This Minutes is brought to you for free and open access. It has been accepted for inclusion in Joint Policy Advisory Committee on Transportation by an authorized administrator of PDXScholar. Please contact us if we can make this document more accessible: pdxscholar@pdx.edu.
MEETING: JOINT POLICY ADVISORY COMMITTEE ON TRANSPORTATION
DATE: January 18, 2001
DAY: Thursday
TIME: 7:30 a.m.
PLACE: Metro Conference Room 370A & B

1. Call to Order and Declaration of a Quorum.

* 2. Minutes of November 9, 2000, JPACT meeting – APPROVAL REQUESTED

* 3. Resolution (Ref. No. 1479) – For the Purpose of Amending the Metropolitan Transportation Improvement Program (MTIP) to Approve Tri-Met’s FY 01 Appropriation – APPROVAL REQUESTED – Andy Cotugno

* 4. Resolution (Ref. No. 1487) – For the Purpose of Adopting the Procedures and Criteria for the Priorities 2002 Metropolitan Transportation Improvement Program (MTIP) Update – APPROVAL REQUESTED – Andy Cotugno

5. Bi-State Transportation Meeting with State Legislators – INFORMATIONAL – Rod Monroe

** 7. Elderly and Disabled Transit Update – Program Proposals; Letter of Support to Oregon Legislature – APPROVAL – Bernie Bottomly/Tri-Met and Sharon Kelly/Metro

9. Adjourn

* Material available electronically. Please call 503-797-1755 for a copy.
** Not all material on this agenda item is available electronically.

All material will be available at the meeting.

+ = bus/max stop

= public parking

Enter Metro visitor parking from Irving Street (time limit 4 hours per visit). Enter Metro Regional Center from the plaza.
MEETING REPORT

DATE OF MEETING: November 9, 2000

GROUP/SUBJECT: Joint Policy Advisory Committee on Transportation (JPACT)

MEMBERS PRESENT: Jon Kvistad, Chair
Serena Cruz, alternate
Rob Drake
Fred Hansen
Bill Kennemer
Jim Kight
Annette Liebe, alternate
Dave Lohman, alternate
Rod Monroe
Karl Rohde
Kay Van Sickel
Don Wagner
Ed Washington

GUESTS PRESENT: Jadual Waktu Ada
Martha Bennett
Clark Berry
David Bragdon
Victoria Brown
Judy Edwards
Ed Immel
Gary Katsion
Susie Lahsene
Stephan Lashbrook
Tony Mendoza
Ron Papsdorf
Lynn Peterson
Dave Williams
Ross Williams

Rooney Barker

SUMMARY:
The meeting was called to order and a quorum declared by Chair Kvistad at 7:35 a.m.
MEETING REPORT:

Action taken: Councilor Rohde moved, with a second by Councilor Kight, to approve the meeting report of October 19, 2000. Councilor Rohde asked that his question to Councilor Monroe regarding the Bi-State Committee be included in the discussion on p. 14. The following sentence was added: Councilor Rohde asked if they were being allowed to take on so much work that it would allow them to compete with JPACT. The motion passed unanimously. (Commissioner Kennemer and Mayor Drake were not present for this vote.)

RESOLUTION NO. 00-3001 FOR THE PURPOSE OF AMENDING THE FY 2000-03 METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP) TO INCLUDE $3,443,122 OF CMAQ FUNDS FOR HIGH-SPEED RAIL TRACK IMPROVEMENTS IN THE PORTLAND AREA

Mr. Cotugno gave a brief explanation of the resolution, as stated in the staff report. He then introduced Mr. Ed Immel of ODOT. Mr. Immel said this is a request to match a laundry list of other funds that are available to do track and signal work in southeast Portland. ODOT has looked at the rail corridor from the Oregon/Washington border down to Eugene, and divided it up into thirteen projects; these projects are needed in order to reduce running time to one hour and 55 minutes. One project has been completed – one of the biggest bottlenecks, north of Union Station. The second biggest bottleneck is in southeast Portland. Signaling systems and tracks that only work in one direction need to be fixed as they severely limit the number of trains that can be put in that corridor. The total project expense is $13.2 million. Of that, the Union Pacific Railroad is contributing $5.1 million, and other funds are available from ODOT for the High-Speed program. When the project is complete, there will be a double-track, reverse-signal railroad all the way from Albina Yard to Milwaukie Avenue. The major benefits of this project are that it will allow trains to move on time, and freight trains will be able to move much faster through southeast Portland, their time possibly cut in half. The running time between Albina and Brooklyn Yards will also be reduced from approximately 37 minutes to approximately 10 minutes. This will be a major fix for the rail system in Portland.

In response to a question from Councilor Rohde regarding the project’s timeline, Mr. Immel said they are in engineering now and hope to have construction started in spring 2001, taking about twelve months. The delay, he said, is the signaling parts, that the signaling industry can only move so fast. Saying he was strongly supportive of this, Mr. Hansen asked Mr. Cotugno if, when CMAQ funds are available for OTC to allocate within the region and obviously reflected in the MTIP, what would happen if there were a disagreement. Mr. Cotugno said we could reject these funds which would mean they wouldn’t be able to be spent on these projects in the region. it would be a deadlock. These funds are not controlled by a formula allocation, but OTC’s decision.

Commissioner Kennemer said Clackamas County was fairly excited about these upcoming improvements and the fact that they will soon have an Amtrak station in Oregon City. He said, however, that they were concerned about some serious grade crossing problems, the most
notorious being Lynnwood/Harmony with a probably $10 million overpass price tag. He reiterated the County’s support of the rail project.

**Action taken:** Councilor Rohde moved, with a second by Mr. Hansen, to approve Resolution No. 00-3001. The motion passed unanimously. (Mayor Drake was not present for this vote.) Chair Kvistad thanked Mr. Immel for sharing his knowledge and expertise with the committee.

RESOLUTION NO. 00-2999 FOR THE PURPOSE OF APPROVING THE AIR QUALITY CONFORMITY DETERMINATION FOR THE 2000 REGIONAL TRANSPORTATION PLAN

Mr. Cotugno reminded the committee that in August, when the 2000 RTP was adopted, it was subject to demonstrating that it conformed with air quality standards. This has not been submitted for approval to the federal government yet; with this resolution in place, that submission can take place. Demonstration of air quality conformity involves a number of pieces, he said, one being the estimate of vehicle emissions for different milestone years between now and 2020 to ensure that projects in the RTP will stay under the budgeted emission level assigned to the Transportation Sector of the State Implementation Plan. We also have to show we’re making progress on the transportation control measures. Both those things are demonstrated in this resolution. This is the first major overhaul of RTP air quality conformity that we’ve done in three or four years. We’ve done a series of amendments over that time – Interstate MAX, Airport MAX, Washington County Commuter Rail – each one was an amendment to the old air quality conformity which was based on the RTP adopted in 1995. The new RTP 2000 is substantially different and this is the first time we’ve done the air quality conformity that now gives us the confidence that all those things do stay within those limits. Given the fiscally constrained level of funding in the RTP, this is a demonstration that if we build those projects that we will stay within the air quality limits. Clearly, we have adopted a plan that says we want to go farther than that, so for local purposes we’ve also done an analysis to ensure the priority RTP (formerly strategic) system stays within the limits as well.

We’ve only done the one level at the fiscally constrained level with all of those projects, and then the second level with all the additional projects associated with the priority RTP. If individual projects get funded over the next few years and need to be added to the fiscally constrained, then we’ll need to determine the air quality impact of those individual projects. The system as a whole, if we do everything in the priority, would meet the air quality standards but an individual project might not.

The subarea emission estimates still need to be inserted into the plan, so Mr. Cotugno asked the committee to give staff the latitude to submit those later, for the winter carbon monoxide. He said there would be no submission to the federal government until those are included.

Councilor Monroe asked Mr. Cotugno to verify his understanding that if we did just the fiscally constrained programs, then we meet air quality standards twenty years out. If we did everything in the strategic, we meet air quality standards twenty years out. But if we did the fiscally constrained and some selective projects from the strategic, then we’d have to double check those
because what we have is a balance and some of the projects would possibly add some pollution, some would reduce pollution. If we pick and choose, we might not be in balance. Mr. Cotugno told Councilor Monroe that his understanding was correct.

Mr. Hansen said his understanding of the “extra room” in the fiscally constrained was not much, that we were just bumping against the lid. He asked if his perception was accurate. Mr. Cotugno replied that on three of the four pollutants we had a fairly good cushion, and on the fourth we didn’t, but were very close (NO\textsubscript{X} associated with summertime smog). Mr. Hanson then said that within the fiscally constrained there were some assumptions being made that there would be funds to do the projects, and some of those funds were not yet identified. Mr. Cotugno said the fiscally constrained, being very conservative, was based upon adopted state and local funding sources and an inflationary component on the federal resources, but not major increases. Of the federal resources, he said, it’s based upon only a portion of the federal resources being spent on expansion. Mr. Hansen said his question was perhaps moot in the sense that there were sufficient dollars under no change whatsoever at the state or local level. His concern was that if we aren’t able to make everything within the fiscally constrained system, how we would manage that relative to conformity. He asked if we would have to go back to reevaluate at period times or how it would work. Every three years it had to be redemonstrated, Mr. Cotugno said.

Councilor Washington asked what kind of public participation was received during the 30-day public comment period. He wondered who had been heard from, or if anyone had called. Mr. Hoglund said there had been a Port of Portland comment and a few questions. Councilor Washington, not meaning to be funny, asked if we had any citizens coming down and knocking on the doors. He said we always have public comment periods but does the public really comment. Mr. Hoglund said they do in other areas, but haven’t in the Portland area on conformity.

Ms. Liebe said when the next conformity was done she’d like to get the subarea analysis for carbon monoxide as part of the adoption package.

Councilor Washington said he understood the process for public comment, and that many times we make a big deal of public involvement, but in many cases there is none. He said he thought there should be some other way to solicit this. We assume most people will go along but a lot of them don’t. Mr. Hansen said he appreciates Councilor Washington’s comments. As he’s watched the public’s involvement over the years, he said, he’s seen the tendency for them to comment not on the conformity determination but on the issue(s) of the individual projects and their popularity or lack thereof on an ongoing basis. He said he felt this was more of a technical review, and this was a very serious issue across the nation, to ensure that if the projects aren’t able to achieve conformity the whole process must begin again. Essentially EPA is the keeper of that and can veto the conformity. It becomes a big issue, but primarily as a technical review that looks at the conglomeration of all of the projects that will all come out of the fiscally constrained system.

Mr. Cotugno said the biggest reason for the public comment requirement being added, which was instigated by the air quality advocacy groups at the national level, is that the process for
estimating emissions is a very detailed one, it's difficult to penetrate, hard to break down. Only a few technicians can make the decisions and assumptions. The public can examine it, and it does get examined.

Ms. Liebe added that Metro is one of the leaders in the technical analysis process, and many advocacy groups recognize the expertise and leadership in the modeling field that Metro demonstrates.

**Action taken:** Ms. Liebe moved, with a second by Commissioner Kennemer, to approve Resolution No. 00-2999. The motion passed unanimously.

**FY 2002-05 METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP): RECOMMENDED PROCESS FOR PUBLIC REVIEW**

Mr. Cotugno said he would like to continue the discussion the committee began at their meeting last month, where TPAC was looking for feedback and direction. The MTIP issues include whether to look at a few big projects or more small projects, and whether to consider freeway oriented projects, whether to stick with the old list or open it up to new possible projects. On a few of these issues, TPAC had some recommendations, starting on page 2 of the November 2 memo to JPACT, and there were some areas where TPAC didn’t have recommendations and these would need to be settled within the next few months. The memo outlined TPAC’s suggestions and provided feedback to this committee. The second paragraph included the revenue estimates for the 2002-05 MTIP.

Regarding the criteria, TPAC has suggested we stay with the criteria used last time. Other factors that may be relevant but that aren’t shown in the criteria need to be looked at as well, he said, such as leveraging, past commitments, etc. TPAC felt the 150% list was a reasonable starting place but not necessarily a reasonable ending place. They felt there should be some cautious consideration of additional projects rather than substituting, and allowance to some jurisdictions for submitting additional applications. The area where we still have no conclusion is big projects vs. small projects.

It was suggested at the TIP subcommittee, Mr. Hoglund added, that projects submitted for addition be limited to what’s in the financially constrained RTP, unless a project has funding. Mr. Hansen said at the last discussion, he, Councilor Rohde and Commissioner Hales were concerned that more dollars would be spent to achieve the conformity determination and not actually end up in the projects. Mr. Cotugno said the staff cost of running a conformity determination is not insignificant, and Mr. Hansen said that was what he wanted to underscore. Since there are limited dollars, he wanted to make sure actual benefit was received.

Councilor Rohde said he’d put a placeholder in his mind to relook at the criteria and look at the alternative modes. Understanding that there are few dollars available that can actually go toward alternative modes in this state, he had hoped the criteria could be looked at and discussed. Mr. Cotugno said it could be brought back for discussion at the next meeting.
From the audience, Councilor Bragdon had a question to the committee regarding asking the jurisdictions if the projects on the 150% list are still what they want. Mr. Cotugno responded that once the process is adopted, that will be laid out – whatever the timelines, application procedures, criteria, etc. – whatever process this body decides. In the past, the application is required to come from the sponsoring jurisdiction and they have been required to demonstrate that they’ve met Metro’s public involvement requirements.

