## STAFF REPORT

### CONSIDERATION OF RESOLUTION NO. 96-2442 FOR THE PURPOSE OF ENDORING A REGIONAL POSITION ON REAUTHORIZATION OF THE INTERMODAL SURFACE TRANSPORTATION EFFICIENCY ACT (ISTEA)

Date: December 24, 1996

Presented by: Andrew Cotugno

#### PROPOSED ACTION

This resolution adopts a regional policy position on the re-authorization of the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 to serve as the basis for a coordinated regional lobbying position as Congress considers its update during 1997. One of the key elements is to seek federal "New Rail Starts" funding for Phase I of the South/North LRT project. In conjunction with this request, this resolution commits \$55 million of Regional Surface Transportation Program (STP) funds to the project.

#### FACTUAL BACKGROUND AND ANALYSIS

When ISTEA was adopted in 1991, it established a significant national policy direction in support of multi-modal decision-making, funding flexibility, regional responsibility for decision-making, integration with local land use plans, partnership with state and local governments and increased public involvement. These provisions of ISTEA provided the Portland region a significant tool to meet its transportation and land use goals. This policy position paper, in large part, calls for continuing this policy direction with some refinements.

#### CONTINUE THE SUCCESSES OF ISTEA

Key provisions of ISTEA that should be continued include:

- Continuation of the MPO role in decision-making;
- Joint approval with the state of transportation funding allocations;
- Continuation of flexible funding programs, particularly the Surface Transportation Program, Congestion Mitigation/Air Quality Program and Transportation Enhancement Program;
- Continuation and expansion of the "New Rail Starts" Program;  
and
- Linkage of transportation decision-making to land use.

## REFINEMENTS TO ISTEA

Potential areas of refinement to ISTEA include:

- Expansion of innovative financing authority, including tolls and congestion pricing;
- Funding for State Infrastructure Banks (of which Oregon is one of ten);
- Shifting of 4.3 cents of gas tax from deficit reduction to transportation with a commensurate increase in transportation spending levels;
- Funding for high-speed rail, commuter rail and other intercity passenger services; and
- Expansion of funding flexibility for freight projects.

## WESTSIDE LRT

The 1991 ISTEA committed federal funding to the Westside LRT project to 185th Avenue. Subsequently, the Federal Transit Administration made a "contingent commitment" of \$74 million authorizing the extension to Hillsboro to begin construction. It is essential that this ISTEA include a firm commitment for this \$74 million and provide for the remaining \$100 million of appropriations toward the project.

## SOUTH/NORTH LRT - PHASE I

"New Rail Starts" funding is requested for a Phase I South/North LRT project. The amount requested is \$600 million, likely over the next two ISTEA's, on the basis of matching this amount with \$600 million of other local and regional funding sources.

The federal funding could be through a combination of funding authority in this ISTEA and "contingent commitment" against the next ISTEA. The specific cash flow and borrowing requirements should be adopted by the region in March 1997 specifying the details of this program.

The local and regional funding should be through use of the \$475 million of General Obligation bonds approved by the voters in 1994, allocation of \$55 million of Regional STP funds during the period 1999-2009 that would otherwise have been allocated to Tri-Met and commitment of other local and regional sources. The specific sources to commit should be included in the same financing plan to be adopted in March 1997.

BEFORE THE COUNCIL OF THE  
METROPOLITAN SERVICE DISTRICT

FOR THE PURPOSE OF ENDORSING A ) RESOLUTION NO. 96-2442  
REGIONAL POSITION ON REAUTHORIZATION )  
OF THE INTERMODAL SURFACE TRANSPOR- ) Introduced by  
TATION EFFICIENCY ACT (ISTEA) ) Mike Burton,  
Executive Officer

WHEREAS, The Intermodal Surface Transportation Efficiency Act (ISTEA) was adopted by Congress in 1991; and

WHEREAS, ISTEA is scheduled to expire at the end of federal Fiscal Year 1997 (September 30, 1997); and

WHEREAS, Congress will be considering reauthorization of ISTEA during 1997; and

WHEREAS, ISTEA has a significant policy effect on transportation planning and decision-making in the Portland region; and

WHEREAS, It is through ISTEA that federal "New Rail Starts" funding commitments are made; now, therefore,

BE IT RESOLVED,

That the Metro Council:

1. Endorses the ISTEA Position Paper as reflected in Exhibit A subject to coordination with ODOT on a statewide position.

2. Requests ISTEA "New Rail Starts" funding for Phase I of the South/North LRT project.

3. Commits \$55 million of Regional Surface Transportation Program (STP) funds to the South/North LRT project during the period FY 99-2009 that would otherwise have been allocated to Tri-Met and was previously committed to be transferred to the now

defunct "Transportation Equity Account." This allocation plus the 1994 voter-approved \$475 million of Tri-Met General Obligation bonds will provide the initial increment of local matching funds for the project.

ADOPTED by the Metro Council this \_\_\_\_\_ day of \_\_\_\_\_, 1997.

Jon Kvistad, Presiding Officer

ISTEA REAUTHORIZATION  
PORTLAND, OREGON  
REGIONAL POSITION PAPER  
~~FEBRUARY 15, 1996~~  
January 1997

This position paper should be viewed as a work in progress. ISTEA reauthorization will extend over the next nine ~~9-18~~ months during which time numerous proposals will surface which require further consideration by the Portland region. This position represents the region's starting place, thereby allowing these positions to be advocated through national organizations, before federal hearings and with the Oregon Congressional delegation. In addition, changes will be considered, if necessary, after coordination with other interests statewide through ODOT.

I. Introduction

The transportation providers of the Portland region believe there is a national interest in transportation that should be reflected in the programmatic emphasis in the next ISTEA. This national interest should focus on maintaining and improving metropolitan mobility to support the economic engines of the country and further international competitiveness. Second, it should maintain and improve vital connections between metropolitan areas. Finally, effective connections to international passenger and freight terminals to access the global marketplace are critical.

In order to ensure these national interests are accomplished through the distribution of federal transportation funds, a programmatic approach, rather than a block grant approach, is most appropriate. In this manner, the Federal Government can target its resources to the program areas that represent the national interest. The current ISTEA, with several improvements, provides an excellent model for such an approach to the next ISTEA. The ground-breaking changes in flexible financing, local control and public involvement embodied in the passage of ISTEA in 1991 were a major step forward in transportation development. Reauthorization of ISTEA should focus on building on the strengths of this landmark legislation rather than on major rollbacks or wholesale changes.

Reauthorization of ISTEA to include these provisions is integral to the Portland region's objectives for growth management and building a livable community. This region has strived to link transportation investments to land use decisions to achieve multiple objectives of preserving farm and forest lands, reinvesting in communities, meeting air quality standards and maintaining a livable region in the

face of massive growth. It is essential that the Federal Government maintain its partnership with the Portland region through the reauthorization of ISTEA.

The region would like to highlight the following issues for consideration during the reauthorization of ISTEA:

## II. Substantive Issues

1. MPO Role in Decision-Making. We believe that the increased local and state role in transportation decision-making is one of the most important advances in ISTEA. The region strongly supports continuing a strong MPO role in planning, project selection, joint TIP/STIP approval, and public involvement. The MPO role in ISTEA has improved the partnership of local government officials, state departments of transportation and other transportation interests and should be reinforced in reauthorization.
2. Joint MPO/State DOT Approval of TIPs. Joint approval of state and metropolitan Transportation Improvement Programs (TIP) in each metropolitan area ensures a partnership approach to solving transportation problems. Typically, the state DOT is responsible for only a part of the transportation system and cities, counties, transit districts and port districts are responsible for the balance. Through a partnership approach, transportation investment decisions can be made to ensure the system as a whole meets the needs of the public and responds to the federal interest. Often in a complex metropolitan area, trade-off decisions must be made to determine which improvements to which part of the system can most effectively meet the needs. In addition, it is critical that transportation investment decisions are coordinated with land use decisions for the region which typically rest with local governments rather than the state DOT. Joint approval of the TIP assures that all parties responsible for the transportation system are party to making the priority decisions about its improvement.
3. Flexible Funding. The region supports maintaining and, where appropriate, expanding flexible funding. Flexibility gives local and state governments and citizens the opportunity to craft the most appropriate local solutions to transportation needs. Flexible funding has been a key component of this region's effort to respond to the demands of growth, address congestion and freight mobility needs and preserve livability and environmental quality.

While the region supports continuing the existing categories for Surface Transportation Program funds, Transportation Enhancement funds, and Congestion Mitigation/Air Quality funds, including metropolitan set-asides, there should not be any additional categorical funding allocations in the next ISTEA if they have the effect, particularly in the environment of reduced or level funding, of actually reducing rather than increasing flexibility. This can occur if there is less funding split up among more categories. The region supports expanding the flexibility of existing STP and CMAQ funds to address capital improvements to freight rail and intermodal facilities. In addition, the region supports maintaining the existing flexibility provisions for the NHS program.

