INTRODUCTION

The statistical information presented in this pack was reported by the respective line ministry members of the District Recovery Committees (DRCs). The DRC was reported on a set of monitoring forms developed under the Technical Committee of the National Recovery Committee in May – June 2003. The Who What Where data report complements the DRC data, providing a list of implemented projects within the sector that was reported to OCHA by donors, UN agencies and international NGOs.

The purpose of these data collection exercises is to establish a set of reliable data to be used for national planning and monitoring. The Data collection exercises are organized by the Technical Committee of the National Recovery Committee, which is about to be merged with the Development Partnership Committee (DEPAC). All data reported by the DRCs are validated by their respective ministries at central level.

The DRC comprises local Government representatives including; the Chairperson of the District Management Committee, District Officer (Secretary), all line ministry representatives in the district, NaCSA, SLP, RSLAF, a Civil Society representative, a women's representative and a youth representative. UNAMSIL Civil Affairs and OCHA are also part of the Committee. The DRC interfaces and works in close collaboration with the District Inter-Agency Forum and Sectoral Coordination Committees.

The sources of the various data in this data pack is listed below:

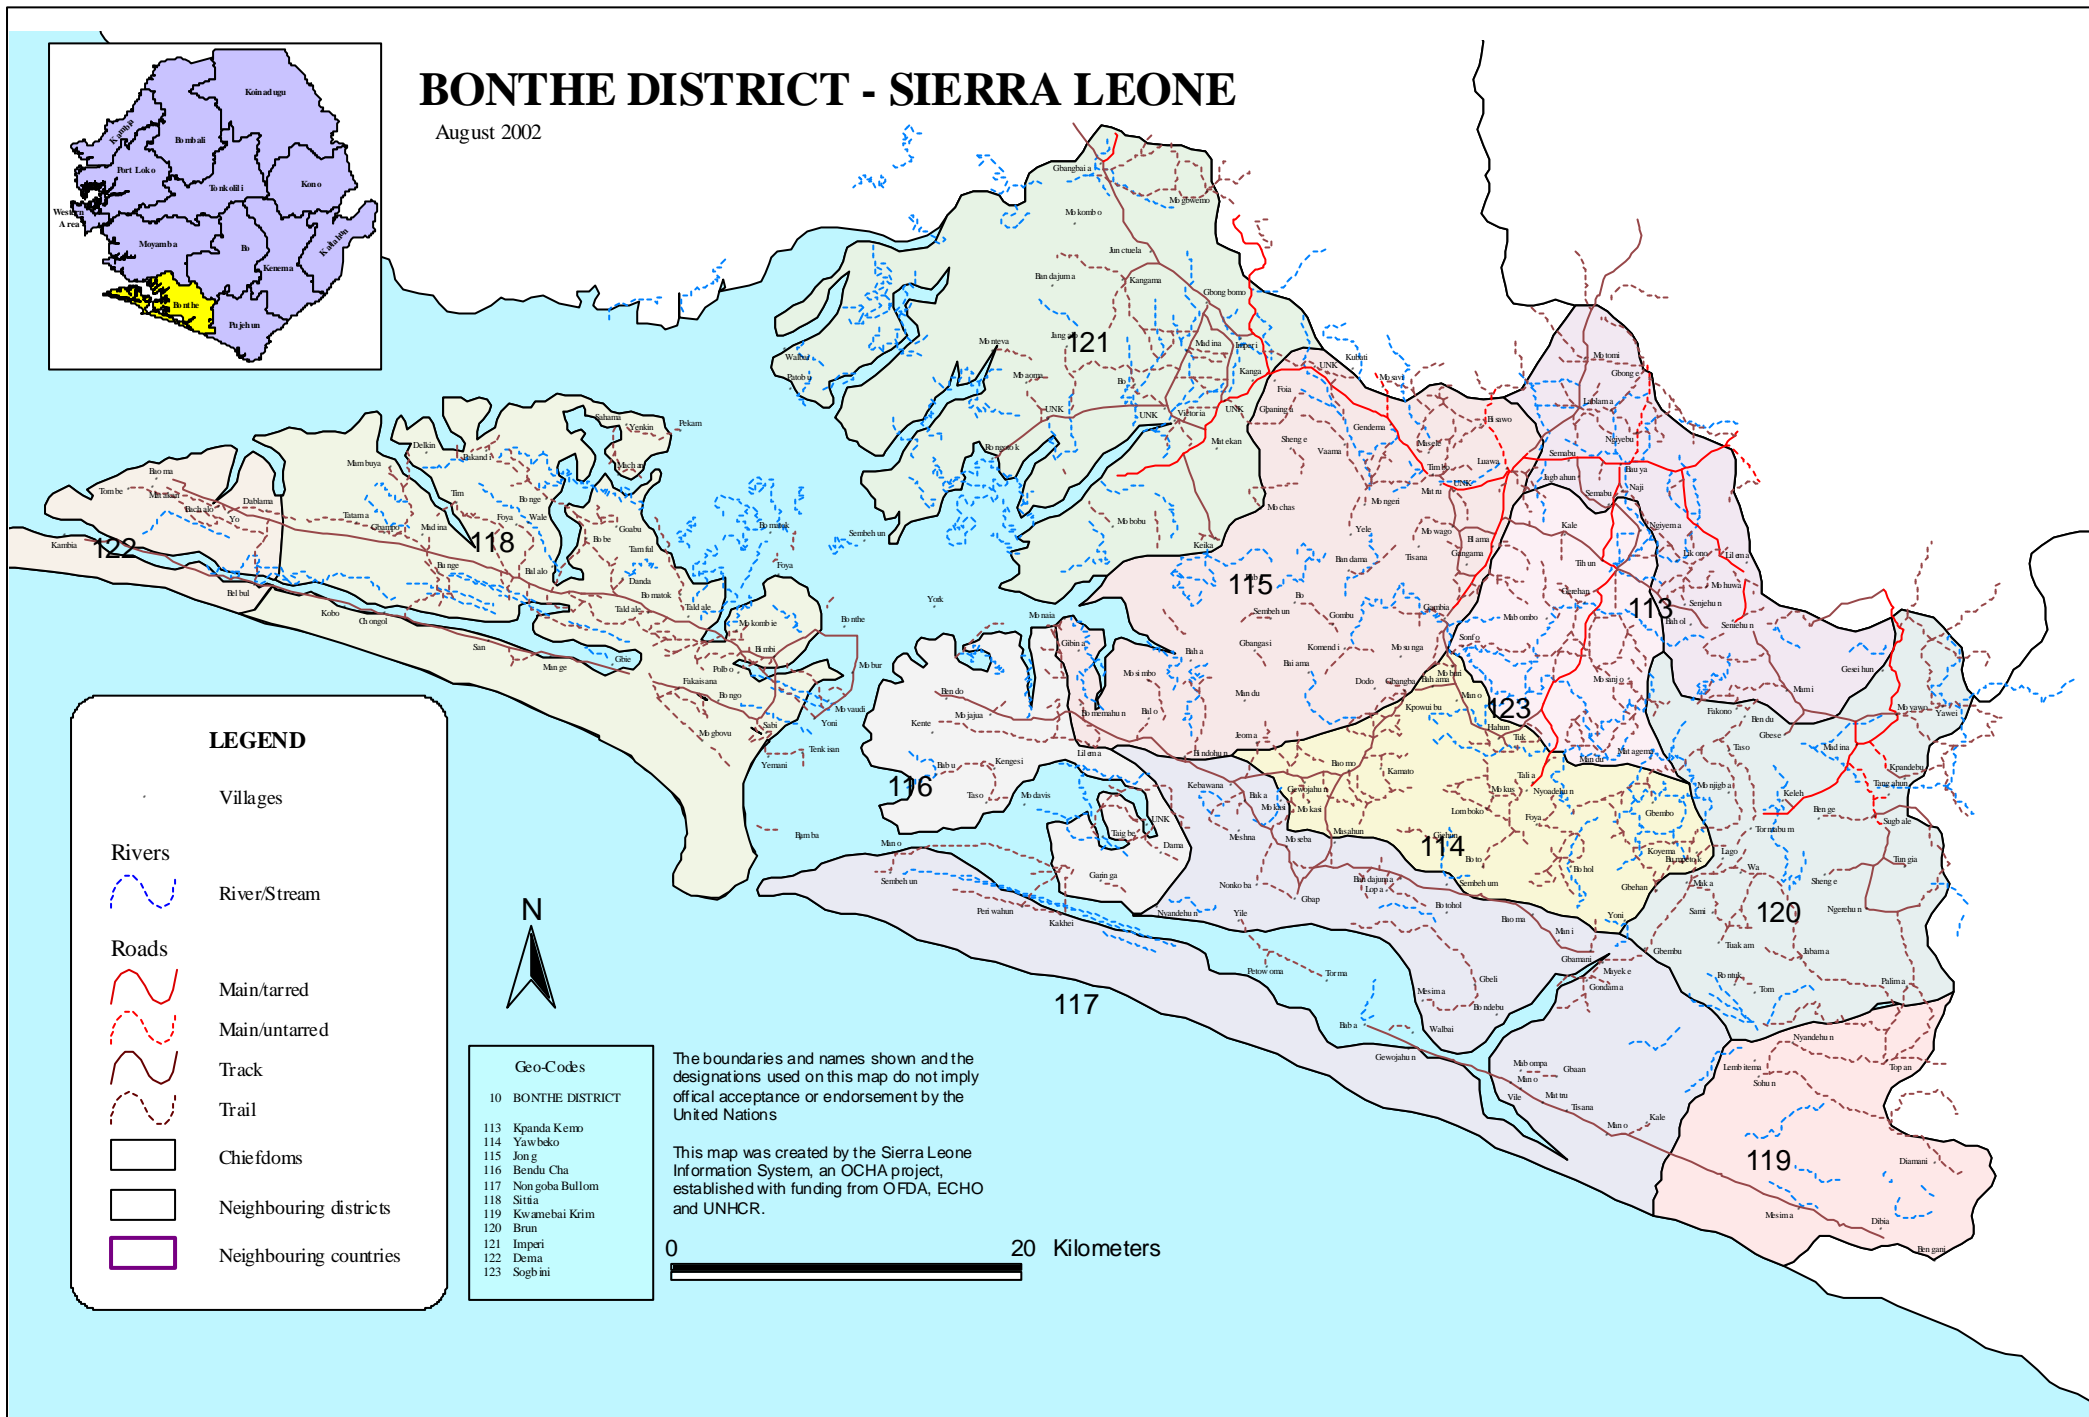

SECTOR	DATA REPORT	SOURCE	Notes
	District Information Overview	As in the National Recovery Strategy	Reliable and accurate as of August 2002
	Population	Compiled by OCHA (2001 population estimates from Statistics Sierra Leone, IDP data from OCHA and refugee data from UNHCR)	Reliable and accurate as of August 2002
Local Government	Civil Authority	District Officer	Reliable and accurate as of June 2003
	Chiefdom Administration		
	Chiefdom HQ Towns		
Police	Police deployment and resources	Chief Police Officer	Reliable and accurate as of June 2003
Roads	Roads condition	SLRA representative	Reliable and accurate as of June 2003
Education	Functional Primary Schools and enrolment	District Inspector of Schools.	Reliable and accurate as of June 2003
	Functional Secondary Schools and enrolment		
	Technical Vocational Training		
Social Welfare	Child Protection and Youth Groups	Social Welfare Officer	Reliable and accurate as of June 2003
DDR	Reintegration of Ex-combatants	NCDDR	Reliable and accurate as of 2003
Health	Status of Hospitals	District Medical Officer	Reliable and accurate as of June 2003. Please note that morbidity and mortality data may not yet be systematically compiled and analysed in some districts.
	Status of Peripheral Health Units		
	PHU staffing		
	Training of PHU staff		
	Morbidity and Mortality Ranking		
	Morbidity and Mortality Data		
	Preventive Health Programmes		
	Priority Actions for District Health Programmes		
	Training of PHU staff		
Water and Sanitation	Status of Water and Sanitation	District Medical Officer or representative of Ministry of Energy and Power	Indicative as of June 2003. Please note that DRC data from Bo, Kono, Moyamba, Port Loko, Pujehun, Tonkolili and Western Area were considered not representative and therefore not included.
Agriculture	Basic Farming activities	District Agriculture Officer. Some of the data is taken from the FAO Vulnerability Survey 2002. Fishing boat data is harmonized with survey conducted in May-June by Ministry of Marine Resources.	Reliable and accurate as of June 2003. Estimates on Farming Activities and Livestock should be regarded as indicative only.
	Distributions		
	Agriculture Facilities, including Fisheries		

The 3rd data collection exercise will take place in November 2003, and updated data packs will be produced thereafter.