Mayor Drake said the 150% list was the result of a great deal of work. It defined the region’s priorities, and barring some slight modifications due to a change of something that’s already on the list, he was very reluctant to open the process up again. The list wasn’t that old, and he would like to stay the course.

Commissioner Cruz thought if the jurisdictions were asked to stay within some level of constraint and to reprioritize, it would not open the floodgates but would require reexamination of projects and possible reprioritization. Mr. Cotugno said this was TPAC’s philosophy, but there may be changes in priorities.

Mr. Hansen said he wanted to take one step back from the projects that will have to be evaluated. He said the level of dollars needed to be pinned down, that the CMAQ dollars are clearly federally constrained and can be used only for those things that will improve air quality. For the STP dollars, which essentially are the flexible dollars, he said these have always been used for alternative transportation efforts, not necessarily road projects. Mr. Cotugno clarified that they’ve been used for arterial widening, freight access, bridge rehab, boulevard projects, and Mr. Hansen agreed, saying they were used for things that further the 2040 goals. He then said that even though this is a constrained setting, Mr. Cotugno had pointed out that the committee needed to look at both the federal priorities as well as whatever may be the agenda at the state level. Mr. Hansen urged the committee to not abandon the approach they’ve always used for STP dollars within the region, and to keep their focus on the long-term 2040 goals. He said if the broader framework is kept in mind, it will help the region get the type of projects it ought to have.

Mr. Cotugno, prompted by Councilor Rohde, addressed the Transportation Budget Review sheet (salmon colored) which the committee had requested at last month’s meeting. The Budget Review sheet provided a five-year history of the different parts of the Metro Planning program with the personnel and the resources available as well. Last month, the committee looked at the Unified Work Program portion that keyed into the dollars listed in the last column on this sheet, the current fiscal year. He pointed out that the FTE (full-time employee) number has been scaled down over the past five years working on the various planning programs, and the dollars have been scaled down as well. Another question that was raised, and he said he doesn’t have the answer ready yet, was how much was being spent on projects on the ground vs. how much was being spent on planning, preliminary engineering and environmental work that was intended to get projects ready. Mr. Hansen asked if the cutting back meant losing the capacity to do the quality of work that’s always been done. Mr. Cotugno said his staff hadn’t run into that problem yet as junior staff was where the cuts were, but he was worried that the Materials and Services were very thin. Long-term growth would be limited, however, by losing junior staff.
Chair Kvistad briefly mentioned the November 9th memo sent to committee members and their alternates, reminding those present to respond as to their preference in how they receive their agenda material each month.

TRI-MET TRANSPORTATION DEMAND MANAGEMENT PROGRAM SEMI-ANNUAL REPORT

Mr. Tony Mendoza of Tri-Met opened his presentation by saying two years ago there were questions on what was going on in Transportation Demand Management, so now JPACT and TPAC are updated approximately every six months. A copy of Mr. Mendoza’s presentation is included in this record.

There being no further business, the meeting was adjourned at 8:30 a.m. by Vice-Chair Rod Monroe.

Respectfully submitted,

Rooney Barker
Recording Secretary
STAFF REPORT

CONSIDERATION OF RESOLUTION NO. 01- FOR THE PURPOSE OF AMENDING THE METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP) TO APPROVE TRI-MET'S FY 01 APPROPRIATIONS

DATE: November 16, 2000
Presented by: Mike Hoglund

PROPOSED ACTION:

This resolution would amend the MTIP to approve obligation of new federal funds appropriated to five Tri-Met sponsored projects in FY 01. The projects include the Interstate MAX LRT extension, construction of the Milwaukie Transit Center, Wilsonville to Beaverton Commuter Rail design, improvement of the Pioneer Courthouse Visitor Center/Tri-Met Information Office, and ongoing support for the Tri-Met Jobs Access program.

EXISTING LEGISLATION

Federal regulations stipulate that federal transportation funds appropriated under the Transportation Equity Act for the 21st Century (TEA-21) must be included in an approved, conformed, financially constrained MTIP before they can be obligated.

BACKGROUND AND ANALYSIS

The MTIP currently approves obligation of various Tri-Met projects that rely on federal funding. The FY 01 Congressional appropriation allocates a variety of funds for ongoing support for several of these projects. Under federal planning regulations, the additional funds must be included in the MTIP before FTA can approve grants submitted by Tri-Met to access the federal funds. All the projects addressed in this resolution have been previously endorsed and the resolution deals only with approval of newly appropriated dollars. The projects and new funds are shown in Exhibit A of the resolution.

The most significant appropriation is $7.5 million of Section 5309 New Start funds for the Interstate MAX LRT extension project. These funds are the first installment of appropriations established in the Full Funding Grant Agreement (FFGA) between the region and FTA. The total FFGA amount is for $257.5 million of New Start funding.

The second appropriation addressed in this action is $1.5 million of Section 5309 funds for construction of the Milwaukie Transit Center. This appropriation was anticipated in Metro Resolution No. 00-2980A, which:

1) approved obligation of up to $4.0 million of federal funds for construction of the Milwaukie Transit Center;
2) approved reallocation of $1.5 million of funds left over from the PSU Transit Center to the Milwaukie project; and
3) programmed $650,000 of Section 5309 funds appropriated to the project in FY 00.
Total federal funds now appropriated to the Milwaukie Transit Center is therefore $3.65 million. Under Metro Resolution No. 00-2980A, another $350,000 of future federal appropriations to the project are authorized for obligation. This resolution addresses the FY 01 appropriation for information purposes only.

The third appropriation is another $1.0 million of Section 5309 New Start funds for design of the Wilsonville to Beaverton Commuter Rail project. These funds supplement $1.0 of regional STP funds allocated in the FY 2000 MTIP for environmental analysis of the project and $500,000 of New Start funds appropriated to the project in FY 00. Conformity of the project recently received joint FHWA/FTA approval. With the current funds, total federal funds allocated to the project come to $2.5 million.

The fourth appropriation is $400,000 of Section 104, Transportation and Community and System Preservation program funds for enhancement of the Pioneer Courthouse Square Information Office shared by Tri-Met and the Portland Oregon Visitors Association (POVA). Regional funds to begin the improvement were approved in the FY 2000 MTIP. These funds enable completion of the Information Center reconstruction to fully accommodate both programs in the building.

The fifth appropriation approved for programming in this resolution is the combination of FY 00 ($850,000) and FY 01 ($1,840,000) Section 3037 funds for Tri-Met’s Jobs Access and Reverse Commute Program. These funds have a 50 percent local match. The program objectives were approved in June 1999 by Metro Resolution No. 99-2799A. In general, the program objectives are to provide new, traditional transit services, social services outreach and allied non-traditional, non-SOV travel demand management strategies to address low income, employment-related transportation needs.

The Resolution—which also provided authority to program all subsequent Jobs Access appropriations to the program administratively. The current appropriations are therefore referenced in this resolution for information purposes only. Resolution 99-2799A, moved by the City of Gresham, also stipulates that TPAC and JPACT should revisit the program after the first year of appropriations to determine whether its expansion would be appropriate to include additional “transit hub” improvements. Federal appropriations to the program are running about $600,000 above sums so far requested by Tri-Met. This Resolution therefore approves amendment of the Jobs Access program to include a Rockwood Transit Hub in Gresham, or elsewhere, in light of the funding windfall. The current appropriations are referenced in this resolution for information purposes only. In general, the program objectives are to provide new, traditional transit services, social services outreach and allied non-traditional, non-SOV travel demand management strategies to address low income, employment-related transportation needs.

ADMINISTRATIVE CONSIDERATIONS

MTIP Financial Constraint. All funds addressed in this resolution have been appropriated and their inclusion in the MTIP maintains financial constraint of the MTIP.

Regional Transportation Plan (RTP) Financially Constrained System. The Interstate MAX and Milwaukie Transit Center projects are included in the 2000 RTP as specific line item projects in the
financially constrained RTP project list. The Commuter Rail project was amended into the 1995 Financially Constrained network and is included in the 2000 RTP Financially Constrained network. The Pioneer Courthouse Square Project appropriation was not anticipated in the RTP but is encompassed within the RTP’s general identification and approval of regional TDM initiatives. The Tri-Met Jobs Access program is specifically endorsed in RTP Chapter 1.3.3, Policy 5.2. As program funds were approved in the MTIP prior to adoption of the RTP, funding is not identified as a future needed resource in the Financially Constrained System project list.

Conformity Status. The Interstate MAX and Wilsonville to Beaverton Commuter Rail projects are included in the financially constrained system used to conform the 1995 RTP, as amended, the FY 2000 MTIP, and the 2000 RTP (conformity pending). The Milwaukie Transit Center is exempt by rule, but its effect on local circulation in Milwaukie was modeled as part of both the approved 1995 RTP/2000 MTIP Conformity determination quantitative analysis and the 2000 RTP analysis, whose federal approval is pending. The Pioneer Courthouse Square Information Office is exempt by rule. The Jobs Access Program is new transit service and TDM activity and is also exempt by rule.

BUDGET IMPACT
None.
BEFORE THE METRO COUNCIL

FOR THE PURPOSE OF AMENDING THE METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP) TO APPROVE TRI-MET'S FY 01 APPROPRIATIONS

RESOLUTION NO. 01-_ _ _

WHEREAS, The region has previously approved various Tri-Met sponsored projects and programs, including the IMAX LRT extension, the Milwaukie Transit Center, the Wilsonville to Beaverton Commuter Rail project, Pioneer Courthouse Information Center Reconstruction and the Tri-Met Jobs Access and Reverse Commute program, for obligation of federal funds in the MTIP; and

WHEREAS, Congress has approved support for these five projects in the FY 01 appropriations bill, for the amounts shown in Exhibit A of this Resolution; and

WHEREAS, Tri-Met grant applications to obligate the newly appropriated federal funds cannot be approved by FTA until the MTIP is amended to program the appropriations for obligation; and

WHEREAS, The current action merely adds money to currently approved projects; and

WHEREAS, All the projects are currently identified in a conformed, financially constrained MTIP and STIP; and

WHEREAS, Resolution 99-2799A conditioned approval of the Tri-Met's Jobs Access Program to direct that TPAC and JPACT consider addition of new projects and transit hubs after the first year of the program; and

WHEREAS, Tri-Met and Gresham have been negotiating over the past year with respect to establishing a Rockwood Transit Hub as part of the program; and

WHEREAS, total three year appropriation to the Jobs Access program are nearly $600,000 in excess of the $3.0 million anticipated by Tri-Met (federal share); now, therefore,

BE IT RESOLVED,

1. The MTIP is amended to approve obligation of the project sums shown in Exhibit A.

2. The Executive Officer is authorized to request amendment of the STIP to reflect this action and to coordinate administrative details with staff of ODOT, Tri-Met and others.
3. Amendment of the Jobs Access program, in light of higher than anticipated program revenues, to establish a Rockwood Transit Hub, or such other transit hubs as may be deemed by Tri-Met to be viable and consistent with the Jobs Access program, is approved, contingent on a report to TPAC and JPACT regarding any such adopted revisions.

ADOPTED by the Metro Council this ___ day of __________, 2001.

__________________________________________, Presiding Officer

Approved as to Form:

Daniel B. Cooper, General Counsel

STAFF REPORT

December 29, 2000 Presented by: Richard Brandman

PROPOSED ACTION

This resolution would approve a set of procedures and the basic technical and administrative criteria that will be used during the Priorities 2002 MTIP Update to nominate, evaluate and select projects to receive federal transportation funds in the FY 04-05 biennium.

EXISTING LEGISLATION

Federal planning regulations designate JPACT and the Metro Council as the Portland area metropolitan planning organization that is responsible for allocating federal highway and transit funds to projects in the metropolitan area. Preparation of an MTIP is the means prescribed for doing this. JPACT and the Metro Council have traditionally approved the procedures and criteria to be used in each two year MTIP update prior to initiating the actual project solicitation and selection process. Projects approved for inclusion in the MTIP must come from a conforming, financially constrained transportation plan. The 1995 RTP, as amended, is the currently conforming plan. Approval of the 2000 RTP Conformity Determination is pending from the USDOT.

BACKGROUND AND ANALYSIS

Metro is preparing a request to local jurisdictions to submit projects to Metro for evaluation and award of regional flexible transportation funding. Metro and ODOT update the MTIP/STIP every two years to schedule funding for the following four-year period. The Priorities 2002 Update encompasses the four-year period of federal fiscal year's 2002 through 2005 (FY 02 - FY 05). This update will therefore adjust, as necessary, funds already allocated to projects in FY 02 and FY 03 in the current approved MTIP. It will also allocate funds to new projects in the last two years of the new MTIP (i.e., FY 04 and FY 05). The proposed Priorities 2002 MTIP update schedule is shown in Attachment 1.

