QuickMARC: Mobile Cataloging

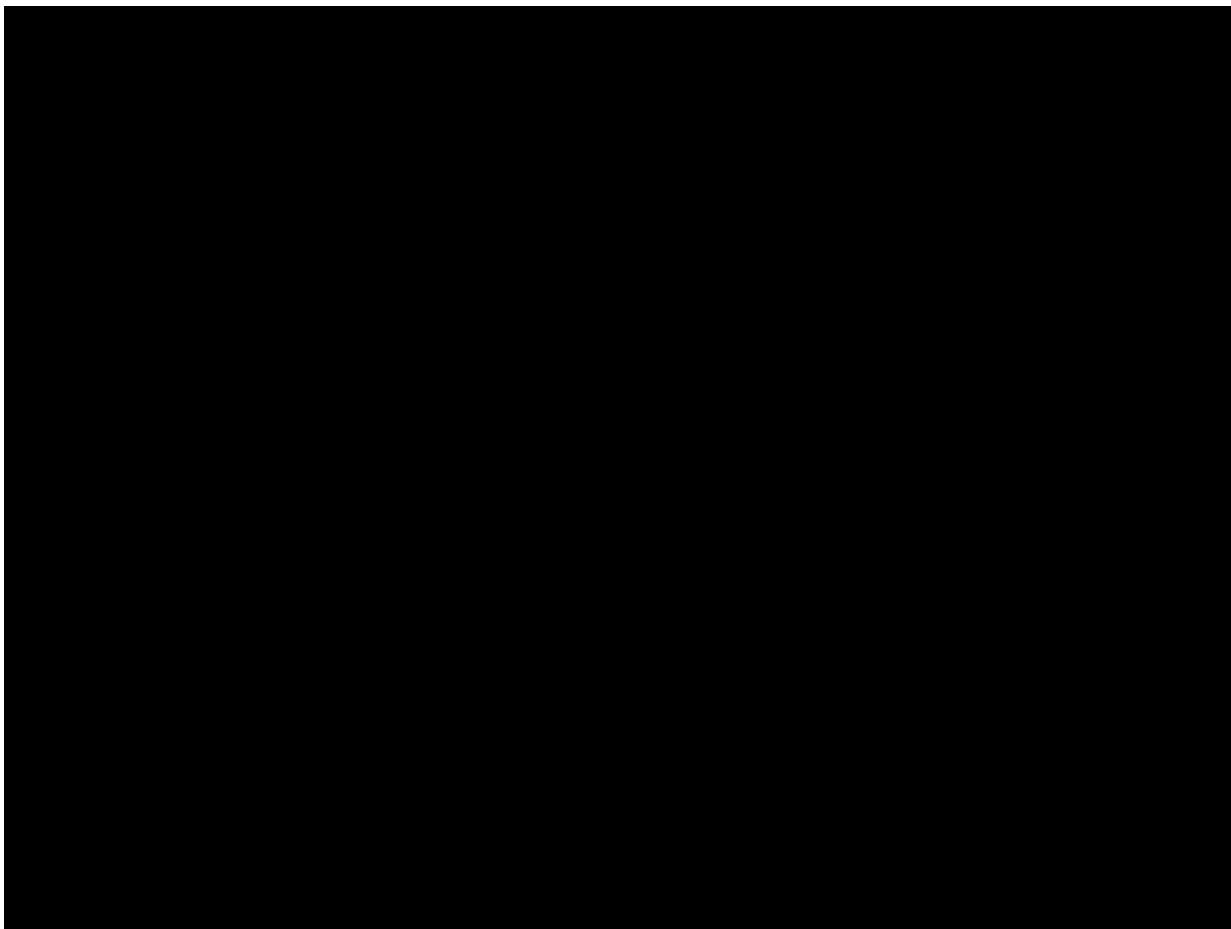

Terry Reese

Gray Family Chair for Innovative Library Services

What?

- ✎ Windows Phone 7.5 based application
- ✎ Derived from the MarcEdit codebase
- ✎ Supports searching/ocring data from barcodes, ISBN, and library cards and..
 - Finding MARC records for that data in OCLC or others
 - Downloading that data (and setting holdings if necessary) to one's ILS

Demo?

What I'm learning

- ✂ ISBD reads well, but doesn't OCR well
 - At least when using free ocr services provided by Google and Microsoft
 - The Punctuation comes out messy
- ✂ Need to be able to augment data
 - Add a barcode
 - Delete certain fields
- ✂ Want to be able to mix data
 - Add Amazon info to a MARC record
 - Link to digital copy if available

Thank you
