Building a foundation of private support for a public university... see pages 5-8
Diversity is the word in enrollment

Q. What groups comprise PSU's enrollment?

A. Perhaps the best word to describe PSU's enrollment is diversity. We are drawing all kinds of students from all kinds of places. Our students represent many age groups, many socio-economic backgrounds, and come with many previous experiences in education.

Overall, PSU's enrollment has reached new highs in the past couple years. We have topped the 15,000 mark for the first time, and we have been holding fairly steady at that level.

First, let's look at the students entering for the first time. In 1975-76, PSU enrolled nearly 7,000 new students, a total larger than either of the other two main categories we consider—those continuing or those continuing after an absence.

Among these new students are those who come directly from high school. There were more than 1,200 of these new freshmen in fall 1975, and even more last fall. This group is an important part of the student body, and we offer a number of services especially for them.

Transfer students are another significant part of the new student population each year. For one thing, we attract more Oregon community college transfer students than any other public four-year institution in the state.

The number of community college transfer students more than doubled between 1973-74 and 1975-76. And last year, nearly half of the Oregon State System of Higher Education transfer student population chose to attend Portland State.

We also provide special services for these students, most notably a Drop-In Academic Advising Center which is open to all students, but has proved to be especially effective in helping transfer students make the transition to PSU.

Another way of looking at the PSU student body is by noting the numbers of full-time and part-time students. In our 15,000-plus enrollment, we figure there are about 9,000 full-time students and 6,000 part-time students. The part-time student category has been growing significantly in recent years.

Many of these students choose to come part-time, often in the evening, because they combine school and work. Our figures show that 76 percent of the student body works while going to school.

Of course, part-time students come for a variety of other reasons—to re-tool or re-train for a new career, to gain skills for a present job, to earn a degree, or to receive cultural enrichment.

Q. Where do PSU students come from?

A. Most of our students come from the Portland metropolitan area. In fact, about 50 percent are from Clackamas, Washington and Multnomah counties and Vancouver, Wash. Most of the new students from high school are from around Portland, and a large number of transfer students attend the three community colleges in the metropolitan area.

But this is not to imply that the local area is the only source of students. We are getting students from every county in Oregon and from every part of the country.

There's another interesting fact about the transfer student population. We have attracted students from each of the state's 11 community colleges.

Q. On the basis of your contact with students, why are they choosing to attend PSU?

A. In any institution our size, there are perhaps as many motivations for going to school as there are students. It's really not possible to speak of a typical PSU student or to give a typical reason for coming to PSU.

As is true across the country, many students at PSU these days are interested in courses which will lead toward a career—and we offer a number of quality professional programs. Other students are here to learn skills for a new career or to improve performance in a present one.

Others want a quality liberal arts and sciences education which will prepare them to be more well-rounded persons regardless of the job they eventually may have. Still others come to PSU for cultural or personal enrichment.

One of the strengths of an urban university like Portland State is its ability to cater successfully to the educational needs and desires of a diverse population. In short, the University today is attracting a great many people who are interested in a great many programs and who will use their education in a great many ways.
One of the challenges international students face in this country is mastering the English language. A number of volunteers at PSU are spending time this year trying to help by meeting with foreign students every week for conversational practice. The program, called English in Action, is operated by the International Student Services Office at PSU. Of the more than 500 international students currently enrolled at PSU, about 100 are participating in the program.

faculty news

Louis Eltete (foreign languages) has received an invitation to read a paper at the Angyalfoly Konferenz in Budapest, Hungary, in August 1977. His paper will discuss teaching Hungarian at PSU, and will review summer programs, as well as student work in Szeged.

A study by Clarke Brooke (geography) on endangered breeds of sheep in Mediterranean Europe and western Turkey will be published in English and French editions by the United Nations Educational Program and the Food and Agriculture Organization of the United Nations.

James Natlunger (English) has been awarded a Fullbright lectureship to teach in Argentina next year. He will teach classes in applied theory of linguistics, methodology, translation theory and methods in teaching English as a second language at the University del Salvador in Buenos Aires.

Dawn Dressler (physics) has been reappointed to the State Energy Facilities Siting Council for a term of four years.

Paul Hammond (earth sciences) has been named to the geothermal resource ad hoc committee of the State Department of Energy.

Linda Majka and Nona Glazer (sociology) have prepared a paper for the Joint Economic Committee of Congress, entitled "The Homemaker, the Family and Employment." It will appear in American Women Workers in a Full Employment Economy: A Compendium.