The money available for allocation in the 2002 MTIP update is composed of two types of federal transportation assistance, which come with differing restrictions. The most flexible funds are surface transportation program (STP) funds that may be used for virtually any transportation purpose, identified in the Financially Constrained RTP, short of building local residential streets. The region can allocate about $20 million of STP funds to new projects in FY 04 - 05.

The second category of money is Congestion Mitigation/Air Quality (CMAQ) funds. CMAQ funds cannot be used to build new lanes for automobile travel. Also, projects that use CMAQ funds...
funds must demonstrate that some improvement of air quality will result from building or operating the project. The region can allocate about $18 million of CMAQ funds to new projects.

The Oregon Transportation Commission (OTC) has decided not to allocate Transportation Enhancement (TE) funds in this Update. TE funds support more recreationally oriented transportation projects, including bike and pedestrian paths, and other non-automotive improvements. The OTC suspended allocation of this class of federal funds in order to focus resources on significant maintenance and rehabilitation needs of the state’s existing roads and bridges. Again though, STP funds can also be used to fund most of these types of projects.

**State Highway System**

ODOT receives state and federal funds dedicated to maintenance and improvement of state highways and bridges. ODOT has primary responsibility for programming these funds. The OTC divides the funds to each of the five ODOT regions. Region 1, which includes all the urban portions of Multnomah, Clackamas and Washington Counties, expects to receive a combined amount of about $349 million of these funds between FY 02 and 05. About $160 million will be available for allocation to new projects in FY 04 and 05. However, ODOT’s maintenance monitoring systems, for bridge, safety, pavement and operations, have already prioritized the candidate projects slated to receive these funds.

Of the $160 million total, about $136 million is targeted for preservation and rehabilitation of highway and bridge facilities in the region. About $25 million is targeted for construction of added freeway capacity on US 26 in Washington County (addition of a third westbound lane from Hwy. 217 to Murray). The relationship of these funds to the regional flexible funds is shown in Attachment 2.

**Invitation for Public Comment**

Comparing this MTIP Update to previous efforts, there is not a lot of money available for new projects. Consequently JPACT and the Metro Council Transportation Planning Committee have proposed a less robust project solicitation process that relies to some degree on work completed in the last update, in the summer of 1999. Metro opened a 30-day comment period on this proposal on December 18, 2000 through January 16, 2001. Comment, primarily on three topics, was invited:

1. Goals that should guide the process;
2. Developing the pool of projects for evaluation; and
3. Criteria for selecting projects.

1. **Process Goals**

The following goals have been tentatively approved to provide a clear direction for the project nomination, ranking and selection process:

- Implementation of the Region 2040 land use goals and objectives and the Regional Transportation Plan is the primary goal for the Priorities 2002 MTIP.
• Establish a clear, simple, and understandable process that minimizes procedural hurdles while maintaining broad-based citizen participation.

• Fund the most critical projects that provide a clear public benefit, consistent with federal policies for addressing environmental justice issues.

• Emphasize projects and programs that most efficiently manage demand and enhance the operation of the existing transportation infrastructure. Look for low-cost projects that have large benefits.

• Consider funding logical project phases or projects that complete a logical gap in the system.

• Emphasize project construction (rather than project design efforts) either through direct funding or leveraging other potential revenue sources.

• Support projects that can be delivered in the timeframe of the FY 2002-2005 STIP.

2. Pool of Candidate Projects

• "Base Package" of Projects. JPACT and the Metro Council Transportation Planning Committee believe that since only limited funds are available, a streamlined process should be used to reduce staff time spent by Metro and responding jurisdictions on a detailed project solicitation request from Metro and the subsequent technical ranking process. In the last MTIP update, which concluded last year, about $55 million worth of projects and programs from around the region were highly ranked in a so-called “150 percent list,” yet were not funded. Metro staff recommended that these projects be considered a “Base Package” of project candidates in the 2002 MTIP update. (A list of these projects, including a brief narrative description of each project, is shown in Exhibit B of the Resolution.) TPAC’s previous endorsement of this strategy remained unchanged at the January 5th meeting.

• Project Additions. This issue was further addressed by TPAC at the December 1st meeting and remained unchanged at the January 5th meeting. JPACT and the Metro Council Transportation Planning Committee concurred with the recommendation of Metro staff and TPAC that:
  i. “addition” of new projects to the Base Package of highly ranked projects be cautiously allowed;
  ii. any new projects should come from the Financially Constrained System of the 2000 RTP, or have been the result of a recently completed planning activity (e.g., the Gateway Regional Center Plan); and
  iii. any new projects must meet or exceed Metro’s requirements for public involvement. One or two add projects may be submitted on behalf of eligible sponsors by:

  • Metro
  • Tri-Met
  • DEQ
  • ODOT
  • Washington Co. and its cities
  • Clackamas Co. and its cities
  • Multnomah Co. and its cities
  • City of Portland
  • Port of Portland
  • Park & Recreation Districts
TPAC endorsed the following guidelines for project additions:

i. Limit the overall dollar amount and number of candidate projects in order to keep the program manageable.

ii. Maintain flexibility to add or drop projects based on local and regional priorities or to address changing conditions and current needs.

• TPAC also discussed two new policy recommendations to further clarify submission of new projects. They are:

i. Projects must be submitted with an accompanying letter documenting the approval action of an eligible jurisdiction’s elected council or from an agency’s council or board.

ii. A “cautious” submittal of additional projects is defined as a net of two new projects plus a few lower-cost projects may be substituted for projects removed from the “Base Package” list (i.e., the former “150 percent” list of highly ranked projects).

The first recommendation, to require a letter of documentation, is to ensure adequate and open discussion of the project submittals by elected or appointed officials and the public. The second recommendation defines “cautious” and allows for low-cost/big-bang projects to be added without penalty. While not defined by TPAC, Metro staff suggests that a “few low-cost projects” implies perhaps not more than three projects that total no more than $500,000.

• Freeway Projects. At their November meeting, JPACT indicated a preference for not funding projects on limited access highways (i.e., freeways). Regional flexible funds have not previously been used to design or construct new freeway lanes or major interchange improvements. Minor interchange modifications, mostly to improve operation of major streets feeding onto freeways, have been previously funded. At the December 1st meeting, and again at the January 5th meeting, TPAC requested clarification as to whether this constituted a restriction on freeway-related preliminary engineering (PE), freeway interchange projects, or freeway projects submitted by local governments as one of their few allowed “add” projects. TPAC recommended:

“Permit submission of freeway-related PE, interchange and lane construction projects by local governments as one of their few allowed add projects in the allocation process.”

• Big Projects vs. Small Projects. TPAC made no further recommendation on this issue at the either the December 1, or January 5 meetings. Past allocations have generally funded projects that are less than $6 million, even when resources have been greater. The alternative is to give more money to a few larger projects, or do a combination program of various project sizes. JPACT and the Metro Council Transportation Planning Committee have suggested remaining flexible on this issue, meaning to allow locals to decide their priorities.

• Regional Programs. Over the years, Metro has funded a number of regional programs (e.g., the Regional TDM program, Intelligent Transportation System (ITS) deployment,
etc.). Tracking data indicate that many of these programs return high value for low cost. JPACT and the Metro Council Transportation Planning Committee have recommended that ongoing regional programs should be evaluated for effectiveness as a prelude to considering funding levels for the programs in the current update. At the January 5th meeting, TPAC endorsed this concept but desired to stress its recommendation that the actual determination of whether to continue funding of existing programs, and at what levels, should be done at the same time that consideration is given to overall allocations to new phases of existing projects and/or wholly new project initiatives. Continuation of existing programs would require about $9 million. The programs are shown in Attachment 3.

3. Allocation Process and Selection Criteria

As discussed above, Metro must settle on a method for selecting a pool of candidate projects to evaluate in the Priorities 2002 MTIP Update process. Metro must then settle on a project ranking process to pick the projects that will be awarded money. In the past, Metro has used a five-step process, which is summarized in Exhibit C of the Resolution, to conduct project nominations, ranking and selection. The same basic process is recommended for the current update. During discussion of the criteria at JPACT and the Metro Council Transportation Planning Committee, two recommendations were presented for consideration.

A. Should the Technical Criteria be amended to award up to 60 points, out of 100, toward a project’s support of Metro’s Region 2040 land use objectives? The current approved criteria award 40 points. Regional flexible funds are some of the only dollars available that can be targeted to enhance the kind of multi-modal travel options that are required to successfully achieve Metro’s desired compact development patterns.

B. Should Metro narrow Salmon Recovery as a non-technical consideration in the project selection process? Since the last update, ODOT and the City of Portland have completed inventories of road culverts that significantly impede salmon spawning in area streams. Metro is preparing a regional priority list. The Metro Council Transportation Planning Committee has recommended that a project’s “salmon benefit” (i.e., transportation projects that coincidentally rebuild problem culverts) should specifically refer to these priority culvert lists and that the lists should be circulated to area agencies as part of the project solicitation package. The resolution includes this refinement.

- At the both the December 1st and January 5th meetings, TPAC endorsed the salmon benefit refinement. Some TPAC representatives were concerned that other salmon-related project benefits (e.g., longer bridges to avoid stream impacts) might merit consideration and that “priority culvert-repair” is too narrow a criterion.

- TPAC recommended that the 2040 points remain unchanged during this update; that significant weight is already placed on this criterion in the current ranking system and that assessment of the success of the current criteria at selecting “2040-friendly” projects should be made after the current update. There was discussion at TPAC that changing the point system at this time would add uncertainty to the process. Also, it was suggested that the 2040 emphasis should be addressed not in the technical
ranking, but rather in the modal allocation and program development phase of the process. Given the complexity of the discussion, TPAC suggested the entire process, criteria and allocation procedures be reviewed following the completion of the Priorities 2002 MTIP. The review would focus on fine tuning the process to ensure future allocations maximize implementation of the Region 2040 concept and the RTP. A Resolve was added to the resolution to reflect this recommendation to update the process.

If JPACT and the Metro Council decide to increase the 2040 emphasis to 60 points, Metro staff recommends that ten points each should be added to the two existing 2040 criteria. For all modes but Transit, TDM and TOD, the following point changes should be implemented:

i. Effectiveness – reduce to 20 points from 25 points;

ii. Cost Effectiveness – reduce to 10 points from 15 points; and

iii. Safety – reduce to 10 points from 20 points.

For Transit and TDM, ten points each should be taken from Effectiveness (reduce to 25 points from 35 points) and Cost Effectiveness (reduce to 15 points from 25 points).

For TODs, no change is recommended: the existing point system already heavily emphasizes increase of mixed-used density which is at the heart of the 2040 land use objectives. Additionally, Metro staff considers Effectiveness and Cost Effectiveness to be crucial considerations with respect to the viability of this program and these factors should retain a relatively higher emphasis.

• TPAC members raised a concern that the criteria might better assess the effects of nominated projects on movement of freight and goods, either as they improve such movement, or hinder it. Resolve 7 of the resolution is meant to reflect this discussion.

BUDGET IMPACT

None.

<tr>
<td><strong>TOTAL:</strong></td>
<td>$9,404,000</td>
</tr>
</tbody>
</table>

* Costs shown assume two years funding (i.e., FY 04-05) at annual levels approved in the prior Update.

** The State (Air Quality) Implementation Plan commits the region to provide average annual transit service increases of 1.5 percent. A $1.0 million allocation roughly equals a one percent service increase. The region has met this commitment through 2006. However, the region's policies state that increases above 1.5 percent annually are desirable.

*** The region's ITS program is being incrementally deployed and addresses freeway, transit and arterial operations. Regional funds have been allocated to plan and begin deployment of the arterial component of the program. Though composed of discrete projects, ITS is addressed here as a program because the full benefits of any one corridor enhancement are not achieved until management of the system of intersecting corridors as a whole can be optimized.
BEFORE THE METRO COUNCIL

FOR THE PURPOSE OF ADOPTING THE PROCEDURES AND CRITERIA FOR THE PRIORITIES 2002 METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM (MTIP) UPDATE.

