be taken only once for credit. Also offered for undergraduate-level credit as WS 425 and may be taken only once for credit. Prerequisite: Junior standing. Cross-Listed as: Soc 525.

WS 526 - Gender & Mental Health (4)

Social and historical explanations of, and research on, mental illness and mental health, with a focus on gender. Contemporary distributions, diagnoses, and treatments of mental illness among men and women are examined. Focus on psychiatric disorder and gender-based discourse. This is the same course as Soc 526 and may be taken only once for credit. Also offered for undergraduate-level credit as WS 426 and may be taken only once for credit. Cross-Listed as: Soc 526.

WS 530 - Women in the Visual Arts II (4)

This course studies both the representation of women and gender and the art and patronage by women in various media (painting, sculpture, architecture, printmaking, photography, textiles and mixed media). Explores 19th century and 20th century America and Europe.

WS 545 - American Women Writers (4)

Study of American women writers, with attention to themes, styles and characteristic concerns, in the light of feminist criticism and scholarship. Recommended prerequisite: 15 credits in literature. WS 260 recommended.

WS 546 - American Women Writers (4)

Study of American women writers, with attention to themes, styles and characteristic concerns, in the light of feminist criticism and scholarship. Recommended prerequisite: 15 credits in literature. WS 260 recommended.

WS 551 - Interrupting Oppression (4)

Advanced exploration of diversity and social justice. It provides a framework for understanding specific interlocking systems of oppression and how they affect us. It gives a pedagogical frame for training about concepts of oppression and diversity; and how to apply this knowledge through the practice. Also offered for undergraduate-level credit as WS 451 and may be taken only once for credit.

WS 552 - Gender and Race in the Media (4)

Primarily examines the representations of gender and race, including age, class and sexual orientation in various media (mainstream and alternative), and will examine theoretical and methodological approaches which may be used to interpret these representations. In addition, considers the potential impact that media institutions have on people's lives, political decisions and social relations. The overall aim is for students to understand how their own cultural identities affect their media consumption and social positioning. This course is the same as Sp 552; course may only be taken once for credit. Cross-Listed as: Comm 552.

WS 553 - Feminism and Women's Health (4)

The medicalization of women's bodies sustains the myth that the female body is essentially a reproductive body and the male body the standard of health. Using a feminist lens of analysis, this class will examine these gendered conceptions relating to health, medical research, and treatments of gendered bodies. Also offered for undergraduate-level credit as WS 453 and may be taken only once for credit. Prerequisite: Upper-division standing.
WS 555 - Gender and Education (4)
Explores the significance of gender in educational work. The focus will be on the history of gender arrangements in educational organizations and the formation of gender roles in contemporary American society, particularly in the family, schools, and the economy. Students will examine differential socialization of males and females, ongoing practices in educational organizations that are gender-related and/or gender biased and the convergence of gender, race, and class in educational organizations. This course is cross-listed as ELP 455; may only be taken once for credit.

WS 570 - Asian American Women's Studies (4)
Interdisciplinary course focusing on the contemporary experiences of Asian American women, examining ways in which race, gender, class, sexuality, and national identity shape the experiences of Asian American women. Topics: histories of immigration and western colonization; family and community structures; representations and stereotypes in media and popular culture; sexuality and sexual identities; mixed-heritage and bicultural experiences; the politics of language; violence against Asian American women; labor force participation; relationship to feminism; and activism and resistance.

WS 571 - Transnational Feminisms (4)
Themes and theoretical principles of transnational feminisms, with special emphasis placed on Third World feminist movements. Themes explored include colonialism, globalization, nationalism and nation-building, representation, global economies, and the politics of race, gender, class, sexuality, and nation.
Also offered for undergraduate-level credit as WS 471 and may be taken only once for credit.
Prerequisite: WS 301 or WS 315 or consent of instructor.

WS 580 - Introduction to Critical Disability Studies (4)
Introduction to critical disability studies, what it is, and what it is not. Through lectures, readings, guest speakers, assignments and small group discussion, students will engage with each other to encourage application of new concepts in their current and future academic and personal lives.
Also offered for undergraduate-level credit as WS 480 and may be taken only once for credit.
Prerequisite: Senior standing or instructor approval.

WS 581 - Disability and Intersectionality (4)
Focuses on intersectionality in the context of disability. Explores the historical and current contexts of disability in combination with race, ethnicity, gender, sexuality, and social class. Students engage with the application of these new concepts in their current and future studies and personal lives.
Also offered for undergraduate-level credit as WS 481 and may be taken only once for credit.

WS 583 - Critical Disability Studies Service Learning I (2)
The foci of the 3 quarter sequence are to: prepare students to be culturally responsive change agents working equitably with people with disabilities, provide an opportunity for students to work cooperatively with disability communities, and result in an in-depth study of a policy impacting people with disabilities. This is the first course in a sequence of three: WS 583, WS 584, WS 585 and must be taken in sequence.
Prerequisite: WS 580, WS 581.

WS 584 - Critical Disability Studies Service Learning II (2)
The foci of the 3 quarter sequence are to: prepare students to be culturally responsive change agents working equitably with people with disabilities, provide an opportunity for students to work cooperatively with disability communities, and result in an in-depth study of a policy impacting people with disabilities. This is the second course in a sequence of three: WS 583, WS 584, WS 585 and must be taken in sequence.
Prerequisite: WS 580, WS 581, WS 583.

WS 585 - Critical Disability Studies Service Learning III (2)
The foci of the 3 quarter sequence are to: prepare students to be culturally responsive change agents working equitably with people with disabilities, provide an opportunity for students to work cooperatively with disability communities, and result in an in-depth study of a policy impacting people with disabilities. This is the third course in a sequence of three: WS 583, WS 584, WS 585 and must be taken in sequence.
Prerequisite: WS 584.