Robert Vogelsang (speech) has been invited to serve as a consultant at the International Communication Association conference in Berlin this year. He also will lead a tutorial workshop in puppetry at the conference.

Summer Session '77

June 21-Sept. 2
Flexible scheduling: Combine 11-week (full year equivalent), eight-week, and special programs
Continuous registration: Register up to the day the class starts
Advance registration: Through June 3
General registration day: June 20
No formal admission requirements for persons just taking credit
All courses may be applied toward a degree
Full year of languages offered: Chinese, Japanese, Korean, Russian, Serbo-Croatian, Romanian, Hungarian, German, Italian, French, Spanish, English

Large selection of Hungarian offerings in the United States (Hungarian language not a requisite for many courses)

HIGHLIGHTS
Hungarian Cuisine
June 24-26
Louis Szathmary, chef from The Bakery, Chicago, (no recipes repeated from last year)

Chinese Cooking
July 8-10
Katharine Shen

Art of Children, Men and Gods
June 20-July 1
James Docter, Southern Oregon State College

Hungarian Folk Art
July 18-22
James Tokay, designer/architect from New York City

Robert Vogelsang (speech) has been invited to serve as a consultant at the International Communication Association conference in Berlin this year. He also will lead a tutorial workshop in puppetry at the conference.

Architectural Textiles
July 1-12
Langet Ragnhild, Swedish textile designer

One of the challenges international students face in this country is mastering the English language. A number of volunteers at PSU are spending time this year trying to help by meeting with foreign students every week for conversational practice. The program, called English in Action, is operated by the International Student Services Office at PSU. Of the more than 500 international students currently enrolled at PSU, about 100 are participating in the program.
Diversity in enrollment
(Continued from page 1)
coming to PSU with good grades and, based on my contact with many of them, they have a great potential to succeed in a university.

We are trying to provide more and better services for these students—campus visitations like INTRO/77, summer advising for the freshmen who will enter in the fall, career planning, financial aid, housing near the campus.

We also have streamlined the registration process, making it easier to enroll than it was before. A key word in all of this is accessibility.

The Admissions Office is open until 6:30 p.m. each weekday, academic counseling is available all day and in the evening, and other service offices offer extended hours.

Q.
Isn't it true that a lot of women are returning to school?
A.
Yes. The number of women has increased steadily over the past few years. In fact, there were more than 7,000 women students on campus last fall term — and that's an increase of about 1,000 over the previous year. Women now make up nearly half the student body.

One of the most interesting trends is the number of women over 40. There are more than 900 students in that category this year.

These women, whatever the age, are here for a variety of reasons. Most I've talked with are concerned about continuing to make a contribution, and they want help in knowing how and where to do it.

Q.
How do minority students fit into PSU's student population?
A.
PSU is at the center of the minority populations in the state, so it is a natural place for minority students to come.

The number of minority students in PSU's enrollment has increased significantly in the last couple years. In fact, the proportion of minority undergraduate students increased 32 per cent last fall over 1975. Minority graduate students increased 43 per cent.

These increases have reversed a downward trend in minority student populations, both in Oregon and nationally.

We are committed to special efforts to encourage these students to attend PSU, and to provide support services once they are here. We feel they add a culturally-enriching dimension to the University, and help to make the school a microcosm of society.

Q.
What about international students?
A.
Last year, the University had 508 foreign students from some 60 different countries. The largest concentrations came from Saudi Arabia, Iran, Japan, Hong Kong and Nigeria.

Part of the reason these international students come here is that PSU's English as a Second Language program is one of the best in the Northwest. The School of Business Administration is another factor, with nearly a third of the foreign students majoring in that field. The second most popular major is engineering.

Q.
From your experience, what kinds of courses are students interested in these days?
A.
It's hard to generalize because, of course, each student has his or her own interests. But here, as is true across the country, many students want courses that will get them jobs.

For that reason, business degrees are a hot item. Examples of other programs which seem to be selling themselves are administration of justice, health and physical education, engineering, urban studies, and the performing arts.

A certificate in Middle East studies, combined with a business degree, has been another popular option at PSU.

We also enroll a number of pre-professional students in the health sciences, and their success rate in gaining admission to medical and dental schools is excellent.

Programs which offer internships are also in demand, and at PSU the opportunities for such programs are wider than anywhere else in the state. Close associations between the University and the business community have helped to establish these internships, and often students have the opportunity to start working full-time after graduation at the place where they took the internship.