RESOLUTION NO. 01-

Introduction by JPACT Chair

WHEREAS, JPACT and the Metro Council are identified in federal regulations as the Portland area Metropolitan Planning Organization responsible for the allocation of federal highway and transit funding; and

WHEREAS, Federal regulations identify preparation of a metropolitan transportation improvement program (MTIP) as the means for making the allocation of such funds; and

WHEREAS, Federal regulations require that the MTIP be included without change in the State TIP by incorporation or by reference; and

WHEREAS, JPACT and the Metro Council have traditionally submitted the procedures and criteria that they propose to use to prepare MTIP updates for comment by affected agencies and members of the public; and

WHEREAS, The Regional Transportation Plan was adopted in August 10 2000 and represents the transportation implementation component to the Region 2040 Growth Concept; and

WHEREAS, New funding for transportation projects is limited to about $38 million, split between federal fiscal years 2004 and 2005; and

WHEREAS, About half of these funds cannot be used to design or construct general purpose automobile travel lanes; and

WHEREAS, The amount of funds does not warrant dedication of substantial staff time by representatives of the region’s operating agencies to prepare detailed responses to a project solicitation; and

Resolution 00-

p. 1 of 4

Ref. No. BS 1487
WHEREAS, JPACT and the Metro Council Transportation Planning Committee propose the Priorities 2002 MTIP Update goals and objectives shown in Exhibit A; and

WHEREAS, The region has available a “Base Package” of highly ranked candidate projects, shown in Exhibit B, that were not selected for funding in the Priorities 2000 MTIP Update concluded only 18 months ago; and

WHEREAS, The “Base Package” of projects also includes regional programs that have received funding in prior MTIP updates and will require continuation of funding if they are not terminated; and

WHEREAS, All projects selected for funding in the MTIP must also either be included, or amended into a Financially Constrained Network of the Regional Transportation Plan which is shown to conform with the State (Air Quality) Implementation Plan; and

WHEREAS, JPACT and the Metro Council Transportation Planning Committee have proposed to permit Metro, Tri-Met, DEQ, ODOT, the Port of Portland, the City of Portland and Clackamas, Multnomah and Washington Counties, and their cities working through their county representatives, and regional park and recreations districts (working through their respective county representatives) to submit one or two additional projects for evaluation; and

WHEREAS, JPACT and the Metro Council Transportation Planning Committee have proposed to use the technical and administrative ranking criteria and selection process summarized in Exhibit C, and intended to implement the 2040 Growth Concept and the Regional Transportation Plan; and

WHEREAS, Amendment of these criteria have been proposed to refine the importance of salmon recovery aspects of nominated projects by limiting consideration of “fish friendly” project features to only those projects which address culverts named in any of the several state, regional and local culvert priority lists that have been developed; and

WHEREAS, TPAC has noted that movement of freight and employees are keystones to the region’s economic health and resulting freight transportation project revenue stream; and
WHEREAS, Metro staff will coordinate with staff at ODOT Region 1 and Tri-Met regarding prioritization of projects and allocation of funds primarily subject to their discretion, that must however, also be reflected in the MTIP and the financially constrained RTP system; and

WHEREAS, further opportunity for agency and public input to the project evaluation and selection process will be provided in spring 2001, before final approval of an FY 2002 MTIP; now, therefore,

BE IT RESOLVED,

1. The Priorities 2002 MTIP Update goals and objectives stated in Exhibit A are approved.

2. Implementation of the Region 2040 land use goals and objectives and the Regional Transportation Plan is the primary goal for the Priorities 2002 MTIP.

3. The “Base Package” of projects listed in Exhibit B is approved for use in the Update.

4. Funding levels for existing regional programs shall be considered at the same time as allocation of funds to new transportation projects or programs.

5. The procedures and criteria summarized in Exhibit C will be used during the update and may be refined as needed by staff to reflect the most current demographic and technical information available.

6. The administrative criteria are amended to limit consideration of salmon recovery project benefits to only those projects that improve culverts identified in any of the approved state, regional, or local priority lists available within the course of project selection.

7. The “multi-modal benefit” administrative criterion includes recognition of potential benefits or constraints to freight movement associated with a project.

8. Following conclusion of the current update, an assessment will be performed of whether the allocation process and criteria hereby approved support transportation and land use goals and objectives of the Region 2040 growth concept.
ADOPTED by the Metro Council this _____ day of ___________________, 2001.

Approved as to Form:

David Bragdon, Presiding Officer

Daniel B. Cooper, General Counsel
Process Goals

Metro has tentatively approved the following goals to provide a clear direction for the project nomination, ranking and selection process. They are:

- Implementation of the Region 2040 land use goals and objectives and the Regional Transportation Plan is the primary goal for the Priorities 2002 MTIP.

- Establish a clear, simple, and understandable process that minimizes procedural hurdles while maintaining broad-based citizen participation.

- Fund the most critical projects that provide a clear public benefit, consistent with federal policies for addressing environmental justice issues.

- Emphasize projects and programs that most efficiently manage demand and enhance the operation of the existing transportation infrastructure. Look for low-cost projects that have large benefits.

- Consider funding logical project phases or projects that complete a logical gap in the system.

- Emphasize project construction (rather than project design efforts) either through direct funding or leveraging other potential revenue sources.

- Support projects that can be delivered in the timeframe of the FY 2002-2005 STIP.

**ROADWAY RECONSTRUCTION**

**BRIDGE IMPROVEMENTS**

**PBr3** Broadway Bridge/Approaches Rehabilitation Phase 5
Partial funding of a $20 million project to replace deck grating on the main span of the bridge and paint the lower structural members.
PRIORITIES 2002 MTIP UPDATE/
REGION 2040 IMPLEMENTATION PROGRAM:
Description of Recommended “Base Package” Project Candidates

FREIGHT IMPROVEMENT

PF7 Marine Drive: BNSF O’Xing/Kelly Point Park
Port of Portland
PE for second phase of widening. Design 1,400 rail O’xing; construct 64’ wide curveto-curb pavement w/ four 12’ travel lanes, two 6’ bike lanes, 4’ median; add sidewalks.

RPIng3 I-5 Trade Corridor Study
Funding to conclude analysis of improvements needed within the north Portland portion of the multistate I-5 corridor.

Rplang4 Regional Freight Program Analysis
Funding to continue refinement of data collection and model validation concerning effects of local freight delivery on the regional arterial system.

BOULEVARD IMPROVEMENTS

CBL2 Willamette Drive: “A” St/McKillican
West Linn
Provide median/turn lane, narrowed travel lanes, standard bicycle lanes, boulevard sidewalks, pedestrian crossings and median refuges, bus pullouts.

CBL4 “A” Avenue Improvement
Lake Oswego
Extend Phase 1 “A” Avenue improvements to Highway 43.

MBL1 Division Street: Cleveland/Birdsdale
Gresham
Implement Boulevard design along 1.5 mile street section through the Gresham Regional Center.

MBL2 Stark Street: 181st/197th
Gresham
Expand on pedestrian friendly treatments currently under construction in the Rockwood Transit Center renovation at 188th and Stark Street.

PBL2 Gateway Regional Center
Portland
Begin implementation of concepts identified in the Gateway Regional Center Transportation Study.

## PRIORITIES 2002 MTIP UPDATE/
REGION 2040 IMPLEMENTATION PROGRAM:
Description of Recommended “Base Package” Project Candidates

### PBi3
**Marine Drive Multi-Use Trail Segments: Bridgeton Road/13th Avenue; 28th/33rd Ave; and 112nd Avenue**
- Portland
  - Construct two-way bike path along the south side of Marine Drive.

### PBi6
**Eastbank Trail: OMSI/Springwater Trail Completion**
- Portland
  - PBi6a: North end of Water Avenue from Caruthers Street south to the Oregon Pacific right of way will be paved with bicycle and pedestrian improvements.
  - PBi6b: Convert Umatilla and Spokane Streets to bicycle boulevards; or Develop off street trail (Umatilla St. to Springwater) and construct three bridges.

### WBi10
**Fanno Creek Multi-Use Path: East to Allen/Scholls Ferry**
- THPRD
  - Construct a 10-foot wide path with boardwalks and bridge structures.

RTr2 Tri Met

Service Increase for Regional/Town Center TCL

Purchase 56 new/replacement buses for Tri-Met in order to establish new Transit Choices for Livability (TCL) services focused on Regional and Town Centers throughout the region. At the conclusion of its service plan update in late spring, Tri-Met would present its base service plan (which is funded through their existing resources) for review by JPACT and the Metro Council and seek concurrence for planned service expansion proposed to be funded through these regional funds. This four-year, $4 million per year regional allocation would provide funds to Tri-Met's capital program, thereby allowing them to increase service by $4 million.

<td>Increase modal share: Decrease single occupancy vehicle mode share</td>
<td>Reduce vehicle miles traveled at reasonable cost: Cost per vehicle miles of travel reduced</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Freight</td>
<td>Support 2040: 1. Increase access to and circulation within industrial areas 2. Increase of industrial job or high focus on &quot;traded sector&quot; businesses</td>
<td>Reduce delay of freight and goods movement: Truck hours of delay eliminated</td>
<td>Mobility at reasonable cost: Cost per truck hours of delay reduced</td>
<td>Safety: Reduce road/trail conflict and truck conflict with bike</td>
</tr>
</tbody>
</table>

### Selection

- Draft funding recommendation for public hearing and consideration by JPACT and the Metro Council

#### Allocation criteria

- Multi-modal project mix
- Geographic equity
- Support 2040 objectives
- Meets air quality test

#### Type of funding available

- STP
- CMAQ
- State modernization

**Note:** Final project selection must recognize that some fund types cannot be used to build new travel lanes.

From: Council Presiding Officer David Bragdon
   Deputy Presiding Officer Susan McLain
   Councilor Rex Burkholder
   Councilor Bill Atherton

Re: Resolution No. 01-3025, MTIP Allocation Process and Review Criteria

Date: January 11, 2001

Resolution No. 01-3025, relating to the allocation process and review criteria for the next MTIP funding cycle, has been filed with the Council Office and is scheduled to be heard by the Community Planning Committee at its January 16 meeting. The resolution also is scheduled for JPACT consideration at its January 18 meeting. The purpose of this memorandum is to inform you that we will be submitting the attached set of three amendments for consideration by the council committee.

We believe that these proposed changes would address and clarify several issues that have been debated at TPAC. First, they will expand citizen participation in the allocation process. Second, they will address the need for greater clarity in the guidelines for adding or substituting projects for consideration during the process. And third, they will outline for you and others involved in the process, the specific elements of 2040 implementation that the Council will focus on when it considers projects for funding.

We hope that this information will assist you in your deliberations on this resolution.
Amendment Intent:

The purpose of this amendment is to express the Council's intent that all jurisdictions that submit projects for consideration shall have at least one public hearing on the proposed submittal list prior to final adoption. The process goals would be amended to reflect this intent and the solicitation period would be extended by one month to ensure that adequate time is available to schedule and conduct such a hearing.

Amend Exhibit A, Related to Process Goals

Add the following language to the second goal related to broad-based citizen participation:

"Such participation shall include a public hearing by each local jurisdiction prior to the submittal of its list of proposed projects or programs."

Amend Attachment 1—“Tentative Schedule”

2. Change the Project Solicitation Period from January 19-March 2 to January 26 to April 2
3. Change the date for Rank Projects from March 2001 to April 2001
5. Change the date for Public Outreach/Program Revision from April/May 2001 to May/June 2001
6. Change the date for TPAC Recommendation on Final Program from June 1 to July 4
7. Change the date for Proposed Public Hearings and JPACT/Metro Council Adoption on Funding Allocation from June 2001 to July 2001
PROPOSED AMENDMENT #2
RESOLUTION NO. 01-3025

Amendment Intent:

At the January 9 Council informal, concern was expressed that the language in the resolution related to the addition or substitution of projects is ambiguous and does not provide specific parameters concerning the number or size of the projects. The intent of this amendment is to provide clarification concerning the ability of jurisdictions to substitute or add projects to the "base package" list. The amendment would provide a clear limit on the number of projects and the maximum cost of such added or substituted projects.

If each of the eligible project sponsors were to submit new projects totaling the maximum amount permitted under the amendment, the total cost of the projects under consideration would be approximately two times the amount of available funding. This would be far more manageable than the last allocation process which resulted in the submission of projects totaling more than four times the amount of available funding.

Amendment to the Committee Staff Report:

At the end of the discussion on pg. 4 related to "Project Additions" add the following language:

"It is the Council's intent that each of the eligible project sponsors shall have to opportunity to submit up to five new projects with a total estimated cost not to exceed $2 million. Each eligible sponsor also shall have to opportunity to substitute a new project or projects for any of their projects currently included on the base package list. The total estimated cost of any new substituted project or projects may not exceed the cost of the project to be removed from the base package list by more than 10 percent."
PROPOSED AMENDMENT #3
RESOLUTION NO. 01-3025

Amendment Intent:

The intent of this amendment is to provide clarification concerning those elements of 2040 implementation that the Council will focus on when selecting the projects and programs that will be funded during the current allocation process. This intent would be expressed through an amendment to the process goals outlined in Exhibit A to the proposed resolution.

Amend Exhibit A, Related to Process Goals

Following the first bulleted goal, add the following new goal:

# 1 “Council consideration of the funding of proposed projects and programs will focus on the extent to which such projects or programs facilitate the implementation of the following specific elements of the 2040 Concept Plan:

1) development and redevelopment in support of the central city, regional and town centers, main streets and station areas,
2) development of transportation infrastructure that supports industrial centers and their inter-modal connectors,
3) efficient management of demand and enhancement of the operation of the existing transportation system,
4) development and promotion of alternatives to single occupancy vehicles
5) development of a multi-modal transportation system
6) projects for which there is no other readily available source of funding

Step 5 in the ranking process related to allocation criteria shall specifically address the elements of 2040 implementation outlined in this goal. If a project or program is recommended for funding, findings shall be prepared that address how the project or program is consistent with the 2040 implementation elements outlined in this goal.”
To: JPACT Members

Re: Community Planning Committee Amendment Related to Resolution No. 01-3025

Date: January 17, 2001

At its January 15 meeting, the Community Planning Committee adopted the attached amendments related to the proposed MTIP review criteria and process as outlined in proposed Resolution No. 01-3025. Amendments No. 2 and 3 are identical to those provided to you in the original JPACT agenda packet (lavender pages).