The Data Pack series is available from UN OCHA Humanitarian Information Centre (HIC). The Data Packs are also available at the web site of Sierra Leone Information System (SLIS); <http://www.humanitarianinfo.org/slis>

Total Land Area (Sq Km)	3,516	Primary school pupil/teacher ratio	97:1
Population Census 1985	97,975	% of unqualified teachers	55%
Project ed Population CSO 2001	130,744	Primary school male/female ratio	100:92
Estimated displaced population	49	Secondary school male/female ratio	100:56
No. of registered ex-combatants	1,054	% cereal self reliance	90 %
No. of functioning PHUs	25	% dwellings destroyed	25 %

1. DISTRICT CHARACTERISTICS

Bonthe lies in the south of Sierra Leone. It borders the Atlantic Ocean in the west, Moyamba to the northwest, Bo to the southeast and Pujehun to the south. It occupies a total space of 3,468 Km² and comprises of eleven chiefdoms. The main ethnic groups are Mende, Sherbro, Temne and Lokko. The main economic activities include fishing, rice growing and oil palm plantations. The district is predominantly Muslim.

Support Agencies

Health & Nutrition	Watsan	Education	Shelter /NFI

Food Security	Agriculture	Micro Finance	Roads
WVI	WVI	WVI	UNAMSIL, SLRA
Resettlement	Reintegration	Human Rights, Child Protection	Restoration of Civil Authority
UNDP	NCDDR and partners	WVI, UNICEF	UNAMSIL

2. CONSOLIDATION OF STATE AUTHORITY

District Administration

The district officer is in post. However, due to the location of the district, and other constraints, such as logistics and infrastructures, much remains to be done to ensure adequate presence of key line ministries and services in the district. Greater attention needs to be given to rehabilitation of government infrastructures, improving the transportation system and provision of logistics support to district offices.

3. REBUILDING COMMUNITIES

Resettlement of IDPs and Refugees

Bonthe was the district least affected by the physical impact of the war, numbers resettling to Bonthe are very small and levels of damage are relatively low. Nevertheless, Bonthe has traditionally been a district that has been underdeveloped and years of neglect throughout the ten year civil war mean that rehabilitation of basic services (primarily education and health) and revitalisation of the rural economy are essential.

Reintegration of Ex-Combatants

56% of the 1,054 ex combatants registered for reintegration in Bonthe District have been provided with reintegration opportunities. This leaves 463 yet to be serviced. Ex combatants registered in Bonthe District are almost exclusively former CDF members. Indeed, throughout the Junta period, the south of Bonthe provided the main base for the CDF for large scale recruitment and training. However, in the mid nineties there was much forced recruitment into the RUF of youth from Bonthe district, in particular from Mattru and from the Rutile and Sieromko mining areas. To date, few of them have returned home due to fear of reprisals. Reconciliation and confidence building initiatives will therefore be of particular importance in Bonthe District in the coming year.

Health

In terms of population per functioning primary health care facility, Bonthe District has one of the best levels of service provision in the country, with a ratio of approximately 5,200 persons per PHU (compared to national district average of approximately 8,000). Within the district, Sittia and Nongoba Bullom Chiefdoms have significantly worse population/PHU ratios than all other chiefdoms. 25 PHU are now functioning in the district, compared to a pre war figure of 32. However, six PHUs require rehabilitation, and 14 CHCs and CHPs require staff quarters. Regarding the 2002 recovery objective, one CHCs /CHPs and nine staff quarters require rehabilitation / construction. From a staffing perspective, there is an acute shortfall of qualified health staff in all technical categories.

