Expected growth in mid-skill, mid-wage jobs holds promise for workers who are looking to earn a self-sufficient wage.

A new report, *Demographic Analysis of the Healthcare, Manufacturing, and Skilled Trades Industries*, produced for Partners in Diversity by PSU’s Institute of Portland Metropolitan Studies, overlays demographic information for more than 200 occupations in 4 sectors in the Portland region. All occupations examined in the report require no more than 2 years of post-high school education.

**High Opportunity Occupations:**
- Require no more than 2 years of post-high school education
- Pay at least $48,303 median annual wage, 125% of the median annual wage for the Portland region
- Are expected to add at least 100 new jobs by 2025

**Snapshot of Region’s Full Workforce**
For comparison, the following are characteristics of Portland’s entire workforce in all job sectors:

- 35% have some college or an associate’s degree
- 29% are age 50 or older
- 20% are Hispanic or a non-white race
- 10% are noncitizens
- 9% have no high school diploma
- 8% are English language learners

The report is sponsored by Partners in Diversity, [www.partnersindiversity.org](http://www.partnersindiversity.org)

In addition to examining four sectors that have a total of 200 occupations that require no more than two years of education, the report zooms in on **28 High Opportunity Occupations** in those sectors.

**In all High Opportunity Occupations**, whites are overrepresented. People of color, noncitizens, and English language learners are underrepresented.

In the Portland region, many workers in **High Opportunity Occupations** have more education than the occupation requires.

**Compared to the Region’s Entire Workforce, Workers in These Four Sectors Are...**

**12,000 New High Opportunity Jobs**

In total, the 28 High Opportunity Occupations examined in the report are anticipated to add more than 12,000 new jobs within the next ten years. All of these jobs require no more than two years of post-high school education and pay 125% of the median annual wage for the Portland region. This job growth may signal new opportunities for workers who would like to earn a self-sufficient wage without making a costly investment in education.

**Demographic Analysis of the Healthcare, Manufacturing, and Skilled Trades Industries**

is available online at [http://www.pdx.edu/ims/publications](http://www.pdx.edu/ims/publications)

*The report is sponsored by Partners in Diversity, www.partnersindiversity.org*

The report includes detailed occupational profiles for more than 200 occupations in 4 sectors. All of the occupations require no more than 2 years of post-high school education. Occupational profiles include:

- Description of educational requirements
- Wage distribution
- Race and ethnicity of current workers
- Citizenship of current workers
- English Language Learners

The report also examines 28 High Opportunity Occupations across those four sectors. These occupations have low to moderate educational requirements, higher than average pay, and higher than average anticipated growth.

*The report uses several data sources, including the U.S. Census Bureau’s Equal Employment Opportunity (EEO) file, a special tabulation of the American Community Survey (ACS). The more recent EEO data file compiles ACS data from the years 2006 to 2010. The report also uses several other data sources to obtain information about occupations and English Language Learners. For more information about the methodology and data sources, see the Methodology section of the full report.*