Amendment No. 1, as originally proposed, would have required a public hearing on the proposed submittal list. The committee amended this language. The intent of the new language is to give local jurisdictions the flexibility to apply their own procedures to the consideration of the submittal list, provided that such consideration occurs at a public meeting of the governing body.
COMMUNITY PLANNING COMMITTEE AMENDMENT #1
RESOLUTION NO. 01-3025

Amendment Intent:

The purpose of this amendment is to express the Council's intent that all jurisdictions
that submit projects for consideration shall have at least one public hearing on the
proposed submittal list prior to final adoption. The process goals would be amended to
reflect this intent and the solicitation period would be extended by one month to insure
that adequate time is available to schedule and conduct such a hearing.

Amend Exhibit A, Related to Process Goals

The original proposed amendment would have added the following language to the
second goal related to broad-based citizen participation:

"Such participation shall include a public hearing by each local jurisdiction prior to
the submittal of its list of proposed projects or programs."

Committee action replaced this language with the following:

"The list of proposed projects shall be submitted based on a review by the
governing body of the jurisdiction at a meeting that is open to the public. Submitting the
list of projects by adopted resolution will meet this intent."

Amend Attachment 1—"Tentative Schedule"

1. Change the date for Metro Council Action on Criteria and Process from
January 18 to January 25.
2. Change the Project Solicitation Period from January 19-March 2 to January
26 to April 2
3. Change the date for Rank Projects from March 2001 to April 2001
4. Change the date for Release Technical Rankings and Draft Program from
April 2001 to May 2001
5. Change the date for Public Outreach/Program Revision from April/May 2001
to May/June 2001
6. Change the date for TPAC Recommendation on Final Program from June 1
to July 4
7. Change the date for Proposed Public Hearings and JPACT/Metro Council
Adoption on Funding Allocation from June 2001 to July 2001
COMMUNITY PLANNING COMMITTEE AMENDMENT #2
RESOLUTION NO. 01-3025

Amendment Intent:

At the January 9 Council informal, concern was expressed that the language in the resolution related to the addition or substitution of projects is ambiguous and does not provide specific parameters concerning the number or size of the projects. The intent of this amendment is to provide clarification concerning the ability of jurisdictions to substitute or add projects to the "base package" list. The amendment would provide a clear limit on the number of projects and the maximum cost of such added or substituted projects.

If each of the eligible project sponsors were to submit new projects totaling the maximum amount permitted under the amendment, the total cost of the projects under consideration would be approximately two times the amount of available funding. This would be far more manageable than the last allocation process which resulted in the submission of projects totaling more than four times the amount of available funding.

Amendment to the Committee Staff Report:

At the end of the discussion on pg. 4 related to "Project Additions" add the following language:

"It is the Council's intent that each of the eligible project sponsors shall have the opportunity to submit up to five new projects with a total estimated cost not to exceed $2 million. Each eligible sponsor also shall have the opportunity to substitute a new project or projects for any of their projects currently included on the base package list. The total estimated cost of any new substituted project or projects may not exceed the cost of the project to be removed from the base package list by more than 10 percent."
COMMUNITY PLANNING COMMITTEE AMENDMENT #3
RESOLUTION NO. 01-3025

Amendment Intent:

The intent of this amendment is to provide clarification concerning those elements of 2040 implementation that the Council will focus on when selecting the projects and programs that will be funded during the current allocation process. This intent would be expressed through an amendment to the process goals outlined in Exhibit A to the proposed resolution.

Amend Exhibit A, Related to Process Goals

At the January 9 Council informal, concern was expressed that the language in the resolution related to the addition or substitution of projects is ambiguous and does not provide specific parameters concerning the number or size of the projects. The intent of this amendment is to provide clarification concerning the ability of jurisdictions to substitute or add projects to the "base package" list. The amendment would provide a clear limit on the number of projects and the maximum cost of such added or substituted projects.

If each of the eligible project sponsors were to submit new projects totaling the maximum amount permitted under the amendment, the total cost of the projects under consideration would be approximately two times the amount of available funding. This would be far more manageable than the last allocation process which resulted in the submission of projects totaling more than four times the amount of available funding.

Amendment to the Committee Staff Report:

At the end of the discussion on pg. 4 related to "Project Additions" add the following language:

"It is the Council's intent that each of the eligible project sponsors shall have the opportunity to submit up to five new projects with a total estimated cost not to exceed $2 million. Each eligible sponsor also shall have the opportunity to substitute a new project or projects for any of their projects currently included on the base package list. The total estimated cost of any new substituted project or projects may not exceed the cost of the project to be removed from the base package list by more than 10 percent."
Amendment Intent:

The intent of this amendment is to provide clarification concerning those elements of 2040 implementation that the Council will focus on when selecting the projects and programs that will be funded during the current allocation process. This intent would be expressed through an amendment to the process goals outlined in Exhibit A to the proposed resolution.

Amend Exhibit A, Related to Process Goals

Following the first bulleted goal, add the following new goal:

# 1 "Council consideration of the funding of proposed projects and programs will focus on the extent to which such projects or programs facilitate the implementation of the following specific elements of the 2040 Concept Plan:

1) development and redevelopment in support of the central city, regional and town centers, main streets and station areas,
2) development of transportation infrastructure that supports industrial centers and their inter-modal connectors,
3) efficient management of demand and enhancement of the operation of the existing transportation system,
4) development and promotion of alternatives to single occupancy vehicles
5) development of a multi-modal transportation system
6) projects for which there is no other readily available source of funding

Step 5 in the ranking process related to allocation criteria shall specifically address the elements of 2040 implementation outlined in this goal. If a project or program is recommended for funding, findings shall be prepared that address how the project or program is consistent with the 2040 implementation elements outlined in this goal."
Please deliver the following material as soon as possible

STAFF REPORT

December 29, 2000 Presented by: Richard Brandman

PROPOSED ACTION

This resolution would approve a set of procedures and the basic technical and administrative criteria that will be used during the Priorities 2002 MTIP Update to nominate, evaluate and select projects to receive federal transportation funds in the FY 04-05 biennium.

EXISTING LEGISLATION

Federal planning regulations designate JPACT and the Metro Council as the Portland area metropolitan planning organization that is responsible for allocating federal highway and transit funds to projects in the metropolitan area. Preparation of an MTIP is the means prescribed for doing this. JPACT and the Metro Council have traditionally approved the procedures and criteria to be used in each two year MTIP update prior to initiating the actual project solicitation and selection process. Projects approved for inclusion in the MTIP must come from a conforming, financially constrained transportation plan. The 1995 RTP, as amended, is the currently conforming plan. Approval of the 2000 RTP Conformity Determination is pending from the USDOT.

BACKGROUND AND ANALYSIS

Metro is preparing a request to local jurisdictions to submit projects to Metro for evaluation and award of regional flexible transportation funding. Metro and ODOT update the MTIP/STIP every two years to schedule funding for the following four-year period. The Priorities 2002 Update encompasses the four-year period of federal fiscal year’s 2002 through 2005 (FY 02 - FY 05). This update will therefore adjust, as necessary, funds already allocated to projects in FY 02 and FY 03 in the current approved MTIP. It will also allocate funds to new projects in the last two years of the new MTIP (i.e., FY 04 and FY 05). The proposed Priorities 2002 MTIP update schedule is shown in Attachment 1.

The money available for allocation in the 2002 MTIP update is composed of two types of federal transportation assistance, which come with differing restrictions. The most flexible funds are surface transportation program (STP) funds that may be used for virtually any transportation purpose, identified in the Financially Constrained RTP, short of building local residential streets. The region can allocate about $20 million of STP funds to new projects in FY 04 – 05.
The second category of money is Congestion Mitigation/Air Quality (CMAQ) funds. CMAQ funds cannot be used to build new lanes for automobile travel. Also, projects that use CMAQ funds must demonstrate that some improvement of air quality will result from building or operating the project. The region can allocate about $18 million of CMAQ funds to new projects.

The Oregon Transportation Commission (OTC) has decided not to allocate Transportation Enhancement (TE) funds in this Update. TE funds support more recreationally oriented transportation projects, including bike and pedestrian paths, and other non-automotive improvements. The OTC suspended allocation of this class of federal funds in order to focus resources on significant maintenance and rehabilitation needs of the state’s existing roads and bridges. Again though, STP funds can also be used to fund most of these types of projects.

**State Highway System**

ODOT receives state and federal funds dedicated to maintenance and improvement of state highways and bridges. ODOT has primary responsibility for programming these funds. The OTC divides the funds to each of the five ODOT regions. Region 1, which includes all the urban portions of Multnomah, Clackamas and Washington Counties, expects to receive a combined amount of about $349 million of these funds between FY 02 and 05. About $160 million will be available for allocation to new projects in FY 04 and 05. However, ODOT’s maintenance monitoring systems, for bridge, safety, pavement and operations, have already prioritized the candidate projects slated to receive these funds.

Of the $160 million total, about $136 million is targeted for preservation and rehabilitation of highway and bridge facilities in the region. About $25 million is targeted for construction of added freeway capacity on US 26 in Washington County (addition of a third westbound lane from Hwy. 217 to Murray). The relationship of these funds to the regional flexible funds is shown in Attachment 2.

**Invitation for Public Comment**

Comparing this MTIP Update to previous efforts, there is not a lot of money available for new projects. Consequently JPACT and the Metro Council Transportation Planning Committee have proposed a less robust project solicitation process that relies to some degree on work completed in the last update, in the summer of 1999. Metro opened a 30-day comment period on this proposal on December 18, 2000 through January 16, 2001. Comment, primarily on three topics, was invited:

1. Goals that should guide the process;
2. Developing the pool of projects for evaluation; and
3. Criteria for selecting projects.
1. Process Goals

The following goals have been tentatively approved to provide a clear direction for the project nomination, ranking and selection process:

- Implementation of the Region 2040 land use goals and objectives and the Regional Transportation Plan is the primary goal for the Priorities 2002 MTIP.

- Establish a clear, simple, and understandable process that minimizes procedural hurdles while maintaining broad-based citizen participation.

- Fund the most critical projects that provide a clear public benefit, consistent with federal policies for addressing environmental justice issues.

- Emphasize projects and programs that most efficiently manage demand and enhance the operation of the existing transportation infrastructure. Look for low-cost projects that have large benefits.

- Consider funding logical project phases or projects that complete a logical gap in the system.

- Emphasize project construction (rather than project design efforts) either through direct funding or leveraging other potential revenue sources.

- Support projects that can be delivered in the timeframe of the FY 2002-2005 STIP.

These goals were supported by TPAC at their January 5th meeting. TPAC recommended making implementation of the Region 2040 Concept and the RTP as the first objective (as shown above).

2. Pool of Candidate Projects

- "Base Package" of Projects. JPACT and the Metro Council Transportation Planning Committee believe that since only limited funds are available, a streamlined process should be used to reduce staff time spent by Metro and responding jurisdictions on a detailed project solicitation request from Metro and the subsequent technical ranking process. In the last MTIP update, which concluded last year, about $55 million worth of projects and programs from around the region were highly ranked in a so-called "150 percent list," yet were not funded programmed due to a lack of funds. Metro staff recommended that these projects be considered a "Base Package" of project candidates in the 2002 MTIP update. (A list of these projects, including a brief narrative description of each project, is shown in Exhibit B of the Resolution.) TPAC's previous endorsement of this strategy remained unchanged at the January 5th meeting.

- Project Additions. This issue was further addressed by TPAC at the December 1st meeting and remained unchanged at the January 5th meeting. JPACT and the Metro Council Transportation Planning Committee concurred with the recommendation of Metro staff and TPAC that:
  i. "addition" of new projects to the Base Package of highly ranked projects be cautiously allowed;
ii. any new projects should come from the Financially Constrained System of the 2000 RTP, or have been the result of a recently completed planning activity (e.g., the Gateway Regional Center Plan); and

iii. any new projects must meet or exceed Metro’s requirements for public involvement. One or two add projects may be submitted on behalf of eligible sponsors by:

- Metro
- Tri-Met
- DEQ
- ODOT
- Washington Co. and its cities
- Clackamas Co. and its cities
- Multnomah Co. and its cities
- City of Portland
- Port of Portland
- Park & Recreation Districts

On January 5th, TPAC endorsed the following guidelines for project additions:

i. Limit the overall dollar amount and number of candidate projects in order to keep the program manageable.

ii. Maintain flexibility to add or drop projects based on local and regional priorities or to address changing conditions and current needs.

- TPAC also discussed two new policy recommendations to further clarify submission of new projects. They are:

  i. Projects must be submitted with an accompanying letter documenting the approval action of an eligible jurisdiction’s elected council or from an agency’s council or board.

  ii. A “cautious” submittal of additional projects is defined as a net of two new projects plus a few lower-cost projects may be substituted for projects removed from the “Base Package” list (i.e., the former “150 percent” list of highly ranked projects).

