July 31, 1935

City Engineer

Bureau of Buildings

Mr. H. E. Plummer, Chief Bldg. Inspector

Front Avenue

I am transmitting herewith for your information a copy of Resolution No. 21083, adopted by the Council July 18, 1935.

This resolution directs the City Engineer to file with the Council a general plan for widening Front Avenue from Barbur Boulevard to the Steel bridge, also certain streets in the vicinity of the west approach to the Ross Island bridge and a new street, designated as Foothill Boulevard, from Front and Arthur Street to a connection with St. Helens Road.

It would be inadvisable for any new building construction to be started along the various routes contemplated in this resolution, and I would desire that all building permits for such new construction, as effected by this street widening project, be withheld and none issued until the Commissioner's office and City Engineer's office had been fully advised.

A large map showing in detail these proposed routes will be sent under separate cover.

Yours very truly,

ORMOND R. BEAN
