## PEAK PEDDLING:

HAS PORTLAND BICYCLING REACHED THE TOP OF THE LOGISTIC CURVE?

DECEMBER 6, 2013

ROBERT MCCULLOUGH

# PEAK PEDDLING

- There is increasing evidence that the growth of central city bicycle commuting is leveling off
- The best data is the Hawthorne Bridge counter – which allows us to reject growth in commuting at 99% significance since August 8, 2012
- Weather/weekend/sunset variables are highly significant
- The policy implication is that the easy work is over and the hard work – real planning – is just beginning

# Hawthorne Bridge Rides

Actual Counts and PBoT Reported Annual Estimates

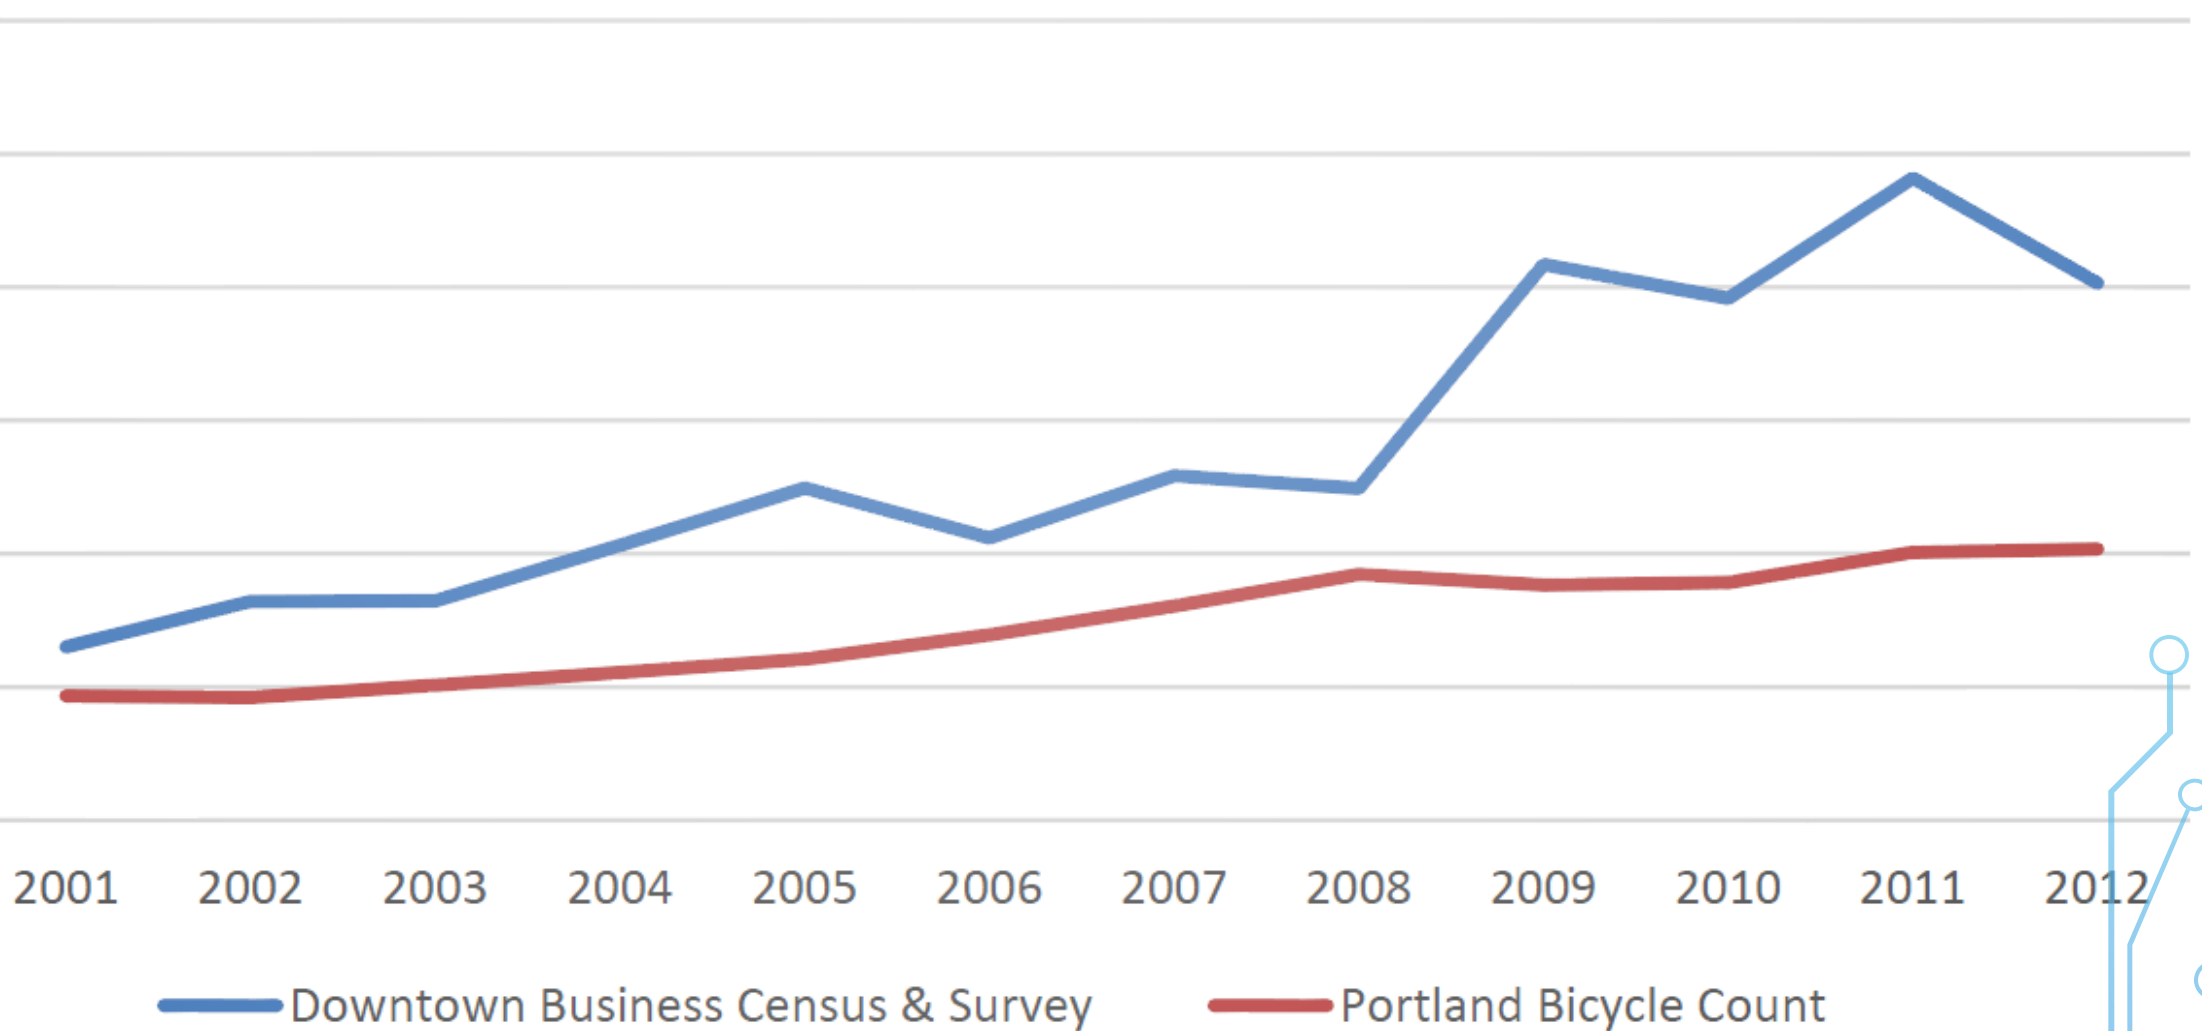

# Logistic Curve

← Exponential growth

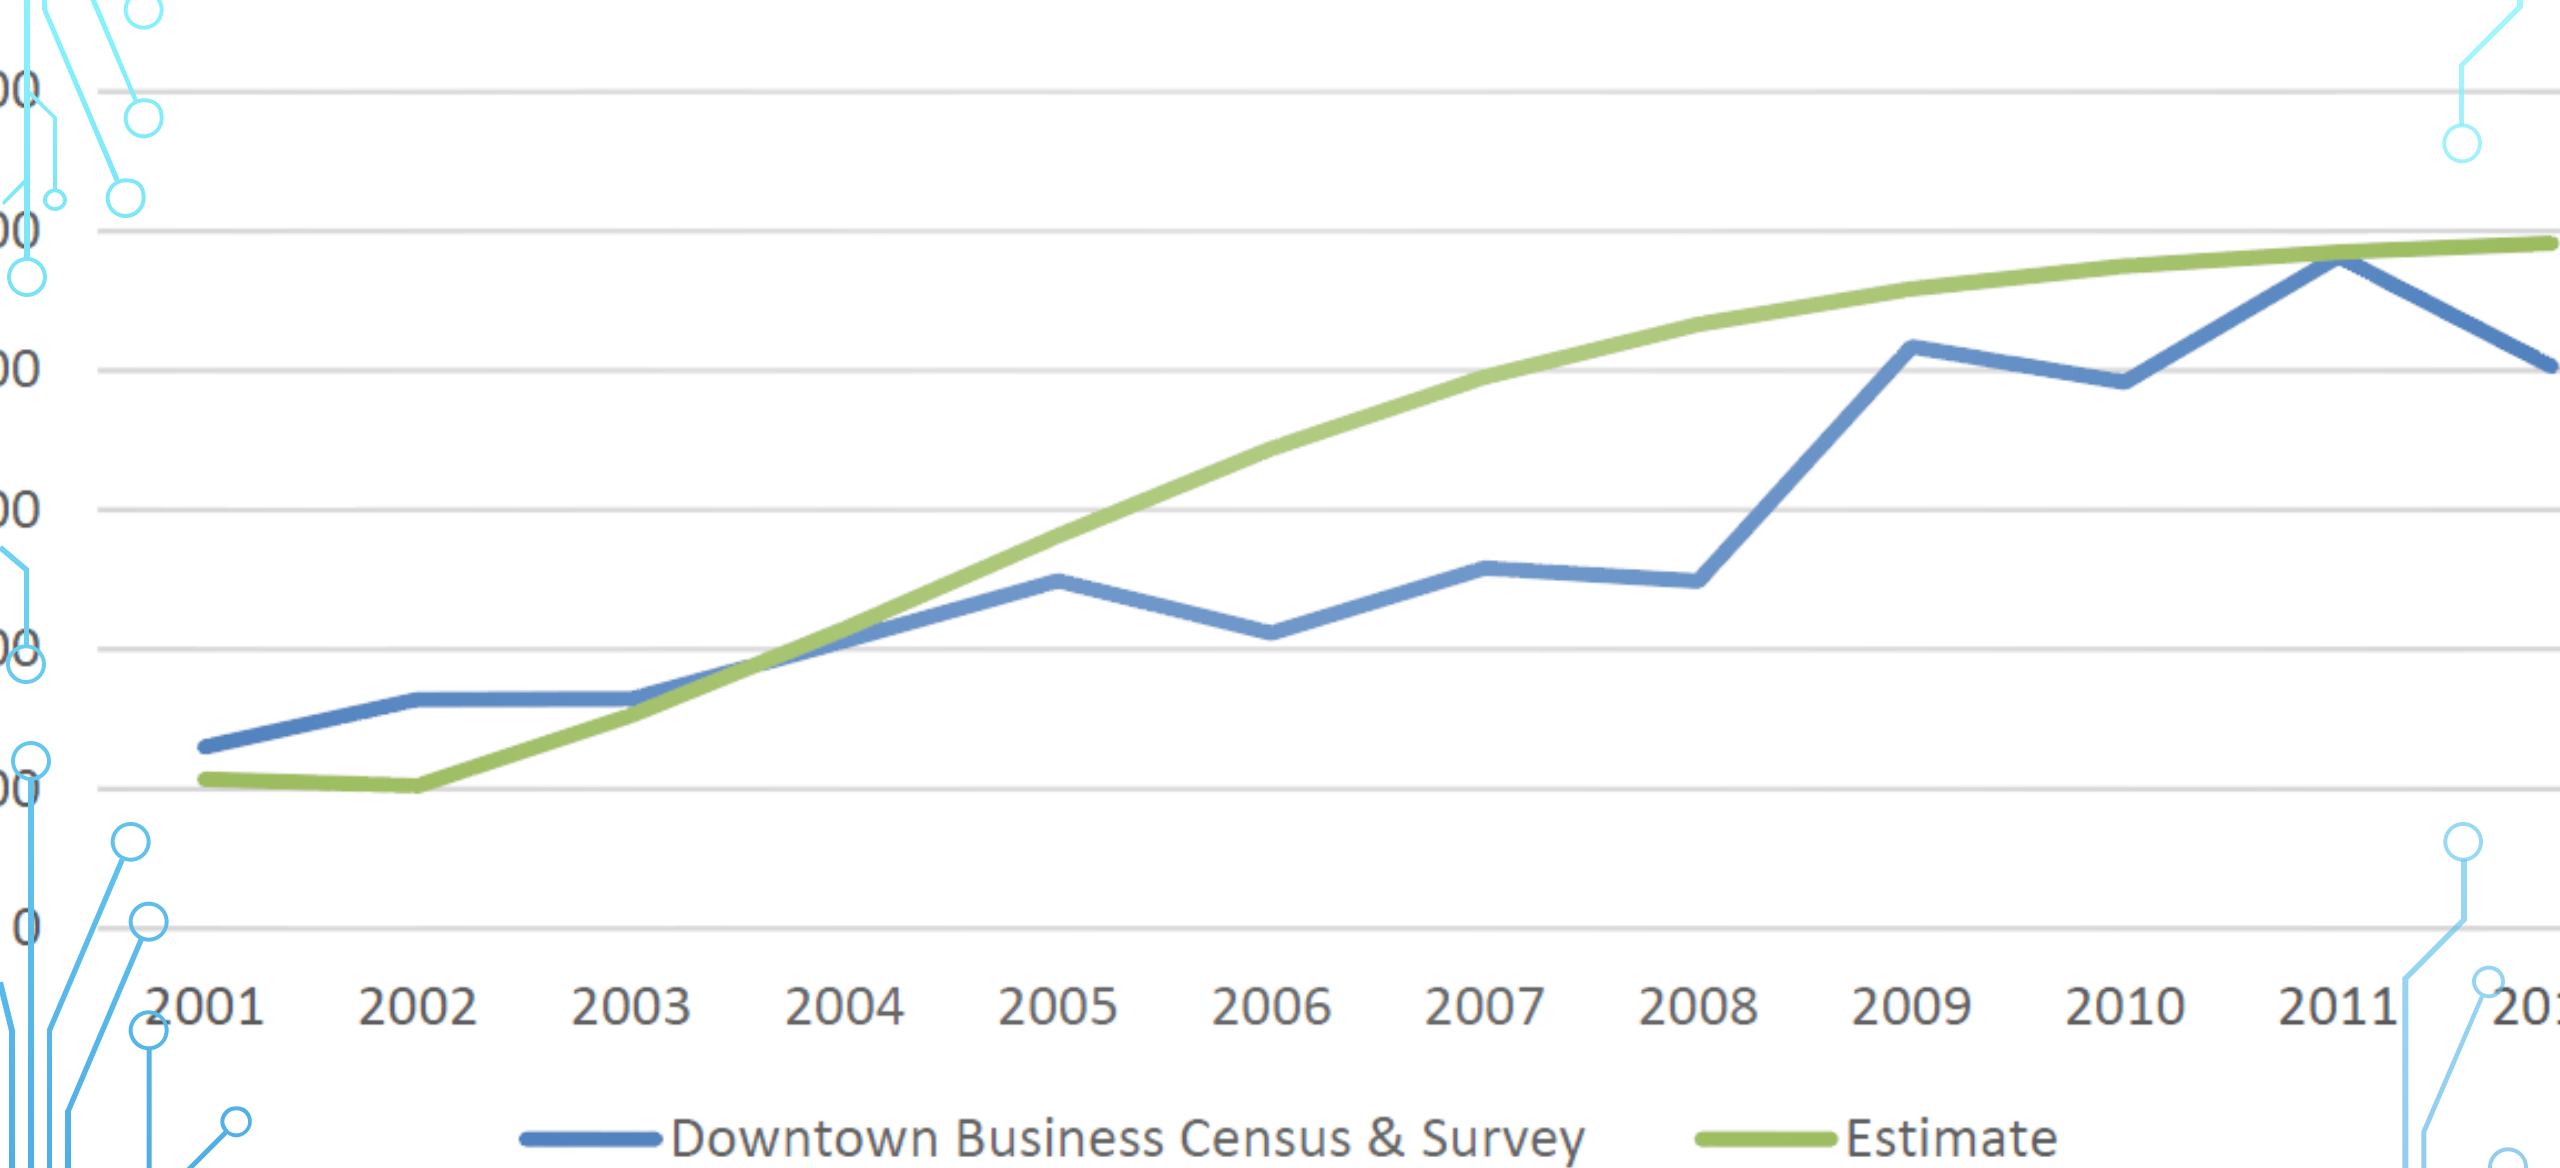

# Central City Bicycle Data

Bicycle Commuters (Downtown Survey) and Hawthorne Round Trips (PBot Reports)
