

Supplementary Table 1. Life-history trait correlations.

	Late	Total	<i>R</i>	Lifespan
Early fecundity	0.247 ^{***}	0.487 ^{***}	0.693 ^{**}	0.047
Late fecundity		0.950 ^{***}	0.688 ^{**}	0.162 [*]
Total fecundity			0.818 ^{**}	0.168 [*]
<i>R</i>				0.143

Spearman's correlation coefficients for each pair of life history traits in *C.*

briggsae isolates. ^{*}, ^{**}, and ^{***} denote significant differences from 0 at the 0.05, 0.01, and 0.001 levels, respectively.