4. Reject Rollbacks and Devolution. The region does not support the rollback or elimination of major elements of ISTEA, such as local control, public involvement or joint MPO/state DOT approval of TIP/STIP or the "devolution" of the federal program and its return to the states. The passage of ISTEA resulted in improved coordination between the state, region and federal transportation providers. The benefits to the taxpayers are a more efficient use of existing transportation investments and the construction of new investments that best reflect their individual community needs. In this region, the experience of ISTEA has been a positive one and has resulted in a greater degree of public involvement in and support for the transportation investments. In addition, it is problematic for states to adopt sufficient tax increases to offset the elimination of the federal program.
5. Discretionary Section 3 "New Start" Program. The region supports the continuation of a discretionary Section 3 "New Starts" program. The program has been shown to be an effective way for urban areas to implement large-scale innovative transit alternatives to new freeway construction. Opportunities to leverage private sector investments are substantially enhanced with the existence of a categorical program and predictable funding allocations. The existence of a categorical program and the scale of investment accommodated by the New Start program is critical to the integration of long-range transit development and land use planning efforts such as that underway in the Portland region.
6. New Start Evaluation and Land Use Benefits. The region believes that one of the most important benefits of the Section 3 New Start program is the opportunity it offers communities to reduce urban sprawl and its associated

costs. The new ISTEA should direct FTA to include the benefits of improved land use and the reduced costs of sprawl in the analysis for new rail projects. Projects which can demonstrate the reduced costs of sprawl through legally binding land use requirements should be given additional consideration in the allocation of New Start funding.

FTA should be encouraged to continue its efforts to include in its evaluations the value of reduced sprawl, reduced utility costs, road construction and maintenance costs, air pollution and other benefits associated with the more compact development pattern attainable with integrated transit development and land use planning.

7. Blanket Authorization of Contingent Commitments and Existing Full-Funding Grant Agreements. The region supports the "en bloc" authorization of contingent commitment projects and carryover Full-Funding Grant Agreements. Failure to authorize these projects would unfairly penalize communities that have moved forward with the expenditure of local and state funds under the spirit and the letter of ISTEA's contingent commitment provisions. The level of local trust and cooperation with the Federal Government would be seriously harmed if contingent commitment projects are not authorized as indicated in ISTEA. Not authorizing contingent commitment projects will send a signal to the private sector that public sector financing is unreliable and would reduce future opportunities for public-private ventures. "En bloc" reauthorization of carryover Full-Funding Grant Agreements is critical to complete projects in mid-stream. In many cases, appropriations for these projects have not kept pace with the amount authorized in the current ISTEA and contracted for in these Full-funding Grant Agreements. The remaining appropriation must be provided for in the next ISTEA.
8. Innovative Financing. Steps taken in ISTEA to authorize innovative methods for financing transportation facilities is very helpful. These should be nurtured and expanded in the next ISTEA authorization bill. The flexible funding provisions of ISTEA provided important new tools for local communities to address their transportation needs. However, transportation infrastructure needs still far outstrip local, state and federal resources. Additional innovative financing mechanisms should be explored and local jurisdictions, MPOs and states should be given a broader range of tools to address funding shortfalls. In particular, the region supports expanded authority for tolling federal facilities to address mobility, freight movement and

congestion demands. Secondly, the Congestion Pricing authority should be retained and funded. Third, expanded opportunities for public-private partnerships could allow greater private sector participation in transportation financing. Fourth, expanded methods of providing the required local match should be retained and enhanced. Finally, the pilot effort to implement "Infrastructure Banks" should continue, and be made permanent and should be capitalized with federal seed money.

9. Increased Funding. ISTEA recognized the critical link between transportation investments and economic development, increased productivity and individual opportunity. Funding for ISTEA programs should be increased to reflect this critical linkage. To maintain the equity and flexibility in ISTEA, the existing 80/20 funding ratios between highways and transit should remain constant.
10. Many of the highway funding distribution formulas are biased against Oregon, resulting in the state being in a "donor" status, paying more into the federal trust fund than returns through ISTEA. These formulas should be revisited to correct this problem.
11. 4.3 cents of the federal fuel tax is now being used for deficit reduction. When this tax increase was adopted by Congress, it was on the basis of being an interim measure and the commitment was made to return this to the Highway and Transit Trust Funds. This commitment should be fulfilled through a shift of this 4.3 cents to: 1) one-half cent for passenger rail; 2) 80 percent of the balance to the Highway Trust Fund; and 3) 20 percent of the balance to the Transit Trust Fund with an associated increase in spending authority in these areas.
- 12+5. The High-Speed Rail Program within ISTEA should be reauthorized for the five selected priority corridors, including the Cascadia Corridor from Eugene, Oregon to Vancouver, B.C. There are important trackway improvements needed within the Portland metro area to improve speed and safety. In addition, the Portland region benefits from improved service (speed and frequency) to Eugene, Seattle and Vancouver, B.C.

Associated with this, one-half cent of the 4.3-cent gas tax now dedicated to deficit reduction should be committed to intercity passenger services, capital improvements, such as high-speed rail, intercity bus, Amtrak and commuter rail. This program would provide

for grants and loan guarantees to such applicants as ODOT, transit districts, Amtrak and local governments.

13. NHS Priority Corridors. ISTEA designated several high priority NHS corridors throughout the nation. These corridors receive special funding for capital improvements. Oregon in cooperation with Washington and California should seek special status for I-5 as an NHS Priority Corridor. With the passage of NAFTA, this special designation is of even greater importance.
14. Match Ratios. Oregon should oppose any attempts to change the match ratios as outlined in ISTEA. Oregon benefits from the sliding scale match ratio provisions of ISTEA tied to federal lands within the state and should advocate for their inclusion in the next ISTEA.
1516. Fiscal Constraint. The current requirement to base transportation plans and programs on realistic revenue forecasts should be continued. This requirement has brought about more realistic plans rather than simply a "wish list" and therefore greater attention to funding decisions which assume more cost-effective projects. However, equal attention should be paid to a "vision" plan to provide the basis for pursuing the funding needed to accomplish that vision.
1612. Oregon is facing a severe shortfall in meeting its Transportation Capital needs. This has been exacerbated by federal funding cuts and lack of action by the Oregon Legislature to meet the need. Most recently, ODOT was forced to cut \$400 million from its Modernization Program. Highway "Demo" projects represent a possibility for helping to meet these needs. The state should submit projects that have the greatest likelihood of being included as "Demo" projects.

## Project Priorities

FY 97 is the final year of ISTEA which was adopted in 1991. In 1996, both consideration of the FY 98-2003 ISTEA and the FY 97 Appropriations Bill will provide opportunities to consider earmarking projects. The following priorities should be considered for funding through the ISTEA reauthorization or appropriations. This list should be accepted on a preliminary basis to allow for coordination with ODOT on statewide priorities. It may be necessary to add projects elsewhere in the state or delete some Portland area projects. The "Regional Priority Projects" are endorsed as priorities for all jurisdictions of the region while the other projects are a priority for individual jurisdictions.

### A. Regional Priority Projects

1. Completion of Westside/Hillsboro LRT project - Section 3.

\$74 million of "contingent commitment" for the Hillsboro extension must be authorized in ISTEA; in addition, approximately \$100 million remains to be authorized in the ISTEA update and appropriated in FY 98 for this project. In addition, appropriations remain for FY 97 and FY 98.

2. Initiation of South/North LRT project - Section 3.

\$750 million for segment 1 of the South/North LRT project should be sought in the ISTEA update. Finally, it is important It is the intent of the region to re-examine the scope and cost of the South/North project alternatives now under consideration in order to define a Phase I project that meets regional objectives within a \$1.2 billion budget and to seek \$600 million of federal "New Rail Starts" funding to match local and regional sources to construct this Phase I project. In March 1997, the region will amend the alternatives now under consideration in the Draft EIS to provide choices that meet these criteria.

In order to accomplish this, it will be necessary to include funding and legal provisions in the next ISTEA to enable building the project in the period between 1999 and 2006. This would likely require partial funding in the next ISTEA and a commitment to complete the funding in the following ISTEA.

Also needed to accomplish this is a local and regional commitment to \$600 million over this same time period. Consideration should be given to various local and regional sources in addition to the \$475 million 1994 General Obligation Bond Measure and the \$55 million of regional STP funds that would otherwise have been transferred downstate.

The region will consider adoption of a detailed financial plan for this proposal in March 1997.

3. Deepening of the Columbia River Ship Channel - Corps of Engineers.

The Port of Portland, in cooperation with other Columbia River ports, is seeking Corps of Engineers funding to deepen the Columbia River ship channel to accommodate larger ocean-going vessels. This is critical to the international competitiveness of the Portland area and the greater Columbia River Basin and directly tied to truck and freight rail access improvements in the Rivergate area.

We strongly support full funding in Fiscal Year 1998 for the U.S. Army Corps of Engineers' next phase of the feasibility study for the Columbia River channel deepening.

