Discussion Section:

Break out in small groups for discussion. There will be time to discuss some of these prompt questions, and allow for some time back with the large group to share out. You might choose a speaker from your group to share the thoughts of the group Thanks!

Questions to ponder:

1. What would you like to see change in the realm of library media streaming?
2. What are some of your main challenges with streaming media?
3. Budgeting and workflow: what approaches have you used so far?
4. As the demand and costs go up, what have you done that has worked? Not worked? Lessons learned?
5. Have you had issues with the sustainability of your streaming platforms?
6. What is one idea that I can take home with me and why?