Richard Kennedy/Author who thinks in pictures

Spring as one of the outstanding children's books of 1976.

Other awards: Blue Stone was cited as "Notable Children's Book of the Year" by the American Library Association; Contests at Cowlick was selected for inclusion in the Children's Book Club; and The Porcelain Man will be published by a British firm later this year.

Unlike some popular authors of children's literature, Kennedy's stories do not contain much high fantasy—the development of mythical kingdom, strange creatures or heroic journeys. "Of course there is fantasy," he says, "but I write more down-home stuff.

An example is The Parrot and the Thief, which according to Kennedy, is "a funny moral tale, suggested by a Laotian legend." In the story, a man steals a parrot and the ensuing battle of wits between the two is both amusing and instructive.

A forthcoming book is different, however, from many of his previous works. The Lost King of Karmica, is concerned with the end of the world, a kind of "ecological fable." It will be published this year by Sierra Club Books, and will be that organization's first children's book.

Kennedy has four more books on contract, though he admits he sometimes goes for months without writing. But then he'll get an idea, usually sparked by simple things in his life—an egg, a fur coat, or a pair of shoes, for instance.

"That last example, the shoes," recalls Kennedy, "prompted a story about a pair of boots that plague a little boy there. The boy eventually outsmarts the boots and the story ends happily.

After leaving PSU, Kennedy moved to San Francisco where he lived for five years. He returned to Oregon in 1963, settling in Eugene to manage the Sundog Bookstore and to work toward his elementary teaching certificate at the University of Oregon. He taught the fifth grade for two years before returning to Portland in 1969.

He now lives in Newport, Ore., where he writes, but—like many writers—not for a living. He supports himself by working as a custodian at the Marine Sciences Center, and spends his free time "figuring out how to buy land in the country.

If he finds some property, he says he would like to raise buffalos or worms. "But I worry which one would be more profitable. I'm leaning toward buffalos because one may be a prince. I want to raise enchantable frogs."
When in California...

Thinking about a trip to Southern California? If so, the PSU Alumni Relations Office is cooperating with the University of California, Riverside, in announcing the availability of a free Alumni Lodge in Riverside.

"This offer is available as a benefit only to college and university alumni," says Robert Taylor, director of alumni relations at PSU. "We are happy to cooperate with the University of California in making this service available to our alumni."

A family of 4, for example, can use the Alumni Lodge for as little as $3.72 per person, per night. The lodge is within 35 minutes of Disneyland, Knott's Berry Farm and Lion Country Safari, Los Angeles, mountains, beaches and the desert are within 45 minutes.

For information on making reservations, write or call the PSU Alumni Relations Office (Address: P.O. Box 751, PSU, Portland, Oregon, 97207. Phone: 503-229-4948).

Clark supports urban studies

The Maurie D. Clark Foundation in Portland has contributed $5,000 to Portland State University in the first installment of an annual donation to support a student fellowship in urban studies.

Clark is vice president of Cole, Clark, Cunningham, Inc., a Portland insurance firm.

The first recipient of the award will be Marc Maden, a student in PSU's Urban Studies Doctoral Program who recently completed a two-year term as one of two students on the Oregon State Board of Higher Education.

Maden will use the fellowship to complete his dissertation, entitled "The Disposition of Reported Child Abuse Cases in Multnomah County."

Each year, the Clark fellowship will be awarded to a student who is researching and writing his or her dissertation for an urban studies degree. The stipend is intended to cover tuition, living expenses, and costs incurred in research and final preparation of the dissertation.

Recipients of the annual award will be selected by the dean of the School of Urban Affairs and appropriate scholarship committees at PSU. Criteria for selection will consist of a student's scholarship and the significance of the doctoral research project.

The funds will be administered in a special account established in the PSU Foundation.

Growing up in the Park Blocks

For Bertha Holmes, the site of Portland State University has many fond memories. Now 83, the longtime Portland resident grew up in the Park Blocks.

She recently donated a photograph of her childhood home to PSU, where it was placed in the library archives. The house once stood on the corner of Park and Harrison Streets, the present location of Smith Memorial Center.

"Because Ms. Holmes is interested in preserving history, she has been 'finding good homes' for the memorabilia she has collected over the years," says Portland resident, Portland State University Portland, Oregon, 97207. Give us a call if you'd rather—(503) 229-4948.