The region also encourages Congress to approve bill language to provide a contingent authorization, subject to required environmental, economic and engineering reviews, for the channel project. This authorization is a critical step in keeping the project on schedule for construction early in the next decade.

B. Local or Agency Priority Projects

1. I-5/Highway 217/Kruse Way Interchange - FHWA Demo project.

A revised design has been developed and endorsed by ODOT, the affected local governments and Metro. \$38 million of Highway Demonstration funds or Interstate Discretionary funds would allow this critical I-5 bottleneck and safety problem to be corrected.

2. Sunnybrook Interchange - FHWA Demo project.

Project development on this project is nearly complete. \$14 million of Highway Demonstration funds or Interstate Discretionary funds in combination with previously committed ODOT and local funds would allow this project to proceed on schedule.

3. South Rivergate Railroad Overcrossing - FHWA Demo project.

Columbia River channel dredging and Rivergate rail improvements are increasing the cargo movements into and out of the Rivergate port terminals. \$15 million of Highway Demonstration funds for this railroad grade separation would enhance truck access to these terminals.

4. Sunset Highway - Phase III.

The Westside Corridor Project included both LRT to Hillsboro and Sunset Highway improvements. The Sunset Highway projects, however, have been delayed due to lack of funding. This \$27 million would allow the next logical phase to proceed.

54. Lovejoy Ramp Removal/Broadway Bridge Rehabilitation - FHWA Demo and Bridge Program.

Replacement of the Lovejoy ramp in the River district and upgrade to the Broadway Bridge will enable major redevelopment in this Central City district. \$15 million of Highway Demonstration funds and \$10 million of Highway Bridge Repair and Replacement funds would allow these projects to proceed.

65. ~~Seek Congressional support for designating Oregon for one of the 10 pilot Infrastructure Bank projects, to have the bank capitalized and available for such projects as the Tualatin Expressway and cash flow management for the Westside LRT project.~~

Seek federal discretionary funds to "capitalize" the Oregon State Infrastructure Bank for such projects as the Tualatin Expressway and cash flow management for the Westside LRT project.

76. 242nd Avenue/I-84 Connection: Mt. Hood Parkway Interim Improvement.

242nd Avenue is the region's designated NHS corridor connection between I-84 and U.S. 26. Existing roads in this corridor are poorly connected to these highways or provide less direct travel into and out of the region for autos and substantial truck movements.

The proposed project will provide for a more direct connection to I-84 by extending 242nd Avenue northerly from Glisan Street to Sandy Boulevard and connecting to I-84 via ramps. Development of this alignment will replace a hazardous, steep three-lane road (238th Avenue) which has a high accident rate and must be closed during icy conditions. Existing East County streets used for travel into and through the region are projected to suffer from increased congestion. Thus a more direct route with access control and with some operational changes can better serve these substantial non-local traffic movements.

Much of the right-of-way is currently owned by Multnomah County and ODOT. Project cost for project construction is \$20 million. An additional \$5 million is proposed to

make operational enhancements to the existing 242nd Avenue to improve flow and eliminate bottlenecks.

87. Cornell @ Cornelius Pass and Baseline @ 185th Intersections.

Implementation of the Region 2040 Growth Concept in the vicinity of the Westside LRT project creates the need to also provide road improvements. combined with a proposal to restrict the size of Cornell Road from seven to five lanes west of this intersection results in the need for grade-separated intersections and/or addition of a new arterial connection. This \$12 million demonstration project will identify and construct the correct solution to accommodate the land use regime the region desires for this area.

98. Willamette Valley High-Speed Rail - High-Speed Rail Account.

\$25 million should be sought for track upgrade to improve speed and safety. The Eugene to Vancouver, B.C. corridor is one of five priority corridors selected by USDOT following establishment of the High-Speed Rail Program in the last ISTEA.

109. Transit-Oriented Development Revolving Fund - Section 3.

In 1994, \$3 million of Regional STP funds were allocated to establish this revolving fund. Initiation of the grant application through the Federal Transit Administration is now in progress. In addition, \$10 million of Section 3 funds would allow additional projects adjacent to LRT to be implemented.

11. Federal demonstration funds for a regional "Intelligent Transportation System" should be sought. This technology shows promise to improve the efficiency of the region's freeway, arterial and transit systems.

The criteria for recommending these projects is as follows:

1. Projects are of statewide significance.
2. Projects can be built within the timeframe of the next ISTEA bill (1998-2003).
3. There is a strong base of support for the project within the governments and community organizations.
4. The proposal would bring new funds to the state, not merely result in reallocation of existing funds.
5. Members of the Congressional delegation express a willingness to pursue the project.

6. There should be a short list of priorities.
7. The list should be integrated with ODOT's statewide priorities.

~~In addition, Portland State University is seeking funds to proceed with its University Center building located at a key South/North Light Rail station. They have adopted a master plan with a strong focus on transit for student, faculty and public access.~~

STAFF REPORT

CONSIDERATION OF RESOLUTION NO. 96-2442 FOR THE PURPOSE OF  
ENDORING A REGIONAL POSITION ON REAUTHORIZATION OF THE  
INTERMODAL SURFACE TRANSPORTATION EFFICIENCY ACT (ISTEA)

Date: December 24, 1996

Presented by: Andrew Cotugno

PROPOSED ACTION

This resolution adopts a regional policy position on the re-authorization of the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 to serve as the basis for a coordinated regional lobbying position as Congress considers its update during 1997. One of the key elements is to seek federal "New Rail Starts" funding for Phase I of the South/North LRT project. In conjunction with this request, this resolution commits \$55 million of Regional Surface Transportation Program (STP) funds to the project.

FACTUAL BACKGROUND AND ANALYSIS

When ISTEA was adopted in 1991, it established a significant national policy direction in support of multi-modal decision-making, funding flexibility, regional responsibility for decision-making, integration with local land use plans, partnership with state and local governments and increased public involvement. These provisions of ISTEA provided the Portland region a significant tool to meet its transportation and land use goals. This policy position paper, in large part, calls for continuing this policy direction with some refinements.

CONTINUE THE SUCCESSES OF ISTEA

Key provisions of ISTEA that should be continued include:

- Continuation of the MPO role in decision-making;
- Joint approval with the state of transportation funding allocations;
- Continuation of flexible funding programs, particularly the Surface Transportation Program, Congestion Mitigation/Air Quality Program and Transportation Enhancement Program;
- Continuation and expansion of the "New Rail Starts" Program;  
and
- Linkage of transportation decision-making to land use.

## REFINEMENTS TO ISTEА

Potential areas of refinement to ISTEА include:

- Expansion of innovative financing authority, including tolls and congestion pricing;
- Funding for State Infrastructure Banks (of which Oregon is one of ten);
- Shifting of 4.3 cents of gas tax from deficit reduction to transportation with a commensurate increase in transportation spending levels;
- Funding for high-speed rail, commuter rail and other intercity passenger services; and
- Expansion of funding flexibility for freight projects.

## WESTSIDE LRT

The 1991 ISTEА committed federal funding to the Westside LRT project to 185th Avenue. Subsequently, the Federal Transit Administration made a "contingent commitment" of \$74 million authorizing the extension to Hillsboro to begin construction. It is essential that this ISTEА include a firm commitment for this \$74 million and provide for the remaining \$100 million of appropriations toward the project.

## SOUTH/NORTH LRT - PHASE I

"New Rail Starts" funding is requested for a Phase I South/North LRT project. The amount requested is \$600 million, likely over the next two ISTEAs, on the basis of matching this amount with \$600 million of other local and regional funding sources.

The federal funding could be through a combination of funding authority in this ISTEА and "contingent commitment" against the next ISTEА. The specific cash flow and borrowing requirements should be adopted by the region in March 1997 specifying the details of this program.

The local and regional funding should be through use of the \$475 million of General Obligation bonds approved by the voters in 1994, allocation of \$55 million of Regional STP funds during the period 1999-2009 that would otherwise have been allocated to Tri-Met and commitment of other local and regional sources. The specific sources to commit should be included in the same financing plan to be adopted in March 1997.

BEFORE THE COUNCIL OF THE  
METROPOLITAN SERVICE DISTRICT

FOR THE PURPOSE OF ENDORSING A ) RESOLUTION NO. 96-2442  
REGIONAL POSITION ON REAUTHORIZATION )  
OF THE INTERMODAL SURFACE TRANSPOR- ) Introduced by  
TATION EFFICIENCY ACT (ISTEA) ) Mike Burton,  
Executive Officer

WHEREAS, The Intermodal Surface Transportation Efficiency Act (ISTEA) was adopted by Congress in 1991; and

WHEREAS, ISTEA is scheduled to expire at the end of federal Fiscal Year 1997 (September 30, 1997); and

WHEREAS, Congress will be considering reauthorization of ISTEA during 1997; and

WHEREAS, ISTEA has a significant policy effect on transportation planning and decision-making in the Portland region; and

WHEREAS, It is through ISTEA that federal "New Rail Starts" funding commitments are made; now, therefore,

BE IT RESOLVED,

That the Metro Council:

1. Endorses the ISTEA Position Paper as reflected in Exhibit A subject to coordination with ODOT on a statewide position.