Regarding secondary health care, Bonthe District has the best ratio in the country in terms of population per hospital bed (570) and third best ratio in terms of population per doctor (65,000). Bonthe Government Hospital currently has 80 hospital beds, while the UBC Hospital at Matru has 150, and the district is served by two MoHS doctors.

Water and Sanitation

Prior to the war, Bonthe and Matru towns had pipe borne water supplies, but neither of these are currently functioning. In recent years, World Vision has made a concerted effort to contribute to the watsan situation in the district, but overall, there is an ongoing need for additional safe water and sanitation interventions, particularly in the more remote riverine chiefdoms.

Education

Of the 90 MEST supported primary schools and the six secondary schools in the district, none have sustained extensive damage and only basic repairs are needed to improve the quality of school buildings. While secondary schools appear to be relatively well served in terms of numbers of qualified staff, there are insufficient primary school teachers in the district. According to district updates, pupil\ teacher ratios are the second highest in the country (97:1) and nearly 55% of those teachers currently in the district are unqualified.

Child Protection and Social Services

In Bonthe, 353 demobilized children have been reunified with their families, mainly in Jong, but also in Imperi, Bendu-Cha chiefdoms. Through the Child Protection Network, UNICEF, MSWGCA and other child protection partners such as WVI monitor these children in their home communities in the district, ensuring that they are safe and participating in appropriate activities.

Shelter

Dwellings	No. Destroyed	Damage
18,678	4,669	25 %

Bonthe was one of the least affected districts in terms of long term rebel activities. Nevertheless, the FAO study estimates that nearly 25% of houses have been damaged or destroyed. As with other districts which have experienced comparative stability, many households have rebuilt their homes with no formal assistance. One shelter programme has provided support for 300 houses in Impere and Nogoba Bullom chiefdoms.

4. PEACE-BUILDING AND HUMAN RIGHTS

Reconciliation and confidence building measures will be of particular importance in Bonthe during the coming year (see ex-combatants reintegration).

5. RESTORATION OF THE ECONOMY

Agriculture

In 2001, Bonthe had the highest level of cereal self sufficiency in the country, producing 90% of its population's requirements. In many parts of the district cassava is more widely grown than rice, being used for domestic consumption and for conversion into gari and foo foo. Mechanical boliland rice cultivation was particularly extensive in Bum Chiefdom before the war, and a rice milling factory was located there with a direct riverine and coastal link to Freetown. Oil Palm plantations are extensive in the district, with the main one (government owned) located close to Matru in Jong Chiefdom). Banana/plaintain and citrus plantations are the next most important cash crops. From 1999 to 2001, support to the agriculture sector from NGOs and donor programmes was extensive.

However, most agricultural NGOs and food assistance agencies have now left the district in order to focus on the newly accessible areas in the North and East of the country, and no significant seeds distribution took place in 2002.

In 2003, agricultural support interventions should focus on increasing yields and production levels of major food crops (through concentration on intensified lowland production, improved practices, and training), adding value to crops through introduction of crop processing machinery, improving marketing and distribution networks, rehabilitation of the oil palm plantations (including establishment of tree crop nurseries), restocking of animal and poultry stock (with emphasis on improving animal husbandry practices and service provision capacity of the Livestock and Veterinary Services Division), increasing salt production, and revival of the artisanal fishing industry.

Mining

Bauxite and rutile mines in the north west of the district provided large scale employment, and were an important source of government revenue, until the mid nineties when they were overrun and vandalized by rebel forces. Whereas the mining of bauxite is not likely to commence again for economic reasons, rutile mining is planned to start soon. In addition, offshore oil exploration may begin shortly, following (as yet unproven) indications that oil reserves may exist off the coast.

Transportation Infrastructure

In the last few years, some rehabilitation of key roads has been taking place, and the majority of roads are therefore accessible. Recent or current rehabilitation has targeted the following axes; Mattru-Bo, Mattru-Bamba Junction (east of Gbangbatok), Bendu Cha – Mokassi, Gbap-Mobefa, Talia-Gbamani and Luawa-Taninahun. However, ongoing work to improve feeder roads will continue to be required. Rehabilitation of Bonthe Township's main jetty is due to commence shortly. Due to the districts coastal and riverine nature, boats are the primary mode of transport for many of the chiefdoms.

