Project Client: City of Milwaukie, OR
Project Location: Downtown Milwaukie, OR

The Fresh Look Milwaukie: Downtown Road Map Project stems from the client’s desire to reassess the alignment of plans and policies crafted over the past two decades with current community values and circumstances.

The need for a high level of understanding is driven by the desire to know how past plans and policies interlock with present day community desires and changing conditions to the Downtown, particularly major infrastructure investments such as Light Rail.

The recommendations of this project are heavily based on community values and community-generated solutions, along with the team’s understanding about past and present policies and existing conditions.

These efforts will inform the next phase of larger efforts by the City of Milwaukie and have resulted in several products:

1) The Fresh Look Milwaukie: Downtown Roadmap
2) Existing Conditions Report
3) Public Outreach Findings in two volumes:
   a. Summary of findings
   b. Appendix – All community engagement findings and information
