Oregon Population Estimates Program

Overview

• Population estimates are prepared as of July 1 of each year.
• Preliminary estimates are released on November 15th each year
• Certified estimates are posted on December 15.
• All residents of Oregon’s cities, counties, and unincorporated areas are included in the annual population estimates.
• To develop accurate population estimates, we work closely with state, county, and city officials. We request annual information from them and invite their review of our methods and estimates.
Annual Population Growth Rates for Oregon

Growth Rate vs. Year
Components of Oregon's Annual Population Change

The chart above illustrates the components of Oregon's annual population change from 1962 to 2019. It shows the natural increase and net migration over the years.
Participation in the 2020 Census Operation

Transitory Location (TL) and Group Quarters (GQ) Address for the 2020 Census

- As part of the Census 2020 planning efforts, the U.S. Census Bureau (USCB) collaborated with the (FSCPE) members to update the GQ and TL address list so that the 2020 Census will include the most current information regarding GQs and TLs.

2020 Count Review

- A program designed to enable representatives from each state to contribute directly to the quality of the 2020 Decennial Census counts.
- The specific goal of the 2020 CR is to identify missing housing units (HUs) and missing or misallocated large Group Quarters (GQs) and correct these within the time and resource constraints of the overall 2020 Census schedule.