2. Requests \$600 million ISTEA "New Rail Starts" funding for Phase I of the South/North LRT project.

3. Commits \$55 million of Regional Surface Transportation Program (STP) funds to the South/North LRT project during the period FY 99-2009 that would otherwise have been allocated to Tri-Met and was previously committed to be transferred to the now

defunct "Transportation Equity Account." This allocation plus the 1994 voter-approved \$475 million of Tri-Met General Obligation bonds will provide the initial increment of local matching funds for the project.

ISTEA REAUTHORIZATION  
PORTLAND, OREGON  
REGIONAL POSITION PAPER  
~~FEBRUARY 15, 1996~~  
January 1997

This position paper should be viewed as a work in progress. ISTEA reauthorization will extend over the next nine ~~9-18~~ months during which time numerous proposals will surface which require further consideration by the Portland region. This position represents the region's starting place, thereby allowing these positions to be advocated through national organizations, before federal hearings and with the Oregon Congressional delegation. In addition, changes will be considered, if necessary, after coordination with other interests statewide through ODOT.

I. Introduction

The transportation providers of the Portland region believe there is a national interest in transportation that should be reflected in the programmatic emphasis in the next ISTEA. This national interest should focus on maintaining and improving metropolitan mobility to support the economic engines of the country and further international competitiveness. Second, it should maintain and improve vital connections between metropolitan areas. Finally, effective connections to international passenger and freight terminals to access the global marketplace are critical.

In order to ensure these national interests are accomplished through the distribution of federal transportation funds, a programmatic approach, rather than a block grant approach, is most appropriate. In this manner, the Federal Government can target its resources to the program areas that represent the national interest. The current ISTEA, with several improvements, provides an excellent model for such an approach to the next ISTEA. The ground-breaking changes in flexible financing, local control and public involvement embodied in the passage of ISTEA in 1991 were a major step forward in transportation development. Reauthorization of ISTEA should focus on building on the strengths of this landmark legislation rather than on major rollbacks or wholesale changes.

Reauthorization of ISTEA to include these provisions is integral to the Portland region's objectives for growth management and building a livable community. This region has strived to link transportation investments to land use decisions to achieve multiple objectives of preserving farm and forest lands, reinvesting in communities, meeting air quality standards and maintaining a livable region in the

face of massive growth. It is essential that the Federal Government maintain its partnership with the Portland region through the reauthorization of ISTEA.

The region would like to highlight the following issues for consideration during the reauthorization of ISTEA:

## II. Substantive Issues

1. **MPO Role in Decision-Making.** We believe that the increased local and state role in transportation decision-making is one of the most important advances in ISTEA. The region strongly supports continuing a strong MPO role in planning, project selection, joint TIP/STIP approval, and public involvement. The MPO role in ISTEA has improved the partnership of local government officials, state departments of transportation and other transportation interests and should be reinforced in reauthorization.
2. **Joint MPO/State DOT Approval of TIPS.** Joint approval of state and metropolitan Transportation Improvement Programs (TIP) in each metropolitan area ensures a partnership approach to solving transportation problems. Typically, the state DOT is responsible for only a part of the transportation system and cities, counties, transit districts and port districts are responsible for the balance. Through a partnership approach, transportation investment decisions can be made to ensure the system as a whole meets the needs of the public and responds to the federal interest. Often in a complex metropolitan area, trade-off decisions must be made to determine which improvements to which part of the system can most effectively meet the needs. In addition, it is critical that transportation investment decisions are coordinated with land use decisions for the region which typically rest with local governments rather than the state DOT. Joint approval of the TIP assures that all parties responsible for the transportation system are party to making the priority decisions about its improvement.
3. **Flexible Funding.** The region supports maintaining and, where appropriate, expanding flexible funding. Flexibility gives local and state governments and citizens the opportunity to craft the most appropriate local solutions to transportation needs. Flexible funding has been a key component of this region's effort to respond to the demands of growth, address congestion and freight mobility needs and preserve livability and environmental quality.

While the region supports continuing the existing categories for Surface Transportation Program funds, Transportation Enhancement funds, and Congestion Mitigation/Air Quality funds, including metropolitan set-asides, there should not be any additional categorical funding allocations in the next ISTEA if they have the effect, particularly in the environment of reduced or level funding, of actually reducing rather than increasing flexibility. This can occur if there is less funding split up among more categories. The region supports expanding the flexibility of existing STP and CMAQ funds to address capital improvements to freight rail and intermodal facilities. In addition, the region supports maintaining the existing flexibility provisions for the NHS program.

4. Reject Rollbacks and Devolution. The region does not support the rollback or elimination of major elements of ISTEA, such as local control, public involvement or joint MPO/state DOT approval of TIP/STIP or the "devolution" of the federal program and its return to the states. The passage of ISTEA resulted in improved coordination between the state, region and federal transportation providers. The benefits to the taxpayers are a more efficient use of existing transportation investments and the construction of new investments that best reflect their individual community needs. In this region, the experience of ISTEA has been a positive one and has resulted in a greater degree of public involvement in and support for the transportation investments. In addition, it is problematic for states to adopt sufficient tax increases to offset the elimination of the federal program.
5. Discretionary Section 3 "New Start" Program. The region supports the continuation of a discretionary Section 3 "New Starts" program. The program has been shown to be an effective way for urban areas to implement large-scale innovative transit alternatives to new freeway construction. Opportunities to leverage private sector investments are substantially enhanced with the existence of a categorical program and predictable funding allocations. The existence of a categorical program and the scale of investment accommodated by the New Start program is critical to the integration of long-range transit development and land use planning efforts such as that underway in the Portland region.
6. New Start Evaluation and Land Use Benefits. The region believes that one of the most important benefits of the Section 3 New Start program is the opportunity it offers communities to reduce urban sprawl and its associated

costs. The new ISTEA should direct FTA to include the benefits of improved land use and the reduced costs of sprawl in the analysis for new rail projects. Projects which can demonstrate the reduced costs of sprawl through legally binding land use requirements should be given additional consideration in the allocation of New Start funding.

FTA should be encouraged to continue its efforts to include in its evaluations the value of reduced sprawl, reduced utility costs, road construction and maintenance costs, air pollution and other benefits associated with the more compact development pattern attainable with integrated transit development and land use planning.

7. Blanket Authorization of Contingent Commitments and Existing Full-Funding Grant Agreements. The region supports the "en bloc" authorization of contingent commitment projects and carryover Full-Funding Grant Agreements. Failure to authorize these projects would unfairly penalize communities that have moved forward with the expenditure of local and state funds under the spirit and the letter of ISTEA's contingent commitment provisions. The level of local trust and cooperation with the Federal Government would be seriously harmed if contingent commitment projects are not authorized as indicated in ISTEA. Not authorizing contingent commitment projects will send a signal to the private sector that public sector financing is unreliable and would reduce future opportunities for public-private ventures. "En bloc" reauthorization of carryover Full-Funding Grant Agreements is critical to complete projects in mid-stream. In many cases, appropriations for these projects have not kept pace with the amount authorized in the current ISTEA and contracted for in these Full-funding Grant Agreements. The remaining appropriation must be provided for in the next ISTEA.
8. Innovative Financing. Steps taken in ISTEA to authorize innovative methods for financing transportation facilities is very helpful. These should be nurtured and expanded in the next ISTEA authorization bill. The flexible funding provisions of ISTEA provided important new tools for local communities to address their transportation needs. However, transportation infrastructure needs still far outstrip local, state and federal resources. Additional innovative financing mechanisms should be explored and local jurisdictions, MPOs and states should be given a broader range of tools to address funding shortfalls. In particular, the region supports expanded authority for tolling federal facilities to address mobility, freight movement and

congestion demands. Secondly, the Congestion Pricing authority should be retained and funded. Third, expanded opportunities for public-private partnerships could allow greater private sector participation in transportation financing. Fourth, expanded methods of providing the required local match should be retained and enhanced. Finally, the pilot effort to implement "Infrastructure Banks" should continue, and be made permanent and should be capitalized with federal seed money.

9. Congestion Pricing. The Congestion Pricing PILOT Program should be retained and funded. Market-based mechanisms have proven ability to manage demand with limited resources. The PILOT program to date has been instrumental in promoting the effectiveness of market policies to significantly reduce peak period congestion. By allowing regions around the country to intensively study the concept, the PILOT program has significantly furthered the understanding of the role that congestion pricing can play in managing transportation costs while enhancing mobility. The recent opening of State Route 91 in California and the High Occupancy Toll Lanes in San Diego and the high level of public acceptance in recent public opinion surveys conducted as part of the Southern California Council of Governments and the San Francisco Bay Bridge projects demonstrate the growing support for congestion pricing. Like any policy which involves a dramatic change in behavior among the general populous, implementations of congestion pricing face enormous challenges in terms of public education and acceptance. The program is now poised to capitalize on the concrete successes in a variety of locations around the country. The Portland metropolitan region is currently in the midst of a study which is exploring the potential of this tool to play a key role in our regional transportation future. The region is interested in having access to funding through the PILOT program should it conclude congestion pricing is an appropriate tool to implement in the Portland region.