Ms. Holmes as Little Lord Fauntleroy
Private support/Provides 'margin of excellence'

Many observers say private funds provide "the margin of excellence" for public universities.

"Tax dollars alone are often not sufficient to build high quality programs in these days of inflation and changing enrollment," says Portland State University President Joseph Blumel. "Public institutions, particularly urban institutions like PSU, face heavy demands for service. Often the support is not there to meet these demands."

To provide more effective service to the public and to stimulate quality academic programs, Blumel has decided to put some muscle into what is commonly called "a development program."

The program attempts to interpret to the school the needs of the community, and to build in the community an understanding of private support necessary to meet those needs. The program also attempts to raise private funds — from individual donors, from corporations, from foundations.

One evident of this new emphasis at PSU is an expanding role for the PSU Foundation and its board of directors, a group of some 30 community leaders who serve as a catalyst for relationships between the University and the community.

(An introduction to members of the Foundation Board, turn to pages 6 and 7 in this issue.)

In announcing the move toward a stronger development program, Blumel told the faculty earlier this year: "We must rely on private sources of support to improve and maintain the quality of our programs. It is essential, given the present climate, to realize the importance of this activity.

**donations**

Tax deductible charitable contributions may be made to the Portland State University Foundation, a non-profit corporation, or directly to the University.

Gifts may be unrestricted or specified for academic and student programs of interest to the donor. Support is solicited for academic program and faculty enrichment, graduate and undergraduate student aid, research, equipment, and library acquisitions.

Employees of the University may wish to contribute through the University's payroll deduction plan.

Through the PSU Foundation's deferred giving program, the donor is afforded the opportunity of making an important contribution to higher education while receiving lifetime income and significant tax advantages.

Information on charitable investment opportunities may be obtained from the Portland State University Foundation (P.O. Box 243, Portland, Oregon 97207, (503) 229-4949).

"While private institutions have been moving steadily toward reliance on state and federal government sources of support, state institutions like PSU must increasingly look to support from alumni, business, foundations and other segments of the community."

Philip Bogue, president of the Foundation Board, agrees. "In today's environment," he says, "public colleges and universities are not getting support at levels which allow them to excell in needed and useful areas."

For example, Bogue adds, top faculty members from across the country — many of whom command higher-than-usual salaries — can be attracted to new institutions through combinations of public and private support.

"All this is not to say," he cautions, "that PSU has not been funded well over the years. It has, from the standpoint of the public sector. But it has been a late starter in the development effort, and we are now committed to it."

Bogue feels the chemistry is right at PSU to mount a successful institutional advancement effort.

"For one thing," he says, "there is often a certain satisfaction in making an investment in promising people, both faculty and students. Giving to higher education is investing in people. Many individuals and groups in a position to give are interested in investing in the future, and this is just as legitimate a purpose as any other kind of philanthropy."

"There also are a lot of PSU graduates in the metropolitan area. Many of them would never have been able to go to college were it not for Portland State University. So they came to PSU, received a quality undergraduate education, and now would be willing to support the University if they were asked."

Bogue is referring to an alumni relations program, an effort which nationally is recognized as a cornerstone of an effective development program. Even though total alumni donations may not be as large as contributions from other groups, the donations are important nonetheless.

One reason is that many potential donors ask, first, whether a University's alumni support the institution. If they do, such support could serve as a spark for additional voluntary donations.

There is a long history of private support to higher education — both public and private. Prestigious institutions like Harvard, Yale and Stanford receive millions of dollars from private sources each year. Public institutions across the country also rely heavily on private funds.

In fact, in 1974-75 total voluntary support for higher education topped the $2 billion mark nationally for the fourth year in a row, according to a recent report from the Council for Financial Aid to Education.

The report, as well as other resource material, indicates that urban institutions similar to PSU fared well in raising funds from private sources.

For example, Wayne State University in Detroit, Mich., with which PSU is often compared, raised more than $4.5 million in one recent year, including $114,000 in alumni contributions.

The University of Akron in Ohio reported $1 million in total voluntary support, including $268,000 from alumni. The University of Cincinnati reported $15.5 million in donations, including $64,672 from alumni. And, the San Diego State University reported $51 million in donations, some $286,000 of it from alumni.

Private support is especially critical as public institutions grapple with the problems of inflation and enrollment change.

The Chronicle of Higher Education reported late last year that state appropriations for higher education have risen 24 per cent in the past two years, an increase which, on the surface, keeps pace with inflation.