The first recommendation, to require a letter of documentation, is to ensure adequate and open discussion of the project submittals by elected or appointed officials and the public. The second recommendation defines “cautious” and allows for low-cost/big-bang projects to be added without penalty. While not defined by TPAC, Metro staff suggests that a “few low-cost projects” implies perhaps not more than three projects that total no more than $500,000.

- **Freeway Projects.** At their November meeting, JPACT indicated a preference for not funding projects on limited access highways (i.e., freeways). Regional flexible funds have not previously been used to design or construct new freeway lanes or major interchange improvements. Those projects have generally been the responsibility of ODOT. Minor interchange modifications, mostly to improve operation of major streets feeding onto freeways, have been previously funded. At the December 1st meeting, and again at the January 5th meeting, TPAC requested clarification as to whether this constituted a restriction on freeway-related preliminary engineering (PE), freeway interchange projects, or freeway projects submitted by local governments as one of their few allowed “add” projects. TPAC recommended:
“ Permit submission of freeway-related PE, interchange and lane construction projects by local governments as one of their few allowed add projects in the allocation process. ”

This TPAC recommendation varies from JPACT discussion to not allow freeway mainline capacity projects to be eligible. This will be a key discussion point for JPACT at their January 18th meeting.

- **Big Projects vs. Small Projects.** TPAC made no further recommendation on this issue at the either the December 1, or January 5 meetings. Past allocations have generally funded projects that are less than $6 million, even when resources have been greater. The alternative is to give more money to a few larger projects, or do a combination program of various project sizes. JPACT and the Metro Council Transportation Planning Committee have suggested remaining flexible on this issue, meaning to allow locals to decide their priorities.

- **Regional Programs.** Over the years, Metro has funded a number of regional programs (e.g., the Regional TDM program, Intelligent Transportation System (ITS) deployment, etc.). Tracking data indicate that many of these programs return high value for low cost. JPACT and the Metro Council Transportation Planning Committee have recommended that ongoing regional programs should be evaluated for effectiveness as a prelude to considering funding levels for the programs in the current update. At the January 5th meeting, TPAC endorsed this concept but desired to stress its recommendation that the actual determination of whether to continue funding of existing programs, and at what levels, should be done at the same time that consideration is given to overall allocations to new phases of existing projects and/or wholly new project initiatives. Continuation of existing programs would require about $9 million. The programs are shown in Attachment 3.

3. **Allocation Process and Selection Criteria**

As discussed above, Metro must settle on a method for selecting a pool of candidate projects to evaluate in the Priorities 2002 MTIP Update process. Metro must then settle on a *project ranking process* to pick the projects that will be awarded money. In the past, Metro has used a five-step process, which is summarized in Exhibit C of the Resolution, to conduct project nominations, ranking and selection. The same basic process is recommended for the current update. During discussion of the criteria at JPACT and the Metro Council Transportation Planning Committee, two recommendations were presented for consideration.

A. Should the Technical Criteria be amended to award up to 60 points, out of 100, toward a project’s support of Metro’s Region 2040 land use objectives? The current approved criteria award 40 points. Regional flexible funds are some of the only dollars available that can be targeted to enhance the kind of multi-modal travel options that are required to successfully achieve Metro’s desired compact development patterns.
B. Should Metro narrow Salmon Recovery as a non-technical consideration in the project selection process? Since the last update, ODOT and the City of Portland have completed inventories of road culverts that significantly impede salmon spawning in area streams. Metro is preparing a regional priority list. The Metro Council Transportation Planning Committee has recommended that a project’s “salmon benefit” (i.e., transportation projects that coincidentally rebuild problem culverts) should specifically refer to these priority culvert lists and that the lists should be circulated to area agencies as part of the project solicitation package. The resolution includes this refinement.

- At both the December 1st and January 5th meetings, TPAC endorsed the salmon benefit refinement. Some TPAC representatives were concerned that other salmon-related project benefits (e.g., longer bridges to avoid stream impacts) might merit consideration and that “priority culvert-repair” is too narrow a criterion.

- TPAC recommended that the 2040 points remain unchanged during this update; that significant weight is already placed on this criterion in the current ranking system and that assessment of the success of the current criteria at selecting “2040-friendly” projects should be made after the current update. There was discussion at TPAC that changing the point system at this time would add uncertainty to the process. Also, it was suggested that the 2040 emphasis should be addressed not in the technical ranking, but rather in the modal allocation and program development phase of the process. Given the complexity of the discussion, TPAC suggested the entire process, criteria and allocation procedures be reviewed following the completion of the Priorities 2002 MTIP. The review would focus on fine tuning the process to ensure future allocations maximize implementation of the Region 2040 concept and the RTP. A Resolve was added to the resolution to reflect this recommendation to update the process.

If JPACT and the Metro Council decide to increase the 2040 emphasis to 60 points, Metro staff recommends that ten points each should be added to the two existing 2040 criteria. For all modes but Transit, TDM and TOD, the following point changes should be implemented:

i. Effectiveness – reduce to 20 points from 25 points;

ii. Cost Effectiveness – reduce to 10 points from 15 points; and

iii. Safety – reduce to 10 points from 20 points.

For Transit and TDM, ten points each should be taken from Effectiveness (reduce to 25 points from 35 points) and Cost Effectiveness (reduce to 15 points from 25 points).

For TODs, no change is recommended: the existing point system already heavily emphasizes increase of mixed-used density which is at the heart of the 2040 land use objectives. Additionally, Metro staff considers Effectiveness and Cost Effectiveness to be crucial considerations with respect to the viability of this program and these factors should retain a relatively higher emphasis.
• TPAC members raised a concern that the criteria might better assess the effects of nominated projects on movement of freight and goods, either as they improve such movement, or hinder it. Resolve 7 of the resolution is meant to reflect this discussion, and a "Whereas" added to the resolution that recognizes the importance of freight and employee movement to the regional economy.

BUDGET IMPACT

None.

</tr>
</tbody>
</table>

* Costs shown assume two years funding (i.e., FY 04-05) at annual levels approved in the prior Update.

** The State (Air Quality) Implementation Plan commits the region to provide average annual transit service increases of 1.5 percent. A $1.0 million allocation roughly equals a one percent service increase. The region has met this commitment through 2006. However, the region's policies state that increases above 1.5 percent annually are desirable.

*** The region's ITS program is being incrementally deployed and addresses freeway, transit and arterial operations. Regional funds have been allocated to plan and begin deployment of the arterial component of the program. Though composed of discrete projects, ITS is addressed here as a program because the full benefits of any one corridor enhancement are not achieved until management of the system of intersecting corridors as a whole can be optimized.

The East Multnomah County Transportation Committee (EMCTC) at their January 8, 2001 meeting discussed the most recent proposals for the MTIP Process and Criteria for FY04-05. We were pleased to hear that TPAC did not endorse changing the point allocation between “2040 Support” and “Other categories.” This aligns well with our previous and current position that no changes be made to the criteria for this round of funding allocation. It is not a wise use of our jurisdictions’ staff time or of Metro’s staff time and resources to enter a lengthy process when the region already has adequate information to assist in the decision making process.

The consideration of additional staff time applies to the notion of submitting new projects, either as a substitution or as a “cautious” submittal of new projects. By allowing a project to be submitted that has not previously been rated and ranked will consume valuable staff time. We continue to oppose allowing substitutions or new projects in this process.

Lastly, we disagree with the TPAC endorsement to allow funding for freeway-related preliminary engineering, interchange construction, or expansion projects on limited access highways in this round of the MTIP.

Thank you for the opportunity to comment on this important matter. We look forward to an efficient process to allocate the available funds for 2004-05.

Sincerely,

Dave Ripma
Vice-Chair
East Multnomah County Transportation Committee

Summary of public comments on Priorities 2002 MTIP 1/17/01

The public comment period for Priorities 2002 MTIP process and criteria began Dec. 18, 2000 and ended Jan. 16, 2001. The following is a summary:

A. Three letters were received from the following jurisdictions:

1. Portland Parks and Recreation:
   • supports the base package of projects.
   • requests flexibility to reallocate and consolidate project costs within the current project base package.
   • wants the East Bank Trail – Phase 2 to be their top priority in the base package of projects.
   • is interested in completing gaps and construction projects in this MTIP process.
   • supports any economies that could allow more funds for project construction.
   • has a concern about the cap on total costs of projects nominated by each jurisdiction.
   • believes existing points for land use are adequate.
   • does not support a tight linkage to a culvert list because they see other ways to benefit salmon.

2. The City of Wilsonville supports the proposed increase of 2040 Plan land use points in the selection criteria: from 40 to 60 points out of a possible 100.

3. East Multnomah County Transportation Committee:
   • wants no change to the point allocation for 2040 land use support.
   • opposes the addition of any substitute or new projects to the proposed “base package” project list.
   • disagrees with TPAC’s recommendation to allow funding for freeway-related preliminary engineering, interchange construction or expansion projects on limited access highways in this round of the MTIP.

B. One e-mail was received from a citizen, as follows:
Walt Mintkeski of Southeast Portland supports the proposal to add bridges to the Springwater Corridor at McLoughlin, Union Pacific mainline and Johnson Creek in order to better connect the Springwater Trail to the East Bank Trail and to OMSI.

C. Testimony was presented by 10 citizens at the Metro Council Community Planning Committee on January 16, 2001.

The following citizens presented testimony (as summarized below):

1. Barbara Wilson, Beaverton, OR
2. Greg Macpherson, SE Portland
3. Chris Smith, Citizens for Sensible Transportation
4. Frank Orem, Sierra Club and TPAC
5. Ross Williams, Citizens for Sensible Transportation
6. Larry Mills, Kenton Action Plan
7. Lenny Anderson, Swan Island TMA
8. Dave Stewart, Citizens for Sensible Transportation
9. Barbara Walker, SW Portland
10. Jim Howell, AORTA

• Several citizens supported a requirement that all agencies provide opportunity for public review of project lists prior to submission to Metro for ranking in the Priorities 2002 MTIP update.
• From those testifying, no one spoke in favor of widening Hwy. 26 and instead wanted more funding for alternative transportation.
• Several citizens were in favor of transportation projects that reinforce 2040 land use planning.
• Cost effectiveness of alternative transportation was emphasized.
• One citizen requested a cooperative approach to improving transportation access to the Kenton town center.
• One citizen wanted more road capacity for freight and more transit options for employees.
• One citizen requested funding for the Tigard Transportation Plan.
• One citizen requested a multi-destinational transit system using existing infrastructure, such as commuter rail on railroad lines and public transit on freeways.
January 10, 2001

TO: JPACT

FROM: Donald R. Wagner, P.E., Regional Administrator

SUBJECT: Overview of Washington Blue Ribbon Commission on Transportation Recommendations

The Washington Blue Ribbon Commission on Transportation was established in May of 1998 by the Washington State Legislature and is composed of 46 members from business, industry, the environmental community and government. Its charter was to conduct a comprehensive analysis of statewide transportation needs and priorities; existing and potential transportation funding mechanisms, and the policies and practices of governmental entities, private businesses, and labor that affect the delivery of transportation programs and projects.

On November 29, 2000 the Blue Ribbon Commission completed over two years of work and handed their recommendations to the Governor and Legislature. Governor Locke, along with the State Legislative leaders accepted the Commission recommendations and agreed to begin addressing the fundamental changes to transportation planning, finance, construction and service recommended by the Commission in the new legislative session that began in January 2001.

The recommendations of the Commission center around the six critical elements listed below:

- Establishing benchmarks and performance standards then measuring progress;
- Increasing accountability and implementing aggressive efficiencies;
- Investing in the basics to keep the statewide transportation system functioning well;
- Empowering regions to fix their own problems by managing and funding improvements;
- Ensuring funding will address needs; and
- Adopting an early action legislative package.

Early Action Package. A legislative “early action package” was proposed that increases revenues by $11.54 billion, with 11 new state and local taxes over the next six years.

Benchmarks. The cornerstone of both solving transportation problems and restoring public confidence is the establishment of benchmarks and performance standards. The intent of the benchmarks is to tie future funding for transportation agencies to their performance measured against the benchmarks. The recommended benchmarks include the following: ensuring that zero percent of highways and local
arterials are in poor condition; measuring driver delay against the national average; controlling administrative costs; measuring transit agencies’ operating costs; and meeting air quality requirements.

**Accountability.** The Blue Ribbon Commission recommended that the Secretary of Transportation should be appointed by the Governor instead of the Transportation Commission as currently structured. The Transportation Commission role would change to become a “Transportation Accountability Commission” that would act as a single independent point of accountability for monitoring and reporting the statewide transportation system performance at all levels.

**Regional Empowerment.** The Commission recommended that regions be allowed to plan, select, fund, and implement projects identified to meet the region’s transportation and land use goals. Their recommendations advanced a number principles and ideas of how to begin the process of strengthening the regional transportation component. These include the following:

- Governance for transportation seems to work best when authority for planning, funding and implementing projects rests with a given body.
- A regional model of governance is a principle that allows decision-making and funding to occur closer to home, where the problems are understood best and the solutions can be implemented.
- The regional principle seems to be most applicable to the larger metropolitan areas, where the transportation issues are complex, traffic congestion is the worst and the drive for immediate action is high.
- Within the regional context it is important to recognize the importance of maintaining the integrity of the system and that strong regions within a strong state system of transportation governance will produce the best results.
- Different solutions will be necessary for different regions of the state.
- The principle of “no new net bureaucracy” stands in regard to the regional organizations and supports the goal of minimizing structural redundancy.
- Only the Legislature can solve the funding problem, either by direct appropriation, and/or by granting regions different funding capacities.