109. Increased Funding. ISTEA recognized the critical link between transportation investments and economic development, increased productivity and individual opportunity. Funding for ISTEA programs should be increased to reflect this critical linkage. To maintain the equity and flexibility in ISTEA, the existing 80/20 funding ratios between highways and transit should remain constant.

110. Many of the highway funding distribution formulas are biased against Oregon, resulting in the state being in a

than returns through ISTEA. These formulas should be revisited to correct this problem.

- ~~1211~~. 4.3 cents of the federal fuel tax is now being used for deficit reduction. When this tax increase was adopted by Congress, it was on the basis of being an interim measure and the commitment was made to return this to the Highway and Transit Trust Funds. This commitment should be fulfilled through a shift of this 4.3 cents to: 1) one-half cent for passenger rail; 2) 80 percent of the balance to the Highway Trust Fund; and 3) 20 percent of the balance to the Transit Trust Fund with an associated increase in spending authority in these areas.
- ~~1315~~. The High-Speed Rail Program within ISTEA should be reauthorized for the five selected priority corridors, including the Cascadia Corridor from Eugene, Oregon to Vancouver, B.C. There are important trackway improvements needed within the Portland metro area to improve speed and safety. In addition, the Portland region benefits from improved service (speed and frequency) to Eugene, Seattle and Vancouver, B.C.
- Associated with this, one-half cent of the 4.3-cent gas tax now dedicated to deficit reduction should be committed to intercity passenger services, capital improvements, such as high-speed rail, intercity bus, Amtrak and commuter rail. This program would provide for grants and loan guarantees to such applicants as ODOT, transit districts, Amtrak and local governments.
- ~~1413~~. NHS Priority Corridors. ISTEA designated several high priority NHS corridors throughout the nation. These corridors receive special funding for capital improvements. Oregon in cooperation with Washington and California should seek special status for I-5 as an NHS Priority Corridor. With the passage of NAFTA, this special designation is of even greater importance.
- ~~1514~~. Match Ratios. Oregon should oppose any attempts to change the match ratios as outlined in ISTEA. Oregon benefits from the sliding scale match ratio provisions of ISTEA tied to federal lands within the state and should advocate for their inclusion in the next ISTEA. In addition, ISTEA should explicitly allow "over-matching" federal funds with a higher than required local match.
- ~~1616~~. Fiscal Constraint. The current requirement to base transportation plans and programs on realistic revenue forecasts should be continued. This requirement has

forecasts should be continued. This requirement has brought about more realistic plans rather than simply a "wish list" and therefore greater attention to funding decisions which assume more cost-effective projects. However, equal attention should be paid to a "vision" plan to provide the basis for pursuing the funding needed to accomplish that vision.

1712. Oregon is facing a severe shortfall in meeting its Transportation Capital needs. This has been exacerbated by federal funding cuts and lack of action by the Oregon Legislature to meet the need. Most recently, ODOT was forced to cut \$400 million from its Modernization Program. Highway "Demo" projects represent a possibility for helping to meet these needs. The state should submit projects that have the greatest likelihood of being included as "Demo" projects.

## Project Priorities

FY 97 is the final year of ISTEA which was adopted in 1991. In 1996, both consideration of the FY 98-2003 ISTEA and the FY 97 Appropriations Bill will provide opportunities to consider earmarking projects. The following priorities should be considered for funding through the ISTEA reauthorization or appropriations or other legislative actions. This list should be accepted on a preliminary basis to allow for coordination with ODOT on statewide priorities. It may be necessary to add projects elsewhere in the state or delete some Portland area projects. The "Regional Priority Projects" are endorsed as priorities for all jurisdictions of the region while the other projects are a priority for individual jurisdictions.

### A. Regional Priority Projects

1. Completion of Westside/Hillsboro LRT project - Section 3.

\$74 million of "contingent commitment" for the Hillsboro extension must be authorized in ISTEA; in addition, approximately \$100 million remains to be authorized in the ISTEA update and appropriated in FY 98 for this project. In addition, appropriations remain for FY 97 and FY 98.

2. Initiation of South/North LRT project - Section 3.

\$750 million for segment 1 of the South/North LRT project should be sought in the ISTEA update. Finally, it is important It is the intent of the region to re-examine the scope and cost of the South/North project alternatives now under consideration in order to define a Phase I project that meets regional objectives within a more constrained budget and to seek \$600 million of federal "New Rail Starts" funding to match local and regional sources to construct this Phase I project. In March 1997, the region will amend the alternatives now under consideration in the Draft EIS to provide choices that meet these criteria.

In order to accomplish this, it will be necessary to include funding and legal provisions in the next ISTEA to enable building the project in the period between 1999 and 2006. This may require partial funding in the next ISTEA and a commitment to complete the funding in the following ISTEA.

Also needed to accomplish this is a local and regional commitment to \$600 million over this same time period. Consideration should be given to various local and regional sources in addition to the \$475 million 1994 General Obligation Bond Measure and the \$55 million of regional STP funds that would otherwise have been

transferred downstate.

The region will consider adoption of a detailed financial plan for this proposal in March 1997.

3. Deepening of the Columbia River Ship Channel - Corps of Engineers.

The Port of Portland, in cooperation with other Columbia River ports, is seeking Corps of Engineers funding to deepen the Columbia River ship channel to accommodate larger ocean-going vessels. This is critical to the international competitiveness of the Portland area and the greater Columbia River Basin and directly tied to truck and freight rail access improvements in the Rivergate area.

We strongly support full continued funding of \$725,000 per year in Fiscal Years 1998 and 1999 for the U.S. Army Corps of Engineers' next phase completion of the feasibility and environmental studies for the Columbia River channel deepening.

The region also encourages Congress to approve bill language to provide a contingent authorization of \$65 million for the federal share of the project, subject to required environmental, economic and engineering reviews, ~~for the channel project.~~ This authorization is a critical step in keeping the project on schedule for construction early in the next decade.

#### B. Local or Agency Priority Projects

1. I-5/Highway 217/Kruse Way Interchange - FHWA Demo project.

A revised design has been developed and endorsed by ODOT, the affected local governments and Metro. \$38 million of Highway Demonstration funds or Interstate Discretionary funds would allow this critical I-5 bottleneck and safety problem to be corrected.

2. Sunnybrook Interchange - FHWA Demo project.

Project development on this project is nearly complete. \$14 million of Highway Demonstration funds or Interstate Discretionary funds in combination with previously committed ODOT and local funds would allow this project to proceed on schedule.

3. South Rivergate Railroad Overcrossing/Columbia Boulevard Corridor - FHWA Demo project.

Columbia River channel dredging and Rivergate rail improvements are increasing the cargo movements into and

out of the Rivergate port terminals. \$15 million of Highway Demonstration funds for this railroad grade separation would enhance truck access to these terminals. This project is the second in a series of planned improvements in the Columbia Boulevard corridor between Rivergate and I-205.

4. Sunset Highway - Phase III.

The Westside Corridor Project included both LRT to Hillsboro and Sunset Highway improvements. The Sunset Highway projects, however, have been delayed due to lack of funding. This \$27 million would allow the next logical phase to proceed.

54. Lovejoy Ramp Removal/Broadway Bridge Rehabilitation - FHWA Demo and Bridge Program.

Replacement of the Lovejoy ramp in the River district and upgrade to the Broadway Bridge will enable major redevelopment in this Central City district. \$15 million of Highway Demonstration funds and \$10 million of Highway Bridge Repair and Replacement funds would allow these projects to proceed.

~~65. Seek Congressional support for designating Oregon for one of the 10 pilot Infrastructure Bank projects, to have the bank capitalized and available for such projects as the Tualatin Expressway and cash flow management for the Westside LRT project.~~

Seek federal discretionary funds to "capitalize" the Oregon State Infrastructure Bank for such projects as the Tualatin Expressway and cash flow management for the Westside LRT project.

76. 242nd Avenue/I-84 Connection: Mt. Hood Parkway Interim Improvement.

242nd Avenue is the region's designated NHS corridor connection between I-84 and U.S. 26. Existing roads in this corridor are poorly connected to these highways or provide less direct travel into and out of the region for autos and substantial truck movements.

The proposed project will provide for a more direct connection to I-84 by extending 242nd Avenue northerly from Glisan Street to Sandy Boulevard and connecting to I-84 via ramps. Development of this alignment will replace a hazardous, steep three-lane road (238th Avenue) which has a high accident rate and must be closed during icy conditions. Existing East County streets used for travel into and through the region are projected to suffer from increased congestion. Thus a more direct route with access control and with some operational

changes can better serve these substantial non-local traffic movements.