However, the Chronicle added, appropriations would have had to increase by more than 30 percentage points — six points higher than the actual figure — to keep pace with the combined growth of prices and enrollment.
Building a foundation also means expanding the role of the PSU Foundation and its board of directors. Board members listed on this page, information includes present position, activities on the board and in the community.
Some benefits of private support

hearing van
Hearing tests are fairly routine for many people, but consider persons who are handicapped or elderly. It's obviously more difficult for them to travel to a clinic for the needed tests. One solution: Bring the clinic to them. That's the philosophy behind Project ARM, a Portland State University program which has provided hearing tests and rehabilitation services for hundreds of low income elderly persons in the Portland metropolitan area.

The acronym "ARM" means Auditory Rehabilitation Mobile. It refers to a mobile van which houses two acoustical testing suites, an interview room and diagnostic equipment. It was purchased in early 1973 with funds from a private foundation.

In the first two years of its operation, James Maurer, director of PSU's Speech and Hearing Sciences Program, estimates the van served more than 2,000 elderly persons.

"This has been an excellent medium for training students," Maurer says. "It has been especially effective among those populations which have limited mobility, particularly the handicapped and low income elderly.

PSU students, most of them in the Speech and Hearing Sciences Program, have performed many of the hearing tests under the supervision of certified audiologists.

In the last two years, Maurer says the "ARM" van has traveled to public schools in Oregon and Washington to give hearing tests to school children. He credits the private foundation funds for getting the program off the ground. "In short," he says, "the private foundation funds have enabled us to be the first place and proved to be the stimulus for additional state and federal money to provide the service."

science research
Karl Dittmer calls it a "big molecular lasso."

That may not be a scientifically accurate phrase. But Dittmer, dean of PSU's College of Science, uses it in his description of a research project in the college made possible by a grant from a private corporation.

Specifically, Edward Perdue, a chemistry professor, used some $4,000 from a private foundation to study the effects of humic substances in natural waters. A humic substance is one which has the potential to regulate metal ions from certain waste products.

That property—the ability to regulate—prompted Dittmer's use of the phrase "a big molecular lasso." Perdue's research is expected to contribute to the process of predicting health hazards which could result from activities near waterways.

It's only one of a number of research projects, equipment acquisitions or faculty enrichment programs supported by donations from private sources.

"All of these grants from private sources," Dittmer says, "help us to do things we should do and want to do, but couldn't do as quickly otherwise—or perhaps even at all."

Here's a rundown of some other projects supported through private foundation funds:

- Biologist Robert Tinnin's research on the effects of the dwarf mistletoe parasite on the Douglas Fir.
- Chemist Joann Lohn's study of metal ions such as hemoglobin in the blood.
- Chemist Robert O'Brien's studies of atmospheric chemistry, including the effects of aromatic pollutants on ozone in the atmosphere.
- A bio-medical engineering professor joined PSU a year earlier than would have been possible otherwise through funds from a private foundation.

piano lab
Teaching piano and learning how to play it at PSU are easier these days thanks to an electronic piano lab in the Department of Music.

In pre-piano lab days, piano was taught by the lecture approach. Students had to play the instrument individually in practice rooms or off campus.

But the installation of the 12-console piano lab has opened the way for greater effectiveness of teaching time. "Now every student has his or her own instrument," says Wilma Sheridan, acting head of PSU's Music Department, "every student has his or her hands on the keyboard. Before, in the lecture approach, students had to hold what they were learning in their heads until they could get to a practice room.

"Using the piano lab, teachers can tune in to a student at a console, and attempt to correct improper applications."

Mrs. Sheridan estimates that "about 250 students go through the piano lab every year to gain fundamental skills they wouldn't be able to receive otherwise."

"There's no doubt," agrees John Trudeu, acting dean of the College of Arts and Letters, "that the lab has provided a dimension that was lacking before. We now can serve more students with more efficiency."

The piano lab was purchased in 1975 using $16,000 from a $25,000 gift to the University from a private foundation. The rest of the donation was used to increase library holdings for the University's performing ensembles. A second gift, this time totaling $10,000, came to Portland State in 1976 to provide additional materials in the music library.

"These gifts have allowed us to establish what I would describe as a basic performance library," says Trudeu. "It would have taken us 20 years to establish this library otherwise."

new seismograph
"We've been amazed at the public interest the seismograph has created," says Marvin Beeson, head of PSU's Department of Earth Sciences. "Seldom do five minis go by that there isn't someone out there looking at it."