A more detailed summary of the Commission’s recommendations and benchmarks is attached. Additional information, including a powerpoint presentation is also available on the Commission’s website http://www.brct.wa.gov/.

Summary of Recommendations  
Summary of Recommended Benchmarks
Summary of Recommendations

1. **Adopt transportation benchmarks as a cornerstone of government accountability at the state, city, county, and transit district levels.** Measure results and monitor performance of government in meeting transportation benchmarks. Tie transportation funding to progress in achieving benchmarks. *(See Summary of Recommended Benchmarks for more detail)*

2. **Establish a single point of accountability at the state level, strengthening the role of the state in ensuring accountability of the statewide transportation system.** Grant the Governor oversight of the Washington State Department of Transportation (WSDOT), including the appointment of its secretary. Grant the Washington Transportation Commission new authority as the Transportation Accountability Commission (TAC), a single, independent point of accountability for monitoring and reporting the performance of the statewide transportation system at all levels.

3. **Direct a thorough and independent performance review of WSDOT administration practices and staffing levels.** Look for additional efficiencies in the administrative functions within the department.

4. **Remove the barriers to achieving the transportation benchmarks for efficiency and system performance by providing funding for a strong state and strong regional transportation system.** Provide local governments and transportation agencies funding and authority to implement efficiencies and raise regional revenues to meet the new benchmarks. Authorize and encourage jurisdictions to share resources.

5. **Invest in maintenance, preservation and improvement of the entire transportation system so the transportation benchmarks can be achieved.** Preserve the transportation system by making maintenance, preservation and safety the top funding priorities, including operation and maintenance costs of rail, transit and ferries. Optimize the system by using new technologies and management tools, such as congestion pricing and land use planning, to reduce demand on the highway system. Conduct benefit-cost analysis to choose the most effective mix of investments in the most heavily traveled corridors. Invest in the human resources necessary to maintain, preserve and improve the system.

6. **Provide regions with the ability to plan, select, fund and implement (or contract for implementation of) projects identified to meet the region's transportation and land use goals.** Allow regions to create new entities or select existing entities to plan, manage, fund and be accountable for regional transportation projects with the intention to simplify and minimize redundancy rather than add new layers of government.

7. **Achieve construction and project delivery efficiencies.** Reduce the engineering/construction cost ratio. Save money on construction materials and methods. Use right-of-way banking. Continue to assess prevailing wage survey techniques. Make mitigation more cost-effective. Have predictable revenue sources to fully fund projects.

8. **Incorporate the design-build process and its variations into construction projects to achieve the goals of time-savings and avoidance of costly change orders.** Grant agencies the authority to use design-build and provide opportunities for public employees to participate in the process. Provide increased education and training in alternative project delivery (ADP) concepts.

9. **Use the private sector to deliver projects and transportation services.** Continue pilot projects that allow the private sector to provide expertise and financing in developing cost-effective transportation facilities. Consider removing barriers that prevent the private sector from providing services, such as ferry, bus or monorail.
10. **Reengineer the workplace to achieve greater efficiency, and consider the use of managed competition for operations and maintenance functions.** Focus the workplace on service, customer satisfaction and results. Incorporate elements of total quality management into business practices. Form partnerships with employer-employee organizations to develop apprenticeships and training programs.

11. **Streamline permitting for transportation projects.** Delegate “Section 404” wetlands permit authority to the state. Develop new standards to streamline permit approvals and reduce process review delays. Select a significant highway project as a pilot study to plan and permit within two years. Evaluate the use of planning and permitting standards that encourage lower impact alternatives, such as Smart Growth, and accelerate the permit process for these projects. Work toward one-stop permitting, using a single application.

12. **Link transportation funding to efficiencies.** Require WSDOT, counties, cities and transit to show progress toward achieving benchmark efficiencies as a condition of receiving new funding.

13. **Link maintenance and preservation funds to best practices.** Require all agencies and jurisdictions to demonstrate the use of maintenance and pavement management systems and lowest life-cycle costs.

14. **Simplify funding distributions for best results.** Distribute funds on a geographic basis to counties and cities taking into account lane miles, classification and pavement type, population, and utilization. Develop a new method for joint regional programming of federal funds. Create one-stop grant funding centers where all competitive funds are disbursed under regional priority programming agreements and administered using a single application process.

15. **Allow regions to retain funds they raise.** Allocate sufficient funds to all regions for basic operations, maintenance, preservation and safety at a minimum agreed upon level. Guarantee each region a minimum return of 85% of state transportation taxes generated in that region, and allocate remaining funds to a statewide equalization fund. Allow regionally authorized taxes to remain in the region in which they are generated.

16. **Seek a 90% fare box recovery for ferry system operational costs within 20 years.** Transfer 90% of the cost of operating the ferry system to those who use it.

17. **Develop a package of new revenues to fund a comprehensive multi-modal set of investments, which, taken together with the recommended efficiency measures and reforms, will ensure a 20-year program of preserving, optimizing and expanding the state’s transportation system.** Adopt a series of revenue sources that can be used for roads, transit and transportation choices. Transfer transportation-related sales taxes to the transportation fund. Link other transportation-related revenues to transportation uses and users. Authorize a variety of statewide taxes and fees that could include: extending the existing gross weight fee to all vehicles; adding a surcharge to the existing gross weight fee for trucks dedicated to freight mobility improvements; increasing the motor fuel tax; adding a 6.5% sales tax to the wholesale price of motor fuel up to a set price cap of 80 cents per gallon; extending the $30 license tab fee to all vehicles including trailers; adding a $20 transportation mitigation fee on all passenger vehicles and non-commercial trucks; creating a new 2% surcharge on the wholesale sale of new and used vehicles, auto parts and accessories; and allowing congestion pricing. Examine the bonding of federal funds and expansion of tax increment financing for transportation projects. Examine all transportation revenue sources at least biennially and ensure they keep pace with inflation and growth.

Provide regional entities the authority to raise tax and fee revenues to fund regional transportation improvements. Authorize regional tax and fee options that might include: a vehicle miles traveled charge; a regional sales tax; allowing cities to impose the motor vehicle license fee if their county has not imposed the fee within two years; authorizing a new multi-modal transportation taxing authority for counties or regions that have not been previously granted high capacity transportation taxing authority; and allowing bonding programs at the state and regional levels.

18. **Begin action now to improve the transportation system.** *(See Early Action Strategy)*
Summary of Recommended Benchmarks

The only way to gauge progress on transportation challenges is to set specific targets and track government performance. The commission has outlined groundbreaking measures that would establish transportation goals and benchmarks and hold government officials accountable for achieving them.

No city street, county road or state highway will be in poor condition. In 1971, about 30% of the state’s highways were in poor condition, but through consistent funding, that figure declined to less than 10% by 1998. Data on the condition of city and county roads are currently being collected. (Benchmarks 1, 2 & 3)

No bridge will be structurally or seismically unsafe. The state has been actively pursuing a program to retrofit bridges and structures identified by risk level. Over 300 bridges have been retrofitted at a cost of approximately $40 million. However, almost 1,000 bridges remain to be repaired in the two highest risk levels. (Benchmarks 4 & 5)

Traffic congestion on urban interstate highways and delay per driver will be significantly reduced and no worse than the national mean. Traffic congestion in Washington is among the nation’s worst, especially in the central Puget Sound area. For example, the Seattle-Everett metropolitan area experienced 70 hours of average delay per driver in 1997 compared to the national average of 40 hours. (Benchmarks 6 & 7)

Vehicle miles traveled per capita will not increase over 2000 levels. In the last 20 years, Washington’s population has grown 40% while total vehicle miles traveled has grown 60%. However, the number of miles driven per capita has held relatively steady at 9,000 miles per person per year since 1990. (Benchmark 8)

The non-auto share of commuter trips by transit, bicycles, and other choices in urban centers will increase. The trend from 1980 to 1990 was a declining share of trips made by means other than autos. That trend will need to be reversed if growth is to be accommodated in urban areas. (Benchmark 9)

The administrative costs as a percent of transportation spending at the state, county and city levels should improve to the median in the short-term and to the most efficient quartile nationally in the longer term. Using federal government data, WSDOT ranks high in administrative costs along with states such as California, New York and Illinois. Administrative costs for the state, counties and cities grew considerably faster than inflation and outpaced spending on maintenance and construction. (Benchmark 10)

Washington’s public transit agencies will achieve the median cost per vehicle revenue hour of peer group transit agencies, adjusting for regional cost of living. Washington’s transit agencies have consistently ranked high in operating costs compared to agencies of similar size around the country. Since Initiative 695, transit revenues have been greatly reduced, resulting in cutbacks in administration, planning and customer service. Eventually, there may be cuts in operations. (Benchmark 11)
Benchmarks To Be Furthered Developed

The following benchmarks are recommended for further development by the proposed Transportation Accountability Commission that will monitor and track benchmark progress. The Accountability Commission should develop metrics and identify targets and responsibility for these benchmarks.

Traffic Safety Benchmark: Traffic accidents will continue to decline. Washington state has slightly less than 1.5 fatalities per 100 million vehicle miles, which is less than the national average of about 1.7.

Freight Mobility Benchmark: Freight movement and growth in trade-related freight should be accommodated in the transportation system. Growth in trade-related freight movements by truck (up over seventeen percent annually in the 1991-98 timeframe) and by railcars (up about nine percent annually in the 1991-98 timeframe) exceeded other economic growth rates. The Freight Mobility Strategic Investment Board (FMSIB) should be involved in developing additional benchmarks of freight movement and the supporting data to monitor progress.

Air Quality Benchmark: Maintain air quality (carbon monoxide and ozone) at federally required levels. Recently air quality has come close to exceeding allowable levels. Federal law requires that regions be sanctioned by loss of federal funds if not in compliance. The proposed accountability commission should consider measuring greenhouse gases, particulates, and visibility when data and appropriate standards are available.

Project Cost Benchmark: Improve operations, maintenance, and project delivery costs. Create benchmarks for the operations and maintenance and capital project delivery functions of transportation agencies, parallel to that suggested for their administrative costs. The new accountability commission that monitors and tracks benchmark progress is directed to develop metrics to compare Washington’s project development, design, permitting and construction costs with best practices nationally.

Transportation Revenue Benchmark: Ensure that transportation spending keeps pace with growth. Washington’s transportation system must not be allowed to fall behind the pace of its population and economic growth. The accountability commission should develop a benchmark that monitors transportation revenues and how they track transportation needs.

Person Delay Benchmark: Reduce overall hours of travel delay per person in congested corridors. The new accountability commission should develop and track a benchmark of person delay that can be used across all modes of travel.
January 17, 2001

(Prepare separate original letters to each of the following:)

The Honorable John A. Kitzhaber, MD
Governor of the State of Oregon

The Honorable Mark Simmons
Speaker of the House of Representatives

The Honorable Gene Derfler
President of the Oregon Senate

Dear

Approximately one year ago the Portland Tri-County area embarked on a study to evaluate the transportation services to the Elderly and Disabled populations of the area. The purpose of the study was to identify the transportation needs of the tri-county elderly and disabled populations, define options for providing transportation services to them and develop a plan for effectively and efficiently providing the needed transportation services. Tri-Met, the other transit districts in the region, the three Area Agencies on Aging and Disability (AAAs), Metro and the local jurisdictions have completed a thorough analysis of the existing services in the tri-county area, have examined the gaps in service and the unmet needs.

The study steering committee has adopted the following vision statement:

To create a synergistic network of tri-county elderly and disabled transportation services; tailored to customer needs; integrating and maximizing the necessary resources for a seamless, convenient, efficient, and accessible system.

Based on the vision statement and a series of guiding tenets the steering committee identified three strategies for providing service. Strategy A would provide the highest levels of service to areas where the highest concentrations of elderly and disabled people live, and significantly improve service in rural areas where there are lower densities of elderly and disabled people, has evolved as the strategy with the most support.

The Joint Policy Advisory Committee on Transportation (JPACT) supports the planning effort and the conceptual recommendations. The details of the plan will follow.

We applaud your/the Governor’s request for $19 million in 1999 and are encouraged to see elderly and disabled funding in his current budget. The planning effort has highlighted once again that the resources are not adequate to meet the needs of the community. We encourage the legislature to take the opportunity, should it occur, to expand funding for elderly and disabled transportation services and help us address some of the unmet needs identified in the plan.
Metro anticipates an amendment to the Regional Transportation Plan (RTP) as one of the steps toward implementation of the plan. The transit districts, along with the AAAs and local jurisdictions will also be evaluating their transit service, service plans and transportation plans to incorporate some provisions defined in the Elderly and Disabled Plan.

Thank you for your consideration of this important issue. The individual members of JPACT look forward to working with you through this legislative session on this and many other very important transportation issues.