Much of the right-of-way is currently owned by Multnomah County and ODOT. Project cost for project construction is \$20 million. An additional \$5 million is proposed to make operational enhancements to the existing 242nd Avenue to improve flow and eliminate bottlenecks.

87. Cornell @ Cornelius Pass and Baseline @ 185th Intersections.

Implementation of the Region 2040 Growth Concept in the vicinity of the Westside LRT project creates the need to also provide road improvements. combined with a proposal to restrict the size of Cornell Road from seven to five lanes west of this intersection results in the need for grade-separated intersections and/or addition of a new arterial connection. This \$12 million demonstration project will identify and construct the correct solution to accommodate the land use regime the region desires for this area.

98. Willamette Valley High-Speed Rail - High-Speed Rail Account.

\$25 million Funding should be sought for track upgrade to improve speed and safety. The Eugene to Vancouver, B.C. corridor is one of five priority corridors selected by USDOT following establishment of the High-Speed Rail Program in the last ISTEA.

109. Transit-Oriented Development Revolving Fund - Section 3.

In 1994, \$3 million of Regional STP funds were allocated to establish this revolving fund. Initiation of the grant application through the Federal Transit Administration is now in progress. In addition, \$10 million of Section 3 funds would allow additional projects adjacent to LRT to be implemented.

11. Federal demonstration funds for a regional "Intelligent Transportation System" should be sought. This technology shows promise to improve the efficiency of the region's freeway, arterial and transit systems.

The criteria for recommending these projects is as follows:

1. Projects are of statewide significance.
2. Projects can be built within the timeframe of the next ISTEA bill (1998-2003).
3. There is a strong base of support for the project within the governments, and community and business organizations.

4. The proposal would bring new funds to the state, not merely result in reallocation of existing funds.
5. Members of the Congressional delegation express a willingness to pursue the project.
6. There should be a short list of priorities.
7. The list should be integrated with ODOT's statewide priorities.

~~In addition, Portland State University is seeking funds to proceed with its University Center building located at a key South/North Light Rail station. They have adopted a master plan with a strong focus on transit for student, faculty and public access.~~

The following changes were recommended to Resolution No. 96-2442 and the ISTEA Reauthorization Position Paper at the January 8, 1997 South/North Steering Committee Meeting:

On page 8 of the Position Paper:

2. Initiation of South/North LRT project - Section 3.

It is the intent of the region to re-examine the scope and cost of the South/North project now under consideration in order to define a Phase I project that meets regional objectives within a more constrained budget and to seek ~~\$600 million~~ of federal "New Rail Starts" funding ~~to match local and regional sources to construct this Phase I project.~~ In March 1997, the region will amend the alternatives now under consideration in the Draft EIS ~~to provide choices that meet these criteria.~~

~~In order to accomplish this, it will be necessary to include funding and legal provisions in the next ISTEA to enable building the project in the period between 1999 and 2006. This may project is likely to require partial funding in the next ISTEA and a commitment to complete the funding in the following ISTEA.~~

Also needed to accomplish this is a local and regional commitment ~~to \$600 million~~ over this same time period. Consideration should be given to various local and regional sources in addition to the \$475 million 1994 General Obligation Bond Measure and the \$55 million of regional STP funds ~~that would otherwise have been transferred downstate.~~

The region will consider adoption of a detailed financial plan for this proposal in March 1997.

Second Resolve of Resolution No. 96-2442:

2. Requests ~~\$600 million~~ ISTEA "New Rail Starts" funding for Phase I of the South/North LRT project.

*Handout*

The following changes were recommended to Resolution No. 96-2442 and the ISTEA Reauthorization Position Paper at the January 8, 1997 South/North Steering Committee Meeting:

STAFF REPORT

CONSIDERATION OF RESOLUTION NO. 96-2442 FOR THE PURPOSE OF ENDORSING A REGIONAL POSITION ON REAUTHORIZATION OF THE INTERMODAL SURFACE TRANSPORTATION EFFICIENCY ACT (ISTEA)

Date: December 24, 1996 Presented by: Andrew Cotugno

PROPOSED ACTION

This resolution adopts a regional policy position on the re-authorization of the Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 to serve as the basis for a coordinated regional lobbying position as Congress considers its update during 1997. One of the key elements is to seek federal "New Rail Starts" funding for Phase I of the South/North LRT project. In conjunction with this request, this resolution commits \$55 million of Regional Surface Transportation Program (STP) funds to the project.

TPAC and JPACT have reviewed this Position Paper and recommend approval of Resolution No. 96-2442. In addition, the South/North Steering Committee recommended approval of the South/North component at its January 8, 1997 meeting.

FACTUAL BACKGROUND AND ANALYSIS

When ISTEA was adopted in 1991, it established a significant national policy direction in support of multi-modal decision-making, funding flexibility, regional responsibility for decision-making, integration with local land use plans, partnership with state and local governments and increased public involvement. These provisions of ISTEA provided the Portland region a significant tool to meet its transportation and land use goals. This policy position paper, in large part, calls for continuing this policy direction with some refinements.

CONTINUE THE SUCCESSES OF ISTEA

Key provisions of ISTEA that should be continued include:

- Continuation of the MPO role in decision-making;
- Joint approval with the state of transportation funding allocations;
- Continuation of flexible funding programs, particularly the Surface Transportation Program, Congestion Mitigation/Air Quality Program and Transportation Enhancement Program;
- Continuation and expansion of the "New Rail Starts" Program; and
- Linkage of transportation decision-making to land use.

## REFINEMENTS TO ISTEA

Potential areas of refinement to ISTEA include:

- Expansion of innovative financing authority, including tolls and congestion pricing;
- Funding for State Infrastructure Banks (of which Oregon is one of ten);
- Shifting of 4.3 cents of gas tax from deficit reduction to transportation with a commensurate increase in transportation spending levels;
- Funding for high-speed rail and other intercity passenger services; and
- Expansion of funding flexibility for freight projects.

## WESTSIDE LRT

The 1991 ISTEA committed federal funding to the Westside LRT project to 185th Avenue. Subsequently, the Federal Transit Administration made a "contingent commitment" of \$74 million authorizing the extension to Hillsboro to begin construction. It is essential that this ISTEA include a firm commitment for this \$74 million and provide for the remaining \$100 million of appropriations toward the project.

## SOUTH/NORTH LRT - PHASE I

"New Rail Starts" funding is requested for a Phase I South/North LRT project. The federal funding could be through a combination of funding authority in this ISTEA and "contingent commitment" against the next ISTEA. The specific cash flow and borrowing requirements should be adopted by the region in March 1997 specifying the details of this program.

The local and regional funding should be through use of the \$475 million of General Obligation bonds and allocation of \$55 million of Regional STP funds during the period 1999-2009 that would otherwise have been allocated to Tri-Met and commitment of other local and regional sources. The specific sources to commit should be included in the same financing plan to be adopted in March 1997.

BEFORE THE COUNCIL OF THE  
METROPOLITAN SERVICE DISTRICT

FOR THE PURPOSE OF ENDORSING A ) RESOLUTION NO. 96-2442  
REGIONAL POSITION ON REAUTHORIZATION )  
OF THE INTERMODAL SURFACE TRANSPOR- ) Introduced by  
TATION EFFICIENCY ACT (ISTEA) ) Mike Burton,  
Executive Officer

WHEREAS, The Intermodal Surface Transportation Efficiency Act (ISTEA) was adopted by Congress in 1991; and

WHEREAS, ISTEA is scheduled to expire at the end of federal Fiscal Year 1997 (September 30, 1997); and

WHEREAS, Congress will be considering reauthorization of ISTEA during 1997; and

WHEREAS, ISTEA has a significant policy effect on transportation planning and decision-making in the Portland region; and

WHEREAS, It is through ISTEA that federal "New Rail Starts" funding commitments are made; now, therefore,

BE IT RESOLVED,

That the Metro Council:

1. Endorses the ISTEA Position Paper as reflected in Exhibit A subject to coordination with ODOT on a statewide position.

2. Requests ISTEA "New Rail Starts" funding for Phase I of the South/North LRT project.

3. Commits \$55 million of Regional Surface Transportation Program (STP) funds to the South/North LRT project during the period FY 99-2009 that would otherwise have been allocated to Tri-Met and was previously committed to be transferred to the now

defunct "Transportation Equity Account." This allocation plus the \$475 million of Tri-Met General Obligation bonds will provide the initial increment of local matching funds for the project.

ADOPTED by the Metro Council this \_\_\_\_\_ day of \_\_\_\_\_, 1997.

Jon Kvistad, Presiding Officer

Approved as to Form:

Daniel B. Cooper, General Counsel

## EXHIBIT A

### ISTEA REAUTHORIZATION PORTLAND, OREGON REGIONAL POSITION PAPER JANUARY 1997

This position paper should be viewed as a work in progress. ISTEA reauthorization will extend over the next nine months during which time numerous proposals will surface which require further consideration by the Portland region. This position represents the region's starting place, thereby allowing these positions to be advocated through national organizations, before federal hearings and with the Oregon Congressional delegation. In addition, changes will be considered, if necessary, after coordination with other interests statewide through ODOT.