The seismograph, purchased entirely through donations from interested individuals and private groups, is on display near the Earth Sciences Museum in Cramer Hall (1721 SW Broadway).

Though the department has had access to seismographs in the past, this is the first time it has owned one for use in classes and research.

"Local television cameramen seem to be some of our most frequent visitors," Beeson says, "and that gives thousands of other people a chance to see the seismograph in action."

PSU offers a class in seismology in which students learn to read seismograms and calculate the time an earthquake occurs and how far away it is from the seismograph.

"We used to have to train students on borrowed seismograms from other universities," Beeson says, "now we have our own and it's an effective teaching tool."

More than half of the $5,000 purchase price was donated by the Geological Society of Oregon Country and its members. The rest of the funds came from faculty members, students, alumni and other-interested persons.

faculty enrichment
Susan Karant-Nunn was one of only four Americans invited to a conference at Karl Marx University in Leipzig, Germany in 1976.

"That PSU's professor was able to attend through funds provided by the American Council of Learned Societies in New York and the PSU Foundation, foundation officials hope additional funds will be available in the future to help faculty members keep pace with new developments in their disciplines, or enable them to attend beneficial conferences or workshops."

Many of these activities are beyond the scope of the regular University budget.

At the Germany conference, Karant-Nunn presented a paper on the social aspects of the "First Generation of Lutheran Pastors from 1521-48."
Eugene Danzer (1949) works in the composing room at the Daily Journal of Commerce. He is involved in composing Perspective.

Frank Jackson serves as a career education coordinator for the Portland Public School District.

Robert Miehe (1950) works for the State of California as an auditor in San Francisco.

Herbert Miller (1946-47) supervises engineer power scheduling at Portland General Electric.

Stuart W. Miller (1946-49) has retired from a position in the electronics field. He lives on a houseboat in Bremerton, Wash.

Vernon F. Miller (1950) is president of Audio Services Co. in Portland.

Sidney Miller (1948) is an accountant for Munnell and Sherrill in Portland.

Malcolm Montague (1947) is a partner in the law firm of White, Sutherland, Parks and Allen.

Paul K. Petersen (1949) is staff photographer for the Eugene Register-Guard newspaper in Eugene, Ore. One of his photographs is featured in this issue on page 3.

Ralph Urban (1946) is the owner of Urban’s Appliance.

Richard Uselman (1946) works as a fireman for the City of Portland.

Ronald Vandehay (1949) is a landscape contractor.

Kenneth Van Lom (1949) is the owner of KVL Vending Co.

Gerald Vaughan (1949) is employed as a salesman for Portland Beauty Supply.

John Verschueren, Sr. (1949) is employed by the City of Portland as a dispatcher.

Robert Vial (1948) is the director of physical services at Hollywood Park Hospital in Portland.

Thomas Vickers (1946) is a counselor at Vocational Village High School, operated under the auspices of Portland Public School District #1.

Leroy Viring (1946) is the plant engineering manager of Rego Wagner Co.

Stoyan Vlasek (1949) is assistant controller for Publishers Paper Co. in Oregon City.

Daniel V. Voies (1947) is a psychiatrist at the Cedar Hills Psychiatric Center.

Richard Volpel (1948) works for the Portland Foundry Co. as chief engineer.

Fred Vranizan (1947) has his own dental practice in Portland.

George Wagner (1947) is an attorney with the firm Dezenoor, Spears, Lubersky and Campbell in Portland.

Glenn W. Wagner (1949) works for Parr-Lumber Co. in Portland as a purchasing agent.

Herbert Wagner (1949) is a customer service agent for Northwest Airlines.

Arthur O. Washara (1946) is a salesman for Cranner Electronics, Inc., a Seattle-based firm.

Walter Wakefield (1946) works for Rockey/Marsh Public Relations, Inc. in Portland.

Jerry Walker (1949) is a salesman for Surgical Sales.

Bob Wallan (1946) is regional manager for Chevron Asphalt Co.

Clifford Walsstrom (1948) has retired from the U.S. Army Corps of Engineers.

Monte Walter (1946) is a lawyer for Duncan E. Walter Attorneys.

Arthur Walters (1947) is a baker for Albertson’s in Portland.

