# TABLE OF CONTENTS

**SUMMARY**

This report provides population estimates for Oregon and its counties and cities for the years 1980 through 1993. As mandated by Oregon law, the Center for Population Research and Census at Portland State University, acting on behalf of the State Board of Higher Education, annually estimates the July 1 population for each county and incorporated city in Oregon. These figures are certified on December 15. When certified, the population estimates are used in the allocation of certain state tax revenues to cities and counties.

Oregon's estimated July 1, 1993 population is 3,038,000 which represents about 1.2% of the United States population of 257,900,000. Oregon's population increased 195,679 persons (6.9%) in the 39 months since the last U.S. Decennial Census (April 1, 1990). This rate of increase is almost double that of the United States (3.7%). Oregon's growth rate in the early 1990's is a continuation of the rapid growth experienced in the late 1980's when it also grew at twice the national average.

Oregon's population increase of about 195,700 persons since April 1, 1990 is the result of two factors: natural increase (births minus deaths) and net migration (persons moving to Oregon minus persons leaving Oregon). Natural increase has accounted for about 56,900 new Oregonians and there has been a net in-migration of about 138,800 persons in the 1990's.

Figure 5 shows Oregon's net migration (in-migrants minus out-migrants) from 1981 to 1993. It is evident from this graph that migration can vary from year to year. For example, Oregon experienced a net migration of -30,250 people from 1985 to 1986 whereas between 1986 and 1987 there was a net migration of +13,600 people. The substantial net out-migration occurring in 1982, 1983, and 1986 is reflective of the recession in Oregon in the early 1980's. Conversely, in each year from 1988 to 1993, Oregon had net in-migration of more than 30,000 people.

Figure 1 shows a map of Oregon's July 1, 1993 county population estimates. What is particularly striking about this figure is that the eight most highly populated counties are located on what may be termed the I-5 corridor. These counties (Multnomah, Washington, Clackamas, Marion, Linn, Lane, Douglas, and Jackson) contain 2,162,900 persons or 71 percent of the state's 1993 population. Another example of the uneven population distribution in Oregon is that although half of Oregon's 36 counties are East of the Cascade Range, these counties contain only 391,500 persons or 12.9% of the state's population. The percentage of Oregon's population that is East of the Cascade Range has remained constant over time; in 1980 it was 13.0%.

1

Approximately one-half of Oregon's population increase in the past 12 months occurred in the Portland Area Counties of Multnomah, Washington, and Clackamas (+28,500 versus +59,000). These three counties have an estimated 1,268,000 residents, or 42% of the state's population as of July 1, 1993.

Population estimates for 1993 show that Multnomah County (615,000) continues to have substantially more people than any other Oregon county (Table 6). Washington County is the second most populous county (351,000). Clackamas County which surpassed Lane County as the third most populous county in 1992 now has 4,000 more people than Lane County (302,000 to 298,000). At the other end of the spectrum, seven counties have fewer than 8,000 people. Wheeler County has the smallest population (1,500) with Gilliam County (1,750) and Sherman County (1,850) also containing fewer than 2,000 people. The other counties with fewer than 8,000 people are Harney (6,900), Wallowa (7,200), Lake (7,350), and Grant (7,900). All seven of these counties are East of the Cascade Range.

Table 4 categorizes Oregon cities by population size. Portland is Oregon's most populous city and its estimated population of 471,325 is about four times the second and third most populous cities: Eugene (119,235) and Salem (113,325). The city of Portland has more persons than any Oregon county with the exception of Multnomah. It is quite clear from Table 4 that Oregon has many small cities. Approximately 85% of Oregon's 240 incorporated cities have a population under 10,000. Slightly less than one-fourth (24%) of Oregon's cities have 5,000 people and about half of the cities have a population under 1,350.

As in the 1980's, many cities gained new residents because of expanding city boundaries (Table 5). In the previous 39 months, 70 cities (29% of Oregon's cities) annexed land containing 35,271 persons. Portland gained 24,407 residents through annexations which is about 69% of the total number of people gained through annexations. Other cities gaining more than 1,000 persons through annexations are Albany (+3,870), Bend (+3,316), and Roseburg (+1,152). The vast majority of the annexations involve few people as only 8 of the 70 cities gained more than 100 people through annexations.

Table 6 shows that 34 of Oregon's 36 counties gained population from 1990 to 1993. The three Portland Area Counties of Washington (+39,446), Multnomah (+31,113), and Clackamas (+23,150) gained more than 20,000 people during this time and four other counties gained more than 10,000 people: Marion (+18,917), Lane (+15,088), Deschutes (+11,842), and Jackson (+10,611). Harney (-160) and Sherman (-60) are the only counties to lose population during the 1990's.

Approximately 13.7% of Oregon's population (416,605) is aged 65 and older compared to the national average of 12.7%. In the 1980's Oregon's elderly population (those aged 65 and older) grew by 28.5% while the total state population increased by only 7.9%. The pattern has changed substantially in the 1990's with both the elderly population and the total state population increasing by 6.9% since April 1, 1990. The rate of growth of the elderly population has lessened slightly over time whereas the rate of growth for the total state population is substantially higher in the 1990's than in the 1980's.

Figure 3 shows a map of the percentage of elderly by county. Although the proportion of elderly in many counties is similar to the state average of 13.7%, six counties have an elderly population representing at least 20% of their total population: Curry (24.3%), Wheeler (21.5%), Tillamook (20.8%), Lincoln (20.7%), Josephine (20.5%), and Sherman (20.2%). Conversely, Benton (10.0%), Washington (10.1%), Clackamas (11.6%), and Morrow (12.1%) have a substantially smaller proportion of elderly than the state average. Multnomah County (12.8%) also has a smaller proportion of elderly than the state average and thus the three most populous counties have a lower proportion of elderly than the state average.

Tables 1 through 8 and Figures 1 through 5 provide the reader with a more detailed analysis of Oregon's current population as well as an historical look at its population since 1980.