#### I. Introduction

The transportation providers of the Portland region believe there is a national interest in transportation that should be reflected in the programmatic emphasis in the next ISTEA. This national interest should focus on maintaining and improving metropolitan mobility to support the economic engines of the country and further international competitiveness. Second, it should maintain and improve vital connections between metropolitan areas. Finally, effective connections to international passenger and freight terminals to access the global marketplace are critical.

In order to ensure these national interests are accomplished through the distribution of federal transportation funds, a programmatic approach, rather than a block grant approach, is most appropriate. In this manner, the Federal Government can target its resources to the program areas that represent the national interest. The current ISTEA, with several improvements, provides an excellent model for such an approach to the next ISTEA. The ground-breaking changes in flexible financing, local control and public involvement embodied in the passage of ISTEA in 1991 were a major step forward in transportation development. Reauthorization of ISTEA should focus on building on the strengths of this landmark legislation rather than on major rollbacks or wholesale changes.

Reauthorization of ISTEA to include these provisions is integral to the Portland region's objectives for growth management and building a livable community. This region has strived to link transportation investments to land use decisions to achieve multiple objectives of preserving farm and forest lands, reinvesting in communities, meeting air quality standards, efficiently using existing infrastructure, and maintaining a livable region in the face of massive growth. It is essential that the Federal Government

maintain its partnership with the Portland region through the reauthorization of ISTEA.

The region would like to highlight the following issues for consideration during the reauthorization of ISTEA:

## II. Substantive Issues

1. **MPO Role in Decision-Making.** We believe that the increased local and state role in transportation decision-making is one of the most important advances in ISTEA. The region strongly supports continuing a strong MPO role in planning, project selection, joint TIP/STIP approval, and public involvement. The MPO role in ISTEA has improved the partnership of local government officials, state departments of transportation and other transportation interests and should be reinforced in reauthorization.
2. **Joint MPO/State DOT Approval of TIPs.** Joint approval of state and metropolitan Transportation Improvement Programs (TIP) in each metropolitan area ensures a partnership approach to solving transportation problems. Typically, the state DOT is responsible for only a part of the transportation system and cities, counties, transit districts and port districts are responsible for the balance. Through a partnership approach, transportation investment decisions can be made to ensure the system as a whole meets the needs of the public and responds to the federal interest. Often in a complex metropolitan area, trade-off decisions must be made to determine which improvements to which part of the system can most effectively meet the needs. In addition, it is critical that transportation investment decisions are coordinated with land use decisions for the region which typically rest with local governments rather than the state DOT. Joint approval of the TIP assures that all parties responsible for the transportation system are party to making the priority decisions about its improvement.
3. **Flexible Funding.** The region supports maintaining and, where appropriate, expanding flexible funding. Flexibility gives local and state governments and citizens the opportunity to craft the most appropriate local solutions to transportation needs. Flexible funding has been a key component of this region's effort to respond to the demands of growth, address congestion and freight mobility needs and preserve livability and environmental quality.

While the region supports continuing the existing categories for Surface Transportation Program funds, Transportation Enhancement funds, and Congestion Mitigation/Air Quality funds, including metropolitan set-asides, there should not be any additional categorical funding allocations in the next ISTEA if they have the effect, particularly in the environment of reduced or level funding, of actually reducing rather than increasing flexibility. This can occur if there is less funding split up among more categories. The region supports expanding the flexibility of existing STP and CMAQ funds to address capital improvements to freight rail and intermodal facilities. In addition, the region supports maintaining the existing flexibility provisions for the NHS program.

4. **Reject Rollbacks and Devolution.** The region does not support the rollback or elimination of major elements of ISTEA, such as local control, public involvement or joint MPO/state DOT approval of TIP/STIP or the "devolution" of the federal program and its return to the states. The passage of ISTEA resulted in improved coordination between the state, region and federal transportation providers. The benefits to the taxpayers are a more efficient use of existing transportation investments and the construction of new investments that best reflect their individual community needs. In this region, the experience of ISTEA has been a positive one and has resulted in a greater degree of public involvement in and support for the transportation investments. In addition, it is problematic for states to adopt sufficient tax increases to offset the elimination of the federal program.
5. **Discretionary Section 3 "New Start" Program.** The region supports the continuation of a discretionary Section 3 "New Starts" program. The program has been shown to be an effective way for urban areas to implement large-scale innovative transit alternatives to new freeway construction. Opportunities to leverage private sector investments are substantially enhanced with the existence of a categorical program and predictable funding allocations. The existence of a categorical program and the scale of investment accommodated by the New Start program is critical to the integration of long-range transit development and land use planning efforts such as that underway in the Portland region.
6. **New Start Evaluation and Land Use Benefits.** The region believes that one of the most important benefits of the Section 3 New Start program is the opportunity it offers communities to reduce urban sprawl and its associated costs. The new ISTEA should direct FTA to include the

benefits of improved land use and the reduced costs of sprawl in the analysis for new rail projects. Projects which can demonstrate the reduced costs of sprawl through legally binding land use requirements should be given additional consideration in the allocation of New Start funding.

FTA should be encouraged to continue its efforts to include in its evaluations the value of reduced sprawl, reduced utility costs, road construction and maintenance costs, air pollution and other benefits associated with the more compact development pattern attainable with integrated transit development and land use planning.

7. Blanket Authorization of Contingent Commitments and Existing Full-Funding Grant Agreements. The region supports the "en bloc" authorization of contingent commitment projects and carryover Full-Funding Grant Agreements. Failure to authorize these projects would unfairly penalize communities that have moved forward with the expenditure of local and state funds under the spirit and the letter of ISTEA's contingent commitment provisions. The level of local trust and cooperation with the Federal Government would be seriously harmed if contingent commitment projects are not authorized as indicated in ISTEA. Not authorizing contingent commitment projects will send a signal to the private sector that public sector financing is unreliable and would reduce future opportunities for public-private ventures. "En bloc" reauthorization of carryover Full-Funding Grant Agreements is critical to complete projects in mid-stream. In many cases, appropriations for these projects have not kept pace with the amount authorized in the current ISTEA and contracted for in these Full-funding Grant Agreements. The remaining appropriation must be provided for in the next ISTEA.
8. Innovative Financing. Steps taken in ISTEA to authorize innovative methods for financing transportation facilities is very helpful. These should be nurtured and expanded in the next ISTEA authorization bill. The flexible funding provisions of ISTEA provided important new tools for local communities to address their transportation needs. However, transportation infrastructure needs still far outstrip local, state and federal resources. Additional innovative financing mechanisms should be explored and local jurisdictions, MPOs and states should be given a broader range of tools to address funding shortfalls. In particular, the region supports expanded authority for tolling federal facilities to address mobility, freight movement and congestion demands. Secondly, the Congestion Pricing

authority should be retained and funded. Third, expanded opportunities for public-private partnerships could allow greater private sector participation in transportation financing. Fourth, expanded methods of providing the required local match should be retained and enhanced. Finally, the pilot effort to implement "Infrastructure Banks" should continue, be made permanent and should be capitalized with federal seed money.

9. Congestion Pricing. The Congestion Pricing PILOT Program should be retained and funded. Market-based mechanisms have proven ability to manage demand with limited resources. The PILOT program to date has been instrumental in promoting the effectiveness of market policies to significantly reduce peak period congestion. By allowing regions around the country to intensively study the concept, the PILOT program has significantly furthered the understanding of the role that congestion pricing can play in managing transportation costs while enhancing mobility. The recent opening of State Route 91 in California and the High Occupancy Toll Lanes in San Diego and the high level of public acceptance in recent public opinion surveys conducted as part of the Southern California Council of Governments and the San Francisco Bay Bridge projects demonstrate the growing support for congestion pricing. Like any policy which involves a dramatic change in behavior among the general populous, implementations of congestion pricing face enormous challenges in terms of public education and acceptance. The program is now poised to capitalize on the concrete successes in a variety of locations around the country. The Portland metropolitan region is currently in the midst of a study which is exploring the potential of this tool to play a key role in our regional transportation future. The region is interested in having access to funding through the PILOT program should it conclude congestion pricing is an appropriate tool to implement in the Portland region.
10. Increased Funding. ISTEA recognized the critical link between transportation investments and economic development, increased productivity and individual opportunity. Funding for ISTEA programs should be increased to reflect this critical linkage. To maintain the equity and flexibility in ISTEA, the existing 80/20 funding ratio between highways and transit should remain constant.
11. Many of the highway funding distribution formulas are biased against Oregon, resulting in the state being in a "donor" status, paying more into the federal trust fund than returns through ISTEA. These formulas should be revisited to correct this problem.