POPULATION FIGURES

BONTHE

Chiefdom	Previous Population (1985)	Projected Population CSO 2001 ⁴¹	Expected IDP Return ⁴²	Expected Return of Displaced Returnees & Refugees from Guinea & Liberia ⁴³	Total Estimated Return - Refugees, Returnees & IDP's ⁴⁴
Benducha	3,327	4,071	0	0	0
Bum	13,754	14,920	0	0	0
Dema	3,565	4,076	0	0	0
Impere	13,072	20,814	0	0	0
Jong	21,783	34,577	0	0	0
Kpanda Kemoh	7,531	12,544	0	0	0
Kwambai Krim	5,240	4,883	0	0	0
Nongoba Bullum	12,305	12,584	0	0	0
Sittia	8,920	12,895	13	9	22
Sogbini	5,179	5,356	0	0	0
Yawbeko	3,299	4,024	0	0	0
TOTALS	105,007	136,869	13	9	22

⁴¹ These figures are only based on population projections calculated by the Government Central Statistics Office in Freetown in August 2001.

⁴² These figures represent the total number of expected IDP returns to each District. These figures are generated from IDP figures from December 2001. They indicate IDPs area of origin and intended district of return. The figures do not include over 52,000 IDPs who resettled in the Southern Province, Western Area and parts of Kenema and Pot Loko districts in April 2001.

⁴³ These figures have been generated from refugee registration data provided by UNHCR Liberia and Guinea. The information is based on the refugee's declared area of origin..

⁴⁴ This data only includes information on registered refugees and IDPs. It is known that levels of displacement have been higher and that there are significant numbers of non-registered refugees and IDPs.

Priority Actions for District Health Programmes

District Recovery Committee

District	#	Priority Actions
BO	1	Training of TBA's/MCH Aide for reduction of infant mortality
	2	Construction of PHU's and Staff Quarters
	3	Provide training of M&E Officer
BOMBALI	1	Rehabilitate and Refurbish PHC complex including Perimeter fencing
	2	Rehabilitate 2 CHCs, 1 CHP, 4 MCHPs
	3	Training of Polyvalent Health workers
BONTHE	1	Intensive supervision health facilities
	2	Mass campaign on EPI Activities
	3	Referral Training for all cadres of Health workers
KAILAHUN	1	HIV AIDS ACTION
	2	EPI Social Mobilization and Defaulter Tracing
	3	Training of TBAs
	4	Reconstruction/ Rehabilitation of DHUS
	5	Reconstruction/Rehabilitation of Water/Sanitation Facilities
	6	Training of Public Health Aides
	7	Training of Blue flag volunteers and pump attendants
KAMBIA	1	Construction at the District hospital & quarters
	2	Reconstruction or Rehabilitation of PHU'S
	3	Reinstitution at Cost Recovery in all PHU'S
KENEMA	1	Supervision
	2	Rehabilitation/Reconstruction of Health Infrastructure
	3	Immunization/Vitamin A Supplementation
KOIDADUGU	1	Rehabilitation and reconstruction of Health facilities
	2	Extension of primary health care to the community
	3	Provision of trained staff equipment and supplies to all health facilities
KONO	1	Rebuild and Strengthen the district referral hospital
	2	Increase accessibility to health care services
	3	Deployment and capacity building of district staff
MOYAMBA	1	Upgrading of 3 PHU's Satellite clinics
	2	Perimeter fencing of the hospital
	3	Building of Primary Health Care Complex
PORT LOKO	1	Rehabilitation, construction and reconstruction of vandalised/burnt PHW
	2	Provision of Drugs, medical equipments and other supplies
	3	Provision of trained staff and capacity building of the district health staff (basics/refreshers training)
PUJEHUN	1	Rehabilitation of Health Infrastructure
	2	Transport and Communication
	3	Staffing and Supportive Supervision
TONKOLILI	1	Establishment of blood bank at the Magburaka Hospital
	2	Rehabilitation of District Health Management Office & Construction of under five clinic at Magburaka
	3	Capacity Building of health personnel