Sincerely,

Rod Monroe, Metro Councilor, District Six
Chair, Joint Policy Advisory Committee on Transportation (JPACT)

cc: Members of the House of Representatives from Clackamas, Multnomah and Washington Counties
Members of the Senate from Clackamas, Multnomah and Washington Counties

Tri-County Elderly & Disabled Transportation Plan

JPACT Meeting

January 18, 2001
Scope Of The Plan

The plan will suggest improvements to the present elderly and disabled transportation system based on detailed analysis of the following:

- existing providers (fixed route, ADA, & community based transportation services)
- demographics
- institutional/organizational review
- targeted survey of elderly & disabled population
- peer review of other elderly & disabled systems
- financial analysis

# Guiding Committees

**Steering Committee:** Makes policy decisions and guides activities. Composed of government and organizational stakeholders.

**Executive Committee:** Reviews staff work and sends decisions to the Steering Committee. Composed of plan funders.

**Working Group:** Assists with technical work. Composed of government and organizational stakeholder staffs.
Plan Vision

To provide a synergistic network of tri-county elderly and disabled transportation services; tailored to customer needs, integrating and maximizing necessary resources for a seamless, convenient, efficient, and accessible system.
Guiding Tenets

Service Delivery: network of quality service
Customer Satisfaction: high level of satisfaction
Passenger Convenience: ease of access, reliable service, increased safety & options
Service Coordination: integrated, seamless network
Resources/Funding: human & fiscal resources
Land Use: elderly & disabled housing close to network
Data Analysis: Elderly & Disabled Service Needs

Of the 228,000 Elderly & Disabled in the Tri-County Area

- 58% Currently Using Transit Services
- 42% Aren't Using Transit Services
Data Analysis: Elderly & Disabled Service Needs

Of the 132,000 Elderly & Disabled Who Aren't Using Transit Services

- 11% Would Never Use Transit
- 12% Could Functionally Use Fixed Route
- 77% Would Have Some Difficulty Using Fixed Route
Data Analysis: Potential Fixed Route Riders

Of the 101,000 Elderly & Disabled who Could Use the Fixed Route System

- 65% Live Inside A Transit District/Within Walking Distance of the Fixed Route
- 24% Live Inside A Transit District/Not Within Walking Distance of the Fixed Route
- 11% Live Outside Of A Transit District
Data Analysis: Potential Special Needs Transit Riders

Of the 15,000 Elderly & Disabled Who Have Some Difficulty Using the Fixed Route System

- 27% Live Within the ADA Boundary, but not Using ADA Transportation
- 73% Live Outside the ADA Boundary, but not Using Community Based Transportation Services
Service Delivery Minimum Standards

- Everyone in the tri-county area should have access to medical, work and nutrition (including grocery shopping) at least 5 days a week.

- Everyone in the tri-county area should have access to other trips at least 2-3 days a week.

- No one should have their current level of service decreased because of the plan.

- The social service agencies and the individual providers need to work together to meet the transportation need for the elderly and disabled community.

- Incentives and guidelines should assist individuals to choose the mode most appropriate to their functional ability.

  Pioneer Adult Center, Oregon City

- Thursday, January 18\textsuperscript{th}, 10 a.m. - 1 p.m.
  Urban League Senior Center, Portland
In January 2001 it is important that JPACT articulate its federal transportation priorities to the congressional delegation. These priorities should be in the content of the FFY 2002 Appropriations Bill and anticipate a new six-year Authorization Bill starting in FFY 2004.

A first draft set of priorities is described below:

**High-Capacity Transit**: The Portland region is pursuing an aggressive agenda to implement a high-capacity transit system. This effort involves implementing three projects within the next 3-5 years at the same time: Interstate MAX, South Corridor Transit Improvement Program and Washington County Commuter Rail.

**A. INTERSTATE MAX**: The project is seeking an appropriation of a minimum of $70 million in Section 5309 “New Start” funds as required in the Full-Funding Grant Agreement.

The first year appropriation for Interstate MAX was $7.5 million for the FY 2001. Future appropriations are anticipated to complete the project at $70 million in FFY 2002 and 2003 and $70 million in FFY 2004 and $41 million in FFY 2005. If appropriations do not keep pace with this schedule, the consequence is a higher interest cost to the region. If appropriations are dramatically short of this schedule (i.e., half or less of the annual funding need), the interest cost implication to the region would likely jeopardize other projects.

**B. SOUTH CORRIDOR TRANSIT IMPROVEMENT PROGRAM**: The South Corridor is Segment #2, of the South/North Corridor. The region will incrementally implement improvements in the South Corridor as an overall project is redefined in order to be prepared to request authorization for an overall corridor improvement program in the reauthorization to TEA-21, as follows:

- For the FY 2002 federal transit appropriations bill, seek $4.35 million of Section 5309 “Bus” funding by working with the Oregon transit community to establish a list of statewide bus appropriations requests which produces this amount of funding for South Corridor improvements.
C. COMMUTER RAIL: The region requests that the Washington County Commuter Rail Project be authorized for construction in this FY 2002 Appropriation Bill.

The region is committed to pursuing the Washington County Commuter Rail. Federal environmental requirements have been met and Preliminary Engineering is underway and scheduled to be complete by Summer 2001. Project implementation is scheduled to begin in March 2002. The project’s finance plan calls for the first increment of federal appropriations in FY 2003.

D. I-5 TRADE CORRIDOR: In the Portland/Vancouver region, Oregon and Washington are continuing their collaborative effort to address the transportation needs of the I-5 corridor from I-84 in Oregon to I-205 in Washington.

Governors John Kitzhaber of Oregon and Gary Locke of Washington have appointed a 28-member Task Force that is charged with developing a bi-state strategic plan on how to manage and improve transportation and freight mobility in the I-5 corridor between Portland and Vancouver. The strategic plan will address freeway, transit, heavy rail, and arterial street needs in the corridor. The plan will also address how to manage demand for transportation in the corridor. This public planning effort is funded with a $2 million grant from FHWA’s National Corridor Planning and Development Program. The grant is matched with $500,000 each from the Washington and Oregon Departments of Transportation. The strategic plan is expected to be complete by the fall of 2002.

Based on the strategic planning effort, the region anticipates that federal funding will be sought through the reauthorization of TEA-21. Funding could be requested from the National Corridor Planning and Development program, other transportation programs or “High Priority Project” earmarks. Funding may also be sought through the Water Resources Development Act, as appropriate, for improvements to structures crossing the Columbia River.

E. COLUMBIA RIVER CHANNEL DEEPENING: In 1999, Congress authorized the deepening of the Columbia River Channel to 43 feet and the Corps of Engineers completed a Final EIS and Chief’s Report on the project. Congress appropriated $4.5 million for construction in the FFY 2001 Energy and Water Appropriations Act, but construction cannot begin until the National Marine Fisheries Service approves a new Biological Opinion. Whether the sponsoring ports will seek additional construction appropriations in FFY2002 depends upon the schedule for completing the Biological Opinion.

F. WILLAMETTE RIVER BRIDGE FUNDING: The County is seeking an additional $20 million in Bridge Discretionary funds to complete the painting of the historic Broadway Bridge.

Multnomah County is implementing a $200 million, 20-year rehabilitation program for the historic Willamette River Bridges. Approximately $20 million has been secured through Federal Highway Bridge funds and Highway “Demo” funds to complete six of the seven
phases of the Broadway Bridge rehabilitation. The Broadway Bridge is a critical link in for the freight system between the eastside industrial area and central Portland. Maintaining this bridge is vital to the transportation system in the Portland region. The last component of the rehabilitation is to paint the bridge above deck. This work will preserve the structure and avoid more costly repairs later.

G. REGIONAL HIGHWAY PROJECTS: The limited availability of state modernization funds may delay the construction of long needed highway projects in the Portland region for years, if not decades. Federal earmarks will be needed if priority projects are to move forward in a timely fashion consistent with the Region 2040 Growth Concept and economic development needs.

The following requests are part of a regional strategy to begin developing priority projects to better take advantage of earmarking opportunities in the next authorization bill.

- The region supports the following requests if there is an opportunity to earmark federal funds in the FY 2002 Transportation Appropriations Bill beyond the normal program categories for highway projects. The Port of Portland requests $2 million for the “Columbia-Killingsworth Eastend Connector.” Clackamas County requests $3 million for “Sunnyside Road” and $10 million for the “Sunrise Corridor – Phase 1.” Multnomah County requests $2 million for the “242nd Street Connector.”

- The region is not requesting federal funding in FY 2002 for the “I-5 Delta Park – Lombard” or “US 26” (Hwy 217-Camelot) projects, but both projects are likely priorities for earmarking in the next authorization bill.

H. AMTRAK SOUTH STATION: The region is seeking capital funding of $750,000 federal matching funds for a new Amtrak station.

Clackamas County, in cooperation with Oregon City, ODOT and Amtrak, has selected Oregon City as the location for a new Amtrak station in the south portion of the metropolitan region to compliment existing stations in downtown Portland and Vancouver, Washington. This station is part of an incremental strategy to upgrade high-speed rail service between Eugene, Portland, Seattle and Vancouver, B.C. The overall project will entail construction of a 700-foot long platform, relocation of a rail depot, lighting and adjacent parking for a total of $1.3 million.

I. HIGH SPEED RAIL: Passenger rail is an important component of the state’s transportation system. As one of eight designated high-speed rail corridors in the nation, the Pacific Northwest Passenger Rail Corridor is eligible for federal funding. The region supports efforts to secure federal appropriations for improvements in the Corridor. The region also urges the Congressional delegation to support the Amtrak bond proposal introduced last year in the Senate. The proposal will be considered again this year.
J. **INTERSTATE MAX REVITALIZATION PROGRAM (TCSP):** Metro is seeking a $1 million Congressional earmark for this endeavor.

Metro, the city of Portland, and Tri-Met are working together to develop a revitalization plan for Interstate Avenue in conjunction with Interstate MAX. Associated with that is the recent establishment of an urban renewal district by the City of Portland to provide a portion of the funding towards both the light rail and redevelopment. Under the FHWA Transportation and Community and System Preservation (TCSP) Pilot Program, funding could be provided to accelerate this redevelopment program.

It is expected that the urban renewal district will not provide sufficient funds to meet all the needs in the corridor and will not generate much revenue in the early years. As such, TCSP funds could be used to initiate several redevelopment projects, thereby serving as a catalyst for further redevelopment. As this creates new private investment, tax increment financing resulting from this investment will provide the funding for further redevelopment projects in the future and help establish the cash-flow for the funding contribution toward the light rail construction itself. Funding would be used for such activities as land acquisition and public street and pedestrian improvements that facilitate specific redevelopment projects.

K. **INTELLIGENT TRANSPORTATION SYSTEM:** The region is supporting a single $4.25 million “State of Oregon” earmark for the following ITS initiatives:

- TransPort – The TransPort project is a multi-agency project in the Portland region that is integrating each agency’s transportation system into a regional system to enhance traffic and transit management and traveler information.
- California-Oregon Advanced Transportation Systems (COATS) – This rural ITS project is applying ITS technology to rural issues in a bi-state area covering Southern Oregon and Northern California.
- Transit Trip Planning – This project will begin integrating transit information from Oregon transit providers into a statewide transit trip planning system.

L. **STARK STREET BOULEVARD (181st – 197th):** Congress authorized $1 million in TEA-21 “High Priority” funds for pedestrian improvements that support Gresham’s revitalization of the Rockwood Town Center with transit-oriented development and access. The project retrofits a dangerous, auto-dominated arterial into a boulevard that safely accommodates pedestrians, bicyclists, and transit users. The project links the central commercial area with area employers and services, as well as three heavily used MAX stations. The TEA-21 funds provide full project design, but only fund construction from 181st to 190th.

Additional funds of up to $2 million are needed to build the full project to 197th and address the massive, hazardous intersection of Stark/Burnside/MAX. Under the FHWA Transportation and Community and System Preservation (TCSP) Pilot Program, supplemental funding could be provided to complete the entire project within two years and an earmark of $1 million is requested.
M. CENTRAL CITY STREETCAR: The 130-acre North Macadam District is the last major undeveloped area within the City of Portland’s core. This largely unimproved area presents a unique opportunity to create a new neighborhood that will attract and accommodate jobs and housing in the Central City, furthering efforts to preserve our region’s natural and agricultural resources. To take advantage of the opportunity presented, challenges to development posed by poor transportation access and circulation, inadequate infrastructure, and areas of soil contamination must be responded to and overcome.

The extension of the Central City Streetcar into this district is critical to provide the necessary transit service to accommodate the 8,500 to 10,000 jobs and 1,500 to 3,000 housing units expected to develop during the next 20 years. This 1 1/2-mile extension is from Portland State University where the ongoing streetcar project terminates into the North Macadam District. It is estimated to cost $45 million, including rolling stock. Tax Increment Financing and private contributions through a Local Improvement District are identified to provide $37.5 million leaving $7.5 million as yet unfunded. Although this project is not intended to compete for FTA “New Starts” funding, it could qualify for other DOT, EPA or HUD categories.