12. 4.3 cents of the federal fuel tax is now being used for deficit reduction. When this tax increase was adopted by Congress, it was on the basis of being an interim measure and the commitment was made to return this to the Highway and Transit Trust Funds. This commitment should be fulfilled through a shift of this 4.3 cents to: 1) one-half cent for passenger rail; 2) 80 percent of the balance to the Highway Trust Fund; and 3) 20 percent of the balance to the Transit Trust Fund with an associated increase in spending authority in these areas.
13. The High-Speed Rail Program within ISTEA should be reauthorized for the five selected priority corridors, including the Cascadia Corridor from Eugene, Oregon to Vancouver, B.C. There are important trackway improvements needed within the Portland metro area to improve speed and safety. In addition, the Portland region benefits from improved service (speed and frequency) to Eugene, Seattle and Vancouver, B.C.  
  
Associated with this, one-half cent of the 4.3-cent gas tax now dedicated to deficit reduction should be committed to intercity passenger services, capital improvements, such as high-speed rail, intercity bus and Amtrak. This program would provide for grants and loan guarantees to such applicants as ODOT, transit districts, Amtrak and local governments.
14. NHS Priority Corridors. ISTEA designated several high priority NHS corridors throughout the nation. These corridors receive special funding for capital improvements. Oregon in cooperation with Washington and California should seek special status for I-5 as an NHS Priority Corridor. With the passage of NAFTA, this special designation is of even greater importance.
15. Match Ratios. Oregon should oppose any attempts to change the match ratios as outlined in ISTEA. Oregon benefits from the sliding scale match ratio provisions of ISTEA tied to federal lands within the state and should advocate for their inclusion in the next ISTEA. In addition, ISTEA should explicitly allow "overmatching" federal funds with a higher than required local match.
16. Fiscal Constraint. The current requirement to base transportation plans and programs on realistic revenue forecasts should be continued. This requirement has brought about more realistic plans rather than simply a "wish list" and therefore greater attention to funding decisions which assume more cost-effective projects. However, equal attention should be paid to a "vision" plan to provide the basis for pursuing the funding needed to accomplish that vision.

17. Oregon is facing a severe shortfall in meeting its Transportation Capital needs. This has been exacerbated by federal funding cuts and lack of action by the Oregon Legislature to meet the need. Most recently, ODOT was forced to cut \$400 million from its Modernization Program. Highway "Demo" projects represent a possibility for helping to meet these needs. The state should submit projects that have the greatest likelihood of being included as "Demo" projects.

### Project Priorities

FY 97 is the final year of ISTEA which was adopted in 1991. In 1997, both consideration of the FY 98-2003 ISTEA and the FY 98 Appropriations Bill will provide opportunities to consider earmarking projects. The following priorities should be considered for funding through the ISTEA reauthorization or appropriations or other legislative actions. This list should be accepted on a preliminary basis to allow for coordination with ODOT on statewide priorities. It may be necessary to add projects elsewhere in the state or delete some Portland area projects. The "Regional Priority Projects" are endorsed as priorities for all jurisdictions of the region while the other projects are a priority for individual jurisdictions.

#### A. Regional Priority Projects

##### 1. Completion of Westside/Hillsboro LRT project - Section 3.

\$74 million of "contingent commitment" for the Hillsboro extension must be authorized in ISTEA; in addition, \$100 million remains to be appropriated in FY 98 for this project.

##### 2. Initiation of South/North LRT project - Section 3.

It is the intent of the region to re-examine the scope and cost of the South/North project now under consideration in order to define a Phase I project that meets regional objectives within a more constrained budget and to seek federal "New Rail Starts" funding. In March 1997, the region will amend the alternatives now under consideration in the Draft EIS. This project is likely to require partial funding in the next ISTEA and a commitment to complete the funding in the following ISTEA.

Also needed to accomplish this is a local and regional commitment over this same time period. Consideration should be given to various local and regional sources in addition to the \$475 million General Obligation Bond Measure and the \$55 million of regional STP funds.

The region will consider adoption of a detailed financial plan for this proposal in March 1997.

##### 3. Deepening of the Columbia River Ship Channel - Corps of Engineers.

The Port of Portland, in cooperation with other Columbia River ports, is seeking Corps of Engineers funding to deepen the Columbia River ship channel to accommodate

larger ocean-going vessels. This is critical to the international competitiveness of the Portland area and the greater Columbia River Basin and directly tied to truck and freight rail access improvements in the Rivergate area.

We strongly support continued funding of \$725,000 per year in Fiscal Years 1998 and 1999 for the U.S. Army Corps of Engineers' completion of the feasibility and environmental studies for the Columbia River channel deepening.

The region also encourages Congress to approve bill language to provide a contingent authorization of \$65 million for the federal share of the project, subject to required environmental, economic and engineering reviews. This authorization is a critical step in keeping the project on schedule for construction early in the next decade.

#### B. Local or Agency Priority Projects

##### 1. I-5/Highway 217/Kruse Way Interchange - FHWA Demo project.

A revised design has been developed and endorsed by ODOT, the affected local governments and Metro. \$38 million of Highway Demonstration funds or Interstate Discretionary funds would allow this critical I-5 bottleneck and safety problem to be corrected.

##### 2. Sunnybrook Interchange - FHWA Demo project.

Project development on this project is nearly complete. \$19 million of Highway Demonstration funds or Interstate Discretionary funds in combination with previously committed ODOT and local funds would allow this project to proceed on schedule.

##### 3. South Rivergate Railroad Overcrossing/Columbia Boulevard Corridor - FHWA Demo project.

Columbia River channel dredging and Rivergate rail improvements are increasing the cargo movements into and out of the Rivergate port terminals. \$15 million of Highway Demonstration funds for this railroad grade separation would enhance truck access to these terminals. This project is the second in a series of planned improvements in the Columbia Boulevard corridor between Rivergate and I-205.

4. Sunset Highway - Phase III.

The Westside Corridor Project included both LRT to Hillsboro and Sunset Highway improvements. The Sunset Highway projects, however, have been delayed due to lack of funding. This \$27 million would allow the next logical phase to proceed.

5. Lovejoy Ramp Removal/Broadway Bridge Rehabilitation - FHWA Demo and Bridge Program.

Replacement of the Lovejoy ramp in the River district and upgrade to the Broadway Bridge will enable major redevelopment in this Central City district. \$15 million of Highway Demonstration funds and \$10 million of Highway Bridge Repair and Replacement funds would allow these projects to proceed.

6. Seek federal discretionary funds to "capitalize" the Oregon State Infrastructure Bank for such projects as the Tualatin Expressway and cash flow management for the Westside LRT project.

7. 242nd Avenue/I-84 Connection: Mt. Hood Parkway Interim Improvement.

242nd Avenue is the region's designated NHS corridor connection between I-84 and U.S. 26. Existing roads in this corridor are poorly connected to these highways or provide less direct travel into and out of the region for autos and substantial truck movements.

The proposed project will provide for a more direct connection to I-84 by extending 242nd Avenue northerly from Glisan Street to Sandy Boulevard and connecting to I-84 via ramps. Development of this alignment will replace a hazardous, steep three-lane road (238th Avenue) which has a high accident rate and must be closed during icy conditions. Existing East County streets used for travel into and through the region are projected to suffer from increased congestion. Thus a more direct route with access control and with some operational changes can better serve these substantial non-local traffic movements.

Much of the right-of-way is currently owned by Multnomah County and ODOT. Project cost for project construction is \$20 million. An additional \$5 million is proposed to make operational enhancements to the existing 242nd Avenue to improve flow and eliminate bottlenecks.

8. Cornell @ Cornelius Pass and Baseline @ 185th Intersections.

Implementation of the Region 2040 Growth Concept in the vicinity of the Westside LRT project creates the need to also provide road improvements. This \$12 million demonstration project will identify and construct the correct solution to accommodate the land use regime the region desires for this area.

9. Willamette Valley High-Speed Rail - High-Speed Rail Account.

Funding should be sought for track upgrade to improve speed and safety. The Eugene to Vancouver, B.C. corridor is one of five priority corridors selected by USDOT following establishment of the High-Speed Rail Program in the last ISTEA.

10. Transit-Oriented Development Revolving Fund - Section 3.

In 1994, \$3 million of Regional STP funds were allocated to establish this revolving fund. Initiation of the grant application through the Federal Transit Administration is now in progress. In addition, \$10 million of Section 3 funds would allow additional projects adjacent to LRT to be implemented.

11. Federal demonstration funds for a regional "Intelligent Transportation System" should be sought. This technology shows promise to improve the efficiency of the region's freeway, arterial and transit systems.

The criteria for recommending these projects is as follows:

1. Projects are of statewide significance.
2. Projects can be built within the timeframe of the next ISTEA bill (1998-2003).
3. There is a strong base of support for the project within the governments, community and business organizations.
4. The proposal would bring new funds to the state, not merely result in reallocation of existing funds.
5. Members of the Congressional delegation express a willingness to pursue the project.
6. There should be a short list of priorities.
7. The list should be integrated with ODOT's statewide priorities.
