HOW TO ORGANIZE PAGES

- stretching
 - ↳ arms/legs / ...
 - ↳ gear to prevent injuries
- race training
 - ↳ 5k, 10k, 1/2 m, marathon, ultra — tips w/ nutrition → gear to have
 - ↳ include mock schedules + plans
 - ↳ make your own routine, what to follow
- types of shoes
 - ↳ top 2015
 - ↳ racing
 - ↳ trail
 - ↳ xc distance

↳ looking out for support/protection/etc.
- how to improve
 - ↳ beginning/speed/distance / ...
- gear
- health
- delivery box?

#NIKE
energy, bold type

→ who's my inspiration
↳ web: it's good for ~~fun~~ resources
↳ static content

→ specific location? personal?

#guides (basic)
tried + true

social media interaction
videos / demos?
communicate w/ other runners
events

interactivity for less daunting

- articles?
- community interaction?
- maybe more mood based stuff?

→ box off to the side
*gifts of the stretching

GET YOUR RUN ON

RESEARCH

Q: What would you as a (beginner) runner like to see on a running website? What would be helpful?

A: I'd like to see articles on the shoes and gear. I don't know why that stuff is important or how it would benefit me.

A: Stretching! It would be super helpful to see a list of stretches that perhaps even some of us regular runners have forgotten about.

A: Maybe different workouts and training advice?

A: As a beginner, I want to know a good routine on beginning. Also, I know this sounds cheesy but defiantly inspirational quotes.

HOW TO BE A FASTER RUNNER

By Tim Lincecum

If you're looking to get faster, there are a few things you can do to improve your performance. First, make sure you're getting enough sleep. Sleep is essential for recovery and performance. Second, eat a healthy diet. Fuel your body with the right nutrients. Third, train consistently. Consistency is key to improvement. Fourth, listen to your body. Don't overtrain. Rest is just as important as training. Finally, stay motivated. Running is a marathon, not a sprint.

By Tim Lincecum

There are many ways to improve your running performance. One of the most effective is to focus on your form. Make sure your feet are landing directly under your hips. Another tip is to increase your cadence. Aim for 180 steps per minute. Finally, don't forget to stretch. Proper stretching can help prevent injuries and improve flexibility.

TOP SHOES OF 2015

By Tim Lincecum

The best running shoes of 2015 are the ones that provide the most support and cushioning. The Nike Air Max 270 is a top contender. It features a large air unit in the heel that provides excellent shock absorption. Another great option is the Adidas Ultraboost, which offers a responsive ride with its Boost midsole.

GET YOUR RUN ON

ELEMENTS

A dark gray provides creates a modern look and feel, while enhancing the concept of running. Being neutral, it allows for the imagery of the website to take lead without detracting from it. The sea blue also allows for easy legibility, as well as gives the site a refreshing and inviting look. The mustard yellow provides a warm and inviting accent of color to lighten up the site.

GET YOUR RUN ON

ELEMENTS

TITILLIUM WEB

With its angularity, Titillium Web makes it a great fit for Get Your Run On. It reflects the typography used in racing bibs and other running gear. Titillium Web gives a sense of fast movement with its curved angles, and being a slab serif, allows for easy reading—especially on the web.

EATING DURING TRAINING AND RACING

ALL RUNNERS REPORT TO THE STARTING LINE! Whether you're taking part in a major marathon or the local 5-kilometer turkey trot, those words can give any runner the jitters on the morning of the big race. You have logged many miles, on trail and treadmill, to get ready. But have you prepared nutritionally?

Training

The number of calories you need to consume daily depends on the duration and intensity of your workouts. Keep in mind that you'll burn roughly 100 calories for every mile you run, depending on your size. If you run four miles, you'll burn about 400 calories more than you would have if you hadn't exercised. You'll want to eat enough so you don't feel faint or weak toward the end of your workout, but don't use running as an excuse to eat everything in sight. Unless you're a high-mileage runner, your daily calorie needs aren't going to be dramatically higher than a non-runner's. You might want to consult with a sports nutritionist who can help you tailor an eating plan that's right for you.

Porter suggests aiming for the following breakdown for your daily meals: 60-70 percent of calories from carbohydrates (grains, pasta, bread, etc.)
20-30 percent of calories from fat sources (oils, avocados, nuts, etc.)
10-15 percent of calories from protein (fish, meat, chicken, beans, etc.)

In addition to getting you fit for race day, training provides you with the opportunity to practice your fluid-replacement strategies. You're going to need to drink regularly during long runs and in hot weather, so start

TIE YOUR PERFECT RUNNING SHOE

Loop Lacing

For a comfy instep: make a loop at the top of your shoe. This gives you a comfortable and snug fit to prevent the foot from moving around in the shoe, whatever terrain you are in.

GET YOUR RUN ON

FINAL WEBSITE

The Get Your Run On Website acts as inspiration for the potential, and already long time runners. There are splash pages of quotes to help motivate the viewer and get them excited about their run. There are also articles for runners to educate themselves and keep up with the essentials to know for running. The articles are kept on the right hand side to allow for the photographs to shine through. This additionally helps to create for an inviting website. It also makes for a clean website that is not cluttered by other articles and texts—similar to other running websites.

Imagery driven articles capture the essence of the topic and pairs photographs to demonstrate it. These pages allow for viewers to quickly sift through information. The visual photographs also illustrate the topic of discussion, so the viewer knows exactly what they are reading about.

GET YOUR RUN ON

FINAL APP

GET YOUR RUN ON

FINAL WEBSITE

The app, Run with Me, pairs with the website to further motivate the user. Run with Me helps to relieve the anxiety of running as it allows users to partake in the sport with other runners. Not only can people find other individuals to run with, but users can also sync with group's pages and find trails to run on. Runners can use the app in the way it will benefit them the most—whether running with people of the same pace, or finding a group to push and challenge them.

Additionally, there is a "High 5" feature that is great for runners to use on a solo run. It creates for a fun run as it alerts users of another runner within a 2 block radius that they can run to and give a high five.. Regardless of solo or group, Run with Me will track the users progress and is available to be viewed at any time.
