# 2016 U.S. Election and Russian Interference

“The Russian government interfered in the 2016 presidential election in sweeping and systematic fashion. Evidence of Russian government operations began to surface in mid-2016. In June, the Democratic National Committee and its cyber response team publicly announced that Russian hackers had compromised its computer network. Releases of hacked materials—hacks that public reporting soon attributed to the Russian government—began that same month. Additional releases followed in July through the organization WikiLeaks, with further releases in October and November.”

- Robert S. Mueller III (2019)  
U.S. Dept of Justice

# Fake News and Michiko Kakutani's

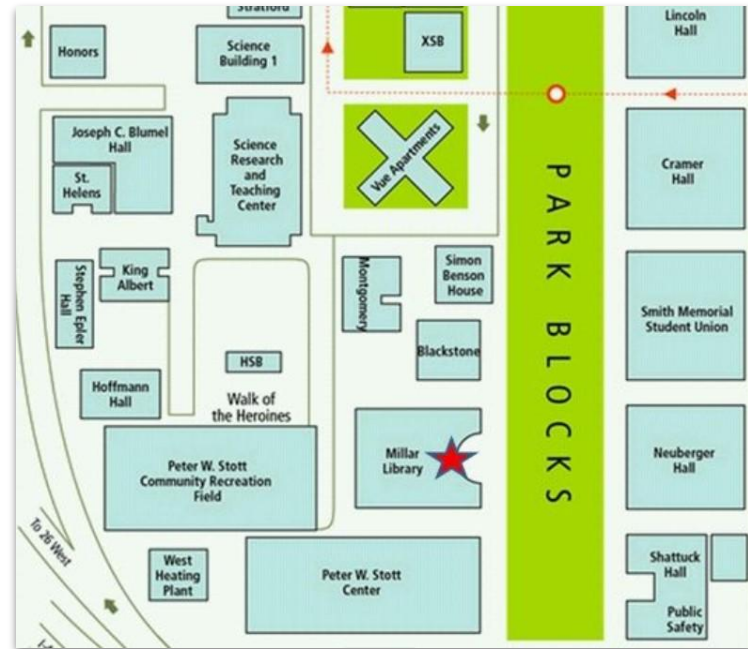

## *The Death of Truth* (2018)

“While public trust in the media declined in the new millennium (part of a growing mistrust of institutions and gatekeepers, as well as a concerted effort by the right wing to discredit the mainstream press), more and more people started getting their news through Facebook, Twitter, and other online sources: by 2017, two-thirds of Americans said they got at least some of their news through social media. This reliance on family and friends and Facebook and Twitter for news, however, would feed the ravenous monster of fake news.”

## Motivation and Inquiry

...from PSU Library as place to anytime, anywhere discovery by resource types in PRIMO.

# Assessment

## Search for Articles

### Summer Term 2019

During summer 2019, Student Success Librarian Amy Stanforth and I assessed part of the University Studies [Search for Resources tutorial](#); our focus, Search for Articles.

We examined 60 answer sheets wherein sophomore students had to find and evaluate articles, one peer reviewed article and one news article.

98% of the students found relevant resources for their topics. However, only 68% could accurately identify a peer reviewed article, and 83% identified a news article accurately.

# Website Critique

## *Educating for Misunderstanding*

Stanford History  
Education Group  
(2020)

1. Is there a parent website? Who pays for the website?
2. What does .org or .com have to do with it? Domains do not determine reliability. Many reliable resources use .com domains like the five U.S. major dailies; *New York Times*, *Wall Street Journal*, *Chicago Tribune*, *LA Times*, and the *Washington Post*.
3. Is the About page really the spin page? How do you corroborate what you have read on the About page? Lateral reading is a way to use the entire Web as a way to evaluate the credibility of a website.

# Website Critique

## *Educating for Misunderstanding*

Stanford History  
Education Group  
(2020)

4. Even if a link on a website leads to a reliable resource, be sure to read the content in order to see if it supports the premise of the website or not.

5. Don't judge a website by its cover! A website may look professional; yet it is easy to manufacture respectability, so browse laterally!

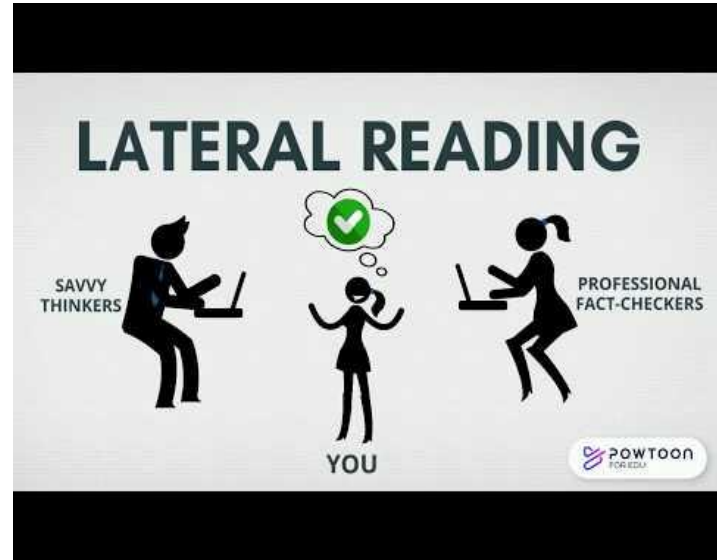

6. Check Wikipedia, especially the entry's references for your topic. Note the Wikipedia "Talk" webpage for entries. This is where experts refute the content.

# ProQuest's U.S. Major Dailies

## Advanced Search Default Field

**Anywhere except full text (NOFT)** searches the full bibliographic record, but does NOT include a search of the full text.

**Anywhere** retrieves from the full bibliographic record and the full text.

Keyword phrase, climate change, retrieves 100,954 newspaper articles with the Anywhere search and only 24,235 with the NOFT search.