Norman Bills (1952-55) has recently been appointed dean of the University of Toledo College of Pharmacy. He is the author of several books, including American Drug Index. His monthly column entitled “Contemporary Issues in Pharmacy,” appears in regional and state association journals. He also has won two awards: The Lyman Award of the American Association of Colleges of Pharmacy, 1971; and the Research Achievement Award of the American Society of Hospital Pharmacies, 1975.

Marianne Bollig (BS ’58) is an elementary school teacher for Portland Public School District #1.

James Chung (1950) is manager of the St. Helen’s, Ore., J. C. Penny store.

Charles Clasen (BS ’57) teaches the sixth grade at Rose City Grade School in Portland.

Merle Creasy (BS ’56) teaches at Aloha High School in Aloha, Ore.

Herman Deel (BS ’57) manages the chemical and paper sales division of Diamond Shamrock.

Samuel M. Holmes (1950) is a partner in the engineering firm of Burgstahler, Holmes and Carlson in Portland.

Dale Jersey (1950) is the president of John L. Jersey and Son, Inc., a contracting firm. His company has been involved with site preparation for the Georgia-Pacific Building, the Fremont Bridge, and the new Federal Building, among other structures.

Virginia Lavigne (BS ’57) has retired from Portland Public School District #1. She is a member of the Retired Teachers Association.

Eugene Danzer

Ronald Subotnick

Norman Bills

Stephen Babcock (BS ’67) recently joined Main Lafranchi and Co. in Portland as a staff accountant.

David Ball (BS ’67) is a water laboratory technician for the City of Portland.

George A. Wettlin (BS ’76) is employed as a junior accountant with Publishers Paper Co. in Oregon City.

Edmund Bechtold (BS) is a student at the UO Dental School in Portland. He works at the Free Dental Clinic and uses his photographic skills in dental film making.

Glen Berry (BS ’70) teaches choral music at Aloha High School in Aloha, Ore., and also composes music.

William Burdette (BS ’69) is the new program director at Milwaukee High School in Milwaukee, Ore.

James Chambers (BS ’69) has a new position with Sun Life of Canada as unit manager.

John Cook is principal of Molalla Grade School in Molalla, Ore.

The Oregon Bank has recently promoted Vernon Cox, Jr. (BA ’69) to assistant manager of the Gresham, Ore. branch.

Gloria Craig (BS ’69) is a teacher for the Portland Public School District.

Roselle Davis (BS ’65) has a new position as art teacher for Dexter McCarty Middle School in Gresham, Ore.

JoAnn Granum (BS ’69) is a school media specialist with the West Linn School District.

Donald Hundeby works for Georgia Pacific Corp. in Portland.

Harry Johnson (MA ’60) has been appointed director of the residential treatment program for adolescents at Frontier House in Forest Grove, Ore. He was formerly with the State Children’s Services Division in Astoria.

David Sutherland works as an administrator for the Lower Columbia Mental Health Center.

Michael Thompson (1965-71) owns his own insurance agency in Portland.

Information on alums

Information on Portland State University alumni is carried in alphabetical order by the following categories—Vanport, 1950s, 1960s, and 1970s. Whenever possible, the PSU Alumni Office has supplied the degree and year, or the years a person attended the University.
May 1 benefit features Snead

The legendary Sam Snead is coming to Portland.

The golfer who has won more tournaments than anyone in the history of the sport will be featured in a clinic and 18-hole exhibition at Riverside Golf and Country Club Sunday afternoon, May 1.

The event is a benefit for men’s and women’s scholarships at Portland State University.

Signing of Snead to appear in the second annual Parade of Stars was announced by co-chairman Earle A. Chiles and Al. C. Giusti on behalf of the Portland State University Foundation, Riverside and the PSU Football for Portland Committee.

The group’s first program last May drew an estimated 4,000 people to watch Arnold Palmer, Pat Fitzsimons, Oregon PGA champ Dave Crouse and runner-up Jerry Mowlds in a Friday afternoon clinic and exhibition.

Chiles and Giusti said this year’s events are being moved to a Sunday afternoon to permit more people to watch Snead, a member of golf’s Hall of Fame and generally considered to have one of the two or three best swings in golf today.

Winner and runner-up of the Oregon PGA championships—to be played at Spring Hill Country Club in Albany in mid-April—will again be invited to play in the exhibition.

Snead is credited with 134 professional victories, including three Masters titles, three PGA championships, three Canadian Open championships, two Western Open titles, the World’s Championship, the British Open, the All American and the Tournament of Champions.

The Parade of Stars was initiated last year as a way to raise money for Portland State University student-athletes and at the same time give metropolitan area sports fans opportunities to see some of the all-time greats in men’s golf, who had not played in Portland since the Portland Open and Alcan were dropped.

“We feel that the Palmer clinic and exhibition were very successful for a first effort,” PSU President Joseph Blumel said. “People have been asking us for months whom we’re bringing in this year, and I believe they will be pleased with our choice. Sam Snead is recognized as one of the all-time greatest, as is Arnold Palmer. He’s also a showman and a favorite of fans everywhere.”

Tickets for the 1 p.m. clinic and 1:30 p.m. exhibition will go on sale about April 1 at the PSU Box Office, Riverside Pro Shop and at selected other locations. Tickets good for the two events will be $5.

WOMEN’S SPRING SCHEDULES

Women’s Softball
Apr. 13 Oregon*, 4 p.m.
Apr. 15 Oregon Tech*, 3 p.m.
Apr. 19 Southern Oregon*, 3 p.m.
Apr. 26 Oregon State*, 3:30 p.m.

May 17 Lewis & Clark*, 3:30 p.m.

*Home games.
Home court: Upper deck, PSU gym.

SHORTS...

...Coach Len Kaufman’s wrestlers took second as a team among 10 entries in the NCAA Western Regionals behind Cal Poly-San Luis Obispo. At nationals, two wrestlers, Mike Mathies and Rudy Johnson, were seeded number two in the 142 and 134 pound weights, respectively. Both Mathies and Johnson won their first two matches, but both lost in the quarterfinals.
Another wrestler, Terry Farley, dropped his first match in the 126-pound class, then battled back for three straight wins before losing in the consolation rounds. Overall, PSU placed 26th in the nation.

...The Viking men’s basketball fashioned a 17-10 record this season for the second year in a row, drawing a record home crowd of 2,810 to the season finale against University of Puget Sound. Prospects are bright for next season as the Vikings anticipate a home schedule which includes Utah State, Colorado State, Idaho, the University of Portland, Puget Sound and Seattle Pacific. There’s a new road opponent, too—the USC Trojans.

Plan now for Hawaii trip

PSU’s football team is going to Hawaii again next fall.
And a number of Viking Athletic Association boosters are planning to accompany the team for the renewal of a game against the University of Hawaii Rainbows on Oct. 22.
Travel Counselors, Inc., in cooperation with the PSU Athletic Department and the Athletic Development Office, has arranged a tour package to Hawaii for interested PSU alums and boosters.
It will include air transportation to Hawaii via Continental Airlines DC-10 service and accommodations at the Hawaii Regent Hotel at Waikiki Beach.
Departure from Portland is scheduled for Oct. 20, with the return trip seven days later on Oct. 27.
The cost of the package, including air fare, is $446 per person (for each of two persons sharing a room).
Information on the trip will be presented during the annual meeting of the Viking Athletic Association May 11 in the Smith Memorial Center Ballroom on the PSU campus (1825 S.W. Broadway).
As part of the program, Continental Airlines will give a special, one-hour presentation on the tour, head football coach Darrel "Mouse" Davis will discuss last year’s game, and free champagne and cheese will be served.
Reservations for the Hawaii trip are being accepted at Travel Counselors, Inc. in Portland (Address: 747 S.W. 12th, Portland, Oregon, 97205, Phone: (503) 227-5700).
More information is available by calling the PSU Athletic Development Office, (503) 229-4933.

Football tickets

Football season tickets for next fall are moving briskly.
In fact, as of late March, the sale had already surpassed last year’s totals.
Officials in PSU’s Athletic Development Office reported season ticket income of some $50,000 through late March. In February alone, there were 3,000 renewals and purchases.

There are still many good seats available, however, for the Vikings’ six home games in Civic Stadium. The season ticket price is $30, with a reduction to $10 for persons high school age and under. Seats are in the west grandstands.
In lieu of general admission pass, priced at $30, also is available for seating in the north grandstand (end zone). It will admit a family—husband, wife and any number of children under 18—to all six home games.
Tickets may be ordered by writing or calling the Athletic Development Office: Address—PO Box 868, Portland State University, Portland, Oregon, 97207; phone—(503) 229-4933.
### APRIL

**Through June 3**  
Advance registration for summer session

**Through April 19**  
Mixed media works by Ken Butler, MFA candidate, Art and Architecture Gallery, 299 NH
